Part 1
General Provisions

85-15-101. Renumbered 85-15-207. Code Commissioner, 1985.

85-15-102. Renumbered 85-15-208. Code Commissioner, 1985.

85-15-103. Repealed. Sec. 23, Ch. 501, L. 1985.

History: En. Sec. 2, Ch. 370, L. 1971; amd. Sec. 2, Ch. 209, L. 1973; amd. Sec. 2, Ch. 335, L. 1975; R.C.M. 1947, 89-702.1.

85-15-104. Renumbered 85-15-107. Code Commissioner, 1985.

85-15-105. Short title. This chapter may be cited as the "Montana Dam Safety Act".

History: En. Sec. 1, Ch. 501, L. 1985.

85-15-106. Definitions. Unless the context requires otherwise, in this chapter the following definitions apply:

(1) "Alterations" or "repairs" means alterations or repairs that may directly affect the safety of a dam or reservoir.

(2) "Appurtenant works" means all works incident or attached to a dam or reservoir, including but not limited to:

(a) a spillway, either in the dam or separate from it;

(b) the reservoir and its rim;

(c) a low-level outlet; and

(d) a water conduit such as a tunnel, pipeline, or penstock, either through the dam or its abutments.

(3) "Construction" or "construct" includes construction, alteration, repair, enlargement, or removal of a dam or reservoir.

(4) "Dam" means an artificial barrier, including appurtenant works, used to impound or divert water.

(5) "Department" means the department of natural resources and conservation provided for in Title 2, chapter 15, part 33.

(6) "Emergency" means a threat to life caused by the condition of a dam or reservoir or by present or imminent floods that threaten the structural integrity of any dam or reservoir.

(7) "Engineer" means a registered professional engineer licensed to practice in the state of Montana under Title 37, chapter 67, part 3.

(8) "Enlargement" means a change in or addition to an existing dam or reservoir that raises or may raise the water storage elevation or increases the impoundment capacity of the reservoir.

(9) "High-hazard dam" means a dam or reservoir with an impounding capacity of 50 acre-feet or more at the maximum normal operating pool, the failure of which would be likely to cause loss of life.

(10) "Inspection" means a visual or mechanical check, a measurement, a boring, or any other method necessary for determination of the adequacy of construction techniques, conformity of work with approved plans and specifications, or the safety and operating performance of a dam or reservoir.

(11) "Owner" means a person who owns, controls, operates, maintains, manages, or proposes to construct a dam or reservoir.

(12) "Person" means an individual, association, partnership, corporation, business trust, state agency, political subdivision, utility, municipal or quasi-municipal corporation, or other entity or authorized agent, lessee, or trustee of any of the foregoing.

(13) "Removal" means removing, taking down, or changing the location of a dam or reservoir.

(14) "Reservoir" means a valley, basin, coulee, ravine, or other land area that contains impounded water.

History: En. Sec. 2, Ch. 501, L. 1985; amd. Sec. 1, Ch. 366, L. 1991; amd. Sec. 1, Ch. 418, L. 1993.

85-15-107. Exemptions. (1) The provisions of 85-15-108 through 85-15-110, 85-15-209 through 85-15-216, 85-15-305, 85-15-401, 85-15-502, and 85-15-503 do not apply to:

(a) dams subject to a permit issued pursuant to 82-4-335 for the period during which the dam is subject to the permit;

(b) federal dams and reservoirs;

(c) dams and reservoirs licensed and subject to inspection by the federal energy regulatory commission; or

(d) dams that are required to obtain a certificate of compliance pursuant to 75-20-201 for the period during which the dam is subject to the certificate.

(2) The provisions of 85-15-108 through 85-15-110, 85-15-209 through 85-15-216, 85-15-401, 85-15-502, and 85-15-503 do not apply to nonfederal dams and reservoirs located on federal lands if they are subject to a dam safety review by a federal agency.

(3) The provisions of 85-15-305 do not apply to dams and reservoirs at a national priority list site as defined by the federal Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), Public Law 96-510.

(4) The provisions of 85-15-108 through 85-15-110, 85-15-209 through 85-15-216, 85-15-401, 85-15-502, and 85-15-503 do not apply to dams used for a public sewage system or a public sewage disposal system as regulated by the department of environmental quality pursuant to Title 75, chapter 6, part 1, and Title 76, chapter 4, part 1.

History: En. 89-702.2 by Sec. 3, Ch. 335, L. 1975; R.C.M. 1947, 89-702.2; amd. Sec. 5, Ch. 501, L. 1985; Sec. 85-15-104, MCA 1983; redes. 85-15-107 by Code Commissioner, 1985; amd. Sec. 1, Ch. 159, L. 1987; amd. Sec. 2, Ch. 366, L. 1991; amd. Sec. 1, Ch. 612, L. 1993; amd. Sec. 17, Ch. 217, L. 2003; amd. Sec. 1, Ch. 197, L. 2025.

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 1, Ch. 197, L. 2025. Amendment effective October 1, 2025.

85-15-108. Entry upon land. Any employee or agent of the department authorized by the director of the department may enter upon any land to carry out the purposes of this chapter. The department or its agent shall give reasonable notice to the landowner of the intention to enter upon the land.

History: En. Sec. 18, Ch. 501, L. 1985.

85-15-109. Legal assistance. When requested by the department, the attorney general or the county attorneys within their respective counties shall perform legal services and conduct legal proceedings necessary to carry out the purposes of this chapter. The department may also employ legal counsel to enforce this chapter and to conduct proceedings under it.

History: En. Sec. 19, Ch. 501, L. 1985.

85-15-110. Rules. The department may adopt rules to implement the provisions of this chapter, including but not limited to rules to:

(1) classify high-hazard dams and reservoirs;

(2) review, approve, and issue permits;

(3) govern inspections under this chapter;

(4) establish safety standards for the design, construction, operation, and maintenance of high-hazard dams and reservoirs;

(5) establish emergency preparedness and warning procedures; and

(6) establish fees commensurate with costs to cover inspections under this chapter.

History: En. Sec. 20, Ch. 501, L. 1985.

Cross-References

Adoption and publication of rules, Title 2, ch. 4, part 3.

85-15-111 through 85-15-114 reserved.

85-15-115. Purpose. (1) The legislature finds that dams provide a variety of benefits to the state of Montana. These benefits include the regulation of streamflows for flood control; water storage for irrigation, for municipal, industrial, and stock water consumption, and for hydropower generation; improved opportunities for flatwater recreation; and improved fisheries. Additionally, dams play a crucial role in maintaining the vitality of Montana's economy. The state therefore has a legitimate and compelling interest in encouraging the construction of dams that conform to the water storage policy provided in 85-1-703.

(2) The legislature further finds that one impediment to the construction of new dams is the potential liability associated with dam construction and operation. The legislature understands the inherent risks to public safety associated with dam construction and operation but finds that compliance with the Montana Dam Safety Act reduces those risks to an acceptable level.

History: En. Sec. 2, Ch. 612, L. 1993.

Part 2
Construction, Inspection, and Repair of Dams

85-15-201. Renumbered 85-15-306. Code Commissioner, 1985.

85-15-202. Renumbered 85-15-307. Code Commissioner, 1985.

85-15-203. Renumbered 85-15-308. Code Commissioner, 1985.

85-15-204. Renumbered 85-15-309. Code Commissioner, 1985.

85-15-205. Renumbered 85-15-310. Code Commissioner, 1985.

85-15-206. Renumbered 85-15-311. Code Commissioner, 1985.

85-15-207. Dams and reservoirs — how constructed. No person may fill or procure to be filled with water any dam or reservoir that is not so thoroughly and substantially constructed as to safely hold any water that may be turned therein.

History: En. Sec. 2138, Rev. C. 1907; re-en. Sec. 2658, R.C.M. 1921; re-en. Sec. 2658, R.C.M. 1935; R.C.M. 1947, 89-701; amd. Sec. 3, Ch. 501, L. 1985; Sec. 85-15-101, MCA 1983; redes. 85-15-207 by Code Commissioner, 1985.

Cross-References

Fish ladders at dams, 87-1-222.

85-15-208. Construction in a secure manner. No person may construct or cause to be constructed a dam or reservoir for the purpose of accumulating, storing, appropriating, or diverting any of the waters of this state, except in a thorough, secure, and substantial manner.

History: En. Sec. 2139, Rev. C. 1907; amd. Sec. 1, Ch. 168, L. 1917; re-en. Sec. 2659, R.C.M. 1921; re-en. Sec. 2659, R.C.M. 1935; amd. Sec. 5, Ch. 280, L. 1965; amd. Sec. 1, Ch. 370, L. 1971; amd. Sec. 1, Ch. 209, L. 1973; amd. Sec. 1, Ch. 335, L. 1975; R.C.M. 1947, 89-702; amd. Sec. 4, Ch. 501, L. 1985; Sec. 85-15-102, MCA 1983; redes. 85-15-208 by Code Commissioner, 1985.

85-15-209. High-hazard dam — determination. A person proposing to construct a dam or reservoir with an impounding capacity of 50 acre-feet or more measured at the maximum normal operating pool shall make application to the department for a determination of whether the dam or reservoir is a high-hazard dam. The application must include the information required by the department. The department shall make the determination required by this section within 60 calendar days after a complete application is received by the department.

History: **En. Sec. 6, Ch. 501, L. 1985; amd. Sec. 3, Ch. 418, L. 1993.**

85-15-210. Preparation and approval of plans. (1) A person may not begin construction of a high-hazard dam as determined under 85-15-209 without first obtaining a construction permit from the department.

(2) An application for a construction permit must be submitted to the department and must contain:

(a) plans and specifications for the proposed construction, prepared by or under the direction of an engineer experienced in dam design and construction; and

(b) other data and information required by the department.

(3) Within 60 calendar days after receipt of the application and any additional information requested by the department, the department shall:

(a) issue a construction permit or deny the application, as filed; or

(b) issue a construction permit upon terms, conditions, or modifications the department considers appropriate.

History: **En. Sec. 7, Ch. 501, L. 1985.**

85-15-211. Inspection and reports during construction. (1) An engineer must be in charge of and responsible for inspections during construction of any high-hazard dam.

(2) Inspections during construction must be performed at intervals necessary to ensure conformity with the permit. The engineer in charge or a qualified designee shall perform the inspections.

(3) The department shall set procedures and requirements for reporting information obtained from, during, or as the result of an inspection. The engineer in charge shall certify all reports to the department.

(4) The department may also inspect the high-hazard dam during construction to ensure conformity with the construction permit.

(5) If the department finds that construction of the high-hazard dam does not conform with the construction permit, it may order that construction be stopped until changes are made in conformity with the permit.

History: **En. Sec. 8, Ch. 501, L. 1985; amd. Sec. 4, Ch. 418, L. 1993.**

85-15-212. Operating permit. (1) An operation plan must be prepared by the owner and approved by the department prior to operation of the high-hazard dam or reservoir. The operation plan must set forth at a minimum:

(a) a reservoir operation procedure;

(b) a maintenance procedure for the high-hazard dam and appurtenant works; and

(c) emergency procedures and warning plans.

(2) When construction is complete and if the high-hazard dam or reservoir conforms to the construction permit and when an operation plan has been approved, the department shall issue a permit to operate the high-hazard dam or reservoir, containing conditions on the safe operation of the high-hazard dam as it considers necessary.

History: **En. Sec. 9, Ch. 501, L. 1985; amd. Sec. 5, Ch. 418, L. 1993.**

85-15-213. Periodic inspections after construction. (1) (a) A high-hazard dam, whether or not previously permitted by the department, must be inspected as often as considered necessary by the department, but at least once every 5 years, in order to ensure the continued safe operation of the high-hazard dam.

(b) The department determination that an inspection is necessary more often than once every 5 years, as provided in subsection (1)(a), must be based on substantive evidence, and the reasons for that determination must be stated in writing.

(2) Periodic inspections required by this section must be performed by a qualified engineer, who shall make a report of the inspection to the department. If the department finds that the high-hazard dam conforms to current safety standards, it shall issue or reissue, as the case may be, a permit to continue operation of the high-hazard dam, containing conditions on the safe operation of the high-hazard dam as it considers necessary.

(3) The owner is responsible for inspections required under this section.

History: En. Sec. 10, Ch. 501, L. 1985; amd. Sec. 6, Ch. 418, L. 1993.

85-15-214. Requested inspections — costs — limitations against unsafe structures. (1) At its discretion or upon receipt of an affidavit complaining that the person or property of the complainant is endangered by the construction, maintenance, or operation of any dam or reservoir, the department may order an inspection of the dam or reservoir unless the data, records, and inspection reports on file are adequate to determine that the complaint is not meritorious.

(2) If the complainant continues to request an inspection even though the department has determined under subsection (1) that the complaint is not meritorious, the department may make the inspection upon requiring the complainant to deposit with the department money sufficient to cover the costs of the inspection.

(3) If the dam or reservoir is found to be defective, the department may require the person who owns the dam or reservoir to pay all or part of the expenses of inspection. If the department requires such payment, it shall present a bill of costs to the owner. The costs shall constitute a lien upon the dam, reservoir, and other property of the owner and may be collected by appropriate action in a court of competent jurisdiction.

(4) If the dam or reservoir is not found to be defective after an inspection made under subsection (2), any money deposited by the complainant therefor must be paid to the general fund.

(5) If the inspection discloses defects in the dam or reservoir that, in the judgment of the department, constitute an immediate hazard to life or property, the department may order:

(a) the draining of the dam or reservoir;

(b) the limitation or cessation of use of the dam or reservoir or any defective appurtenant works; or

(c) any other steps to eliminate the hazard until the dam, reservoir, or appurtenant works have been made safe and approved by the department.

History: En. Sec. 11, Ch. 501, L. 1985.

85-15-215. Emergency repairs or breaching. (1) In case of an emergency, the department may take any action necessary to safeguard life and property. This action must be commenced immediately by the owner, or by the department at the owner's expense if the owner fails to act. The department must be notified immediately of any proposed emergency repairs or breaching to be instituted by the owner.

(2) All costs incurred by the department during an emergency must be paid by the owner on receipt of a bill of costs from the department. The costs are a lien upon the dam, reservoir, and other property of the owner and may be collected by appropriate action in a court of competent jurisdiction.

History: En. Sec. 12, Ch. 501, L. 1985.

85-15-216. High-hazard dam permit cancellation. Failure to comply with the provisions of 85-15-209 through 85-15-212 or 85-15-214 subjects the permit to cancellation at any time during the progress of construction or the operation of the high-hazard dam. The department is authorized to cancel any permit if the provisions of 85-15-209 through 85-15-212 or 85-15-214 have not been or are not being complied with, and the cancellation operates as a forfeiture of all rights acquired under and by virtue of any permit approved by the department.

History: En. Sec. 15, Ch. 501, L. 1985; amd. Sec. 7, Ch. 418, L. 1993.

Part 3
Court Proceedings

85-15-301. Renumbered 85-15-402. Code Commissioner, 1985.

85-15-302. Renumbered 85-15-403. Code Commissioner, 1985.

85-15-303. Renumbered 85-15-404. Code Commissioner, 1985.

85-15-304. Renumbered 85-15-501(2). Code Commissioner, 1985.

85-15-305. Liability of owners for damage. (1) Except as provided in subsections (2) and (3), nothing in this chapter relieves an owner of a dam or reservoir of any legal duty, obligation, or liability incident to its ownership or operation, including any damages resulting from leakage or overflow of water or floods caused by the failure of the dam or reservoir.

(2) The owner of a dam or reservoir that has been permitted by the department in accordance with this chapter or that was designed and constructed under the supervision of an engineer and properly maintained is, in the absence of negligence, not liable for damages to persons or property resulting from flows of water from failure of the dam or reservoir.

(3) In addition, the owner of any dam or reservoir that has been permitted by the department in accordance with this chapter or that was designed and constructed under the supervision of an engineer and properly maintained may, without incurring liability, allow passage through the reservoir of inflows without diminution.

History: En. Sec. 14, Ch. 501, L. 1985; amd. Sec. 3, Ch. 612, L. 1993.

Part 4
Local Government Proceedings

85-15-401. Municipality or county prohibited from regulation. No municipality or county may regulate, supervise, or provide for the regulation or supervision of any dam or reservoir in this state or the construction, maintenance, or operation thereof or limit the size of any dam or reservoir or the amount of water that may be stored therein. This chapter does not prevent a municipality or county from adopting ordinances or regulations regulating, supervising, or providing for the regulation or supervision of dams and reservoirs that:

(1) are not within the state's jurisdiction; or

(2) are not subject to regulation by another public agency or body.

History: En. Sec. 13, Ch. 501, L. 1985.

85-15-402. Repealed. Sec. 9, Ch. 418, L. 1993.

History: En. Sec. 2148, Rev. C. 1907; re-en. Sec. 2668, R.C.M. 1921; re-en. Sec. 2668, R.C.M. 1935; R.C.M. 1947, 89-711; Sec. 85-15-301, MCA 1983; redes. 85-15-402 by Code Commissioner, 1985.

85-15-403. Repealed. Sec. 9, Ch. 418, L. 1993.

Collection and disposition of fines, penalties, forfeitures, and fees, 3-10-601.

85-15-503. Civil penalty. An owner of a dam with an impounding capacity of 50 acre-feet or greater measured at the maximum normal operating pool who fails to comply with a provision of this chapter or a rule or order of the department adopted or made pursuant to this chapter is subject to a civil penalty not to exceed $1,000. Each day of violation is a separate offense.

History: En. Sec. 4, Ch. 612, L. 1993.

CHAPTER 16
WHARVES AND DOCKS

Part 1 — Wharves and Docks

85-16-101. Who may build wharves and docks.
85-16-102. Public use of wharves and docks.
85-16-103. Revocation of license.
85-16-104. Land under navigable water.
85-16-105. Repealed.

Part 1
Wharves and Docks

85-16-101. Who may build wharves and docks. Any person or persons owning land bordering upon any of the navigable waters within the state are granted a license and permit to build docks and wharves over, across, and upon the lands under water belonging to the state. Such docks and wharves shall be extended out into such navigable water such distance only as may be necessary to permit all boats, steamboats, and vessels to safely land thereat and discharge and take on their cargoes and passengers.

History: En. Sec. 1, Ch. 38, L. 1909; re-en. Sec. 1605, R.C.M. 1921; re-en. Sec. 1605, R.C.M. 1935; R.C.M. 1947, 89-601.

85-16-102. Public use of wharves and docks. All docks and wharves built on any of the navigable waters of the state shall be public docks and wharves, and all boats, vessels, and steamboats plying such navigable waters shall have a right to land thereat and take on and discharge their cargoes and passengers thereon. The owner of such dock or wharf shall have the right to charge and collect from the owner or owners of such boat, steamboat, or vessel a reasonable compensation therefor.

History: En. Sec. 2, Ch. 38, L. 1909; re-en. Sec. 1606, R.C.M. 1921; re-en. Sec. 1606, R.C.M. 1935; R.C.M. 1947, 89-602.

85-16-103. Revocation of license. The license granted in 85-16-101 to build docks and wharves over and upon the lands under the navigable waters of this state conveys no title in such lands, and such license may be revoked by the state of Montana at any time.

History: En. Sec. 3, Ch. 38, L. 1909; re-en. Sec. 1607, R.C.M. 1921; re-en. Sec. 1607, R.C.M. 1935; R.C.M. 1947, 89-603.

85-16-104. Land under navigable water. By the term "land under water" is meant all land under any navigable waters of this state extending from high-water mark, or from the meander line where the shores of lakes or streams have been meandered, to the lake or stream.

History: En. Sec. 4, Ch. 38, L. 1909; re-en. Sec. 1608, R.C.M. 1921; re-en. Sec. 1608, R.C.M. 1935; R.C.M. 1947, 89-604.

85-16-105. Repealed. Sec. 1, Ch. 164, L. 1979.

History: En. Sec. 5, Ch. 38, L. 1909; re-en. Sec. 1609, R.C.M. 1921; re-en. Sec. 1609, R.C.M. 1935; amd. Sec. 21, Ch. 315, L. 1974; R.C.M. 1947, 89-605.

85-20-1902. Unitary administration and management ordinance.

Part 1
Yellowstone River Compact

85-20-101. Approval of compact. The legislative assembly of the state of Montana hereby approves and ratifies the compact designated as the "Yellowstone River Compact", dated at the city of Billings, state of Montana, on the 8th of December, 1950, signed by Fred E. Buck, A.W. Bradshaw, H.W. Bunston, John Herzog, John M. Jarussi, Ashton Jones, Chris Josephson, A. Wallace Kingsbury, P.F. Leonard, Walter M. McLaughlin, Dave M. Manning, Joseph Muggli, Chester E. Onstad, Ed F. Parriott, R.R. Renne, and Keith W. Trout, as state representatives of the state of Montana on a compact commission between the states of Montana, North Dakota, and Wyoming, which compact is as follows:

YELLOWSTONE RIVER COMPACT

The state of Montana, the state of North Dakota, and the state of Wyoming, being moved by consideration of interstate comity and desiring to remove all causes of present and future controversy between said states and between persons in one and persons in another with respect to the waters of the Yellowstone River and its tributaries, other than waters within or waters which contribute to the flow of streams within the Yellowstone National Park, and desiring to provide for an equitable division and apportionment of such waters and to encourage the beneficial development and use thereof, acknowledging that in future projects or programs for the regulation, control, and use of water in the Yellowstone River basin the great importance of water for irrigation in the signatory states shall be recognized, have resolved to conclude a compact as authorized under the act of congress of the United States of America, approved June 2, 1949 (Public Law 83, 81st congress, First Session), for the attainment of these purposes and to that end, through their respective governments, have named as their respective commissioners:

For the state of Montana:
Fred E. Buck
A. W. Bradshaw
H. W. Bunston
John Herzog
John M. Jarussi
Ashton Jones
Chris Josephson
A. Wallace Kingsbury
P. F. Leonard
Walter M. McLaughlin
Dave M. Manning
Joseph Muggli
Chester E. Onstad
Ed F. Parriott
R. R. Renne
Keith W. Trout
For the state of North Dakota:
I. A. Acker
Einar H. Dahl
J. J. Walsh
For the state of Wyoming:
L. C. Bishop
Earl T. Bower
J. Harold Cash
Ben F. Cochrane
Ernest J. Goppert
Richard L. Greene
E. C. Gwillim
E. J. Johnson
Lee E. Keith
N. V. Kurtz
Harry L. Littlefield
R. E. McNally
Will G. Metz
Mark N. Partridge
Alonzo R. Shreve
Charles M. Smith
Leonard F. Thornton
M. B. Walker

who, after negotiations participated in by R. J. Newell, appointed as the representative of the United States of America, have agreed upon the following articles, to wit:

Article I

A. Where the name of a state is used in this compact, as a party thereto, it shall be construed to include the individuals, corporations, partnerships, associations, districts, administrative departments, bureaus, political subdivisions, agencies, persons, permittees, appropriators, and all others using, claiming, or in any manner asserting any right to the use of the waters of the Yellowstone River system under the authority of said state.

B. Any individual, corporation, partnership, association, district, administrative department, bureau, political subdivision, agency, person, permittee, or appropriator authorized by or under the laws of a signatory state and all others using, claiming, or in any manner asserting any right to the use of the waters of the Yellowstone River system under the authority of said state shall be subject to the terms of this compact. Where the singular is used in this article, it shall be construed to include the plural.

Article II

A. The state of Montana, the state of North Dakota, and the state of Wyoming are hereinafter designated as "Montana", "North Dakota", and "Wyoming", respectively.

B. The terms "commission" and "Yellowstone River Compact commission" mean the agency created as provided herein for the administration of this compact.

C. The term "Yellowstone River basin" means areas in Wyoming, Montana, and North Dakota drained by the Yellowstone River and its tributaries and includes the area in Montana known as lake basin but excludes those lands lying within Yellowstone National Park.

D. The term "Yellowstone River system" means the Yellowstone River and all of its tributaries, including springs and swamps, from their sources to the mouth of the Yellowstone River near Buford, North Dakota, except those portions thereof which are within or contribute to the flow of streams within the Yellowstone National Park.

E. The term "tributary" means any stream which in a natural state contributes to the flow of the Yellowstone River, including interstate tributaries and tributaries thereof but excluding those which are within or contribute to the flow of streams within the Yellowstone National Park.

F. The term "interstate tributaries" means the Clarks Fork, Yellowstone River; the Big Horn River (except Little Big Horn River); the Tongue River; and the Powder River, whose confluences with the Yellowstone River are respectively at or near the city (or town) of Laurel, Big Horn, Miles City, and Terry, all in the state of Montana.

G. The terms "divert" and "diversion" mean the taking or removing of water from the Yellowstone River or any tributary thereof when the water so taken or removed is not returned directly into the channel of the Yellowstone River or of the tributary from which it is taken.

H. The term "beneficial use" is herein defined to be that use by which the water supply of a drainage basin is depleted when usefully employed by the activities of man.

I. The term "domestic use" shall mean the use of water by an individual or by a family unit or household for drinking, cooking, laundering, sanitation, and other personal comforts and necessities and for the irrigation of a family garden or orchard not exceeding one-half acre in area.

J. The term "stock water use" shall mean the use of water for livestock and poultry.

Article III

A. It is considered that no commission or administrative body is necessary to administer this compact or divide the waters of the Yellowstone River basin as between the states of Montana and North Dakota. The provisions of this compact, as between the states of Wyoming and Montana, shall be administered by a commission composed of one representative from the state of Wyoming and one representative from the state of Montana, to be selected by the governors of said states as such states may choose, and one representative selected by the director of the United States geological survey or whatever federal agency may succeed to the functions and duties of that agency, to be appointed by him at the request of the states to sit with the commission and who shall, when present, act as chairman of the commission without vote, except as herein provided.

B. The salaries and necessary expenses of each state representative shall be paid by the respective state; all other expenses incident to the administration of this compact not borne by the United States shall be allocated to and borne one-half by the state of Wyoming and one-half by the state of Montana.

C. In addition to other powers and duties herein conferred upon the commission and the members thereof, the jurisdiction of the commission shall include the collection, correlation, and presentation of factual data, the maintenance of records having a bearing upon the administration of this compact, and recommendations to such states upon matters connected with the administration of this compact, and the commission may employ such services and make such expenditures as reasonable and necessary within the limit of funds provided for that purpose by the respective states and shall compile a report for each year ending September 30 and transmit it to the governors of the signatory states on or before December 31 of each year.

D. The secretary of the army; the secretary of the interior; the secretary of agriculture; the chairman, federal power commission; the secretary of commerce, or comparable officers of whatever federal agencies may succeed to the functions and duties of these agencies and such other federal officers and officers of appropriate agencies of the signatory states having services or data useful or necessary to the compact commission shall cooperate, ex officio, with the commission in the execution of its duty in the collection, correlation, and publication of records and data necessary for the proper administration of the compact; and these officers may perform such other services related to the compact as may be mutually agreed upon with the commission.

E. The commission shall have power to formulate rules and regulations and to perform any act which it may find necessary to carry out the provisions of this compact and to amend such rules and regulations. All such rules and regulations shall be filed in the office of the state engineer of each of the signatory states for public inspection.

F. In case of the failure of the representatives of Wyoming and Montana to unanimously agree on any matter necessary to the proper administration of this compact, then the member selected by the director of the United States geological survey shall have the right to vote upon the matters in disagreement and such points of disagreement shall then be decided by a majority vote of the representatives of the states of Wyoming and Montana and said member selected by the director of the United States geological survey, each being entitled to one vote.

G. The commission herein authorized shall have power to sue and be sued in its official capacity in any federal court of the signatory states and may adopt and use an official seal which shall be judicially noticed.

Article IV

The commission shall itself or in conjunction with other responsible agencies cause to be established, maintained, and operated such suitable water gauging and evaporation stations as it finds necessary in connection with its duties.

Article V

A. Appropriative rights to the beneficial uses of the water of the Yellowstone River system existing in each signatory state as of January 1, 1950, shall continue to be enjoyed in accordance with the laws governing the acquisition and use of water under the doctrine of appropriation.

B. Of the unused and unappropriated waters of the interstate tributaries of the Yellowstone River as of January 1, 1950, there is allocated to each signatory state such quantity of that water as shall be necessary to provide supplemental water supplies for the rights described in paragraph A of this Article V, such supplemental rights to be acquired and enjoyed in accordance with the laws governing the acquisition and use of water under the doctrine of appropriation, and the remainder of the unused and unappropriated water is allocated to each state for storage or direct diversions for beneficial use on new lands or for other purposes as follows:

1. Clarks Fork, Yellowstone River

a. to Wyoming 60%
to Montana 40%

b. The point of measurement shall be below the last diversion from Clarks Fork above Rock Creek.

2. Big Horn River (exclusive of Little Big Horn River)

a. to Wyoming 80%
to Montana 20%

b. The point of measurement shall be below the last diversion from the Big Horn River above its junction with the Yellowstone River, and the inflow of the Little Big Horn River shall be excluded from the quantity of water subject to allocation.

3. Tongue River

a. to Wyoming	40%
to Montana	60%

b. The point of measurement shall be below the last diversion from the Tongue River above its junction with the Yellowstone River.

4. Powder River (including the Little Powder River)

a. to Wyoming	42%
to Montana	58%

b. The point of measurement shall be below the last diversion from the Powder River above its junction with the Yellowstone River.

C. The quantity of water subject to the percentage allocations in paragraph B 1, 2, 3, and 4 of this Article V shall be determined on an annual water year basis measured from October 1 of any year through September 30 of the succeeding year. The quantity to which the percentage factors shall be applied through a given date in any water year shall be, in acre-feet, equal to the algebraic sum of:

1. the total diversions, in acre-feet, above the point of measurement, for irrigation, municipal, and industrial uses in Wyoming and Montana developed after January 1, 1950, during the period from October 1 to that given date;

2. the net change in storage, in acre-feet, in all reservoirs in Wyoming and Montana above the point of measurement completed subsequent to January 1, 1950, during the period from October 1 to that given date;

3. the net change in storage, in acre-feet, in existing reservoirs in Wyoming and Montana above the point of measurement, which is used for irrigation, municipal, and industrial purposes developed after January 1, 1950, during the period October 1 to that given date;

4. the quantity of water, in acre-feet, that passed the point of measurement in the stream during the period from October 1 to that given date.

D. All existing rights to the beneficial use of waters of the Yellowstone River in the states of Montana and North Dakota below Intake, Montana, valid under the laws of these states as of January 1, 1950, are hereby recognized and shall be and remain unimpaired by this compact. During the period May 1 to September 30, inclusive, of each year, lands within Montana and North Dakota shall be entitled to the beneficial use of the flow of waters of the Yellowstone River below Intake, Montana, on a proportionate basis of acreage irrigated. Waters of tributary streams having their origin in either Montana or North Dakota, situated entirely in said respective states and flowing into the Yellowstone River below Intake, Montana, are allotted to the respective states in which situated.

E. There are hereby excluded from the provisions of this compact:

1. existing and future domestic and stock water uses of water, provided that the capacity of any reservoir for stock water so excluded shall not exceed 20 acre-feet;

2. devices and facilities for the control and regulation of surface waters.

F. From time to time the commission shall reexamine the allocations herein made and upon unanimous agreement may recommend modifications therein as are fair, just, and equitable, giving consideration among other factors to:

priorities of water rights;
acreage irrigated;
acreage irrigable under existing works; and
potentially irrigable lands.

Article VI

Nothing contained in this compact shall be so construed or interpreted as to affect adversely any rights to the use of the waters of Yellowstone River and its tributaries owned by or for Indians, Indian tribes, and their reservations.

Article VII

A. A lower signatory state shall have the right, by compliance with the laws of an upper signatory state, except as to legislative consent, to file application for and receive permits to appropriate and use any waters in the Yellowstone River system not specifically apportioned to or appropriated by such upper state as provided in Article V; and to construct or participate in the construction and use of any dam, storage reservoir, or diversion works in such upper state for the purpose of conserving and regulating water that may be apportioned to or appropriated by the lower state. Provided, that such right is subject to the rights of the upper state to control, regulate, and use the water apportioned to and appropriated by it. And provided further, that should an upper state elect, it may share in the use of any such facilities constructed by a lower state to the extent of its reasonable needs upon assuming or guaranteeing payment of its proportionate share of the cost of the construction, operation, and maintenance. This provision shall apply with equal force and effect to an upper state in the circumstance of the necessity of the acquisition of rights by an upper state in a lower state.

B. Each claim hereafter initiated for an appropriation of water in one signatory state for use in another signatory state shall be filed in the office of the state engineer of the signatory state in which the water is to be diverted, and a duplicate copy of the application or notice shall be filed in the office of the state engineer of the signatory state in which the water is to be used.

C. Appropriations may hereafter be adjudicated in the state in which the water is diverted, and where a portion or all of the lands irrigated are in another signatory state, such adjudications shall be confirmed in that state by the proper authority. Each adjudication is to conform with the laws of the state where the water is diverted and shall be recorded in the county and state where the water is used.

D. The use of water allocated under Article V of this compact for projects constructed after the date of this compact by the United States of America or any of its agencies or instrumentalities shall be charged as a use by the state in which the use is made. Provided, that such use incident to the diversion, impounding, or conveyance of water in one state for use in another shall be charged to such latter state.

Article VIII

A lower signatory state shall have the right to acquire in an upper state by purchase or through exercise of the power of eminent domain such lands, easements, and rights-of-way for the construction, operation, and maintenance of pumping plants, storage reservoirs, canals, conduits, and appurtenant works as may be required for the enjoyment of the privileges granted herein to such lower state. This provision shall apply with equal force and effect to an upper state in the circumstance of the necessity of the acquisition of rights by an upper state in a lower state.

Article IX

Should any facilities be constructed by a lower signatory state in an upper signatory state under the provisions of Article VII, the construction, operation, repairs, and replacements of such facilities shall be subject to the laws of the upper state. This provision shall apply with equal force and effect to an upper state in the circumstance of the necessity of the acquisition of rights by an upper state in a lower state.

Article X

No water shall be diverted from the Yellowstone River basin without the unanimous consent of all the signatory states. In the event water from another river basin shall be imported into the Yellowstone River basin or transferred from one tributary basin to another by the United States of America, Montana, North Dakota, or Wyoming or any of them jointly, the state having the right to the use of such water shall be given proper credit therefor in determining its share of the water apportioned in accordance with Article V herein.

Article XI

The provisions of this compact shall remain in full force and effect until amended in the same manner as it is required to be ratified to become operative as provided in Article XV.

Article XII

This compact may be terminated at any time by unanimous consent of the signatory states, and upon such termination all rights then established hereunder shall continue unimpaired.

Article XIII

Nothing in this compact shall be construed to limit or prevent any state from instituting or maintaining any action or proceeding, legal or equitable, in any federal court or the United States supreme court, for the protection of any right under this compact or the enforcement of any of its provisions.

Article XIV

The physical and other conditions characteristic of the Yellowstone River and peculiar to the territory drained and served thereby and to the development thereof have actuated the signatory states in the consummation of this compact, and none of them, or the United States of America by its consent and approval, concedes thereby the establishment of any general principle or precedent with respect to other interstate streams.

Article XV

This compact shall become operative when approved by the legislature of each of the signatory states and consented to and approved by the congress of the United States.

Article XVI

Nothing in this compact shall be deemed:

(a) to impair or affect the sovereignty or jurisdiction of the United States of America in or over the area of waters affected by such compact, any rights or powers of the United States of America, its agencies, or instrumentalities in and to the use of the waters of the Yellowstone River basin or its capacity to acquire rights in and to the use of said waters;

(b) to subject any property of the United States of America, its agencies, or instrumentalities to taxation by any state or subdivision thereof or to create an obligation on the part of the United States of America, its agencies, or instrumentalities, by reason of the acquisition, construction, or operation of any property or works of whatsoever kind, to make any payments to any state or political subdivision thereof, state agency, municipality, or entity whatsoever in reimbursement for the loss of taxes;

(c) to subject any property of the United States of America, its agencies, or instrumentalities to the laws of any state to an extent other than the extent to which these laws would apply without regard to the compact.

Article XVII

Should a court of competent jurisdiction hold any part of this compact to be contrary to the constitution of any signatory state or of the United States of America, all other severable provisions of this compact shall continue in full force and effect.

Article XVIII

No sentence, phrase, or clause in this compact or in any provision thereof shall be construed or interpreted to divest any signatory state or any of the agencies or officers of such states of the jurisdiction of the water of each state as apportioned in this compact.

IN WITNESS WHEREOF the commissioners have signed this compact in quadruplicate original, one of which shall be filed in the archives of the department of state of the United States of America and shall be deemed the authoritative original, and of which a duly certified copy shall be forwarded to the governor of each signatory state.

Done at the city of Billings in the state of Montana, this 8th day of December, in the year of Our Lord, one thousand nine hundred and fifty.

Definitions, 85-2-801.

85-20-102. Purpose of the part. Under the provisions of the Yellowstone River Compact (Chapter 39, Laws of Montana 1951), all appropriative rights to the beneficial uses of the waters of the interstate tributaries of the Yellowstone River existing in each signatory state as of January 1, 1950, have been recognized and shall continue to be enjoyed in accordance with the laws governing the acquisition and use of water under the doctrine of appropriation. All appropriative rights to the beneficial uses of the waters of the interstate tributaries of the Yellowstone River acquired after January 1, 1950, are subject to distribution in the states of Montana and Wyoming in accordance to the percentages in the different basins as provided in subsections (2) and (3) of Article V of said compact. The purpose of this part is to provide the means to determine the various appropriative rights to the beneficial uses of water of the interstate tributaries of the Yellowstone River acquired after January 1, 1950, and the quantity of water diverted and used by each such appropriator during each year, to enable the state of Montana and the Yellowstone River Compact commission to comply with and to administer the percentage allocations as provided in subsections (2) and (3) of Article V of said compact.

History: En. Sec. 1, Ch. 92, L. 1953; R.C.M. 1947, 89-905.

85-20-103. Definitions. Unless the context requires otherwise, in this part the following definitions apply:

(1) "Department" means the department of natural resources and conservation provided for in Title 2, chapter 15, part 33.

(2) "Divert" and "diversion" mean the taking or removing of water from any interstate tributary or any tributary thereof, when the water so taken or removed is not returned directly into the channel of the interstate tributary or of the tributary thereof from which it is taken.

(3) "Domestic use" means the use of water by an individual or by a family unit or household for drinking, cooking, laundering, sanitation, and other personal comforts and necessities and for the irrigation of a family garden or orchard not exceeding one-half acre in area.

(4) "Interstate tributaries" or "interstate tributary" means the following described rivers which contribute to the flow of the Yellowstone River in the state of Montana, including all tributaries thereof: the Clarks Fork of the Yellowstone River; the Big Horn River (except the Little Big Horn River); the Tongue River; and the Powder River, whose confluences with the Yellowstone River are respectively at or near the city (or town) of Laurel, Big Horn, Miles City, and Terry, all in the state of Montana.

(5) "Person" means any person, corporation, partnership, association, municipal corporation, agency, and all others authorized by the laws of the state to appropriate water for beneficial uses.

(6) "Stock water use" means the use of water for livestock and poultry.

History: En. Sec. 2, Ch. 92, L. 1953; amd. Sec. 156, Ch. 253, L. 1974; R.C.M. 1947, 89-906.

85-20-104. Filing written statement with department. (1) A person claiming an appropriative right to the use of any water of any interstate tributary that was acquired after January 1, 1950, shall, within 60 days after February 25, 1953, or before the person diverts any water, file with the department at its office in Helena, Montana, a written statement containing the following information:

(a) the name of the claimant and the claimant's address;

(b) the date of appropriation or the date when the water was first applied to a beneficial use;

(c) the quantity of water claimed;

(d) the name of the stream, river, or other source of water from which the diversion is made, if it has a name, and if it does not, a description identifying the stream, river, or source;

(e) the purpose for which the water is claimed and the place of intended use;

(f) the means of diversion;

(g) whether or not a weir or other device for measuring the water intended to be diverted has been installed in the claimant's ditch or other means of diversion;

(h) if a notice of appropriation was filed with the county clerk and recorder, the name of the county where it was filed;

(i) whether the appropriation was made from an adjudicated or nonadjudicated stream, river, or other source of water.

(2) The written statement must be verified by the affidavit of the claimant or someone in the claimant's behalf. The affidavit must state that the matters and facts contained in the written statement are true.

History: En. Sec. 3, Ch. 92, L. 1953; amd. Sec. 10, Ch. 280, L. 1965; amd. Sec. 157, Ch. 253, L. 1974; amd. Sec. 11, Ch. 460, L. 1977; R.C.M. 1947, 89-907; amd. Sec. 2826, Ch. 56, L. 2009.

85-20-105. Duty to install measuring devices. A person claiming an appropriative right to use any waters of any interstate tributary of the Yellowstone River that was acquired after January 1, 1950, shall, after February 25, 1953, and before the person diverts any water, install in the person's ditch or other means of diversion a weir or other measuring device so that all of the water to be diverted by the person can be accurately measured. The installation of a weir or other measuring device is subject to the approval of the department, and if in its judgment the weir or other measuring device or the installation of the weir or device is defective so that the water cannot be accurately measured, it may order the installation of an accurate measuring device. The claimant may not divert any water until the claimant complies with the order.

History: En. Sec. 4, Ch. 92, L. 1953; amd. Sec. 11, Ch. 280, L. 1965; amd. Sec. 158, Ch. 253, L. 1974; R.C.M. 1947, 89-908; amd. Sec. 2827, Ch. 56, L. 2009.

85-20-106. Duty to measure water. Each claimant shall measure all the water being diverted by the claimant, keep accurate records of the diversion on forms prescribed and furnished by the department, and, within 15 days after November 1 of each year, file the written records with the department at its office in Helena, Montana.

History: En. Sec. 5, Ch. 92, L. 1953; amd. Sec. 12, Ch. 280, L. 1965; amd. Sec. 159, Ch. 253, L. 1974; R.C.M. 1947, 89-909; amd. Sec. 2828, Ch. 56, L. 2009.

85-20-107. Status of prior rights. The rights to the beneficial use of any water of any interstate tributary of the Yellowstone River acquired prior to and including January 1, 1950, shall not be impaired by or subject to this part.

History: En. Sec. 6, Ch. 92, L. 1953; R.C.M. 1947, 89-910.

85-20-108. Domestic and stock uses exempted. Any appropriation of water from any interstate tributary of the Yellowstone River made for domestic or stock water uses will not come within the provisions of this part whenever the capacity of a reservoir for stock water does not exceed 20 acre-feet.

History: En. Sec. 7, Ch. 92, L. 1953; amd. Sec. 12, Ch. 460, L. 1977; R.C.M. 1947, 89-911.

85-20-109. Department to make rules. The department of natural resources and conservation shall adopt and enforce reasonable rules consistent with this part and the Yellowstone River Compact.

History: En. Sec. 8, Ch. 92, L. 1953; amd. Sec. 13, Ch. 280, L. 1965; amd. Sec. 160, Ch. 253, L. 1974; R.C.M. 1947, 89-912; amd. Sec. 483, Ch. 418, L. 1995.

85-20-110. Application to adjudicated and nonadjudicated waters. The provisions of this part shall apply to both adjudicated and nonadjudicated waters of the interstate tributaries of the Yellowstone River.

History: En. Sec. 9, Ch. 92, L. 1953; R.C.M. 1947, 89-913.

85-20-111. Department to make record available. The department shall furnish and make available to the Yellowstone River Compact commission, from the records filed in its office, all appropriative rights acquired after January 1, 1950, to the use of the waters of the interstate tributaries of the Yellowstone River in the state of Montana, the amount of the annual diversions from those interstate tributaries, and any other information that its records may disclose as may be required by the Yellowstone River Compact commission.

History: En. Sec. 10, Ch. 92, L. 1953; amd. Sec. 14, Ch. 280, L. 1965; amd. Sec. 161, Ch. 253, L. 1974; R.C.M. 1947, 89-914.

85-20-112. Services of county attorneys. The county attorneys of the state shall perform such legal services and bring such proceedings in carrying out the purposes of this part within their respective counties as the department shall require.

History: En. Sec. 11, Ch. 92, L. 1953; amd. Sec. 162, Ch. 253, L. 1974; R.C.M. 1947, 89-915.

85-20-113. Penalty. Any person who violates or refuses or neglects to comply with any provision of this part or any order or rule adopted by the board or department pursuant thereto or the Yellowstone River Compact is guilty of a misdemeanor and upon conviction shall be fined not less than $25 or more than $200 for each offense.

History: En. Sec. 12, Ch. 92, L. 1953; amd. Sec. 163, Ch. 253, L. 1974; R.C.M. 1947, 89-916.

85-20-114 through 85-20-120 reserved.

85-20-121. Yellowstone compact obligations unimpaired. Nothing contained in Chapter 280, Laws of 1965, shall in any manner impair the obligations of the state of Montana under the Yellowstone River Compact.

History: En. Sec. 20, Ch. 280, L. 1965; R.C.M. 1947, 89-103.7.

Part 2
Fort Peck-Montana Compact

Part Cross-References

Reserved Water Rights Compact Commission, 2-15-212.
Indian and federal water rights, Title 85, ch. 2, part 7.

85-20-201. Fort Peck-Montana compact ratified. The compact entered into by the state of Montana and the Assiniboine and Sioux tribes of the Fort Peck Indian reservation and filed with the secretary of state of the state of Montana under the provisions of 85-2-702 on May 15, 1985, is ratified. The compact is as follows:

FORT PECK-MONTANA COMPACT

This Compact is entered into by and between THE STATE OF MONTANA and THE ASSINIBOINE AND SIOUX TRIBES OF THE FORT PECK INDIAN RESERVATION (herein called the "Parties") and shall become effective as set forth hereinafter.

The Parties agree as follows:

ARTICLE I
GENERAL PURPOSES

The basic purposes of this Compact are to determine finally and forever all rights of the Assiniboine and Sioux Tribes of the Fort Peck Indian Reservation in the State of Montana to water on, under, adjacent to, or otherwise appurtenant to the Reservation, to settle existing disputes and remove causes of future controversy between the Tribes and the State and between Indians of the Fort Peck Reservation and other persons concerning waters of the Missouri River, its tributaries, and ground water, and to settle all claims by the Tribes and by the United States on behalf of the Tribes in United States v. Aageson, Civ. No. 79-21-GF (D. Mont.), United States v. Aasheim, Civ. No. 79-40-BLG (D. Mont.) and the pending adjudication in the state water court initiated pursuant to the provisions of Chapter 697, Laws of Montana 1979.

ARTICLE II
DEFINITIONS

For purposes of this Compact, and for no other purposes, the following definitions apply:

(1) "Acre-foot" means the amount of water necessary to cover one acre to a depth of one foot and is equivalent to 43,560 cubic feet.

(2) "Annual" or "per year" means the calendar year commencing January 1 and ending December 31.

(3) "Board" means the Fort Peck-Montana Compact Board established by Article VI.

(4) "Conservation (carry-over) storage" is storage provided in a reservoir to capture and hold water that would otherwise go downstream. Such storage holds the water for beneficial use later in the season or is carried over to a subsequent season or seasons. Evaporation from the surface of such reservoir is considered to be a consumptive use to the extent that it exceeds the evaporative and transpirational losses which occurred in the reservoir area prior to its construction.

(5) "Consumptive use" means the amount of irrigation water that is transpired by vegetation, converted in the processes of photosynthesis and plant tissue growth, and evaporated from adjacent soils, water surfaces and foliage. For uses other than irrigation, consumptive use means the quantity of water diverted less the quantity of reusable return flow within the State.

(6) "Court of competent jurisdiction" means a state or federal district court which otherwise has jurisdiction of the subject matter and the parties, or a tribal court which otherwise has such jurisdiction provided that all parties to the case consent to tribal court jurisdiction.

(7) "Diversion" means the removal of water from its natural course or location by means of a ditch, canal, flume, bypass, pipeline, conduit, well, pump, or other structure or device, or the impoundment of water in a reservoir. Where a reservoir is constructed or operated on a stream, the annual diversion shall be the greater of:

(a) the inflow into the reservoir minus the outflow for releases or spills downstream from the reservoir, or

(b) withdrawals of water from the reservoir for actual use.

(8) "Domestic use" means the diversion of water by one or more individuals, family units or households for drinking, cooking, laundering, sanitation and other personal comforts and necessities; and for the irrigation of a family garden or orchard not exceeding one-half acre in area.

(9) "Fort Peck Irrigation Project" means those irrigation systems and works constructed pursuant to the Act of May 30, 1908, 35 Stat. 558, and all lands receiving water from such systems and works.

(10) "Fort Peck Reservoir" means that body of surface water impounded by Fort Peck Dam, at the current spillway elevation.

(11) "Full service irrigation" means any form of irrigation that distributes water on a regularly scheduled basis in order to satisfy the full seasonal crop and soil water requirements.

(12) "Ground water" means any water located under the surface of the land or the bed of any stream, lake, reservoir, or other body of surface water. All other water shall be considered surface water.

(13) "Indian" means any person who:

(a) is an enrolled member of the Tribes; or

(b) is a member of a tribe that is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians; or

(c) holds or is recognized by the Secretary of the Interior as eligible to hold trust or restricted property on the Reservation.

(14) "Industrial" means the use of water for any uses that benefit an industrial enterprise including, but not limited to, industrial cooling, energy production, and evaporation associated with any industrial operation. Among the purposes excluded from the industrial use category are irrigation, stockwater, and domestic uses.

(15) "Instream flow" means that quantity of water scheduled to remain in a stream to maintain fish and wildlife resources.

(16) "Missouri River" means the river formed by the confluence of the Gallatin, Jefferson and Madison Rivers in southwestern Montana, and flowing easterly beyond the eastern boundary of Montana.

(17) "Partial service irrigation" means the diversion of flood runoff from natural channels or water courses and spreading such water for the purpose of applying as much water as practicable to the land during periods of high stream flow to increase crop production.

(18) "Parties" means the Tribes and the State.

(19) "Person" means an individual or any other entity, public or private, including the State, the Tribes, and the government of the United States and all officers, agents, and departments thereof.

(20) "Regulatory Storage" is storage provided as a part of a water distribution system for operational purposes. Evaporation loss from the distribution system itself is accounted for and is a part of the unit consumptive use rate established in this Compact and is therefore not considered to be a separate item of consumptive use.

(21) "Reservation" means the Fort Peck Indian Reservation as established in the agreement of December 28 and December 31, 1886, and confirmed by the Act of May 1, 1888, 25 Stat. 113.

(22) "Reusable" means capable of further beneficial use.

(23) "State" means the State of Montana and all officers, agents, departments, and political subdivisions thereof. Unless otherwise indicated, for purposes of notification or consent, "State" means the Director of the State Department of Natural Resources and Conservation or its successor agency.

(24) "Transfer" means any authorization for the delivery or use of water by a joint venture, service contract, lease, sale, exchange or other similar agreement.

(25) "Tribal Water Right" means the right to divert and use water as confirmed by Article III of this Compact.

(26) "Tribes" means the Assiniboine and Sioux Tribes of the Fort Peck Indian Reservation and all officers, agents and departments thereof. Unless otherwise indicated, for purposes of notification or consent, "Tribes" means the Tribal Chairman or the Chief Executive Official of the Tribes at the time.

(27) "Tributary" or "tributaries of the Missouri River that flow through or adjacent to the Reservation" means those tributaries of the Missouri River that traverse the Reservation, generally in a north to south direction, including:

(a) streams that form the east and west boundaries of the Reservation (Big Muddy Creek, Porcupine Creek and the Milk River);

(b) streams that originate outside the Reservation but empty into the Missouri River within the boundaries of the Reservation (the Poplar River and its tributaries);

(c) streams that are wholly contained within the boundaries of the Reservation (Chelsea Creek, Tule Creek, Wolf Creek, Oswego Creek, and Little Porcupine Creek); and

(d) all other watercourses that traverse the Reservation.

(28) "Wasteful" means the unreasonable loss of water through the design or negligent operation of a diversion or of a water distribution facility.

ARTICLE III
TRIBAL WATER RIGHT

A. General Statement of the Tribal Water Right. The Assiniboine and Sioux Tribes of the Fort Peck Indian Reservation have the right to divert annually from the Missouri River, certain of its tributaries, and ground water beneath the Reservation the lesser of (i) 1,050,472 acre-feet of water, or (ii) the quantity of water necessary to supply a consumptive use of 525,236 acre-feet per year for the uses and purposes set forth in this Compact with a priority date of May 1, 1888, provided that no more than 950,000 acre-feet of water, or the quantity of water necessary to supply a consumptive use of 475,000 acre-feet may be diverted annually from surface water sources. This right is held in trust by the United States for the benefit of the Tribes and is further defined and limited as set forth in this Compact.

B. Persons Who May Use the Tribal Water Right. All uses of water authorized under any applicable law by the following persons shall be considered and calculated as uses of the Tribal Water Right:

1. the Tribes within or outside the Reservation;

2. all individual Indians using water within the Reservation including, but not limited to, Indians exercising uses established pursuant to state law prior to the effective date of this Compact;

3. all non-Indian successors-in-interest to any allottee actually using water within the Reservation by virtue of a water right arising under the laws of the United States, which water right was acquired directly or indirectly from an Indian predecessor-in-interest;

4. all other persons receiving water from the Fort Peck Irrigation Project including, but not limited to, persons exercising uses established pursuant to state law prior to the effective date of this Compact;

5. all other persons authorized to use water by the Tribes pursuant to this Compact, within or outside the Reservation;

6. the United States as trustee for the Tribes or any Indian including, but not limited to, persons exercising uses established pursuant to state law prior to the effective date of this Compact.

C. Measure of Consumptive Use for Irrigation. Irrigation usage of the Tribal Water Right shall be conclusively deemed to cause a consumptive use of 1.8 acre-feet per acre per year for full service irrigation and 0.48 acre-feet per acre per year for partial service irrigation. Any loss of water due to evaporation from reservoirs constructed in the future for conservation (carry-over) storage rather than for regulatory storage by the United States for the benefit of the Tribes or any Indian, or constructed for such conservation storage by the Tribes or by any Indian, shall be counted as a consumptive use.

D. Purposes for Which the Tribal Water Right May be Used. Within the Reservation, use of water in the exercise of the Tribal Water Right for any purpose may be authorized by the Tribes without regard to whether such use is beneficial as defined by valid state law. No use of the Tribal Water Right may be wasteful or inconsistent with the terms of this Compact. Outside the Reservation, any use of water in the exercise of the Tribal Water Right shall be beneficial as defined by valid state law on the date the Tribes give notice to the State of a proposed use outside the Reservation.

E. Facilities Diverting or Using the Tribal Water Right Outside the Reservation. All persons diverting or using the Tribal Water Right outside the Reservation, including the Tribes as sovereign, shall apply for all permits, certificates, variances and other authorizations required by valid state laws regulating, conditioning or permitting the siting, construction, operation, alteration or use of any equipment, device, facility or associated facility proposed to use or transport water located outside the Reservation, and shall comply with all applicable provisions of this Compact. A diversion or use of water in the exercise of the Tribal Water Right may be made only after all permits, certificates, variances or other authorizations applied for pursuant to this paragraph have been obtained, and the diversion or use has not been found unlawful by a court of competent jurisdiction.

F. Amounts To Be Diverted from the Missouri River.

1. Diversions of water for use within or outside the Reservation may be made in the exercise of the Tribal Water Right from Fort Peck Reservoir and the mainstem of the Missouri River—but without utilization of the conservation (carry-over) storage of Fort Peck Reservoir—in the following amounts:

(a) during the months of November, December, January, February and March, not to exceed 40,000 acre-feet per month;

(b) during the months of April and October, not to exceed 50,000 acre-feet per month;

(c) during the months of May and September, not to exceed 105,000 acre-feet per month;

(d) during the month of June, not to exceed 145,000 acre-feet;

(e) during the month of July, not to exceed 215,000 acre-feet;

(f) during the month of August, not to exceed 180,000 acre-feet.

Provided that the aggregate of monthly diversions in the exercise of the Tribal Water Right from surface water shall not exceed 950,000 acre-feet per year, and the total annual consumptive use shall not exceed 475,000 acre-feet.

2. The Tribes shall report the amount of all actual diversions from Fort Peck Reservoir and the mainstem of the Missouri River to the United States Army Corps of Engineers by April 1st of the calendar year following the year in which such diversions are made in accordance with paragraph 5 of section J of this Article.

3. All diversions authorized by paragraph 1 of this section may be made without payment to the United States, but the Tribes and any user of the Tribal Water Right shall otherwise comply with all generally applicable laws and regulations of the United States.

G. Export of the Tribal Water Right Outside the State. Use of the Tribal Water Right outside the State shall be in compliance with all valid provisions of state law in effect at the time of the proposed transfer that prohibit, regulate, condition, or permit the transportation of water outside the State.

H. Non-use of the Tribal Water Right not a Forfeiture. Non-use of any part of the Tribal Water Right shall not constitute a relinquishment, forfeiture or abandonment of the right to such use.

I. Sources of Diversions of the Tribal Water Right. In the exercise of the Tribal Water Right water may be diverted:

1. Within the Reservation for use within the Reservation from:

(a) the mainstem of the Missouri River within or adjacent to the Reservation;

(b) any tributary of the Missouri River that flows through or adjacent to the Reservation, except the mainstem of the Milk River; and

(c) any ground water source.

2. Outside the Reservation for use within the Reservation from:

(a) Fort Peck Reservoir;

(b) any tributary of the Missouri River that flows through or adjacent to the Reservation, except the mainstem of the Milk River; and

(c) the mainstem of the Missouri River below Fort Peck Dam.

Diversions authorized by subparagraphs (a) and (c) shall comply with paragraph 1 of section J of this Article.

3. Within or outside the Reservation for use outside the Reservation from:

(a) Fort Peck Reservoir;

(b) any tributary of the Missouri River that flows through or adjacent to the Reservation, except the mainstem of the Milk River, provided that water from these sources shall not be transported outside the respective watershed of each stream;

(c) the mainstem of the Missouri River below Fort Peck Dam; and

(d) the mainstem of the Missouri River above Fort Peck Reservoir.

Diversions authorized by subparagraphs (a) and (c) shall comply with paragraph 1 of section J of this Article. Diversions authorized by subparagraph (b) shall comply with paragraph 4 of section K of this Article. Diversions authorized by subparagraph (d) shall comply with paragraph 3 of section J of this Article.

J. Notice of and Conditions upon Diversions and Uses of the Tribal Water Right.

1. The Tribes shall give the State not less than 180 days advance written notice of any proposed diversion or use of the Tribal Water Right authorized by subparagraphs 2(a) and 2(c) and subparagraphs 3(a) and 3(c) of section I of this Article and shall, in the case of any transfer of the Tribal Water Right, except agreements on the tributaries pursuant to paragraph 4 of section K of this Article, offer the State an opportunity to participate as provided in paragraph 2 of section K of this Article. Such notice shall include sufficient documentation to demonstrate that:

(a) the proposed use of water complies with section D of this Article;

(b) for diversions outside the Reservation, the proposed means of diversion and the construction and operation of the diversion works are adequate;

(c) the proposed use and diversion will not adversely affect, except with the consent of the owner of such right, any of the following rights to the use of water existing at that time:

(i) any water right arising under the laws of the United States;

(ii) any appropriative right to the use of water established pursuant to the laws of the State that has not been abandoned, but excluding any reservation of water made pursuant to the laws of the State which has not been put to actual beneficial use by the date notice is given;

(d) the proposed use does not cause any unreasonable significant adverse environmental impact; and

(e) proposed diversions in excess of 4,000 acre-feet per year and 5.5 cubic feet per second of water will not:

(i) substantially impair the quality of water for existing uses in the source of water from which the diversion is made;

(ii) be made where low quality water which can economically be used is legally and physically available to the Tribes for the proposed use;

(iii) create or substantially contribute to saline seep; or

(iv) substantially injure fish or wildlife populations in the source of water from which the diversion is made.

The requirements of subparagraph (c) of this paragraph may be satisfied by a showing that the owner of such right has consented to the adverse effect. Subparagraph (c) shall not be construed to alter or avoid in any way the consequences resulting from such consent under state law.

2. A proposed diversion or use of the Tribal Water Right outside the Reservation authorized by subparagraphs 2(a) and 2(c) and subparagraphs 3(a) and 3(c) of section I of this Article may be challenged only:

(a) within 30 days after the expiration of the notice period provided in paragraph 1 of this section;

(b) in a court of competent jurisdiction; and

(c) by the State or by a person whose rights are adversely affected by the proposed diversion or use.

In any such case, the Tribes shall have the burden of going forward and the burden of proving by a preponderance of the evidence that they have satisfied the requirements of paragraph 1 of this section.

3. Diversions of water in the exercise of the Tribal Water Right outside the Reservation from the mainstem of the Missouri River above Fort Peck Reservoir, as authorized in subparagraph 3(d) of section I of this Article, may be made so long as the Tribes or any user of the Tribal Water Right:

(a) comply with all the laws of the State in effect at the time the diversion is proposed, including but not limited to state water use statutes;

(b) give not less than 180 days advance written notice of any proposed diversion in the manner required in paragraph 5 of this section:

(i) if the diversion is to be made from a reservoir, to the operator of the reservoir; or

(ii) if the diversion is not to be made from a reservoir, to the operator of the first dam, upstream and downstream, if any, from the point of diversion;

(c) obtain approval of the diversion from the State legislature.

4. For purposes of demonstrating compliance with subparagraph 1(c) and subparagraph 3(a) of this section and paragraph 6 of Section K of this Article, the portion of the Tribal Water Right to be diverted will be deemed an appropriative right which has:

(a) been acquired on May 1, 1888;

(b) a point of diversion and use where the water is actually being diverted and used or, if not actually being diverted, where the water would first flow on or adjacent to the Reservation;

(c) the existing use or, if not actually in use, an irrigation use provided, however, that the use can be transferred to a purpose other than irrigation without restriction as to period of use so long as the requirements of Section F of this Article are observed;

(d) the actual consumptive use or, if not actually in use or if being used for irrigation purposes, a consumptive use of 1.8 acre-feet per acre per year; and

(e) not been abandoned or forfeited.

5. Any notice of a diversion required by paragraph 3 of this section and any report of a diversion required by paragraph 2 of section F of this Article shall specify:

(a) the person authorized to make the diversion;
(b) the amount of water proposed or authorized to be diverted annually;
(c) the amount proposed or authorized for annual consumptive use;
(d) the point of diversion;
(e) the period of use;
(f) the place of use; and
(g) the purposes for which the water may be used.

K. Transfers of the Tribal Water Right.

1. As an incident to and in the exercise of the Tribal Water Right, the Tribes may transfer within or outside the Reservation, as authorized by federal law and this Compact, the right to use water but may not permanently alienate such right or any part thereof. Any such transfer of water by the Tribes shall be subject to all provisions of this Compact.

2. Prior to making any transfer which authorizes use of water outside the Reservation to be diverted from the mainstem of the Missouri River, including Fort Peck Reservoir, the Tribes shall give not less than 180 days advance written notice to the State of the proposed terms and conditions of the transfer, and shall offer the State the opportunity to participate in the transfer as a substantially equal partner with the Tribes, assuming obligations and receiving benefits of the transfer under terms and conditions agreed to by the Parties. If the State does not accept the opportunity within the 180-day notice period, or if the State unreasonably delays the institution or completion of approval processes required by state law or unreasonably delays resolution of any litigation arising from its decision to accept the opportunity, the Tribes may proceed with the proposed transfer without State participation, provided that the proposed transfer shall be subject to all other provisions of this Compact. If the State does not accept the opportunity, or if State participation in the joint transfer is not approved, the State shall not later pursue the opportunity, except in accordance with all the terms of this Compact, including paragraph 3 of this section.

3. Prior to making any transfer allowing use or diversion of water from Fort Peck Reservoir or from the mainstem of the Missouri River below Fort Peck Dam, the State shall give not less than 180 days advance written notice to the Tribes of the proposed terms and conditions of the transfer and shall offer the Tribes the same opportunity to participate in the transfer as a substantially equal partner with the State, assuming obligations and receiving benefits of the transfer on terms and conditions agreed to by the Parties. If the Tribes do not accept the opportunity within the 180 day notice period, the State may proceed with the proposed transfer without the Tribes' participation, and the Tribes shall not later pursue the opportunity except in accordance with all the terms of this Compact, including paragraph 2 of this section.

4. If otherwise authorized by federal law, the Tribes may enter into an agreement with any person who is exercising or proposing to exercise a right under the laws of the State to use surface water outside the Reservation on any tributary of the Missouri River that flows through or adjacent to the Reservation, except the mainstem of the Milk River, which agreement allows such person's diversion and use and protects it from any other exercise of the Tribal Water Right provided, however, that:

(a) before use of such water, the person shall have complied with all applicable state laws concerning the acquisition of a water right;

(b) subsequent to acquisition of the state water right, regulation of its use shall be subject to state law;

(c) the amount of water subject to the agreement shall be considered a consumptive use of the Tribal Water Right;

(d) the agreement shall not permanently alienate the Tribal Water Right or any part thereof.

5. The Tribes may transfer annually only the following amounts of water for consumptive use outside the Reservation:

(a) 50,000 acre-feet;

(b) plus 35 percent of any amount over 200,000 acre-feet but less than 300,000 acre-feet authorized by state law to be transferred annually by the State from waters within the State;

(c) plus 50 percent of any amount over 300,000 acre-feet authorized by state law to be transferred annually by the State from waters within the State.

Transfers of the Tribal Water Right shall not be considered as part of any amounts authorized by state law to be transferred annually by the State.

6. In no event shall the Tribes be authorized to transfer less than 50,000 acre-feet of water per year outside the Reservation. The limits established in paragraph 5 of this section shall apply so long as the State is authorized to transfer annually at least 50,000 acre-feet of water pursuant to state law. If statutory authorization for the State to transfer water is not enacted, is repealed, or is held invalid, or if the amount of water authorized by state law to be transferred by the State is less than 50,000 acre-feet per year, then for any period in which the authorization or the limitation is not in force the Tribes may transfer water in accordance with all terms and conditions of this Compact other than paragraph 5 of this section. However, such transfers will be subject to any volume limitations provided by federal law or, in the absence of any federal volume limitations, the Tribes may transfer water in accordance with all terms and conditions in this Compact other than paragraph 5 of this section and with any volume limitations imposed by state law which would apply to a holder of a right to the use of water established pursuant to state law. For the purposes of complying with volume limitations imposed by state law, the Tribal Water Right will be deemed to have the characteristics set forth in paragraph 4 of section J of this Article.

7. Unless authorized by federal law, the State shall not in any manner whatsoever tax any proceeds received by the Tribes as consideration for any transfer of the Tribal Water Right.

L. Instream Flows.

1. At any time within five years after the effective date of this Compact, the Tribes may establish a schedule of instream flows to maintain any fish or wildlife resource in those portions of streams, excluding the mainstem of the Milk River, which are tributaries of the Missouri River that flow through or adjacent to the Reservation. These instream flows shall be a part of the Tribal Water Right with a priority date of May 1, 1888. Water remaining in a stream

to maintain instream flows pursuant to such a schedule shall be counted by the Tribes as a consumptive use of surface water.

2. Instream flows may be established by the Tribes only in accordance with this section. The Tribes may change the use of water for maintenance of instream flows to another purpose only with the consent of the State.

M. No Other Diversion or Use of the Tribal Water Right. No other diversion or use of the Tribal Water Right shall be made other than those authorized or recognized by this Article.

ARTICLE IV
PROTECTION OF USES UNDER STATE LAW

A. Uses Protected.

1. The following existing and proposed uses of water by Indians within the Reservation are protected and shall not be subordinated to any other uses by subsequent provisions of this Article:

(a) a maximum of 113 acres of irrigated land within the Wolf Creek watershed;

(b) a maximum of 11 acres of irrigated land within the Poplar River watershed;

(c) a maximum of 523 acres of irrigated land within the Big Muddy Creek watershed; and

(d) a maximum of 300 acres of land irrigated with ground water near the confluence of Porcupine Creek and the Milk River.

2. Uses of water by Indians within the Reservation for stockwatering purposes not in excess of 20 acre-feet per year for each impoundment and for all domestic uses are protected and shall not be subordinated to any other uses by subsequent provisions of this Article.

3. With the exception of the uses protected in paragraphs 1 and 2 of this section, diversion and use of water in the exercise of the Tribal Water Right except from the mainstem of the Missouri River, including water allocated to instream flow purposes, shall be subordinate to the following uses of water in the Porcupine Creek, Poplar River, Big Muddy Creek, Little Porcupine Creek, Wolf Creek, Tule Creek, and Chelsea Creek watersheds, including all tributary streams within those watersheds, and all underlying ground water whether or not hydrologically connected with the surface water:

(a) the beneficial uses of water with a priority date of December 31, 1984 or earlier established under the laws of the State and identified in Appendix A to this Compact;

(b) such rights of the United States Fish and Wildlife Service to the waters of Big Muddy Creek for the Medicine Lake National Wildlife Refuge as may be finally determined by the state water court;

(c) beneficial uses of water for domestic purposes;

(d) beneficial uses of water for stock watering purposes in existence prior to December 31, 1984, and beneficial uses of water for stock watering subsequent to that date not in excess of 20 acre-feet per year for each impoundment.

4. Except as to the rights protected in paragraph 3 of this section, the Tribal Water Right shall be prior to all rights to the use of surface and ground water established under the laws of the State with a priority date later than May 1, 1888.

B. Changes of Protected Uses.

1. The rights to the use of water protected by paragraph 3 of section A of this Article may be changed in accordance with state law as to point of diversion, period of use, place of use, purpose of use, or ownership of the right provided that:

(a) the proposed change will not adversely affect any use of the Tribal Water Right existing at the time of the proposed change;

(b) the amount of surface water flowing onto the Reservation within the Poplar River, the Big Muddy Creek, or the Porcupine Creek watersheds, will not be changed; and

(c) the source of the water will not be changed from surface to ground water, or from ground to surface water, or from one watershed to another.

2. Upon receiving an application for a proposed change authorized by paragraph 1 of this section, the State shall give the Tribes such advance written notice as is required by state law.

3. If an irrigation use is changed in any manner, or if a reservoir is constructed or operated which results in the consumptive use of water by evaporation, the following limitations apply:

(a) no more than 1.8 acre-feet of consumptive use per year may be authorized for each acre of land retired from full service irrigation; and

(b) no more than 0.48 acre-feet of consumptive use per year may be authorized for each acre of land retired from partial service irrigation;

(c) evaporation from any reservoir shall be charged as a consumptive use in accordance with definition 4 in Article II.

4. If an irrigation use is changed to an industrial use, all diversions and return flows shall be measured by a device acceptable to and subject to periodic inspection and testing by the State and the Tribes at the expense of the owner. The owner shall also have the quality of the return flows sampled and tested by a laboratory acceptable to the State and the Tribes as often as reasonably required by the State and the Tribes and at the expense of the owner.

ARTICLE V
ADMINISTRATION OF WATER RIGHTS

A. United States Administration. All rights to the use of water received from the Fort Peck Irrigation Project shall be administered by the United States, and the United States has the final and exclusive jurisdiction to resolve all disputes concerning uses of water received from the Fort Peck Irrigation Project subject to any judicial review provided by applicable law.

B. Tribal Administration.

1. The Tribal Water Right shall be administered by the Tribes, and the Tribes have the final and exclusive jurisdiction to resolve all disputes between users of the Tribal Water Right, except for disputes concerning uses of water received from the Fort Peck Irrigation Project and disputes involving users of the Tribal Water Right pursuant to agreements authorized in Article III, section K, paragraph 4.

2. Administration and enforcement of the Tribal Water Right shall be pursuant to a water code, which shall be adopted by the Tribes and submitted for approval to the Secretary of the Interior within one year after ratification of this Compact by the Parties. Such code shall take effect 18 months after ratification of this Compact unless sooner disapproved by the Secretary of the Interior. Pending the adoption and approval of the tribal water code, administration and enforcement of the Tribal Water Right shall be by the Secretary of the Interior as trustee for the Tribes. The Tribes shall not administer the Tribal Water Right in a manner which denies any person a water right owned by that person which arises under the laws of the United States.

3. Within six months after the tribal water code takes effect or within six months after disapproval of the code by the Secretary, the Tribes or the Secretary of the Interior shall provide the State with notice of each existing use of the Tribal Water Right which shall show:

(a) the person authorized to make the diversion;

(b) the amount of water authorized to be diverted annually;

(c) the amount of water authorized for annual consumptive use;

(d) the point of diversion;

(e) the period of use;

(f) the place of use;

(g) the uses for which the water may be diverted; and

(h) the relative priority of the use as against other uses of the Tribal Water Right.

4. The Tribes shall thereafter notify the State within sixty days after the end of each quarter year of all new uses of surface and ground water authorized by the Tribes during the preceding quarter year and of all new uses of the Tribal Water Right actually commenced during that quarter year.

C. State Administration.

1. The State shall administer all rights to the use of surface water and ground water within or outside the Reservation which are not a part of the Tribal Water Right to the fullest extent allowed by law. The State shall have the final and exclusive jurisdiction to resolve all disputes between users of rights established under state law.

2. Within two years after ratification of this Compact, the State shall notify the Tribes of all existing uses authorized by the State on the mainstem of the Missouri River below Fort Peck Dam and on all tributaries of the Missouri River that flow through or adjacent to the Reservation, except the mainstem of the Milk River. The State shall notify the Tribes within sixty days after

the end of each quarter year of all new uses of surface and ground water permitted by the State on each of these sources during the preceding quarter year and of all new uses of water actually commenced pursuant to the laws of the State during that quarter year on each of these sources. Notices required by this paragraph shall include the information required by paragraph 3 of section B of this Article.

3. No agency of the State shall administer any part of the Tribal Water Right. From and after the effective date of this Compact, unless the Tribal Water Right confirmed in Article III is fully utilized at the time application is made for a permit or other authorization, the State shall issue no permit or other authorization to divert or use water within the Reservation to the following persons:

(a) the Tribes;

(b) any Indian;

(c) any non-Indian successor-in-interest to any allottee on the Reservation by virtue of that person's assertion of a right arising under the laws of the United States; or

(d) the United States for the benefit of the Tribes or any Indian or any non-Indian successor-in-interest to any allottee.

D. Regulation of Ground Water.

1. With the exception of uses protected in Article IV, neither the State nor the Tribes shall authorize or continue the use of ground water without the consent of the other if such use will:

(a) result in degradation of instream flows established pursuant to section L of Article III; or

(b) contribute to the permanent depletion or the significant degradation of the quality of a ground water source which in whole or in part underlies the Reservation.

2. With the exception of uses protected in Article IV, the State shall not, without the Tribes' consent, authorize or continue the use of ground water that unreasonably interferes with a use of ground water authorized by the Tribes. The Tribes shall not, without the consent of the State, authorize or continue the use of ground water that unreasonably interferes with a use of ground water authorized by the State and protected by Article IV of this Compact.

ARTICLE VI
FORT PECK-MONTANA COMPACT BOARD

A. Board established. There is hereby established the Fort Peck-Montana Compact Board, which shall exercise powers and responsibilities as set forth in this Article.

B. Membership.

1. The Board shall consist of three members. One member shall be appointed by the Governor of the State of Montana or, in lieu of such appointment, shall be the Governor. The salary and expenses of that member shall be paid by the State. One member shall be appointed by the Chairman of the Tribes, or in lieu of such appointment, shall be the Tribal Chairman. The salary and expenses of that member shall be paid by the Tribes. The third member shall be selected by agreement of the other two members. The salary and expenses of that member and all other expenses of the Board shall be shared equally by the State and the Tribes subject to the availability of funds. Each member duly appointed or selected shall hold office for a term of six years, and for so long thereafter until a successor shall be appointed or selected. The initial term of each member shall be staggered, with one member serving a six-year term, one a four-year term, and one a two-year term. The initial term of each member shall be chosen by lot, or by any other procedure and agreed upon in writing by the first three members of the Board. If the Governor or the Tribal Chairman serves on the Board, such person shall not serve on the Board beyond his or her term as Governor or Tribal Chairman.

2. Should the two appointed members fail to agree within sixty days of the effective date of this Compact or within thirty days after any vacancy occurs, on the selection of the third member, the following procedure shall be utilized:

(a) within five days each member shall nominate no more than five and no less than three persons to serve as a member of the Board;

(b) within fifteen days thereafter each member shall reject all but one of the persons nominated by the other member;

(c) the chief judge of the United States District Court for the District of Montana shall select the third member of the Board from the remaining two nominees. If the chief judge declines for any reason to select the third member, the chief justice of the Montana Supreme Court shall make the selection from the remaining two nominees.

3. Vacancies on the board shall be filled by appointment of a person to serve the unexpired term of the member whose seat has become vacant. If the member appointed by the Governor becomes unable or unwilling to serve on the Board, the Governor shall make the appointment within fifteen days. If the member appointed by the Tribal Chairman becomes unable or unwilling to serve, the Tribal Chairman shall make the appointment within fifteen days. If the third member of the Board becomes unable or unwilling to serve on the Board, the remaining members shall fill the vacancy under the procedure set forth in paragraphs 1 and 2 of this section.

C. Quorum and Vote Required. Two members of the Board shall constitute a quorum if reasonable notice has been provided in advance to the absent member. Meetings may be in person or, in appropriate circumstances, by telephone. All Board decisions shall be by a majority of the Board, shall be in writing and, together with any dissenting opinions, shall be delivered to all parties in the proceeding before the Board, and to both Parties to this Compact.

D. Jurisdiction of the Board. The Board shall have exclusive jurisdiction, only as provided in this Compact, to resolve any controversy over the use of ground water to which this Compact pertains, any controversy over the use of surface water within the Reservation or from any tributary of the Missouri River that flows through or adjacent to the Reservation, except the mainstem of the Milk River, and any controversy as to the meaning of this Compact between: (i) on the one hand, the Tribes or any person or persons claiming a right to use the Tribal Water Right; and (ii) on the other hand, the State or any person or persons claiming a right to use water under the laws of the State.

E. Powers and Duties of the Board.

1. The Board shall have power to administer oaths to witnesses, to take evidence under oath, and to issue subpoenas to compel the attendance of witnesses or for the production of books, records, documents and other evidence. The courts of the Tribes and the State shall enforce any subpoena issued by the Board in the same manner as prescribed by the laws of the Tribes and the State for enforcing a subpoena issued in a civil action by courts of the Tribes and the State.

2. The Board shall hold hearings in proceedings before it and shall give advance notice to the Tribes, the State and all parties to any proceeding personally or by registered mail not less than five days before any hearing. Appearance at a hearing waives such notice. The Board may hear and determine the controversy upon the evidence produced notwithstanding the failure of a party duly notified to appear. The Tribes, the State and all parties to the proceeding are entitled to be heard, to present evidence material to the controversy, to cross-examine witnesses appearing at the hearing, and to be represented by counsel at their own expense.

3. The Board may enter an order after hearing granting any party to the dispute before it temporary or preliminary injunctive relief, or any other relief which the Board deems appropriate except money damages. The Board or any party to a proceeding before the Board may invoke the jurisdiction of a court of competent jurisdiction to enforce any temporary or preliminary injunction so issued by the Board by filing a petition for enforcement naming the enjoined person as respondent. Upon filing the petition, the court shall enter any order it deems appropriate for enforcement of the injunction ordered by the Board, including but not limited to injunctive relief on such terms as to bond or otherwise as it deems proper for the security of the rights of the enjoined party. The United States, the State, and the Tribes shall not be required to post any bond. The court may appoint a water commissioner or master to monitor compliance with such relief.

4. The Board shall adopt rules and regulations to govern its procedures and to carry out its responsibilities under this Compact. Such rules and regulations must be consistent with all provisions of this Compact. All records of the Board shall be open to public inspection except for privileged information.

5. The Board may employ or seek assistance of such clerical or other personnel and may establish such offices as it deems necessary for the performance of its functions according to this

Compact. Pending the establishment of a principal office, the Board's office shall be located at Fort Peck Agency of the Bureau of Indian Affairs.

6. The annual budget of the Board shall be subject to approval of the Parties to this Compact and to the availability of funds appropriated by the Parties.

F. Review and Enforcement of Board Decisions.

1. Decisions by the Board shall be effective immediately, unless stayed for a period of time prescribed by the Board. On application of a party within a reasonable time, but in any event no more than ninety days after a decision is rendered, the Board may modify or correct any decision:

(a) where there was an evident material miscalculation of figures or an evident material mistake in the description of any person, thing or property referred to in the decision;

(b) where the decision is imperfect in a matter of form not affecting the merits of the controversy; or

(c) where the decision requires clarification.

2. Any party before the Board may, within ten days of any final decision, apply to the Board to modify or set aside any aspect of the decision. Notice of such application shall be served personally or by registered mail upon all parties to the proceeding. Any other party shall have ten days within which to respond to the application. The Board shall act on such application within ten days after a response is filed or, if no response is filed, within fifteen days after the application is filed. If the Board fails to act within the time limitations set forth in this paragraph, the application shall be deemed denied. The time for appeal provided in paragraph 3 of this section shall not begin to run until the application is determined as provided in this paragraph.

3. Any party before the Board may appeal any final decision by the Board to a court of competent jurisdiction within thirty days of such decision. The notice of appeal shall be filed with the Board and served personally or by registered mail upon the Tribes, the State and all parties to the proceeding before the Board, and all such persons shall thereafter have the right to participate in the appeal.

4. In any appeal, the Board's decision shall be presumed to be valid, and may be vacated by the court only on one of the following grounds:

(a) the decision is not supported by substantial evidence;

(b) the decision was procured by corruption, fraud or undue means;

(c) there was evident partiality or corruption by the Board or by any member;

(d) the Board was guilty of misconduct in refusing to hear the dispute, or in refusing to hear evidence pertinent and material to the controversy, or any other clear misbehavior by which the rights of any party have been substantially prejudiced;

(e) the Board exceeded its authority under the terms of this Compact; or

(f) the decision is contrary to law.

5. Unless an appeal is timely filed as provided in paragraph 3 of this section, any decision of the Board shall be confirmed or enforced by any court of competent jurisdiction on petition of the Board, the Tribes, the State or any party before the Board in the proceeding in which the decision was made.

6. A court of competent jurisdiction in which a timely appeal is filed pursuant to paragraph 3 of this section, or in which a petition to confirm or enforce is filed pursuant to paragraph 5 of this section, may order such temporary or permanent relief as it considers just and proper.

7. An appeal may be taken from any decision of the court in which a timely appeal is filed pursuant to paragraph 3 of this section, or in which a petition to confirm or enforce is filed pursuant to paragraph 5 of this section, in the manner and to the same extent as from orders or judgments of the court in a civil action.

8. In any appeal or petition to confirm or enforce the Board's decision, the Board shall file with the court the record of the proceedings before the Board.

G. Waiver of Immunity. The Tribes and the State hereby waive their respective immunities from suit, including any defense the State shall have under the Eleventh Amendment of the Constitution of the United States, to permit the appeal or judicial enforcement of Board decisions as provided in this Compact, except that such waivers shall not extend to any action for money damages including costs and attorneys' fees as a result of such judicial action.

ARTICLE VII
FINALITY AND EFFECTIVENESS OF COMPACT

A. Ratification. This Compact shall become effective as to both parties when ratified by the Legislature of the State of Montana and the Fort Peck Tribal Executive Board and approved by the United States Departments of Justice and the Interior. Ratification by the State and by the Tribes is irrevocable, and this Compact may not be modified in any manner whatsoever except with the joint consent of the legislative body of both Parties.

B. Incorporation into Decrees and Disposition of Federal Suits.

1. The Parties and the United States shall petition for incorporation of this Compact into the preliminary decrees and final decrees in any state water court proceedings to adjudicate any right to the use of water to which this Compact pertains, and this Compact may not be modified in any manner whatsoever without the consent of both Parties as provided in section A of this Article. The United States shall not be bound by provisions of this Compact until it is incorporated into the final decree, as provided in this section.

2. This Compact shall only be filed as a proposed consent decree in United States v. Aageson, Civ. No. 79-21-GF (D. Mont.), or United States v. Aasheim, Civ. No. 79-40-BLG (D. Mont.) if there is a final determination by the state courts that they lack jurisdiction over, or that the state proceedings are inadequate to adjudicate, some or all of the water rights asserted in either of the above cases. Upon a final determination that the state courts have jurisdiction over, and that the state proceedings are adequate to adjudicate all of the water rights in the above cases, the United States and the Parties will immediately execute a joint motion pursuant to Rule 41(a) of the Federal Rules of Civil Procedure to dismiss with prejudice and on their merits all claims by the Tribes and the United States on behalf of the Tribes in the pending cases.

ARTICLE VIII
DISCLAIMERS AND RESERVATION OF RIGHTS

A. Disclaimers. Nothing in this Compact shall be so construed or interpreted:

1. to establish the nature, extent, transferability, or manner of enforcement of water rights of any Indian reservation other than the Fort Peck Indian Reservation;

2. to preclude the acquisition or exercise of an appropriative right to the use of water under state law by the Tribes or any individual Indian outside the Reservation by purchase of such right or by purchase of land, or by application to the State;

3. to preclude the acquisition or exercise of an appropriative right to the use of water under state law by the Tribes or any individual Indian within the Reservation:

(a) by purchase of such right or by purchase of land, provided that water rights acquired by such purchase after ratification of this Compact shall be deemed to be an exercise of the Tribal Water Right; or

(b) by application to the State, provided that the Tribal Water Right confirmed in Article III has been fully utilized at the time an application is made;

4. to determine the relative rights inter sese of persons using water under the authority of the State or the Tribes;

5. to limit in any way the rights of the Parties or any other person to litigate any issues or questions not resolved by this Compact;

6. to authorize the taking of a water right which is vested under state or federal law;

7. to create or deny substantive rights through headings or captions used in this Compact; or

8. to address or prejudge whether, in any interstate apportionment of the waters of the Missouri River Basin, the Tribal Water Right shall be counted as a part of the waters apportioned to the State.

B. Reservation of Rights. The Parties expressly reserve all rights not granted, recognized or relinquished in this Compact.

ARTICLE IX
TRIBAL RELINQUISHMENT OF OTHER WATER CLAIMS

The Tribal Water Right confirmed in Article III shall be final and conclusive. With the exception of the Tribal Water Right recognized herein and rights established under state law as authorized by this Compact, the Tribes and the United States as trustee for the Tribes hereby relinquish forever any and all existing and future claims to water from any source and for any purpose. This relinquishment includes, but is not limited to, any claim for water derived from: aboriginal use of land or water; any Indian treaties; any act of Congress; and any executive act of the United States.

ARTICLE X
BINDING EFFECT

A. Persons Bound. Upon the effectiveness of this Compact, its terms will be binding:

1. upon the State and any person or entity of any nature whatsoever using, claiming or in any manner asserting any right under the authority of the State to the use of water in the State of Montana, provided that for purposes of consent, ratification, or authorization the validity of consent, ratification, or authorization is to be determined by Montana law; and

2. upon the Tribes and any person or entity of any nature whatsoever using, claiming or in any manner asserting any right to the use of the Tribal Water Right, or any right arising under any doctrine of reserved or aboriginal water rights for the Tribes, or any right arising under tribal law, provided that for purposes of consent, ratification, or authorization the validity of consent, ratification or authorization is to be determined by Tribal law. Notwithstanding any other provision of law, the Tribal Water Right confirmed in Article III of the Fort Peck-Montana Compact includes conclusively and forever the water rights arising under the laws of the United States of all persons on the Fort Peck Reservation by virtue of the ownership or purchase of any Indian allotment, and the courts of the State shall not have jurisdiction to adjudicate or decree any such right claimed by any such person.

B. Effect on Other Laws. The provisions of the Fort Peck-Montana Compact shall supersede any present or future enactment or common law rule inconsistent with such Compact including but not limited to Montana Code Annotated 28-2-708.

ARTICLE XI
SEVERABILITY

Should any part of this Compact other than Articles III, IV, VII, or IX be held to be invalid, all other parts thereof shall continue to be in full force and effect. Should any part of Articles III, IV, VII, or IX be held invalid, either party may withdraw from the remaining provisions of this Compact by action of its legislative body taken within one year from the determination of such invalidity.

ARTICLE XII
LEGISLATION

A. Future legislation. The parties agree to seek enactment of further legislation if it becomes necessary to effectuate the provisions and purposes of this Compact, and to protect such provisions and purposes from challenge and attack, provided that no provisions of the Compact shall be modified as to substance except as provided in Article VII.

B. Petition to Congress.

1. The Parties hereby request the Montana legislature to petition Congress to enact the following legislation in substantially the following form:

"Sec. 2. For purposes of this Act, the term:

(a) "Fort Peck-Montana Compact" means that Compact pertaining to the reserved water rights of the Assiniboine and Sioux Tribes of the Fort Peck Reservation ratified by the legislature of the State of Montana on May 15, 1985 and by the Tribes on April 29, 1985.

(b) "Reservation" means the Fort Peck Indian Reservation as defined in the agreement of December 28 and December 31, 1886, and confirmed by the Act of May 1, 1888, 25 Stat. 113.

(c) "Secretary" means the Secretary of the Interior.

(d) "Tribes" means the Assiniboine and Sioux Tribes of the Fort Peck Indian Reservation.

"Sec. 3.

"(a) The Tribes, subject to the approval of the Secretary, may enter into any joint venture, service contract, lease, exchange or other agreement, or any amendment, supplement or other modification of such agreement (hereinafter referred to as a "Water Agreement") authorizing the delivery, use or transfer of any part of the water right confirmed in the Tribes by the Fort

Peck-Montana Compact for a specified term, not to exceed fifty years, inclusive of all renewal periods. A Water Agreement may authorize the diversion or use of water within or outside the Reservation subject to all terms of the Fort Peck-Montana Compact.

"(b) The Secretary shall approve or disapprove any Water Agreement within (1) one hundred and eighty days after submission or (2) sixty days after compliance, if required, with section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C) and any other requirement of federal law, whichever is later. Any party to such an agreement may enforce the provisions of this subsection pursuant to 28 U.S.C. 1361. Notwithstanding any other law, all projections, studies, data or other information possessed by the Department of the Interior regarding the terms and conditions of the Water Agreement or the financial return to the Tribes, shall be held by the Department of the Interior as privileged proprietary information of the Tribes."

2. The provisions of this Compact shall have no force and effect until the resolution set forth in paragraph 1 of this section is approved by the Montana Legislature and submitted to Congress.

IN WITNESS WHEREOF the representatives of the State of Montana and the Assiniboine and Sioux Tribes of the Fort Peck Indian Reservation have signed this Compact in five original counterparts on the 10th day of April, 1985.

Part 3
Northern Cheyenne-Montana Compact

85-20-301. Northern Cheyenne-Montana compact ratified. The compact entered into by the state of Montana and the Northern Cheyenne tribe of the Northern Cheyenne Indian reservation and filed with the secretary of state of the state of Montana under the provisions of 85-2-702 on May 20, 1991, is ratified. The compact is as follows:

WATER RIGHTS COMPACT
STATE OF MONTANA
NORTHERN CHEYENNE TRIBE
UNITED STATES OF AMERICA

This Compact is entered into by and among the Northern Cheyenne Tribe of the Northern Cheyenne Reservation, the State of Montana, and the United States of America to settle, for all time, any and all existing claims of or on behalf of the Northern Cheyenne Tribe to water within the State of Montana.

RECITALS

WHEREAS, in 1975, the Northern Cheyenne Tribe and the United States, on behalf of the Tribe, brought suits in the United States District Court for the District of Montana to obtain a final determination of the Tribe's water rights;

WHEREAS, the State of Montana initiated a general stream adjudication pursuant to the provisions of Chapter 697, Laws of Montana 1979, which includes Northern Cheyenne water rights;

WHEREAS, the federal district court suits were stayed in 1983 pending the outcome of Montana State court water adjudication proceedings;

WHEREAS, the adjudication of Northern Cheyenne water rights under state law has been suspended while negotiations have proceeded to conclude a compact resolving all reserved water rights claims of the Northern Cheyenne Tribe;

WHEREAS, the Northern Cheyenne Tribe and the United States agree that the Tribal Water Right described in this Compact shall be in satisfaction of the Tribe's reserved water rights claims and any claims to water rights made on behalf of the Tribe by the United States;

WHEREAS, it is in the best interest of all parties that the reserved water rights claims of the Northern Cheyenne Tribe be settled through a Water Rights Compact;

WHEREAS, the parties agree that settlement of the reserved water rights claims of the Northern Cheyenne Tribe is dependent on the repair and enlargement of the Tongue River Reservoir;

NOW THEREFORE, the parties agree as follows:

Article I
Definitions

The following definitions shall apply for purposes of this Compact:

1. "Acre-foot" means the amount of water necessary to cover one acre to a depth of one foot and is equivalent to 43,560 cubic feet.
2. "Alluvial groundwater" means water located below the land surface within the Quaternary hydrostratigraphic unit that borders or underlies major perennial and intermittent streams in the Tongue River and Rosebud Creek basins. This unit is composed of unconsolidated alluvial deposits of clay, silt, sand, and gravel. For the purposes of this Compact, all other water below the land surface will be deemed nonalluvial groundwater.
3. "Annual" or "per year" means during one year as defined by this Compact.
4. "Board" means the Northern Cheyenne-Montana Compact Board established by Article IV of this Compact.
5. "Completion date" means the date of completion of a project to repair and enlarge the Tongue River Dam to a degree sufficient to provide the storage component of the Tribal Water Right subject to the conditions provided in this Compact.
6. "Depletion" means, for any diversion of water, the difference between the quantity of water diverted and the quantity of return flows within the basin.
7. "Direct flow of the Tongue River" means the water in the Tongue River and its tributaries that has not been stored in the Tongue River Reservoir.
8. "Domestic use" means the diversion of water by one or more individuals, family units or households for drinking, cooking, laundering, sanitation and other personal comforts and necessities; and for the irrigation of a family garden or orchard not exceeding one-half acre in area.

9. "Excess water" means increases in the Tongue River basin water supply resulting from conditions different from those assumed in the Tongue River Water Model.

10. "Exchange water" means water available to the Tribe from the Tongue River direct flow or from the Tongue River Reservoir storage in exchange for Tribal return flows made available to other Tongue River water users.

11. "Indian" means any person who: a) is an enrolled member of the Northern Cheyenne Tribe; or b) is a member of a tribe that is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians; or c) holds, or is recognized by the Secretary of the Interior as eligible to hold, trust and restricted property on the Northern Cheyenne Reservation.

12. "Manifolded well system" means a water distribution or conveyance facility that is supplied by two or more wells.

13. "Miles City Decree water right" means a water right, finally decreed in any general adjudication of the Tongue River, or recognized under state law until such final adjudication, which is based on the decree entered in Miles City Canal & Irrigating Co. v. Lee, et al., Montana Seventh Judicial District, No. 2809, May 20, 1914, and which has a priority date of March 24, 1909, or earlier.

14. "Parties" means the Tribe, the State of Montana, and the United States.

15. "Person" means an individual or any other entity, public or private, including the State, the Tribe, and the government of the United States and all officers, agents, and departments thereof.

16. "Ratification date" means the date this Compact has been approved by the Northern Cheyenne Tribal Council and the Legislature of the State of Montana.

17. "Reservation" means the Northern Cheyenne Reservation as established by Executive Orders of November 26, 1884 and March 19, 1900.

18. "State" means the State of Montana and all officers, agents, departments, and political subdivisions thereof. Unless otherwise indicated, for purposes of notification or consent, "State" means the Director of the State Department of Natural Resources and Conservation or its successor agency.

19. "State contract right" means a right to receive stored water from the Tongue River Reservoir, not to exceed a cumulative total of 40,000 acre-feet per year, pursuant to a contract that allocates the storage rights of the Montana Department of Natural Resources and Conservation or its successor agency.

20. "Tongue River Water Model" means the Tongue River Reservoir Operations computer model that is documented in: Tongue River Modeling Study, Final Report, submitted on July 20, 1990, to the Engineering Bureau of the Water Resources Division of the Montana Department of Natural Resources and Conservation, or any revision agreed to by the parties. The Final Report and any agreed revisions are incorporated herein by reference as though set forth in full.

21. "Transfer" means any authorization for the delivery or use of water from the Tribe or any person authorized by the Tribe to any other person by a service contract, lease, sale, exchange or other similar agreement.

22. "Tribal Water Right" means the right to divert or use water as described by Articles II and III of this Compact.

23. "Tribe" means the Northern Cheyenne Tribe of the Northern Cheyenne Reservation and all officers, agents and departments thereof. Unless otherwise indicated, for purposes of notification or consent, "Tribe" means the Tribal President or the Chief Executive Official of the Tribe.

24. "United States" means the federal government and all officers, agencies, departments and political subdivisions thereof. Unless otherwise indicated, for purposes of notification or consent, "United States" means the Secretary of the Department of the Interior.

25. "Year" means the twelve-month period beginning April 1st and ending March 31st.

Article II
Tribal Water Right

A. Quantification of Water Right.

The water rights of the Northern Cheyenne Tribe are as follows:

1. Existing Non-Agricultural Uses.

Tribal and individual Indian stockwater, domestic and municipal water uses on the Reservation and in existence as of the ratification date are hereby recognized and protected as part of the Tribal Water Right, and are in addition to the water rights set forth in Sections A.2., A.3., and A.4. of this Article. All such existing uses shall be governed by the terms of this Compact.

2. Tongue River.

Subject to the terms of this Compact, the Tribal Water Right in the Tongue River basin consists of the right to divert or use or to permit the diversion or use of up to 32,500 acre-feet per year, from a combination of direct flow, storage, and exchange water. Tribal and individual Indian irrigation uses in existence on the Reservation in the Tongue River basin as of the ratification date are recognized and protected, and shall be counted as a use of the 32,500 acre-feet per year right described in Section A.2. of this Article.

a. Direct Flow Right. The Tribe has a right to divert or use or permit the diversion or use of up to 12,500 acre-feet of water per year from direct flow of the Tongue River and its tributaries with a priority date of October 1, 1881; provided, that:

i. The Tribe's annual depletion of its direct flow water right in the Tongue River and its tributaries shall not exceed 75 percent of the amount diverted, or 9,375 acre-feet per year; and

ii. The Tribe's direct flow water right in the Tongue River and its tributaries may not be used in a manner that adversely affects:

A. Miles City Decree water rights, or

B. Water rights from off-Reservation tributaries of the Tongue River, which are finally decreed in any general adjudication of the Tongue River, or are recognized under state law until such final adjudication, and which have a priority date of June 30, 1973 or earlier and are based on the use of an irrigation system in place and not abandoned as of June 30, 1973.

b. Storage and Exchange Water. The Tribe has a right to divert or deplete, or permit the diversion or depletion of, up to 20,000 acre-feet per year from a combination of water stored in the Tongue River Reservoir and exchange water. The availability of the 20,000 acre-feet per year depends, as provided in the Tongue River Water Model, upon the annual schedule utilized by the Tribe for diversions of Tongue River direct flows. Except as provided in paragraph A.2.c.ii. of this Article, any reduction in Tongue River Reservoir stored water resulting from Tribal diversions of Tongue River direct flows shall not affect State contract rights, as defined in this Compact, but shall be satisfied exclusively from the right described in this paragraph. Tribal use of stored water from the Tongue River Reservoir shall be measured at the Reservoir.

c. Shortages.

i. The Tribal Water Right in the Tongue River basin shall be subject to shortages due to natural low flows that are consistent with the period of record used in the Tongue River Water Model in diversion amounts not to exceed 50% in any one year and 100% cumulative in any ten-year period.

ii. Decreases in the amount of water stored in the Tongue River Reservoir that are caused by: (i) sedimentation; (ii) Reservoir inflows lower than those assumed in the Tongue River Water Model; (iii) normal and expected maintenance of the Tongue River Dam and associated structures; or (iv) normal and expected deterioration of the Tongue River Dam and associated structures shall not be considered a failure of the Tongue River Dam as that term is utilized in paragraph A.2.f. of this Article. All such decreases in water availability shall be shared pro rata among all users of stored water including the Tribe.

d. Excess Water. The Tribe shall, as part of the Tribal Water Right, have the first right to use excess water, as defined in this Compact; provided, that total use of the Tongue River Tribal Water Right shall not exceed 32,500 acre-feet per year diverted from direct flow, storage, and exchange water. Tribal nonuse of excess water in any one year shall not affect the right of the Tribe to use excess water in any subsequent year.

e. Contract Water. Nothing in this Compact shall affect the water, and any rights therein, secured to the Tribe by Water Purchase Contract No. 232 for 7,500 acre-feet per year, dated March 15, 1938, between the Tongue River Water Users Association, the Water Conservation Board of the State of Montana and the United States, through the Secretary of the Interior. Any water entitlement pursuant to the Contract shall be in addition to and not a part of the 32,500 acre-feet per year Tribal Water Right set forth above.

f. Failure of Tongue River Dam. In the event of a failure of the Tongue River Dam which causes a substantial diminution of the Tribe's storage right set forth in paragraph A.2.b. of this Article, and notwithstanding the provisions of Article V.A. of this Compact, any party may within 180 days of said failure request the others to renegotiate this Compact. The parties shall have three years from the date of the request to reach a new agreement, during which time all of the provisions in this Compact shall remain in full force and effect. If no party requests renegotiation, or if a new agreement is not reached within three years of the request, the provisions of paragraph A.2.a.ii. of this Article concerning the subordination of the Tongue River direct flow Tribal Water Right to other specified water rights, shall become null and void; provided, that all other provisions of this Compact shall remain in full force and effect. The Tribe shall not be entitled to void or terminate this Compact, or to assert that the State is in breach of the Compact, for a failure of the Tongue River Dam; provided, that any and all other rights of the Tribe arising from such event shall not be affected by this paragraph.

3. Rosebud Creek.

a. Water Right. The Tribe has a right to divert or use or to permit the diversion or use from Rosebud Creek and its tributaries, for agricultural purposes only, of 1,800 acre-feet of water per year, or enough water to irrigate 600 acres of land per year, whichever is less, with a priority date of October 1, 1881. Tribal and individual Indian irrigation uses in existence as of the ratification date on-Reservation in the Rosebud Creek basin are recognized and protected, and shall be considered a use of the 1,800 acre-feet per year right described in this paragraph.

b. Implementation. The Tribe agrees that in the period between May 1, 1991 and July 1, 1993, the Tribe, or persons authorized by it, will develop no more than 200 acres of land in addition to irrigation uses in existence as of May 1, 1991, through irrigation methods involving pumping of alluvial groundwater, except that the Tribe, or persons authorized by it, may develop up to the full 600 acres of land, or any portion thereof, by any other method. During this period, the Tribe and the State agree to share any hydrologic data available for use in connection with any test which the State undertakes to evaluate impacts, if any, of development of on-Reservation lands on off-Reservation lands. After July 1, 1993, the Tribe, or persons authorized by it, may develop the full 600 acres of land by any irrigation method.

c. Additional Water Right. In addition to the water right described in paragraph A.3.a. of this Article, the Tribe has a right to divert or use or permit the diversion or use from Rosebud Creek and its tributaries, for any purpose, of up to 19,530 acre-feet of water per year, or enough water to irrigate 6,510 acres of land per year, whichever is less, with a priority date of October 1, 1881. The Tribe may not exercise the water right set forth in this paragraph in a manner that adversely affects a water right finally decreed in any general adjudication of the Rosebud Creek basin or, until such final decree is issued, a water right recognized under state law, which 1) has a priority date of June 30, 1973 or earlier, and 2) is based on the use of an irrigation system in place and not abandoned as of June 30, 1973; provided, that the state law water rights protected in this paragraph shall not exceed:

i. North of the Reservation, 8,100 acre-feet of water per year or enough water to irrigate 2,700 acres of land per year, whichever is less; and

ii. South of the Reservation, 540 acre-feet of water per year or enough water to irrigate 180 acres of land per year, whichever is less.

d. Dams and Impoundments. The Tribe shall not construct, within the Rosebud Creek basin, any dams or impoundments to store water naturally arising in Rosebud Creek and its tributaries; provided, that the Tribe may construct stockwater impoundments pursuant to paragraph A.5. of this Article, and, subject to other applicable provisions of this Compact, may construct dams or impoundments within the Rosebud Creek basin to store water from sources outside the basin, including non-alluvial groundwater.

e. Moratorium on Permits. The Montana Department of Natural Resources and Conservation shall order a moratorium on the issuance of permits in the Rosebud Creek basin concurrent with the ratification date of this Compact. The moratorium shall not apply to applications for permits by persons who have entered into deferral agreements with the Tribe for Rosebud Creek basin water as provided in Section G. of this Article. The Department may order the moratorium lifted if it determines that water is available over and above the amount necessary to fulfill the Tribal Water Right described in paragraph A.3.a. and Section A.3.c. of this Article. The Tribe may challenge the Department's determination to lift the moratorium under the procedure set forth in Article IV of this Compact.

4. Groundwater.

a. Alluvial Groundwater. The Tribe has a right to withdraw and use, or permit the withdrawal and use of, alluvial groundwater in lieu of surface water diversions of the Tongue River and Rosebud Creek Tribal Water Right, subject to the same terms and conditions of this Compact that apply to such surface water diversions. Alluvial water withdrawn from wells or manifolded well systems with a capacity of 100 gallons per minute or less shall not be deducted from the Tribal Water Right. For wells or manifolded well systems with a capacity of withdrawing greater than 100 gallons per minute of alluvial water, the entire amount withdrawn shall be deducted from the Tribal Water Right.

b. Non-alluvial Groundwater. Except where a Tribal right to non-alluvial groundwater is established pursuant to Article VII.B. of this Compact, Tribal use or authorization of use of non-alluvial groundwater shall, at the election of the Tribe, comply with state law in effect at the time of the use or with the alluvial groundwater provisions of paragraph A.4.a. of this Article.

5. Stockwater Impoundments. The Tribe may construct, or permit the construction of, stockwater impoundments on the Reservation, where the capacity of the impoundment is less than 15 acre-feet and the impoundment is constructed on a source other than a perennial flowing stream. The amount of water so impounded shall not be deducted from the Tribal Water Right.

6. Subirrigation. The Tribe shall be entitled to take advantage of any natural subirrigation occurring on the Reservation. Where otherwise consistent with state law, persons outside the Reservation shall also be entitled to take advantage of natural subirrigation.

7. Big Horn Reservoir (Yellowtail) Storage.

a. Tribal Allocation. As a part of the Tribal Water Right, the Secretary of the Interior shall allocate 30,000 acre-feet per year of stored water in Big Horn Reservoir, Yellowtail Unit, Lower Bighorn Division, Pick-Sloan Missouri Program, Montana, measured at the dam, for use or disposition by the Tribe for any beneficial purpose, either on or off the Reservation, pursuant to the terms of this Compact. This allocation is subject to the prior reserved water rights, if any, of any Indian tribe, or of persons claiming water through that tribe, to that water. Any use or disposition of water from Big Horn Reservoir off the Reservation by the Tribe is subject to the specific provisions relating to such use or disposition in any act of Congress ratifying this Compact.

b. Payment for Tribal Allocation. The Tribe shall not be required to make payments to the United States for any portion of the Tribal Water Right stored in Yellowtail Reservoir unless and until the water is used or sold by the Tribe in which case the Tribe shall make annual payments to the United States as hereinafter provided.

i. Use or Sale for Municipal and Industrial (M&I) Purposes. For each acre-foot of stored water used or sold for M&I purposes, the Tribe shall pay annually to the United States an amount to cover the proportionate share of the annual operation, maintenance and replacement (OM&R) costs, and the proportionate share of the capital costs with appropriate interest for the Yellowtail Unit allocable to the Tribe's stored water. Upon full payment of the capital costs allocable to the Tribe's stored water supply, the annual payments shall include only a proportionate share of the annual OM&R costs. Such annual payments shall be reviewed and adjusted, as appropriate, to reflect the actual capital and OM&R costs for the Yellowtail Unit.

ii. Agricultural, Domestic, Livestock, and Other Uses. For each acre-foot of stored water used or sold for other than M&I purposes, the Tribe shall pay annually to the United States an amount to cover the OM&R cost for the Yellowtail Unit allocable to the Tribe's stored water, which amount shall be reviewed and adjusted, as appropriate, to reflect the actual OM&R costs for the Yellowtail Unit. The Bureau of Indian Affairs shall transfer sufficient funds on a nonreimbursable basis to the Bureau of Reclamation to cover allocable OM&R costs under this paragraph.

c. Rates and Revenues. Except for payments required to be made to the United States as set forth above, the Tribe shall set such rates as it deems proper for its use or sale of stored water and shall retain all revenues from its use or sale of said stored water; provided, that the

United States reserves the right to use any and all water stored in Yellowtail Reservoir for hydropower generation.

d. Agreement. Following ratification of this Compact, and upon development of a demand for the water under Section A.7. of this Article, the United States and the Tribe shall enter into an appropriate agreement, if required, setting forth the terms and conditions under which water will be made available to the Tribe, and for the collection and disposition of revenues in connection therewith.

B. Persons Entitled to Use the Tribal Water Right.

The Tribal Water Right may be used by the Tribe, or persons authorized to use water by the Tribe pursuant to Article III; provided, that:

1. Such use is in accordance with the terms of this Compact;

2. That the Tribe shall give preference to Tribal members to use the Tribal Water Right; and

3. Such water right may be transferred from one Tribal member to another Tribal member for agricultural purposes only upon the transfer of land on the Reservation from one Tribal member to another Tribal member.

C. Place of Use of the Tribal Water Right.

Pursuant to a Tribal water code adopted as prescribed in Article III of this Compact, and subject to all other provisions of this Compact, the Tribe shall have the right to use or permit use of the Tribal Water Right with any point of diversion or any place of use on or off the Reservation; provided, that any use of the Tribal Water Right off the Reservation shall not be deemed to convert the Tribal Water Right to a state water right, and subsequent nonuse of the Tribal Water Right off the Reservation shall not constitute a relinquishment, forfeiture, or abandonment of the Right.

D. Purposes of the Tribal Water Right.

Except as provided in paragraph A.3.a. of this Article, the Tribe may authorize use of the Tribal Water Right on the Reservation for any purpose without regard to whether such use is beneficial as defined by state law. Off the Reservation, any use of the Tribal Water Right shall comply with Article III.B.

E. Conditions Upon Uses of the Tribal Water Right.

The Tribe shall adopt appropriate regulations to ensure that use of the Tribal Water Right is not wasteful and does not degrade water quality.

F. Transfer of Tribal Water Right.

The Tribe shall not transfer water naturally arising in Rosebud Creek or its tributaries for use off the Reservation. The Tribe may transfer any other part of the Tribal Water Right for use on or off the Reservation pursuant to the terms of this Compact. This paragraph shall not affect the right of the Tribe to enter into a deferral agreement regarding Rosebud Creek water pursuant to Section G. of this Article.

G. Deferral Agreements.

After the ratification date, the Tribe may enter into an agreement with any person who is exercising or proposing to exercise a right under state law to use surface water off the Reservation, which agreement protects the person's right from any exercise of the Tribal Water Right; provided, that:

1. Before use of such water, the person shall have complied with all applicable state laws concerning the acquisition of a water right;

2. Subsequent to acquisition of the state water right, regulation of its use shall be subject to state law;

3. The amount of water subject to the agreement shall be deducted from the amount of water available for depletion by the Tribe in the basin from which the water is being diverted; and

4. The agreement shall not permanently alienate the Tribal Water Right or any part thereof.

H. Effect of Non-Use of Tribal Water Right.

Non-use of any part of the Tribal Water Right shall not constitute a relinquishment, forfeiture or abandonment of the Right.

I. Tribal Water Right to be Held in Trust.

The Tribal Water Right shall be held in trust by the United States for the benefit of the Tribe.

Article III
Administration of Water Rights

A. Tribal Administration.

1. Except as otherwise provided in this Compact, the use of the Tribal Water Right shall be administered by the Tribe, and the Tribe has the final and exclusive jurisdiction to resolve all disputes between users of the Tribal Water Right. Administration and enforcement of the Tribal Water Right shall be pursuant to a water code, which shall be developed and adopted by the Tribe and submitted for approval to the Secretary of the Interior within one year after ratification of this Compact. Pending the adoption and approval of the Tribal water code, the administration and enforcement of the Tribal Water Right shall be by the Secretary of the Interior.

2. Within six months after the Tribal water code takes effect, the Tribe shall provide the State with notice of each use of the Tribal Water Right, including uses in existence as of the ratification date of this Compact and those established since that time, which shall show:

a. The person authorized to make the diversion;
b. The amount of water authorized to be diverted annually;
c. The amount of water authorized for annual consumption;
d. The point of diversion;
e. The period of use;
f. The place of use;
g. The uses for which the water may be diverted; and
h. The relative priority of the use as against other uses of the Tribal Water Right.

3. The Tribe shall thereafter notify the State within sixty days after the end of each quarter year of all new uses of surface and groundwater authorized by the Tribe during the preceding quarter year and of all new uses of the Tribal Water Right actually commenced during that quarter year. The notice shall be in the same format as that prescribed in Section A.2. of this Article.

4. The Tribe shall provide the State with not less than 180-days written notice prior to the start of construction of any project to divert any portion of the Tribal Water Right from the Big Horn River or the Big Horn Reservoir for use on the Reservation, or from the Tongue River or the Tongue River Reservoir for use on the Reservation in the Rosebud Creek basin. The notice shall describe: any diversion, conveyance and storage facilities; the amounts of water to be diverted and consumed; and the purpose, place, and period of the proposed use. Diversion or use of water from such project may be made only after all permits, certificates, variances or other authorizations described in paragraph B.3. of this Article have been obtained. With respect to any such project or diversion, the State or any affected person may seek such remedies as may be available under federal, state, or tribal law, and nothing in this Compact shall be construed to affect the rights of any party under such law.

B. Off-Reservation Uses of the Tribal Water Right.

1. Off-Reservation Uses. Any use of the Tribal Water Right involving a point of diversion or place of use located off the Reservation shall be considered an off-Reservation use; provided, that releases or diversions from Big Horn Reservoir or Tongue River Reservoir for use on the Reservation shall not be considered off-Reservation uses.

2. Subsequent Federal or State Law. All off-Reservation uses of the Tribal Water Right shall comply with the requirements set forth in Section B. of this Article until such time as the statutory or common law of the United States or the State of Montana establishes that off-Reservation uses of Indian water rights may occur without regard to state law.

3. Diversion Facilities.

With respect to diversion or transportation facilities located off the Reservation, the Tribe or persons using the Tribal Water Right shall apply for all permits, certificates, variances and other authorizations required by state laws regulating, conditioning or permitting the siting, construction, operation, alteration or use of any equipment, device, facility or associated facility proposed to use or transport water. A diversion or use of water in the exercise of the Tribal Water Right may be made only after all permits, certificates, variances or other authorizations applied for pursuant to this paragraph have been obtained.

4. Off-Reservation Uses in Tongue and Rosebud Basins.

a. The Tribe shall provide the State with not less than 180-days advance written notice of any off-Reservation use, transfer, or change of use of the Tribal Water Right:

i. Within the Tongue River basin, or

ii. Utilizing Tongue River water off-Reservation in the Rosebud Creek basin.

b. The notice shall include sufficient documentation to demonstrate that:

i. The proposed use of water is a beneficial use as defined by Montana law in effect at that time;

ii. The proposed means of diversion, and the construction and operation of the diversion works are adequate;

iii. The proposed use, transfer, or change of use will not adversely affect, except with the consent of the owner of such right:

A. Any water right arising under the laws of the United States, or

B. Any right to the use of water established pursuant to the laws of the State; except that, if the portion of the Tribal Water Right that is the subject of the proposed off-Reservation use, transfer or change of use is the storage and exchange right set forth in Article II.A.2.b. of this Compact, the Tribe need only demonstrate that Miles City Decree rights will not be adversely affected by such use, transfer, or change of use.

iv. The proposed use, transfer, or change of use does not cause any unreasonable significant adverse environmental impact; and

v. Proposed uses, transfers, or changes in use in excess of 4,000 acre-feet per year and 5.5 cubic feet per second of water will not:

A. Substantially impair the quality of water for existing uses in the source of water from which the diversion is made;

B. Be made where low quality water which can economically be used is legally and physically available to the Tribe for the proposed use;

C. Create or substantially contribute to saline seep; or

D. Substantially injure fish or wildlife populations in the source of water from which the diversion is made.

c. A proposed use, transfer or change of use of the Tribal Water Right pursuant to Section B.4. of this Article may be challenged:

i. Within 30 days after the expiration of the notice period provided in Section B.4.a. of this Article;

ii. In a court of competent jurisdiction; and

iii. By the State or by a person whose rights are adversely affected by the proposed use, transfer, or change of use.

In any such case, the Tribe shall have the burden of proving by a preponderance of the evidence that it has satisfied the requirements of Section B.4.b. of this Article. A Tribal notice that conforms to the requirements of Section B.4.b. of this Article shall be prima facie evidence of its contents.

5. Off-Reservation Uses Outside Tongue and Rosebud Basins.

Except as provided in Section B.4. of this Article, no person may initiate an off-Reservation use, transfer, or change of use of the Tribal Water Right without first applying for and receiving authorization for the use, transfer, or change of use pursuant to Montana law in effect at the time of the application.

C. State Administration.

1. The State shall administer all rights to the use of surface water and groundwater within the Reservation which are not a part of the Tribal Water Right. The State shall have the final and exclusive jurisdiction to resolve all disputes between users of rights established under state law.

2. Within one year after ratification of this Compact, the State shall notify the Tribe of all existing uses of surface and groundwater for which a permit has been issued by the State in the Tongue River or Rosebud Creek basins. The notice shall state:

a. The person authorized to make the diversion;
b. The amount of water authorized to be diverted annually;
c. The amount of water authorized for annual consumption;
d. The point of diversion;
e. The period of use;
f. The place of use;
g. The uses for which the water may be diverted; and
h. The priority date of the use.

3. The State shall notify the Tribe within sixty days after the end of each quarter year of all new uses of surface and groundwater for which a permit has been issued by the State in the Tongue River or Rosebud Creek basins during the preceding quarter year and of all new uses of water actually commenced pursuant to the laws of the State during that quarter year on each of these sources. The notice shall be in the same format as that prescribed in Section C.2. of this Article.

D. Operation of Tongue River Reservoir.

1. To provide for Tongue River Reservoir operation procedures that are consistent with the purposes of this Compact, a reservoir operation plan shall be developed by a five-member advisory committee. The committee shall have representatives from the State of Montana, the Tongue River Water Users Association, the Northern Cheyenne Tribe, the United States, and a fifth member to be selected by the other four. The advisory committee shall annually agree upon a reservoir operation schedule setting forth proposed uses of storage and direct flow for the year. The Department of Natural Resources and Conservation or its successor shall thereupon be responsible, consistent with the terms of this Compact and other applicable law, for the daily operation of the Reservoir and for implementation of the reservoir operation plan.

2. The reservoir operation plan shall provide for the operation of the project for fish and wildlife purposes depending on the availability of water on an annual basis. This provision shall not create an operational preference for fish and wildlife purposes relative to other project purposes.

3. The Secretary of the Interior shall pay annually to the State an amount to cover the proportionate share of the annual operation, maintenance and replacement (OM&R) costs for the Tongue River Dam allocable to the Tribe's stored water in the Reservoir.

Article IV

Northern Cheyenne-Montana Compact Board

A. Establishment of Board.

There is hereby established the Northern Cheyenne-Montana Compact Board. The Board shall consist of three members: one member appointed by the Governor of the State of Montana; one member appointed by the Northern Cheyenne Tribal Council; and one member selected by the other two members. All members shall be appointed within six months of the ratification date of this Compact and within thirty days of the date any vacancy occurs. Each member shall serve a five-year term and shall be eligible for reappointment. The initial term of each member shall be staggered with one member serving a five-year term, one a four-year term, and one a three-year term. The initial term of each member shall be chosen by lot. Expenses of the members appointed by the State and the Tribe shall be borne by the entity appointing the member. The expenses of the third member and all other expenses shall be borne equally by the Tribe and the State, subject to the availability of funds.

B. Membership.

Should the two appointed members fail to agree on the selection of a third member within sixty days of the ratification date of this Compact or within thirty days after any vacancy occurs, the following procedure shall be utilized:

1. Within five days each member shall nominate three persons to serve as a member of the Board;

2. Within fifteen days thereafter each member shall reject two of the persons nominated by the other member;

3. The chief judge of the United States District Court for the District of Montana shall select the third member of the Board from the remaining two nominees. If the chief judge declines for

any reason to select the third member, the chief justice of the Montana Supreme Court shall make the selection from the remaining two nominees.

C. Quorum and Vote Required.

Two members of the Board shall constitute a quorum if reasonable notice has been provided in advance to the absent member. All Board decisions shall be by a majority of the Board, shall be in writing and, together with any dissenting opinions, shall be served on all parties in the proceeding before the Board, and on the parties to this Compact.

D. Jurisdiction of the Board.

The Northern Cheyenne-Montana Compact Board shall have jurisdiction to resolve controversies over the right to the use of water between users of the Tribal Water Right on the one hand and users of state water rights on the other hand. Such controversies shall include, but shall not be limited to, disputes as to the meaning of this Compact, and disputes concerning the operation of the Tongue River Reservoir as it affects the Tribal Water Right.

E. Powers and Duties.

The Board shall hold hearings upon notice in proceedings before it and shall have the power to administer oaths, take evidence and issue subpoenas to compel attendance of witnesses or production of documents or other evidence. The Tribe, the State, and the United States shall enforce the Board's subpoenas in the same manner as prescribed by the laws of the Tribe, the State, or the United States for enforcing a subpoena issued by its courts in a civil action. The parties to the controversy may present evidence and cross examine any witnesses. The Board shall determine the controversy based on the evidence, and grant any appropriate relief, except money damages. All decisions of the Board shall be by majority and in writing. The Board shall adopt necessary rules and regulations to carry out its responsibilities within six months after its first meeting. All records of the Board shall be open to public inspection except for privileged information.

F. Review and Enforcement of Board Decisions.

1. Decisions by the Board shall be effective immediately, unless stayed for a period of time prescribed by the Board. Any party before the Board may appeal any final decision by the Board to a court of competent jurisdiction within thirty days of such decision. The notice of appeal shall be filed with the Board and served personally or by registered mail upon the Tribe, the State, the United States and all parties to the proceeding before the Board, and all such persons shall thereafter have the right to participate in the appeal.

2. In any appeal, the Board's decision shall be presumed to be valid, and may be vacated by the court only on one of the following grounds:

a. The decision is not supported by substantial evidence;

b. The decision was procured by corruption, fraud or undue means;

c. There was evident partiality or corruption by the Board or by any member;

d. The Board was guilty of misconduct in refusing to hear the dispute, or in refusing to hear evidence pertinent and material to the controversy, or any other clear misbehavior by which the rights of any party have been substantially prejudiced;

e. The Board exceeded its authority under the terms of this Compact; or

f. The decision is contrary to law.

3. Unless an appeal is timely filed as provided in paragraph F.1. of this Article, any decision of the Board shall be confirmed or enforced by any court of competent jurisdiction on petition of the Board, the Tribe, the State, the United States, or any party before the Board in the proceeding in which the decision was made.

4. A court of competent jurisdiction in which a timely appeal is filed pursuant to paragraph F.1. of this Article, or in which a petition to confirm or enforce is filed pursuant to paragraph F.3. of this Article, may order such temporary or permanent relief as it considers just and proper.

5. Any appeal may be taken from any decision of the court in which a timely appeal is filed pursuant to paragraph F.1. of this Article, or in which a petition to confirm or enforce is filed pursuant to paragraph F.3. of this Article, in the manner and to the same extent as from orders or judgments of the court in a civil action.

6. In any appeal or petition to confirm or enforce the Board's decision, the Board shall file with the court the record of the proceedings before the Board.

G. Waiver of Immunity.

The Tribe, the United States and the State hereby waive their respective immunities from suit, including any defense the State shall have under the Eleventh Amendment of the Constitution of the United States, in order to permit the resolution of disputes under this Compact by the Northern Cheyenne-Montana Compact Board, and the appeal or judicial enforcement of Board decisions as provided herein, except that such waivers of sovereign immunity by the Tribe, the United States, or the State shall not extend to any action for money damages including costs and attorneys' fees.

Article V
Finality and Effectiveness of Compact

A. Ratification and Effectiveness of Compact.

1. Upon ratification by the Northern Cheyenne Tribal Council and the Legislature of the State of Montana, the terms of this Compact may not be altered, voided, or modified in any respect without the consent of the parties; provided, that except as set forth in Section A.2. of this Article, this Compact shall not become effective until ratification by the United States Congress and the completion date occurs, notwithstanding the provisions of Section 85-2-702(2), MCA. If the completion date does not occur on or before December 31, 1997, or any later date agreed to in writing by the parties, this Compact, including all provisions that become effective on the ratification date, shall become null and void without further action by any party. Notwithstanding the provisions of Section 85-2-702(3), MCA, this Compact shall not be included in any preliminary decree or final decree in any State water court proceeding unless and until this Compact becomes effective as set forth in this Article.

2. As between the State and the Tribe, all of the provisions of this Compact shall become effective upon the ratification date except insofar as they:

a. Quantify or provide for the administration of the Tongue River Tribal Water Right;

b. Provide for the management or operation of the Tongue River Reservoir; or

c. Require Congressional authorization.

All of the provisions that do not become effective upon the ratification date shall become effective on the completion date, unless Congress provides otherwise.

B. Incorporation Into Decrees and Disposition of Federal Suits.

Within sixty days after the completion date, the parties shall petition for incorporation of this Compact into a decree in any appropriate State court proceeding commenced in accordance with 43 U.S.C. 666. Upon the issuance of a final decree by the State water court, or its successor, and the completion of any direct appeals therefrom, or upon the expiration of the time for filing any such appeal, the United States, the Tribe, and the State shall within thirty days execute and file joint motions pursuant to Rule 41(a), Fed. R. Civ. P., to dismiss the Tribe's claims, and any claims made by the United States as trustee for the Tribe, in Northern Cheyenne Tribe of the Northern Cheyenne Reservation v. Adsit, et al., No. 75-6-BLG (D. Mont.); United States v. Big Horn Low Line Canal Company, et al., No. 75-34-BLG (D. Mont.); and United States v. Tongue River Water Users Association, et al., No. 75-20-BLG (D. Mont.), (hereinafter collectively referred to as "the federal suits"), with prejudice. This Compact shall be filed as a consent decree in the federal suits only if, prior to the dismissal of the federal suits as provided in this Article, it is finally determined in a judgment binding upon the State of Montana that the State courts lack jurisdiction over, or that the State court proceedings are inadequate to adjudicate, some or all of the water rights asserted in the federal suits.

Article VI
General Provisions

A. Nothing in this Compact shall be so construed or interpreted:

1. To establish the nature, extent, or manner of administration of water rights of any Indian reservation or other federal reservation other than the Northern Cheyenne Reservation;

2. To preclude the acquisition or exercise of a right to the use of water by the Tribe or any individual Indian outside the Reservation by purchase of such right or by acquisition of land, or by application to the State;

3. To preclude the acquisition or exercise of an appropriative right to the use of water under state law by the Tribe or any individual Indian within the Reservation:

a. By purchase of such right or by purchase of land; provided, that water rights acquired by such purchase after the ratification date of this Compact shall be in addition to and shall become part of the Tribal Water Right and shall be governed by this Compact; or

b. By application to the State. Except for applications for non-alluvial groundwater pursuant to Article II.A.4.b., and applications for storage appropriations authorized by paragraph A.8. of this Article, any such application shall not be granted by the State until the Tribal Water Right in the basin where the diversion that is the subject of the application is located has been fully utilized;

4. To determine the relative rights inter sese of persons using water under the authority of the State or the Tribe;

5. To limit in any way the rights of the parties or any other person to litigate any issues or questions not resolved by this Compact;

6. To authorize the taking of a water right which is vested under state or federal law;

7. To create or deny substantive rights through headings or captions used in this Compact;

8. To preclude or to discourage the Tribe from establishing the right to, or contracting for, water from any further enlargements of the Tongue River Dam, or from any future storage facilities that may be built within the Tongue River or Rosebud Creek basins, or in any other water basins;

9. To address or prejudge whether, in any interstate apportionment, the Tribe's water right shall be counted as part of the waters apportioned to the State; or

10. To alter or amend any provisions of the Yellowstone River Compact, Act of October 30, 1951, ch. 629, 65 Stat. 663 (1951).

11. To prohibit the Tribe or the United States from challenging any claims to water in any general adjudication of the Tongue River or Rosebud Creek basins.

B. The parties expressly reserve all rights not granted, recognized or relinquished in this Compact.

C. The Secretary of the Interior shall comply with all aspects of the National Environmental Policy Act, 42 U.S.C. 4331-4335, and the Endangered Species Act, 16 U.S.C. 1531, et seq., and other applicable environmental acts and regulations in implementing this Compact.

Article VII
Tribal Relinquishment of Other Water Claims

A. With the exception of the Tribe's claim to non-alluvial groundwater in paragraph B. of this Article and any rights to water which may exist with respect to land held by the Tribe or a Tribal member outside the present Reservation, the Tribe and the United States as trustee for the Tribe hereby relinquish forever any and all claims, in existence on the ratification date of this Compact, to water within the State of Montana. The relinquishment includes, but is not limited to, any claim for water derived from aboriginal use of land or water, any Indian treaties, any Act of Congress, and any executive act of the United States.

B. The parties intend that the water right as confirmed to the Tribe in Article II is in full satisfaction of its federal reserved water right based on Winters v. United States, 207 U.S. 564 (1908). Notwithstanding the provisions of paragraph A. of this Article, the Tribe retains the right to assert a claim that it has a right, not based on the federal reserved water rights doctrine, to the use of any non-alluvial groundwater underlying the Reservation. In any such action, the Tribe shall be estopped to assert that its right to non-alluvial groundwater is a federal reserved water right, that the Tribal Water Right confirmed in Article II is inadequate to satisfy the purposes for which the Reservation was created, or from collaterally attacking this Compact in any manner. Any right to non-alluvial groundwater established by the Tribe under this paragraph is not subject to this Compact. Nothing in this Compact shall be construed to waive any defenses of the State or any water user to a Tribal claim for non-alluvial groundwater.

Article VIII
Binding Effect

Upon the effectiveness of any provision of this Compact, its terms will be binding:

A. Upon the State and any person or entity of any nature whatsoever using, claiming or in any manner asserting any right under the authority of the State to the use of water in the State of Montana; provided, that for purposes of consent, ratification, or authorization, the validity of consent, ratification, or authorization is to be determined by Montana law;

B. Upon the Tribe and any person or entity of any nature whatsoever using, claiming or in any manner asserting any right to the use of the Tribe's water right, or any right arising under any doctrine of reserved or aboriginal water rights for the Tribe, or any right arising under tribal law; provided, that for purposes of consent, ratification, or authorization, the validity of consent, ratification or authorization is to be determined by tribal law; and

C. Upon the United States and any person or entity of any nature whatsoever using, claiming or in any manner asserting any right under the authority of the United States to the use of water in the State of Montana; provided, that for purposes of consent, ratification, or authorization, the validity of consent, ratification or authorization is to be determined by federal law, and further provided that nothing contained in this Compact affects any claim of any Indian tribe, or of persons claiming water through that tribe, or the right of any Indian tribe, or persons claiming water through that tribe, to pursue a claim to any water from any source based on any theory of right or entitlement.

Article IX
Contributions to Settlement

A. The United States agrees to provide $31,500,000 to repair the Tongue River Dam and spillway and to raise the Tongue River Dam spillway crest to secure the Tribe's existing contract water under Article II.A.2.e. and to provide additional storage capacity to secure the Tribe's storage and exchange water right under Article II.A.2.b.

B. The State agrees to provide $16,500,000 to repair the Tongue River Dam and spillway with the understanding that the State's portion will be paid through a combination of cash and federal loans, in proportions to be agreed upon by the parties.

C. The Provisions of this Article are subject to the separate Letter of Agreement dated April 17, 1991, between the State and the United States explaining in detail the allocation of the costs of the project. The State and the United States will enter into a further agreement providing for the expenditure of the contributions and loans of the United States hereunder.

D. The United States agrees to provide $10,000,000 for a Tribal Development Fund payable in equal amounts of $2,000,000 each fiscal year for five years. These funds shall not be distributed on a per capita basis to members of the Tribe and shall only be used for land and natural resources administration, planning and development within the Northern Cheyenne Reservation or for land acquisition by the Tribe within the Northern Cheyenne Reservation.

E. Federal financial contributions to paragraph A of this Article will be budgeted for, subject to the availability of funds, by October 1 of the year following the ratification of this Compact by Congress and the authorization by Congress of the Tongue River Dam project. Federal financial contributions to paragraph D of this Article will be budgeted for, subject to the availability of funds, by October 1 of the second year following the ratification of this Compact by Congress and the authorization by Congress of the Tongue River Dam project.

F. The Tribe and the United States agree to pursue through the normal Bureau of Indian Affairs and Department of the Interior budget process such additional sums as are necessary to implement the terms of this Compact, to develop a Tribal water code, and to provide increased agricultural development on the Reservation. The State agrees to support the efforts of the Tribe and the United States in this regard.

Article X
Legislation

The Parties agree to seek enactment of any legislation necessary to effectuate the provisions and purposes of this Compact, and to defend the provisions and purposes of this Compact from all challenges and attacks; provided, that no provision of the Compact shall be modified as to substance except as may be provided herein.

IN WITNESS WHEREOF the representatives of the State of Montana, the Northern Cheyenne Tribe, and the United States have signed this Compact on the 11th day of June, 1991.

85-20-302. Consent to federal act and modification of compact. (1) Pursuant to Article V, section A.1., of the Northern Cheyenne-Montana Compact, section 85-20-301, MCA, the Legislature hereby gives its consent to, ratifies, and adopts the Northern Cheyenne Indian Reserved Water Rights Settlement Act of 1992 (Public Law 102-374, 106 Stat. 1186). This consent includes:

(a) any amendment to the act that clarifies that environmental compliance costs for the Tongue River Dam Project are the responsibility of the federal government; or

(b) any amendment to section 4(c) of the act that provides that, except for the authorizations contained in subsections 7(b)(1)(A), 7(b)(1)(B), and 7(e), the authorization of appropriations in the act are not effective until such time as the Montana water court enters and approves a decree as provided in subsection 4(d) of the act.

(2) The provisions of the compact that are inconsistent with the federal act or with the amendments specified in subsections (1)(a) and (1)(b) of this section shall be deemed to be modified to the extent necessary to conform therewith.

History: **En. Sec. 1, Ch. 7, Sp. L. November 1993.**

Part 4
United States Park Service-Montana Compact

85-20-401. United States National Park Service-Montana compact ratified. The compact entered into by the state of Montana and the United States National Park Service and filed with the secretary of state of the state of Montana under the provisions of 85-2-702 on May 12, 1993, is ratified. The compact is as follows:

WATER RIGHTS COMPACT
STATE OF MONTANA
UNITED STATES OF AMERICA, NATIONAL PARK SERVICE

This Compact is entered into by the State of Montana and the United States of America to settle for all time any and all claims to water for certain lands administered by the National Park Service within the State of Montana at the time of the effective date of this Compact.

A Compact between the State of Montana and the United States of America regarding water rights for National Park Service lands was executed January 31, 1994. The parties were unable to finalize agreement on quantification of the water rights for Bighorn Canyon National Recreation Area and the Little Bighorn Battlefield National Monument prior to the completion of the Compact executed January 31, 1994. This Compact is the final agreement regarding the water rights attributable to these two NPS Units.

RECITALS

WHEREAS, in 1979 the United States filed in the United States District Court for the District of Montana several actions to adjudicate, inter alia, its rights to water with respect to Glacier National Park, see United States v. Aageson, No. CV-79-21-GF; United States v. Abell, No. CV-79-33-M; and United States v. AMS Ranch, Inc., No. CV-79-22-GF.

WHEREAS, the State of Montana, in 1979 pursuant to Title 85, Chapter 2 of the Montana Code Annotated, commenced a general adjudication of the rights to the use of water within the State of Montana including all federal reserved and appropriative water rights;

WHEREAS, 85-2-703, MCA, provides that the state may negotiate settlement of claims by the federal government to non-Indian reserved waters within the State of Montana;

WHEREAS, the United States wishes to quantify and have decreed the amount of water necessary to fulfill the purposes of the existing National Park Service units in the State of Montana, including those reserved water rights necessary to preserve Glacier National Park and Yellowstone National Park unimpaired for future generations;

WHEREAS, the United States, in quantifying its reserved water rights recognizes the need to accommodate the interests of the state and its citizens by providing for the development and use of water in the vicinity of the Park units to the extent that it is possible to do so without materially affecting the rights and interests of the United States;

WHEREAS, the United States Attorney General, or a duly designated official of the United States Department of Justice, has authority to execute this Compact on behalf of the United States pursuant to the authority to settle litigation contained in 28 U.S.C. §§ 516-17 (1968);

WHEREAS The Secretary of the Interior, or a duly designated official of the United States Department of the Interior, has authority to execute this Compact on behalf of the United States Department of Interior pursuant to 43 U.S.C. § 1457 (1986, Supp. 1992);

NOW THEREFORE, the State of Montana and the United States agree as follows:

ARTICLE I
DEFINITIONS

For purposes of this Compact only, the following definitions shall apply:

(1) "Abstract" means the copy of the document entitled "Abstract of National Park Service Water Rights" referenced in this Compact as Appendix 1 [and] the copy of the document entitled "Abstract of National Park Service Water Rights - BCNRA and LBBNM" referenced in this Compact as Appendix 2.

(2) "Big Hole National Battlefield" or "BHNB" means those lands located in Montana that were acquired pursuant to, or withdrawn and reserved by Executive Order No. 1216 of June 23, 1910; Presidential Proclamation No. 2339 of June 29, 1939, 53 Stat. 2544; and Act of May 17, 1963, 77 Stat. 18.

(3) "Bighorn Canyon National Recreation Area" or "BCNRA" means those lands located in Montana that were acquired pursuant to, or designated as such by Act of October 15, 1966, 80 Stat. 913.

(4) "Bureau" means the Montana Bureau of Mines and Geology or its successor.

(5) "Category 1 stream" means a stream that headwaters on the reserved land administered by the National Park Service.

(6) "Category 1a stream" means a stream that headwaters on the reserved land administered by the National Park Service and which, in part, carries water that drains non-federal land within the boundaries of the same reserved land.

(7) "Category 2 stream" means a stream that headwaters in a Wilderness Area in Montana outside the respective Park unit which flows into the reserved land administered by the National Park Service, and which is not the source for a consumptive use water right recognized under

state law on the effective date of this Compact and drains a hydrologic basin that contains only federal land.

(8) "Category 3 stream" means a stream that headwaters in Montana outside the reserved land administered by the National Park Service that flows into the reserved land and is the source for consumptive use water rights recognized under state law on the effective date of this Compact.

(9) "Category 4 stream" means a stream that is treated individually due to special circumstances.

(10) "Consumptive use" means use of surface water not considered a non-consumptive use under (26) and use of groundwater which is shown to be hydrologically connected to surface water pursuant to Article II.

(a) "Current consumptive use", when referring to water rights recognized under state law only, means all consumptive use water rights recognized under state law with a priority date before January 1, 1993 [, with respect to BHNB, GNP, or YNP and] on or before the effective date of the compact [with respect to BCNRA and LBBNM].

(b) "Future consumptive use", when referring to a water right recognized under state law only, means a consumptive use water right recognized under state law with a priority date on or after January 1, 1993 [, with respect to BHNB, GNP, or YNP and] after the effective date of the compact [with respect to BCNRA and LBBNM].

(11) "Credible information" means credible evidence sufficient to support a prima facie basis for the theory asserted.

(12) "Crow Tribal Water Rights" means those senior reserved water rights and any aboriginal water rights held by the United States in trust for the Crow Tribe which are being quantified as part of the general adjudication of water rights in Montana.

(13) "Curtailment" means action pursuant to this Compact to reduce or shut-off diversions by a junior water user to satisfy the senior instream flow right of the National Park Service.

(14) "Department" means the Montana Department of Natural Resources and Conservation or its successor.

(15) "Effective date of this Compact" means the date of the ratification of the Compact by the Montana legislature, written approval by the United States Department of the Interior, or written approval by the United States Department of Justice, whichever is later.

(16) "Glacier National Park" or "GNP" means those lands located in Montana that were acquired pursuant to, or withdrawn and reserved by the Act of May 11, 1910, 36 Stat. 354; Act of February 27, 1915, 38 Stat. 814; and Act of April 11, 1972, 86 Stat. 120.

(17) "Grant Kohrs Ranch National Historic Site" means those lands acquired by the United States and designated as such pursuant to Public Law 92-406, August 25, 1972.

(18) "Groundwater" means water that is beneath the ground surface.

(19) (a) "Hydrologically connected" for the purposes of Articles II and III, means groundwater that is connected to surface water such that appropriation at the proposed rate will cause a calculable reduction in surface water flow. A "calculable reduction in surface water flow" means a theoretical reduction based on credible information as opposed to a measured reduction.

(b) "Hydrologically connected" for the purposes of Article IV, means groundwater that is considered to be connected to the hydrothermal system within the reserved land of Yellowstone National Park based on scientific evidence according to the procedures in Article IV.

(20) "Hydrothermal system" means the groundwater system, including cold water recharge, transmission and warm water discharge that is hydrologically connected to the hydrothermal features within the reserved land of Yellowstone National Park.

(21) "Hydrothermal discharge water" means groundwater with a temperature in excess of 59 degrees Fahrenheit that is hydrologically connected to the hydrothermal system within the reserved land of Yellowstone National Park.

(22) "Hydrothermal feature" means a surface manifestation of a hydrothermal system, including but not limited to: hot springs, geysers, mud pots, and fumaroles.

(23) "Instream flow" means the water that the parties agree shall remain in the stream in satisfaction of the United States' reserved water right for the purposes of the reserved land.

(24) "Little Bighorn Battlefield National Monument" or "LBBNM" means those lands located in Montana that were acquired pursuant to or withdrawn and reserved by Presidential Proclamation of December 7, 1886, and by Act of March 22, 1946, 60 Stat. 59.

(25) "Nez Perce National Historical Park" means those lands in Montana acquired and added to the Nez Perce National Historical Park by Congress on October 30, 1992, pursuant to Public Law 102-576.

(26) (a) "Non-consumptive use" when applied to a mining or hydropower use for which a water right is recognized under state law with a priority date on or after January 1, 1993, [with respect to BHNB, GNP, or YNP and] after the effective date of this compact [with respect to BCNRA and LBBNM], means an appropriation that does not cause a net loss in the surface source of supply, and where substantially all of the diverted water becomes return flow with little or no delay between the time of diversion and the time of return, and without adverse effect on the quantity or quality of water necessary to fulfill the purposes of the reserved land.

(b) "Non-consumptive use" when applied to a water right recognized under state law other than a mining or hydropower use with a priority date on or after January 1, 1993, [with respect to BHNB, GNP, or YNP and] after the effective date of this compact [with respect to BCNRA and LBBNM], or a water right recognized under state law with a priority date before January 1, 1993, [with respect to BHNB, GNP, or YNP and] on or before the effective date of this compact [with respect to BCNRA and LBBNM], means a water right considered to be non-consumptive by the decree, permit or law authorizing the use.

(27) "Parkman Sandstone" means the unit as defined in Moulder, E.A., Klug, M.F., Morris, D.A., and Swenson, F.A. (1960) "Geology and Ground-Water Resources of the Lower Little Bighorn River Valley Big Horn County, Montana," USGS Water Supply Paper 1487, where it occurs along the Little Bighorn River and its tributaries between the Montana-Wyoming line and the Little Bighorn Battlefield National Monument.

(28) "Parties" means the State of Montana and the United States.

(29) "Person" means an individual, association, partnership, corporation, state agency, political subdivision, or any other entity, but does not include the United States.

(30) "Quaternary Alluvium" means the unit as defined in Moulder, E.A., Klug, M.F., Morris, D.A., and Swenson, F.A. (1960) "Geology and Ground-Water Resources of the Lower Little Bighorn River Valley Big Horn County, Montana," USGS Water Supply Paper 1487, where it occurs along the Little Bighorn River and its tributaries between the Montana-Wyoming line and the Little Bighorn Battlefield National Monument.

(31) "Quaternary Terrace Deposits" means the unit as defined in Moulder, E.A., Klug, M.F., Morris, D.A., and Swenson, F.A. (1960) "Geology and Ground-Water Resources of the Lower Little Bighorn River Valley Big Horn County, Montana," USGS Water Supply Paper 1487, where it occurs along the Little Bighorn River and its tributaries between the Montana-Wyoming line and the Little Bighorn Battlefield National Monument.

(32) "Recognized under state law" when referring to a water right or use means a water right or use protected by state law, but does not include state recognition of a federal or tribal reserved water right.

(33) "Return flow" means the portion of water diverted from a source that is returned to the same source, at or near the point of diversion.

(34) "Scientific evidence" means geologic, geophysical, geochemical and hydrologic information.

(35) "State" means the State of Montana and all officers, agents, departments, and political subdivisions thereof. Unless otherwise indicated, for purposes of notification or consent, "state" means the Director of the Montana Department of Natural Resources and Conservation or his or her designee.

(36) "Technical Oversight Committee" or "TOC" means the scientific committee established by Article IV of this Compact.

(37) "Tributary to" means surface water that originates in the same hydrologic basin or subbasin as the stream referred to and which contributes water to the same stream.

(38) "Unincorporated municipality" includes but is not limited to a rural special improvement district or any other entity that serves community water needs.

(39) "United States" means the federal government and all officers, agencies, departments and political subdivisions thereof. Unless otherwise indicated, for purposes of notification or consent other than service in litigation, "United States" means the Secretary of the Department of the Interior, or his or her designees.

(40) "Working Group Report" means the Abridged and Unabridged reports by Custer, S., et. al. dated January 5, 1993, and titled Recommended Boundary for Controlled Groundwater Area in Montana Near Yellowstone National Park and accompanying maps.

(41) "Yellowstone National Park" or "YNP" means those lands located in Montana that were acquired pursuant to, or withdrawn and reserved for Yellowstone National Park by the Act of March 1, 1872, 17 Stat. 32; Act of May 26, 1926, 44 Stat. 655; Act of March 1, 1929, 45 Stat. 1435; Act of April 19, 1930, 46 Stat. 220; and Proclamation No. 2013 of October 20, 1932, 47 Stat. 2537.

ARTICLE II
IMPLEMENTATION

A. Abstract:

Concurrent with this Compact, the parties have prepared an Abstract, a copy of which is referenced as Appendix 1, which is a specific listing of all of the United States' water rights [for Big Hole National Battlefield, Glacier National Park, and Yellowstone National Park, and] prepared an Abstract, a copy of which is referenced as Appendix 2, which is a specific listing of all of the United States' water rights for Bighorn Canyon National Recreation Area and the Little Bighorn Battlefield National Monument that are described in this Compact and quantified in accordance with this Compact. The parties prepared the Abstract to comply with the requirements for a final decree as set forth in 85-2-234(4) and (7), MCA, and in an effort to assist the state courts in the process of entering decrees accurately and comprehensively reflecting the rights described in this Compact. The rights specified in the Abstract are subject to the terms of this Compact. In the event of a discrepancy between a right listed in the Abstract and that same right as quantified in accordance with Articles II and III of this Compact, the parties intend that the quantification in accordance with Articles II and III of this Compact shall be reflected in a final decree.

B. Method of Allocation of Water on Category 3 and 4 Streams and of Determining Rights Subject to Curtailment on the Little Bighorn River and its Tributaries:

This section explains the method of quantification of the reserved instream flow water rights of the United States for Category 3 and 4 streams and the method of calculating the quantity of consumptive use pursuant to state law within a basin to which the United States agrees to subordinate its reserved instream flow water right. The method set forth in this section shall be used to determine whether the limits on consumptive use pursuant to state law set forth in Article III have been reached and whether a water right on the Little Bighorn River and its tributaries upstream from the LBBNM shall be subject to curtailment to satisfy the reserved instream flow water right for LBBNM. Addition to the Abstract of a reserved instream flow water right on a stream inadvertently omitted by the parties or reclassification of a stream due to a water right recognized under state law and inadvertently omitted by the parties shall be consistent with this section and shall not be deemed a modification of this Compact.

1. Allocation to Instream Flow:

With the exception of the reserved instream flow rights for LBBNM, the allocation of water to instream flow on Category 3 and 4 streams is arrived at using the following method as explained in general terms:

a. The United States' reserved water right for instream flow includes the entire flow of that stream within the State of Montana at the point where the stream flows over or forms the boundary of the specified reserved land after: (1) all consumptive use water rights of any agency of the United States recognized under federal or state law are satisfied; and (2) subordination of the reserved water right for instream flow to water rights recognized under state law as set forth in and limited by Article III and more specifically in the Abstract.

b. Actual use of water in Wyoming or Canada shall not diminish the quantity of water designated for consumptive use pursuant to state law as set forth in Article III.

2. Method of Calculation of Consumptive Use Rights Recognized Under State Law:
To determine whether water is available for appropriation for consumptive use pursuant to state law on Category 3 and 4 streams, and for determining whether the limit on subordination of the United States' water rights to consumptive uses has been reached, the following provisions shall apply:

a. Tributary Water: The calculation of total consumptive use on a Category 3 or 4 stream shall include all current and future consumptive use, recognized under state law, of surface water tributary to the stream to the point it enters the reserved land. The limits on total consumptive use on a Category 4 stream that forms the boundary of the reserved land shall include all current and future consumptive use recognized under state law, of surface water tributary to the stream to the most downstream point that the stream forms the boundary of the reserved land.

b. Groundwater: [The following sections i., ii., and iii. shall apply to BHNB, GNP, and YNP.] The following sections iii. and iv. shall apply to BCNRA. The following sections iii. and v. shall apply to LBBNM.

i. An exemption from state permit requirements for wells or developed springs shall not apply to appropriations within a basin tributary to the reserved portion of a Category 3 or 4 stream after the effective date of this Compact, provided that the registration process set forth in Article II, section B.2.b.ii.(3)(b) shall apply to applications for a permit for a well of 35 gpm or less, not to exceed 10 acre-feet per year. In addition, all groundwater appropriations within the Yellowstone Controlled Groundwater Area shall be subject to Article IV.

ii. The calculation of total consumptive use on a Category 3 or 4 stream shall include appropriations of groundwater as follows:

(1) Pre-January 1, 1993: An appropriation of groundwater with a priority date before January 1, 1993, shall not be included in the calculation of total consumptive use.

(2) January 1, 1993 - Effective Date: An appropriation of groundwater with a priority date on or after January 1, 1993, but before the effective date of this Compact shall be included in the calculation of total consumptive use if the following procedural requirements are met and the appropriation is found to be hydrologically connected to surface water tributary to the reserved portion of a Category 3 or 4 stream.

(a) Within 120 days after the effective date of this Compact, the Department shall provide the United States with notice of all groundwater appropriations in drainages tributary to the reserved portion of a Category 3 or 4 stream that, according to the records of the Department, have a priority date on or after January 1, 1993 and before the effective date of this Compact.

(b) Up to 120 days following mailing of such notice the United States shall provide the Department with credible information that a groundwater appropriation included in the notice is hydrologically connected to surface flow tributary to the reserved portion of a Category 3 or 4 stream.

(c) Within 60 days of receipt of such information, the Department shall issue an order stating that (1) the appropriation is hydrologically connected to surface water tributary to the Category 3 or 4 stream; and (2) the action to be taken with respect to the appropriation. The order is effective within 60 days of issuance unless the appropriator enters an appearance to contest the order. If credible information of hydrologic connection has not been provided by the United States, the Department shall issue an order stating its determination and reasons therefore.

(d) If the appropriator enters an appearance to contest the order, the Department shall (1) issue an order staying use of the appropriation pending a final decision on the matter by the Department only if the limits on total consumptive use for that drainage have been reached; (2) set a date for a hearing; and (3) proceed pursuant to the provisions for a contested case under the Montana Administrative Procedures Act, Title 2, Chapter 4, of the Montana Code Annotated, provided that the burden of proving hydrologic connection shall be as set forth in Article II, section B.2.b.[ii.](3). The Department shall, whenever possible, consolidate any proceedings on the groundwater application pursuant to Article IV with any proceeding made necessary by this Article.

(3) Post-Effective Date: An appropriation of groundwater recognized under state law with a priority date after the effective date of this Compact shall be included in the calculation of total consumptive use if the following conditions apply:

(a) Wells in excess of 35 gallons per minute or 10 acre-feet per year: The limit on total consumptive use shall include groundwater appropriation by a well or developed spring with a permit amount in excess of 35 gpm or any well with a volume of use greater than 10 acre-feet per year, including a combined appropriation from the same source from two or more wells or developed springs that exceeds these limitations, unless the applicant is able to show by a preponderance of the evidence that the appropriation is not hydrologically connected to surface flow tributary to the reserved portion of a Category 3 or 4 stream.

(i) The applicant shall submit credible information, including a report to the Department prepared by a professional qualified in the science of groundwater hydrology verifying that the appropriation is not hydrologically connected to surface flow tributary to the reserved portion of a Category 3 or 4 stream. If the applicant fails to submit the report, the application shall be considered defective and shall be returned to the applicant for completion as provided by state law.

(ii) The Department shall provide notice of the proposed appropriation and a copy of the report to the United States concurrent with notice pursuant [to] 85-2-307, MCA.

(iii) Within 60 days of the mailing of notice, the United States shall file an objection to the proposed appropriation on the basis that it is hydrologically connected to surface water.

(iv) The Department shall not exclude the appropriation from the limits on total consumptive use unless the applicant proves by a preponderance of the evidence that the proposed appropriation is not hydrologically connected to surface flows tributary to the reserved portion of the Category 3 or 4 stream. In doing so the Department shall make a specific finding on the adequacy of the report provided by the applicant.

(v) If the proposed appropriation is determined not to be hydrologically connected to surface water, or if the limit on consumptive use has not been reached, the Department may issue a permit in accordance with state law and the applicant may complete the appropriation.

(b) Wells of 35 gallons per minute or less and 10 acre-feet per year or less:

(i) An applicant for an appropriation of groundwater of 35 gpm or less, not to exceed 10 acre-feet per year shall register for a permit by filing a form prescribed by the department.

(ii) The Department shall provide notice of the registration for a permit to the United States within 30 days of the filing. Within 30 days of the receipt of notice, the United States may file an objection to the application on the basis that the proposed appropriation is of groundwater that is hydrologically connected to surface flow tributary to the reserved portion of a Category 3 or 4 stream.

(iii) As long as the limit on consumptive use rights for a Category 3 or 4 stream has not been reached, the calculation of total consumptive use shall not include groundwater appropriations by well or a developed spring of 35 gallons per minute or less that do not exceed 10 acre feet per year unless the United States shows by a preponderance of the evidence that the proposed appropriation is hydrologically connected to the reserved portion of a Category 3 or 4 stream. If the United States meets this burden, the Department shall include the appropriation in the calculation of total consumptive use.

(iv) After the limit on consumptive use rights has been reached on a particular stream, the necessary showing by the United States' shall be to file an objection and come forward with credible information showing that the proposed appropriation is hydrologically connected to surface flows tributary to the reserved portion of the Category 3 or 4 stream. If the United States makes such a showing, the Department shall consider the application under the criteria in Article II, section B.2.b.[ii.](3)(b)(v) and (vi).

(v) The Department shall not exclude the appropriation from the limits on total consumptive use unless the applicant proves by a preponderance of the evidence that the proposed appropriation is not hydrologically connected to surface flows tributary to the reserved portion of the Category 3 or 4 stream.

(vi) If the proposed appropriation is determined not to be hydrologically connected to surface water the Department may issue a permit in accordance with state law and the applicant may complete the appropriation.

iii. Within 2 years after the effective date of this Compact, the Department, in consultation with the United States, is directed to promulgate rules as may be necessary to implement Article II, section B.2.b. Said rules shall not alter the rights or obligations of the parties hereto.

iv. The calculation of total future consumptive use on Category 3 or 4 streams at BCNRA shall include appropriations of groundwater as follows:

(1) The calculation of total future consumptive use shall not include appropriation of groundwater by means of a well or developed spring with an appropriation of 35 gallons per minute (gpm) or less that does not exceed 10 acre feet per year (afy).

(2) The limit on total consumptive use shall not include an appropriation of groundwater by means of a well or developed spring with a permit amount in excess of 35 gpm or with a volume of use greater than 10 afy, including a combined appropriation from the same source from two or more wells or developed springs that exceeds these limitations, unless the United States shows by a preponderance of the evidence that the proposed appropriation is hydrologically connected to surface water tributary to the reserved portion of a Category 3 or 4 stream. If the United States meets this burden, the Department shall include the appropriation in the calculation of total consumptive use.

(a) The Department shall provide notice of the proposed appropriation to the United States concurrent with notice pursuant to 85-2-307, MCA.

(b) Within 60 days of the mailing of notice, the United States may file an objection to the proposed appropriation on the basis that it is hydrologically connected to surface water.

(c) If the proposed appropriation is determined not to be hydrologically connected to surface water, or if the limit on consumptive use has not been reached, the Department may issue a permit in accordance with state law and the applicant may complete the appropriation.

v. Determination of whether an appropriation of groundwater after the effective date of the this Compact shall be subject to a curtailment to satisfy the instream flow water right at LBBNM shall be made as follows:

(1) Groundwater appropriations subject to curtailment shall not include an appropriation of groundwater for stock or domestic purposes by means of a well or developed spring with an appropriation of 35 gpm or less that does not exceed 10 afy.

(2) Groundwater appropriations subject to curtailment to satisfy the 51 cfs instream flow water rights for LBBNM shall not include an appropriation of groundwater by means of a well or developed spring with a permit amount in excess of 35 gpm or with a volume of use greater than 10 afy, including a combined appropriation from the same source from two or more wells or developed springs that exceeds these limitations, unless the United States shows by a preponderance of the evidence that the proposed appropriation is hydrologically connected to the Little Bighorn River or its tributaries upstream from LBBNM.

(a) The Department shall provide notice of the proposed appropriation to the United States concurrent with notice pursuant to 85-2-307, MCA.

(b) Within 60 days of the mailing of notice, the United States may file an objection to the proposed appropriation on the basis that it is hydrologically connected to surface water.

(c) If the proposed appropriation is determined not to be hydrologically connected to surface water the Department may issue a permit in accordance with state law and the applicant may complete the appropriation.

(d) If the proposed appropriation is determined to be hydrologically connected to surface water the Department may issue the permit in accordance with state law with notice that the appropriation is subject to curtailment to satisfy the instream flow water right of the LBBNM and the applicant may complete the appropriation.

(3) Groundwater appropriations subject to curtailment to satisfy the 950 cfs instream flow water rights for LBBNM shall not include an appropriation of groundwater by means of a well or developed spring with a permit amount in excess of 35 gpm or with a volume of use greater than 10 afy, including a combined appropriation from the same source from two or more wells or developed springs that exceeds these limitations, unless the United States shows by a preponderance of the evidence that the proposed appropriation is hydrologically connected to the Little Bighorn River or its tributaries upstream from LBBNM and the appropriation is completed in the Quaternary Alluvium, Quaternary Terrace Deposits, or the Parkman Sandstone.

(a) The Department shall provide notice of the proposed appropriation to the United States concurrent with notice pursuant to 85-2-307, MCA.

(b) Within 60 days of the mailing of notice, the United States may file an objection to the proposed appropriation on the basis that it is hydrologically connected to surface water and the proposed appropriation is to be completed in the Quaternary Alluvium, Quaternary Terrace Deposits, or the Parkman Sandstone.

(c) If the proposed appropriation is determined not to be hydrologically connected to surface water or not to be completed in the Quaternary Alluvium, Quaternary Terrace Deposits, or the Parkman Sandstone the Department may issue a permit in accordance with state law and the applicant may complete the appropriation.

(d) If the proposed appropriation is determined to be hydrologically connected to surface water and to be completed in the Quaternary Alluvium, Quaternary Terrace Deposits, or the Parkman Sandstone the Department may issue the permit in accordance with state law with notice that the appropriation is subject to curtailment to satisfy the instream flow water right of the LBBNM and the applicant may complete the appropriation.

c. Effect of Decree in Calculation of Consumptive Use: Except as provided in Article II, section G., for the purposes of this Compact, the flow rate of a consumptive use shall be as finally decreed in a general adjudication, or recognized under state law until such final decree. At each stage in an adjudication, the allocation to current use as set forth in Article III and more specifically in the Abstract shall be adjusted to reflect the decreed amount.

d. Abandonment: When a consumptive use right recognized under state law on a Category 3 or 4 stream is abandoned and such abandonment causes water to become available for appropriation within the limits of the total amounts of water allocated to consumptive use rights recognized under state law established for that stream by Article III, the increment of water below that limit is available for new appropriation in accordance with state law and this Compact. State law governs the issue of whether an abandonment has occurred.

e. Non-Consumptive Use: The limit on total consumptive use rights recognized under state law shall not include non-consumptive uses as defined by this Compact.

C. Subordination of Instream Flow Right:

1. The United States agrees to subordinate its reserved water right for instream flow to consumptive uses calculated according to this Article in a manner that is specific to each stream on which a reserved water right is described. This subordination is set forth for each stream in Article III. Curtailment of uses to which the reserved water rights described in this Compact have not been subordinated during periods of low flow shall proceed on the basis of priority and may be initiated in a state or federal court of competent jurisdiction pursuant to Article II, sections I and K.

2. The reserved water rights described in this Compact shall not be subordinate to water rights which were forfeited by 85-2-212 [or] 85-2-226 as interpreted in In the Matter of the Adjudication of the Water Rights within the Yellowstone River, 253 Mont. 167, 832 P.2d 1210 (1992), nor shall any claimant of such forfeited water right have standing, based solely on such claimed right, to object to this Compact or any reserved water right described in this Compact, provided that water allocated to future consumptive use pursuant to Article III[B.] of this Compact may be used to satisfy claims filed pursuant to 85-2-221(3), MCA in order of priority.

D. Location of Instream Flow Rights: The United States' reserved water rights for instream flow apply to the portion of the Categories 1 through 4 streams specified in this Compact that flow over or form the boundary to reserved land administered by the National Park Service.

E. Change in Instream Flow Right: Except as provided in Article II, section J.2.b., the water rights dedicated to instream flow by this Compact shall not be changed to any other use.

F. Prohibition on Future Impoundments: With the exception of the North Fork of the Big Hole River and its tributaries, no new impoundments may be permitted on the mainstem of a Category 2, 3, or 4 stream upstream of, or along, the portion of the stream for which a water right for instream flow is described in this Compact [and] no new impoundments may be permitted on the mainstem of the Little Bighorn River in Montana upstream of the LBBNM after the effective date of this Compact. This prohibition shall include impoundments that are exempt from permit requirements under state law. Reclamation, repair or rehabilitation of an existing impoundment shall not be considered a new impoundment, provided that without the consent of the United States, reclamation, repair or rehabilitation shall not cause the impoundment to exceed the original constructed capacity of the impoundment. This prohibition shall not apply to impoundments constructed to store a Tribal water right or to implement settlement of litigation regarding quantification of a Tribal water right. On Category 3 and 4 streams for which an instream flow right is described for periods of low flow as set forth in Article III, sections G.3.c. and d., such water right has not been subordinated to a new water right with the method of diversion as an impoundment on the mainstem of the stream with a priority date on or after January 1, 1993, but before the effective date of this Compact.

G. Management to Maximize Use by Montana Water Users of the Water Allocated to Consumptive Use Rights Recognized Under State Law: If any type of conservation or water distribution plan which includes measurement of actual water use, including use pursuant to rights recognized under state law with a priority date before January 1, 1993, [with respect to BHNB, GNP, and YNP and] before the effective date of this compact [with respect to BCNRA and LBBNM], is adopted pursuant to state law, the limits established for consumptive use appropriated pursuant to state law shall apply to actual measured use, not permitted and decreed or claimed rights, provided that records of actual use be made available to the United States on request and provided further that, such plan shall not diminish the reserved water right of the United States as described in this Compact.

H. Basin Closure

1. Except as provided in Article II, section B.2.d., in the following drainage basins upstream of the portion of the stream for which a reserved water right for instream flow is described in this Compact, the Department shall not process or grant an application or registration for a permit to appropriate or to reserve water for future consumptive use as defined by this Compact once the limits on consumptive use tabulated in Article III and set forth more specifically in the Abstract are reached:

Big Hole National Battlefield:
North Fork of the Big Hole River
Big Horn Canyon National Recreation Area:
Dry Head, Deadman, Davis and Layout Creeks
Glacier National Park:
North Fork of the Flathead River
Middle Fork of the Flathead River
Yellowstone National Park:
Bacon Rind, Buffalo, Cottonwood, Coyote, Hellroaring, Little Cottonwood, Snowslide, Crevice, Dry Canyon, Slough, Tepee, and Soda Butte Creeks, and the Gallatin, Madison, and Yellowstone Rivers

2. If a temporary or permanent basin closure is enacted under state law for a drainage basin or subbasin for which future consumptive water use is limited under this Compact, the most restrictive measures applicable to consumptive use of surface or groundwater shall control.

I. Enforcement of Water Right

1. The United States, the state, or the holder of a water right recognized under state law, may petition a state or federal court of competent jurisdiction for relief when a controversy arises between the United States' reserved water right described by this Compact, and a holder of a water right recognized under state law. Resolution of the controversy shall be governed by the terms of this Compact where applicable, or to the extent not applicable, by applicable state or federal law.

2. The United States agrees that a water commissioner appointed by a state or federal court of competent jurisdiction, or other official authorized by future changes in law, may enter a federal reservation for which a water right is described in this Compact for the purpose of data collection, including the collection of information necessary for water distribution on or off the federal reservation, and to inspect structures for the diversion and measurement of water described in this Compact for consumptive use and for the measurement of instream flow. The terms of entry shall be as specified in an order of a state or federal court of competent jurisdiction.

3. The Department or the Bureau may enter a federal enclave for which a reserved water right is described in this Compact, at a reasonable hour of the day, for the purposes of data

collection on water diversion and stream flow or inspection of devices maintained by the United States pursuant to this Compact. The Department or Bureau shall notify the United States by certified mail or in person, at least 24 hours prior to entry.

4. The United States may request an investigation by the Department of a diversion located upstream of the reserved portion of a stream for which a reserved water right is described in this Compact. The Department may investigate. If an investigation occurs, the United States may accompany the Department.

5. The United States shall maintain structures, including wellhead equipment and casing, for the diversion and measurement of water authorized for consumptive use by this Compact. The United States shall maintain the devices it deems necessary for enforcement of its reserved water right for instream flow described in this Compact. The United States shall install and maintain a rated gauge to measure instream flows in the Little Bighorn River. The gauge on the Little Bighorn River shall be on the reach of the river which forms the boundary of the LBBNM, the exact location of which shall be at the discretion of the NPS. The NPS shall resurvey the channel cross section as necessary to maintain gauge accuracy, but in any event not less frequently than every three (3) years. The United States may not seek curtailment of junior water uses unless the channel has been resurveyed within three (3) years of the date on which curtailment is sought.

6. A person who violates or refuses or neglects to comply with the provisions of this Compact, an order of the Department pursuant to this Compact, or an action by the Bureau pursuant to this Compact is subject to the penalties provided by state law, including but not limited to, revocation of a permit issued pursuant to Article IV after the effective date of this Compact.

7. For any appeal to state court of an administrative decision authorized by this Compact, venue shall be the First Judicial District in Helena and the review shall be conducted according to the procedures for judicial review of contested cases under the Montana Administrative Procedures Act, Title 2, Chapter 4, of the Montana Code Annotated.

8. In any contested case proceeding held under the Montana Administrative Procedures Act, Title 2, Chapter 4, of the Montana Code Annotated, pursuant to this Compact, the common law and statutory rules of evidence shall apply only upon stipulation of all parties to a proceeding.

J. Change in Use

1. Change in Use Defined: For the purpose of this Article, the following actions affecting the use of a reserved water right for consumptive use described in this Compact shall be considered a change in use:

a. An action that alters type of use, place of use, point of diversion, place or means of storage, period of use or point of return flow that will:

i. increase the net depletion on a source; or

ii. adversely affect water quality at the point the reserved water right ends; or

iii. result in a change in point of diversion or point of return flow relative to a holder of a water right recognized under state law; or

iv. change the point of diversion from groundwater to surface water, or from surface to groundwater; or

v. in any other manner, adversely affects the reasonable exercise of a water right that is recognized under state law.

b. The exercise of a reserved water right to future consumptive use as authorized by this Compact shall not be considered a change in use.

2. Instream flow: Reserved water rights specified in this Compact for instream flow shall not be subject to change to any other use, provided that:

a. the emergency use of water for fire suppression as provided for in Article III.H. shall not be deemed a change or alteration in use, or violation of a reserved water right for instream flow; and

b. the United States may seek to appropriate water for a consumptive use on a source for which no consumptive use is described in this Compact by seeking a permit under state law for consumptive use, provided that the water right granted shall not be counted against the limits on allocation for state consumptive use water rights imposed by this Compact. The water right so acquired shall be administered in accordance with Article V, section B.

3. Consumptive uses: The United States may take action affecting the use of its consumptive use water rights provided that (1) the action shall be in fulfillment of the purposes of the reservation; (2) the total use shall not exceed the amount described in this Compact; and (3) the action shall not adversely affect a water right that is recognized under state law.

4. Notice of intent to change use: At least 180 days prior to a change in use, the United States agrees to provide notice to the Department.

a. The notice shall contain the facts pertinent to the proposed change including, where applicable:

i. The location of a new point of diversion.
ii. The new source of water.
iii. The new means of diversion.
iv. If a well is involved, the depth and locations of the old and new well.
v. The new use and its impact on actual consumption and water quality.
vi. If the change includes storage, the location, period and capacity of the storage facility.
vii. An estimate of when the change will be effective.
viii. A map showing the existing system and the proposed change.

b. At least 120 days prior to the proposed change, the United States agrees to publish the notice required by Article II, section J.4.a. with a statement that within 60 days following publication or service of notice, relief may be sought in a state or federal court of competent jurisdiction, once in a newspaper of general circulation in the area of the source, and to serve the notice by first-class mail on interested and potentially affected persons as identified by the records of the Department, including:

i. an appropriator of water or applicant for or holder of a permit who, according to the records of the Department, may be affected by the proposed appropriation;
ii. a purchaser under contract for deed that, according to the records of the Department, may be affected by the proposed appropriation;
iii. any public agency that has reserved water in the source recognized under state law; and
iv. a federal agency or Tribe that claims a reserved water right or other water rights in the source.

c. On request by the United States, the Department shall provide the information contained in its records identifying any person potentially affected by the proposed change. The United States agrees to reimburse the Department for the expense of providing this information.

d. In the event that future changes in state law establish a method of notice of a proposed change in use to interested and potentially affected persons other than by first-class mail, the United States may alter the method of notification accordingly.

e. Prior to the actual change, the United States agrees to provide the Department with proof of notice by affidavit.

5. Objection to proposed change: Within 60 days following the notice pursuant to Article II, section J.4.b., the Department or any other person may bring an action against the proposed change in use in a state or federal court of competent jurisdiction, if a property right, water right, or other interest protected under state law would be adversely affected, or if the proposed change is not in compliance with this Compact.

6. Notice of Change:

a. The United States agrees to notify the state and provide a copy of the final order within 60 days of its entry by a state or federal court of competent jurisdiction resolving any objections to the change in use of a federal reserved water right described in this Compact,

b. The United States agrees to provide the state with notice of completion of the change within 60 days after the completion.

7. Reporting by the United States: For any action affecting the use of a consumptive right whether or not such action is deemed a change in use, the United States agrees to provide the following information to the Department:

a. Well log: For a use that includes the drilling of a well or enlargement of an existing wellbore, the United States agrees to provide a well log to the state within 60 days of the completion of the well.

b. Emergency Use: Within 60 days after the commencement of a temporary emergency use for fire suppression described in Section III.H. of this Compact, the United States agrees to notify the state of the use to which the water was put, the dates of use, and the estimated amount of water used.

c. Annual Report: Between April 1 and May 1 of each year, the United States agrees to provide the Department with a report on (1) actions during the preceding year affecting the use of a consumptive use right described in this Compact, regardless of whether the action is deemed a change in use pursuant to Article II, section J.1.; (2) the initiation of new uses that were completed during the preceding year; and (3) any data and documents generated or received by the National Park Service during the preceding year on measurement of instream flow on a Category 3 or 4 stream.

8. Reporting by the State: Between December 1 and December 31 of each year, the Department shall provide the United States with a report of: (1) changes in use during the preceding year, as defined by state law, of water rights upstream of or within the boundaries of reserved land for which a reserved water right is described in this Compact; (2) new permits issued during the preceding year according to the records of the Department; and (3) any data and documents generated by the Department during the preceding year on the measurement of streamflows, diversions and well use on or tributary to Category 3 or 4 streams.

K. Administration of Little Bighorn Instream Flow

This section governs the administration of instream flow rights of the United States on the Little Bighorn River described in Article III. section E.3., in relation to junior water rights initiated after the effective date of this Compact to which the United States has not subordinated and which are not a part of the Crow Tribal Water Rights. Nothing in these provisions, or in this Compact, regarding administration affects or in any way impairs any ability or authority of the Crow Tribe to administer, regulate or manage any water rights within the boundaries of the Crow Indian Reservation.

1. For purposes of administering the instream flow water right of the United States described in Article III. section E.3. the United States shall establish and maintain a discharge gauge at the LBBNM gauge site. The United States shall keep a record of daily flows for the period from March 1 through June 30 of each year in which the United States seeks curtailment of junior water rights.

2. The United States may seek curtailment to enforce its 950 cfs instream flow water right, described in Article III. section E.3.b., at the LBBNM gauge site any time from May 1 through June 30. The decision to seek curtailment shall be initiated by the NPS and at the NPS's discretion.

a. A decision to seek curtailment to enforce the 950 cfs instream flow water right shall be based on a determination that the flow at the LBBNM gauge site plus claimed or permitted appropriations by non-subordinated junior water users equals 950 cfs or more.

b. Once curtailment is sought and confirmed as set forth in Article II. section K.3, it may last for up to 15 consecutive days, or through June 30, whichever occurs first, provided, however, that the 15 days shall be reduced by subtracting the number of days between March 1st and the date of confirmation of curtailment that the flow at the LBBNM gauge site has equalled or exceeded 950 cfs.

c. Any curtailment based upon the 950 cfs water right shall be limited to direct surface diversions from the Little Bighorn River and its tributaries, and wells completed in the Quaternary Alluvium, Quaternary Terrace Deposits, or the Parkman Sandstone, as described in Article II. section B.2.b.v.(3).

3. Notice by NPS that it seeks curtailment to enforce the 950 cfs instream flow water right shall be by either written or verbal notice to the appropriate DNRC office. The NPS shall use its best efforts to maintain contact with the DNRC beginning May 1st of each year to provide advance warning of stream flow conditions.

a. Upon receipt of notice from the NPS that the United States requests curtailment to enforce the 950 cfs instream flow water right, the DNRC shall, within 24 hours, verify actual diversions by non-subordinated junior water users and confirm that the sum of flow at the LBBNM and actual diversions by non-subordinated junior water users equals or exceeds 950 cfs. If the DNRC determines that the actual diversions are insufficient to bring the flow at the LBBNM gauge site to 950 cfs, it shall not proceed with curtailment. If a decision is made not to proceed with curtailment, the DNRC shall notify the NPS the same day. After notification, the

NPS may again seek curtailment beginning the following day if conditions of flow and time of year meet the conditions set forth in Article II. section K.2.

b. If the DNRC proceeds with curtailment to enforce the 950 cfs water right, the DNRC shall, without delay, shut off non-subordinated junior water uses in reverse order of priority to the extent necessary to bring the flow at the LBBNM gauge site to 950 cfs, provided that, DNRC has the discretion to forgo curtailment of a particular water right if it determines that curtailment of that water right to satisfy the 950 cfs instream flow right would be futile.

c. Should flow at the LBBNM gauge site exceed 950 cfs at any time during curtailment, the DNRC may reopen diversions in order of priority until 950 cfs is reached. Should the flow at the LBBNM gauge site drop below 950 cfs at any time during the curtailment, non-subordinated junior water uses shall remain shut off provided that, if the NPS reasonably determines the flow at the LBBNM gauge site is not likely to come back up to 950 cfs during the remainder of the curtailment period, it may consent to end the curtailment.

4. Notice by NPS that it seeks curtailment to enforce the 51 cfs instream flow water right described in Article III. section E.3.a., shall be by either written or verbal notice to the appropriate DNRC office. Upon receipt of notice from the NPS that the United States requests a curtailment to enforce the 51 cfs instream flow water right, the DNRC shall, within 24 hours, verify actual diversions by non-subordinated junior water users. If diversions are being made by non-subordinated junior water users, the DNRC shall, without delay, shut off non-subordinated junior water uses in order of priority to the extent necessary to bring the flow at the LBBNM gauge site to 51 cfs, provided that, DNRC has the discretion to forgo curtailment of a particular water right if it determines that curtailment of that water right to satisfy the 51 cfs instream flow right would be futile.

5. All permits within the Little Bighorn River Basin upstream of the LBBNM gauge site with a priority date after the effective date of this Compact shall be conditioned on the prior right of the NPS for 950 cfs instream flow water right at the LBBNM during May and June, and for the 51 cfs instream flow water right during any portion of the year, and on the authority of DNRC to curtail use to satisfy the instream flow right.

6. All diversions from the Little Bighorn River or its tributaries above LBBNM with a priority date after the effective date of this Compact, shall have the duty to establish and maintain a controllable headgate and an adequate measuring device and shall also be required to maintain a record of daily water diversions, including noting the number of hours for which diversions are made for each day and the flow rate at which water is diverted.

7. DNRC and NPS shall work together to develop a quantitative prediction relationship between the flow at the LBBNM gauge site, diversions by non-subordinated junior water users, and the prediction of curtailment requirements.

8. Either party has the right to petition a court of competent jurisdiction for administration of water rights or for appointment of a water commissioner should cooperative administration not be proceeding as planned or should cooperative administration become burdensome. Any water commissioner shall enforce the curtailment as described in this Compact. Exhaustion of administrative remedies pursuant to this Article is not a prerequisite to any such suit.

ARTICLE III
WATER RIGHT

The parties agree that the following water rights are in settlement of the reserved water rights of the United States for the reservations described. The parties to this agreement recognize that the water rights for these NPS Units [BCNRA and LBBNM] are junior to Crow Tribal Water Rights. All reserved water rights described in this Article are subject to Article V, section A.

A. Big Hole National Battlefield

1. Priority Date

The United States has a priority date of June 29, 1939 for the reserved water rights described in this Compact for BHNB.

2. Consumptive Use

The United States has a reserved water right for current and future consumptive use for the purposes of the BHNB as set forth in Table 1. The period of use shall be from January 1 through

December 31. The source and place of use shall be as set forth more specifically in the Abstract. The place of use or point of diversion of a consumptive use water right at BHNB shall include any non-reserved land within BHNB boundaries as the boundaries exist on the effective date of this Compact.

TABLE 1

Museum		
Maintenance area		
Residences		
Picnic area		
Irrigation		
Total for all use	7.14	50

3. Instream Flow

The North Fork of the Big Hole River is designated a Category 4 stream where it flows over the reserved land of BHNB. The United States has a reserved water right for instream flow on the North Fork of the Big Hole River where it flows over the reserved land of BHNB. The reserved water right for instream flow is quantified and defined as follows:

a. Instream Flow Quantification for November through March: The United States has a reserved water right for instream flow on the North Fork of the Big Hole River at the point the river enters the reserved land of BHNB in the amount of 10 cfs for November through March. The instream flow water right is subordinate to (1) any use recognized under state law with a priority date before January 1, 1993; (2) any use considered non-consumptive as defined by this Compact; and (3) any use of groundwater not included in the calculation of consumptive use pursuant to Article II.

b. Instream Flow Quantification for April through October: The United States has a reserved water right for instream flow on the North Fork of the Big Hole River for April through October in the amount of water left in the river after satisfaction of current and future consumptive uses pursuant to state law in the amounts up to but no greater than provided in Table 2, provided, that the limits of Table 2 notwithstanding, the instream flow water right of the United States is subordinate to (1) any water rights recognized under state law with a priority date before January 1, 1993; (2) any use considered non-consumptive as defined by this Compact; and (3) any use of groundwater not included in the calculation of consumptive use pursuant to Article II.

TABLE 2
State Law Based
Total Current and Future Consumptive Use Rights (cfs)
Tributary to the Reserved Portion of the
North Fork of the Big Hole River

Month	Consumptive Use
April	4.85
May	23.85
June	18.70
July	4.05
Aug.	1.75
Sept.	1.35
Oct.	1.50

4. Nothing in this Compact may affect an existing right to divert water from a point within BHNB and transport it for use off BHNB.

B. Bighorn Canyon National Recreation Area

1. Priority Date: The United States has a priority date of October 15, 1966 for the water rights described in this Compact for Bighorn Canyon National Recreation Area. The United States recognizes that its water rights for the BCNRA are junior in priority to Crow Tribal Water Rights.

2. Consumptive Use: The United States has water rights for current and future consumptive use for the purposes of the Bighorn Canyon National Recreation Area (BCNRA) as set forth in the following Table [3]. The period of use shall be from January 1 through December 31. The source and place of use shall be as set forth more specifically in the Abstract.

TABLE 3
United States National Park Service
Bighorn Canyon National Recreation Area Consumptive Use

Place of Use	Total Volume (ac-ft)	Maximum Flow Rate (gpm)
Fort Smith Visitor center	17.6	110
Ok-A Beh/Marina	6.9	35

Barry's Landing, Trail Creek, Chain Canyon	29.3	180
Bighorn River Ranch	4.7	35
Layout Creek Ranger Station, Sorenson Ranch	140.4	230
Lockhart Ranch	25.6	110
Hillsboro Site	11.0	230
Stock and Wildlife Watering	3.5	
Total Volume of Use:	251.5 acre-feet	

3. Instream Flow

The United States has water rights for instream flow in the streams which flow over the land of Bighorn Canyon National Recreation Area. These water rights for instream flow are quantified and defined as follows:

a. Category 1a:

i. Identification: The following streams are designated as "Category 1a": North Fork Trail Creek, South Fork Trail Creek, and Trail Creek.

ii. Instream Flow: The United States has a water right for instream flow on the Category 1a streams where they enter the BCNRA in the amount of the entire flow of the streams, less (1) any United States' consumptive use rights described in this Compact and any Crow Tribal Water Rights; and (2) all water rights appurtenant to nonfederal land within the boundaries of BCNRA recognized under state law and having a priority date before the effective date of this Compact.

In the event that all non-federal land on a Category 1a stream is acquired by the United States for the purpose of addition to BCNRA, the stream may be reclassified as a Category 1 stream at the request of the United States.

b. Category 3:

i. Identification: The following streams are designated as "Category 3": Dry Head Creek, Deadman Creek, Davis Creek (aka Medicine Creek), and Layout Creek.

ii. The United States has a water right for instream flow on Category 3 streams in the amount of the entire flow of the streams, less any United States' consumptive use rights described in this Compact, and any Crow Tribal Water Rights, provided that, the instream flow right is subordinate to (1) the sum of all water rights recognized under state law with a priority date before the effective date of this Compact, plus any future consumptive use rights calculated according to Article II of this Compact until the limit on future consumptive use set forth in the Table [4] below is reached; (2) any use considered non-consumptive as defined by this Compact; (3) any use for instream stockwatering or for stockwater or domestic uses by wells or developed springs with an appropriation of 35 gpm or less that does not exceed 10 afy; and (4) any use of groundwater not included in the calculation of consumptive use according to Article II of this Compact.

TABLE 4
State Law Based
Total Future Consumptive Use Rights (cfs)
Tributary to the Reserved Portion of Category 3 Streams

Dry Head	Deadman	Davis	Layout
2.23*	1.59**	0.50	0.11

* Or the amount of net depletions reasonably necessary to irrigate 20 acres, whichever is largest.

** Or the amount of net depletions reasonably necessary to irrigate 35 acres, whichever is largest.

c. Category 4:

i. Identification: The following streams are designated as "Category 4": Pete's Canyon Creek, the tributary of Deadman Creek that issues from Annerer Spring and flows across BCNRA land in the N1/2NW1/4 Sec. 8, T8S, R29E, M.P.M.

(1) The United States has a water right for instream flow on Pete's Canyon Creek in the amount of one-half (1/2) of the naturally occurring flow that originates from Pete's Spring.

(2) The United States has a water right for the tributary of Deadman Creek, in the amount of one (1) gallon per minute.

4. Springs

The United States has a water right for instream flows for the following springs identified by location, in the amount of the entire flow of the springs, less any consumptive use rights of the United States described by this Compact.

Sorenson Spring	Sec. 09, T9S, R28E
Lockhart #1 Spring	Sec. 13, T8S, R28E
Lockhart #2 Spring	Sec. 13, T8S, R28E
Hillsboro Spring	Sec. 36, T8S, R28E

This list of springs may be modified based on field verification of any spring located entirely within the boundaries of the BCNRA that is not the source of a water right recognized under state law. Springs that occur on Crow Reservation lands are excluded from any water rights for springs.

C. Glacier National Park

1. Priority Date

The United States has a priority date of May 11, 1910 for reserved water rights described in this Compact for GNP. The United States recognizes that this date is junior to the priority dates for reserved water rights of the Confederated Salish and Kootenai Tribes of the Flathead Indian Reservation, and the Blackfeet Tribe of the Blackfeet Indian Reservation.

2. Consumptive Use

The United States has a reserved water right for current and future consumptive use for the purposes of GNP as set forth in Table 5. The period of use shall be from January 1 through December 31. The source and place of use shall be as set forth more specifically in the Abstract. The place of use or point of diversion of a consumptive use water right at GNP shall include any non-reserved land within GNP boundaries as the boundaries exist on the effective date of this Compact.

3. Instream Flow Right

a. Category 1:

i. Identification:

The following streams are designated as "Category 1:"

Sage, Spruce, Kishenehn, Starvation, Kintla, Red Medicine Bow, Agassiz, Ford, Parke, Long Bow, Akokala, Numa, Pocket, Jefferson, Bowman, Rainbow, Cummings, Logging, Anaconda, McGee, Camas, Fern, Fish, Howe, Longfellow, Trapper, Continental, Flattop, Kipp, Cattle Queen, Ahern, Mineral, Alder, Haystack, Logan, Hidden, Avalanche, Snyder, Sprague, Walton, Lincoln, Thompson, Pacific, Stimson, Nyack, Peril, Pinchot, Elk, Coal, Muir, Park, Debris, Ole, Shields, Autumn, Upper Bear, Boundary, Olson, South Fork Valentine, Valentine, Kootenai, Pass, Camp, Cleveland, Street, Whitecrow, Redgap, Lee, Otatso, Kennedy, Windy, Appekunny, Ptarmigan, Iceberg, Wilbur, Cataract, Allen, Swiftcurrent, Boulder, Two Dog, Rose, Baring, Siyeh, Reynolds, Virginia, Medicine Owl, Hudson Bay, Red Eagle, Atlantic, North Fork Cut Bank, Lake, Dry Fork, Aster, Paradise, Appistoki, Two Medicine, Fortymile, Fortyone Mile, Midvale, Railroad, Coonsa, Long Knife, Jackson, Grinnell, Kaina, Lunch, Pyramid, Thunderbird and Upper Summit Creeks and Waterton, St. Mary, North Fork Belly, Mokowanis and Belly Rivers.

ii. Instream Flow

The United States has a reserved water right for instream flow on the Category 1 streams in the amount of the entire flow of the streams, less any United States' consumptive use rights described in this Compact. This reserved water right ends at the point the stream exits the reserved land of GNP. The relationship between this water right and a water right to water stored within GNP held by the United States shall be governed by the rule of priority.

b. Category 1a Streams

i. Identification:

The following streams are designated as "Category 1a:"

Apgar, Canyon, Dutch, Harrison, McDonald, and Quartz Creeks.

ii. Instream Flow:

(a) The United States has a reserved water right for instream flow on the Category 1a streams in the amount of the entire flow of the streams, less (1) any United States' consumptive use rights described in this Compact; and (2) all water rights appurtenant to non-federal land within the boundaries of GNP recognized under state law with a priority date before January 1, 1993. This reserved water right ends at the most downstream point that the stream exits the reserved land of GNP.

(b) In the event all non-federal land on a Category 1a stream is acquired by the United States for the purpose of addition to GNP, the stream may be reclassified as a Category 1 stream at the request of the United States.

c. Category 4 Streams

i. Identification:

The following streams are designated as Category 4: the North Fork of the Flathead River, the Middle Fork of the Flathead River, Divide, Jule, Rubideau and Wild Creeks.

ii. Instream Flow for the North and Middle Forks of the Flathead River:

The United States has a reserved water right for instream flow on the North and Middle Forks of the Flathead River in the amount of the entire flow of the rivers, less any United States' consumptive use rights described in this Compact provided that, the instream flow water right is subordinate to 1) all water rights recognized under state law with a priority date before January 1, 1993, 2) future consumptive use rights calculated according to Article II up to the limits set forth in Table 6; (3) any use considered non-consumptive as defined by this Compact; and (4) any use of groundwater not included in the calculation of consumptive use according to Article II. This reserved water right ends at the most downstream point that the River forms the boundary of the reserved land of GNP.

TABLE 6
State Law Based
Future Consumptive Use Rights (cfs)
Tributary to the Reserved Portion of the Flathead River

Month	North Fork Flathead River	Middle Fork Flathead River
Jan.	7.5	7.1
Feb.	7.2	6.9
Mar.	8.9	8.1
April	#	#
May	#	#
June	#	#
July	40.5	#
Aug.	16.2	13.7
Sept.	11.8	9.7
Oct.	11.8	10.6
Nov.	12.0	11.6
Dec.	9.0	9.2

The amount of water available for future consumptive use in these months shall be an amount equivalent to the flow rate for all consumptive uses recognized under state law on December 31, 1992. The amount shall be adjusted to reflect the flow rates in a decree issued by a state or federal court of competent jurisdiction after December 31, 1992. At such time as final decrees are entered in these basins, the Department shall tabulate these rights, insert the

appropriate amounts into Table 6, and submit the revised Table to the United States and the state for inclusion in this Compact. Revision of Table 6 to reflect this agreement shall not be deemed a modification of this Compact.

iii. Instream Flow for Divide, Jule, Rubideau and Wild Creeks

The United States has a reserved water right for instream flow on Divide, Jule, Rubideau, and Wild Creeks in the amount of the entire flow of the stream, less any United States' consumptive use rights described in this Compact. This water right ends at the most downstream point that the stream exits or no longer forms the boundary to the reserved land of GNP. This right is subject to the provisions of Article V, section A., and (1) on Divide Creek, is subordinate to any water rights recognized under state law with a priority date before January 1, 1993; and (2) on Rubideau Creek, is subordinate to any water rights recognized under state law with a priority date before January 1, 1993, provided that the use of such right is consistent with federal law.

4. Lakes

The United States has a reserved water right for the maintenance of natural water levels in all naturally occurring lakes within the boundaries of GNP for the purpose of preserving unimpaired these Park resources. The water right for the maintenance of lake levels is subordinate to (1) any United States' consumptive use rights described in this Compact; and (2) any water right recognized under state law with a priority date before January 1, 1993. The named and unnamed lakes in which the United States has a reserved water right are those set forth specifically in the Abstract.

D. Grant Kohrs Ranch National Historic Site

The Grant Kohrs Ranch National Historic Site in Montana does not include reserved land. The United States may apply for a permit to appropriate water or seek recognition of any existing water rights in accordance with state law.

E. Little Bighorn Battlefield National Monument

1. Priority Date

a. The United States has a priority date of December 7, 1886 for current and future consumptive uses under the water rights reserved for the irrigation, maintenance and administration of the Little Bighorn Battlefield National Monument. The United States recognizes that its water rights for the BCNRA are junior in priority to Crow Tribal Water Rights.

b. The United States has a priority date of March 22, 1946 for the instream flow water rights reserved for use as part of the Little Bighorn Battlefield National Monument, and necessary for historical interpretation of the battle. The United States recognizes that its water rights for the LBBNM are junior in priority to Crow Tribal Water Rights.

2. Consumptive Use

a. The United States has a reserved water right for current and future consumptive uses for the purposes of LBBNM as set forth in Table 7. The period of use shall be from January 1 through December 31. The place of use or point of diversion of a consumptive use water right at LBBNM shall include any non-reserved land within LBBNM boundaries as the boundaries exist on the effective date of this Compact.

TABLE 7
United States National Park Service
Little Bighorn National Battlefield Consumptive Use

Place of Use	Total Volume (ac-ft)	Maximum Flow Rate (gpm)	Source
Cemetery, Visitors Center, Administrative Offices, Residences, Historic Buildings Maintenance Area, and Firehouse Facilities.	84.9	450	groundwater well

3. Instream Flow

The United States has a reserved water right for instream flow on the Little Bighorn River where it forms the boundary of the Little Bighorn Battlefield National Monument as follows:

a. The United States has a reserved water right for minimum instream flow in the amount of 51.0 cfs with a priority of March 22, 1946, for the period January 1 through December 31, provided that, the instream flow water right is subordinate to:

(1) any water rights recognized under the state law with a priority date before the effective date of this Compact;

(2) any instream stockwater use;

(3) any use of groundwater through wells or developed springs with an appropriation of 35 gpm or less that does not exceed 10 afy;

(4) any use considered non-consumptive as defined by this Compact;

(5) any use of groundwater not included in the calculation of consumptive use according to Article II of this Compact.

b. The United States has a reserved water right for instream flow in the amount of 950 cfs, with a priority date of March 22, 1946, for 15 days during the period of May 1st through June 30th, subject to the terms and conditions regarding implementation as set forth in Article II, section K, provided that, the instream flow water right is subordinate to:

(1) any water rights recognized under the state law with a priority date before the effective date of this Compact;

(2) any instream stockwater use;

(3) any use of groundwater from wells completed outside of the Quaternary Alluvium or Quaternary Terrace Deposits of the Little Bighorn River and its tributaries or the Parkman Sandstone;

(4) any use of groundwater from wells or developed springs completed in the Quaternary Alluvium, Quaternary Terrace Deposits, or the Parkman Sandstone with an appropriation of 35 gpm or less that does not exceed 10 afy;

(5) any use of groundwater from wells completed in the Quaternary Alluvium, Quaternary Terrace Deposits, or the Parkman Sandstone with a permit amount in excess of 35 gpm or 10 afy that is not determined to be hydrologically connected to the Little Bighorn River or its tributaries pursuant to Article II. section B.2.b.v. of this Compact;

(6) any use considered non-consumptive as defined by this Compact.

c. Instream Flow Rights Not Cumulative: The 950 cfs instream flow, when it occurs, is not additive to the 51.0 cfs year-round minimum flow.

F. Nez Perce National Historical Park

The Nez Perce National Historical Park in Montana does not include reserved land. The United States may apply for a permit to appropriate water or seek recognition of any existing water rights in accordance with state law.

G. Yellowstone National Park

1. Priority Date

The United States has a priority date of March 1, 1872 for the reserved water rights described in this Compact for YNP.

2. Consumptive Use

The United States has a reserved water right for current and future consumptive use for the purposes of YNP as set forth in Table 8. The period of use shall be from January 1 through December 31. The source and place of use shall be as set forth more specifically in the Abstract. The place of use or point of diversion of a consumptive use water right at YNP shall include any non-reserved land within YNP as the boundaries exist on the effective date of this Compact.

3. Instream Flow Right

a. Category 1:

i. Identification:

The following streams are designated as "Category 1:"

Black Bear Canyon, Black Butte, Blacktail Deer, Cougar, Daly, Duck, Fan, Grayling, Landslide, Mol Heron, Pebble, Specimen, Stephens, Upper Reese, and Wickiup Creeks, and the Gardner River.

ii. Instream Flow:

The United States has a reserved water right for instream flow on the Category 1 streams in the amount of the entire flow of the streams, less any United States' consumptive use rights described in this Compact. This reserved water right ends at the most downstream point that the stream exits the reserved land of YNP.

b. Category 2:

i. Identification:

The following streams are designated as "Category 2:"

Bacon Rind, Buffalo, Cottonwood, Coyote, Hellroaring, Little Cottonwood, and Snowslide Creeks.

ii. Instream Flow

The United States has a reserved water right for instream flow on the Category 2 streams in the amount of the entire flow of the streams, less any consumptive use rights of an agency of the United States recognized under federal or state law. This reserved water right ends at the most downstream point that the stream exits the reserved land of YNP.

iii. Change in Wilderness Designation

In the event that the Congress of the United States repeals the Wilderness designation assigned to the headwaters of an above named Category 2 stream, then, to the extent consistent with the law repealing the Wilderness designation as it pertains to water use, the stream headwatered in the former Wilderness may be reclassified in the appropriate category on request by the state.

c. Category 3:

i. Identification:

The following streams are designated as "Category 3:"

Crevice, Dry Canyon, Slough, and Tepee Creeks.

ii. The United States has a reserved water right for instream flow on Category 3 streams in the amount of the entire flow of the streams, less any United States' consumptive use rights described in this Compact, provided that, the instream flow right is subordinate to (1) the sum of all water rights recognized under state law with a priority date before January 1, 1993, plus any future consumptive use rights calculated according to Article II, until the limit on total current and future consumptive use set forth in Table 9 is reached; (2) any use considered non-consumptive as defined by this Compact; and (3) any use of groundwater not included in the calculation of consumptive use according to Article II.

TABLE 9

Dec.	0.2	0.1	1.8	0.4

iii. The provisions of Article III, section G.3.c.ii notwithstanding, in the event of a period of low flow such that Crevice, Dry Canyon, Slough, or Tepee Creeks fall below the critical levels of instream flow shown in Table 10 at the point the stream enters the reserved land of YNP, the United States' water right for instream flow is not subordinate to consumptive use water rights recognized under state law with a priority date on or after January 1, 1993.

d. Category 4:

The following streams are designated as Category 4: Soda Butte Creek within the state, and the Gallatin, Madison and Yellowstone Rivers where they flow within or form the boundary to reserved land of YNP within the state.

i. Soda Butte Creek

(1) The United States has a reserved water right for instream flow on Soda Butte Creek in the amount of the entire flow of the stream, less any United States' consumptive use rights described in this Compact, provided that, the instream flow right is subordinate to: (a) any water rights recognized under state law with a priority date before January 1, 1993; (b) any future consumptive use rights calculated according to Article II, as long as the limit on total current and future consumptive use set forth in Table 11 has not already been reached or exceeded by the rights protected under subsection (1)(a); (c) any use considered non-consumptive as defined by this Compact; and (d) any use of groundwater not included in the calculation of consumptive use according to Article II.

(2) The provisions of Article III, section G.3.d.i.(1) notwithstanding, in the event of a period of low flow such that Soda Butte Creek falls below the critical levels of instream flow shown in Table 12 at the point the stream enters the reserved land of YNP, the United States' water right for instream flow shall be subordinate only to: (a) any water right for domestic use of 35 gpm or less and to any water right held by an incorporated or unincorporated municipality, recognized under state law with a priority date before January 1, 1993; (b) any use considered non-consumptive as defined by this Compact; and (c) any use of groundwater not included in the calculation of consumptive use according to Article II.

(3) In the event that the Congress of the United States repeals the Wilderness designation assigned to the land over which Republic and Hayden Creeks and two unnamed tributaries to Soda Butte Creek flow in Wyoming, or otherwise makes water from such tributaries available for appropriation in Wyoming, the state may seek modification of Article III, section G.3.d.i.(2). of this Compact as provided in Article VI, section A.2.

ii. The Gallatin, Madison and Yellowstone Rivers

The United States has a water right for instream flow on the Gallatin, Madison and Yellowstone Rivers in the amount of the entire flow of the streams, less any United States' consumptive use rights described in this Compact, provided that, the right is subordinate to: (1) the sum of all water rights recognized under state law with a priority date before January 1, 1993, plus any future consumptive use rights calculated according to Article II, until the limit on total current and future consumptive use rights set forth in Table 13 is reached; (2) any use considered non-consumptive as defined by this Compact; and (3) any use of groundwater not included in the calculation of consumptive use according to Article II.

4. Hot Springs tributary to Bear Creek and the Yellowstone River

The hot springs that contribute to Bear Creek outside the boundaries of YNP are important to maintenance of biologic values of reserved water in the Yellowstone River downstream from the confluence with Bear Creek. As part of the settlement of the reserved water right for YNP, the state agrees to grant the United States a water right under state law to all of the natural flow of the Bear Creek hot springs located at the mouth of Bear Creek in S1/2 S1/2, sec. 19, T9S, R9E, Montana Principle Meridian. The priority date is the effective date of this Compact.

5. Lakes

The United States has a reserved water right for the maintenance of natural water levels in all naturally occurring lakes within the boundaries of YNP for the purpose of preserving unimpaired these Park resources. The water right for the maintenance of lake levels is subordinate to (1) any United States' consumptive use rights described in this Compact; and (2) any water right recognized under state law with a priority date before January 1, 1993. The named and unnamed lakes in which the United States has a reserved water right are those set forth more specifically in the Abstract.

H. Emergency Fire Suppression

The use of water for emergency fire suppression benefits the public, and is necessary for the purposes of the various Park reservations. The United States, may as part of its reserved water right, divert water for fire suppression at all of the National Park Service Units as needed, and without a definition of the specific elements of a recordable water right. Use of water for fire suppression shall not be deemed an exercise of the United States' reserved water rights for consumptive use or a violation of its reserved water rights for instream flow.

ARTICLE IV
YELLOWSTONE CONTROLLED GROUNDWATER AREA

A. Statement of Intent

Yellowstone National Park was reserved for the express purpose of "preservation, from injury or spoliation, of all timber, mineral deposits, natural curiosities, or wonders within said park, and their retention in their natural condition." 17 Stat. 32. The parties agree that Congress reserved water necessary to preserve the hydrothermal features within the reserved land of YNP. These reserved water rights have priorities as of the date on which the land was reserved.

The parties understand that knowledge of the interrelationship of hydrothermal features within YNP, the hydrothermal system that supports those features, and groundwater in surrounding areas of Montana will benefit from increased study. The parties agree that the hydrothermal features of YNP are a unique and irreplaceable resource and represent one of the few undisturbed hydrothermal systems in the United States.

This Compact does not recognize a reserved water right to groundwater outside the boundaries of the reserved land of YNP. However, the parties agree that restrictions shall be placed on the development of groundwater adjacent to YNP to the extent necessary to prevent adverse effect on the reserved water right to groundwater within YNP. The parties agree that the goal of establishment and administration of the Yellowstone Controlled Groundwater Area shall be to allow no impact to the hydrothermal system within the reserved land of YNP.

B. Findings

Ratification of this Compact by the Montana legislature constitutes a finding that:

1. unrestricted use of groundwater adjacent to Yellowstone National Park is likely to interfere with the water rights reserved by the United States in 1872, 1929, 1930, and 1932, for the preservation of hydrothermal features within YNP;

2. prevention of adverse effect on the United States' reserved water right to groundwater within the reserved land of YNP is a benefit to the state and to the United States;

3. the public interest and welfare requires that a corrective control be adopted to regulate groundwater development adjacent to YNP; and

4. the cooperative state-federal management and oversight established by this Article is an effective means to achieve protection of the reserved water right to groundwater necessary to preserve the hydrothermal system within the reserved land of YNP.

C. General Provisions

1. Establishment: The Yellowstone Controlled Groundwater Area or "Area" is hereby established and shall be defined and administered according to this Compact.

2. Funding: The United States agrees that it receives substantial benefit from the establishment and administration of the Yellowstone Controlled Groundwater Area, and that the national and international public benefit extends far beyond the boundaries of the state. Thus, the United States agrees that the relatively small population of the state should not bear the entire cost of protection of the United States' reserved water right. To this end, the Department of the Interior agrees, subject to appropriations by Congress, to reimburse the state for the expense of establishment, administration and enforcement of the Yellowstone Controlled Groundwater Area by the Department; to fund the inventory, sampling, reporting and database management by the Bureau; and, except as provided in Article IV, section J.1.c., to fund the administrative costs and the cost of any study or any other necessary activity pursuant to this Article by the Technical Oversight Committee.

3. Implementation Contingent on Funds: Such funding shall be accomplished pursuant to the terms and conditions of a separate agreement which shall incorporate terms and conditions necessary to specify the activities to be funded and appropriate cost and accounting principles consistent with generally applicable guidelines for federal funding in similar circumstances, and consistent with the terms of this Compact, including, but not limited to, the enumeration of state expenses to be reimbursed in Article IV, section C.2. The state is relieved of its obligation to establish, administer, inventory, sample and maintain a database on the Controlled Groundwater Area in the absence of a funding agreement and the provision of the

funds specified therein. If the state is relieved of its obligation to implement all or a portion of this Article, all other terms of this Compact shall remain in effect, including all reserved water rights established herein. Such agreement may be amended, extended, renewed or terminated pursuant to its terms.

4. Interim Measures:

The state agrees that the following interim measures shall apply from the effective date of this Compact until the receipt of funds from the United States or December 31, 1995, whichever occurs first. The United States agrees to reimburse the state for the cost of the interim measures, subject to the appropriation of funds by Congress. The parties agree that, even if funding is not received by December 31, 1995 and interim measures are suspended, the state and the Department of the Interior will continue to recommend federal funding.

a. The Department shall issue the notice required by Article IV, section F.

b. All permits issued within this time period within the Area shall be conditioned on appropriation of water of less than 60°F., measured at the wellhead.

c. The Department shall require that each applicant for a permit or person filing a notice of completion for issuance of a certificate of water right to appropriate groundwater within the Area report the following information on filing of a well log: (1) well location to the quarter-quarter-quarter-quarter section; (2) ground elevation at the wellhead; (3) well depth; (4) water level; (5) flow rate or maximum pump capacity; and (6) water temperature measured at the wellhead.

d. The Department shall not issue a certificate of water right for the appropriation of groundwater with a temperature of 60°F. or more within the Area during this time period. The Department shall order temporary abandonment of any well in the Area for which a conditional permit was issued or notice of completion for issuance of a certificate of water right was filed within this time period that produces groundwater with a temperature of 60°F. or more, measured at the wellhead. Temporary abandonment shall be according to the rules of the Montana Board of Water Well Contractors.

e. Following receipt of funds from the United States, the Department shall notify the applicant that the appropriation is subject to the terms of this Compact and shall proceed according to the procedures set forth in this Article. If funds are not received by December 31, 1995, the Department may remove the order of temporary abandonment and remove the condition on the permit or issue the certificate of water right pursuant to state law. The Department shall continue to require that each applicant for a permit or certificate of water right to appropriate groundwater within the Area report the following information on filing of a well log: (1) well location to the quarter-quarter-quarter-quarter section; (2) ground elevation at the wellhead; (3) well depth; (4) water level; (5) flow rate or maximum pump capacity; and (6) water temperature measured at the wellhead.

5. Additional Studies: In addition to appropriations necessary to implement this Article, the state and the National Park Service agree to recommend federal funding for a baseline study of hydrothermal features in YNP and within the Controlled Groundwater Area, for continued monitoring of these features, and for geologic and geophysical studies including, but not limited to, geologic mapping, and monitoring of microearthquakes and subsidence in and adjacent to YNP. Implementation of this Article is not contingent on such appropriation.

6. Access for Studies: Consistent with the purposes of YNP, the United States agrees to allow reasonable access to and across YNP to the extent necessary to accomplish the data collection authorized by this Article or additional studies recommended pursuant to Article IV, section C.5. In seeking access, the Department or Bureau shall comply with the provisions of Article II, section I.3.

7. Effect of Modification of Area: It is the intent of the parties that the initial boundaries of the Area set forth in Article IV, section D. and Appendix 3, and initial restrictions set forth in Article IV, section E. may be modified pursuant to Article IV, section J., or with respect to a single appropriation pursuant to Article IV, section G.2.c. and shall not be deemed to be a modification of this Compact. Any other modification of this Article shall be considered a modification of this Compact and is subject to the terms of Article VI, section A.2.

8. It is the intention of the Department of the Interior to protect the hydrothermal resources of Yellowstone National Park through the system established by Article IV.

a. The National Park Service agrees, consistent with 43 U.S.C. § 666, that enforcement will not be sought against the holder of a water right recognized under state law with a priority date on or after January 1, 1993, unless the NPS has, in the first instance, sought enforcement through the state under the terms of this Compact.

b. Notwithstanding the preceding subparagraph, if the National Park Service, in its judgment, determines that circumstances warrant, nothing in this Compact prohibits the United States from petitioning a state or federal court of competent jurisdiction for injunctive or declarative relief. Nothing in this Compact shall alter the courts' application of the test for injunctive relief; neither shall the administrative determination by the National Park Service to seek relief in said court be deemed to establish or preclude any determination in such judicial proceedings. Prior to such an administrative determination, the National Park Service agrees that it will provide the State written notice and will identify a time frame during which it will await the State's efforts to address the concern.

c. As to an action against the holder of a right to withdraw groundwater recognized under state law with a priority date before January 1, 1993, the United States agrees that this Compact shall not be used or relied upon as evidence to show that: (1) a reserved water right of the United States exists appurtenant to any land other than the reserved land of YNP; or (2) the priority date associated with any portion of reserved land of YNP is other than the date on which that portion of land was actually reserved.

D. Initial Boundaries of the Yellowstone Controlled Groundwater Area

The initial boundaries of the Yellowstone Controlled Groundwater Area and Subareas are defined to include the area in the State of Montana located within the geographic boundaries shown on Appendix 3. Appendix 3 is hereby incorporated in this Compact by this reference as though set forth here in full.

1. Subarea I:

The initial geographic boundaries of the subarea referred to as Yellowstone Controlled Groundwater Subarea I shall include all of the area in Montana North and West of YNP within the boundary delineated as subarea I on Appendix 3.

2. Subarea II:

The initial geographic boundaries of the subarea referred to as Yellowstone Controlled Groundwater Subarea II shall include all the area in Montana North and West of YNP within the boundary delineated as subarea II on Appendix 3.

E. Initial Restrictions on Groundwater Development within the Yellowstone Controlled Groundwater Area

Until the initial boundaries or restrictions set forth in this Article are modified pursuant to Article IV, section J., the restrictions set forth in this section shall apply to groundwater appropriations within the Area with a priority date on or after January 1, 1993. Such appropriations shall follow the procedural requirements of Article IV, section G.

1. The parties agree that the initial restrictions on development of groundwater and any modification thereof, shall not apply to appropriations with a priority date before January 1, 1993. The sole provisions of this Article applicable to such appropriations shall be those providing for inventory and sampling of current use set forth in Article IV, section H. Groundwater appropriations with a priority date before January 1, 1993 are subject to applicable state law including, but not limited to, issuance of a certificate of water right following final adjudication of existing water rights. Nothing herein waives the right of the United States to seek protection of its reserved water right for protection of the hydrothermal features within the reserved land of YNP from groundwater appropriations with a priority date before January 1, 1993 in a state or federal court of competent jurisdiction, provided that the limitation on use of this Compact in an action by the United States against any such appropriator set forth in Article IV, section C.8.c. shall apply.

2. The Department shall not issue a permit to appropriate groundwater that is hydrothermal discharge water as defined by this Compact unless either: (1) modification occurs pursuant to Article IV, section J. altering pertinent boundaries or restrictions; or (2) an application is approved pursuant to Article IV, section G.2.c. Unless modification occurs pursuant to Article IV, section J., the Department shall not limit an appropriation of groundwater that is not

hydrothermal discharge water unless required to do so by Article II and III of this Compact or any other provision of state law.

F. General Notice of Establishment of the Yellowstone Controlled Groundwater Area

1. Notice: Within 120 days after the effective date of this Compact and within 60 days of any decision by the Department to modify the Area as set forth in Article IV, section J., the Department shall publish a notice of establishment or modification of the Area setting forth:

a. the description by legal subdivisions of all lands included in the controlled groundwater area;

b. the purpose of the controlled groundwater area or modification; and

c. the permit requirements, restrictions, inventory, sampling and monitoring applicable within each subarea.

2. Publication and Service: Such notice shall be published in a newspaper of general circulation in the county or counties in which the Area is located. The Department shall also serve a copy of the notice by mail on each well driller licensed in Montana whose address is within any county in which any part of the Area is located; on each well driller known by the Department to operate in the Area; on the Montana State Bureau of Mines and Geology; on the mayor or chair of the governing body of each county or incorporated municipality located in whole or in part within the Area; and on the United States. The Department may also serve notice on any other person or state or federal agency that the Department believes may be interested in or affected by the proposed designation or modification of the Area. A copy of the notice shall be mailed to each person's last known address according to the records of the Department.

G. Appropriations of Groundwater within the Yellowstone Controlled Groundwater Area With a Priority Date on or After January 1, 1993

1. Appropriation of Groundwater within the Area with a Priority Date on or after January 1, 1993 and before the Effective Date of this Compact:

The initial restrictions on groundwater development set forth in Article IV, section E. apply to appropriations of groundwater with a priority date on or after January 1, 1993 and before the effective date of this Compact provided that the following procedural requirements are met:

a. Within 120 days after the effective date of this Compact or the receipt of adequate funds from Congress, whichever occurs later, the Department shall provide the United States with notice of all groundwater appropriations within the Area that, according to the records of the Department, have a priority date on or after January 1, 1993 and before the effective date of this Compact.

b. Subsequent to the notice provided for in Article IV, section G.1.a. and up to 120 days following mailing of the report on inventory provided in Article IV, section H.1.b.iii., the United States may provide the Department with credible information on any groundwater appropriation within the Area with a priority date on or after January 1, 1993 and before the effective date of this Compact, showing that the appropriation is of water with a temperature of 60°F. or more.

c. If the United States provides the information set forth in Article IV, section G.1.b., the Department shall, within 60 days of receipt of the information, issue an order requiring that the appropriator comply with the applicable restrictions. The order is effective within 60 days of issuance unless the appropriator enters an appearance to contest the order.

d. If the appropriator enters an appearance to contest the order, the Department shall: (1) issue an order staying use of the appropriation pending final decision on the matter by the Department; (2) set a date for a hearing; and (3) proceed pursuant to the provisions for a contested case under the Montana Administrative Procedures Act, Title 2, Chapter 4 of the Montana Code Annotated, provided that in such a proceeding the United States has the burden of proving by a preponderance of the evidence that the appropriation is of groundwater of 60°F or more. If the United States meets this burden, the appropriator shall comply with procedures and restrictions set forth in Article IV, section G.2.

2. Appropriations of Groundwater with a Priority Date after the Effective Date of this Compact

a. General Provisions

i. All groundwater appropriations within the Area after the effective date of this Compact are subject to this Article. Applications and registration for a permit for the appropriation of groundwater within the Area after the effective date of this Compact shall include a statement of whether the proposed use requires water with temperature of 60°F. or more. In addition, the Department shall not issue a permit for appropriation of groundwater unless the requirements of Articles II and III are met, if applicable.

ii. A permit issued pursuant to this Article shall provide that:

(1) The permittee shall install a device to meter total volume of water use in compliance with rules promulgated by the Department pursuant to Article IV, section I.5. The Department shall specify the metering method and location of installation. On or before January 15 of each year, the permittee shall report annual use to the Bureau at: Montana Bureau of Mines and Geology, Main Hall, Montana Tech, Butte MT, 59701. Meters shall be made available to the permittee at the Department of Natural Resources and Conservation Regional Water Rights Office at: 111 North Tracy, Bozeman, Montana, 59715. Meters shall be acquired for distribution by the Department of Natural Resources and Conservation Regional Water Rights Office as part of the inventory and sampling program authorized by Article IV, section I.

(2) The Department has the authority to modify or revoke a permit if the provisions listed below are applicable, and all other administrative or judicial enforcement authority provided under Title 85, part 2, of the Montana Code Annotated applies to this part. The Department may exercise its enforcement authority if (1) the appropriator fails to allow access for sampling provided for in Article IV, section H.; (2) the character of the groundwater produced changes such that a restriction applies pursuant to this Article; (3) new restrictions imposed pursuant to Article IV, section J. are applicable; or (4) the appropriator violates any other provision of this part.

(3) A permit to appropriate hydrothermal discharge water may include limits and conditions on appropriation including but not limited to (a) limits on total withdrawal by day, month or year; (b) a requirement to adhere to a system of rotation of use within the Area; and (c) a provision adjusting the total withdrawal from two or more wells in the area used by the same appropriator.

(4) A permit to appropriate hydrothermal discharge water shall include any applicable monitoring requirement recommended by the Working Group Report or recommendations by the TOC superseding that report unless the applicant shows by clear and convincing evidence that such monitoring is inappropriate.

iii. If, subsequent to the effective date of this Compact, modification pursuant to Article IV, section J. removes the restrictions set forth in Article IV, section E., the monitoring recommended by the Working Group Report or as superseded by the TOC shall continue to apply unless the applicant shows by clear and convincing evidence that such monitoring is inappropriate, according to the criteria in the Working Group Report or as superseded by the TOC.

b. Appropriations of Groundwater with a Temperature of less than 60°F

i. Registration and Application

(1) An applicant for an appropriation of groundwater of 35 gpm or less, not to exceed 10 acre-feet per year shall register for a permit by filing a form prescribed by the Department that shall include, but not be limited to, a statement of whether the proposed use requires water with temperature of 60°F. or more, the well location, and intended use and shall comply with the provisions of Article II and III, if applicable. The Department shall provide notice of the registration for a permit to the United States within 30 days of the filing.

(2) An applicant for a permit to appropriate groundwater of greater than 35 gpm or 10 acre-feet per year after the effective date of this Compact, shall comply with existing state law for permits to appropriate water and the limits on groundwater appropriations set forth in Articles II and III, if applicable. The Department may issue an interim permit for the proposed appropriation to an applicant seeking an appropriation for a use that does not require water with a temperature of 60°F. or more if the requirements of this section are met.

ii. Drilling

(1) On filing a proper registration form, an applicant for an appropriation of 35 gpm or less, not to exceed 10 acre-feet per year, with a proposed use that does not require water with a temperature of 60°F. or more may complete the proposed well subject to state law and the terms of this Compact, but shall not put the water to beneficial use until issuance of a permit.

(2) Upon issuance of an interim permit, an applicant for an appropriation of greater than 35 gpm or 10 acre-feet per year may drill the well subject to state law and the terms of this Compact, but shall not put the water to beneficial use until issuance of a permit.

iii. Within 60 days of drilling of the well, the applicant or registrant shall provide the Department with a well log on a form provided by the Department. The well log shall include well location to the quarter-quarter-quarter-quarter section; ground elevation at the wellhead; well depth; water level; flow rate or maximum pump rate; water temperature measured at the wellhead; and specific conductance of the water produced using a device provided by the Water Resources Regional Office.

iv. The Department shall forward a copy of the well log to the United States and to the Bureau on receipt.

v. Following receipt of the well log, the Department may inspect the well at a reasonable hour of the day to verify the information on the well log report. The United States may request to accompany the inspector as set forth in Article II, section I.4.

vi. The United States has 60 days from the mailing of the report to file an objection setting forth credible information that the appropriation is of groundwater with characteristics to which restrictions established pursuant to this Article apply.

vii. The Department may issue a permit to appropriate if: (1) the well log and any verification confirm that the appropriation is of water to which no restrictions pursuant to this Article apply; and (2) all other requirements of state law and this Compact have been met, unless the United States files an objection pursuant to Article IV, section G.2.b.vi. If the well log or verification indicate appropriation of water to which restrictions pursuant to this Article apply or if the United States files a proper objection, the applicant shall be subject to the provisions of Article IV, section G.2.c.

viii. If a permit is issued, the applicant or registrant may complete the appropriation and apply the water to beneficial use.

ix. Within 60 days of completion of the appropriation, the permittee shall file a notice of completion with the Department pursuant to state law.

c. Appropriation of Groundwater with a Temperature of 60°F. or Greater

If an application or registration for a permit within the Area is for a use requiring groundwater with a temperature of 60°F. or more or the well log or any verification indicates water of 60°F. or more, the following provisions apply:

i. Subarea I - groundwater with a temperature of 85°F. or more:

Groundwater of 85°F. or more in Subarea I is presumed to be hydrothermal discharge water. The Department shall not process or grant an application for a permit to appropriate water with a temperature of 85°F. or more in Subarea I, unless the appropriation is consistent with modification of restrictions pursuant to Article IV, section J., or pursuant to the procedures set forth below. An application for an appropriation that proposes to do no more than divert the unenhanced natural surface flow of a spring that is not located in the mainstem of the reserved portion of a stream to which a reserved water right for instream flow is described in Article III of this Compact is not subject to these restrictions.

(1) The application shall set forth credible information that the proposed appropriation does not include contribution by hydrothermal discharge water;

(2) Within 30 days of receipt of the information the Department shall seek review of the application by the TOC.

(3) The TOC shall review the report to determine if the appropriation can take place without adverse effect on the hydrothermal system within YNP. In performing the review, the TOC shall utilize the best available scientific information. The TOC shall resolve doubt in favor of protection of the hydrothermal system within YNP.

(4) Within 60 days of the request by the Department, the TOC shall recommend, in a report to the Department, if, and under what conditions the appropriation could be allowed without adverse effect on the hydrothermal system within YNP. The TOC may recommend limits or conditions on the proposed appropriation that, in the opinion of the TOC, would allow the development while protecting the hydrothermal system within YNP. The TOC shall also provide the Department with a dissenting report pursuant to Article IV, section J.1., if applicable.

(5) On receipt of the report or reports, the Department shall provide a copy to the United States and the applicant and shall schedule a hearing no less than 60 and no more than 90 days from mailing of the report.

(6) The hearing shall proceed as a contested case under the Montana Administrative Procedure Act, Title 2, Chapter 4 of the Montana Code Annotated.

(7) The report or reports, data and other written information produced by the TOC shall be admissible in the hearing without further foundation and not subject to the hearsay objection, subject to the rights of any party or claimant to cross-examine the producer or drafter of the written material and to controvert the same by other evidence. The hearing officer may request that members of the TOC appear to provide expert testimony in the case.

(8) The report and recommendations provided by the TOC have a rebuttable presumption of validity for the purposes of Article IV. The dissenting report, if any, may be used as rebuttal evidence.

(9) If the report recommends denial of the application, the applicant may overcome the presumption by proving by clear and convincing evidence that the proposed appropriation does not include hydrothermal discharge water.

(10) If the application is denied, the Department shall order that the well be temporarily abandoned; or, if multiple water zones are encountered, the zone of excess temperature be closed to production. Abandonment shall be according to the rules of the Montana Board of Water Well Contractors unless alternative procedures are recommended by the TOC. The abandonment order shall not be lifted until a modification order pursuant to Section IV.J. allows the appropriation or until the department determines that the well should be permanently abandoned.

(11) Within 30 days of an order by the Department pursuant to this section, appeal on the record may be made to a state or federal court of competent jurisdiction. For an appeal to state court, venue shall be the First Judicial District in Helena and the review must be conducted according to the procedures for judicial review of a contested case under the Montana Administrative Procedures Act, Title 2, Chapter 4, of the Montana Code Annotated.

ii. Subarea I - groundwater with a temperature of 60°F. or more, but less than 85°F:

Appropriation of groundwater with a temperature of 60°F. or more, but less than 85°F. in subarea I is subject to the following provisions.

(1) The applicant shall provide credible information that the water meets the following criteria:

(a) the proposed appropriation will do no more than divert the unenhanced natural surface flow of a spring that is not located in the mainstem of the reserved portion of a stream to which a reserved water right for instream flow is described in Article III of this Compact, or

(b) the proposed appropriation meets all of the following criteria:

(i) The water temperature is the result of the normal thermal gradient of the earth plus the mean annual air temperature at the site plus 14°F. Unless modified by the TOC, the Department shall use the following equation to estimate the water temperature expected:

(0.01646 x the depth of the production zone in feet) + 59.3°F.

If the temperature measured at the wellhead is equal to or less than the temperature estimated by this equation, the appropriation meets this criteria.

(ii) the concentration of soluble chloride is less than ten parts per million; and

(iii) the well does not contain a production zone completed within the Madison Group of formations as defined by the Catalog of Stratigraphic Names for Montana, Bureau of Mines and Geology, Special Publication 54, March 1971.

(2) The Department may issue a permit to appropriate groundwater with a temperature of 60°F or more, but less than 85°F. to an applicant that meets the above criteria and is in compliance with the provisions of Article IV, section G.2.c. unless (a) restrictions are consistent with modification pursuant to Article IV, section J.; or (b) the United States objects and shows by a preponderance of the evidence that the criteria have not been met or, for another scientific reason, the temperature is the result of contribution by hydrothermal discharge water.

(3) If the applicant fails to meet the above criteria or the United States meets its burden, the applicant shall comply with the provisions of Article IV, section G.2.c.i. for water or 85°F or more.

(4) The three criteria set forth in Article IV, section G.2.c.ii.(1)(b) may be modified on recommendation by the TOC.

iii. Subarea II:

(1) Groundwater of 85°F. or more in subarea II is presumed to be hydrothermal discharge water. The applicant shall follow the procedures of Article IV, section G.2.c.i. including review by the TOC, provided that, if a permit to appropriate is issued the monitoring recommended in the Working Group Report or as superseded by the TOC for subarea II, not subarea I, shall apply.

(2) An applicant who encounters groundwater of 60°F. or more but less than 85°F. shall comply with the provisions of Article IV, section G.2.c.ii., provided that, if a permit to appropriate is issued the monitoring recommended in the Working Group Report or as superseded by the TOC for subarea II, not subarea I, shall apply.

3. Change in Character of Groundwater: Within 60 days of the receipt of information indicating a change in the character of the groundwater appropriated under a permit issued in the Area on or after January 1, 1993 that indicates the production of groundwater for which a restriction applies, the Department shall issue an order requiring that the appropriator comply with the limitations on appropriation of hydrothermal groundwater authorized in this Article. The order shall take affect 60 days following the date issued unless the appropriator appears to contest the order. If the appropriator appears to contest the order, the Department shall set a date for a hearing and proceed pursuant to the provisions for a contested case under the Montana Administrative Procedures Act, title 2, Chapter 4, of the Montana Code Annotated, provided that the appropriator shall have the burden to prove by a preponderance of the evidence that the water produced does not meet the criteria to which restrictions apply.

H. Inventory and Sampling of Groundwater

1. Initial Inventory

All groundwater appropriations in the Area with a priority date before the effective date of this Compact shall be inventoried as set forth below:

a. Notice of Inventory

Within 120 days after the effective date of this Compact or the receipt of funding from the United States, whichever occurs later, the Department shall serve notice by mail on each person or public agency known from an examination of the records in the Department's office to be an appropriator of groundwater with a priority date before the effective date of this Compact. The notice shall set forth:

i. the contents of the notice required in Article IV, section F.; and

ii. a statement that within 3 years from the date of notice the Bureau may visit the wellsite to measure temperature; flow rate or maximum pump capacity; water level, or pump level if the well cannot be entered; and may collect a water sample for additional analysis.

b. Inventory

i. Within 3 years of notice pursuant to Article IV, section H.1.a., a representative of the Bureau shall inventory each well drilled pursuant to an appropriation recognized under state law with a priority date before the effective date of this Compact. The inventory shall be considered complete when the Bureau has inventoried substantially all of the wells that can be located and accessed with reasonable diligence. The inventory shall include, but not be limited to, the following:

(1) well location to the quarter-quarter-quarter-quarter section;

(2) ground elevation at the wellhead;

(3) flow rate or maximum pump capacity;

(4) water level, or pump level if the well cannot be entered;

(5) water temperature at the wellhead;

(6) specific conductance of the water at the wellhead;

(7) chloride content of the water at the wellhead;

(8) water samples from a representative number of wells selected by the Bureau. The water samples shall be analyzed by the Bureau, or by a qualified lab contracted by the Bureau. Samples shall be analyzed for chemistry, and, if applicable, gas and isotopes. Choice of analyses shall be at the discretion of the Bureau using the Working Group Report or a report by the TOC

superseding the Working Group Report as a guideline. The Bureau may consult with the TOC concerning well selection and analysis; and,

(9) any additional information deemed necessary for implementation of this Article by the Bureau in consultation with the TOC.

ii. The inventory shall be prioritized to complete Subarea I first.

iii. Within 6 months of completion of the inventory in each Subarea, the Bureau shall provide a report to the Department, the TOC, and the United States, verifying that the inventory is complete and setting forth the data obtained in the inventory. The report shall be made available to the public by the Department. In addition, the Bureau shall maintain an adequate database pursuant to Article IV, section H.2.

2. Sampling Program and Database

a. Following the initial inventory of all current groundwater appropriations in the Area provided for in Article VI, section H.1., the Bureau shall sample wells selected in consultation with the TOC and at a frequency determined in consultation with the TOC. The wells may include appropriations made prior to, on or after January 1, 1993. The number of wells sampled and the analyses performed shall be as determined by the Bureau in consultation with the TOC. Until superseded due to recommendation by the TOC, the Working Group Report shall be used as a guideline in making this determination. Within 6 months of the completion of each inventory and sampling program, the Bureau shall provide the Department, the TOC and the United States with a report on the results.

b. The Bureau shall maintain an adequate database on the Yellowstone Controlled Groundwater Area which shall include, at a minimum, analyses of water chemistry, temperature, well depth, well capacity and well location.

c. The United States agrees to provide an annual report to the Bureau for incorporation into the database on the water chemistry, temperature and flow rate of any well in use or spring sampled in the portion of YNP within the state, and may include such information for any well or spring in the portion of YNP outside the state.

d. The information in the database shall be available to the public through the Natural Resources Information System, currently located at 1515 E. Sixth Avenue, Helena, Montana 59620-1800.

I. Administration of the Yellowstone Controlled Groundwater Area

1. The Yellowstone Controlled Groundwater Area established by this Compact shall be administered pursuant to applicable state law and the terms of this Compact.

2. In addition to the requirements imposed by state law, the Department shall provide the United States with notice of any application or registration for a permit to appropriate groundwater within the Area in the same manner and time as required by state law for notice to groundwater appropriators in a controlled groundwater area.

3. The United States may be an objector to any application or registration for a permit to appropriate groundwater or in a hearing for modification of a permit to appropriate groundwater within the Area pursuant to the provisions of Article IV, section G.

4. The Department shall, whenever possible, consolidate any proceedings on groundwater applications or registration pursuant to Articles II and III with any proceeding made necessary by this Article.

5. Within 2 years after the effective date of this Compact or the receipt of the requested funding from the United States, whichever occurs later, the Department is directed to promulgate such additional rules necessary to effectuate this Compact and to establish criteria which may be necessary to implement this Article. Said rules shall not alter the rights or obligations of the parties hereto. In doing so, the Department shall consult with the United States and the TOC. Until modified by the TOC, the Department shall adopt the Working Group Report to govern sampling, reporting and monitoring requirements, except as modified by Article IV, section G. In reviewing any permit to appropriate hydrothermal discharge water the Department shall consider the criteria set forth in the Working Group Report or a subsequent report by the TOC, including, but not limited to, the identification of risk associated with volume of appropriation and distance from the reserved land of YNP.

J. Modification of the Yellowstone Controlled Groundwater Area

1. Technical Oversight Committee: Establishment and Authority

a. A joint federal-state Technical Oversight Committee is hereby established to review scientific evidence related to the Yellowstone Controlled Groundwater Area; to advise the Department on administration of the Area, including review of applications to appropriate water of 60°F. or more; to consult with the Bureau on inventory and sampling; and to recommend modification of boundaries and restrictions.

b. The committee shall consist of five qualified scientists with experience related to hydrothermal systems. The committee members shall be appointed within six months following the effective date of this Compact: one appointed by the National Park Service; one appointed by the United States Geological Survey; one appointed by the Department; one appointed from the Montana University system by the Montana State Geologist; and one selected by the other four members. Appointments and selections shall be made, to the extent possible, to ensure that three of the qualified scientists with experience related to hydrothermal systems also have experience in (1) geochemistry; (2) geophysics; and (3) hydrogeology. Vacancies due to expiration of terms or resignation of a member shall be filled in the same manner. Should the four members fail to agree on the selection of additional members within 60 days after appointment of all four members or within 30 days after a vacancy occurs, the following procedure shall be utilized:

(i) Within 5 days each member shall nominate one person for each vacancy and submit the nominations to a judge of the First Judicial District in Helena; and

(ii) A judge of the First Judicial District in Helena shall fill the vacancy by selecting a member from each set of nominations.

c. Each member shall serve a five-year term and shall be eligible for reappointment. Expenses of the members shall be born by the entity appointing the member. The per diem or salary, and travel expenses of the three members-at-large shall be born equally by the United States and the state, subject to the availability of funds. All other expenses of the TOC shall be born by the United States subject to Congressional appropriation as set forth in Article IV, section C.

d. The recommendation of any of the following by the TOC shall be based on a supermajority of four to one: (1) modification of the Area pursuant to Article IV, section J; (2) review of an application to appropriate groundwater with a temperature of 60°F. or more; and (3) removal of any of the criteria specified in Article IV, section G.[2.]c.ii.(1)(b). Failure to achieve a supermajority shall result in a recommendation of no modification or no permit approval. In the absence of a unanimous decision, the TOC shall provide both a report supporting the recommendation that there be no modification or no permit approval, and a dissenting report to the Department. In all other instances in which the TOC consults with or makes recommendations to the Department or the Bureau, recommendations shall be made by a simple majority of the entire committee.

e. The TOC shall:

i. review the boundaries of the Area and the Subareas;

ii. review the initial restrictions on groundwater development imposed pursuant to this Article, and future modifications of those restrictions;

iii. assess the cumulative impact of all development in the Area;

iv. review changes in the groundwater and hydrothermal systems revealed by inventory and analyses done by the Bureau, and any other pertinent scientific evidence;

v. review new scientific evidence pertinent to the Area;

vi. consult with the Bureau or the Department on request;

vii. present evidence and make recommendations to the Department in accordance with Article IV, section J.2.

viii. review applications for a permit to appropriate groundwater on request by the Department as set forth in Article IV, section G.2.c.; and

ix. take any additional action necessary to implement this Article.

f. The Department and the Bureau shall provide the TOC with all information in their records regarding appropriations of groundwater within the Area including reports required by this Article.

g. The initial review shall take place within 1 year of the receipt of the inventory report done by the Bureau pursuant to Article IV, section H. Subsequent reviews shall take place every

5 years following the initial inventory or following the issuance of 75 permits to appropriate water within the Area by the Department, whichever occurs first. Additional review shall also take place on request by the United States or the state.

h. Within 6 months of initiation of a review, the TOC shall provide a report of the review, including any recommendation for modification, and a dissenting report, if any, to the Department and the United States. Recommendations shall be based on a determination by a supermajority of the entire TOC that the modification is necessary to prevent adverse effect to the hydrothermal system within the reserved land of YNP, or that modification may be made without the threat of adverse effect on the hydrothermal system within the reserved land of YNP. The recommendation shall be made in good faith and based on scientific evidence including, but not limited to, the following:

i. in the case of extension of boundaries, the criteria set out in the Working Group Report for designation of the boundary of the Area to be enlarged is found to exist within the proposed extension;

ii. the cumulative effect of groundwater development within the Area or a portion of the Area has resulted in declining hydraulic head and modification of boundaries or restrictions are necessary to prevent adverse effect on the hydrothermal system within the reserved land of YNP;

iii. changes in groundwater revealed by the inventory and sampling program are such that modification is necessary to prevent adverse effect on the hydrothermal system within the reserved land of YNP;

iv. scientific evidence indicates that modification is necessary to prevent adverse effect on the hydrothermal system within the reserved land of YNP;

v. based on scientific evidence, restrictions can be removed or boundary modifications made without the threat of adverse effect to the hydrothermal system within the reserved land of YNP.

2. Modification Pursuant to Review

a. Within 60 days of mailing of the report in Article IV, section J.1.h., and if (1) the TOC recommends modification; (2) the United States, state or a person with property or water rights within the Area petitions for a hearing; or (3) a person with an interest that would be adversely affected by the recommendation, petitions for a hearing, the Department shall provide for notice of a hearing pursuant to state law.

b. The Department shall follow the rules for a contested case under the Montana Administrative Procedures Act, Title 2, Chapter 4 of the Montana Code Annotated. In addition, the Department shall apply the following provisions:

i. The report or reports, data and other written information produced by the TOC shall be admissible in the hearing without further foundation and not subject to the hearsay objection, subject to the rights of any party or claimant to cross-examine the producer or drafter of the written material and to controvert the same by other evidence. The hearing officer may request that members of the TOC appear to provide expert testimony in the case. The hearing officer shall also hear any oral and written scientific evidence presented by the state, the United States, any applicant for a permit to appropriate who has requested review, and any person with property or water rights in the Area, or an interest that would be adversely affected by the recommended modification.

ii. The scientific evidence and recommendations presented in the report by the TOC have a rebuttable presumption of validity for the purposes of Article IV. The Department shall adopt the recommendations of the TOC unless the recommendation by the TOC is refuted by clear and convincing scientific evidence. The dissenting report of the TOC, if any, may be used as rebuttal evidence.

iii. The Department shall issue an order stating findings of fact and conclusions of law.

c. Within 30 days of an order by the Department, a person aggrieved by the order may appeal on the record to a state or federal court of competent jurisdiction. For an appeal to state court, venue shall be the First Judicial District in Helena and the review must be conducted according to the procedures for judicial review of a contested case under the Montana Administrative Procedures Act, Title 2, Chapter 4, of the Montana Code Annotated.

ARTICLE V
GENERAL PROVISIONS

A. No Effect on Tribal Rights or Other Federal Reserved Water Rights:

1. Nothing in this Compact may be construed or interpreted in any manner to establish the nature, extent or manner of administration of the rights to water [with respect to BHNB, GNP, and YNP or] the nature or extent of the rights to water or the right to administer water [with respect to BCNRA and LBBNM] of an Indian Tribe in Montana, or of a water right of an individual that is derivative of such right, or of the United States on behalf of such tribe or tribal member. The relationship between the water rights of the National Park Service described herein and any rights to water of an Indian Tribe in Montana, or of a water right of an individual that is derivative of such right, or of the United States on behalf of such tribe or tribal member shall be determined by the rule of priority. The United States specifically recognizes the seniority of the Crow Tribal Water Rights.

2. Nothing in this Compact is otherwise intended to conflict with or abrogate a right or claim of an Indian Tribe regarding boundaries or property interests in the State of Montana.

3. Nothing in this Compact may be construed or interpreted in any manner to establish the nature, extent or manner of administration of the rights to water of any other federal agency or federal lands in Montana other than those of the National Park Service. The exercise of a water right of the United States, if any, to water for a consumptive use on land administered by the United States Forest Service upstream of a water right to instream flow described in this Compact shall be allocated from the United States' share for instream flow, not the state's share for consumptive use.

B. State Water Rights

Nothing in this Compact may limit the exclusive authority of the state, including the authority of a water commissioner authorized by state law, to administer all current and future water rights recognized under state law within and upstream of the reserved land covered by this Compact, provided that in administration of those water rights in which the United States has an interest, such authority is limited to that granted under federal law.

C. General Disclaimers

Nothing in this Compact may be construed or interpreted:

1. as a precedent for the litigation or the interpretation or administration of future compacts between the United States and the state; or of the United States and any other state;

2. as a waiver by the United States of its right under state law to raise objections in state court to individual water rights claimed pursuant to the state Water Use Act, Title 85, of the Montana Code Annotated, in the basins affected by this Compact;

3. as a waiver by the United States of its right to seek relief from a conflicting water use not entitled to protection under the terms of this Compact;

4. to establish a precedent for other agreements between the state and the United States or an Indian tribe;

5. to determine the relative rights, inter sese, of persons using water under the authority of state law or to limit the rights of the parties or a person to litigate an issue not resolved by this Compact;

6. to create or deny substantive rights through headings or captions used in this Compact;

7. to expand or restrict any waiver of sovereign immunity existing pursuant to federal law as of the effective date of this Compact;

8. to affect the right of the state to seek fees or reimbursement for costs or the right of the United States to contest the imposition of such fees or costs, pursuant to a ruling by a state or federal court of competent jurisdiction or Act of Congress;

9. to affect in any manner the entitlement to or quantification of other federal water rights. This Compact is only binding on the United States with regard to the water rights of the National Park Service, and does not affect the water rights of any other federal agency.

10. to alter or amend any provisions of the Yellowstone River Compact, Act of October 30, 1951, ch. 629, 65 Stat. 663 (1951).

D. Use of Water Right

Except as otherwise provided in this Compact, the rights of the United States described in this agreement are federal reserved water rights. Non-use of all or a part of the federal reserved water rights described in this Compact shall not constitute abandonment of the right. The federal reserved water rights described in this Compact need not be applied to a use deemed beneficial under state law, but shall be restricted to uses necessary to fulfill the purposes of the associated reserved land.

E. Appropriation Pursuant to State Law

Nothing in this Compact may prevent the United States from seeking a permit to appropriate water under state law for use outside the boundaries of the federal reservations for which a water right is described in this Compact, provided that, no such use may be included in the calculation of total current or future consumptive use rights allocated to use pursuant to state law by this Compact, and provided further that, a water right obtained in this manner shall be considered a state water right and shall be administered pursuant to general provisions of state law as provided in Article II, section J.2.b.

F. Reservation of Rights

The parties expressly reserve all rights not granted, described or relinquished in this Compact.

G. Severability

Except as provided in Article IV, the provisions of this Compact are not severable, provided that for the purposes of Sec. 85-2-702(3) MCA, the water rights described in this Compact for the LBBNM and BCNRA Units shall be considered as separate Compacts.

H. Multiple Originals

This Compact is executed in quintuplicate. Each of the five (5) Compacts bearing original signatures shall be deemed an original.

I. Notice

Unless otherwise specifically provided for in this Compact, service of notice required hereunder, except service in litigation, shall be:

1. State: Upon the Director of the Department and such other officials as he or she may designate in writing.

2. United States: Upon the Secretary of the Interior and such other officials as he or she may designate in writing.

ARTICLE VI
FINALITY OF COMPACT AND DISMISSAL OF PENDING CASES

A. Binding Effect

1. The effective date of this Compact is the date of the ratification of this Compact by the Montana legislature, written approval by the United States Department of the Interior, or written approval by the United States Department of Justice, whichever occurs later. Once effective, all of the provisions of this Compact shall be binding on:

a. The state and a person or entity of any nature whatsoever using, claiming or in any manner asserting a right under the authority of the state to the use of water; and

b. except as otherwise provided in Article V, section A., the United States, a person or entity of any nature whatsoever using, claiming, or in any manner asserting a right under the authority of the United States to the use of water.

2. Following the effective date, this Compact shall not be modified without the consent of both parties. Either party may seek enforcement of this Compact in a court of competent jurisdiction. Except as provided in Article IV concerning the appropriation of funds, attempt to unilaterally modify this Compact by either party shall render this Compact voidable at the election of the other party.

3. On approval of this Compact by a state or federal court of competent jurisdiction and entry of a decree by such court confirming the rights described herein, this Compact and such rights are binding on all persons bound by the final order of the court.

4. If an objection to this Compact is sustained pursuant to 85-2-702(3), MCA, this Compact shall be voidable by action of and without prejudice to either party.

B. Disposition of Actions

Subject to the following stipulations and within one hundred eighty (180) days of the effective date, the parties shall submit this Compact to an appropriate state court or courts having jurisdiction over this matter in an action commenced pursuant to 43 U.S.C. §666, for approval in accordance with state law and for the incorporation of the reserved water rights described in this Compact into a decree or decrees entered therein. The parties understand and agree that the submission of this Compact to a state court or courts, as provided for in this Compact, is solely to comply with the provisions of 85-2-702(3), MCA, and does not expand the jurisdiction of the state court or expand in any manner the limited waiver or sovereign immunity of the United States in the McCarran Amendment, 43 U.S.C. §666 or other provision of federal law.

1. Dismissal of Filed Claims: At the time the state courts approve the reserved water rights described in this Compact and enter a decree or decrees confirming the rights described herein, such courts shall dismiss, with prejudice, all of the water right claims specified in Appendix 4 to this Compact. If this Compact fails approval or a reserved water right described herein is not confirmed, the specified claims shall not be dismissed.

2. Disposition of Federal Suits: Within ninety (90) days of the issuance of a final decree or decrees by the state courts approving this Compact and confirming the reserved water rights described herein, and the completion of any direct appeals therefrom or the expiration of the time for filing such appeal, the parties shall execute and file joint motions pursuant to Rule 41(a) Fed. R. Civ. P. to dismiss with prejudice those claims made by the United States for Glacier National Park in United States v. Aageson, No. CV-79-21-GF (D. Mont.); United States v. Abell, No. CV-79-33M (D. Mont.); and United States v. AMS Ranch, Inc., No. CV-79-22-GF (D. Mont.) and any claims made by the United States for LBBNM or BCNRA in federal court. This Compact may be filed as a consent decree in those federal suits, only if, prior to the dismissal of the federal suits as provided in this Article, it is finally determined in a judgement binding on the State of Montana that the state courts lack jurisdiction over some or all of the reserved water rights described in this Compact. Within one year of such judgment the United States agrees to commence such additional proceedings in the federal district court for the District of Montana as may be necessary to judicially confirm the reserved water rights described herein which are not included within an existing action.

C. Settlement of Claims

The parties intend that, with the exceptions noted herein, the water rights described in this Compact are in full and final settlement of the water right claims for the reserved land administered by the National Park Service in Montana on the effective date of this Compact. Pursuant to this settlement, by which certain federal reserved water rights are expressly recognized by the state in this Compact and other water rights claims of the United States are expressly retained in Article III, sections D. and F. in the Compact for YNP, GNP, and BHNM, the United States hereby and in full settlement of any and all claims filed by the United States or which could have been filed by the United States for reserved land administered by the National Park Service in Montana relinquishes forever all said claims on the effective date of this Compact to water within the State of Montana for reserved land administered by the National Park Service. The state agrees to recognize the reserved water rights described and quantified herein, and shall, except as expressly provided for herein, treat them in the same manner as a water right recognized by the state.

Specifically excepted from this final settlement of water rights are water rights Claims No. 43P-W-162354-00 and 43P-W-162348-00, both of which are claimed in the general adjudication of water rights as state law based water rights. Claim No. 43P-W-162354-00 is for 0.75 cfs from the Big Horn Canal for irrigation purposes at the Bighorn River Ranch site within BCNRA. Claim No. 43P-W-162348-00 is for 50 gpm from Pete's Spring for recreation and wildlife purposes and is located outside of the BCNRA boundary.

D. The parties agree to seek enactment of legislation and to recommend appropriation of federal funds necessary to effectuate the provisions and purposes of this Compact, and to defend the provisions and purposes of this Compact from all challenges and attacks.

IN WITNESS WHEREOF the representatives of the State of Montana and the United States have signed this Compact on the 30th day of May, 1995.

FOR THE STATE OF MONTANA
MONTANA RESERVED WATER RIGHTS COMPACT COMMISSION
FOR THE UNITED STATES

History: **En. Sec. 1, Ch. 635, L. 1993; Sec. 85-2-706, MCA 1993; redes. 85-20-401 by Code Commissioner, 1994; amd. Sec. 1, Ch. 149, L. 1995.**

85-20-402. Accounting for federal funds. (1) There must be created those accounts that are necessary within the federal special revenue fund established under 17-2-102 for the purposes of this part.

(2) Federal funds deposited in the accounts and interest and earnings on the accounts must be used for the following purposes or to reimburse the state for expenditures incurred for the following purposes:

(a) establishment, administration, and enforcement of the Yellowstone controlled ground water area;

(b) inventory, sampling, reporting, and database management;

(c) provision for administrative costs and the cost of any study or any other necessary activity by the technical oversight committee; and

(d) any other necessary activity pursuant to this part.

History: En. Sec. 2, Ch. 635, L. 1993; Sec. 85-2-707, MCA 1993; redes. 85-20-402 by Code Commissioner, 1994; amd. Sec. 30, Ch. 389, L. 1999.

Part 5
United States Bureau of Land Management-Montana Compact

85-20-501. United States Bureau of Land Management-Montana compact ratified. The compact entered into by the state of Montana and the United States Bureau of Land Management and filed with the secretary of state of the state of Montana under the provisions of 85-2-702 on March 28, 1997, is ratified. The compact is as follows:

WATER RIGHTS COMPACT
STATE OF MONTANA
UNITED STATES OF AMERICA, BUREAU OF LAND MANAGEMENT

This Compact is entered into by the State of Montana and the United States of America to settle for all time any and all claims to water for certain lands administered by the Bureau of Land Management within the State of Montana at the time of the effective date of this Compact.

RECITALS

WHEREAS, the State of Montana, in 1979 pursuant to Title 85, chapter 2 of the Montana Code Annotated, commenced a general adjudication of the rights to the use of water within the State of Montana including all federal reserved and appropriative water rights;

WHEREAS, 85-2-228, MCA, provides that a federal reserved water right with a priority date of July 1, 1973, or later be subject to the same process and adjudication as a federal reserved water right with a priority date before July 1, 1973;

WHEREAS, 85-2-703 and 85-2-228(3), MCA, provide that the state may negotiate settlement of claims by the federal government to non-Indian reserved waters within the State of Montana;

WHEREAS, the United States wishes to quantify and have decreed the amount of water necessary to fulfill the purposes of two Bureau of Land Management units in the State of Montana, specifically those reserved water rights necessary to preserve the Upper Missouri National Wild and Scenic River and the Bear Trap Canyon Public Recreation Site;

WHEREAS, the United States Attorney General, or a duly designated official of the United States Department of Justice, has authority to execute this Compact on behalf of the United States pursuant to the authority to settle litigation contained in 28 U.S.C. §§516-17 (1968);

WHEREAS, the Secretary of the Interior, or a duly designated official of the United States Department of the Interior, has authority to execute this Compact on behalf of the United States Department of Interior pursuant to 43 U.S.C. §1457 (1986, Supp. 1992);

NOW THEREFORE, the State of Montana and the United States agree as follows:

ARTICLE I
DEFINITIONS

For purposes of this Compact only, the following definitions shall apply:

(1) "Annual Report" means the report prepared by the Montana Department of Natural Resources and Conservation providing information concerning water appropriations issued,

modified, revoked, or abandoned in that year that affects the quantity of water in the Available Water Supply, and the current status of the Available Water Supply.

(2) "Available Water Supply" or "AWS" means those monthly amounts of surface and groundwater available to meet the state's projected demands, as identified in Table 1, in the Missouri River basin upstream from the point the Missouri River leaves the boundary of the Upper Missouri National Wild & Scenic River beyond that necessary to satisfy the United States' reserved water right. All depletions from appropriations completed after December 31, 1987, shall be subtracted from the Available Water Supply.

(3) "Bear Trap Canyon Public Recreation Site" or "BTCPRS" means those lands located in Montana that, pursuant to authority granted by Executive Order No. 10355 of May 26, 1952, were withdrawn and reserved by Secretary of the Interior Public Land Order 5062 (Montana 17093), published in the Federal Register on June 9, 1971.

(4) "BLM" means the United States Bureau of Land Management or its successor.

(5) "Department" means the Montana Department of Natural Resources and Conservation or its successor.

(6) "Depletion" means, for water uses subtracted from the Available Water Supply, the amount of water reduced in the source of supply for each month as calculated in accordance with the Method for Calculation of Monthly Depletions. A depletion is a standard reduction amount based on depletion factors for the type of use as opposed to a measured deduction or a term, condition, restriction, or limitation on an appropriation.

(7) "Groundwater" means any water that is beneath the ground surface.

(8) "HYDROSS Model" means the United States Bureau of Reclamation's Hydrologic Operations Study (HYDROSS) model for the Missouri River basin upstream from the point that the Missouri River leaves the boundary of the Upper Missouri National Wild & Scenic River. The HYDROSS Model is a water supply model that uses monthly water supply studies derived from a period of flow records to simulate the effect of existing and proposed water demands on the historic naturalized flow of the Missouri River. The HYDROSS model and information used to develop the model are archived in the Montana state library.

(9) "Instream flow" means the water that the parties agree shall remain in the stream in satisfaction of the United States' reserved water right for the purposes of the federal reservation.

(10) "Method for Calculation of Monthly Depletions" means the procedure the Department will follow in calculating depletions subtracted from the Available Water Supply for appropriations completed after December 31, 1987. The Method for Calculation of Monthly Depletions is incorporated in this Compact and attached as Appendix 1.

(11) "Non-Consumptive Use" means a beneficial use of water that does not cause a reduction in the source of supply and in which substantially all of the water returns without delay to the source of supply, causing little or no disruption in stream conditions.

(12) "Parties" means the State of Montana and the United States.

(13) "State" means the State of Montana and all officers, agents, departments, and political subdivisions thereof. Unless otherwise indicated, "state" means the Director of the Montana Department of Natural Resources and Conservation or the Director's designee.

(14) "Supplemental Water" means a new appropriation issued for the same purpose of use and place of use already covered by a valid appropriation, with the same (or reduced) period of use, flow rate and, if applicable, volume of water. To be considered supplemental, no aspect of the new appropriation may exceed that of the original valid appropriation and only one appropriation or part of each may be used at the same time.

(15) "Upper Missouri National Wild & Scenic River" or "UMNW&SR" means the segment of the Missouri River located in Montana that, pursuant to the Wild and Scenic Rivers Act, 16 U.S.C. 1271, et seq, (1986, Supp. 1992), was designated as a component of the National Wild and Scenic Rivers System by Public Law 94-486, Title II, 90 Stat. 2327-2329, on October 12, 1976.

(16) "United States" means the federal government and all officers, agencies, departments, and political subdivisions thereof. Unless otherwise indicated, for purposes of notification or consent other than service in litigation, "United States" means the Secretary of the Department of the Interior or the Secretary's designee.

ARTICLE II
WATER RIGHT

The parties agree that the following water rights are in settlement of the reserved water rights of the United States for the reservations described. The parties to this Compact recognize that the water rights described in this Compact are junior to any Tribal water rights with a priority date before the effective date of this Compact, including aboriginal rights, if any, in the basins affected. All reserved water rights described in this Article are subject to Article V, section A.

A. Instream Flow for the Upper Missouri National Wild and Scenic River.

1. Priority Date: The United States has a priority date of October 12, 1976, for the water right described in this Compact for the UMNW&SR.

2. Instream Flow: The United States has a water right for instream flow in the Missouri River from Fort Benton one hundred and forty-nine miles downstream to Fred Robinson Bridge, as specifically depicted on the map attached as Appendix 2. The water right is in the amount of the remaining flow of the river after (1) all water appropriations completed before December 31, 1987; (2) the volumes of water designated for the Available Water Supply as provided in Article III, section A; and (3) uses not subtracted from the Available Water Supply as provided in Article III, section C.

B. Instream Flow for the Bear Trap Canyon Public Recreation Site.

1. Priority Date: The United States has a priority date of June 9, 1971, for the water right described in this Compact for the BTCPRS.

2. Instream Flow: The United States has a water right for instream flow in the Madison River which flows over the reserved land of Bear Trap Canyon Public Recreation Site, more specifically described as T4S R1E Sec. 20 SW1/4 downstream to T3S R1E Sec. 15 NE1/4. The water right is in the amount of 1,100 cubic feet per second from January 1 through December 31.

ARTICLE III
UMNW&SR WATER RIGHT IMPLEMENTATION

A. Available Water Supply.

The HYDROSS model incorporates information on water uses completed on or before December 31, 1987. The Department will calculate depletions from appropriations completed after December 31, 1987, on a monthly basis in accordance with Article III, section B and subtract such depletions from the water volumes designated for the Available Water Supply as set forth in Table 1.

TABLE 1
AVAILABLE WATER SUPPLY
MONTHLY AMOUNTS

Month	Acre-feet
January	104,000
February	121,000
March	124,000
April	185,000
May	219,000
June	62,000
July	82,000
August	66,000
September	40,000
October	35,000
November	57,000
December	98,000

B. Method for Calculation of Monthly Depletions Subtracted from the Available Water Supply.

1. Surface Water. Except as provided in Article III, section C, the Department will calculate depletions from surface water based on monthly depletion factors for various types of water use in accordance with the Method for Calculation of Monthly Depletions attached as Appendix 1 in the month that the use occurs. The Department will subtract monthly depletions from the AWS monthly amounts.

2. Groundwater. Except as provided in Article III, section C, the Department will calculate depletions from groundwater based on monthly depletion factors for various types of water use in accordance with the Method for Calculation of Monthly Depletions attached as Appendix 1 and spread the depletions in equal increments throughout the year with 1/12th of the annual depletion volume subtracted from each AWS monthly amount.

3. Stored Water. Except as provided in Article III, section C, the Department will calculate depletions from stored water based on monthly depletion factors for various types of water use for the months of use in accordance with the Method for Calculation of Monthly Depletions attached as Appendix 1, but subtract such depletions from the AWS in the months when diverted as calculated in accordance with the Method for Calculation of Monthly Depletions attached as Appendix 1. The Department will calculate evaporation depletions in accordance with the Method for Calculation of Monthly Depletions attached as Appendix 1 and subtract such depletions from the AWS monthly amounts.

4. Water Reservations. Except as provided in Article III, section C, the Department will calculate depletions from state water reservations granted pursuant to 85-2-316 but not completed on or before December 31, 1987, based on the monthly depletion factors for various types of water use in accordance with the Method for Calculation of Monthly Depletions attached as Appendix 1 and subtract such depletions from the AWS monthly amounts, except that the Department will not subtract depletions from Water Reservation No. 72579-41T from the AWS monthly amounts. The Department will process state water reservations subtracted from the AWS monthly amounts that are abandoned, revoked, modified, or found invalid pursuant to Article III, section D.

C. Uses Not Subtracted from the Available Water Supply.

1. Non-Consumptive Use. The Department will not subtract non-consumptive uses from the AWS monthly amounts.

2. Uses of 35 gallons per minute or less, not to exceed 10 acre feet per year. The Department will not subtract groundwater uses of 35 gallons per minute or less, not to exceed 10 acre feet per year, and surface water appropriations of 35 gallons per minute or less, not to exceed 10 acre feet per year for domestic use from the AWS monthly amounts.

3. Supplemental Water. The Department will not subtract supplemental water uses from the AWS monthly amounts.

4. Lawn and Garden. The Department will not subtract depletions for appropriations to irrigate an area 5 acres or less from the AWS monthly amounts.

5. Instream Stock Uses. The Department will not subtract instream stock uses from the AWS monthly amounts.

6. Late Claims. The Department will not subtract valid late claims as defined by 85-2-221, MCA (1995) from the AWS monthly amounts.

7. Federal and Tribal Water Rights. The Department will not subtract water rights created under federal law, water rights recognized in satisfaction of water rights created under federal law, and water rights owned by individuals that are derived from water rights created under federal law from the AWS monthly amounts.

D. Additions to the Available Water Supply.

1. Abandonment. When an appropriation right on a stream affected by this Compact is abandoned after December 31, 1987, and such abandonment causes water to become available for appropriation, the Department will calculate the previous depletion amount in accordance with the Method for Calculation of Monthly Depletions and add such amount to the water volumes designated for the Available Water Supply. State law governs the issue of whether an abandonment has occurred.

2. Modified, Revoked, or Invalid Appropriations. When an appropriation right on a stream affected by this Compact is modified, revoked, or found invalid and such modification, revocation, or invalidation causes water to become available for appropriation, the Department will calculate the previous depletion amount in accordance with the Method for Calculation of Monthly Depletions and add such amount to the water volumes designated for the Available Water Supply.

E. Basin Closure. Except for the uses provided for in Article III, section C, in the Missouri River basin upstream from the point that the Missouri River leaves the boundary of the UMNW&SR the Department shall not process or grant an application for an appropriation in any month in which the water volume designated for the Available Water Supply has been exhausted.

F. Prohibition on Future Mainstem Impoundment. No new impoundments may be permitted on the mainstem of the Missouri River upstream from the UMNW&SR. Reclamation, repair, or rehabilitation of an existing impoundment shall not be considered a new impoundment, provided that, without the consent of the United States, which for nonfederal power generating impoundments under the Federal Energy Regulatory Commission's jurisdiction shall be obtained through the Federal Energy Regulatory Commission, reclamation, repair, or rehabilitation shall not cause the impoundment to exceed the original constructed capacity of the impoundment.

G. Administration and Reporting by the State.

1. Department Administration. The Department will administer the AWS by subtracting depletions from the monthly available water amounts following the procedures set forth in the Method for Calculation of Monthly Depletions attached as Appendix 1. In order to monitor the water volumes in the AWS, the Department will calculate preliminary monthly depletions and subtract the amounts from the AWS. The Department will make final subtractions from the AWS when the Department determines that an appropriation is complete pursuant to 85-2-315 or 85-2-316(8)(b), MCA.

2. Annual Report. The Department will produce an Annual Report by March 1st of each year detailing its actions in administering the AWS for the previous calendar year, provided that the first Annual Report after ratification of this Compact shall include information concerning water appropriations issued, completed, modified, revoked, found invalid, or abandoned since January 1, 1988, through the previous calendar year. The Annual Report is final on April 15 of the year issued unless on or before that date the BLM submits written comments or a request for an annual meeting to the Department. If an annual meeting is requested, it shall be held within thirty days of the request. The Department will make a final decision and issue a final Annual Report by June 1, unless the Department and the BLM agree to a different date.

3. Cooperative Review Process. The Department and the BLM will create a cooperative review process to allow discussion of depletion factors and depletion amounts assigned to the undefined uses as listed in the Method for Calculation of Monthly Depletions attached as Appendix 1 and any other issues concerning the Annual Report. Subject to Article III, section H(1), the Department will make the final decision concerning the administration of the AWS. The Department and the BLM will develop a Memorandum of Understanding describing the cooperative review process within six months of the ratification of this Compact.

4. Changes to the Method for Calculation of Monthly Depletions. The parties may make changes to the Method for Calculation of Monthly Depletions attached as Appendix 1 by written agreement and such changes shall not be deemed a modification of this Compact.

H. Action for Enforcement of Provisions of Article III.

The United States may file an action in a court of competent jurisdiction to enforce the provisions of Article III as follows:

1. Enforcement of Administration of Available Water Supply. After the Annual Report becomes final in accordance with Article III, section G(2), the United States shall have 90 days to file an action for enforcement of the provisions of Article III, section G of this Compact concerning the administration of the AWS. Any action challenging the administration of the AWS may consist only of trial de novo of the Department's actions for the previous calendar year. The United States may not challenge the Department's actions concerning administration of the AWS contained in previous Annual Reports. Except for appropriations issued in violation of Article III, section E, any court order concerning this subsection shall be limited to calculating

depletion amounts from the AWS and does not affect the appropriations issued, revoked, modified, or abandoned or any other decision of the Department.

2. Enforcement of Other Provisions of Article III. The United States may file an action for enforcement of any provision of Article III except Article III, section G at any time.

3. No Standing to Object. The United States does not have standing to object to an application for an appropriation or change in appropriation right, or to participate in a revocation or modification proceeding, based on the property, water right, or interests of the United States for the UMNW&SR, provided that, for an appropriation applied for with a point of diversion or means of conveyance within the boundaries of the UMNW&SR, the Department shall not grant the appropriation unless the Department expressly conditions the appropriation on obtaining the necessary authorization for entry and use from the United States, and provided further that nothing in this Compact shall limit the United States' standing to object based on any other water rights of the United States or the reserved water right for the BTCPRS.

4. Exclusive Remedy. The remedy set forth in this section is the exclusive remedy for enforcement of Article III of this Compact. The United States shall not have to exhaust any administrative remedies in order to enforce Article III of this Compact.

ARTICLE IV
BTCPRS WATER RIGHT IMPLEMENTATION

A. Subject to Prior Uses. The United States' federal reserved water right for instream flow for the segment of the Madison River which flows over the reserved land of Bear Trap Canyon Public Recreation Site is subject to all water rights with a priority date before June 9, 1971 recognized under state or federal law. Nothing in this Compact may affect an existing right to divert water from a point within the BTCPRS and transport it for use outside the BTCPRS.

B. Change in Instream Flow Right. The federal reserved water right for instream flow as described in Article II, section B, shall not be changed to any other use.

C. Notice of Reopening of Madison River Basin. The Department shall notify the BLM if an application for a state water reservation pursuant to 85-2-316, MCA, may be processed and granted within the Madison River basin, as such basin is defined by 85-2-340(4).

D. Enforcement of Water Right. The United States may file an action in a court of competent jurisdiction to enforce the federal reserved water right described in Article II, section B.

E. Venue for Appeal of Administrative Decisions. For any appeal of an administrative decision, venue shall be the First Judicial District in Helena and the review shall be conducted according to the procedures for judicial review of contested cases under the Montana Administrative Procedures Act, Title 2, chapter 4, of the Montana Code Annotated.

ARTICLE V
GENERAL PROVISIONS

A. No Effect on Tribal Rights or Other Federal Reserved Water Rights.

1. The relationship between the water rights of the Bureau of Land Management described herein and any rights to water of an Indian Tribe in Montana, or of any federally derived water right of an individual, or of the United States on behalf of such Tribe or individual shall be determined by the rule of priority.

2. Nothing in this Compact may be construed or interpreted in any manner to establish the nature, extent, or manner of administration of the rights to water of any Indian Tribes and Tribal members in Montana.

3. Nothing in this Compact is otherwise intended to conflict with or abrogate a right or claim of an Indian Tribe regarding boundaries or property interests in the State of Montana.

4. Nothing in this Compact may be construed or interpreted in any manner to establish the nature, extent, or manner of administration of the rights to water of any other federal agency or federal lands in Montana other than those of the Bureau of Land Management for the UMNW&SR and the BTCPRS.

B. General Disclaimers.

Nothing in this Compact may be construed or interpreted:

1. as a precedent for the litigation of reserved water rights or the interpretation or administration of future compacts between the United States and the state; or of the United States and any other state;

2. as a waiver by the United States of its right under state law to raise objections in state court to individual water rights claimed pursuant to the state Water Use Act, Title 85, of the Montana Code Annotated, in the basins affected by this Compact, or, except as provided in this Compact, any right to raise objections in an appropriate forum to individual water rights subject to a provisional permit under the state Water Use Act, Title 85, of the Montana Code Annotated, in the basins affected by this Compact;

3. as a waiver by the United States of its right to seek relief from a conflicting water use not entitled to protection under the terms of this Compact;

4. to establish a precedent for other agreements between the state and the United States or an Indian tribe;

5. to determine the relative rights, inter sese, of persons using water under the authority of state law or to limit the rights of the parties or a person to litigate an issue not resolved by this Compact;

6. to create or deny substantive rights through headings or captions used in this Compact;

7. to expand or restrict any waiver of sovereign immunity existing pursuant to federal law as of the effective date of this Compact;

8. to affect the right of the state to seek fees or reimbursement for costs or the right of the United States to contest the imposition of such fees or costs, pursuant to a ruling by a state or federal court of competent jurisdiction or Act of Congress;

9. to affect in any manner the entitlement to or quantification of other federal water rights. This Compact is only binding on the United States with regard to the water rights of the BLM, and does not affect the water rights of any other federal agency that is not a successor in interest to the water rights subject to this Compact.

C. Use of Water Right.

The rights of the United States described in Article II of this Compact are federal reserved water rights. Non-use of all or a part of the federal reserved water rights described in this Compact shall not constitute abandonment of the right. The federal reserved water rights described in this Compact need not be applied to a use deemed beneficial under state law, but shall be restricted to uses necessary to fulfill the purposes outlined in applicable federal law.

D. Concurrent with other Non-consumptive Water Uses.

The federal reserved water right for instream flows for the UMNW&SR and the BTCPRS recognized by this Compact shall run concurrently with any other non-consumptive water uses including but not limited to all hydropower uses and other instream flow uses.

E. Appropriation Pursuant to State Law.

Nothing in this Compact may prevent the United States from seeking a water appropriation pursuant to state law for use on the reserved land within the UMNW&SR or the BTCPRS or for use outside the boundaries of the federal reservations for which a water right is described in this Compact, provided that a water right obtained in this manner shall be considered a state water right and shall be administered pursuant to state law.

F. Reservation of Rights.

The parties expressly reserve all rights not granted, described, or relinquished in this Compact.

G. Severability.

The provisions of this Compact are not severable, provided that for the purposes of 85-2-702(3), MCA, the water rights described in this Compact for the Upper Missouri National Wild and Scenic River and Bear Trap Canyon Public Recreation Site shall be considered as separate Compacts.

H. Multiple Originals.

This Compact is executed in quintuplicate. Each of the five (5) Compacts bearing original signatures shall be deemed an original.

I. Notice.

Unless otherwise specifically provided for in this Compact, service of notice, except service in litigation, shall be:

1. State: Upon the Director of the Department and such other officials as the Director may designate in writing.

2. United States: Upon the Secretary of the Interior and such other officials as the Secretary may designate in writing.

ARTICLE VI
FINALITY OF COMPACT

A. Binding Effect.

1. The effective date of this Compact is the date of the ratification of this Compact by the Montana legislature, written approval by the United States Department of the Interior, or written approval by the United States Department of Justice, whichever occurs later. Once effective, all of the provisions of this Compact shall be binding on:

a. the state and a person or entity of any nature whatsoever using, claiming or in any manner asserting a right under the authority of the state to the use of water; and

b. except as otherwise provided in Article V, section A, the United States, a person or entity of any nature whatsoever using, claiming, or in any manner asserting a right under the authority of the United States to the use of water.

2. Following the effective date, this Compact shall not be modified without the consent of both parties. Any attempt to unilaterally modify this Compact by either party shall render this Compact voidable at the election of the other party.

B. Settlement of Claims.

The parties intend that the water rights described in this Compact are in full and final settlement of the reserved water right claims for the UMNW&SR and the BTCPRS. Pursuant to this settlement, by which certain federal reserved water rights are expressly recognized by the state in this Compact, the United States hereby and in full settlement of any and all claims filed by the United States or which could have been filed by the United States for the UMNW&SR and the BTCPRS relinquishes forever all said claims on the effective date of this Compact to water within the State of Montana for reserved water rights for the above mentioned units. The state agrees to recognize the reserved water rights described and quantified herein, and shall, except as expressly provided for herein, treat them in the same manner as any other appropriation.

C. The parties agree to defend the provisions and purposes of this Compact from all challenges and attacks.

IN WITNESS WHEREOF the representatives of the State of Montana and the United States have signed this Compact on the 10th day of September, 1997.

Appendix 1
Method for Calculation of Monthly Depletions

A. Surface Water.

Depletion factors are grouped by the use codes now employed by the Department, and the monthly depletion factors for each type of water use are set forth below.

1. Fishery, Wildlife, Recreational, and Wildlife/Waterfowl Uses:

FS Fishery
FW Fish and Wildlife
RC Recreation
WW Wildlife/Waterfowl.

The water loss resulting from fishery, wildlife, recreational, and wildlife/waterfowl uses occurs as evaporation from small ponds. The following table lists the monthly depletion factors for evaporative loss in feet per surface acre:

Monthly Depletion Factors for Evaporation

January	0.00
February	0.00
March	0.00
April	0.08
May	0.17
June	0.26
July	0.50

August	0.51
September	0.35
October	0.26
November	0.04
December	0.00

The Department will calculate monthly depletions from evaporation by multiplying the above factors by maximum reservoir surface area (acres).

2. Geothermal and Power Generation Uses:

GE Geothermal
PG Power Generation.

The Department will determine depletions from geothermal and power generation uses on a case-by-case basis.

3. Domestic, Multiple Domestic, and Municipal Uses:

DM Domestic
MD Multiple Domestic
MC Municipal.

The Department will calculate monthly depletions from domestic uses over 35 gallons per minute, exceeding 10 acre feet per year, multi-family domestic, and municipal uses by multiplying the annual volume by the monthly depletion factors set forth below.

Monthly Depletion Factors for Domestic, Multiple Domestic, and Municipal Uses

January	.0135
February	.0135
March	.0270
April	.0315
May	.0450
June	.0585
July	.0810
August	.0675
September	.0495
October	.0360
November	.0135
December	.0135

4. Irrigation including Lawn and Garden over 5 Acres:

IR Irrigation
LG Lawn and Garden.

The Department will calculate monthly depletions from irrigation uses (in acre feet) by multiplying the number of acres by the depletion factors set forth below.

Monthly Depletion Factors for Irrigation Uses

Month	Monthly Depletion Factor (feet per acre)
January	0.0
February	0.0
March	0.0
April	0.0
May	0.2604
June	0.4656
July	0.7417
August	0.5885
September	0.1177

October	0.0
November	0.0
December	0.0

The Department will calculate monthly depletions from lawn and garden uses to irrigate an area greater than 5 acres using the method for irrigation set forth above.

5. Stock Uses:

ST Stock.

The Department will calculate monthly depletions from stock ponds using the monthly depletion factors for evaporation listed in Appendix 1, section A(1).

6. Commercial, Industrial, Institutional, Mining, and Other Uses:

CM Commercial
IN Industrial
IS Institutional
MN Mining.
OP Other Purpose

The Department will assign monthly depletions from commercial, industrial, institutional, mining, and other undefined uses as 50% of the annual volume spread in equal increments throughout the period of use. The Department will make any necessary changes to the assigned monthly depletions to reflect actual depletions when the appropriation is complete. The Department and the BLM may discuss the monthly depletions at the annual meeting and the Department will make the final monthly depletion determination.

7. Transbasin Diversions: The Department will calculate monthly depletions for transbasin diversions outside the drainage area of the Missouri River and its tributaries upstream from the point that the Missouri River leaves the boundary of the Upper Missouri National Wild & Scenic River at 100% of the diverted amount.

B. Groundwater.

The Department will subtract all groundwater uses over 35 gallons per minute, exceeding 10 acre feet per year, from the AWS monthly amounts regardless of location or source aquifer. The Department will calculate depletions from groundwater uses based on monthly depletion factors for the type of water use as listed in Appendix 1, section A and spread the depletions in equal increments throughout the year with 1/12th of the annual depletion volume subtracted from each AWS monthly amount.

C. Stored Water.

The Department will calculate depletions from storage projects by determining the annual depletion based on the monthly depletion factors for the type of use for which the water is stored as listed in Appendix 1, section A and subtract such depletion from the AWS monthly amounts as set forth in the schedule below. For purposes of subtracting the annual depletion for the type of use from the AWS monthly amounts, the Department will apply the following depletion schedule to all reservoirs unless the appropriation issued specifies a different fill regimen.

Monthly Storage Depletion Schedule

Month	% of Calculated Annual Depletion
November	7%
December	8%
January	7%
February	7%
March	10%
April	21%
May	38%
June	2%
Total	100%

The Department will also subtract the monthly depletions from evaporation based on the monthly depletion factors for evaporation listed in Appendix 1, section A(1).

History: En. Sec. 1, Ch. 170, L. 1997.

Part 6
Chippewa Cree Tribe-Montana Compact

85-20-601. Chippewa Cree Tribe-Montana compact ratified. The compact entered into by the State of Montana and the Chippewa Cree Tribe of the Rocky Boy's Indian Reservation and filed with the Secretary of State of the State of Montana under the provisions of 85-2-702 on April 15, 1997, is ratified. The compact is as follows:

WATER RIGHTS COMPACT
STATE OF MONTANA
CHIPPEWA CREE TRIBE OF THE ROCKY BOY'S RESERVATION
UNITED STATES OF AMERICA

This Compact is entered into by and among the State of Montana, the Chippewa Cree Tribe of the Rocky Boy's Reservation, and the United States of America for the purpose of settling any and all existing water rights claims of the Chippewa Cree Tribe in the State of Montana.

ARTICLE I - RECITALS

WHEREAS, in 1979, the United States, on behalf of the Chippewa Cree Tribe of the Rocky Boy's Reservation, brought suit in the United States District Court for the District of Montana to obtain a final determination of the Tribe's water rights claims, see, United States v. Aageson, No. CIV-79-21-GF (filed April 5, 1979); and

WHEREAS, Congress consented to state court jurisdiction over the quantification of claims to water rights held by the United States of America in trust for the Tribe; see, "the McCarran Amendment", 43 U.S.C. 666 (1952); Colorado River Water Conservation Dist. v. United States, 424 U.S. 800 (1976); Arizona v. San Carlos Apache Tribe, 463 U.S. 545 (1983); and

WHEREAS, the State of Montana initiated a general stream adjudication pursuant to the provisions of Chapter 697, Laws of Montana 1979, which includes Chippewa Cree tribal water rights; and

WHEREAS, the United States has filed claims on behalf of the Chippewa Cree Tribe in the general stream adjudication initiated by the State of Montana; and

WHEREAS, the Montana Reserved Water Rights Compact Commission, under 85-2-702(1), MCA, is authorized to negotiate settlement of water rights claims filed by Indian tribes or on their behalf by the United States claiming reserved waters within the State of Montana; and

WHEREAS, the federal district court litigation was stayed in 1983 pending the outcome of Montana State court water adjudication proceedings, see, 721 F.2d 1189; and

WHEREAS, the adjudication of Chippewa Cree tribal water rights in the state court proceedings has been suspended while negotiations are proceeding to conclude a compact resolving all water rights claims of the Chippewa Cree Tribe within the State of Montana; and

WHEREAS, the Chippewa Cree Business Committee, or its duly designated representatives, have authority to negotiate this Compact pursuant to 1(a), of Article VI of the Tribal Constitution; and

WHEREAS, the United States Attorney General, or a duly designated official of the United States Department of Justice, has authority to execute this Compact on behalf of the United States pursuant to the authority to settle litigation contained in 28 U.S.C. Sections 516-17 (1993); and

WHEREAS, the Secretary of the Interior, or a duly designated official of the United States Department of the Interior, has authority to execute this Compact on behalf of the United States Department of the Interior pursuant to 43 U.S.C. Section 1457 (1986), inter alia; and

WHEREAS, the Chippewa Cree Tribe, the State of Montana, and the United States agree that the Tribal Water Right described in this Compact shall be in satisfaction of the Tribe's water rights claims within the State of Montana; and

WHEREAS, it is in the best interest of all parties that the water rights claims of the Chippewa Cree Tribe be settled through agreement between and among the Tribe, the State of Montana, and the United States;

NOW THEREFORE, the parties agree to enter into this Compact for the purpose of settling the water rights claims of the Chippewa Cree Tribe within the State of Montana.

ARTICLE II - DEFINITIONS

The following definitions shall apply for purposes of this Compact:

1. "Acre-foot" or "AF" means the amount of water necessary to cover one acre to a depth of one foot and is equivalent to 43560 cubic feet.

2. "Adverse effect" means an interference with the reasonable exercise of a water right.

3. "Acre feet per year" or "AFY" means the quantity of water to which the Tribe has a right each year measured in acre feet over a period of a year.

4. "Ancestral Missouri River Channel Aquifer" means that material deposited by the Missouri River prior to Pleistocene glaciation, and glacial deposits underlying post-glacial alluvial deposits in the River valley that are sufficiently permeable to conduct groundwater and to yield water to wells. This aquifer is located in the valley of Big Sandy Creek at a depth of 150 feet or more beneath the surface of the ground as shown in Appendix 11 and described in USGS Water Supply Paper 1460-B, Swenson, Frank, "Geology and Ground-Water Resources of the Lower Marias Irrigation Project Montana," (1957).

5. "Beaver Creek Drainage" means Beaver Creek and its tributaries from its headwaters to the confluence with the Milk River, as shown in Appendices 5 and 6.

6. "Big Sandy Creek Basin" means the mainstem of Big Sandy Creek and its tributaries (exclusive of Sage Creek and Lonesome Lake) in Water Court Basin 40H from the headwaters to the confluence with the Milk River, as shown in Appendices 5 and 6.

7. "Board" means the Chippewa Cree - Montana Compact Board established by Section D. of Article IV of this Compact.

8. "Bonneau Reservoir" means the water impoundment as shown in Appendix 6, including the existing storage capacity and the proposed expanded storage capacity, and for which a water right is described in Article III of this Compact.

9. "Box Elder Creek Drainage" means the sub-basin of Big Sandy Creek Basin containing the reach of Box Elder Creek from its headwaters to its confluence with Big Sandy Creek, as shown in Appendix 6.

10. "Brown's Reservoir" means the proposed water impoundment as shown in Appendix 6, including the existing storage capacity and the proposed expanded storage capacity, and for which a water right is described in Article III of this Compact.

11. "Bypass" means the designated streamflow around or through a diversion.

12. "Camp Creek Drainage" means the sub-basin of Big Sandy Creek Basin containing the reach of Camp Creek from its headwaters to its confluence with Duck Creek, as shown in Appendix 6.

13. "Change in use" means a change in the point of diversion, the place of use, the purpose of use, or the place or means of storage.

14. "Consumptive use" means use of water other than a "non-consumptive use" as defined in this Article.

15. "Continuously store" or "continuous storage" means the right to fill and then continually refill the active storage capacity of an impoundment from the natural flow of the source on which the impoundment is located.

16. "DNRC" means the Montana Department of Natural Resources and Conservation, or any successor agency.

17. "Drainage Stipulation" means an agreement entered into between and among the Tribe, the United States acting in its capacity as trustee for the Tribe, and one or more signatory non-tribal water users for entry as a stipulation in Montana Water Court. Drainage stipulations are set forth in Appendix 2.

18. "Drainage of Origin" means the drainage in which the water initially arises. See Appendix 6 showing drainage area boundaries.

19. "Duck Creek Drainage" means the sub-basin of Big Sandy Creek Basin containing the reach of Duck Creek from its headwaters to its confluence with Big Sandy Creek, as shown in Appendix 6.

20. "East Fork Reservoir" means the proposed water impoundment as shown in Appendix 6, including the existing storage capacity and the proposed expanded storage capacity, and for which a water right is described in Article III of this Compact.

21. "Evaporative Loss" means reduction in the quantity of water due to the process of evaporation and shall be three (3) acre feet per surface acre rounded off as set forth in Article III.

22. "Fish and Wildlife Enhancement" means the use of water to improve existing habitat for fish and wildlife use, protection, conservation or management through physical or operational modifications of impoundments, within the areas designated in Appendix 4.

23. "Gorman Creek Drainage" means the sub-basin of Big Sandy Creek Basin containing the reach of Gorman Creek from its headwaters to its confluence with Big Sandy Creek, as shown in Appendix 6.

24. "Gravel Coulee Drainage" means the sub-basin of Big Sandy Creek Basin containing the reach of Gravel Coulee from its headwaters to its confluence with Big Sandy Creek, as shown in Appendix 6.

25. "Groundwater" means any water that is beneath the ground surface.

26. "Hydrologically Connected" means the interconnection of groundwater and surface water such that they constitute one water supply and use of either results in an impact to both.

27. "Lake Elwell" means the water impounded on the Marias River by Tiber Dam.

28. "Lonesome Lake Coulee" means the mainstem of Lonesome Lake Coulee and its tributaries in Water Court Basin 40H from its headwaters to its confluence with Big Sandy Creek, as shown in Appendices 5 & 6.

29. "Lower Big Sandy Creek Drainage" means the sub-basin of Big Sandy Creek Basin containing the reach of Big Sandy Creek below its confluence with Box Elder Creek as shown in Appendix 6.

30. "Minimum Pool" means the quantity of water in an impoundment, as measured in acre-feet, or by the water surface elevation in feet above sea level, that is not available for release for designated water uses.

31. "MR&I Water" means water for use for municipal, rural, industrial, domestic, and incidental drought relief purposes on the Reservation.

32. "Municipal/Domestic Uses" means water for domestic, public, commercial and industrial uses.

33. "Net Depletion" means the difference between the quantity of water diverted from a source and the quantity of water returned to the same source at or near the point of diversion.

34. "New reserved water rights" means any reserved water rights created with acquisition of land by the Tribe or the United States to be held in trust by the United States for the Tribe, after the date of ratification of this Compact by the State and the Tribe, whichever is later.

35. "Non-consumptive use" means a use of water that does not cause a reduction in the source of supply and in which substantially all of the water returns without delay to the source of supply, causing little or no disruption in stream or groundwater conditions.

36. "Non-Irrigation Water Uses" means the use of water for purposes other than the production of agricultural commodities, such as, but not limited to domestic, livestock, fish and wildlife, and recreational uses, including development of golf courses.

37. "Parties" means the Tribe, the State of Montana, and the United States.

38. "Person" means an individual or any other entity, public or private, including the State, the Tribe and the government of the United States and all officers, agents, and departments thereof.

39. "Ratification date" means the date on which the Compact is finally approved by the Business Committee of the Chippewa Cree Tribe, by the Montana Legislature, and by the Congress of the United States, whichever date is latest.

40. "Recognized under state law" when referring to a water right means a water right arising under state law, but does not include water rights arising under federal law.

41. "Release" means (verb) to discharge water from storage, or (noun) the discharge of water from storage.

42. "Reservation" means the Rocky Boy's Reservation and includes all lands and interests in lands which are held in trust by the United States for the Chippewa Cree Tribe, including future additions to the Reservation.

43. "Sage Creek" means the main stem of Sage Creek and its tributaries in Water Court Basin 40G from the headwaters to the confluence with Big Sandy Creek, as shown in Appendices 5 and 6.

44. "Secretary" means the Secretary of the United States Department of the Interior, or his or her duly authorized representative.

45. "Shallow Alluvium Aquifer" means the material deposited by flowing water generally during, or after Pleistocene glaciation that is sufficiently permeable to conduct groundwater and to yield water to wells and springs.

46. "State" means the state of Montana and all officers, agents, departments, and political subdivisions thereof.

47. "Stockwatering" means the storage and use of water for the purpose of providing water to domesticated animals and wildlife.

48. "Stoneman Farms" means the tribal agricultural projects shown in Appendix 6.

49. "Stoneman Reservoir" means the water impoundment, as shown in Appendix 6, including the existing storage capacity and the proposed expanded storage capacity, and for which a water right is described in Article III of this Compact.

50. "Subordinate" means to rank the priority in which a water right is fulfilled behind other specified water rights without regard to relative priority dates.

51. "Supplemental Irrigation Water" means water used for irrigation, as a secondary supply, once it becomes apparent that the primary supply will be unable to meet the full annual demand.

52. "Surface Acres" means the horizontal area in acres associated with the water surface in an impoundment when filled to the maximum capacity.

53. "Transfer" means (verb) to authorize a person to use all or any part of the Tribal Water Right through a service contract, lease, or other similar agreement of limited duration; (noun) a service contract, lease, or other similar agreement of limited duration authorizing the use of all or any part of the Tribal Water Right.

54. "Tribal Water Resources Department" or "TWRD" means the Chippewa Cree Tribal Water Resources Department, or any successor agency.

55. "Tribal Water Right" means the right of the Chippewa Cree Tribe of the Rocky Boy's Reservation to divert, use, or store water as described by Article III of this Compact.

56. "Tribe" means the Chippewa Cree Tribe of the Rocky Boy's Reservation and all officers, agents and departments thereof.

57. "United States" means the federal government and all officers, agencies, departments, and political subdivisions thereof.

58. "Upper Big Sandy Creek Drainage" means the sub-basin of Big Sandy Creek Basin containing the reach of Big Sandy Creek from its headwaters to its confluence with Box Elder Creek, as shown in Appendix 6.

59. "Volcanic Bedrock Aquifer" means those Tertiary igneous rock units that are sufficiently permeable to conduct groundwater and to yield water to wells and springs as shown in USGS Miscellaneous Geologic Investigations Map I-234, "Preliminary General Geologic Map of the Laredo Quadrangle, Bearpaw Mountains, Montana," and Map I-235, "Preliminary Geologic Map of the Centennial Mountain Quadrangle, Bearpaw Mountains, Montana," and shown as surface outcrop in Appendix 11.

ARTICLE III - TRIBAL WATER RIGHT

A. Basin 40H: Big Sandy Creek Basin.

1. Gravel Coulee/Lower Big Sandy Creek Drainages - 1690 AFY diversion - 1000 AF continuous storage.

a. Quantification - Source - Volume.

(1) Storage. The Tribe shall have the right to continuously store or permit the continuous storage of up to a capacity of 1000 AF of water in Stoneman Dam and Reservoir from the natural flow of Gravel Coulee. Subject to the 1000 AF limit on storage capacity, the Tribe shall have the additional right to divert up to 1480 AFY from the direct flow of Lower Big Sandy Creek and up to 445 AFY from groundwater for storage in Stoneman Dam and Reservoir as set forth in Section A.1.a.(2) of Article III. The quantity impounded by continuous storage shall not decrease the 1480 AFY which the Tribe may divert for the purposes allowed in Section A.1.e. of Article III. In addition to the storage right set forth in this section, the Tribe shall have the right to

store water for stockwatering and fish and wildlife purposes, as set forth in Sections A.1.e.(3) and (4) of Article III.

(2) Diversion. The Tribe shall have the right to divert or use or permit the diversion or use of 1690 AFY of water from the following sources where they occur on the Reservation in any combination up to the limits on each source and the total limit of 1690 AFY:

(a) Direct Flow. The Tribe shall have the right to divert or use or permit the diversion or use of up to 1690 AFY from the direct flow of Gravel Coulee and Lower Big Sandy Creek and its tributaries. 1480 AFY of the water from direct flow may be diverted to storage prior to application to any purposes allowed in Section A.1.e. of Article III without reducing the amount that can be applied to such purposes until such water is re-diverted from storage and applied to such purposes.

(b) Storage. Of the 1690 AFY, the Tribe shall have the right to divert 1480 AFY from storage in Stoneman Reservoir for irrigation and non-irrigation purposes as more specifically provided in Sections A.1.e.(1) and (2) of Article III; provided that, the right to divert 1480 AFY from Lower Big Sandy Creek to storage is not reduced by the amount of water diverted for irrigation or non-irrigation purposes from water derived from storage.

(c) Groundwater. Of the 1690 AFY, the Tribe shall have the right to withdraw and use or permit the withdrawal and use of up to 445 AFY of groundwater in the Gravel Coulee and Lower Big Sandy Creek drainages in compliance with Sections A.6.a. and b. of Article IV. Groundwater may be diverted to storage prior to application to any purposes allowed in Section A.1.e. of Article III without reducing the amount that can be applied to such purposes until such water is re-diverted from storage and applied to such purposes.

(i) Of the 445 AFY, 100 AFY may be appropriated from the shallow alluvium along Gravel Coulee and Lower Big Sandy Creek.

(ii) Of the 445 AFY, 345 AFY may be appropriated from the Ancestral Missouri River Channel Aquifer in the Gravel Coulee and Lower Big Sandy Creek drainages. Groundwater from the Ancestral Missouri River Channel Aquifer is a primary source for non-irrigation uses; provided that, the non-irrigation uses do not result in discharge of untreated water to land or surface water. Groundwater from the Ancestral Missouri River Channel Aquifer is a supplemental source for irrigation uses.

b. Priority Date. The water rights to surface flow, groundwater, and storage as set forth in Section A.1. of Article III, for the Gravel Coulee and Lower Big Sandy drainages shall have a priority date of September 7, 1916, subject to the subordination agreements set forth in Section A.8. of Article IV, and the drainage stipulations set forth in Appendix 2.

c. Period of Use. The period of use of this water right shall be from January 1 through December 31 of each year.

d. Points and means of diversion. Subject to the terms and conditions set forth in Article IV, the Tribe may divert or permit the diversion of this water right from any place and by any means on Lower Big Sandy Creek and Gravel Coulee drainages on the Reservation.

e. Purposes. The Tribe's right to 1690 AFY from the Gravel Coulee and Lower Big Sandy drainages may be used for the following purposes; provided that, subject to the limitations set forth in Article IV, the Tribe may make a change in use or transfer of the water identified for irrigation and non-irrigation purposes.

(1) Irrigation.

(a) Volume. 1380 AFY of water in Gravel Coulee and Lower Big Sandy Creek drainages may be used for irrigation.

(b) Source. The 1380 AFY for irrigation may come from a combination of direct flow, storage and groundwater in the Gravel Coulee and Lower Big Sandy drainages.

(c) Place of use. The 1380 AFY may be used to irrigate 540 acres at Stoneman Farms on the Reservation.

(2) Non-Irrigation.

(a) Volume. 100 AFY of water in Gravel Coulee and Lower Big Sandy Creek drainages may be used for non-irrigation purposes.

(b) Source. The 100 AFY for non-irrigation purposes may come from a combination of direct flow, storage, and groundwater in the Gravel Coulee and Lower Big Sandy drainages.

(c) Point of diversion. The 100 AFY for non-irrigation purposes may be diverted on the Reservation within the Lower Big Sandy and Gravel Coulee drainages.

(3) Stockwatering - Evaporative Loss. Use of the Tribal Water Right for stockwatering in Gravel Coulee and Lower Big Sandy Creek drainages is a consumptive use. The Tribe may not make a change in use or transfer of the water right for stockwatering; provided that, the Tribe may repair or relocate an impoundment for stockwatering within the drainage of origin; and provided further that, the new point of diversion or place of use does not change to a place from upstream of to downstream of, or from downstream of to upstream of the location of the point of diversion of a water right recognized under state law with a priority date before the date the Compact is ratified by the State and the Tribe, whichever date is later.

(a) Volume. 160 AFY of water in Gravel Coulee and Lower Big Sandy Creek drainages may be used for stockwatering as a consumptive use measured by evaporative loss; provided that, the total surface acreage of impoundments shall not exceed 40 surface acres of impoundments on Lower Big Sandy drainage and 13 surface acres of impoundments on Gravel Coulee drainage. The Tribe shall have the right to continuously store water in these impoundments.

(b) Source.

i. Of the 160 AFY, 120 AFY for stockwatering may come from the direct flow of Lower Big Sandy Creek.

ii. Of the 160 AFY, 40 AFY for stockwatering may come from the direct flow of Gravel Coulee.

iii. Water for stockwatering may not be diverted from a perennial stream for off-stream storage other than for a lined storage facility with a capacity of less than 0.5 AF.

(c) Place of use. The Tribal Water Right for stockwatering in the Gravel Coulee and Lower Big Sandy Creek drainages may be used in the drainage of origin, on the Reservation. The current stockwater impoundments are shown in Appendix 7.

(4) Fish and Wildlife Enhancement - Evaporative Loss. Use of the Tribal Water Right for fish and wildlife enhancement in Gravel Coulee and Lower Big Sandy Creek drainages is a consumptive use. The Tribe may not make a change in use or transfer of the Tribal Water Right for fish and wildlife enhancement; provided that, the Tribe may repair or relocate an impoundment for fish and wildlife enhancement within the drainage of origin; and provided further that, the new point of diversion or place of use does not change to a place from upstream of to downstream of, or from downstream of to upstream of the location of the point of diversion of a water right recognized under state law with a priority date before the date the Compact is ratified by the State and the Tribe, whichever date is later.

(a) Volume. 50 AFY of water may be used for fish and wildlife enhancement as a consumptive use measured by evaporative loss; provided that, the total surface acreage of impoundments shall not exceed 16 surface acres of impoundments in the Gravel Coulee and Lower Big Sandy Creek drainages. The Tribe shall have the right to continuously store water in these impoundments.

(b) Source. The 50 AFY for fish and wildlife enhancement may come from the direct flow of Gravel Coulee and Big Sandy Creek.

(c) Place of use. The Tribal Water Right for fish and wildlife enhancement may be used in the areas shown in Appendix 4 in the Gravel Coulee and Big Sandy Creek drainages, in the respective drainages of origin.

2. Box Elder Creek Drainage - 6940 AFY diversion - 4800 AF continuous storage.

a. Quantification - Source - Volume.

(1) Storage. The Tribe shall have the right to continuously store, or permit the continuous storage in Bonneau Reservoir, Brown's Reservoir, and in any new impoundments, of up to a capacity of 4800 AF from the natural flow of Box Elder Creek, or any natural flow from the source on which the impoundment is located. Subject to the 4800 AF limit on storage capacity, the Tribe shall have the additional right to divert up to 6310 AFY from the direct flow of Box Elder Creek for storage in Brown's Reservoir and in any new impoundments not located on Box Elder Creek and to divert 1950 AFY from groundwater for storage in any new or existing impoundment wherever located, as set forth in Section A.2.a.(2) of Article III. The quantity impounded by continuous storage shall not decrease the 6310 AFY, which the Tribe may divert for the purposes allowed in Section A.2.e. of Article III. In addition to the storage right set forth

in this section, the Tribe shall have the right to store water for stockwatering and fish and wildlife enhancement purposes as set forth in Sections A.2.e.(4) and (5) of Article III.

(2) Diversion. The Tribe shall have the right to use or permit the use of 6940 AFY of water from the following sources where they occur on the Reservation in any combination up to the limits on each source and the total limit of 6940 AFY:

(a) Direct Flow. Of the 6940 AFY, the Tribe shall have the right to divert or use or permit the diversion or use of up to 6590 AFY from Box Elder Creek and its tributaries. 6310 AFY of the water from direct flow may be diverted to storage prior to application to any purposes allowed in Section A.2.e. of Article III without reducing the amount that can be applied to such purposes until such water is re-diverted from storage and applied to such purposes.

(b) Storage. Of the 6940 AFY, the Tribe shall have the right to divert a total of 6310 AFY from storage in one or more of the following reservoirs: Bonneau Reservoir, Brown's Reservoir, and any new impoundments for irrigation and non-irrigation purposes. The right to divert 6310 AFY from Box Elder Creek to storage is not reduced by the amount of water diverted for irrigation or non-irrigation purposes from water derived from storage.

(c) Groundwater. Of the 6940 AFY, the Tribe shall have the right to withdraw and use or to permit the withdrawal and use of up to 1950 AFY of groundwater in the Box Elder Creek drainage in compliance with Sections A.6.a. and b. of Article IV. Groundwater may be diverted to storage prior to application to any purposes allowed in Section A.2.e. of Article III without reducing the amount that can be applied to such purposes until such water is re-diverted from storage and applied to such purposes.

(i) Of the 1950 AFY, 180 AFY may be appropriated from the shallow alluvium in the Box Elder Creek drainage.

(ii) Of the 1950 AFY, 230 AFY may be appropriated from the volcanic bedrock in the Box Elder Creek drainage.

(iii) Of the 1950 AFY, 1570 AFY may be appropriated from the Ancestral Missouri River Channel Aquifer; provided that, should water be imported to the Reservation, the entire 1950 AFY may be appropriated from the Ancestral Missouri River Channel Aquifer. Water from the Ancestral Missouri River Channel Aquifer is a primary source for non-irrigation uses; provided that, the non-irrigation uses do not result in discharge of untreated water to land or surface water. Groundwater from the Ancestral Missouri River Channel Aquifer is a supplemental source for irrigation uses.

b. Priority Date. The water rights to surface flow, groundwater, and storage, as set forth in Section A.2. of Article III, for the Box Elder Creek drainage, including water supplied by Box Elder Creek for off-stream storage, shall have a priority date of September 10, 1888, subject to the subordination agreements set forth in Section A.8. of Article IV, and the drainage stipulations set forth in Appendix 2.

c. Period of use. The period of use of this water right shall be from January 1 through December 31 of each year.

d. Points and Means of diversion. Subject to the terms and conditions set forth in Article IV, the Tribe may divert or permit the diversion of this water right from any place and by any means in the Box Elder Creek drainage on the Reservation.

e. Purposes. The Tribe's right to 6940 AFY in the Box Elder Creek drainage may be used for the following purposes; provided that, subject to the limitations set forth in Article IV, the Tribe may make a change in use or transfer of the water identified for irrigation, non-irrigation and municipal/domestic purposes.

(1) Irrigation.

(a) Volume. 6280 AFY of water in the Box Elder Creek drainage may be used for irrigation.

(b) Source. The 6280 AFY for irrigation may come from a combination of direct flow, storage and groundwater. Water from the Ancestral Missouri River Channel Aquifer is a primary source for non-irrigation uses; provided that, the non-irrigation uses do not result in discharge of untreated water to land or surface water. Groundwater from the Ancestral Missouri River Channel Aquifer is a supplemental source for irrigation uses.

(c) Place of use. The 6280 AFY may be used to irrigate 1930 acres at the Stoneman Farms on the Reservation.

(2) Non-Irrigation.

(a) Volume. 30 AFY of water in the Box Elder Creek drainage may be used for non-irrigation purposes.

(b) Source. The 30 AFY for non-irrigation purposes may come from direct flow, storage, or groundwater or a combination thereof in the Box Elder Creek drainage. The 30 AFY for non-irrigation use may be developed from either the shallow alluvium or volcanic bedrock aquifers.

(3) Municipal / Domestic.

(a) Volume. 350 AFY of water in the Box Elder Creek drainage may be used for municipal/ domestic purposes.

(b) Source. The 350 AFY for municipal/domestic purposes may come from the following sources:

i. 150 AFY from the shallow alluvium adjacent to Box Elder Creek.

ii. 200 AFY from the volcanic bedrock.

(4) Stockwatering - Evaporative Loss. Use of the Tribal Water Right set forth for stockwatering in the Box Elder Creek drainage is a consumptive use. The Tribe may not make a change in use or transfer of the water right for stockwatering; provided that, the Tribe may repair or relocate an impoundment for stockwatering within the drainage of origin; and provided further that, the new point of diversion or place of use does not change to a place from upstream of to downstream of, or from downstream of to upstream of the location of the point of diversion of a water right recognized under state law with a priority date before the date the Compact is ratified by the State and the Tribe, whichever date is later.

(a) Volume. 130 AFY of water may be used for stockwatering as a consumptive use measured by evaporative loss; provided that, the total surface acreage of impoundments shall not exceed 44 surface acres of impoundments in Box Elder Creek drainage. The Tribe shall have the right to continuously store water in these impoundments.

(b) Source. The 130 AFY for stockwatering may come from the direct flow of Box Elder Creek. Water for stockwatering may not be diverted from a perennial stream for off-stream storage other than for a lined storage facility with a capacity of less than 0.5 AF.

(c) Place of use. The Tribal Water Right for stockwatering in the Box Elder Creek drainage may be used in the drainage of origin, on the Reservation. The current stockwater impoundments are shown in Appendix 7.

(5) Fish and Wildlife Enhancement - Evaporative Loss. Use of the Tribal Water Right for fish and wildlife enhancement in the Box Elder Creek drainage is a consumptive use. The Tribe may not make a change in use or transfer of the Tribal Water Right for fish and wildlife enhancement; provided that, the Tribe may repair or relocate an impoundment for fish and wildlife enhancement within the drainage of origin; and provided further that, the new point of diversion or place of use does not change to a place from upstream of to downstream of, or from downstream of to upstream of the location of the point of diversion of a water right recognized under state law with a priority date before the date the Compact is ratified by the State and the Tribe, whichever date is later.

(a) Volume. 150 AFY of water may be used for fish and wildlife enhancement as a consumptive use measured by evaporative loss; provided that, the total surface acreage of impoundments shall not exceed 50 surface acres of impoundments in Box Elder Creek drainage. The Tribe shall have the right to continuously store water in these impoundments.

(b) Source. The 150 AFY for fish and wildlife enhancement may come from the direct flow of Box Elder Creek and its tributaries.

(c) Place of use. The Tribal Water Right for fish and wildlife enhancement may be used in the areas shown in Appendix 4 in the Box Elder Creek drainage, in the drainage of origin.

3. Camp Creek and Duck Creek Drainages - 280 AFY diversion.

a. Quantification - Source, Volume. The Tribe shall have the right to use or permit the use of 280 AFY of water from the following sources where they occur on the Reservation in any combination up to the limits on each source and the total limit of 280 AFY:

(1) Direct Flow. Of the 280 AFY, the Tribe shall have the right to divert or use or permit the diversion or use of up to 230 AFY from Duck and Camp Creeks and their respective tributaries in the following proportions:

(a) 170 AFY from Duck Creek.

(b) 60 AFY from Camp Creek.

(2) Storage. The Tribe shall have the right to store water for stockwatering and fish and wildlife enhancement purposes as set forth in Sections A.3.e.(2) and (3) of Article III.

(3) Groundwater. Of the 280 AFY, the Tribe shall have the right to withdraw and use or permit the withdrawal and use of up to 50 AFY of groundwater in the Camp and Duck Creek drainages on the Reservation, including groundwater that is hydrologically connected to surface water, in compliance with Sections A.6.a. and b. of Article IV. This right shall be exercised in the following proportions:

(a) 40 AFY from Duck Creek.

(b) 10 AFY from Camp Creek.

b. Priority Date. The water rights to surface flow, groundwater, and storage, as set forth in Section A.3. of Article III, for the Camp and Duck Creek drainages shall have a priority date of September 7, 1916, subject to the subordination agreements set forth in Section A.8. of Article IV, and the drainage stipulations set forth in Appendix 2.

c. Period of Use. The period of use of this water right shall be from January 1 through December 31 of each year.

d. Points and means of diversion. Subject to the terms and conditions set forth in Article IV, the Tribe may divert or permit the diversion of this water right from any place and by any means in the Camp Creek and Duck Creek drainages on the Reservation.

e. Purposes. The Tribe's right to 280 AFY in the Camp and Duck Creek drainages may be used for the following purposes; provided that, the Tribe may not make a change in use or transfer that results in a change in the place of use, point of diversion or place or means of storage to a place outside the drainage of origin or to a place from upstream of to downstream of, or from downstream of to upstream of the location of the point of diversion of a water right recognized under state law with a priority date before the date the Compact is ratified by the State and the Tribe, whichever date is later.

(1) Non-Irrigation.

(a) Volume. 50 AFY of water in the Camp and Duck Creek drainages may be used for non-irrigation purposes.

(b) Source. The 50 AFY for non-irrigation purposes may come from groundwater including groundwater that is hydrologically connected to surface water in the Camp and Duck Creek drainages.

(c) Place of use. The Tribal Water Right for non-irrigation purposes in Camp and Duck Creek drainages may be used in the drainage of origin on the Reservation.

(2) Stockwatering - Evaporative Loss. Use of the Tribal Water Right for stockwatering in Camp and Duck Creek drainages is a consumptive use. The Tribe may not make a change in use or transfer of the water right for stockwatering; provided that, the Tribe may repair or relocate an impoundment for stockwatering within the drainage of origin; and provided further that, the new point of diversion or place of use does not change to a place from upstream of to downstream of, or from downstream of to upstream of the location of the point of diversion of a water right recognized under state law with a priority date before the date the Compact is ratified by the State and the Tribe, whichever date is later.

(a) Volume. 130 AFY of water may be used for stockwatering as a consumptive use measured by evaporative loss; provided that, the total surface acreage of impoundments shall not exceed 19 surface acres of impoundments in the Camp Creek drainage and 23 surface acres of impoundments on Duck Creek drainage. The Tribe shall have the right to continuously store water in these impoundments.

(b) Source.

i. Of the 130 AFY, 60 AFY for stockwatering may come from the direct flow of Camp Creek.

ii. Of the 130 AFY, 70 AFY for stockwatering may come from the direct flow of Duck Creek.

iii. Water for stockwatering may not be diverted from a perennial stream for off-stream storage other than for a lined storage facility with a capacity of less than 0.5 AF.

(c) Place of use. The Tribal Water Right for stockwatering in the Camp and Duck Creek drainages may be used in the drainage of origin on the Reservation. The current stockwater impoundments are shown in Appendix 7.

(3) Fish and Wildlife Enhancement - Evaporative Loss. Use of the Tribal Water Right for fish and wildlife enhancement in the Camp and Duck Creek drainages is a consumptive use. The Tribe may not make a change in use or transfer of the Tribal Water Right for fish and wildlife enhancement; provided that, the Tribe may repair or relocate an impoundment for fish and wildlife enhancement within the drainage of origin; and provided further that, the new point of diversion or place of use does not change to a place from upstream of to downstream of, or from downstream of to upstream of the location of the point of diversion of a water right recognized under state law with a priority date before the date the Compact is ratified by the State and the Tribe, whichever date is later.

(a) Volume. 100 AFY of water may be used for fish and wildlife enhancement as a consumptive use measured by evaporative loss; provided that, the total surface acreage of impoundments shall not exceed 34 surface acres of impoundments in the Camp and Duck Creek drainages. The Tribe shall have the right to continuously store water in these impoundments.

(b) Source. The 100 AFY for fish and wildlife enhancement may come from the direct flow of Camp and Duck Creeks.

(c) Place of use. The Tribal Water Right for fish and wildlife enhancement may be used in the areas shown in Appendix 4 in the Camp and Duck Creek drainages, in the drainage of origin.

4. Gorman Creek Drainage - 60 AFY diversion.

a. Quantification - Source, Volume. The Tribe shall have the right to use or permit the use of 60 AFY of water from the following sources where they occur on the Reservation in any combination up to the limits on each source and the total limit of 60 AFY.

(1) Direct Flow. Of the 60 AFY, the Tribe shall have the right to divert or use or permit the diversion or use of up to 60 AFY from Gorman Creek and its tributaries.

(2) Storage. The Tribe shall have the right to store water for stockwatering and fish and wildlife enhancement purposes as set forth in Sections A.4.e.(1) and (2) of Article III.

b. Priority Date. The water rights to surface flow, groundwater, and storage, as set forth in Section A.4. of Article III, for the Gorman Creek drainage shall have a priority date of September 7, 1916, subject to the subordination agreements set forth in Section A.8. of Article IV, and the drainage stipulations set forth in Appendix 2.

c. Period of use. The period of use of this water right shall be from January 1 through December 31 of each year.

d. Points and means of diversion. Subject to the terms and conditions set forth in Article IV, the Tribe may divert or permit the diversion of this water right from any place and by any means in the Gorman Creek drainage on the Reservation.

e. Purposes. The Tribe's right to 60 AFY in the Gorman Creek drainage may be used for the following purposes; provided that, the Tribe may not make a change in use or transfer that results in a change in the place of use, point of diversion or place or means of storage to a place outside the drainage of origin or to a place from upstream of to downstream of, or from downstream of to upstream of the location of the point of diversion of a water right recognized under state law with a priority date before the date the Compact is ratified by the State and the Tribe, whichever date is later.

(1) Stockwatering - Evaporative Loss. Use of the Tribal Water Right for stockwatering in Gorman Creek drainage is a consumptive use. The Tribe may not make a change in use or transfer of the water right for stockwatering; provided that, the Tribe may repair or relocate an impoundment for stockwatering within the drainage of origin; and provided further that, the new point of diversion or place of use does not change to a place from upstream of to downstream of, or from downstream of to upstream of the location of the point of diversion of a water right recognized under state law with a priority date before the date the Compact is ratified by the State and the Tribe, whichever date is later.

(a) Volume. 10 AFY of water in the Gorman Creek drainage may be used for stockwatering as a consumptive use measured by evaporative loss; provided that, the total surface acreage of impoundments shall not exceed 3 surface acres of impoundments in the Gorman Creek drainage. The Tribe shall have the right to continuously store water in these impoundments.

(b) Source. The 10 AFY for stockwatering may come from the direct flow of Gorman Creek. Water for stockwatering may not be diverted from a perennial stream for off-stream storage other than for a lined storage facility with a capacity of less than 0.5 AF.

(c) Place of use. The Tribal Water Right for stockwatering in the Gorman Creek drainage may be used in the drainage of origin, on the Reservation. The current stockwater impoundments are shown in Appendix 7.

(2) Fish and Wildlife Enhancement - Evaporative Loss. Use of the Tribal Water Right for fish and wildlife enhancement in the Gorman Creek drainage is a consumptive use. The Tribe may not make a change in use or transfer of the Tribal Water Right for fish and wildlife enhancement; provided that, the Tribe may repair or relocate an impoundment for fish and wildlife enhancement within the drainage of origin; and provided further that, the new point of diversion or place of use does not change to a place from upstream of to downstream of, or from downstream of to upstream of the location of the point of diversion of a water right recognized under state law with a priority date before the date the Compact is ratified by the State and the Tribe, whichever date is later.

(a) Volume. 50 AFY of water may be used for fish and wildlife enhancement as a consumptive use measured by evaporative loss; provided that, the total surface acreage of impoundments shall not exceed 17 surface acres of impoundments in the Gorman Creek drainage. The Tribe shall have the right to continuously store water in these impoundments.

(b) Source. The 50 AFY for fish and wildlife enhancement may come from the direct flow of Gorman Creek.

(c) Place of use. The Tribal Water Right for fish and wildlife enhancement may be used in the areas shown in Appendix 4 in the Gorman Creek drainage, in the drainage of origin.

5. Upper Big Sandy Creek Drainage - 290 AFY diversion.

a. Quantification - Source, Volume. The Tribe shall have the right to use or permit the use of 290 AFY of water from the following sources where they occur on the Reservation in any combination up to the limits on each source and the total limit of 290 AFY.

(1) Direct Flow. Of the 290 AFY, the Tribe shall have the right to divert or use or permit the diversion or use of up to 240 AFY from the direct flow of Upper Big Sandy Creek and its tributaries;

(2) Storage. The Tribe shall have the right to store water for stockwatering and fish and wildlife enhancement purposes as set forth in Sections A.5.e.(3) and (4) of Article III.

(3) Groundwater. Of the 290 AFY, the Tribe shall have the right to withdraw and use or permit the withdrawal and use of up to 50 AFY of groundwater in the Upper Big Sandy Creek drainage including groundwater that is hydrologically connected to surface water, in compliance with Section A.6.a. and b. of Article IV.

b. Priority Date. The water rights to surface flow, groundwater, and storage, as set forth in Section A.5. of Article III, for the Upper Big Sandy Creek drainage shall have a priority date of September 7, 1916, subject to the subordination agreements set forth in Section A.8. of Article IV, and the drainage stipulations set forth in Appendix 2.

c. Period of use. The period of use of this water right shall be from January 1 through December 31 of each year.

d. Points and means of diversion. The Tribe may divert or permit the diversion of this water right from any place and by any means in the Upper Big Sandy Creek drainage on the Reservation; provided that, the Tribe may not construct or permit the construction of a diversion or diversions with a total capacity in excess of 100 gpm for the irrigation water right with a source on Upper Big Sandy Creek Drainage. This diversion limit also applies to any change(s) of use of this right.

e. Purposes. The Tribe's right to 290 AFY in the Upper Big Sandy Creek drainage may be used for the following purposes; provided that, the Tribe may not make a change in use or transfer that results in a change in the place of use, point of diversion or place or means of storage to a place outside the drainage of origin, or to a place upstream of to downstream of, or from downstream of to upstream of the location of the point of diversion of a water right recognized under state law with a priority date before the date the Compact is ratified by the State and the Tribe, whichever date is later.

(1) Non-Irrigation.

(a) Volume. 50 AFY of water in the Upper Big Sandy Creek drainage may be used for non-irrigation purposes.

(b) Source. The 50 AFY for non-irrigation purposes may come from groundwater, including groundwater that is hydrologically connected to surface water, in the Upper Big Sandy Creek drainage on the Reservation.

(c) Place of use. The 50 AFY for non-irrigation purposes may be used on the Reservation within the drainage of origin.

(2) Irrigation.

(a) Volume. 45 AFY of water in the Upper Big Sandy Creek drainage may be used for irrigation.

(b) Source. The 45 AFY for irrigation may come from direct flow of Upper Big Sandy Creek on the Reservation.

(c) Place of use. The 45 AFY may be used to irrigate 10 acres in the drainage of origin, on the Reservation.

(3) Stockwatering - Evaporative Loss. Use of the Tribal Water Right for stockwatering in Upper Big Sandy Creek drainage is a consumptive use. The Tribe may not make a change in use or transfer of the water right for stockwatering; provided that, the Tribe may repair or relocate an impoundment for stockwatering within the drainage of origin; and provided further that, the new point of diversion or place of use does not change to a place from upstream of to downstream of, or from downstream of to upstream of the location of the point of diversion of a water right recognized under state law with a priority date before the date the Compact is ratified by the State and the Tribe, whichever date is later.

(a) Volume. 45 AFY of water in the Upper Big Sandy Creek drainage may be used for stockwatering as a consumptive use measured by evaporative loss; provided that, the total surface acreage of impoundments shall not exceed 15 surface acres of impoundments in the Upper Big Sandy Creek drainage. The Tribe shall have the right to continuously store water in these impoundments.

(b) Source. The 45 AFY for stockwatering may come from the direct flow of Upper Big Sandy Creek. Water for stockwatering may not be diverted from a perennial stream for off-stream storage other than for a lined storage facility with a capacity of less than 0.5 AF.

(c) Place of use. The Tribal Water Right for stockwatering in the Upper Big Sandy Creek drainage may be used in the drainage of origin, on the Reservation. The current stockwater impoundments are shown in Appendix 7.

(4) Fish and Wildlife Enhancement - Evaporative Loss. Use of the Tribal Water Right for fish and wildlife enhancement in Upper Big Sandy Creek drainage is a consumptive use. The Tribe may not make a change in use or transfer of the Tribal Water Right for fish and wildlife enhancement; provided that, the Tribe may repair or relocate an impoundment for fish and wildlife enhancement within the drainage of origin; and provided further that, the new point of diversion or place of use does not change to a place from upstream of to downstream of, or from downstream of to upstream of the location of the point of diversion of a water right recognized under state law with a priority date before the date the Compact is ratified by the State and the Tribe, whichever date is later.

(a) Volume. 150 AFY of water may be used for fish and wildlife enhancement as a consumptive use measured by evaporative loss; provided that, the total surface acreage of impoundments shall not exceed 50 surface acres of impoundments in the Upper Big Sandy drainage. The Tribe shall have the right to continuously store water in these impoundments.

(b) Source. The 150 AFY for fish and wildlife enhancement may come from the direct flow of Upper Big Sandy Creek.

(c) Place of use. The Tribal Water Right for fish and wildlife enhancement may be used in the areas shown in Appendix 4 in the Upper Big Sandy Creek drainage, in the drainage of origin.

B. Basin 40J: Beaver Creek Basin - 740 AFY diversion - 260 AFY net depletion - 665 AF continuous storage.

1. Quantification - Source - Volume.

a. Storage. The Tribe shall have the right to continuously store, or permit the continuous storage in East Fork Reservoir of up to a capacity of 665 AF from the natural flow of the East Fork of Beaver Creek. Subject to the 665 AF limit on storage capacity, the Tribe shall have the additional right to divert up to 390 AFY from the direct flow of the West Fork of Beaver Creek for storage in East Fork Reservoir as set forth in Section B.1.b. of Article III. The quantity impounded by continuous storage of the East Fork of Beaver Creek, shall not decrease the 390 AFY, which the Tribe has a right to divert from storage in East Fork Reservoir for non-irrigation purposes allowed in Section B.5. of Article III; provided that, the limit of 260 AFY on net depletion shall apply. In addition to the storage right set forth in this section, the Tribe shall have the right to store water for stockwatering and fish and wildlife enhancement purposes as set forth in Sections B.5.b. and c. of Article III.

b. Diversion. The Tribe shall have the right to divert 740 AFY of water in the Beaver Creek drainage from a combination of direct flow, storage and groundwater where they occur on the Reservation up to the limits on each source and the total limit of 740 AFY.

(1) Direct Flow. Of the 740 AFY, the Tribe shall have the right to divert or permit the diversion of up to 540 AFY from the direct flow of Beaver Creek and its tributaries on the Reservation. 390 AFY of the water from direct flow may be diverted to storage prior to application to any purposes allowed in Section B.5. of Article III without reducing the amount that can be applied to those purposes until such water is re-diverted from storage and applied to such purposes.

(2) Storage. The Tribe shall have the right to divert 390 AFY for non-irrigation purposes from water stored in East Fork Reservoir. The right to divert 390 AFY from the West Fork of Beaver Creek to storage is not reduced by the amount of water diverted for non-irrigation purposes from water derived from storage.

(3) Groundwater.

(a) Of the 740 AFY, the Tribe shall have the right to withdraw and use or permit the withdrawal and use of up to 120 AFY of groundwater including groundwater that is hydrologically connected to surface water in the Beaver Creek drainage in compliance with Section A.6.a. of Article IV. Groundwater may be diverted to storage prior to application to any purposes allowed in Section B.5. of Article III without reducing the amount that can be applied to these purposes until such water is re-diverted and applied to such purposes.

(b) Of the 740 AFY, the Tribe shall have the right to withdraw and use or permit the withdrawal and use of an additional 200 AFY of groundwater from the volcanic bedrock aquifer and other aquifers that are not hydrologically connected to surface water in the Beaver Creek drainage in compliance with Section A.6.a. of Article IV. The limit of 260 AFY on net depletion set forth in Section B.1.a.(2) of Article III, shall not apply to groundwater use pursuant to this section. Groundwater may be diverted to storage prior to application to any purposes allowed in Section B.5. of Article III without reducing the amount that can be applied to these purposes until such water is re-diverted and applied to such purposes.

c. Net Depletion. Of the 740 AFY diverted, the Tribe shall have a right to a net depletion of 260 AFY in the Beaver Creek drainage. The calculation of net depletion shall not include evaporative loss from fish and wildlife habitat, from stockwatering, or from East Fork Reservoir, and use of groundwater that is not hydrologically connected to surface water.

2. Priority Date. The water rights to surface flow, groundwater, and storage, as set forth in Section B. of Article III, for the Beaver Creek drainage shall have a priority date of September 7, 1916, subject to the subordination agreements set forth in Section A.8. of Article IV, and the drainage stipulations set forth in Appendix 2.

3. Period of use. The period of use of this water right shall be from January 1 through December 31 of each year.

4. Points and means of diversion. Subject to the terms and conditions set forth in Article IV, the Tribe may divert or permit the diversion of this water right from any place and by any means in the Beaver Creek drainage on the Reservation.

5. Purposes. The Tribe's right to water in the Beaver Creek drainage may be used for the following purposes; provided that, subject to the limitations set forth in Article IV, the Tribe may make a change in use or transfer of the water identified for non-irrigation purposes.

a. Non-Irrigation

(1) Volume. 590 AFY of water in the Beaver Creek drainage may be used for non-irrigation purposes; provided that, the net depletion may not exceed 260 acre-feet per year in accordance with Section B.1.c. of Article III.

(2) Source. The 590 AFY for non-irrigation in the Beaver Creek drainage may come from a combination of direct flow, storage and groundwater.

(3) Place of use. The 590 AFY for non-irrigation may be used in the Beaver Creek drainage on the Reservation.

b. Stockwatering - Evaporative Loss. Use of the Tribal Water Right for stockwatering in the Beaver Creek drainage is a consumptive use. The Tribe may not make a change in use or transfer of the water right for stockwatering; provided that, the Tribe may repair or relocate an impoundment for stockwatering within the drainage of origin; and provided further that, the new point of diversion or place of use does not change to a place from upstream of to downstream of, or from downstream of to upstream of the location of the point of diversion of a water right recognized under state law with a priority date before the date the Compact is ratified by the State and the Tribe, whichever date is later.

(1) Volume. 40 AFY of water in the Beaver Creek drainage may be used for stockwatering as a consumptive use measured by evaporative loss; provided that, the total surface acreage of impoundments shall not exceed 13 surface acres of impoundments in the Beaver Creek drainage. The Tribe shall have the right to continuously store water in these impoundments.

(2) Source. The 40 AFY for stockwatering may come from the direct flow of Beaver Creek on the Reservation. Water for stockwatering may not be diverted from a perennial stream for off-stream storage other than for a lined storage facility with a capacity of less than 0.5 AF.

(3) Place of use. The Tribal Water Right for stockwatering in the Beaver Creek drainage may be used in the drainage of origin, on the Reservation. The current stockwater impoundments are shown in Appendix 7.

c. Fish and Wildlife Enhancement - Evaporative Loss. Use of the Tribal Water Right for fish and wildlife enhancement in the Beaver Creek drainage is a consumptive use. The Tribe may not make a change in use or transfer of the Tribal Water Right for fish and wildlife enhancement; provided that, the Tribe may repair or relocate an impoundment for fish and wildlife enhancement within the drainage of origin; and provided further that, the new point of diversion or place of use does not change to a place from upstream of to downstream of, or from downstream of to upstream of the location of the point of diversion of a water right recognized under state law with a priority date before the date the Compact is ratified by the State and the Tribe, whichever date is later.

(1) Volume. 110 AFY of water may be used for fish and wildlife enhancement as a consumptive use measured by evaporative loss; provided that, the total surface acreage of impoundments shall not exceed 35 surface acres of impoundments in the Beaver Creek drainage. The Tribe shall have the right to continuously store water in these impoundments.

(2) Source. The 110 AFY for fish and wildlife enhancement may come from the direct flow of Beaver Creek.

(3) Place of use. The Tribal Water Right for fish and wildlife enhancement may be used in the areas shown in Appendix 4 in the Beaver Creek drainage, in the drainage of origin.

C. Additional Development of Water.

In addition to the water rights specifically set forth in Sections A. and B. of Article III, the Tribe may develop water from the following sources:

1. Subject to Sections A.6.a. and b. and Section A.7.d. of Article IV, the Tribe may, as part of the Tribal Water Right, develop or permit the development of groundwater on the Reservation in addition to the amounts specified in Sections A. and B. of Article III, from new sources or from expanded use of existing sources. The priority date of such new appropriation shall be the date of development, and notwithstanding any other provision of this Compact, may only be used in priority with other water rights.

2. The Tribe may impound or permit the impoundment of surface water for stockwatering purposes in addition to the amounts set forth in Sections A. and B. of Article III; provided that the priority date of the new appropriation shall be the date of development and, notwithstanding any other provision of this Compact, may only be used in priority with other water rights; and further provided that, the maximum capacity of the impoundment or pit is less than 15 AF and the appropriation is less than 30 AFY and is from a source other than a perennial flowing stream. The Tribe may not transfer or make a change in use of the stockwater right obtained pursuant to this section.

3. On the acquisition of land after the Compact is ratified by the State and the Tribe, whichever date is later, the Tribe has the right to the use of any water right acquired as an appurtenance to the land. Such right shall become part of the Tribal Water Right in addition to the amount set forth in Article III of this Compact and shall be subject to the terms of this Compact; provided that, the right shall retain the priority date of the acquired right. The Tribe will notify DNRC of any acquisition of water in the Tribe's annual report and will identify the water right acquired.

4. The Tribe shall be entitled to use any new reserved water rights that may be created with acquisition of land after the Compact is ratified by the State and the Tribe, whichever date is later; provided that, in any drainage with a moratorium on new state permits pursuant to Section A.7.a. of Article IV, the Tribe shall defer exercise of new reserved water rights, if any, until the moratorium is lifted at which time the Tribe has the first right to use the excess water in accordance with Section A.7.b. of Article IV. The priority date of the excess water shall be the date of acquisition of the land.

5. After the ratification date of the Compact, the Tribe shall have the right to acquire off-Reservation water rights separate from acquisition of the land to which such water rights are appurtenant; provided that, water from the Tribal Water Right is not available for economic or other reasons; and provided further that, the rights shall retain the priority date held by the prior owner of the rights. Such rights shall become part of the Tribal Water Right and shall thereby become subject to Sections A.4.b.(1) and (2) of Article IV.

6. As a part of the Tribal Water Right, the Tribe shall be entitled to an allocation of 10,000 AFY of stored water in Lake Elwell, measured at the dam, for use or disposition by the Tribe for any beneficial purpose, either on or off the Reservation, pursuant to the terms of this Compact; provided that, such allocation shall be in accordance with the terms and conditions of any Act of Congress ratifying this Compact. This allocation is subject to the prior reserved water rights, if any, of any other Indian tribe, or of persons holding such reserved water rights through that tribe or through the United States. Any use or disposition of water from Lake Elwell off the Reservation by the Tribe is subject to the specific provisions relating to such use or disposition in any act of Congress ratifying this Compact.

D. Proposed Decree.

For purposes of entry in the Montana Water Court, the proposed decree of the Tribal Water Right set forth in Article III and Section A.8. of Article IV is attached as Appendix 1.

ARTICLE IV - IMPLEMENTATION OF TRIBAL WATER RIGHT

A. General Provisions.

1. Trust Status of Tribal Water Right. The Tribal Water Right shall be held in trust by the United States for the benefit of the Tribe.

2. Tribal Water Right: Administration. Subject to the limitations imposed by this Compact and other federal law, the use of the Tribal Water Right shall be administered by the Tribe through the TWRD both on and off of the Reservation. Disputes, not within the jurisdiction of the Compact Board set forth in D.4. of Article IV, concerning off-Reservation use of the Tribal Water Right which raise issues concerning the application of state or federal law shall be resolved in a court of competent jurisdiction. Those disputes concerning off-Reservation use of the Tribal Water Right which do not raise issues concerning the application of state or federal law will be within the exclusive jurisdiction of the Tribe. Subject to the limitations imposed by this Compact, the Tribe shall have the final and exclusive jurisdiction to resolve all disputes concerning the Tribal Water Right between users of the Tribal Water Right. The TWRD will, among other activities, develop policies and procedures for monitoring water use, diversions,

and maintaining records of water use and development consistent with this Compact. The current and future water use and diversions will be identified by location and quantity. Final storage capacities will be based on project as-built plans, and will store no more than the water right set forth in Article III of this Compact. Administration and enforcement of the Tribal Water Right shall be pursuant to a Tribal water code, which shall be developed and adopted by the Tribe within two (2) years following the ratification date of this Compact pursuant to any requirements set forth in the Constitution of the Chippewa Cree Tribe. Pending the adoption of the Tribal water code, the administration and enforcement of the Tribal Water Right shall be by the Secretary of the Interior.

3. Use.

a. Persons Entitled to Use the Tribal Water Right. The Tribal Water Right may be used by the Tribe, or persons authorized by the Tribe.

b. Effect of Non-Use of Tribal Water Rights. Except as specifically provided herein, state law doctrines relating to the use of water rights, including but not limited to relinquishment, forfeiture or abandonment, do not apply to the Tribal Water Right. Thus, non-use of all or any of the Tribal Water Right described in Article III shall not constitute a relinquishment, forfeiture or abandonment of such rights.

4. Change in Use or Transfer.

a. On-Reservation Changes in Use or Transfer of the Tribal Water Right. Unless otherwise stated in this Compact, the Tribe may make a change in use or transfer of a water right set forth in Article III of this Compact on the Rocky Boy Reservation, including the use of water salvaged through the application of water-saving methods to expand irrigation, provided that:

(1) for each source quantified in Article III, any change in use or transfer shall not result in uses that exceed the water amount quantified for that source;

(2) any change in use or transfer shall not result in an increase in net depletion in the Beaver Creek drainage in excess of the amount specified for that source;

(3) any change in use or transfer shall not have an adverse effect on a water right recognized under state law with a priority date before the date of the change or transfer provided that for change in use or transfer of groundwater, the burden as to adverse effect shall be as set forth in Section A.6. of Article IV; and

(4) any change in use or transfer shall not change the source of the water involved in any such changes.

(5) The Tribe may not make a change in use or transfer of any water rights set forth in Article III for the purposes of stockwatering or fish and wildlife enhancement; provided that, the Tribe may repair or relocate an impoundment for stockwatering or fish and wildlife enhancement within the drainage of origin; and provided further that, the new point of diversion or place of use does not change to a place from upstream of to downstream of, or from downstream of to upstream of the location of the point of diversion of a water right recognized under state law with a priority date before the date the Compact is ratified by the State and the Tribe, whichever date is later.

(6) The Tribe may not make a change in use or transfer any of the water rights set forth in Article III with a source on the drainages of Upper Big Sandy Creek, Camp Creek, Duck Creek and Gorman Creek that results in a change in the place of use, point of diversion or place or means of storage of the water outside the drainage of origin or to a place from upstream of to downstream of, or from downstream of to upstream of the location of the point of diversion of a water right recognized under state law with a priority date before the date the Compact is ratified by the State and the Tribe, whichever date is later.

(7) The Tribe may make a change in use or transfer of the irrigation water right with a source in Upper Big Sandy Creek drainage as set forth in Section A.5.e. of Article III so long as it does so within the diversionary limits set forth in Section A.5.d. of Article III; provided that, the net depletion shall not exceed 30 AFY.

b. Off-Reservation Changes in Use or Transfer of the Tribal Water Right. Except as may be otherwise provided in this Compact, the Tribe, pursuant to federal law, may make or permit a change in use or a transfer of the Tribal Water Right for use off the Reservation; provided that, any transfer shall be for a term of not to exceed 100 years, and may include provisions authorizing renewal for an additional term of not to exceed 100 years; and provided further that, no such transfer shall be a permanent alienation of the water transferred; and provided further that, no transfer or change in place of use shall be made to a location outside the watershed that forms the Missouri River drainage; and provided further that, if the Tribe receives a good faith offer from a third person from outside the Milk River drainage to acquire use of specified Tribal water rights and the Tribe is willing to accept the terms of the offer, the Tribe, before accepting the offer, shall allow water users in the Milk River drainage the opportunity to acquire use of such rights at the same price and on the same terms and conditions as those contained in the offer. Any change in use or transfer of any such water right involving a point of diversion or place of use located off the Reservation shall be considered an off-Reservation use; provided that, any off-Reservation use of Tribal water rights described in this Compact shall not be deemed to convert such rights to rights arising under state law, and nonuse of such rights off the Reservation shall not constitute a relinquishment, forfeiture, or abandonment of the rights; and provided further that, releases or diversions from Lake Elwell for use on the Reservation shall not be considered off-Reservation uses. The Tribe may change the point of diversion or purpose or place of use of the Tribal Water Right back to the Reservation without reduction in the amount of water provided in the Compact.

(1) Applicable Law. No person may initiate an off-Reservation use, change in use, or transfer of a Tribal water right set forth in this Compact without first applying for and receiving authorization for the use, change in use, or transfer pursuant to Montana law in effect at the time of the application. Approval of an application for a use, change in use or transfer off the Reservation by the State shall be conditioned on a valid Tribal permit for such use, change in use or transfer by the Tribe. The applicant shall provide DNRC with proof of a valid Tribal permit prior to initiating the use, change in use, or transfer.

(2) Diversion Facilities. With respect to diversion or transportation facilities located off the Reservation which are to be used in connection with the exercise of a water right set forth in this Compact, the Tribe or persons using such water rights shall apply for all permits, certificates, variances and other authorizations required by state laws regulating, conditioning or permitting the siting, construction, operation, alteration or use of any equipment, device, facility or associated facility proposed to use or transport water. A diversion or use of water in the exercise of such water rights may be made only after all permits, certificates, variances or other authorizations applied for pursuant to this paragraph have been obtained.

(3) Subsequent Federal or State Law. All off-Reservation uses of Tribal water rights set forth in this Compact shall comply with the requirements set forth in Section A.4.b.(1) and (2) of Article IV until such time as the statutory or common law of the United States or the State of Montana establish that off-Reservation uses of Indian water rights may occur without regard to state law.

c. Placement and Size Survey. Placement and size of stockwater impoundments and fish and wildlife enhancement areas shall be surveyed by the TWRD every five (5) years commencing one (1) year after the ratification date of this Compact. The initial survey method shall be through use of data obtained by aerial photography or an acceptable quantitative substitute with accuracy and verification equal to or greater than photography. The method may be modified by agreement between the TWRD and the DNRC. Such modification is pursuant to and shall not be deemed a modification of this Compact. The TWRD shall provide the DNRC with a completed survey for review within six (6) months of initiation of the survey.

d. Net Depletion Table. Net depletion for Tribal water uses in the Beaver Creek drainage and for irrigation uses in the Upper Big Sandy Creek drainage shall be as set forth in the table attached as Appendix 9 to this Compact. The TWRD and the DNRC may jointly agree to modify this initial table. Such modification is pursuant to, and will not be deemed a modification of, this Compact.

5. Reporting requirements.

a. On an annual basis the DNRC shall provide the Tribe and the United States with a listing of all new uses of surface and groundwater for which a permit has been issued by the DNRC in the Big Sandy and Beaver Creek drainages, and of any change in use or transfer of surface water or groundwater approved by the DNRC in the Big Sandy and Beaver Creek drainages since the last report.

b. On an annual basis the TWRD shall provide the State and the United States with a listing of all new development of the water rights described in this Compact, the net depletion in the Beaver Creek drainage, and the net depletion for irrigation in the Upper Big Sandy Creek drainage, and of all changes in use or transfers of the water rights described in this Compact since the last report. The first report by the TWRD following adoption of a Tribal Water Code shall include a listing of existing uses.

c. The TWRD, the DNRC, and the United States may agree to modify the reporting requirements set forth in subsections a. and b. of this section. Such modification is pursuant to, and will not be deemed a modification of, this Compact.

6. Groundwater.

a. New Groundwater Development Without Adverse Effect.

(1) Limits on Additional Development of Groundwater from Sources on the Reservation. After the ratification date of this Compact, the Tribe may develop or permit the development of groundwater; provided that, such development is without an adverse effect on water rights recognized under state law with a priority date before the date of development of the new appropriation.

(2) Prerequisite Administrative Remedy. The following procedure for determining whether new development of groundwater will have an adverse effect on existing groundwater rights recognized under state law shall be followed prior to seeking relief from the Compact Board:

(a) Application for development of a groundwater use on the Reservation shall be made to the TWRD.

(b) The TWRD shall review the application and make a determination of whether the new use will have an adverse effect on existing water rights recognized under state law with a priority date before the application date. Upon request by the TWRD, the DNRC shall provide information on existing state water rights as recorded in the DNRC database to the TWRD.

(c) If the TWRD determines that the new development will have an adverse effect on a water right recognized under state law with a priority date before the application date, the TWRD shall deny the application. If the TWRD determines that the new development will not have an adverse effect on a water right recognized under state law with a priority date before the application date, the TWRD shall forward the application with its determination to the DNRC.

(d) If, based upon the evidence, DNRC agrees with the TWRD's determination, the application will be approved. If, however, based upon the evidence, the DNRC cannot agree with the determination of the TWRD, DNRC shall publish notice, of the application once in a newspaper of general circulation in the area of the source and shall serve notice by first-class mail on any appropriator of water or holder of a permit who, according to the records of the department, has a water right with a priority date before the application date, and may be affected by the proposed development.

(e) DNRC and the TWRD shall attempt to resolve any disagreement on the determination of no adverse effect by the TWRD on a cooperative basis. If the DNRC or a holder of a water right recognized under state law with a priority date before the application date disagree with the determination of no adverse effect, DNRC or the water users may seek relief from the Compact Board.

(f) In any proceeding concerning the effect of new groundwater development on the Reservation either before the TWRD, the DNRC, or before the Compact Board, the following shall apply:

(i) 1 - 150 Feet Wells: For new Tribal groundwater wells completed at a depth beneath the surface of 1 to 150 feet, the Tribe shall bear the burden of showing no adverse effect to groundwater uses recognized under state law with a priority date before the application date.

(ii) 150 Feet or Deeper Wells: For Tribal groundwater wells completed at a depth beneath the surface of 150 feet or deeper, the owner of a water right recognized under state law with a priority date before the application date shall bear the burden of showing any adverse effect to the water right.

b. Groundwater Development Exempt From The Showing Of No Adverse Effect. The following wells are exempt from the requirement of showing no adverse effect:

(1) Existing Tribal wells are exempt from the burden to show no adverse effect. The Tribe may develop existing wells, or replacements therefor, to their full capacity. The primary municipal and domestic wells are listed in Appendix 8. A comprehensive list of existing wells will be kept on file in TWRD offices as per the requirement to list existing uses in Section A.5. of Article IV.

(2) New Tribal groundwater wells producing from the Volcanic Bedrock Aquifer may be developed without a showing of no adverse effect.

c. Ancestral Missouri River Channel Aquifer. Groundwater from the Ancestral Missouri River Channel Aquifer shall be a primary source for non-irrigation uses; provided that, the non-irrigation uses do not result in discharge of untreated water to land or surface water. Groundwater from the Ancestral Missouri River Channel Aquifer is a supplemental source for irrigation uses.

7. Moratorium.

a. New State Permits. With the exceptions listed in subsection (1) of this section, the DNRC shall not process or grant an application for a permit to appropriate water from a source in the Big Sandy Creek Basin (excluding Sage Creek and Lonesome Lake Coulee), and in the Beaver Creek drainage after the date this Compact is ratified by the Montana Legislature and by the Chippewa Cree Business Committee, whichever date is later. This moratorium shall remain in effect for a minimum of 10 years and shall only be lifted pursuant to the procedures set forth in Section A.7.b of Article IV. This moratorium is not intended to apply to applications for change in appropriation under state law.

(1) The moratorium shall not apply to the following appropriations:

(a) an appropriation of groundwater by means of a well or developed spring with a maximum appropriation of 35 gallons per minute or less, not to exceed 10 acre-feet per year unless the appropriation is a combined appropriation from the same source from two or more wells or developed springs exceeding the limitation;

(b) an appropriation of water for use by livestock if the maximum capacity of the impoundment or pit is less than 15 acre-feet and the appropriation is less than 30 acre-feet per year and is from a source other than a perennial flowing stream;

(c) an appropriation of groundwater from any deep aquifer not hydrologically connected to surface water.

(2) Within 120 days following the date the moratorium takes effect, the DNRC shall publish notice of the moratorium once in a newspaper of general circulation in the area of the source and shall serve notice by first-class mail on all appropriators of water or holders of permits who, according to the records of the department, have a water right with a source in the affected drainages.

(3) The moratorium applies only to new permits issued under state law and is not a limit on new development of the Tribal Water Right as set forth in this Compact.

b. Lifting of Moratorium. After 10 years, the Tribe or an individual seeking to appropriate water in the affected drainages may petition the DNRC for removal of the moratorium, or the DNRC may initiate proceedings to lift a moratorium on its own initiative. The DNRC shall comply with the following procedure in making a determination as to whether water is available in excess of the Tribal Water Right and rights recognized under state law. The DNRC and TWRD may agree to modify procedures or provide additional procedures. Such modification is pursuant to and shall not be deemed to be a modification of the Compact.

(1) Proceedings initiated by TWRD.

(a) The TWRD shall have sixty (60) days following the filing of the petition requesting that the moratorium be lifted to provide the DNRC with data supporting its petition to lift the moratorium.

(b) Within sixty (60) days following the receipt of the data supporting TWRD's petition, the DNRC shall determine whether to lift the moratorium, and shall notify the TWRD of its determination and the grounds therefor. The TWRD shall be allowed reasonable access to any data relied upon by the DNRC for its determination.

(c) Within thirty (30) days following a determination by the DNRC not to lift the moratorium, the TWRD may challenge the DNRC's determination in a de novo proceeding before the Compact Board. The moratorium shall continue pending Compact Board proceedings and any appeal

(2) Proceedings initiated by DNRC.

(a) The DNRC may, on request by a water user or on its own initiative, commence proceedings to determine whether to lift a moratorium.

(b) The DNRC shall notify the TWRD of the commencement of proceedings to determine whether to lift the moratorium and shall submit to the TWRD all data in support of the proceedings at the same time or as soon after such data becomes available as practical or shall give the TWRD reasonable access to such data within the same time frame.

(c) The TWRD shall be given sixty (60) days following receipt of the data in support of the proceedings to submit to the DNRC a statement of the Tribe's position concerning the issue along with any supporting data and argument.

(d) The DNRC shall notify the TWRD of its determination and the grounds therefor within sixty (60) days of receipt of the Tribe's statement.

(e) Within thirty (30) days following a determination by the DNRC not to lift the moratorium, the TWRD may challenge the DNRC's determination in a de novo proceeding before the Compact Board. The moratorium shall continue pending Compact Board proceedings and any appeal.

c. Excess Water. If the moratorium is lifted pursuant to the procedure described in A.7.b. of Article IV, the Tribe shall have the first right to use the excess water for the purpose of fulfilling new reserved water rights, if any, on land acquired after the ratification date of this Compact, but before the date the moratorium is lifted. The excess water used by the Tribe shall become part of the Tribal Water Right and the tribe may make a change in use of, or transfer, including storage, of such water pursuant to Section A.4.a. of Article IV.

d. Limit on New Tribal Groundwater Development. In any drainage with a moratorium, new Tribal groundwater development pursuant to Section C.1. of Article III, by a well or developed spring from an aquifer that is hydrologically connected to surface water shall be limited to a maximum appropriation or combined appropriation from two or more wells or developed springs in a single drainage defined by this Compact to 35 gallons per minute or less, not to exceed 10 acre-feet per year.

8. Mutual Subordination. To reduce the need for daily administration of water use on and off the Reservation, water rights shall not be administered in priority, but shall be satisfied according to the following agreements.

a. Subordination to Non-Tribal Water Rights Upstream of the Reservation. The Tribal Water Right shall be subordinate to water rights recognized under state law upstream from any point on the Reservation with a priority date before the ratification date of this Compact. It is the intent of the parties that this subordination extends only to valid water rights, and not to statements of claim filed pursuant to 85-2-221, MCA. With the exception of rights exempt from filing in the state adjudication pursuant to 85-2-222, MCA, and rights exempt from the permit process pursuant to 85-2-306, MCA, a list of rights as currently claimed is attached as Appendix 3. Appendix 3 will be modified by any final decree resolving claims on the affected drainages. Appendix 3 may be modified due to clerical error or omission.

b. Effect of Mitigation. Because the impact of development of the Tribal Water Right on downstream water rights recognized under State law has been mitigated by provisions of the Compact and by special measures set forth in drainage stipulations, any person claiming or holding a water right recognized under State law, or an interest in such water right, may not assert priority over, or make a call for, or claim any of the water rights of the Tribe set forth in this Compact, in any court, tribunal, or other forum.

9. Stockwatering Impoundments Limited by Surface Area. Except for new stock ponds developed under Section C.2. of Article III, the surface acreage limitations on stockwatering impoundments set forth in Article III shall be the measure of compliance with the quantification of water rights for the purpose of stockwatering.

10. Impoundments for the Purpose of Enhancing Fish and Wildlife Habitat.

a. Fish and Wildlife Enhancement Impoundments Limited by Surface Area. The surface acreage limitations on impoundments for the purpose of fish and wildlife enhancement set forth in Article III shall be the measure of compliance with the quantification of water rights for the purpose of fish and wildlife enhancement.

b. Limits on Structures. No structure for the purpose of fish and wildlife enhancement may create a potential high water line beyond the existing wet riparian habitat delineated as fish and wildlife enhancement zones on the map attached as Appendix 4.

11. Structures Mimic Natural Processes. No structure for the purpose of fish and wildlife enhancement, or new stockwatering impoundments on a perennial stream built after the ratification date of the Compact, excluding repair or replacement of existing structures, may stop the entire flow of surface water during filling of the impoundment. To accomplish this the Tribe shall build any structure to mimic natural processes by allowing water to flow through the structure, or bypass the structure during filling.

B. Big Sandy Creek Basin.

1. Operation of Bonneau Reservoir.

a. Minimum Pool / 240 AFY Stored for Satisfaction of Release. The minimum pool at Bonneau Reservoir shall be established by the Tribe. The Tribe shall store annually the minimum pool plus 240 acre-feet, if water is available. The 240 acre-feet above the minimum pool shall be stored to satisfy the release set forth in this Article and shall not be available to satisfy the Tribal Water Right. Evaporative loss shall be accounted for in setting the minimum pool and shall not be subtracted from the 240 acre-foot pool stored for downstream water users. Any change in use of the water stored in Bonneau Reservoir from irrigation to other purposes shall be without adverse effect on downstream water uses recognized under state law with a priority date before the date of change, and measures to prevent adverse effect may include release of additional water from Bonneau Reservoir.

b. Release for Off-Reservation Irrigation Use. The Tribe shall release no more than 104 AFY from Bonneau Reservoir or from direct flow of Box Elder Creek to satisfy the claims for irrigation water rights currently held by Bert Corcoran, and the Tribe shall deliver this water to a point of diversion specified in the drainage stipulation between the Tribe and Mr. Corcoran attached as part of Appendix 2; provided that, the Tribe shall have no responsibility to upgrade or to increase the capacity of the existing delivery system; and further provided that, the Tribe shall not be required to release water from Bonneau Reservoir below the minimum pool established by the Tribe plus 240 acre-feet prior to satisfaction of the 240 acre-feet per year release set forth in Section B.1.c. of Article IV, and the minimum pool at all other times. The 104 AFY release shall be in accordance with a delivery schedule agreed to by Mr. Corcoran, or his successors in interest, and the TWRD. Mr. Corcoran's claims for irrigation water rights shall be specified in the drainage stipulation between the Tribe and Mr. Corcoran attached as part of Appendix 2. Nothing in the drainage stipulation or in this Compact shall affect any existing right that Mr. Corcoran may have to the use of on-Reservation conveyance and distribution systems to deliver this water.

c. 240 AFY Release. The Tribe shall annually release the first 240 acre-feet of water, as measured near the confluence of Box Elder Creek and Lower Big Sandy Creek, stored in Bonneau Reservoir above the minimum pool, at the request of the downstream irrigation water users as set forth below, for maintenance of instream flow and for domestic and stock purposes on Lower Big Sandy Creek. The 240 AF of water, once released, shall be designated as an instream flow and shall be senior to all Tribal diversions and all non-domestic and non-stockwater rights recognized under state law from the point of release to the confluence with the Milk River. The Tribe shall not divert from direct flow on Lower Big Sandy Creek between its confluence with Box Elder Creek and the Reservation boundary at Stoneman Farms, as that boundary exists on the effective date of this Compact, during release of the 240 AF of water to downstream water users in the months of July and August. A structure that will bypass the peak scheduled release will be constructed for any diversion of the Tribal Water Right upstream of the confluence of Big Sandy Creek with Gravel Coulee. Under no circumstances shall the Tribe be required to release more than 240 AFY of water to maintain instream flow and for domestic and stock purposes.

d. Schedule for 240 AFY. The method for determining the schedule of releases is as follows: Water users on Lower Big Sandy Creek with drainage stipulations listed in Appendix 2 shall elect a three member Bonneau Release Committee to determine the schedule of release for the 240 AFY. The Committee shall notify the DNRC which shall notify the TWRD by May 1st of each year of the requested schedule. The schedule shall not exceed the operating standards of Bonneau Reservoir or result in unreasonable interference of the Tribe's use of water stored in the Reservoir. If the TWRD does not receive notice by May 1 of any year, the TWRD shall release 2 cfs continuously for July and August in accordance with Section B.1.c. of Article IV. DNRC shall notify water users which, according to the records of the Department, have a water right recognized under state law with a source on Box Elder Creek, or on Big Sandy Creek between the confluence with Box Elder Creek and the confluence with the Milk River, that the release may not be diverted. After May 1, at the request of the Bonneau Release Committee, the DNRC shall request the Tribe to alter the rate of release and the Tribe may agree to comply. At the request of the Tribe, the DNRC shall request the Bonneau Release Committee to agree to forego the release, and if the Committee believes the purposes for the release as set forth in Section B.1.c. of Article IV are being satisfied without the release, the Committee may, in any year, agree to forego the release. When streamflow in lower Big Sandy Creek at the bypass structure referred to in Section B.1.c. of Article IV, exceeds the peak flow specified in the designated release schedule, such excess flow can be diverted by the Tribe, subject to the diversion limits designated in Article III.

e. Effective Date for Bonneau Reservoir Operational Plan. Notwithstanding ratification of this Compact by the parties, the operational plan for Bonneau Reservoir set forth in Sections B.1.a. through c. of Article IV, shall not become effective until completion of the enlargement of Bonneau Dam.

2. Water Use on Lower Big Sandy Creek Drainage.

a. 2 cfs Bypass at Stoneman Farms. Structures will be constructed at each point of diversion on Lower Big Sandy Creek which allow a minimum of 2 cfs of water flow from direct and return flow, if available, to pass year around from the most downstream diversion on the Reservation on Lower Big Sandy Creek. The 2 cfs shall be designated as an instream flow and shall be senior in priority to Tribal diversions and all non-domestic and non-stockwatering water rights recognized under state law with a point of diversion between the bypass and the confluence with the Milk River. When streamflow in Lower Big Sandy Creek exceeds 2 cfs outside the scheduled 240 AF release period, such excess flow can be diverted by the Tribe subject to diversion limits designated in Article III.

b. Water Quality Issues.

(1) Monitoring Wells. Within one year following the effective date of this Compact, a monitoring well network adequate to detect saline seep shall be installed to depths no greater than 30 feet near the proposed Enlarged Stoneman Reservoir site shown in Appendix 6. The location of the wells will be established by TWRD and DNRC (or its representative) and groundwater level and quality shall be measured on a quarterly basis to establish baseline conditions.

(2) Water Quality Monitoring Before Construction. Within one year following the effective date of this Compact, a surface water quality network will be established by TWRD and DNRC and quarterly sampling continued for a sufficient period of time to establish the water quality baseline conditions referred to above, adjacent to and below the Stoneman Farms project. The results of the baseline analysis will be used to establish a threshold value for water quality degradation associated with salinity which will trigger the requirement for more extensive study.

(3) Water Quality Monitoring After Construction. After construction of the Stoneman Reservoir enlargement, monitoring of the wells and surface water quality will be resumed to evaluate changes in water quality. If salinity measurements result in a trend of increasing salinity on a sustained basis over a reasonable period of time, the TWRD or DNRC may petition the Compact Board to appoint a technical expert to conduct an analysis to identify the causes of the increasing salinity and recommend appropriate remedies. The analysis and recommendations may include sources of salinity off the Reservation.

(4) Remedies. The results of the analysis shall be submitted to the DNRC and to the TWRD which shall make a joint effort to resolve the degradation issue based on the analyses. If the analysis includes sources of salinity off the Reservation, the DNRC shall assist the TWRD in obtaining reasonable access onto the land off the Reservation for the purpose of observation. If the DNRC and the TWRD, are unable to resolve the issue within 30 days through joint effort, the DNRC, the TWRD, or any affected water user, may petition the Compact Board for relief. The Compact Board shall have jurisdiction over any contributor to the salinity problem and shall fashion its remedy in a manner proportionate to the causes contributing to the problem. The remedy fashioned by the Compact Board for salinity problems shall be limited to issuance of an order to cease and desist the practice or practices leading to the salinity problems. The remedies set forth in this section shall be in addition to any remedies or water quality standards provided for under other applicable law.

C. Beaver Creek Drainage.

1. Moratorium on Tribal Consumptive Uses. For a period of five years following the ratification date of the Compact, there shall be a moratorium on the development of Tribal consumptive uses from surface water in the Beaver Creek drainage. During this moratorium, a monitoring network consisting of three continuous recording stations will be installed and the resulting data analyzed to determine if Beaver Creek gains or loses flow between the confluence of East and West Fork and the Reservation boundary. Location of the three gages shall be:

(1) the West Fork of Beaver Creek at the location the Tribe intends to divert water to the East Fork;

(2) the confluence of the East and West Forks of Beaver Creek; and

(3) the Reservation boundary at the most downstream point on Beaver Creek. A staff gage shall also be installed in East Fork Reservoir following enlargement of the Reservoir.

2. Development of Management Plan. Based on the results of the five years of gage data on Beaver Creek, the Tribe and the Montana Department of Fish, Wildlife and Parks shall work cooperatively to develop a fishery and recreational management plan. The plan may include modifications in minimum instream flows set forth in Section C.3. of Article IV. Such modification is pursuant to, and will not be deemed a modification of, this Compact. The management plan is not binding on any party and shall not be used to modify minimum instream flows until it is approved by the Tribe and the Montana Department of Fish, Wildlife and Parks.

3. Operation of East Fork Reservoir Following Enlargement and Pending Adoption of a Management Plan. During the moratorium imposed by Section C.1. of Article IV, or pending adoption of the management plan authorized by Section C.2. of Article IV, East Fork Reservoir may be enlarged; provided that,

a. The enlarged Reservoir shall be used only for recreational purposes during the five year moratorium. However, after the five year moratorium period and pending adoption of the management plan, the enlarged Reservoir may be utilized for multiple purposes, but remains subject to the limitations set forth under Sections C.3.b., c., and d. of Article IV.

b. Any surface water diversion from the West Fork of Beaver Creek and its tributaries on the Reservation to the East Fork of Beaver Creek shall include a structure which allows a minimum of 1 cfs of water flow from direct and return flow, if available, to pass year around; provided that, the storing of water in East Fork Reservoir from the East Fork of Beaver Creek shall not be considered a diversion for the purposes of this provision.

c. For the drainage area below the confluence of the East and West Forks of Beaver Creek to the northern Reservation boundary, any surface water diversion from Beaver Creek and its tributaries on the Reservation shall include a structure which allows a minimum of 1 cfs of water flow from direct and return flow, if available, to pass year around; provided that, the storing of water in East Fork Reservoir from the East Fork of Beaver Creek shall not be considered a diversion for the purposes of this provision.

d. The Tribe shall release water from East Fork Reservoir to augment streamflow on Beaver Creek if the flow at the confluence of East and West Fork or below the most downstream diversion on the Reservation, whichever is the most downstream, falls below 1 cfs; provided that, the Tribe shall not be required to release water if the level of the enlarged Reservoir reaches or falls below the minimum pool; and provided further that, the Tribe shall not be required to release water if the flow at the Reservation boundary at the most downstream point on Beaver Creek exceeds 2 cfs.

4. Operation of East Fork Reservoir Prior to Enlargement. Prior to enlargement of East Fork Reservoir and pending adoption of the management plan authorized by Section C.2. of Article IV, the following diversionary constraints are in effect.

a. Any surface water diversion from the West and East Forks of Beaver Creek and its tributaries on the Reservation shall include a structure which allows a minimum of 1 cfs of water flow from direct and return flow, if available, to pass the structure year around.

b. For the drainage area below the confluence of the East and West Forks of Beaver Creek to the northern Reservation boundary, any surface water diversion from Beaver Creek and its tributaries on the Reservation shall include a structure which allows a minimum of 1 cfs of water flow from direct and return flow, if available, to pass year round.

D. Enforcement - Chippewa Cree-Montana Compact Board.

1. Establishment of Board. There is hereby established the Chippewa Cree-Montana Compact Board. The Board shall consist of three members: one member selected by the Governor of the State of Montana from up to six nominees, up to three nominated by the Commissioners of Chouteau County and up to three nominated by the Commissioners of Hill County; one member appointed by the Chippewa Cree Business Committee; and one member selected by the other two members. If the Governor fails to select a board member from the list of nominees, the Commissioners of Chouteau and Hill Counties may select the member. All members shall be appointed within six months of the ratification date of this Compact and within thirty days of the date any vacancy occurs. If an appointment is not timely made by the Governor or County Commissioners, the Director of DNRC or his/her designee shall fill the State's position. If an appointment is not timely made by the Chippewa Cree Business Committee, the Director of the TWRD or his/her designee shall fill the Tribe's position. Each member shall serve a five-year term and shall be eligible for reappointment. The initial term of each member shall be staggered with one member serving a five-year term, one a four-year term, and one a three-year term. The initial term of each member shall be chosen by lot. Expenses of the members appointed by the State and the Tribe shall be borne by the entity appointing the member. The expenses of the third member and all other expenses shall be borne equally by the Tribe and the State, subject to the availability of funds.

2. Membership. Should the two appointed members fail to agree on the selection of a third member within sixty days of the date of appointment of the second member, or within thirty days after any vacancy occurs, the following procedure shall be utilized:

a. Within five days thereafter each member shall nominate three persons to serve as a member of the Board;

b. Within fifteen days thereafter each member shall reject two of the persons nominated by the other member;

c. Within five days thereafter, the remaining two nominees shall be submitted to the Dean of the University of Montana School of Law who shall select the third member from the two nominees.

3. Quorum and Vote Required. Two members of the Board shall constitute a quorum if reasonable notice of the time, place, and purpose of the meeting, hearing, or other proceeding has been provided in advance to the absent member. All Board decisions shall be by a majority of the Board, shall be in writing and, together with any dissenting opinions, shall be served on all parties in the proceeding before the Board, and on the parties to this Compact.

4. Jurisdiction of the Board. The Chippewa Cree-Montana Compact Board shall have jurisdiction to resolve controversies over the right to the use of water as between users of the Tribal Water Right and users of water rights recognized under state law including any contributor to a salinity problem. Such controversies shall include, but shall not be limited to, disputes as to the meaning of this Compact.

5. Pre-requisite Administrative Remedy.

a. Any non-tribal water user concerned that a new development or change in use of water by the Tribe is inconsistent with the Compact shall first contact the Havre Regional Office of the DNRC. If the DNRC and the TWRD are unable to resolve the issue in a reasonable time through discussion, DNRC, the water user, or the Tribe may seek relief through the Compact Board. The Tribe agrees to allow DNRC reasonable access onto Tribal land to observe the challenged development or change in use.

b. The Tribe or any tribal water user concerned that a new development or change in use or transfer of water by non-tribal water users is inconsistent with the Compact shall first contact the TWRD. If the TWRD and the DNRC are unable to resolve the issue in a reasonable time through discussion, the TWRD or the Tribal water user may seek relief through the Compact Board. The DNRC agrees to assist the TWRD in obtaining reasonable access onto the non-tribal water user's land to observe the challenged development or change in use or transfer.

c. The TWRD and the DNRC may jointly develop supplemental procedures as necessary or appropriate. Such supplemental procedures are pursuant to, and will not be deemed a modification of, this Compact.

6. Powers and Duties. The Board shall hold hearings upon notice in proceedings before it and shall have the power to administer oaths, take evidence and issue subpoenas to compel attendance of witnesses or production of documents or other evidence, and to appoint a technical expert for the purposes of Section B.2.b. of Article IV. The Tribe and the State shall enforce the Board's subpoenas in the same manner as prescribed by the laws of the Tribe and the State for enforcing a subpoena issued by the courts of each respective sovereign in a civil action. The parties to the controversy may present evidence and cross examine any witnesses. The Board shall determine the controversy and grant any appropriate relief, including a temporary order; provided that, the Board shall have no power to award money damages, costs, or attorneys fees. All decisions of the Board shall be by majority vote and in writing. The Board shall adopt necessary rules and regulations to carry out its responsibilities within six months after its first meeting. All records of the Board shall be open to public inspection, except as otherwise ordered by the Board.

7. Review and Enforcement of Board Decisions.

a. Decisions by the Board shall be effective immediately, unless stayed by the Board. Unless otherwise provided by Congress, only the United States and parties to the proceedings before the Board may appeal any final decision by the Board to a court of competent jurisdiction within thirty (30) days of such decision. The hearing on appeal shall be a trial de novo. The notice of appeal shall be filed with the Board and served personally or by registered mail upon all parties to the proceeding before the Board.

b. Unless an appeal is filed within thirty (30) days of a final decision of the Board, as provided in Section D.7.a. of Article IV, any decision of the Board shall be recognized and enforced by any court of competent jurisdiction on petition of the Board, or any party before the Board in the proceeding in which the decision was made.

c. A court of competent jurisdiction in which a timely appeal is filed pursuant to Section D.7.a. of Article IV, or in which a petition to confirm or enforce is filed pursuant to Section D.7.b. of Article IV, may order such temporary or permanent relief as it considers just and proper.

d. Any appeal may be taken from any decision of the court in which a timely appeal is filed pursuant to Section D.7.a. of Article IV, or in which a petition to confirm or enforce is filed pursuant to Section D.7.b. of Article IV, in the manner and to the same extent as from orders or judgments of the court in a civil action.

e. In any appeal or petition to confirm or enforce the Board's decision, the Board shall file with the court the record of the proceedings before the Board within sixty (60) days of filing of a notice of appeal.

8. Waiver of Immunity. The Tribe and the State hereby waive their respective immunities from suit, including any defense the State shall have under the Eleventh Amendment of the Constitution of the United States, in order to permit the resolution of disputes under this Compact by the Chippewa Cree-Montana Compact Board, and the appeal or judicial enforcement of Board decisions as provided herein, except that such waivers of sovereign immunity by the Tribe or the State shall not extend to any action for money damages, costs, or attorneys' fees. The parties agree that only Congress can waive the immunity of the United States. The participation of the United States in the proceedings of the Compact Board shall be as provided by Congress.

ARTICLE V - DISCLAIMERS AND RESERVATIONS

A. No Effect on Tribal Rights or Other Federal Reserved Water Rights.

1. The relationship between the water rights of the Chippewa Cree Tribe described herein and any rights to water of any other Indian Tribe, or of any federally derived water right of an

individual, or of the United States on behalf of such Tribe or individual shall be determined by the rule of priority.

2. Nothing in this Compact may be construed or interpreted in any manner to establish the nature, extent, or manner of administration of the rights to water of any other Indian tribes and tribal members of other Indian tribes.

3. Nothing in this Compact is otherwise intended to conflict with or abrogate a right or claim of an Indian Tribe other than the Chippewa Cree Tribe regarding its boundaries or property interests.

4. Nothing in this Compact may be construed or interpreted in any manner to establish the nature, extent, or manner of administration of the rights to water of any other federal agency or federal lands other than those of the Chippewa Cree Tribe.

B. General Disclaimers.

Nothing in this Compact shall be so construed or interpreted:

1. As a precedent for the litigation of reserved water rights or the interpretation or administration of future compacts between the United States and the State, or the United States and any other state;

2. To preclude the acquisition or exercise of a right to the use of water by any member of the Tribe outside the Reservation by purchase of such right or by acquisition of land, or by application to the State.

3. To determine the relative rights inter sese of persons using water under the authority of the State or the Tribe;

4. To limit in any way the rights of the parties or any other person to litigate any issues or questions not resolved by this Compact;

5. To authorize the taking of a water right which is vested under state or federal law;

6. To create or deny substantive rights through headings or captions used in this Compact;

7. To preclude or to discourage the Tribe from acquiring, by contracting or by other means, water rights in addition to the rights acquired under this Compact from any existing or future federal storage facilities off the Reservation;

8. To address or prejudge whether, in any interstate apportionment, the Tribe's water right shall be counted as part of the waters apportioned to the State;

9. To prohibit the Tribe, or the United States on behalf of the Tribe, from objecting in any general stream adjudication in Montana Water Court to any claims to water rights not protected by a drainage stipulation set forth in Appendix 2 of this Compact; provided that, the United States, on behalf of any other Indian tribe, or in its own right, may raise valid objections to any claims listed in Appendix 2 and Appendix 3 of this Compact;

10. To constitute a waiver of sovereign immunity by the Tribe, State, or United States, except as is expressly set forth in this Compact;

11. Unless otherwise provided by Congress, to prevent the United States, as trustee for the Tribe, or the Tribe itself, from filing an action in any court of competent jurisdiction, to prevent any party from interfering with the Tribe in the enjoyment of any water right in this Compact.

C. Rights Reserved.

The parties expressly reserve all rights not granted, recognized or relinquished in this Compact.

D. Obligations of United States Contingent.

Notwithstanding any other language in this Compact, except as authorized under other provisions of federal law, the obligations of the United States under this Compact shall be contingent on authorization by Congress.

E. Expenditures of Money Contingent.

The expenditure or advance of any money or the performance of any work by the United States or the Tribe pursuant to this Compact which may require appropriation of money by Congress or allotment of funds shall be contingent on such appropriation or allotment being made.

ARTICLE VI - CONTRIBUTIONS TO SETTLEMENT

The Tribe and the State of Montana agree to support federal legislation ratifying this Compact that will accomplish the following:

A. Off-Reservation Water Sources.

1. Lake Elwell Water Supply. The State and the Tribe agree to support federal legislation that will provide an allocation of 10,000 acre-feet per year from storage water in Lake Elwell, as described in Section C.6. of Article III. The priority date of this water right shall be that established for the source of supply. This water right will be held in trust and will be part of the Tribal Water Right.

2. Right to Participate in Future Projects to Import Water to the Milk River. The Tribe shall have the right to participate in any project to augment the water supply in the Milk River system by transferring water from another drainage, and to have any such augmentation project deliver any entitlement of the Tribe to water to a point on the Reservation designated by the Tribe.

B. Provision Of A Municipal, Rural, And Industrial Water Supply System, And A Tribal Economic Development Fund.

The State and Tribe agree to support federal legislation that will authorize and fund a municipal, rural and industrial water system adequate to meet the future MR&I water needs of the Tribe, according to the needs and population projections as set forth in the Municipal, Rural and Industrial (MR&I) Water Supply System Needs Assessment prepared for the Bureau of Reclamation, U.S. Department of the Interior (January, 1996), through either a regional system or a system serving the Reservation only. The State and Tribe further agree to support federal legislation that will establish an economic development fund as agreed to by the Tribe and the Department of the Interior, or by the Tribe and the Montana Congressional Delegation. Support by the Department of Interior for the proposed MR&I system will depend on a demonstration of feasibility and appropriate allocation of costs.

C. Implementation Contingencies and Cost Share of Administration and Mitigation.

Implementation of this Compact shall be contingent upon the appropriation of necessary funds by the Congress and by the Montana Legislature. The performance of any obligation by any party under this Compact shall be contingent upon appropriation of funds therefor. No liability shall accrue to any party in case necessary funds are not appropriated. The State and the Tribe agree to recommend the following cost share for administration and mitigation necessary to implement the Compact to the Montana State Legislature and the Congress for appropriation on a schedule consistent with implementation as contemplated in this Compact.

1. The State and the Tribe agree to support federal legislation to appropriate $3,070,000 for the administration of the Tribal Water Right by the Tribal Water Resources Department as set forth in Articles III and IV of the Compact, including but not limited to: stream flow gages; diversion/bypass structures on Big Sandy Creek; aerial survey of impoundments on the Reservation; and development of a Tribal Water Code.

2. The State and the Tribe agree to support state legislation to appropriate $150,000 for the following purposes as set forth in Articles III and IV of the Compact: water quality discharge monitoring wells and monitoring program; diversion structure on Big Sandy Creek; conveyance structure on Box Elder Creek; and purchase of contract water from Lower Beaver Creek Reservoir.

3. The state agrees to provide services, subject to the availability of funds, valued at $400,000 for administration required by the Compact and for water quality sampling required by this Compact.

ARTICLE VII - FINALITY, SETTLEMENT OF CLAIMS, AND EFFECTIVENESS OF COMPACT

A. Ratification and Effectiveness of Compact.

1. This Compact shall become effective on the date it is ratified by the Tribe, by the State, and by the Congress of the United States, whichever date is latest; provided that, notwithstanding the provisions of Section 85-2-702(2), MCA, those aspects of the Compact specifically designated in Section A.2. of Article VII, shall become effective as stated therein. Upon ratification of this Compact by the Tribe and by the State, whichever is later, the terms of this Compact may not be altered, voided, or modified in any respect without the consent of both the Tribe and the State. Once ratified by Congress, the Tribe, and the State, the Compact may not be modified without the consent of the Tribe, the State, and the United States.

2. As between the State and the Tribe, the moratorium on state permits in the Big Sandy Creek Basin set forth in Section A.7. of Article IV, shall become effective upon the date the Compact is ratified by the Montana Legislature and by the Chippewa Cree Business Committee, whichever date is later. The reservoir operational plan for Bonneau Reservoir set forth in Section B.1 of Article IV shall not become effective until the Reservoir is enlarged.

3. Notwithstanding any other provision in this Compact, the Tribe reserves the right to withdraw as a party to this Compact -

a. if Congress has not ratified this Compact within four (4) years from the date the Compact is ratified by the Tribe and by the State, whichever date is later, or

b. if the municipal, rural, and industrial water supply system which the feasibility study identifies as the preferred alternative to serve the Rocky Boy's Reservation, or an equivalent water supply system as determined by the Tribe, is not authorized within four (4) years of the date the Compact is ratified by the Tribe and by the State, whichever date is later, or

c. if appropriations are not authorized by Congress, including appropriations for planning, design, and other pre-construction work on the municipal, rural, and industrial water supply system authorized by Congress to serve the Rocky Boy's Reservation, within five (5) years of the date the Compact is ratified by the Tribe and by the State, whichever date is later, or

d. if appropriations are not made in the manner contemplated by the federal legislation authorizing the Tribal municipal, rural, and industrial water supply system, or

e. if construction of the Tribal municipal, rural, and industrial water supply system authorized by Congress to serve the Rocky Boy's Reservation, has not commenced within seven (7) years from the date the Compact is ratified by the Tribe and by the State, whichever date is later, or

f. if construction of the Tribal municipal, rural, and industrial water supply system authorized by Congress to serve the Rocky Boy's Reservation, has not been completed within fourteen (14) years from the date the Compact is ratified by the Tribe and by the State, whichever date is later.

The Tribe may exercise its right to withdraw by sending to the Governor of the State of Montana and to the Secretary of the Interior by certified mail a resolution of the Chippewa Cree Business Committee stating the Tribe's intent to withdraw and specifying a withdrawal date not sooner than 30 days from the date of the resolution. On the date designated in the resolution for Tribal withdrawal, this Compact shall become null and void without further action by any party, and the parties agree to resume negotiation in good faith for quantification of the water rights of the Chippewa Cree Tribe and entry of a decree in a court of competent jurisdiction. If the Tribe fails to take action to withdraw within five (5) years following the fourteen (14) year deadline for completion of the water system, all provisions of the Compact shall remain in effect.

4. Notwithstanding any other provision in this Compact, the Department of the Interior reserves the right to refuse support for federal legislation ratifying this Compact.

B. Incorporation Into Decrees and Disposition of Federal Suits.

1. The Tribe and the State agree to defend the provisions and purposes of this Compact including the quantification set forth in Article III, from all challenges and attacks in all proceedings pursuant to this Section B of Article VII.

2. Within 180 days of the date this Compact is ratified by the Chippewa Cree Business Committee, the State of Montana, and Congress, whichever is latest, the Tribe, the State, or the United States shall file, in the general stream adjudication filed by the State of Montana pursuant to the provisions of 85-2-702(3), MCA, a motion for entry of the proposed decree set forth in Appendix 1 as the decree of the water rights held by the United States in trust for the Chippewa Cree Tribe of the Rocky Boy's Reservation. If the court does not approve the proposed decree submitted with the motion within three years following the filing of the motion, the Compact shall be voidable by agreement of the parties. If the court approves the proposed decree within three years, but the decree is subsequently set aside by the court or on appeal, the Compact shall be voidable by agreement of the parties. The parties understand and agree that the submission of this Compact to a state court or courts, as provided for in this Compact, is solely to comply with the provisions of 85-2-702(3), MCA, and does not expand the jurisdiction of the state court or expand in any manner the waiver of sovereign immunity of the United States in the McCarran Amendment, 43 U.S.C. 666 or other provision of federal law.

3. Consistent with section 3-7-224, MCA, setting forth the jurisdiction of the chief water judge, for the purposes of section 85-2-702(3), MCA, the review by the Montana Water Court shall be limited to Article III, Section A.8. of Article IV, and Appendix 1, and may extend to other sections of the Compact only to the extent that they relate to the determination of existing water rights. The final decree shall consist of Article III and Section A.8. of Article IV as displayed in Appendix 1 and such other information as may be required by 85-2-234, MCA. Nevertheless, pursuant to section 85-2-702(3), MCA, the terms of the entire Compact must be included in the preliminary decree without alteration for the purpose of notice.

4. Upon the issuance of a final decree by the Montana Water Court, or its successor, and the completion of any direct appeals therefrom, or upon the expiration of the time for filing any such appeal, the United States, the Tribe, and the State shall execute and file joint motions pursuant to Rule 41(a), Fed. R. Civ. P., to dismiss the Tribe's claims, and any claims made by the United States as trustee for the Tribe, in United States v. Aageson, No. CIV-79-21-GF (D. Mont. 1979) (hereinafter referred to as "Aageson") and such claims may only be refiled if the Tribe exercises its option to withdraw as a party to the Compact pursuant to Section A.3. of Article VII. This Compact shall be filed as a consent decree in Aageson only if, prior to the dismissal of Aageson as provided in this Article, it is finally determined in a judgment binding upon the State of Montana that the state courts lack jurisdiction over, or that the state court proceedings are inadequate to adjudicate, some or all of the water rights asserted in Aageson.

C. Tribal Settlement of Water Claims.

The parties intend that the water rights and other rights confirmed to the Tribe in this Compact are in full satisfaction of the Tribe's water rights claims, including federal reserved water rights claims based on Winters v. United States, 207 U.S. 564 (1908). In consideration of the rights confirmed to the Tribe in this Compact, including rights to the future development of water pursuant to Section C. of Article III, and of performance by the State of Montana and the United States of all actions required by this Compact, including entry of a final order issuing the decree of the reserved water rights of the Tribe held in trust by the United States as quantified in the Compact and displayed in Appendix 1, the Tribe and the United States as trustee for the Tribe hereby relinquish any and all claims to water rights of the Chippewa Cree Tribe within the State of Montana existing on the date this Compact is ratified by the State and the Tribe, whichever date is later.

D. Binding Effect.

Upon the effectiveness of any provision of this Compact, the terms of that provision will be binding:

1. Upon the State and any person or entity of any nature whatsoever using, claiming or in any manner asserting any right under the authority of the State to the use of water in the State of Montana; provided that, the validity of consent, ratification, or authorization by the State is to be determined by Montana law;

2. Upon the Tribe and any person or entity of any nature whatsoever using, claiming or in any manner asserting any right under the authority of the Tribe to the use of the Tribe's water right, or any right arising under any doctrine of reserved or aboriginal water rights for the Tribe; provided that, the validity of consent, ratification or authorization by the Tribe is to be determined by tribal law; and

3. Upon the United States and any person or entity of any nature whatsoever using, claiming or in any manner asserting any right under the authority of the United States to the use of water in the State of Montana; provided that, the validity of consent, ratification or authorization by the United States is to be determined by federal law; and further provided that, nothing contained in this Compact affects any claim of any Indian tribe other than the Chippewa Cree Tribe, or of persons claiming water through any such other Indian tribe, or the right of any Indian tribe other than the Chippewa Cree Tribe, or persons claiming water through any such other Indian tribe, to pursue a claim to any water from any source based on any theory of right or entitlement.

ARTICLE VIII - LEGISLATION

The State and Tribe agree to seek enactment of any legislation necessary to effectuate the provisions and purposes of this Compact, and to defend the provisions and purposes of this

Compact from all challenges and attacks; provided that, no provision of the Compact shall be modified as to substance except as may be provided herein.

IN WITNESS WHEREOF the representatives of the State of Montana, the Chippewa Cree Tribe of the Rocky Boy's Reservation, and the United States have signed this Compact on the 28th day of February, 2000.

History: **En. Sec. 1, Ch. 265, L. 1997.**

Part 7
United States Fish and Wildlife Service, Black Coulee and Benton Lake-Montana Compact

85-20-701. United States Fish and Wildlife Service-Montana compact ratified. The compact entered into by the State of Montana and the United States Fish and Wildlife Service and filed with the secretary of state of the State of Montana under the provisions of 85-2-702 on March 26, 1997, is ratified. The compact is as follows:

WATER RIGHTS COMPACT
STATE OF MONTANA
UNITED STATES OF AMERICA, FISH AND WILDLIFE SERVICE

This Compact is entered into by the State of Montana and the United States of America to settle for all time any and all claims existing on the effective date of the Compact to water for Black Coulee and Benton Lake National Wildlife Refuges administered by the U.S. Fish and Wildlife Service within the State of Montana.

RECITALS

WHEREAS, in 1979 the United States filed in the United States District Court for the District of Montana several actions to adjudicate, inter alia, its rights to water with respect to Black Coulee National Wildlife Refuge, see United States v. Aageson, No. CV-79-21-GF;

WHEREAS, the State of Montana, in 1979 pursuant to Title 85, Chapter 2 of the Montana Code Annotated, commenced a general adjudication of the rights to the use of water within the State of Montana including all federal reserved and appropriative water rights;

WHEREAS, 85-2-703, MCA, provides that the state may negotiate settlement of claims by the federal government to non-Indian reserved waters within the State of Montana;

WHEREAS, the United States wishes to quantify and have decreed the amount of water necessary to fulfill the purposes of Benton Lake and Black Coulee National Wildlife Refuges, in the State of Montana;

WHEREAS, the United States, in quantifying its reserved water rights recognizes the need to accommodate the interests of the state and its citizens by providing for the development and use of water in the vicinity of the Fish and Wildlife Service Refuges to the extent that it is possible to do so without materially affecting the rights and interests of the United States;

WHEREAS, the United States Attorney General, or a duly designated official of the United States Department of Justice, has authority to execute this Compact on behalf of the United States pursuant to the authority to settle litigation contained in 28 U.S.C. §§ 516-17 (1968);

WHEREAS, The Secretary of the Interior, or a duly designated official of the United States Department of the Interior, has authority to execute this Compact on behalf of the United States Department of Interior pursuant to 43 U.S.C. § 1457 (1986, Supp. 1992);

NOW THEREFORE, the State of Montana and the United States agree as follows:

ARTICLE I
DEFINITIONS

For purposes of this Compact only, the following definitions shall apply:

(1) "Abstract" means the copy of the document entitled "Abstract of U.S. Fish and Wildlife Service Water Rights" referenced in this Compact as Appendix 1.

(2) "Benton Lake National Wildlife Refuge" means those lands located in Montana that were withdrawn and reserved by Executive Order No. 5228 of November 21, 1929.

(3) "Black Coulee National Wildlife Refuge" means those lands and interests in lands located in Montana that were acquired pursuant to, or withdrawn and reserved by Executive Order 7801 of January 28, 1938.

(4) "Department" means the Montana Department of Natural Resources and Conservation or its successor.

(5) "Effective date of this Compact" means the date of the ratification of the Compact by the Montana legislature, written approval by the United States Department of the Interior, or written approval by the United States Department of Justice, whichever is later.

(6) "Groundwater" means water that is beneath the ground surface.

(7) "Non-consumptive" means a water right considered to be non-consumptive by the decree, permit or law authorizing the use, because it results in no depletion of water from the source.

(8) "Parties" means the State of Montana and the United States.

(9) "Person" means an individual, association, partnership, corporation, state agency, political subdivision, or any other entity, but does not include the United States.

(10) "Recognized under state law" when referring to a water right or use means a water right or use protected by state law, but does not include state recognition of a federal or tribal reserved water right.

(11) "State" means the State of Montana and all officers, agents, departments, and political subdivisions thereof. Unless otherwise indicated, for purposes of notification or consent, "state" means the Director of the Montana Department of Natural Resources and Conservation or his or her designee.

(12) "United States" means the federal government and all officers, agencies, departments and political subdivisions thereof. Unless otherwise indicated, for purposes of notification or consent other than service in litigation, "United States" means the Secretary of the Department of the Interior, or his or her designees.

ARTICLE II
WATER RIGHT

The parties agree that the following water rights are in settlement of the reserved water rights of the United States for the Refuges described. The parties to this agreement recognize that the water rights described in this Compact are junior to any tribal water rights with a priority date before the effective date of the Compact, including aboriginal rights, if any, in the basins affected. All reserved water rights described in this Article are subject to Article IV, section A of this Compact.

A. Benton Lake National Wildlife Refuge

1. Quantification: The United States shall have the right to water from the following sources where they occur on the Refuge:

a. Consumptive Use: The United States has a reserved water right to 2 acre-feet per year diverted at a maximum rate of 45 gpm from groundwater beneath the Benton Lake National Wildlife Refuge.

b. Natural Flow: The United States has a reserved water right to the natural flow in the Lake Creek drainage including the unnamed tributaries to Benton lake where the drainage enters the Refuge in the amount of the natural flow remaining after satisfaction of the following rights:

(1) all rights recognized under state law with a priority date prior to the effective date of this Compact;

(2) any rights for stock watering ponds with a priority date after the effective date of this Compact and a maximum capacity of the impoundment or pit of less than 15 acre-feet and an appropriation of less than 30 acre-feet per year from a source other than a perennial flowing stream; and

(3) any right to appropriate groundwater with a priority date after the effective date of this Compact by means of a well or developed spring with a maximum appropriation of 35 gallons per minute or less that does not exceed a total appropriation of 10 acre-feet per year.

2. a. Priority Date: The United States has a priority date of November 21, 1929, for the reserved water rights described in this Compact for Benton Lake National Wildlife Refuge.

b. Subordination: The natural flow water right is subordinate to:

(1) any use recognized under state law with a priority date before the effective date of this Compact;

(2) any use considered non-consumptive as defined by this Compact;

(3) stock watering ponds with a priority date after the effective date of this Compact and with a maximum capacity of the impoundment or pit of less than 15 acre-feet and an appropriation of less than 30 acre-feet per year from a source other than a perennial flowing stream; and

(4) appropriation of groundwater with a priority date after the effective date of this Compact by means of a well or developed spring with a maximum appropriation of 35 gallons per minute or less that does not exceed a total appropriation of 10 acre-feet per year.

3. Period of Use: The period of use of this water right shall be from January 1 through December 31 of each year.

4. Points and means of diversion: Any point on the Refuge and by any means subject to the terms of this Compact.

5. Purposes: The United States right to water may be used for the following purposes, provided that, subject to the limitations set forth in Article III. section E., the United States may change the use of water identified for consumptive use.

a. Consumptive Use: The United States water right to groundwater shall be used at the Refuge headquarters for the purposes of the Refuge.

b. Natural Flow: The United States water right to natural flow shall be used on the Benton Lake National Wildlife Refuge for wildlife habitat maintenance and enhancement.

B. Black Coulee National Wildlife Refuge

1. Quantification: The United States shall have the right to water from the following sources where they occur on Black Coulee National Wildlife Refuge:

2. Natural Flow: The United States has a reserved water right for the natural flow in the Black Coulee drainage where the drainage enters the Refuge in the amount of the natural flow remaining after satisfaction of the following rights:

(1) all rights recognized under state law with a priority date prior to the effective date of this Compact;

(2) any rights for stock watering ponds with a priority date after the effective date of this Compact and a maximum capacity of the impoundment or pit of less than 15 acre-feet and an appropriation of less than 30 acre-feet per year from a source other than a perennial flowing stream; and

(3) any right to appropriate groundwater with a priority date after the effective date of this Compact by means of a well or developed spring with a maximum appropriation of 35 gallons per minute or less that does not exceed a total appropriation of 10 acre-feet per year.

3. a. Priority Date: The United States has a priority date of January 28, 1938 for the water rights described in this Compact for Black Coulee National Wildlife Refuge.

b. Subordination: The natural flow water right is subordinate to:

(1) any use recognized under state law with a priority date before the effective date of this Compact;

(2) any use considered non-consumptive as defined by this Compact;

(3) stock watering ponds with a priority date after the effective date of this Compact and with a maximum capacity of the impoundment or pit of less than 15 acre-feet and an appropriation of less than 30 acre-feet per year from a source other than a perennial flowing stream; and

(4) appropriation of groundwater with a priority date after the effective date of this Compact by means of a well or developed spring with a maximum appropriation of 35 gallons per minute or less that does not exceed a total appropriation of 10 acre-feet per year.

4. Period of Use: The period of use of this water right shall be from January 1 through December 31 of each year.

5. Points and means of diversion: any point on the Refuge and by any means subject to the terms of this Compact.

6. Purposes: The United States water right to natural flow shall be used on the Black Coulee National Wildlife Refuge for wildlife habitat maintenance and enhancement.

C. Emergency Fire Suppression

The use of water for emergency fire suppression benefits the public, and is necessary for the purposes of the various Fish and Wildlife Service refuges. The United States, may as part of its reserved water right, divert water for fire suppression at all of the Fish and Wildlife Service Refuges as needed, and without a definition of the specific elements of a recordable water right. Use of water for fire suppression shall not be deemed an exercise of the United States' reserved water rights for consumptive use or a violation of its reserved water rights for natural flow.

ARTICLE III
IMPLEMENTATION

A. Basin Closure

1. In the following drainage basins upstream of the most downstream point on the Refuges for which a reserved water right is described by this Compact, the Department shall not process or grant an application for a permit to appropriate or to reserve water for consumptive use after the effective date of this Compact, provided that, the Department may issue certificates of water right for appropriation of groundwater by means of a well or developed spring with a maximum appropriation of 35 gallons per minute or less that does not exceed a total appropriation of 10 acre-feet per year, and permits for stock watering ponds with a maximum capacity of the impoundment or pit of less than 15 acre-feet and an appropriation of less than 30 acre-feet per year from a source other than a perennial flowing stream:

Benton Lake National Wildlife Refuge:
Lake Creek Watershed including the unnamed tributaries of Benton Lake
Black Coulee National Wildlife Refuge:
Black Coulee Watershed

2. If a temporary or permanent basin closure is enacted under state law for a drainage basin or subbasin for which future consumptive water use is limited under this Compact, the most restrictive measures applicable to consumptive use of surface or groundwater shall control.

3. Within 180 days following the effective date of this Compact, the Department shall mail notice of the basin closure to every person or public agency of record with a claim of water right or permit in the source subject to closure.

B. Enforcement of Water Right

1. The United States, the state, or a holder of a water right recognized under state law, may petition a state or federal court of competent jurisdiction for relief when a controversy arises between the United States' reserved water right described by this Compact, and a holder of a water right recognized under state law. Resolution of the controversy shall be governed by the terms of this Compact where applicable, or to the extent not applicable, by applicable state or federal law.

2. The United States agrees that a water commissioner appointed by a state or federal court of competent jurisdiction, or other official authorized by future changes in law, may enter a refuge for which a water right is described in this Compact for the purpose of data collection, including the collection of information necessary for water distribution on or off the refuge, and to inspect structures for the diversion and measurement of water described in this Compact for consumptive use and for the measurement of natural flow. The terms of entry shall be as specified in an order of a state or federal court of competent jurisdiction.

3. The Department may enter a federal enclave for which a reserved water right is described in this Compact, at a reasonable hour of the day, for the purposes of data collection on water diversion and stream flow or inspection of devices maintained by the United States pursuant to this Compact. The Department shall notify the United States by certified mail or in person, at least 24 hours prior to entry.

4. The United States may request an investigation by the Department of a diversion located upstream of the reserved portion of a stream for which a reserved water right is described in this Compact. The Department may investigate. If an investigation occurs, the United States may accompany the Department.

5. The United States shall maintain structures, including wellhead equipment and casing, for the diversion and measurement of water authorized for consumptive use by this Compact.

The United States shall maintain the devices it deems necessary for enforcement of its reserved water right for natural flow described in this Compact.

6. A person who violates or refuses or neglects to comply with the provisions of this Compact, an order of the Department pursuant to this Compact, or an action by the Bureau pursuant to this Compact is subject to the penalties provided by state law.

C. Use of Water Right

The rights of the United States described in this agreement are federal reserved water rights. Non-use of all or a part of the federal reserved water rights described in this Compact shall not constitute abandonment of the right. The federal reserved water rights described in this Compact need not be applied to a use deemed beneficial under state law, but shall be restricted to uses necessary to fulfill the purposes of the associated reserved land described in Article II, sections A.5. and B.5 and C.

D. Location of Natural Flow Rights

The United States' reserved water rights for natural flow apply to the portion of the streams specified in this Compact that flow over or form the boundary to land administered by the Fish and Wildlife Service.

E. Change in Use

1. Natural flow: Reserved water rights specified in this Compact for natural flow shall not be subject to change to any other use, provided that: the emergency use of water for fire suppression as provided for in Article II.C. shall not be deemed a change or alteration in use, or violation of a reserved water right for natural flow.

2. Consumptive uses: The United States may take action affecting the use of its consumptive use water rights provided that:

(1) the action shall be in fulfillment of the purposes of the refuge described in Article II, sections A.5;

(2) the total use shall not exceed the amount described in this Compact; and

(3) the action shall not adversely affect a water right that is recognized under state law.

3. Reporting by the United States: For any action affecting the use of a consumptive right whether or not such action is deemed a change in use, the United States agrees to provide the following information to the Department:

a. Well log: For a use that includes the drilling of a well or enlargement of an existing wellbore, the United States agrees to provide a well log to the state within 60 days of the completion of the well.

b. Emergency Use: Within 60 days after the commencement of a temporary emergency use for fire suppression described in Article II, Section C. of this Compact, the United States agrees to notify the state of the use to which the water was put, the dates of use, and the estimated amount of water used.

c. Annual Report: Between April 1 and May 1 of each year, the United States agrees to provide the Department with a report on:

(1) actions during the preceding year affecting the use of a consumptive use right described in this Compact;

(2) the initiation of new uses that were completed during the preceding year; and

(3) any data and documents generated or received by the Fish and Wildlife Service during the preceding year on measurement of stream flow on a stream with a natural flow water right set forth in this Compact.

4. Reporting by the State: Between December 1 and December 31 of each year, the Department shall provide the United States with a report of:

(1) changes in use during the preceding year, as defined by state law, of water rights upstream of or within the boundaries of reserved land for which a reserved water right is described in this Compact;

(2) any data and documents generated by the Department during the preceding year on the measurement of streamflows, diversions and well use on or tributary to a stream for which a water right for natural flow is described in this Compact;

(3) any certificate of water right issued during the preceding year for appropriation of groundwater; and

(4) any permit issued during the preceding year for a stock watering pond.

ARTICLE IV
GENERAL PROVISIONS

A. No Effect on Tribal Rights or Other Federal Reserved Water Rights

1. The relationship between the water rights of the Fish and Wildlife Service described herein and any rights to water of an Indian Tribe in Montana, or of any federally derived water right of an individual, or of the United States on behalf of such tribe or individual shall be determined by the rule of priority. The parties to this agreement recognize that the water rights described in this Compact are junior to any tribal water rights with a priority date before the effective date of the Compact, including aboriginal rights, if any, in the basins affected.

2. Nothing in this Compact may be construed or interpreted in any manner to establish the nature, extent or manner of administration of the rights to water of any other federal agency or federal lands in Montana other than those of the Fish and Wildlife Service.

3. Nothing in this Compact may be construed or interpreted in any manner to establish the nature, extent or manner of administration of the rights to water of any Indian Tribes and tribal members in Montana.

4. Nothing in this Compact is otherwise intended to conflict with or abrogate a right or claim of any Indian Tribe regarding boundaries or property interests in the State of Montana.

B. State Water Rights

Nothing in this Compact may limit the exclusive authority of the state, including the authority of a water commissioner authorized by state law, to administer all current and future water rights recognized under state law within and upstream of the reserved land covered by this Compact, provided that in administration of those water rights in which the United States has an interest, such authority is limited to that granted under federal law.

C. Abstract

Concurrent with this Compact, the parties have prepared an Abstract, a copy of which is referenced as Appendix 1, which is a specific listing of all of the United States' water rights for Benton Lake and Black Coulee National Wildlife Refuges, that are described in this Compact and quantified in accordance with this Compact. The parties prepared the Abstract to comply with the requirements for a final decree as set forth in 85-2-234, MCA, and in an effort to assist the state courts in the process of entering decrees accurately and comprehensively reflecting the rights described in this Compact. The rights specified in the Abstract are subject to the terms of this Compact. In the event of a discrepancy between a right listed in the Abstract and that same right as quantified in accordance with Articles II and III of this Compact, the parties intend that the quantification in accordance with Articles II and III of this Compact shall be reflected in a final decree.

D. General Disclaimers

Nothing in this Compact may be construed or interpreted:

1. as a precedent for the litigation of reserved water rights or the interpretation or administration of future compacts between the United States and the State; or of the United States and any other state;

2. as a waiver by the United States of its right under state law to raise objections in state court to individual water rights claimed pursuant to the state Water Use Act, Title 85, of the Montana Code Annotated, in the basins affected by this Compact; or any right to raise objections in an appropriate forum to individual water rights subject to a provisional permit under the state Water Use Act, Title 85, of the Montana Code Annotated, in the basins affected by this Compact;

3. as a waiver by the United States of its right to seek relief from a conflicting water use not entitled to protection under the terms of this Compact;

4. to establish a precedent for other agreements between the state and the United States or an Indian tribe;

5. to determine the relative rights, inter sese, of persons using water under the authority of state law or to limit the rights of the parties or a person to litigate an issue not resolved by this Compact;

6. to create or deny substantive rights through headings or captions used in this Compact;

7. to expand or restrict any waiver of sovereign immunity existing pursuant to federal law as of the effective date of this Compact;

8. to affect the right of the state to seek fees or reimbursement for costs or the right of the United States to contest the imposition of such fees or costs, pursuant to a ruling by a state or federal court of competent jurisdiction or Act of Congress;

9. to affect in any manner the entitlement to or quantification of other federal water rights. This Compact is only binding on the United States with regard to the water rights of the Fish and Wildlife Service, and does not affect the water rights of any other federal agency that is not a successor in interest to the water rights subject to this Compact;

10. to prevent the United States from constructing or modifying an outlet to an impoundment at a Refuge in compliance with all applicable law;

11. to prevent the United States from seeking a permit to appropriate water under state law from a source not closed to new permits by this Compact or any other law.

E. Reservation of Rights

The parties expressly reserve all rights not granted, described or relinquished in this Compact.

F. Severability

The provisions of this Compact are not severable, provided that for the purposes of Sec. 85-2-702(3), MCA, the water rights described in this Compact for each Fish and Wildlife Service Refuge shall be considered as separate Compacts.

G. Multiple Originals

This Compact is executed in quintuplicate. Each of the five (5) Compacts bearing original signatures shall be deemed an original.

H. Notice

Unless otherwise specifically provided for in this Compact, service of notice required hereunder, except service in litigation, shall be:

1. State: Upon the Director of the Department and such other officials as he or she may designate in writing.

2. United States: Upon the Secretary of the Interior and such other officials as he or she may designate in writing.

ARTICLE V
FINALITY OF COMPACT AND DISMISSAL OF PENDING CASES

A. Binding Effect

1. The effective date of this Compact is the date of the ratification of this Compact by the Montana legislature, written approval by the United States Department of the Interior, or written approval by the United States Department of Justice, whichever occurs later. Once effective, all of the provisions of this Compact shall be binding on:

a. The State and a person or entity of any nature whatsoever using, claiming or in any manner asserting a right under the authority of the State to the use of water; and

b. Except as otherwise provided in Article IV, section A., the United States, a person or entity of any nature whatsoever using, claiming, or in any manner asserting a right under the authority of the United States to the use of water.

2. Following the effective date, this Compact shall not be modified without the consent of both parties. Either party may seek enforcement of this Compact in a court of competent jurisdiction. Attempt to unilaterally modify this Compact by either party shall render this Compact voidable at the election of the other party.

3. On approval of this Compact by a state or federal court of competent jurisdiction and entry of a decree by such court confirming the rights described herein, this Compact and such rights are binding on all persons bound by the final order of the court.

4. If an objection to this Compact is sustained pursuant to 85-2-702(3), MCA, this Compact shall be voidable by action of and without prejudice to either party.

B. Disposition of Actions

Subject to the following stipulations and within one hundred eighty (180) days of the effective date, the parties shall submit this Compact to an appropriate state court or courts having jurisdiction over this matter in an action commenced pursuant to 43 U.S.C. § 666, for approval in accordance with state law and for the incorporation of the reserved water rights described in this Compact into a decree or decrees entered therein. The parties understand and agree that the submission of this Compact to a state court or courts, as provided for in this Compact, is solely to comply with the provisions of 85-2-702(3), MCA, and does not expand the jurisdiction of the state court or expand in any manner the waiver of sovereign immunity of the United States in the McCarran Amendment, 43 U.S.C. § 666 or other provision of federal law.

1. Dismissal of Filed Claims: At the time the state courts approve the reserved water rights described in this Compact and enter a decree or decrees confirming the rights described herein, such courts shall dismiss, with prejudice, all of the water right claims specified in Appendix 2 for Benton Lake National Wildlife Refuge and Appendix 3 for Black Coulee National Wildlife Refuge to this Compact. If this Compact fails approval or a reserved water right described herein is not confirmed, the specified claims shall not be dismissed.

2. Disposition of Federal Suits: Within ninety (90) days of the issuance of a final decree or decrees by the state courts approving this Compact and confirming the reserved water rights described herein, and the completion of any direct appeals therefrom or the expiration of the time for filing such appeal, the parties shall execute and file joint motions pursuant to Rule 41(a) Fed. R. Civ. P. to dismiss with prejudice any claims made by the United States for the Fish and Wildlife Service Refuges described in this Compact in federal court. This Compact may be filed as a consent decree in those federal suits, only if, prior to the dismissal of the federal suits as provided in this Article, it is finally determined in a judgement binding on the State of Montana that the state courts lack jurisdiction over some or all of the reserved water rights described in this Compact. Within one year of such judgment the United States agrees to commence such additional proceedings in the federal district court for the District of Montana as may be necessary to judicially confirm the reserved water rights described herein which are not included within an existing action.

3. Continuation of Negotiations: The parties were unable to finalize agreement on quantification of the water rights for: Red Rocks National Wildlife Refuge and Wilderness Area; the National Bison Range; Bowdoin National Wildlife Area; and Charles M. Russell and UL Bend National Wildlife Refuges and UL Bend Wilderness Area, prior to the effective date of this Compact. The parties agree to continue to pursue, in good faith, quantification of water rights for these areas. In the event the parties are unable to agree on quantification, the United States retains its right to have the quantity of any reserved water right for these areas adjudicated in a state or federal court of competent jurisdiction.

C. Settlement of Claims

The parties intend that the water rights described in this Compact are in full and final settlement of the water right claims for the reserved land described in this Compact and administered by the Fish and Wildlife Service in Montana on the effective date of this Compact. Pursuant to this settlement, the United States hereby and in full settlement of any and all claims filed by the United States or which could have been filed by the United States for Black Coulee and Benton Lake National Wildlife Refuges, relinquishes forever on the effective date of this Compact all said claims to water within the State of Montana for Black Coulee and Benton Lake National Wildlife Refuges. The state agrees to recognize the reserved water rights described and quantified herein, and shall, except as expressly provided for herein, treat them in the same manner as a water right recognized by the state.

D. The parties agree to defend the provisions and purposes of this Compact from all challenges and attacks.

IN WITNESS WHEREOF the representatives of the State of Montana and the United States have signed this Compact on the 17th day of July, 1997.

History: En. Sec. 1, Ch. 137, L. 1997.

Part 8
United States Fish and Wildlife Service, Red Rock Lakes-Montana Compact

85-20-801. United States Fish and Wildlife Service, Red Rock Lakes-Montana compact ratified. The compact entered into by the State of Montana and the United States Fish and Wildlife Service and filed with the secretary of state of the State of Montana under the provisions of 85-2-702 on April 20, 1999, is ratified. The compact is as follows:

WATER RIGHTS COMPACT
STATE OF MONTANA
UNITED STATES OF AMERICA, FISH AND WILDLIFE SERVICE

This Compact is entered into by the State of Montana and the United States of America to settle for all time any and all claims existing on the effective date of the Compact to water for Red Rock Lakes National Wildlife Refuge and Wilderness Area ("Refuge") administered by the U.S. Fish and Wildlife Service (FWS) within the State of Montana.

RECITALS

WHEREAS, the State of Montana, in 1979, pursuant to Title 85, Chapter 2 of the Montana Code Annotated, commenced a general adjudication of the rights to the use of water within the State of Montana including all federal reserved and appropriative water rights;

WHEREAS, 85-2-703, MCA, provides that the state may negotiate compacts concerning the equitable division and apportionment of water between the state and its people and the federal government with claims to non-Indian reserved water rights within the State of Montana;

WHEREAS, the United States wishes to quantify and have decreed the amount of water necessary to fulfill the purposes of Red Rock Lakes National Wildlife Refuge and Wilderness Area, in the State of Montana;

WHEREAS, the United States, in quantifying its water rights recognizes the need to accommodate the interests of the State and its citizens by providing for the development and use of water in the vicinity of the Fish and Wildlife Service Refuges to the extent that it is possible to do so without materially affecting the rights and interests of the United States;

WHEREAS, the United States Attorney General, or a duly designated official of the United States Department of Justice, has authority to execute this Compact on behalf of the United States pursuant to the authority to settle litigation contained in 28 U.S.C. §§516-17 (1968);

WHEREAS, the Secretary of the Interior, or a duly designated official of the United States Department of the Interior, has authority to execute this Compact on behalf of the United States Department of Interior pursuant to 43 U.S.C. §1457 (1986, Supp. 1992);

NOW THEREFORE, the State of Montana and the United States agree as follows:

ARTICLE I - DEFINITIONS

For purposes of this Compact only, the following definitions shall apply:

1. "Abstract" means the copy of the document entitled "Abstract of U.S. Fish and Wildlife Service Water Rights" referenced in this Compact as Appendix 1.

2. "Consumptive" when referring to a water right recognized under state law means a use of water which removes water from the source of supply such that the quality or quantity is reduced or the timing of return delayed, making it unusable or unavailable for use by others, and includes evaporative loss from impoundments or natural lakes.

3. "Department" means the Montana Department of Natural Resources and Conservation or its successor.

4. "Developed spring" means any diversion from a spring for beneficial use under state law and does not require augmentation of flow.

5. "Effective date of this Compact" means the date of the ratification of the Compact by the Montana legislature, written approval by the United States Department of the Interior, or written approval by the United States Department of Justice, whichever is latest.

6. "Groundwater" means water that is beneath the ground surface.

7. "Minimum flow" means the flow of water in a stream measured in cubic feet per second at the point designated in Article II of the Compact, at or below which the United States has the right to seek curtailment of junior water rights upstream from the Refuge.

8. "Natural flow" means the water that the parties agree shall remain in the stream in satisfaction of the United States' water right for the purposes of the federal reservation.

9. "Non-consumptive" see "consumptive"

10. "Parties" means the State of Montana and the United States.

11. "Person" means an individual, association, partnership, corporation, state agency, political subdivision, or any other entity, but does not include the United States.

12. "Recognized under state law" when referring to a water right or use means a water right or use protected by state law, but does not include state recognition of a federal or tribal reserved water right arising under federal law.

13. "Red Rock Lakes National Wildlife Refuge" means those lands located in Montana that were withdrawn and reserved by Executive Orders No. 7023 of April 22, 1935, and 7172 of September 4, 1935, and all lands acquired by the United States Fish and Wildlife Service within the boundaries established by Executive Orders 7023 and 7172.

14. "Red Rock Lakes Wilderness Area" means those lands within Red Rock Lakes National Wildlife Refuge designated as wilderness by Public Law 94-557 of October 19, 1976, 16 USC 1132.

15. "Refuge" means both the Red Rock Lakes National Wildlife Refuge and the Red Rock Lakes Wilderness Area.

16. "State" means the State of Montana and all officers, agents, departments, and political subdivisions thereof. Unless otherwise indicated, for purposes of notification or consent, "state" means the Director of the Montana Department of Natural Resources and Conservation or his or her designee.

17. "United States" means the federal government and all officers, agencies, departments and political subdivisions thereof. Unless otherwise indicated, for purposes of notification or consent other than service in litigation, "United States" means the Secretary of the Department of the Interior, or his or her designees.

ARTICLE II - WATER RIGHT

The parties agree that the following water rights are in settlement of all of the United States' water rights for the Refuge, including federal reserved and state-based water rights acquired with the purchase of land. The parties to this agreement recognize that the water rights described in this Compact are junior to any tribal water rights with a priority date before the effective date of the Compact, including aboriginal rights, if any, in the basins affected. All water rights described in this Article are subject to Article IV.A. of this Compact.

A. **Quantification:** The United States shall have the right to water from the following sources where they occur on the Refuge:

1. **Consumptive Use:**

Red Rock Lakes National Wildlife Refuge — Consumptive Use

	Legal Description of impoundment or POD				Elev. of Dam	Surface Acres	Acre-Feet Capacity	Future Acre-Feet	Natural or Manmade	Canal	Diversion Rate	Source of Diverted Water
	Qtr	Sec.	Twnshp	Range							CFS

Bold letters denote data taken from the dam safety reports, all other data is derived from topographic maps and Refuge staff estimates.

POD = Point of Diversion N = Natural lake NWS = Natural lake with manmade structure M = Manmade lake

1 = Estimated average depth 2 feet 3 = Estimated average depth 3 feet
2 = Estimated average depth 2.5 feet 4 = Estimated average depth 6 feet

2. **Natural Flow:** The United States has a water right to the natural flow in all the tributaries entering the Refuge above the most downstream point on the Refuge at the point the tributary enters the Refuge in the amount of the natural flow remaining after satisfaction of the following water rights:

a. all rights recognized under state law upstream from the Refuge with a priority date prior to the effective date of this Compact; and

b. any rights exempt from the basin closure set forth in Article III.A. of this Compact.

3. **Minimum Flow:** Subject to the provisions of Article III.C.1., the United States has a water right for minimum flows on Red Rock, Tom and Odell Creeks as follows:

a. Red Rock Creek: 15 cfs, measured at NE SE NW Sec. 17, T14S, R1E;

b. Tom Creek: 1.4 cfs, measured at the county road in SW NE NE Sec. 25, T14S, R1W;

c. Odell Creek: 11 cfs, measured at the county road in SW SW SE Sec. 24, T14S, R2W.

4. **Lake Level:** The United States has the right to maintain the natural lake level of Lower Red Rocks Lake at an elevation of 6607.5 feet. The United States may store additional water only to the extent consistent with the Memorandum of Understanding of February 4, 1987, between the United States and the Water Users Irrigation Company (Lima Reservoir) and East Bench Irrigation District and state water right permit number 65254-S41A.

5. **Emergency Fire Suppression:** The use of water for emergency fire suppression benefits the public, and is necessary for the purposes of the Refuge. The United States may, as part of its water right, divert water for fire suppression at the Refuge as needed and without a definition of the specific elements of a recordable water right. Use of water for fire suppression shall not be considered an exercise of the United States' water rights for consumptive use or a violation of its water rights for natural or minimum flow.

B. **Relative Priority:**

1. **Priority Date:**

a. Consumptive Use and Natural Flow: Subject to the subordination provisions of Article II.B.2.a., the United States has a priority date of April 22, 1935, for the water rights for consumptive use and natural flow described in Article II.A.1. and 2. of this Compact.

b. Minimum Flow: Subject to the provisions of Article III.C.1. setting forth the means to satisfy the minimum flow rights for the Refuge and the subordination provisions of Article II.B.2.b., the United States has a priority date of October 30, 1888, for the 15 cfs minimum flow on Red Rock Creek; June 15, 1894, for the 1.4 cfs minimum flow on Tom Creek; and June 28, 1889, for the 11 cfs minimum flow on Odell Creek.

2. **Subordination:**

a. Consumptive Use Natural Flow and Lake Levels: The water rights for consumptive use set forth in Article II.A.1. and natural flow set forth in Article II.A.2. and lake levels set forth in Article II.A.4. are subordinate to the following rights upstream from the most downstream point on the Refuge:

(1) any right recognized under state law with a priority date before the effective date of this Compact; and

(2) any right exempt from the basin closure set forth in Article III.A. of this Compact.

b. Minimum Flow: The water rights for minimum flows on Red Rock, Tom and Odell Creeks set forth in Article II.A.3. of this Compact are subordinate to the following rights upstream from the Refuge:

(1) any right for the purpose of domestic use;

(2) any right for the purpose of instream stockwatering; and

(3) any change in use of a water right for the purpose of instream stockwatering to off-stream stockwatering that does not result in an increase in the historic consumptive use of water.

C. **Period of Use:**

1. **Natural Flow/Consumptive Use:** The period of use of the United States' water rights for natural flow and consumptive use set forth in Article II.A.1. and 2. shall be from January 1 through December 31 of each year.

2. **Minimum Flow:** The period of use of the United States' water rights for minimum flows set forth in Article II.A.3. shall be from April 1 through November 30 of each year.

D. **Points and Means of Diversion/Location of Natural and Minimum Flow Rights:**

1. **Consumptive Use:** See Table at Article II.A.1.

2. **Natural Flow:** The United States' water rights for natural flow apply to the portion of the streams specified in this Compact that flow over or form the boundary of land administered by the Fish and Wildlife Service.

3. **Minimum Flow:** The United States' water rights for minimum flow are measured at the points set forth in Article II.A.3.

E. **Purposes:** The United States' rights to water may be used for the following purposes:

1. **Consumptive Use:** The United States' water rights for consumptive use shall be used for the purposes of the Refuge including wildlife habitat maintenance and enhancement. Subject to the limitations set forth in Article III.E., the United States may change the use of water identified for consumptive use in Article II.A.1.

2. **Natural and Minimum Flows:** The United States' water rights to natural and minimum flows shall be used on the Refuge for wildlife habitat maintenance and enhancement. The United States' water rights to natural flow set forth in Article II.A.2. and to minimum flows set forth in Article II.A.3. shall be used only for the purpose of instream flow and shall not be changed or diverted for any other use, except for fire suppression as set forth in Article II.A.5.

ARTICLE III - IMPLEMENTATION

A. **Basin Closure:**

1. In the drainage basins upstream of the most downstream point on the Refuge, the Department shall not process or grant an application for a permit to appropriate or to reserve water for consumptive use after the effective date of this Compact, provided that, the following appropriations are exempt from this closure:

a. certificates of water right for appropriation of groundwater by means of a well or developed spring with a maximum appropriation of 35 gallons per minute or less that does not exceed a total appropriation of 10 acre-feet per year;

b. permits for appropriation of groundwater by means of a well or developed spring with an appropriation of greater than 35 gallons per minute or a total appropriation in excess of 10 acre-feet per year, if the Department determines by a preponderance of the evidence based on information provided by the applicant or information from any other source available to the Department that the groundwater is not hydrologically connected to surface water upstream from or on the Refuge;

c. permits or changes in water right for appropriation of groundwater for irrigation purposes when the number of acres to be irrigated from groundwater under the permit or change in water right will be accompanied by a corresponding decrease in the number of acres irrigated from surface water sources upstream from the Refuge;

d. permits for stock watering ponds with a maximum capacity of the impoundment or pit of less than 15 acre-feet and an appropriation of less than 30 acre-feet per year from a source other than a perennial flowing stream;

e. permits for domestic use;

f. permits for nonconsumptive use; and

g. temporary emergency appropriations.

2. If a temporary or permanent basin closure is enacted under state law for a drainage basin or subbasin for which future consumptive water use is limited under this Compact, the most restrictive measures applicable to consumptive use of surface or groundwater shall control.

3. Within 180 days following the effective date of this Compact, the Department shall mail notice of the basin closure to every person or public agency of record with a claim of water right or permit in the portion of the drainage basins subject to closure.

B. **Lake Levels:** The United States agrees to continue efforts to coordinate lake water level management with Water Users Irrigation Company (Lima Reservoir) and East Bench Irrigation District or their successors in interest. It is not intended that this Compact affect in any way the Memorandum of Understanding between the United States and the Irrigation Company and Irrigation District listed above, or the ability of the parties to modify that agreement.

C. **Enforcement of Water Right:**

1. **Minimum flow:**

a. Minimum flow rights set forth in Article II.A.3. may be satisfied through cooperative agreements entered into by the FWS and any person holding a water right with a point of diversion on Red Rock, Tom or Odell Creeks or their tributaries upstream of the Refuge. The FWS may, on agreement with the parties to a cooperative agreement, modify an existing agreement. The FWS may enter into additional cooperative agreements after the effective date of the Compact. Modification of a cooperative agreement or entry into a new cooperative agreement shall not be considered a modification of the Compact. As between the FWS and signatories to cooperative agreements, the FWS will use its best efforts to seek satisfaction of the minimum flow rights pursuant to the cooperative agreements prior to resorting to remedies set forth in Article III.C.2.

b. Prior to seeking satisfaction of the minimum flow, the FWS shall cease its own diversions, if any, from:

(1) Red Rock Creek and its tributaries upstream from the point of measurement when measured flow is approximately 25 cfs;

(2) Odell Creek and its tributaries upstream from the point of measurement when measured flow is approximately 20 cfs; and

(3) Tom Creek and its tributaries upstream from the point of measurement when measured flow is approximately 5 cfs.

c. On acquisition by or transfer to the FWS of any water right subject to a cooperative agreement, the FWS will continue to exercise the water right in a manner that satisfies the minimum flow at least to the degree set forth in the cooperative agreement, and the provisions of Article III.C.1.b. requiring curtailment of FWS diversions shall apply.

d. In the absence of a cooperative agreement, the FWS may seek curtailment of a water use to satisfy the minimum flow by resort to a court of competent jurisdiction pursuant to Article III.C.2. In any proceeding before a court of competent jurisdiction, the FWS will not seek curtailment of any water right which, based on the experience and observation of the FWS, does not cause a measured or cumulative reduction in flow of Red Rock, Tom, or Odell Creeks at the point of measurement set forth in Article II.A.3., and will limit the period for which curtailment is sought to that necessary to maintain the minimum flow.

2. The United States, the State, or a holder of a water right recognized under state law, may petition a state or federal court of competent jurisdiction for relief when a controversy arises between the United States' reserved water rights described by this Compact, and a holder of a water right recognized under state law. Resolution of the controversy shall be governed by the terms of this Compact where applicable or, to the extent not applicable, by appropriate state or federal law.

3. The United States agrees that a water commissioner appointed by a state or federal court of competent jurisdiction, or other official authorized by future changes in law, may enter the Refuge for the purpose of data collection, including the collection of information necessary for water distribution on or off the Refuge, and to inspect structures for the diversion and measurement of water described in this Compact for consumptive use and for the measurement of natural and minimum flow. The terms of entry shall be as specified in an order of a state or federal court of competent jurisdiction.

4. The Department may enter the Refuge, at a reasonable hour of the day, for the purposes of data collection on water diversion and stream flow or inspection of devices maintained by

the United States pursuant to this Compact. The Department shall notify the United States by certified mail or in person, at least 24 hours prior to entry.

5. The United States may request an investigation by the Department of a diversion located upstream of the portion of a stream for which a water right is described in this Compact. The Department may investigate. If an investigation occurs, the United States may accompany the Department.

6. The United States shall maintain structures, including wellhead equipment and casing, for the diversion and measurement of water authorized for consumptive use by this Compact. The United States shall maintain the devices it considers necessary for enforcement of its reserved water right for natural and minimum flow described in this Compact.

7. A person who violates or refuses or neglects to comply with the provisions of this Compact or an order of the Department pursuant to this Compact is subject to the penalties provided by state law.

D. **Use of Water Right:** The rights of the United States described in this agreement are federal water rights. Non-use of all or a part of the federal water rights described in this Compact shall not constitute abandonment or forfeiture of those rights. The federal water rights described in this Compact need not be applied to a use deemed beneficial under state law, but shall be restricted to uses necessary to fulfill the purposes of the Refuge.

E. **Change in Use:**

1. **Natural and Minimum Flow:** Water rights specified in this Compact for natural and minimum flow shall not be subject to change to any other use, provided that: the emergency use of water for fire suppression as provided for in Article II.A.5. shall not be considered a change or alteration in use, or violation of a water right for natural or minimum flow.

2. **Consumptive Uses:**

a. The United States may make a change in the use of its consumptive use water rights, provided that:

(1) the action shall be in fulfillment of the purposes of the Refuge described in Article II.E. rather than with reference to a beneficial use as defined by state law;

(2) the total use shall not exceed the amount described in this Compact; and

(3) the action shall not adversely affect a water right that is recognized under state law.

b. With the exception of the purpose for which the water right is used, the United States, in making the change, shall comply with the provisions of Title 85, Chapter 2, Montana Code Annotated, applicable to change in appropriative right at the time of the change. The United States may appeal any decision by the Department to a state or federal court of competent jurisdiction.

ARTICLE IV - GENERAL PROVISIONS

A. **No Effect on Tribal Rights or Other Federal Reserved Water Rights:**

1. The relationship between the water rights of the United States described herein and any rights to water of an Indian Tribe, or of any federally derived water right of an individual, or of the United States on behalf of such tribe or individual shall be determined by the rule of priority. The parties to this agreement recognize that the water rights described in this Compact are junior to any tribal water rights with a priority date before the effective date of the Compact, including aboriginal rights, if any, in the basins affected.

2. Nothing in this Compact may be construed or interpreted in any manner to establish the nature, extent or manner of administration of the rights to water of any other federal agency or federal lands in Montana other than those of the Fish and Wildlife Service at the Refuge.

3. Nothing in this Compact may be construed or interpreted in any manner to establish the nature, extent or manner of administration of the rights to water of any Indian Tribes and tribal members.

4. Nothing in this Compact is otherwise intended to conflict with or abrogate a right or claim of any Indian Tribe regarding boundaries or property interests.

B. **State Water Rights:** Nothing in this Compact limits the exclusive authority of the State, including the authority of a water commissioner authorized by state law, to administer all current and future water rights recognized under state law within and upstream of the

Refuge, provided that in administration of those water rights in which the United States has an interest, such authority is limited to that not in conflict with federal law.

C. **Abstract:** Concurrent with this Compact, the parties have prepared an Abstract, a copy of which is referenced as Appendix 1, which is a specific listing of all of the United States' water rights for the Refuge, that are described in this Compact and quantified in accordance with this Compact. The parties prepared the Abstract to comply with the requirements for a final decree as set forth in 85-2-234, MCA, and in an effort to assist the state courts in the process of entering decrees accurately and comprehensively reflecting the rights described in this Compact. The rights specified in the Abstract are subject to the terms of this Compact. In the event of a discrepancy between a right listed in the Abstract and that same right as quantified in accordance with Articles II and III of this Compact, the parties intend that the quantification in accordance with Articles II and III of this Compact shall govern and shall be reflected in a final decree.

D. **General Disclaimers:** Nothing in this Compact may be construed or interpreted:

1. as a precedent for the litigation of reserved water rights or the interpretation or administration of future compacts between the United States and the State; or of the United States and any other state;

2. except as agreed to in cooperative agreements authorized by Article III.C.1. of this Compact, as a waiver by the United States on behalf of the FWS of its right under state law to raise objections in state court to individual water rights claimed pursuant to the state Water Use Act, Title 85, of the Montana Code Annotated, in the basins affected by this Compact; or any right to raise objections in an appropriate forum to individual water rights subject to a provisional permit under the state Water Use Act, Title 85, of the Montana Code Annotated, in the basins affected by this Compact;

3. as a waiver by the United States of its right to seek relief from a conflicting water use not entitled to protection under the terms of this Compact;

4. to establish a precedent for other agreements between the State and the United States or an Indian tribe;

5. to determine the relative rights, *inter sese*, of persons using water under the authority of state law or to limit the rights of the parties or a person to litigate an issue not resolved by this Compact;

6. to create or deny substantive rights through headings or captions used in this Compact;

7. to expand or restrict any waiver of sovereign immunity existing pursuant to federal law as of the effective date of this Compact;

8. to affect the right of the State to seek fees or reimbursement for costs or the right of the United States to contest the imposition of such fees or costs, pursuant to a ruling by a state or federal court of competent jurisdiction or Act of Congress;

9. to affect in any manner the entitlement to or quantification of other federal water rights;

10. to be binding on the United States with regard to the water rights of the United States for any area other than the Refuge;

11. to affect the water rights of any other federal agency that is not a successor in interest to the water rights subject to this Compact;

12. to prevent the United States from constructing or modifying an outlet to an impoundment at the Refuge in compliance with all applicable laws;

13. to prevent the United States from seeking a permit to appropriate water under state law from a source not closed to new permits by this Compact or any other law.

E. **Reservation of Rights:** The parties expressly reserve all rights not granted, described or relinquished in this Compact.

F. **Severability:** The provisions of this Compact are not severable.

G. **Multiple Originals:** This Compact is executed in quintuplicate. Each of the five (5) Compacts bearing original signatures shall be deemed an original.

H. **Notice:** Unless otherwise specifically provided for in this Compact, service of notice required hereunder, except service in litigation, shall be:

1. **State:** Upon the Director of the Department and such other officials as he or she may designate in writing.

2. **United States:** Upon the Secretary of the Interior and such other officials as he or she may designate in writing.

ARTICLE V - FINALITY OF COMPACT

A. **Binding Effect:**

1. The effective date of this Compact is the date of the ratification of this Compact by the Montana legislature, written approval by the United States Department of the Interior, or written approval by the United States Department of Justice, whichever occurs later. Once effective, all of the provisions of this Compact shall be binding on the parties.

2. Following the effective date, this Compact shall not be modified without the consent of both parties. Either party may seek enforcement of this Compact in a court of competent jurisdiction. Any attempt unilaterally to modify this Compact by either party shall render this Compact voidable at the election of the other party.

3. On approval of this Compact by a state or federal court of competent jurisdiction and entry of a decree by such court confirming the rights described herein, this Compact and such rights are binding on all persons bound by the final order of the court.

4. If an objection to this Compact is sustained pursuant to 85-2-702(3), MCA, this Compact shall be voidable by action of and without prejudice to either party.

B. **Disposition of Actions:** Subject to the following stipulations and within one hundred eighty (180) days of the effective date of this Compact, the parties shall submit this Compact to an appropriate state court or courts having jurisdiction over this matter in an action commenced pursuant to 43 U.S.C. 666, for approval in accordance with state law and for the incorporation of the water rights described in this Compact into a decree or decrees entered therein. The parties understand and agree that the submission of this Compact to a state court or courts, as provided for in this Compact, is solely to comply with the provisions of 85-2-702(3), MCA, and does not expand the jurisdiction of the state court or expand in any manner the waiver of sovereign immunity of the United States in the McCarran Amendment, 43 U.S.C. 666, or other provision of federal law.

1. **Dismissal of Filed Claims:** At the time the state courts approve the water rights described in this Compact and enter a decree or decrees confirming the rights described herein, such courts shall dismiss, with prejudice, all of the water right claims specified in Appendix 2 to this Compact. If this Compact is not approved or a water right described herein is not confirmed, the specified claims shall not be dismissed.

2. **Federal Court:** This Compact may be filed as a consent decree in federal court only if it is finally determined in a judgment binding on the State of Montana that the state courts lack jurisdiction over some or all of the water rights described in this Compact. Within one year of such judgment the United States agrees to commence such additional proceedings in the federal district court for the District of Montana as may be necessary to judicially confirm the water rights described herein.

3. **Continuation of Negotiations:** The parties were unable to finalize agreement on quantification of the water rights for: the National Bison Range; Bowdoin National Wildlife Refuge; and Charles M. Russell and UL Bend National Wildlife Refuges and UL Bend Wilderness Area, prior to the effective date of this Compact. The parties agree to continue to pursue, in good faith, quantification of water rights for these areas. In the event the parties are unable to agree on quantification, the United States retains its right to have the quantity of any reserved water rights for these areas adjudicated in a state or federal court of competent jurisdiction.

C. **Settlement of Claims:** The parties intend that the water rights described in this Compact are in full and final settlement of the water right claims for the Refuge land described in this Compact and administered by the Fish and Wildlife Service in Montana on the effective date of this Compact. On the effective date of this Compact, the United States hereby and in full settlement of any and all claims to water filed by the United States or which could have been filed by the United States for Red Rock Lakes National Wildlife Refuge and Wilderness Area, relinquishes forever all said claims to water within the State of Montana for Red Rock Lakes National Wildlife Refuge and Wilderness Area. The state agrees to recognize the water rights described and quantified herein, and shall, except as expressly provided for herein, treat them in the same manner as a water right recognized by the state.

D. The parties agree to defend the provisions and purposes of this Compact from all challenges and attacks.

IN WITNESS WHEREOF the representatives of the State of Montana and the United States have signed this Compact on the 1st day of February, 2000.

History: En. Sec. 1, Ch. 347, L. 1999; amd. Sec. 1, Ch. 187, L. 2001.

Part 9
Crow Tribe-Montana Compact

85-20-901. Crow Tribe-Montana compact ratified. The compact entered into by the State of Montana and the Crow Tribe and filed with the Secretary of State of the State of Montana under the provisions of 85-2-702 on June 22, 1999, is ratified. The compact is as follows:

WATER RIGHTS COMPACT ENTERED INTO BY
THE STATE OF MONTANA,
THE CROW TRIBE,
AND THE UNITED STATES OF AMERICA

This Compact is entered into by and among the State of Montana, the Crow Tribe, and the United States of America for the purpose of settling any and all existing water rights claims of or on behalf of the Crow Tribe of Indians in the State of Montana.

ARTICLE I - RECITALS

WHEREAS, in 1975, the United States, on behalf of the Crow Tribe, brought suit in the United States District Court for the District of Montana to obtain a final determination of the Tribe's water rights, see, U.S. v. Big Horn Low Line Canal Company, et al., No. CIV-75-34-BLG (filed April 17, 1975); and

WHEREAS, Congress consented to state court jurisdiction over the quantification of claims to water rights held by the United States of America in trust for the Tribe; see, "the McCarran Amendment", 43 U.S.C. 666(a)(1)(1952); Colorado River Water Conservation Dist. v. United States, 424 U.S. 800 (1976); Arizona v. San Carlos Apache Tribe, 463 U.S. 545 (1983); and

WHEREAS, the State of Montana initiated a general stream adjudication pursuant to the provisions of Chapter 697, Laws of Montana 1979, which includes Crow tribal water rights; and

WHEREAS, the United States has filed claims on behalf of the Crow Tribe in the general stream adjudication initiated by the State of Montana; and

WHEREAS, the lands and waters constituting the Crow Indian Reservation and Tribal Interests in the Ceded Strip were part of the area recognized as the territory of the Crow Indians under the Treaty of Fort Laramie of September 17, 1851 and also were part of the area set apart for the Crow Tribe under the Treaty of Fort Laramie of May 7, 1868; and

WHEREAS, for the purposes of this Compact, the priority date for the Tribal Water recognized is May 7, 1868, which is the senior water right on the water sources covered by this Compact; and

WHEREAS, the Montana Reserved Water Rights Compact Commission, under 85-2-702(1), MCA, is authorized to negotiate settlement of water rights claims filed by Indian tribes or on their behalf by the United States claiming reserved waters within the State of Montana; and

WHEREAS, the federal district court litigation was stayed in 1983 pending the outcome of Montana State court water adjudication proceedings, see, Northern Cheyenne Tribe v. Adsit, 721 F.2d 1187, 1189 (9th Cir. 1983); and

WHEREAS, the adjudication of Crow tribal water rights in the state court proceedings has been suspended while negotiations are proceeding to conclude a compact resolving all water rights claims of the Crow Tribe within the State of Montana; and

WHEREAS, the Crow Tribal Council, or its duly designated representatives, have authority to negotiate this Compact pursuant to Resolution No. 99-33; and

WHEREAS, the United States Attorney General, or a duly designated official of the United States Department of Justice, has authority to execute this Compact on behalf of the United States pursuant to the authority to settle litigation contained in 28 U.S.C. Sections 516-17 (1993); and

WHEREAS, the Secretary of the Interior, or a duly designated official of the United States Department of the Interior, has authority to execute this Compact on behalf of the United States Department of the Interior pursuant to 43 U.S.C. Section 1457 (1986, Supp. 1992), inter alia; and

WHEREAS, the Crow Tribe, the State of Montana, and the United States agree that the Tribal Water Right described in this Compact shall be in satisfaction of all the Tribe's water rights claims within the State of Montana; and

WHEREAS, it is in the best interest of all Parties that the water rights claims of the Crow Tribe be settled through agreement between and among the Tribe, the State of Montana, and the United States; and

WHEREAS, in settling the water rights claims of the Crow Tribe the Parties do not intend to alter or amend or to adopt or preclude any interpretation of the Yellowstone River Compact (Act of October 10, 1951, ch. 629, 65 Stat.663 (1951));

NOW THEREFORE, the Parties agree to enter into this Compact for the purpose of settling the water rights claims of the Crow Tribe within the State of Montana.

ARTICLE II - DEFINITIONS

The following definitions shall apply for purposes of this Compact:

1. "Acre-foot" or "AF" means the amount of water necessary to cover one acre to a depth of one foot and is equivalent to 43,560 cubic feet.

2. "Acre Feet Per Year" or "AFY" means the quantity of water to which the Tribe has a right each year measured in acre feet over a period of a year.

3. "Adverse Affect" or "Adversely Affect" means interference with or to interfere with the reasonable exercise of a water right.

4. "Bighorn River Basin" means Water Court Basin 43P, the mainstem of the Bighorn River and its tributaries (exclusive of the Little Bighorn River and its tributaries) within Montana to its confluence with the Yellowstone River, as depicted on the map attached as Appendix 2.

5. "Bighorn Lake" means the body of water impounded on the Bighorn River by Yellowtail Dam, Yellowtail Unit, Lower Bighorn Division, Pick-Sloan Missouri Program, Montana.

6. "Board" means the Crow - Montana Compact Board established by Section F, of Article IV of this Compact.

7. "Ceded Strip" means the area covered by Article III of the Act of April 27, 1904 (33 Stat. 352), as depicted on the map attached as Appendix 5.

8. "Change in Use" as applied to the Tribal Water Right, means a change in the point of diversion, the place of use, the purpose of use, or the place or the means of storage.

9. "Clarks Fork Yellowstone River Basin" means Water Court Basin 43D, the mainstem of the Clarks Fork Yellowstone River and its tributaries from the Montana-Wyoming border to its confluence with the Yellowstone River, as depicted on the map attached as Appendix 2.

10. "Crow Irrigation Project" means the irrigation project authorized by the Act of March 3, 1891 (26 Stat. 989, 1040) managed by the United States, Department of the Interior, Bureau of Indian Affairs, as of the date this Compact has been ratified by the Montana legislature, consisting of the following project units: Agency, Big Horn, Forty Mile, Lodge Grass 1, Lodge Grass 2, Pryor, Reno, Soap Creek, and Upper Little Horn; and including land held in trust by the United States for the Tribe or a Tribal member within the Bozeman Trail and Two Leggins districts which are managed by private irrigation associations as of the date this Compact has been ratified by the Montana legislature.

11. "DNRC" means the Montana Department of Natural Resources and Conservation, or any successor agency.

12. "Effective Date" means the date on which the Compact is ratified by the Crow Tribal Council, by the Montana legislature, and by the Congress of the United States, whichever date is latest.

13. "Groundwater" means any water that is beneath the ground surface.

14. "Little Bighorn River Basin" means Water Court Basin 43O, the mainstem of the Little Bighorn River and its tributaries from the Montana-Wyoming border to its confluence with the Bighorn River, as depicted on the map attached as Appendix 2.

15. "Natural Flow" means water that would exist in the Bighorn River and its tributaries in the absence of human intervention.

16. "Parties" means the Tribe, the State, and the United States.

17. "Person" means an individual or any other entity, public or private, including the State, the Tribe, and the United States and all officers, agents, and departments of each of the above.

18. "Pryor Creek Basin" means Water Court Basin 43E, the mainstem of Pryor Creek and its tributaries from its headwaters to its confluence with the Yellowstone River, as depicted on the map attached as Appendix 2.

19. "Recognized Under State Law" when referring to a water right, means a water right arising under Montana law or a water right held by a nonmember of the Tribe on land not held in trust by the United States for the Tribe or a Tribal member.

20. "Release" means to discharge water from storage, or the discharge of water from storage.

21. "Reservation" means the Crow Indian Reservation consisting of the area as presently set apart for the Crow Tribe pursuant to the following Treaty and laws: Article 2 of the Fort Laramie Treaty of May 7, 1868 (15 Stat. 649); the Act of April 11, 1882 (22 Stat. 42); the Act of March 3, 1891 (26 Stat. 989); the Act of April 27, 1904 (33 Stat. 352); the Act of August 31, 1937 (50 Stat. 884); and, the Act of November 2, 1994 (108 Stat. 4636), as depicted on the map attached as Appendix 4.

22. "Rosebud Creek Basin" means Water Court Basin 42A, the mainstem of Rosebud Creek and its tributaries from its headwaters to its confluence with the Yellowstone River, as depicted on the map attached as Appendix 2.

23. "Secretary" means the Secretary of the United States Department of the Interior, or his or her duly authorized representative.

24. "Shoshone River Basin" means Water Court Basin 43N, the mainstem of the Shoshone River and its tributaries within Montana, as depicted on the map attached as Appendix 2.

25. "State" means the State of Montana and all officers, agents, departments, and political subdivisions thereof.

26. "Tongue River Basin" means Water Court Basin 42B, the mainstem of the Tongue River and its tributaries from the Montana-Wyoming border to above and including Hanging Woman Creek, as depicted on the map attached as Appendix 2.

27. "Transfer" as applied to the Tribal Water Right, means to authorize a person to use all or any part of the Tribal Water Right through a service contract, lease, or other similar agreement of limited duration.

28. "Tribal Water Resources Department" or "TWRD" means the Crow Tribal Water Resources Department, or any successor agency.

29. "Tribal Interests in the Ceded Strip" means all present and acquired interests in real property, including mineral interests, held in trust by the United States for the Tribe or Tribal members within the Ceded Strip, consisting of: Crow Indian allotments held in trust by the United States for the Tribe or Tribal members; interests restored to the Tribe pursuant to the Act of May 19, 1958 (72 Stat. 121), as modified by the Act of August 14, 1958 (72 Stat. 575); and other interests held in trust by the United States for the Tribe or Tribal members.

30. "Tribal Water Right" means the right of the Crow Tribe, including any Tribal member, to divert, use, or store water as described in Article III of this Compact.

31. "Tribe" means the Crow Tribe and all officers, agents, and departments thereof.

32. "United States" means the federal government and all officers, agencies, and departments thereof.

33. "Yellowstone River Basin between Bighorn River and Tongue River" means Water Court Basin 42KJ, the mainstem of the Yellowstone River and its tributaries between Bighorn River and Tongue River, as depicted on the map attached as Appendix 2.

34. "Yellowstone River Basin between Clarks Fork Yellowstone River and Bighorn River" means Water Court Basin 43Q, the mainstem of the Yellowstone River and its tributaries between Clarks Fork Yellowstone River and Bighorn River, as depicted on the map attached as Appendix 2.

ARTICLE III - TRIBAL WATER RIGHT

A. Basin 43P: Bighorn River.

1. Quantification - Source - Volume.

a. Natural Flow. The Tribe has a quantified water right to the Natural Flow of the Bighorn River for current uses developed as of the date this Compact has been ratified by the Montana legislature and new development within the Reservation of 500,000 AFY. The use of this right is subject to Sections A.6. and A.8.a., of Article III, and the terms and conditions of the streamflow and lake level management plan agreed to in accordance with Section A.7., of Article III.

(1). The Tribe has a right to divert or use or to authorize the diversion or use of water from the Natural Flow of the Bighorn River within the Reservation, subject to the terms and conditions in Section C., of Article IV.

(2). The Tribe may change the source of water from the Natural Flow of the Bighorn River to surface flow or storage of any tributary within the Bighorn River Basin within the Reservation or to Groundwater within the Bighorn River Basin within the Reservation, subject to the terms and conditions in Section C.2.a., of Article IV.

(3). The use of the Tribal Water Right on units of the Crow Irrigation Project that divert water from the Bighorn River as part of that project is a use of the Natural Flow Tribal Water Right set forth in Section A.1.a., of Article III, in the Bighorn River Basin, and the use of this water shall be subject to federal law.

b. Storage in Bighorn Lake.

(1). Subject to the approval of, and any terms and conditions specified by, Congress and to the terms and conditions of the streamflow and lake level management plan agreed to in accordance with Section A.7., of Article III, the Tribe shall be entitled to an allocation of 300,000 AFY of water stored in Bighorn Lake. The Tribe and the State agree to seek as a part of that allocation the following:

(a). not more than 150,000 AFY of the allocation provided in Section A.1.b.(1)., of Article III may be used or diverted as authorized by the Tribe, subject to the terms and conditions in Section C., of Article IV; provided that, not more than 50,000 AFY may be used outside the Reservation subject to the terms and conditions in Section C.2.c., of Article IV. This storage allocation is in addition to the Natural Flow Tribal Water Right provided in Section A.1.a., of Article III.

(b). not less than 150,000 AFY of the allocation provided in Section A.1.b.(1) of Article III shall only be:

(i) managed so as to be available as a Release during low flow periods pursuant to streamflow and lake level management plan agreed to under Section A.7., of Article III; or

(ii) used for beneficial purposes including diversions for consumptive uses in years of excess Natural Flows and excess storage, if any, when unappropriated or unallocated water is available, and subject to the terms and conditions in Section C., of Article IV.

(2). All other water stored in Bighorn Lake, except for the 6,000 AFY currently allocated by contract to the Montana Power Company, or its successor-in-interest, and the 30,000 AFY allocated by Congress to the Northern Cheyenne Tribe, shall be used only for flood control, production of power, maintenance of instream flows, maintenance of lake levels and carryover storage, consistent with Section A.7., of Article III and federal law.

2. Priority Date.

a. Natural Flow. The priority date of the Natural Flow Tribal Water Right set forth in Section A.1.a., of Article III shall be May 7, 1868.

b. Storage. The priority date of the Tribal Water Right to waters stored in Bighorn Lake set forth in Section A.1.b.(1)., of Article III shall be the priority date of the water right held by the Bureau of Reclamation as decreed or to be decreed by the Montana Water Court pursuant to 85-2-234, MCA.

3. Period of Use. The period of use of this water right shall be from January 1 through December 31 of each year.

4. Points and Means of Diversion. Subject to the terms and conditions in Article IV, and except for the 50,000 AFY that may be used outside the Reservation as provided in Section A.1.b.(1).(a)., of Article III, the Tribe may divert or permit the diversion of this water right from any place and by any means within the Reservation for use within the Reservation, provided

that, any diversion structure of the Tribal Water Right upstream of the Two Leggins diversion on the Bighorn River will be constructed to bypass streamflows established or modified pursuant to Section A.7., of Article III.

5. Purposes. Subject to the terms and conditions in Article IV, the Tribal Water Right may be used for any purpose within the Reservation allowed by Tribal and federal law.

6. Protection of Water Rights Recognized Under State Law.

a. Except as provided in Section G.2., of Article III, water rights Recognized Under State Law in the Bighorn River Basin with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV, are protected from:

(1). an assertion of senior priority in the exercise of current uses of the Tribal Water Right developed as of the date this Compact has been ratified by the Montana legislature.

(2). new development of the Tribal Water Right after the date this Compact has been ratified by the Montana legislature. New development of the Tribal Water Right shall be exercised as junior in priority to water rights Recognized Under State Law in the Bighorn River Basin with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV.

b. The protection of water rights Recognized Under State Law set forth in Sections A.6.a.(1). and (2)., of Article III extends to: valid existing water rights as decreed or to be decreed by the Montana Water Court pursuant to 85-2-234, MCA; permits issued by DNRC; state water reservations issued by the Montana Board of Natural Resources and Conservation or DNRC (except for Water Reservation No. 1781-r (g)); water rights exempt from filing in the state adjudication pursuant to 85-2-222, MCA; and, water rights excepted from the permit process pursuant to 85-2-306, MCA. With the exception of rights exempt from filing in the state adjudication pursuant to 85-2-222, MCA, and rights excepted from the permit process pursuant to 85-2-306, MCA, a list of existing water rights as currently claimed and permits and reservations issued is attached as Appendix 3. Appendix 3 shall be modified by decrees resolving claims on the affected basin. Prior to issuance of the final decree, water rights protected shall be as recognized under state law, and all remedies available under state law shall be applicable. Appendix 3 may be modified due to clerical error or omission or to make Appendix 3 consistent with modifications in accordance with 85-2-237, 85-2-314, or 85-2-316(10) through (13), MCA.

c. Administration and distribution between State and Tribal water uses within the Reservation shall be as provided in Section A.4., of Article IV.

d. New development, Change in Use, or Transfer of the Tribal Water Right shall not Adversely Affect the exercise of water rights Recognized Under State Law in the Bighorn River Basin with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV. Measures to prevent Adverse Affect may include Release of water from Bighorn Lake.

e. Existing uses of the Tribal Water Right shall not be Adversely Affected by new development, Change in Use, or Transfer of the Tribal Water Right, except that the Tribe may allow Adverse Affect on uses of the Tribal Water Right on Tribally owned land.

7. Streamflow and Lake Level Management Plan. Pursuant to this Compact, the Tribe, the Secretary, and the State shall develop a streamflow and lake level management plan for the Bighorn River, from the Yellowtail Afterbay Dam to a point immediately upstream of the Two Leggins diversion, and for Bighorn Lake. The streamflow and lake level management plan shall be agreed to within one (1) year after this Compact has been ratified by the Montana legislature. If the streamflow and lake level management plan is not agreed to by the Tribe, the Secretary, or the State the provisions of Section A.4.d., of Article VII apply. The streamflow and lake level management plan is not required to be implemented until the Effective Date of this Compact. The streamflow and lake level management plan may be modified at any time with the consent of the Tribe, the Secretary, and the State. The Montana legislature intends that the streamflow management plan should provide enforceable mechanisms that protect the long-term biological viability of the blue ribbon wild trout fishery on the Bighorn River from the Yellowtail Afterbay Dam to the Two Leggins diversion.

8. Basin Closure within the Bighorn River Basin.

a. In the Bighorn River Basin, DNRC shall not process or grant an application for an appropriation after this Compact has been ratified by the Montana legislature, provided that, in accordance with the terms and conditions in Section D.1., of Article IV, the DNRC may issue a certificate of water right or permit for use on fee land for:

(1). an appropriation of Groundwater by means of a well or developed spring with a maximum appropriation of 35 gallons per minute or less, not to exceed 10 acre-feet per year, unless the appropriation is a combined appropriation from the same source from two or more wells or developed springs exceeding the limitation.

(2). an appropriation of water for use by livestock if the maximum capacity of the impoundment or pit is less than 15 acre-feet and the appropriation is less than 30 acre-feet per year and is from a source other than a perennial flowing stream.

(3). temporary emergency appropriations as provided in 85-2-113(3), MCA.

b. The basin closure applies only to appropriations not excepted from the permit process, as provided in Section D.1., of Article IV, issued under state law and is not a limit on new development of the Tribal Water Right as set forth in this Compact.

c. The basin closure applies only to new appropriations not excepted from the permit process, as provided in Section D.1., of Article IV, and is not a limit on change of use or transfers of water rights Recognized Under State Law, subject to the terms and conditions in Section D.2., of Article IV.

B. Basin 43O: Little Bighorn River.

1. Quantification - Source - Volume.

a. The Tribe has a water right for all surface flow, Groundwater, and storage within the Little Bighorn River Basin, except as provided for in Sections B.6., and B.7.a., of Article III, and except for water apportioned to Wyoming, if any, as determined by a court of competent jurisdiction or Congress. Development of the Tribal Water Right shall be subject to the terms and conditions in Section C., of Article IV.

b. The use of the Tribal Water Right on units of the Crow Irrigation Project that divert water in the Little Bighorn River Basin as part of that project is a use of the Tribal Water Right set forth in Section B.1.a., of Article III, and the use of this water shall be subject to federal law. Water stored in Willow Creek Reservoir also is a use of the Tribal Water Right.

2. Priority Date. The priority date of the Tribal Water Right set forth in Section B.1., of Article III shall be May 7, 1868.

3. Period of Use. The period of use of this water right shall be from January 1 through December 31 of each year.

4. Points and Means of Diversion. Subject to the terms and conditions in Article IV, the Tribe may divert or permit the diversion of the Tribal Water Right from any place and by any means within the Little Bighorn River Basin within the Reservation for use within the Reservation or in connection with Tribal Interests in the Ceded Strip subject to the terms and conditions in Section F., of Article III and Section C.2.b., of Article IV.

5. Purposes. Subject to the terms and conditions in Article IV, the Tribal Water Right may be used within the Reservation for any purpose allowed by Tribal and federal law.

6. Protection of Water Rights Recognized Under State Law.

a. Except as provided in Section G.2., of Article III, water rights Recognized Under State Law in the Little Bighorn River Basin with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV, are protected from:

(1). an assertion of senior priority in the exercise of current uses of the Tribal Water Right developed as of the date this Compact has been ratified by the Montana legislature.

(2). new development of the Tribal Water Right after the date this Compact has been ratified by the Montana legislature. New development of the Tribal Water Right shall be exercised as junior in priority to water rights Recognized Under State Law in the Little Bighorn Basin with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV.

b. The protection of water rights Recognized Under State Law set forth in Sections B.6.a.(1). and (2)., of Article III extends to: valid existing water rights as decreed or to be decreed by the Montana Water Court pursuant to 85-2-234, MCA; permits issued by DNRC; state water reservations issued by the Montana Board of Natural Resources and Conservation or DNRC (except for Water Reservation No. 1781-r (g)); water rights exempt from filing in the state adjudication pursuant to 85-2-222, MCA; and, water rights excepted from the permit process pursuant to 85-2-306, MCA. With the exception of rights exempt from filing in the state adjudication pursuant to 85-2-222, MCA, and rights excepted from the permit process pursuant to 85-2-306, MCA, a list of existing water rights as currently claimed and permits and reservations issued is attached as Appendix 3. Appendix 3 shall be modified by decrees resolving claims on the affected basin. Prior to issuance of the final decree, water rights protected shall be as recognized under state law, and all remedies available under state law shall be applicable. Appendix 3 may be modified due to clerical error or omission or to make Appendix 3 consistent with modifications in accordance with 85-2-237, 85-2-314, or 85-2-316(10) through (13), MCA.

c. Administration and distribution between State and Tribal water uses within the Reservation shall be as provided in Section A.4., of Article IV.

d. New development, Change in Use, or Transfer of the Tribal Water Right shall not Adversely Affect the exercise of water rights Recognized Under State Law in the Little Bighorn River Basin with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV.

e. Existing uses of the Tribal Water Right shall not be Adversely Affected by new development, Change in Use, or Transfer of the Tribal Water Right, except that the Tribe may allow Adverse Affect on uses of the Tribal Water Right on Tribally owned land.

7. Basin Closure within the Little Bighorn River Basin.

a. In the Little Bighorn River Basin, DNRC shall not process or grant an application for an appropriation after this Compact has been ratified by the Montana legislature, provided that, in accordance with the terms and conditions in Section D.1., of Article IV, DNRC may issue a certificate of water right or permit for use on fee land for:

(1). an appropriation of Groundwater by means of a well or developed spring with a maximum appropriation of 35 gallons per minute or less, not to exceed 10 acre-feet per year, unless the appropriation is a combined appropriation from the same source from two or more wells or developed springs exceeding the limitation.

(2). an appropriation of water for use by livestock if the maximum capacity of the impoundment or pit is less than 15 acre-feet and the appropriation is less than 30 acre-feet per year and is from a source other than a perennial flowing stream.

(3). temporary emergency appropriations as provided in 85-2-113(3), MCA.

b. The basin closure applies only to new appropriations not excepted from the permit process, as provided in Section D.1., of Article IV, issued under state law and is not a limit on new development of the Tribal Water Right as set forth in this Compact.

c. The basin closure applies only to new appropriations not excepted from the permit process, as provided in Section D.1., of Article IV, and is not a limit on change of use or transfers of water rights Recognized Under State Law, subject to the terms and conditions in Section D.2., of Article IV.

C. Basin 43E: Pryor Creek.

1. Quantification - Source - Volume.

a. The Tribe has a water right for all surface flow, Groundwater, and storage within the Pryor Creek Basin within the Reservation, except as provided for in Sections C.6. and C.7.a., of Article III. Development of the Tribal Water Right shall be subject to the terms and conditions in Section C., of Article IV.

b. The use of the Tribal Water Right on units of the Crow Irrigation Project that divert water in the Pryor Creek Basin as part of that project is a use of the Tribal Water Right set forth in Section C.1.a., of Article III, and the use of this water shall be subject to federal law.

2. Priority Date. The priority date of the Tribal Water Right set forth in Section C.1., of Article III shall be May 7, 1868.

3. Period of Use. The period of use of this water right shall be from January 1 through December 31 of each year.

4. Points and Means of Diversion. Subject to the terms and conditions in Article IV, the Tribe may divert or permit the diversion of the Tribal Water Right from any place and by any means within the Pryor Creek Basin within the Reservation for use within the Reservation.

5. Purposes. Subject to the terms and conditions in Article IV, the Tribal Water Right may be used within the Reservation for any purpose allowed by Tribal and federal law.

6. Protection of Water Rights Recognized Under State Law.

a. Except as provided in Section G.2., of Article III, water rights Recognized Under State Law in the Pryor Creek Basin with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV, are protected from:

(1). an assertion of senior priority in the exercise of current uses of the Tribal Water Right developed as of the date this Compact has been ratified by the Montana legislature.

(2). new development of the Tribal Water Right after the date this Compact has been ratified by the Montana legislature. New development of the Tribal Water Right shall be exercised as junior in priority to water rights Recognized Under State Law in the Pryor Creek Basin with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV.

b. The protection of water rights Recognized Under State Law set forth in Sections C.6.a.(1). and (2)., of Article III extends to: valid existing water rights as decreed or to be decreed by the Montana Water Court pursuant to 85-2-234, MCA; permits issued by DNRC; state water reservations issued by the Montana Board of Natural Resources and Conservation or DNRC; water rights exempt from filing in the state adjudication pursuant to 85-2-222, MCA; and, water rights excepted from the permit process pursuant to 85-2-306, MCA. With the exception of rights exempt from filing in the state adjudication pursuant to 85-2-222, MCA, and rights excepted from the permit process pursuant to 85-2-306, MCA, a list of existing water rights as currently claimed and permits and reservations issued is attached as Appendix 3. Appendix 3 shall be modified by decrees resolving claims on the affected basin. Prior to issuance of the final decree, water rights protected shall be as recognized under state law, and all remedies available under state law shall be applicable. Appendix 3 may be modified due to clerical error or omission or to make Appendix 3 consistent with modifications in accordance with 85-2-237, 85-2-314, or 85-2-316(10) through (13), MCA.

c. Administration and distribution between State and Tribal water uses within the Reservation shall be as provided in Section A.4., of Article IV.

d. New development, Change in Use, or Transfer of the Tribal Water Right shall not Adversely Affect the exercise of water rights Recognized Under State Law in the Pryor Creek Basin with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV.

e. Existing uses of the Tribal Water Right shall not be Adversely Affected by new development, Change in Use, or Transfer of the Tribal Water Right, except that the Tribe may allow Adverse Affect on uses of the Tribal Water Right on Tribally owned land.

7. Basin Closure within the Pryor Creek Basin.

a. In the Pryor Creek Basin, DNRC shall not process or grant an application for an appropriation after this Compact has been ratified by the Montana legislature, provided that, in accordance with the terms and conditions in Section D.1., of Article IV, DNRC may issue a certificate of water right or permit for use on fee land for:

(1). an appropriation of Groundwater by means of a well or developed spring with a maximum appropriation of 35 gallons per minute or less, not to exceed 10 acre-feet per year, unless the appropriation is a combined appropriation from the same source from two or more wells or developed springs exceeding the limitation.

(2). an appropriation of water for use by livestock if the maximum capacity of the impoundment or pit is less than 15 acre-feet and the appropriation is less than 30 acre-feet per year and is from a source other than a perennial flowing stream.

(3). temporary emergency appropriations as provided in 85-2-113(3), MCA.

b. The basin closure applies only to new appropriations not excepted from the permit process, as provided in Section D.1., of Article IV, issued under state law and is not a limit on new development of the Tribal Water Right as set forth in this Compact.

c. The basin closure applies only to new appropriations not excepted from the permit process, as provided in Section D.1., of Article IV, and is not a limit on change of use or transfers of water rights Recognized Under State Law, subject to the terms and conditions in Section D.2., of Article IV.

D. Basin 42A: Rosebud Creek.

1. Quantification - Source - Volume. The Tribe has a water right for all surface flow, Groundwater, and storage within the Rosebud Creek Basin within the Reservation, except as provided for in Sections D.6. and D.7., of Article III. Development of the Tribal Water Right shall be subject to the terms and conditions in Section C., of Article IV.

2. Priority Date. The priority date of the Tribal Water Right set forth in Section D.1., of Article III shall be May 7, 1868.

3. Period of Use. The period of use of this water right shall be from January 1 through December 31 of each year.

4. Points and Means of Diversion. Subject to the terms and conditions in Article IV, the Tribe may divert or permit the diversion of the Tribal Water Right from any place and by any means within the Rosebud Creek Basin for use within the Reservation.

5. Purposes. Subject to the terms and conditions in Article IV, the Tribal Water Right may be used within the Reservation for any purpose allowed by Tribal and federal law.

6. Protection of Water Rights Recognized Under State Law.

a. Within the Reservation. Except as provided in Section G.2., of Article III, water rights Recognized Under State Law in the Rosebud Creek Basin within the Reservation with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV, are protected from:

(1). an assertion of senior priority in the exercise of current uses of the Tribal Water Right developed as of the date this Compact has been ratified by the Montana legislature.

(2). new development of the Tribal Water Right after the date this Compact has been ratified by the Montana legislature. New development of the Tribal Water Right shall be exercised as junior in priority to water rights Recognized Under State Law in the Rosebud Creek Basin with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV.

b. The protection of water rights Recognized Under State Law set forth in Sections D.6.a.(1). and (2)., of Article III extends to: valid existing water rights as decreed or to be decreed by the Montana Water Court pursuant to 85-2-234, MCA; permits issued by DNRC; state water reservations issued by the Montana Board of Natural Resources and Conservation or DNRC; water rights exempt from filing in the state adjudication pursuant to 85-2-222, MCA; and, water rights excepted from the permit process pursuant to 85-2-306, MCA. With the exception of rights exempt from filing in the state adjudication pursuant to 85-2-222, MCA, and rights excepted from the permit process pursuant to 85-2-306, MCA, a list of existing water rights as currently claimed and permits and reservations issued within the Reservation is attached as Appendix 3. Appendix 3 shall be modified by decrees resolving claims on the affected basin. Prior to issuance of the final decree, water rights protected shall be as recognized under state law, and all remedies available under state law shall be applicable. Appendix 3 may be modified due to clerical error or omission or to make Appendix 3 consistent with modifications in accordance with 85-2-237, 85-2-314, or 85-2-316(10) through (13), MCA.

c. Administration and distribution between State and Tribal water uses within the Reservation shall be as provided in Section A.4., of Article IV.

d. Outside the Reservation. Except as provided in Section G.2., of Article III, water rights Recognized Under State Law in the Rosebud Creek Basin outside the Reservation are protected from an assertion of senior priority in the exercise of the Crow Tribal Water Right to the same extent provided in the Northern Cheyenne - Montana Compact, Sections A.3.c.i. and ii., of Article II, 85-20-301, MCA. Protection from an assertion of senior priority in the exercise of the Crow Tribal Water Right for the Northern Cheyenne Tribal Water Right shall only be as provided in Section D.7., of Article III.

e. New development, Change in Use, or Transfer of the Tribal Water Right shall not Adversely Affect the exercise of water rights Recognized Under State Law in the Rosebud Creek Basin within the Reservation with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV, or outside the Reservation to the same extent provided in the Northern Cheyenne - Montana Compact, Section A.3.c.i. and ii., of Article II, 85-20-301, MCA.

f. Existing uses of the Tribal Water Right shall not be Adversely Affected by development, Change in Use, or Transfer of the Tribal Water Right, except that the Tribe may allow Adverse Affect of uses of the Tribal Water Right on Tribally owned land.

7. Protection of Northern Cheyenne Tribal Water Rights within the Northern Cheyenne Reservation.

a. Except as provided in Section G.2., of Article III, the Northern Cheyenne Tribal Water Right, recognized in the Northern Cheyenne - Montana Compact, Section A.3.a., of Article II, 85-20-301, MCA, is protected from an assertion of senior priority in the exercise of the Crow Tribal Water Right.

b. New development, Change in Use, or Transfer of the Crow Tribal Water Right shall not Adversely Affect the exercise of the Northern Cheyenne Tribal Water Right, recognized in the Northern Cheyenne - Montana Compact, Section A.3.a., of Article II, 85-20-301, MCA.

8. Basin Closure within the Rosebud Creek Basin within the Reservation.

a. In the Rosebud Creek Basin upstream from the point that Rosebud Creek or any tributary of Rosebud Creek leaves the Reservation, DNRC shall not process or grant an application for an appropriation after this Compact has been ratified by the Montana legislature, provided that, in accordance with the terms and conditions in Section D.1., of Article IV, DNRC may issue a certificate of water right or permit for use on fee land for:

(1). an appropriation of Groundwater by means of a well or developed spring with a maximum appropriation of 35 gallons per minute or less, not to exceed 10 acre-feet per year, unless the appropriation is a combined appropriation from the same source from two or more wells or developed springs exceeding the limitation.

(2). an appropriation of water for use by livestock if the maximum capacity of the impoundment or pit is less than 15 acre-feet and the appropriation is less than 30 acre-feet per year and is from a source other than a perennial flowing stream.

(3). temporary emergency appropriations as provided in 85-2-113(3), MCA.

b. The basin closure applies only to new appropriations not excepted from the permit process, as provided in Section D.1., of Article IV, issued under state law and is not a limit on new development of the Tribal Water Right as set forth in this Compact.

c. The basin closure applies only to new appropriations not excepted from the permit process, as provided in Section D.1., of Article IV, and is not a limit on change of use or transfers of water rights Recognized Under State Law, subject to the terms and conditions in Section D.2., of Article IV.

E. Youngs Creek drainage, Squirrel Creek drainage, Tanner Creek drainage, Dry Creek drainage, and Spring Creek drainage within Tongue River Basin; Sarpy Creek drainage within Yellowstone River Basin between Bighorn River and Tongue River; Cottonwood Creek drainage, Five Mile Creek drainage, and Bluewater Creek drainage within Clarks Fork Yellowstone River Basin; Sage Creek drainage within Shoshone River Basin; and, Fly Creek drainage, Blue Creek drainage, Dry Creek drainage, and Bitter Creek drainage within Yellowstone River Basin between Clarks Fork Yellowstone River and Bighorn River.

1. Quantification - Source - Volume. The Tribe has a water right for all surface flow, Groundwater, and storage within the Reservation within Youngs Creek drainage, Squirrel Creek drainage, Tanner Creek drainage, Dry Creek drainage, and Spring Creek drainage within Tongue River Basin; Sarpy Creek drainage within Yellowstone River Basin between Bighorn River and Tongue River; Cottonwood Creek drainage, Five Mile Creek drainage, and Bluewater Creek drainage within Clarks Fork Yellowstone River Basin; Sage Creek drainage within Shoshone River Basin; and, Fly Creek drainage, Blue Creek drainage, Dry Creek drainage, and Bitter Creek drainage within Yellowstone River Basin between Clarks Fork Yellowstone River and Bighorn River, except as provided in Sections E.6. and E.7.a., of Article III. Development of the Tribal Water Right shall be subject to the terms and conditions in Section C., Article IV.

2. Priority Date. The priority date of the Tribal Water Right set forth in Section E.1., of Article III shall be May 7, 1868.

3. Period of Use. The period of use of this water right shall be from January 1 through December 31 of each year.

4. Points and Means of Diversion. Subject to the terms and conditions in Article IV, the Tribe may divert or permit the diversion of the Tribal Water Right from any place and by any means within the drainages listed in Section E.1., of Article III within the Reservation for use within the Reservation.

5. Purposes. Subject to the terms and conditions in Article IV, the Tribal Water Right may be used for any purpose within the Reservation allowed by Tribal and federal law.

6. Protection of Water Rights Recognized Under State Law.

a. Except as provided in Section G.2., of Article III, water rights Recognized Under State Law in the drainages listed in Section E.1., of Article III, with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV, are protected from:

(1). an assertion of senior priority in the exercise of current uses of the Tribal Water Right developed as of the date this Compact has been ratified by the Montana legislature.

(2). new development of the Tribal Water Right after the date this Compact has been ratified by the Montana legislature. New development of the Tribal Water Right shall be exercised as junior in priority to water rights Recognized Under State Law in the drainages listed in Section E.1., of Article III with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV.

b. The protection of water rights Recognized Under State Law set forth in Sections E.6.a.(1). and (2)., of Article III extends only to: valid existing water rights as decreed or to be decreed by the Montana Water Court pursuant to 85-2-234, MCA; permits issued by DNRC; state water reservations issued by the Montana Board of Natural Resources and Conservation or DNRC; water rights exempt from filing in the state adjudication pursuant to 85-2-222, MCA; and, water rights excepted from the permit process pursuant to 85-2-306, MCA. With the exception of rights exempt from filing in the state adjudication pursuant to 85-2-222, MCA, and rights excepted from the permit process pursuant to 85-2-306, MCA, a list of existing water rights as currently claimed and permits and reservations issued is attached as Appendix 3. Appendix 3 shall be modified by decrees resolving claims on the affected basins. Prior to issuance of the final decree, water rights protected shall be as recognized under state law, and all remedies available under state law shall be applicable. Appendix 3 may be modified due to clerical error or omission or to make Appendix 3 consistent with modifications in accordance with 85-2-237, 85-2-314, or 85-2-316(10) through (13), MCA.

c. Administration and distribution between State and Tribal water uses within the Reservation shall be as provided in Section A.4., of Article IV.

d. New development, Change in Use, or Transfer of the Tribal Water Right shall not Adversely Affect the exercise of water rights Recognized Under State Law in each drainage listed in Section E.1., of Article III, with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV.

e. Existing uses of the Tribal Water Right shall not be Adversely Affected by development, Change in Use, or Transfer of the Tribal Water Right, except that the Tribe may allow Adverse Affect of uses of the Tribal Water Right on Tribally owned land.

7. Basin Closure within the Reservation.

a. In the drainages listed in Section E.l., of Article III, upstream from the point that each stream or its tributaries leaves the Reservation, DNRC shall not process or grant an application for an appropriation after this Compact has been ratified by the Montana legislature, provided that, in accordance with the terms and conditions in Section D.1., of Article IV, DNRC may issue a certificate of water right or permit for use on fee land for:

(1). an appropriation of Groundwater by means of a well or developed spring with a maximum appropriation of 35 gallons per minute or less, not to exceed 10 acre-feet per year, unless the appropriation is a combined appropriation from the same source from two or more wells or developed springs exceeding the limitation.

(2). an appropriation of water for use by livestock if the maximum capacity of the impoundment or pit is less than 15 acre-feet and the appropriation is less than 30 acre-feet per year and is from a source other than a perennial flowing stream.

(3). temporary emergency appropriations as provided in 85-2-113(3), MCA.

b. The basin closure applies only to new appropriations not excepted from the permit process, as provided in Section D.1., of Article IV, issued under state law and is not a limit on new development of the Tribal Water Right as set forth in this Compact.

c. The basin closure applies only to new appropriations not excepted from the permit process, as provided in Section D.1., of Article IV, and is not a limit on change of use or transfers of water rights Recognized Under State Law, subject to the terms and conditions in Section D.2., of Article IV.

F. Tribal Water Right in the Ceded Strip.

1. Quantification - Source - Volume.

a. Tribal Interests in the Ceded Strip. As part of the Tribal Water Right, the Tribe has a right to divert a total of 47,000 AFY from surface flow, Groundwater, or storage within the Ceded Strip from portions of the Sarpy Creek drainage and Yellowstone River within Yellowstone River Basin between Bighorn River and Tongue River; Fly Creek drainage and Yellowstone River within Yellowstone River Basin between Clarks Fork Yellowstone River and Bighorn River; Pryor Creek Basin; and Bighorn River Basin for use in connection with Tribal Interests in the Ceded Strip; and, water imported to the Ceded Strip from the Little Bighorn River Basin for use in connection with Tribal Interests in the Ceded Strip. Diversion and use shall be subject to the terms and conditions in Sections C.1.c. and C.1.d., of Article IV.

(1). This 47,000 AFY is in addition to the Tribal Water Right set forth in Sections A.1., B.1., C.1., and E.1., of Article III, except that any diversion of this right from surface flow, Groundwater, or storage within the Bighorn River Basin shall be deducted from the Tribal Water Right as set forth in Section A.1., of Article III.

(2). No more than 47,000 AFY may be diverted and used in connection with Tribal Interests in the Ceded Strip from all water sources, provided that:

(a). no more than 2,500 AFY from all water sources including the Yellowstone River may be diverted upstream from the confluence of the Bighorn River and the Yellowstone River.

(b). no more than 7,000 AF may be diverted from all sources including the Yellowstone River in any month, provided that, aggregate uses from all sources not exceed 47,000 AFY.

b. Use limited to within the Ceded Strip. The Tribal Water Right of 47,000 AFY for use in connection with Tribal Interests in the Ceded Strip shall be used only within the Ceded Strip and shall not be considered a Change in Use or Transfer outside the Reservation for purposes of Section C.2.c., of Article IV.

c. Any portion of the 50,000 AFY set forth in Section A.1.b.(1).(a)., of Article III which may be used outside the Reservation may also be used in connection with Tribal Interests in the Ceded Strip in addition to the Tribal Water Right of 47,000 AFY set forth in Section F.1.a., of Article III.

2. Priority Date. The priority date of the Tribal Water Right set forth in Section F.1.a., of Article III shall be May 7, 1868.

3. Period of Use. The period of use of this water right shall be from January 1 through December 31 of each year.

4. Points and Means of Diversion. Subject to the terms and conditions in Article IV, the Tribe may divert or permit the diversion of the Tribal Water Right from any place and by any means for use in connection with Tribal Interests in the Ceded Strip within the Ceded Strip.

5. Purposes. Subject to the terms and conditions in Article IV, the Tribal Water Right for use in connection with Tribal Interests in the Ceded Strip may be used for beneficial purposes allowed by Tribal, federal and state law.

6. Protection of Water Rights Recognized Under State Law.

a. Except as provided in Section G.2., of Article III, water rights Recognized Under State Law affected by the exercise of the Tribal Water Right in the Ceded Strip with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV, are protected from:

(1). an assertion of senior priority in the exercise of current uses of the Tribal Water Right developed as of the date this Compact has been ratified by the Montana legislature.

(2). new development of the Tribal Water Right after the date this Compact has been ratified by the Montana legislature. New development of the Tribal Water Right shall be exercised as junior in priority to water rights Recognized Under State Law with a priority date before this

Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV.

b. The protection of water rights Recognized Under State Law set forth in Sections F.6.a.(1). and (2)., of Article III extends to: valid existing water rights as decreed or to be decreed by the Montana Water Court pursuant to 85-2-234, MCA; permits issued by DNRC; state water reservations issued by the Montana Board of Natural Resources and Conservation or DNRC (except for Water Reservation Nos. 1781-r and 10006-r); water rights exempt from filing in the state adjudication pursuant to 85-2-222, MCA; and, water rights excepted from the permit process pursuant to 85-2-306, MCA. With the exception of rights exempt from filing in the state adjudication pursuant to 85-2-222, MCA, and rights excepted from the permit process pursuant to 85-2-306, MCA, a list of existing water rights as currently claimed and permits and reservations issued is attached as Appendix 3. Appendix 3 shall be modified by decrees resolving claims on the affected basins. Prior to issuance of the final decree, water rights protected shall be as recognized under state law, and all remedies available under state law shall be applicable. Appendix 3 may be modified due to clerical error or omission or to make Appendix 3 consistent with modifications in accordance with 85-2-237, 85-2-314, or 85-2-316(10) through (13), MCA.

c. New development, Change in Use, or Transfer of the Tribal Water Right shall not Adversely Affect the exercise of water rights Recognized Under State Law with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV.

d. Existing uses of the Tribal Water Right shall not be Adversely Affected by new development, Change in Use, or Transfer of the Tribal Water Right, except that the Tribe may allow Adverse Affect on uses of the Tribal Water Right on Tribally owned land.

G. Additional Rights to Water. As part of the water rights specifically set forth in Sections A., B., C., D., E., and F., of Article III, the Tribe has a right to water from the following sources:

1. Appurtenant Water Rights. For land within the Reservation acquired after the Effective Date of this Compact, the Tribe has the right to the use of any water right acquired as an appurtenance to the land. At such time that the acquired land is transferred to trust status, the water right appurtenant to the land acquired shall become part of and not in addition to the Tribal Water Right quantified in this Compact with a May 7, 1868 priority date, provided that, the acquired water right shall retain any protections set forth in this Compact. The Tribe shall notify DNRC of any acquisition of water in the Tribe's annual report and shall identify the water right acquired, as set forth in Section E.1., of Article IV. Any water right acquired shall be added as decreed by the Montana Water Court to the list of current uses of the Tribal Water Right as provided in Section E.2., of Article IV.

2. Exempt Rights.

a. Religious or cultural uses of the Tribal Water Right by Crow Tribal members within the Reservation in de minimis amounts shall be allowed without prior review by DNRC.

b. In accordance with the terms and conditions in Section C.1., of Article IV, TWRD may authorize development of the Tribal Water Right for:

(1). an appropriation of Groundwater by means of a well or developed spring with a maximum appropriation of 35 gallons per minute or less, not to exceed 10 acre-feet per year, unless the appropriation is a combined appropriation from the same source from two or more wells or developed springs exceeding the limitation.

(2). an appropriation of water for use by livestock if the maximum capacity of the impoundment or pit is less than 15 acre-feet and the appropriation is less than 30 acre-feet per year and is from a source other than a perennial flowing stream.

(3). temporary emergency appropriations necessary to protect lives or property.

c. Uses of the Tribal Water Right provided for in Sections G.2.a. and G.2.b., of Article III, are not subject to protection of water rights Recognized Under State Law provided in Sections A.6., B.6., C.6., D.6., D.7., E.6., and F.6., of Article III, or streamflows established or modified pursuant to Section A.7., of Article III.

H. Proposed Decree. For purposes of entry in the Montana Water Court, the proposed decree of the Tribal Water Right set forth in Article III is attached as Appendix 1. If there are differences between Appendix 1 and the Final Decree, the Final Decree shall control.

ARTICLE IV - IMPLEMENTATION OF TRIBAL WATER RIGHT

A. General Provisions.

1. Trust Status of Tribal Water Right. The Tribal Water Right shall be held in trust by the United States.

2. Tribal Water Right: Administration.

a. Subject to the limitations imposed by this Compact and federal law, the use of the Tribal Water Right shall be administered by the Tribe through TWRD within the Reservation, in the Ceded Strip, and outside the Reservation. Disputes, not within the jurisdiction of the Compact Board set forth in F.4., of Article IV, concerning use of the Tribal Water Right in the Ceded Strip and outside the Reservation which raise issues concerning the application of state or federal law shall be resolved in a court of competent jurisdiction. Those disputes concerning use of the Tribal Water Right in the Ceded Strip and outside the Reservation which do not raise issues concerning the application of state or federal law shall be within the exclusive jurisdiction of the Tribe. Subject to the limitations imposed by this Compact, the Tribe shall have the final and exclusive jurisdiction to resolve all disputes concerning the Tribal Water Right between holders of water rights under the Tribal Water Right. TWRD shall develop policies and procedures for monitoring water use, diversions, and maintaining records of water use and development consistent with this Compact. The current water use and diversions and new development shall be identified by location and quantity.

b. Administration and enforcement of the Tribal Water Right shall be pursuant to a Tribal water code, which shall be developed and adopted by the Tribe within two (2) years following the Effective Date of this Compact pursuant to any requirements set forth in the Constitution of the Crow Tribe. Pending the adoption of the Tribal water code, the administration and enforcement of the Tribal Water Right shall be by the Secretary of the Interior.

c. The Tribe shall not administer any water right Recognized Under State Law.

d. Administration, operation and maintenance, and delivery of the Tribal Water Right on the Crow Irrigation Project shall be conducted by the United States Department of the Interior, Bureau of Indian Affairs, in accordance with applicable federal laws. Portions of the Project within the Bozeman Trail and Two Leggins Districts shall be administered in accordance with applicable law.

3. Water Rights Recognized Under State Law: Administration.

a. The State shall administer and enforce all water rights Recognized Under State Law to the use of surface flows, Groundwater, and storage within or outside the Reservation. The State shall have the final and exclusive jurisdiction to resolve all disputes between holders of water rights Recognized Under State Law.

b. The State shall not administer or enforce any part of the Tribal Water Right.

c. For water rights Recognized Under State Law, if any, utilizing water delivered by the Crow Irrigation Project, administration and distribution of such water shall be conducted by the United States Department of the Interior, Bureau of Indian Affairs, in accordance with applicable federal laws.

4. Distribution of Water Between the Parties. When water availability is insufficient to satisfy all water rights under the Tribal Water Right and all water rights Recognized Under State Law within the Reservation, administration and distribution shall be as follows:

a. distribution between the water administered by the Tribe and the United States for current uses of the Tribal Water Right within the Reservation developed as of the date this Compact has been ratified by the Montana legislature and the water for water rights Recognized Under State Law within the Reservation with a priority date before this Compact has been ratified by the Montana legislature shall be on an equitable basis in proportion to the amount of water required for Tribal water use as listed pursuant to Section E.2., of Article IV, and the amount of water required for water rights Recognized Under State Law, provided that, the Parties recognize that distribution may not be on a precise proportional basis due to the need to take into account the physical constraints of water delivery. Administration and distribution by the Tribe, the United States, and the State within their proportional shares shall be pursuant to Tribal, federal, and state law respectively, and shall be coordinated as necessary. This distribution shall not modify the right of a holder of a water right Recognized Under State Law to seek enforcement of such water right against other water rights Recognized Under State Law in priority without the agreement of the water right holder.

b. future development of the Tribal Water Right after this Compact has been ratified by the Montana legislature shall be enforced as junior in priority to the water rights subject to a proportional distribution as set forth in Section A.4.a., of Article IV.

c. nothing in Section A.4.a., of Article IV shall prevent water users from agreeing to an alternative water distribution plan on the basis of individual water rights pursuant to applicable state, Tribal, or federal law.

5. Subsequent Federal or State Law. Administration under Sections A.2.d., A.3.a. and A.3.c., of Article IV shall be as set forth in this Compact except as may otherwise be determined by a court of competent jurisdiction or established by Congress.

B. Use of the Tribal Water Right.

1. Persons Entitled to Use the Tribal Water Right. The Tribal Water Right may be used by the Tribe, Tribal members, or Persons authorized by the Tribe, provided that, the Tribe may not limit or deprive Indians residing on the Reservation or in the Ceded Strip of any right, pursuant to 25 U.S.C. 381, to a just and equal portion of the Tribal Water Right set forth in Article III.

2. Effect of Non-Use of the Tribal Water Right. State law doctrines relating to the use of water rights, including but not limited to relinquishment, forfeiture or abandonment, do not apply to the Tribal Water Right. Thus, non-use of all or any of the Tribal Water Right described in Article III shall not constitute a relinquishment, forfeiture or abandonment of such rights.

C. Tribal Water Right: New Development, Change in Use, or Transfer.

1. New Development of Surface Flow, Groundwater, or Storage of the Tribal Water Right.

a. New Development of Surface Flow, Groundwater, or Storage Within the Reservation. After the Effective Date of this Compact, the Tribe may develop or authorize new development of surface flow, Groundwater, or storage of the Tribal Water Right within the Reservation; provided that, such development shall not Adversely Affect a water right Recognized Under State Law with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV.

b. Prerequisite Administrative Procedure within the Reservation. The following procedure for determining whether new development of surface flow, Groundwater, or storage of the Tribal Water Right within the Reservation will have an Adverse Affect on water rights Recognized Under State Law shall be followed prior to seeking relief from the Compact Board:

(1). Application for new development of a surface flow, Groundwater, or storage use within the Reservation shall be made to TWRD.

(2). TWRD shall review the application and make a determination of whether the new development will have an Adverse Affect on water rights Recognized Under State Law with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV. Upon request by TWRD, DNRC shall provide information on state water rights as recorded in the DNRC database to TWRD.

(3). If TWRD determines that the new development will have an Adverse Affect on a water right Recognized Under State Law with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV, TWRD shall deny the application. If TWRD determines that the new development will not have an Adverse Affect on a water right Recognized Under State Law with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV, TWRD shall forward the application with its determination to DNRC.

(4). If, based upon the evidence, DNRC agrees with TWRD's determination, DNRC shall notify TWRD. If, however, based upon the evidence, DNRC cannot agree with TWRD's determination, DNRC shall publish notice of the application once in a newspaper of general circulation in the area of the source and shall serve notice by first-class mail on any holder of a water right Recognized Under State Law who, according to the records of the DNRC, has a water right with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV, and may be affected by the proposed development. DNRC shall notify TWRD within ninety (90) days of DNRC's determination.

(5). DNRC and TWRD should attempt to resolve any disagreement on TWRD's determination of no Adverse Affect on a cooperative basis. If DNRC or a holder of a water right Recognized Under State Law with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV, disagree with the determination of no Adverse Affect, DNRC or the water right holder may seek relief from the Compact Board.

(6). In any proceeding concerning the effect of new Groundwater development of the Tribal Water Right within the Reservation either before TWRD, DNRC, or before the Compact Board, the following shall apply:

(a). Wells Less than 100 Feet: For new Groundwater wells to be completed at a depth beneath the surface of less than 100 feet, the applicant shall bear the burden of showing no Adverse Affect to a water right Recognized Under State Law with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV.

(b). 100 Feet or Deeper Wells: For new Groundwater wells to be completed at a depth beneath the surface of 100 feet or deeper, the owner of a water right Recognized Under State Law with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV, shall bear the burden of showing Adverse Affect to the water right.

(7). In any proceeding concerning the effect of new storage development of the Tribal Water Right within the Reservation either before TWRD, DNRC, or before the Compact Board, the following shall apply:

(a). Storage Over 50 AF: For new storage facilities with a planned constructed capacity of more than 50 AF, the applicant shall bear the burden of showing no Adverse Affect to a water right Recognized Under State Law with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV.

(b). Storage 50 AF or Less: For new storage facilities with a planned constructed capacity of 50 AF or less, the owner of the water right Recognized Under State Law with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV, shall bear the burden of showing Adverse Affect to the water right.

c. New Development of Surface Flow, Groundwater, or Storage for Use in Connection with Tribal Interests in the Ceded Strip. After the Effective Date of this Compact, the Tribe may develop or authorize new development, from surface flow, Groundwater, or storage, of the Tribal Water Right as set forth in Section F., of Article III and subject to the terms and conditions in Section F.1., of Article III for use in connection with Tribal Interests in the Ceded Strip; provided that, such development shall not Adversely Affect a water right Recognized Under State Law with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV.

d. Prerequisite Administrative Procedure within the Ceded Strip. The following procedure for determining whether new development of surface flow, Groundwater, or storage of the Tribal Water Right for use in connection with Tribal Interests in the Ceded Strip will have an Adverse Affect on water rights Recognized Under State Law shall be followed prior to seeking relief from the Compact Board:

(1). Application for new development of surface flow, Groundwater, or storage of the Tribal Water Right for use in connection with Tribal Interests in the Ceded Strip shall be made to TWRD.

(2). TWRD shall review the application and make a determination of whether the new development will have an Adverse Affect on water rights Recognized Under State Law with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV or pursuant to 85-2-306, MCA. Upon request by TWRD, DNRC shall provide information on state water rights as recorded in the DNRC database to TWRD.

(3). If TWRD determines that the new development will have an Adverse Affect on a water right Recognized Under State Law with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV or pursuant to 85-2-306, MCA, TWRD shall deny the application. If TWRD determines that the new development will not have an Adverse Affect on a water right Recognized Under State Law with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV or pursuant to 85-2-306, MCA, TWRD shall forward the application with its determination to DNRC.

(4). If, based upon the evidence, DNRC agrees with TWRD's determination, DNRC shall notify TWRD. If, however, based upon the evidence, DNRC cannot agree with TWRD's determination, DNRC shall publish notice of the application once in a newspaper of general circulation in the area of the source and shall serve notice by first-class mail on any holder of a water right Recognized Under State Law who, according to the records of the department, has a water right with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV or pursuant to 85-2-306, MCA, and may be affected by the proposed development. DNRC shall notify TWRD within ninety (90) days of DNRC's determination.

(5). DNRC and TWRD should attempt to resolve any disagreement on TWRD's determination of no Adverse Affect on a cooperative basis. If DNRC or a holder of a water right Recognized Under State Law with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV or pursuant to 85-2-306, MCA, disagree with the determination of no Adverse Affect, DNRC or the water right holder may seek relief from the Compact Board.

(6). In any proceeding concerning the effect of new Groundwater development of the Tribal Water Right for use in connection with Tribal Interests in the Ceded Strip either before TWRD, DNRC, or before the Compact Board, the following shall apply:

(a). Wells Less than 100 Feet: For new Groundwater wells to be completed at a depth beneath the surface of less than 100 feet, the applicant shall bear the burden of showing no Adverse Affect to a water right Recognized Under State Law with a priority date before this Compact has been ratified by the Montana legislature or exempt rights that are provided in Section D.1., of Article IV or pursuant to 85-2-306, MCA.

(b). 100 Feet or Deeper Wells: For new Groundwater wells to be completed at a depth beneath the surface of 100 feet or deeper, the owner of a water right Recognized Under State Law with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV or pursuant to 85-2-306, MCA, shall bear the burden of showing Adverse Affect to the water right.

(7). In any proceeding concerning the effect of new storage development of the Tribal Water Right for use in connection with Tribal Interests in the Ceded Strip either before TWRD, DNRC, or before the Compact Board, the following shall apply:

(a). Storage Over 50 AF: For new storage facilities with a planned constructed capacity of more than 50 AF, the applicant shall bear the burden of showing no Adverse Affect to a water right Recognized Under State Law with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV or pursuant to 85-2-306, MCA.

(b). Storage 50 AF or Less: For new storage facilities with a planned constructed capacity of 50 AF or less, the owner of the water right Recognized Under State Law with a priority date before this Compact has been ratified by the Montana legislature or excepted rights that are provided in Section D.1., of Article IV or pursuant to 85-2-306, MCA, shall bear the burden of showing Adverse Affect to the water right.

e. Groundwater Development of the Tribal Water Right Exempt from the Showing of No Adverse Affect. The following wells are exempt from the requirement of showing no Adverse Affect:

(1). Wells developed as of the date this Compact has been ratified by the Montana legislature are exempt from the burden to show no Adverse Affect. These wells may be replaced, repaired or rehabilitated to the original constructed capacity. A comprehensive list of wells developed as of the date this Compact has been ratified by the Montana legislature shall be kept on file in TWRD offices as part of the requirement to list current uses of the Tribal Water Right in Section E.2., of Article IV.

(2). An authorized use of Groundwater by means of a well or developed spring with a maximum appropriation of 35 gallons per minute or less, not to exceed 10 acre-feet per year, unless the appropriation is a combined appropriation from the same source from two or more wells or developed springs exceeding the limitation.

f. Storage Development of the Tribal Water Right Exempt from the Showing of No Adverse Affect. The following storage facilities are exempt from the requirement of showing no Adverse Affect:

(1). Facilities storing the Tribal Water Right developed as of the date this Compact has been ratified by the Montana legislature are exempt from the burden to show no Adverse Affect. These storage facilities may be replaced, repaired or rehabilitated to the original constructed capacity. A comprehensive list of storage facilities developed as of the date this Compact has been ratified by the Montana legislature shall be kept on file in TWRD offices as part of the requirement to list current uses of the Tribal Water Right in Section E.2., of Article IV.

(2). An authorized use of water for use by livestock if the maximum capacity of the impoundment or pit is less than 15 acre-feet and the appropriation is less than 30 acre-feet per year and is from a source other than a perennial flowing stream.

2. Change in Use or Transfer of the Tribal Water Right.

a. Change in Use or Transfer of the Tribal Water Right Within the Reservation. Unless otherwise stated in this Compact, the Tribe may make or authorize a Change in Use or Transfer of a water right set forth in Article III of this Compact within the Reservation; provided that, such Change in Use or Transfer shall not Adversely Affect a water right Recognized Under State Law with a priority date before the date of the Change in Use or Transfer. Determination of Adverse Affect shall be made following the same procedure used for review of new surface flow, Groundwater, or storage development of the Tribal Water Right set forth in Sections C.1.a. and C.1.b., of Article IV.

b. Change in Use or Transfer of the Tribal Water Right Within the Ceded Strip. Unless otherwise stated in this Compact, the Tribe may make or authorize a Change in Use or Transfer of the Tribal Water Right set forth in Section F.1.a., of Article III within the Ceded Strip; provided that, such Change in Use or Transfer shall not Adversely Affect a water right Recognized Under State Law with a priority date before the date of the Change in Use or Transfer. Determination of Adverse Affect shall be made following the same procedure used for review of new surface flow, Groundwater, or storage development of the Tribal Water Right within the Ceded Strip set forth in Sections C.1.c. and C.1.d., of Article IV.

c. Change in Use or Transfer of the Tribal Water Right Outside the Reservation. Except as otherwise provided in this Compact, the Tribe, pursuant to federal law, may make or authorize a Change in Use or a Transfer of the Tribal Water Right for up to 50,000 acre-feet of water as provided in Section A.1.b.(1).(a)., of Article III, for use outside the Reservation; provided that, any Transfer shall be for a term not to exceed 100 years, and may include provisions authorizing renewal for an additional term not to exceed 100 years; and provided that, no such Transfer shall be a permanent alienation of the water Transferred. Any Change in Use or Transfer of any such water right involving a point of diversion or place of use located outside the Reservation shall be considered a use outside the Reservation, except as provided in Section F., of Article III and Section C.2.b., of Article IV; and, further provided that, any use of Tribal water rights described in this Compact outside the Reservation shall not be deemed to convert such rights to rights arising under state law, and non-use of such rights outside the Reservation shall not constitute a relinquishment, forfeiture, or abandonment of the rights. The Tribe may change the point of diversion or purpose or place of use of the Tribal Water Right back to the Reservation without reduction in the amount of water provided in the Compact.

(1). Applicable Law. No person may initiate a use, Change in Use, or Transfer of a Tribal water right set forth in this Compact outside the Reservation without first complying with applicable state law. Approval of an application for a use, Change in Use, or Transfer outside the Reservation by the State shall be conditioned on a valid Tribal authorization for such use, Change in Use, or Transfer by the Tribe. The applicant shall provide DNRC with proof of a valid Tribal authorization prior to initiating the use, Change in Use, or Transfer.

(2). Diversion Facilities. With respect to diversion or transportation facilities located outside the Reservation which are to be used in connection with the exercise of a water right set forth in this Compact, the Tribe or Persons using such water right shall apply for all permits, certificates, variances and other authorizations required by state laws regulating, conditioning or permitting the siting, construction, operation, alteration or use of any equipment, device, facility or associated facility proposed to use or transport water. A diversion or use of water in the exercise of such water right may be made only after all permits, certificates, variances or other authorizations applied for pursuant to this paragraph have been obtained.

D. Water Rights Recognized Under State Law: New Development, Change in Use, or Transfer.

1. Limit on New Development. DNRC shall not process or grant an application for an appropriation after this Compact has been ratified by the Montana legislature within the Reservation, and outside the Reservation in Bighorn River Basin and in Pryor Creek Basin, provided that, the Department may issue certificates of water right or permits for use on fee land for:

a. An appropriation of Groundwater by means of a well or developed spring with a maximum appropriation of 35 gallons per minute or less, not to exceed 10 acre-feet per year, unless the appropriation is a combined appropriation from the same source from two or more wells or developed springs exceeding the limitation.

b. An appropriation of water for use by livestock if the maximum capacity of the impoundment or pit is less than 15 acre-feet and the appropriation is less than 30 acre-feet per year and is from a source other than a perennial flowing stream.

c. Temporary emergency appropriations as provided in 85-2-113(3), MCA.

2. Change in Use or Transfer of Water Rights Recognized Under State Law within the Reservation. The State may authorize a change in use or transfer of a water right Recognized Under State Law within the Reservation in accordance with state law, provided that, such change or transfer shall not Adversely Affect a use of the Tribal Water Right existing at the time of the application for change in use or transfer.

a. Prerequisite Administrative Procedure. The following procedure for determining whether a change in use or transfer of a water right Recognized Under State Law within the Reservation will have an Adverse Affect on an existing water right developed or authorized prior to the date of application for change of use or transfer under the Tribal Water Right shall be followed prior to seeking relief from the Compact Board:

(1). Application for a change in use or transfer of a water right Recognized Under State Law within the Reservation shall be made to DNRC.

(2). DNRC shall review the application and make a determination of whether the change in use or transfer of a water right Recognized Under State Law within the Reservation will have an Adverse Affect on a water right developed or authorized under the Tribal Water Right. Upon request by DNRC, TWRD shall provide information on developed and authorized Tribal Water Rights as recorded by TWRD to DNRC.

(3). If DNRC determines that the change in use or transfer of a water right Recognized Under State Law within the Reservation will have an Adverse Affect on a water right developed or authorized under the Tribal Water Right, DNRC shall deny the application. If DNRC determines that the change in use or transfer of a water right Recognized Under State Law within the Reservation will not have an Adverse Affect on a water right developed or authorized under the Tribal Water Right, DNRC shall forward the application with its determination to TWRD.

(4). If, based upon the evidence, TWRD agrees with DNRC's determination, TWRD shall notify DNRC. If, however, based upon the evidence, TWRD cannot agree with DNRC's determination, TWRD shall publish notice of the application once in a newspaper of general circulation in the area of the source and shall serve notice by first-class mail on any Tribal Water Right holder who, according to the records of TWRD, has a water right developed or authorized before the application date and may be affected by the proposed change in use or transfer of a water right Recognized Under State Law within the Reservation. TWRD shall notify DNRC within ninety (90) days of TWRD's determination.

(5). TWRD and DNRC should attempt to resolve any disagreement on DNRC's determination of no Adverse Affect on a cooperative basis. If TWRD or a holder of a water right developed or authorized under the Tribal Water Right disagree with the determination of no Adverse Affect, TWRD or the Tribal Water Right holder may seek relief from the Compact Board.

E. Reporting Requirements.

1. On an annual basis DNRC shall provide the Tribe and the United States with a listing of all uses of surface flow, Groundwater, or storage for which a certificate of water right or permit has been issued or a change in use or transfer has been approved by DNRC within the Reservation, in the Ceded Strip, and in drainages affected by this Compact.

2. Within one (1) year after this Compact has been ratified by the Montana legislature, the TWRD and the United States shall provide the DNRC with a report listing all current uses of the Tribal Water Right, including uses by Tribal members, existing as of the date this Compact has been ratified by the Montana legislature. DNRC may request additional information from TWRD or the United States to assist in reviewing the report. DNRC must approve or disapprove of the listing of all current uses of the Tribal Water Right within six (6) months after receipt of the report.

3. On an annual basis TWRD shall provide the DNRC and the United States with a listing of all new development of the Tribal Water Right described in this Compact within the Reservation, in the Ceded Strip, and outside the Reservation, and of all Changes in Use or Transfers of water rights within and outside the reservation since the last report.

4. TWRD, DNRC, and the United States may agree to modify the reporting requirements set forth in Sections D.1. and D.3., of Article IV. Such modification is pursuant to, and shall not be deemed a modification of, this Compact.

5. All reporting to the United States under this subsection shall be made to the Billings Area Office of the Bureau of Indian Affairs.

F. Enforcement: Crow-Montana Compact Board.

1. Establishment of Board. There is hereby established the Crow-Montana Compact Board. The Board shall consist of three members: one member selected by the Governor of the State of Montana; one member appointed by the Crow Tribal Chairman; and one member selected by the other two members. All members shall be appointed within six (6) months of the Effective Date of this Compact and within thirty (30) days of the date any vacancy occurs. If an appointment is not timely made by the Governor, the Director of DNRC or his/her designee shall fill the State's position. If an appointment is not timely made by the Crow Tribal Chairman, the Director of TWRD or his/her designee shall fill the Tribe's position. Each member shall serve a five-year term and shall be eligible for reappointment. The initial term of each member shall be staggered with one member serving a five-year term, one a four-year term, and one a three-year term. The initial term of each member shall be chosen by lot. Expenses of the members appointed by the State and the Tribe shall be borne by the entity appointing the member. The expenses of the third member and all other expenses shall be borne equally by the Tribe and the State, subject to the availability of funds.

2. Membership. Should the two appointed members fail to agree on the selection of a third member within sixty (60) days of the date of appointment of the second member, or within thirty (30) days after any vacancy occurs, the following procedure shall be utilized:

a. Within five (5) days thereafter each member shall nominate three persons to serve as a member of the Board;

b. Within fifteen (15) days thereafter each member shall reject two of the persons nominated by the other member;

c. Within five (5) days thereafter, the remaining two nominees shall be submitted to the Dean of the University of Montana School of Law who shall select the third member from the two nominees.

3. Quorum and Vote Required. Two members of the Board shall constitute a quorum if reasonable notice of the time, place, and purpose of the meeting, hearing, or other proceeding has been provided in advance to the absent member. All Board decisions shall be by a majority of the Board, shall be in writing and, together with any dissenting opinions, shall be served on all parties in the proceeding before the Board, and on the Parties to this Compact.

4. Jurisdiction of the Board. The Crow-Montana Compact Board shall have jurisdiction to resolve controversies over the right to the use of water as between the Parties or holders of water rights developed or authorized under the Tribal Water Right and holders of water rights Recognized Under State Law. Such controversies shall include, but shall not be limited to, disputes as to the meaning of this Compact.

5. Prerequisite Administrative Procedures.

a. Any holder of a water right Recognized Under State Law concerned that a new development, Change in Use, or Transfer of the Tribal Water Right is inconsistent with the Compact shall first contact the Billings Regional Office of DNRC. If DNRC and TWRD are unable to resolve the issue in a manner acceptable to the water right holder within a reasonable time through discussion, DNRC or the water right holder may seek relief through the Compact Board. The Tribe agrees to allow DNRC reasonable access onto Tribal land or to assist DNRC in obtaining reasonable access onto the land of the Tribal Water Right holder to observe the challenged new development, Change in Use, or Transfer.

b. Any Tribal Water Right holder concerned that a new development, change in use, or transfer of water by a holder of a water right Recognized Under State Law is inconsistent with the Compact shall first contact TWRD. If TWRD and DNRC are unable to resolve the issue in a manner acceptable to the Tribal Water Right holder within a reasonable time through discussion, TWRD or the Tribal Water Right holder may seek relief through the Compact Board. DNRC agrees to assist TWRD in obtaining reasonable access onto the land of the holder of the water right Recognized Under State Law to observe the challenged development, change in use, or transfer.

c. TWRD and DNRC may jointly develop supplemental procedures as necessary or appropriate. Such supplemental procedures are pursuant to, and shall not be deemed a modification of, this Compact.

6. Powers and Duties. The Board shall hold hearings upon notice in proceedings before it and shall have the power to administer oaths, take evidence and issue subpoenas to compel attendance of witnesses or production of documents or other evidence, and to appoint technical experts. The Tribe and the State shall enforce the Board's subpoenas in the same manner as prescribed by the laws of the Tribe and the State for enforcing a subpoena issued by the courts of each respective sovereign in a civil action. The parties to the controversy may present evidence and cross examine any witnesses. The Board shall determine the controversy and grant any appropriate relief, including a temporary order; provided that, the Board shall have no power to award money damages, costs, or attorneys' fees. All decisions of the Board shall be by majority vote and in writing. The Board shall adopt necessary rules and regulations to carry out its responsibilities within six (6) months after its first meeting. All records of the Board shall be open to public inspection, except as otherwise ordered by the Board.

7. Review and Enforcement of Board Decisions.

a. Decisions by the Board shall be effective immediately, unless stayed by the Board. Unless otherwise provided by Congress, only the United States and parties to the proceedings before the Board may appeal any final decision by the Board to a court of competent jurisdiction within thirty (30) days of such decision. The hearing on appeal shall be a trial de novo. The notice of appeal shall be filed with the Board and served personally or by registered mail upon all parties to the proceeding before the Board.

b. Unless an appeal is filed within thirty (30) days of a final decision of the Board, as provided in Section F.7.a., of Article IV, any decision of the Board shall be recognized and enforced by any court of competent jurisdiction on petition of the Board, or any party before the Board in the proceeding in which the decision was made.

c. A court of competent jurisdiction in which a timely appeal is filed pursuant to Section F.7.a., of Article IV, or in which a petition to confirm or enforce is filed pursuant to Section F.7.b., of Article IV, may order such temporary or permanent relief as it considers just and proper.

d. An appeal may be taken from any decision of the court in which a timely appeal is filed pursuant to Section f.7.a., of Article IV, or in which a petition to confirm or enforce is filed pursuant to Section F.7.b., of Article IV, in the manner and to the same extent as from orders or judgments of the court in a civil action.

e. In any appeal or petition to confirm or enforce the Board's decision, the Board shall file with the court the record of the proceedings before the Board within sixty (60) days of filing of a notice of appeal.

8. Waiver of Immunity. The Tribe and the State hereby waive their respective immunities from suit, including any defense the State shall have under the Eleventh Amendment of the Constitution of the United States, in order to permit the resolution of disputes under this

Compact by the Crow-Montana Compact Board, and the appeal or judicial enforcement of Board decisions as provided herein, except that such waivers of sovereign immunity by the Tribe or the State shall not extend to any action for money damages, costs, or attorneys' fees. The Parties agree that only Congress can waive the immunity of the United States. The participation of the United States in the proceedings of the Compact Board shall be as provided by Congress.

ARTICLE V - DISCLAIMERS AND RESERVATIONS

A. No Effect on Other Tribal Rights or Other Federal Reserved Water Rights.

1. Except as provided in Sections A.1.b.(2). and D.7., of Article III, the relationship between the Tribal Water Right described herein and any rights to water of any other Indian Tribe or its members, or of the United States on behalf of such Tribe or its members shall be determined by the rule of priority.

2. Nothing in this Compact may be construed or interpreted as a precedent to establish the nature, extent, or manner of administration of the rights to water of any other Indian tribes or their members outside of the Crow Reservation.

3. Nothing in this Compact is otherwise intended to affect or abrogate a right or claim of an Indian Tribe other than the Crow Tribe.

4. Except as otherwise provided herein and authorized by Congress, nothing in this Compact may be construed or interpreted in any manner to establish the nature, extent, or manner of administration of the reserved rights to water of any other federal agency or of any other federal lands. Such reserved rights will be subject to the rule of priority in their use.

B. General Disclaimer. Nothing in this Compact shall be so construed or interpreted:

1. As a precedent for the litigation of reserved water rights or the interpretation or administration of future compacts between the United States and the State, or the United States and any other state;

2. To preclude the acquisition or exercise of a right Recognized Under State Law to the use of water by any member of the Tribe outside the Reservation by purchase of such right or by acquisition of land, or by application to the State;

3. To determine the relative rights inter sese of Persons using water under the authority of the State or the Tribe;

4. To limit in any way the rights of the Parties or any other person to litigate any issues or questions not resolved by this Compact;

5. To authorize the taking of a water right which is vested under state or federal law;

6. To create or deny substantive rights through headings or captions used in this Compact;

7. To address or prejudge whether or how, in any interstate apportionment, the Tribe's water right shall be counted as part of the waters apportioned to the State;

8. To prohibit the Tribe, or the United States on behalf of the Tribe, from objecting in any general stream adjudication in Montana Water Court to any claims to water rights;

9. To constitute a waiver of sovereign immunity by the Tribe, State, or United States, except as is expressly set forth in this Compact;

10. Unless otherwise provided by Congress, to prevent the United States, as trustee for the Tribe or Tribal members, or the Tribe itself, from filing an action in any court of competent jurisdiction, to prevent any party from interfering with the enjoyment of the Tribal Water Right;

11. To impair, amend, or alter rights under existing state or federal law;

12. To affect or determine the applicability of any state or federal law, including, without limitation, environmental and public safety laws, on activities of the Tribe or Tribal members within the Reservation or in connection with Tribal Interests in the Ceded Strip;

13. To alter or amend any provision or to adopt or preclude any interpretation of the Yellowstone River Compact, Act of October 10, 1951, ch. 629, 65 Stat. 663 (1951);

14. To alter or abridge any right reserved to the Crow Tribe of Indians under Article 4 of the May 7, 1868 Treaty of Fort Laramie; or

15. To prejudice any right that Tribal members may have to secure a portion of the Tribal Water Right from the Tribe.

C. Rights Reserved. The Parties expressly reserve all rights not granted, recognized or relinquished in this Compact.

D. Obligations of United States Contingent.

1. Notwithstanding any other language in this Compact, except as authorized under other provisions of federal law, the obligations of the United States under this Compact shall be contingent on authorization by Congress.

2. The State and the Tribe recognize that this Compact has not been reviewed and approved by the United States or any agency thereof and ratification by the Montana legislature or ratification by the Tribal Council in no manner binds or restricts the discretion of the United States in the negotiation of all related matters, including but not limited to, coal severance tax, Section 2 of the Crow Allotment Act (41 Stat. 751), water rights, and State and Federal contribution or cost share.

E. Expenditures of Money Contingent. The expenditure or advance of any money or the performance of any work by the United States or the Tribe pursuant to this Compact which may require appropriation of money by Congress or allotment of funds shall be contingent on such appropriation or allotment being made.

ARTICLE VI - CONTRIBUTIONS TO SETTLEMENT

A. State Contribution to Settlement.

1. The State agrees to contribute the sum of $15 million, in equal annual installments for a period of no more than fifteen years beginning July 1, 1999, to a fund for the use and benefit of the Tribe.

2. Payment of the State's contributions for the benefit of the Tribe is contingent on the final approval of this Compact by the Tribe and Congress, the final inclusion of the rights set forth in the Compact in decrees by the Montana Water Court and the expiration of the time for appeal from all orders effecting such inclusion or the affirmance of the decrees or orders on appeal, the provision of releases of claims as provided in Section A.4., of Article VI, and the fulfillment of any other conditions to the effectiveness of the Compact.

3. Until all conditions for payment are fulfilled, the State and the Tribe agree that any payments due shall be paid into an interest-bearing escrow account, to be held without distribution of principal or interest until all conditions for payment to the Tribe are satisfied, except that the State and the Tribe may agree in writing that some portion of the interest earned on the funds in the escrow account may be disbursed to the Tribe before all conditions for payment are satisfied.

4. The Tribe agrees that the State's contribution will be dedicated to economic development and water and sewer infrastructure within the Crow Reservation. The Tribe further agrees that the State's contributions as set forth in Section A.1., of Article VI and any other agreements that may be set forth in a separate coal severance tax settlement agreement between the State and Tribe should be considered as fully satisfying any cost-share obligation on the part of the State for this Compact. The Tribe further agrees that the State's contributions and agreements herein are full and adequate consideration for the Tribe's agreements as set forth in this Compact, and that the State's contributions, together with any other agreements that may be set forth in a separate coal severance tax settlement agreement between the State and the Tribe, are full and adequate consideration for the release of all claims by the Tribe and the United States in the civil action captioned Crow Tribe of Indians v. State of Montana, Cause No. CV-78-110-BLG-JDS (D. Mont.). The Tribe further agrees that in consideration of the State's contributions and other agreements set forth in a separate coal severance tax settlement agreement, the Tribe will provide releases of all claims, including any pleadings or proposed orders necessary to implement or otherwise give effect to the releases, in that action in a form acceptable to the Attorney General of the State.

B. Federal Legislation. The Tribe and the State agree to support federal legislation ratifying this Compact that will accomplish the following:

1. Bighorn Lake Water Supply. The State and the Tribe agree to support federal legislation that will provide an allocation of storage water in Bighorn Lake, as described in Section A.1.b., of Article III and which will reallocate the water in Bighorn Lake as set forth in Section A.1.b.(1).(b).(i)., of Article III. The priority date for the allocation shall be the date of the water right

held by the Bureau of Reclamation as decreed or to be decreed by the Montana Water Court pursuant to 85-2-234, MCA. This allocation shall be held in trust for the Tribe by the United States and will be part of the Tribal Water Right.

2. Right to Participate in Future Projects to Import Water. The Tribe shall have the right to initiate or participate in any project to augment the water supply in the Basins listed in Sections B., C., D. and E., of Article III, by transferring water from another drainage, and to have any such augmentation project deliver any entitlement of the Tribe to water to a point within the Reservation designated by the Tribe.

3. Federal Court Jurisdiction. That the federal courts shall have jurisdiction to enforce the provisions of this Compact and to hear appeals from and enforce decisions of the Compact Board in accordance with Section F.7., of Article IV.

C. Federal Contributions to Settlement. Federal contributions to settlement shall be as provided by Congress.

ARTICLE VII - FINALITY, SETTLEMENT OF CLAIMS, EFFECTIVENESS OF COMPACT, AND WAIVER OF CLAIMS

A. Ratification and Effectiveness of Compact.

1. This Compact shall become Effective on the date it is ratified by the Tribe, by the State, and by the Congress of the United States, whichever date is latest. Upon ratification of this Compact by the Tribe and by the State, whichever is later, the terms of this Compact may not be altered, voided, or modified in any respect without the consent of both the Tribe and the State. Once ratified by Congress, the Tribe, and the State, the Compact may not be modified without the consent of the Tribe, the State, and the United States.

2. Notwithstanding any other provision in this Compact, the Tribe reserves the right to withdraw as a Party to this Compact:

a. If Congress has not ratified this Compact within four (4) years from the date the Compact is ratified by the State;

b. If appropriations are not authorized by Congress within four (4) years of the date the Compact is ratified by the Tribe;

c. If the Tribe and the United States do not reach agreement on the federal contribution to settlement;

d. If appropriations are not made in the manner contemplated by the federal legislation ratifying the Compact; or

e. If the Tribe and the United States do not reach agreement on settlement of issues regarding Section 2 of the Crow Allotment Act (41 Stat. 751).

3. The Tribe may exercise its right to withdraw by sending to the Governor of the State of Montana and to the Secretary of the Interior by certified mail a resolution of the Crow Tribal Council stating the Tribe's intent to withdraw and specifying a withdrawal date not sooner than thirty (30) days from the date of the resolution. On the date designated in the resolution for Tribal withdrawal, this Compact shall become null and void without further action by any Party, and the Parties agree to resume negotiation in good faith for quantification of the water rights of the Crow Tribe and entry of a decree in a court of competent jurisdiction.

4. Notwithstanding any other provision in this Compact, the State reserves the right to withdraw as a Party to this Compact:

a. If the Tribe and Congress have not ratified this Compact within five (5) years from the date the Compact is ratified by the State;

b. If Congress requires a state contribution to settlement that exceeds the contributions described in Section A., of Article VI;

c. If Congress resolves issues under Section 2 of the Crow Allotment Act (41 Stat. 751) in a manner Adversely Affecting water rights Recognized Under State Law;

d. If a streamflow and lake level management plan pursuant to Section A.7., of Article III is not agreed to within one (1) year after this Compact has been ratified by the Montana legislature or any extended deadline agreed to by the State, or if federal legislation is inconsistent with the streamflow and lake level management plan; or

e. If the Department of Natural Resources and Conservation does not approve the list of current uses of the Tribal Water Right pursuant to Section E.2., of Article IV.

5. The State may exercise its right to withdraw by sending to the Crow Tribal Chairman and to the Secretary of the Interior a letter delivered by certified mail from the Governor of the State of Montana stating the State's intent to withdraw and specifying a withdrawal date not sooner than thirty (30) days from the date of the letter. On the date designated in the letter for State withdrawal, this Compact shall become null and void without further action by any Party, and the Parties agree to resume negotiation in good faith for quantification of the water rights of the Crow Tribe and entry of a decree in a court of competent jurisdiction.

6. Notwithstanding any other provision in this Compact, the Department of the Interior reserves the right to refuse to support federal legislation ratifying this Compact.

7. The Parties understand and accept that federal financial contributions to the Compact may not be budgeted until October of the year following the year of enactment of the Compact.

B. Incorporation Into Decrees and Disposition of Federal Suit.

1. The Tribe, the State, and the United States agree to defend the provisions and purposes of this Compact including the quantification set forth in Article III, from all challenges and attacks in all proceedings pursuant to this Section B., of Article VII.

2. Within one hundred eighty (180) days of the date this Compact is ratified by the Crow Tribal Council, the State of Montana, and Congress, whichever is latest, the Tribe, the State, or the United States shall file, in the general stream adjudication initiated by the State of Montana, pursuant to the provisions of 85-2-702(3), MCA, a motion for entry of the proposed decree set forth in Appendix 1 as the decree of the water rights held by the United States in trust for the Crow Tribe. If the Montana Water Court does not approve the proposed decree submitted with the motion within three years following the filing of the motion, the Compact shall be voidable by agreement of the State and the Tribe. If the Montana Water Court approves the proposed decree within three years, but the decree is subsequently set aside by the Montana Water Court or on appeal, the Compact shall be voidable by agreement of the State and the Tribe. Any effect of the failure of approval or setting aside of the decree on the approval, ratification, and confirmation by the United States shall be as provided by Congress. The Parties understand and agree that the submission of this Compact to a state court or courts, as provided for in this Compact, is solely to comply with the provisions of 85-2-702(3), MCA, and does not expand the jurisdiction of the state court or expand in any manner the waiver of sovereign immunity of the United States in the McCarran Amendment, 43 U.S.C. 666, or other provision of federal law.

3. Consistent with 3-7-224, MCA, setting forth the jurisdiction of the chief water judge, for the purposes of 85-2-702(3), MCA, the review by the Montana Water Court shall be limited to Article III, and Appendix 1, and may extend to other sections of the Compact only to the extent that they relate to the determination of existing water rights. The final decree shall consist of Article III as displayed in Appendix 1, and such other information as may be required by 85-2-234, MCA. Nevertheless, pursuant to 85-2-702(3), MCA, the terms of the entire Compact must be included in the preliminary decree without alteration for the purpose of notice.

4. Upon the issuance of a final decree by the Montana Water Court, or its successor, and the completion of any direct appeals therefrom, or upon the expiration of the time for filing any such appeal, the United States, the Tribe, and the State shall execute and file joint motions pursuant to Rule 41(a), Fed. R. Civ. P., to dismiss the Tribe's claims, and any claims made by the United States as trustee for the Tribe, in U.S. v. Big Horn Low Line Canal Company, et al., No. CIV-75-34-BLG (filed April 17, 1975) (hereinafter referred to as "Low Line Canal") and such claims may only be refiled if the Tribe exercises its option to withdraw as a Party to the Compact pursuant to Section A.3., of Article VII. This Compact shall be filed as a consent decree in Low Line Canal only if, prior to the dismissal of Low Line Canal as provided in Section B., of Article VII, it is finally determined in a judgment binding upon the State of Montana that the state courts lack jurisdiction over, or that the state court proceedings are inadequate to adjudicate, some or all of the water rights asserted in Low Line Canal.

C. Settlement of Water Right Claims. The water rights and other rights confirmed to the Tribe in this Compact are in full and final satisfaction of the water right claims of the Tribe and the United States on behalf of the Tribe and its members, including federal reserved water rights claims based on Winters v. United States, 207 U.S. 564 (1908). In consideration of the rights confirmed to the Tribe in this Compact, and of performance by the State of Montana and the United States of all actions required by this Compact, including entry of a final order issuing the decree of the reserved water rights of the Tribe held in trust by the United States as quantified in the Compact and displayed in Appendix 1, the Tribe and the United States as trustee for the Tribe and Tribal members hereby waive, release, and relinquish any and all claims to water rights or to the use of water within the State of Montana existing on the date this Compact is ratified by the State, the Tribe, and Congress and conditional upon a final decree, whichever date is later.

D. Binding Effect. After the Effective Date of this Compact, its terms shall be binding:

1. Upon the State and any person or entity of any nature whatsoever using, claiming or in any manner asserting any right under the authority of the State to the use of water in the State of Montana; provided that, the validity of consent, ratification, or authorization by the State is to be determined by Montana law;

2. Upon the Tribe, Tribal members, and any person or entity of any nature whatsoever using, claiming or in any manner asserting any right to the use of the Tribe's water right, or any right arising under any doctrine of reserved or aboriginal water rights for the Tribe or a Tribal member, or any right arising under tribal law; provided that, the validity of consent, ratification or authorization by the Tribe is to be determined by tribal law; and

3. Upon the United States and any person or entity of any nature whatsoever using, claiming or in any manner asserting any right under the authority of the United States to the use of water in the State of Montana; provided that, the validity of consent, ratification or authorization by the United States is to be determined by federal law.

E. Waiver of Claims or Objections.

1. After the Effective Date of this Compact, the Tribe, any individual claiming a right to use water based on or derived from the Tribe, and the United States on behalf of the Tribe or a Tribal member, shall be prohibited from objecting to, or bringing a claim against, the claim or holder of a right to use water based on the laws of the State of Montana, and any carriage, storage, or delivery facilities and rights of way associated therewith, based on the assertion that such right is invalid because 85-2-301(4), MCA, is invalid as applied to such right, or that such right is inconsistent with or otherwise impairs any right reserved by the Tribe under Article 4 of the May 7, 1868 Treaty of Fort Laramie. If and to the extent necessary to effectuate the intent of this paragraph the Tribe, any individual claiming a right to use water based on or derived from the Tribe, and the United States on behalf of the Tribe shall be deemed to have waived and relinquished any claims or objections they may have against a holder of a right to use water based on the laws of the State of Montana, and any carriage, storage, or delivery facilities and rights of way associated therewith, based on the aforementioned law and Treaty.

2. Waiver of claims by the Tribe against the United States shall be as provided by Congress.

ARTICLE VIII - LEGISLATION

The State and Tribe agree to seek enactment of any legislation necessary to effectuate the provisions and purposes of this Compact, and to defend the provisions and purposes of this Compact from all challenges and attacks; provided that, no provision of the Compact shall be modified as to substance except as may be provided herein.

IN WITNESS WHEREOF the representatives of the State of Montana, the Crow Tribe, and the United States have signed this Compact on the ____ day of____, 19____.

History: En. Sec. 1, Ch. 3, Sp. L. June 1999; amd. Sec. 1, Ch. 44, L. 2009.

85-20-902. Findings and purpose. (1) It is the policy of the state of Montana to seek negotiated settlements of federal and Indian reserved water rights claims in Montana under Title 85, chapter 2, part 7.

(2) Pursuant to this policy, the commission commenced negotiations with the Crow Tribe regarding the Tribe's water rights claims on November 12, 1981.

(3) A water rights compact has been agreed to between the commission and the elected representatives of the government of the Crow Tribe that, among other things, provides an allocation of water to the Crow Tribe and provides protection for certain water rights recognized under state law in Montana.

(4) As consideration for the Crow Tribe's agreement to protect certain water rights recognized under state law in Montana and to release certain legal claims asserted against the state, the state of Montana has undertaken an obligation to make certain payments for the

benefit of the Crow Tribe and has agreed that any future production taxes collected by the state on production of coal owned by the United States in trust for the Crow Tribe will be paid to the Crow Tribe.

(5) The commission's agreement to the compact and the state's obligation to make payments to the Crow Tribe thereunder is conditioned, among other things, upon the final approval of the compact as set forth in the compact and as required by state, federal, and tribal law and upon the execution and delivery by the Crow Tribe of sufficient releases for the legal claims that the Crow Tribe has agreed to release.

(6) The purposes of 85-20-902 through 85-20-905 are to provide for the implementation of the compact, to provide a mechanism for settlement of certain claims against the state, and to provide a means to fund the state's financial obligations for the upcoming biennium under its water rights compact with the Crow Tribe.

History: En. Sec. 1, Ch. 1, Sp. L. June 1999.

85-20-903. Definitions. As used in 85-20-902 through 85-20-905, the following definitions apply:

(1) "Commission" means the reserved water rights compact commission.

(2) "Compact" means the Crow-Montana water rights compact as approved by the legislature in 85-20-901.

(3) "Department" means the department of natural resources and conservation.

History: En. Sec. 2, Ch. 1, Sp. L. June 1999.

85-20-904. Payment of settlement funds into escrow — requirements for escrow agreement — notice from attorney general. (1) The department shall enter into an agreement with the Crow Tribe and, if necessary under federal or tribal law, the United States, selecting an escrow agent to hold any funds paid by the state prior to the time they become payable to the Crow Tribe under this section. When an escrow agent has been selected, the department shall negotiate the terms of an escrow agreement and any changes to the agreement authorized by law with the Crow Tribe, the escrow agent, and if necessary under federal or tribal law, the United States. The terms of the agreement must govern the holding of the funds paid pursuant to the settlement. The escrow agreement must provide that any costs and fees payable for the management of the escrow fund will be borne by the fund, that the funds placed in the escrow account will be invested and held at interest in trust for the Crow Tribe, and that, except as provided in subsection (4), the contents of the fund will become payable to the order of the Crow Tribe only upon the occurrence of all of the following conditions:

(a) the compact has been approved by the Congress of the United States in a form satisfactory to the commission;

(b) the compact has been approved by the Crow Tribe in the manner provided by federal and tribal law, including approval of any tribal referendum presently or later required by federal or tribal law;

(c) the compact has been approved by the Montana water court for inclusion in the final decrees in all affected basins, and the order of approval has been affirmed on appeal or the time for appeal from the water court's approval has expired; and

(d) the Crow Tribe and the United States have furnished releases, pleadings, and proposed orders, in forms acceptable to the attorney general, with respect to all claims, including but not limited to claims for costs and attorney fees, asserted in the civil action captioned Crow Tribe of Indians v. State of Montana et al., Cause No. CV-78-110-BLG-JDS (D. Mont.), or any appeal pending in that action.

(2) Within 20 days after all conditions set forth in subsections (1)(a) through (1)(d) have been satisfied, the attorney general shall provide written notice of the satisfaction of the conditions to the escrow agent. The escrow agreement must provide that upon receipt of the written notice provided in this section, the escrow agent shall pay the funds in escrow to the order of the Crow Tribe. This section does not preclude the Crow Tribe from entering into an agreement with the escrow agent or any other entity for the holding of the funds in trust for the Crow Tribe for a period in excess of that provided in this section.

(3) The escrow agreement must provide that in the event the conditions set forth in subsection (1) do not occur within any time limits set in the compact, as those limits may

be extended pursuant to the compact by agreement of the parties and the approval of the legislature, or if any party to the compact terminates the compact as provided in the compact prior to payment of the funds to the Crow Tribe as provided in subsection (2), the principal and any interest remaining in the escrow fund will revert to the state.

(4) The escrow agreement must provide that interest earned on the escrow fund for each fiscal year, up to a maximum of $650,000 in any fiscal year, must be paid to the Crow Tribe for its use for the purposes set forth in section VI.A.4 of the compact. Any interest in excess of $650,000 in any fiscal year must remain in the escrow account to be managed as provided in subsection (1) and dispersed as provided in subsection (2) or (3).

History: En. Sec. 3, Ch. 1, Sp. L. June 1999; amd. Sec. 2, Ch. 44, L. 2009.

85-20-905. Settlement of litigation — disposition of production taxes collected on coal owned in trust for Crow Tribe. (1) The governor and attorney general may enter into an agreement with the Crow Tribe and the United States for the settlement of the civil action captioned Crow Tribe of Indians v. State of Montana et al., Cause No. CV-78-110-BLG-JDS (D. Mont.), or any appeal pending in that action.

(2) The agreement may:

(a) include a release of all claims asserted by the Crow Tribe and the United States in the action, including but not limited to claims for costs and attorney fees;

(b) provide payments as authorized in the compact and 85-20-902 through 85-20-905; and

(c) include an agreement by which the proceeds of any production taxes levied under Montana law on the severance or production of coal owned by the United States in trust for the Crow Tribe are to be paid to the Crow Tribe.

History: En. Sec. 4, Ch. 1, Sp. L. June 1999.

Part 10
Fort Belknap-Montana Compact

85-20-1001. Fort Belknap-Montana compact ratified. The Compact entered into by the State of Montana and the Fort Belknap Indian Community of the Fort Belknap Reservation and filed with the Secretary of State of the State of Montana under the provisions of 85-2-702, MCA, on April 16, 2001, is ratified. The Compact is as follows:

WATER RIGHTS COMPACT ENTERED INTO BY THE STATE OF MONTANA, THE FORT BELKNAP INDIAN COMMUNITY OF THE FORT BELKNAP RESERVATION, AND THE UNITED STATES OF AMERICA

This Compact is entered into by and among the State of Montana, the Fort Belknap Indian Community of the Fort Belknap Reservation, and the United States of America for the purpose of settling all existing water rights claims of the Gros Ventre and Assiniboine Tribes which compose the Fort Belknap Indian Community of the Fort Belknap Reservation in the State of Montana. The Compact is not effective until approved by the Tribes, the Montana Legislature, and the United States Congress. The participation of the United States in each relevant section of the Compact is not valid until the Compact is ratified by Congress.

ARTICLE I - RECITALS

WHEREAS, pursuant to the Treaty of 1855, 11 Stat. 657 and the Acts of Congress of 1874, 18 Stat. 28, and 1888, 25 Stat. 113, a Reservation was established in Montana for the Gros Ventre and Assiniboine Tribes; and

WHEREAS, pursuant to said Treaty and Acts of Congress, the Gros Ventre and Assiniboine Tribes claim reserved water rights to fulfill the purposes of the Treaty, the Acts of Congress, and Winters v. United States, 207 U.S. 564 (1908); and

WHEREAS, in 1979, the United States, on behalf of the Gros Ventre and Assiniboine Tribes of the Fort Belknap Reservation, brought suit in the United States District Court for the District of Montana to obtain a final determination of the Tribes' water rights claims, see United States v. Aageson, No. CIV-79-21-GF (filed April 5, 1979); and

WHEREAS, Congress consented to state court jurisdiction over the quantification of claims to water rights held by the United States of America in trust for the Tribes; see "the McCarran Amendment," 43 U.S.C. § 666(a)(1) (1952); Colorado River Water Conservation Dist. v. United States, 424 U.S. 800 (1976); Arizona v. San Carlos Apache Tribe, 463 U.S. 545 (1983); and

WHEREAS, the State of Montana initiated a general stream adjudication pursuant to the provisions of Chapter 697, Laws of Montana 1979, which includes Gros Ventre and Assiniboine tribal water rights; and

WHEREAS, the Montana Reserved Water Rights Compact Commission, under § 85-2-702(1), MCA, is authorized to negotiate settlement of water rights claims filed by Indian tribes and/or on their behalf by the United States claiming reserved waters within the State of Montana; and

WHEREAS, the federal district court litigation was stayed in 1983 pending the outcome of Montana state court water adjudication proceedings, see Northern Cheyenne v. Adsit, 721 F.2d 1187 (9th Cir., 1983); and

WHEREAS, the adjudication of the Gros Ventre and Assiniboine tribal water rights in the state court proceedings has been suspended pursuant to § 85-2-217, MCA, while negotiations are proceeding to conclude a compact resolving all water rights claims of the Gros Ventre and Assiniboine Tribes which compose the Fort Belknap Indian Community of the Fort Belknap Reservation within the State of Montana; and

WHEREAS, the Fort Belknap Community Council, or its duly designated representatives, have authority to negotiate this Compact pursuant to Resolution No. 19-81 of the Fort Belknap Community Council, February 17, 1981, as amended; and

WHEREAS, the United States Attorney General, or a duly designated official of the United States Department of Justice, has authority to execute this Compact on behalf of the United States pursuant to the authority to settle litigation contained in 28 U.S.C. §§ 516-17 (1993); and

WHEREAS, the Secretary of the Interior, or a duly designated official of the United States Department of the Interior, has authority to execute this Compact on behalf of the United States Department of the Interior pursuant to 43 U.S.C. § 1457 (1986), inter alia; and

WHEREAS, the Gros Ventre and Assiniboine Tribes which compose the Fort Belknap Indian Community of the Fort Belknap Reservation, the State of Montana, and the United States agree that the Tribal Water Right, water development, and water management described in this Compact are in satisfaction of the water rights claims of the Tribes, Tribal members, and Allottees, and of the United States on behalf of the Tribes and their members and Allottees within the State of Montana; and

WHEREAS, the Parties agree that it is in the best interest of all Parties that the water rights claims of the Gros Ventre and Assiniboine Tribes which compose the Fort Belknap Indian Community of the Fort Belknap Reservation be settled through agreement between and among the Tribes, the State of Montana, and the United States.

NOW THEREFORE, the Parties agree to enter into this Compact for the purpose of settling the water rights claims of the Gros Ventre and Assiniboine Tribes which compose the Fort Belknap Indian Community, Tribal members, and Allottees of the Fort Belknap Reservation within the State of Montana.

ARTICLE II - DEFINITIONS

For purposes of this Compact only, the following definitions shall apply:

1. "Acre-feet per year" or "AFY" means an annual quantity of water measured in acre-feet over a period of a year.

2. "Acre-foot" or "Acre-feet" or "AF" means the amount of water necessary to cover one acre to a depth of one foot and is equivalent to 43,560 cubic feet of water.

3. "Adverse Effect" or "Adversely Affect" means an actual interference with the reasonable exercise of a water right resulting in a material injury.

4. "Allottee" or "Allottees" means any individual or individuals who own or hold a trust allotment or interest in a trust allotment on the Fort Belknap Reservation under the authority of the General Allotment Act and subject to the terms and conditions of that Act.

5. "Arising Under Federal Law" means, as applied to a water right, a water right created or defined under federal law.

6. "Arising Under State Law" means, as applied to a water right, a water right created under Montana law and does not include water rights Arising Under Federal Law.

7. "Beaver Creek Basin" means Montana Water Court Basin 40M, consisting of the mainstem of Beaver Creek and its tributaries, including Big Warm Creek and Little Warm Creek, to its confluence with the Milk River, as shown in Appendix 2.

8. "Board" means the Fort Belknap - Montana Compact Board established by Section D. of Article IV of this Compact.

9. "Calculated Undepleted Flow of the Milk River" means the flow available for the Tribal Water Right determined pursuant to Section E.2. of Article IV, and represents the calculated United States' Share of the Natural Flow of the Milk River at the diversion point on the Reservation.

10. "Cfs" means cubic feet per second.

11. "Change in Use" means, as applied to the Tribal Water Right, a change in the point of diversion, the place of use, the purpose of use, or the place or means of storage.

12. "Combined Development" means, in reference to small wells and springs, a use or proposed use of water for the same purpose.

13. "Compact" means the water rights settlement entered into by the State of Montana, the Fort Belknap Indian Community of the Fort Belknap Reservation, and the United States of America.

14. "Depletion" means the amount of water consumptively used, or the difference between the amount of water diverted and returned to the source of supply.

15. "Direct Use" means diversion of water from the source to be used for a designated purpose without intermediate storage.

16. "DNRC" means the Montana Department of Natural Resources and Conservation, or any successor agency.

17. "Eastern Crossing" means the most downstream location at which the mainstem of the Milk River crosses the 49th parallel to re-enter the United States from Canada.

18. "Effective Date" means the date on which the Compact is finally approved by a referendum vote by the eligible members of the Fort Belknap Indian Community and ratified by the Fort Belknap Indian Community Council, by the Montana Legislature, and by the Congress of the United States, whichever date is latest.

19. "Exempt New Development" means new development of the Tribal Water Right that is exempt from review pursuant to Section A.4. of Article IV.

20. "Fort Belknap Indian Irrigation Project" means the irrigation projects authorized by federal law for development on the Reservation in the Milk River and Peoples Creek Basins.

21. "Groundwater" means any water that is beneath the ground surface.

22. "Hydrologically Connected" means the interconnection of groundwater and surface water such that they constitute one water supply and use of either results in an impact to both.

23. "Milk River Coordinating Committee" or "MRCC" means the basin organization established pursuant to Section C.1. of Article IV.

24. "Milk River Basin" means the mainstem of the Milk River and its tributaries from its headwaters to the confluence with the Missouri River and consists of: Montana Water Court Basins 40F, 40G, 40H, 40I, 40J, 40K, 40L, 40M, 40N, and 40O; and the portion of the Milk River and its tributaries flowing through the Provinces of Alberta and Saskatchewan in Canada.

25. "Milk River Basin 40J" or "Basin 40J" means the portion of the Milk River Basin, including the tributaries of Threemile Creek, White Bear Creek and Fifteenmile Creek, constituting Water Court Basin 40J, as shown in Appendix 2.

26. "Milk River Project" means the Reclamation project on the Milk and St. Mary Rivers in Montana authorized by the Reclamation Act of 1902, 32 Stat. 388; 43 U.S.C. 391.

27. "Missouri River Basin 40EJ" or "Basin 40EJ" means the portion of the Missouri River Basin including the tributaries of Suction, Rattlesnake, Tin Cup, Little Suction, and Cow Creeks constituting Water Court Basin 40EJ, as shown in Appendix 2.

28. "Non-Exempt New Development" means new development of the Tribal Water Right that is subject to review pursuant to Section A.5. of Article IV.

29. "Parties" means the Fort Belknap Indian Community of the Fort Belknap Reservation, the State of Montana, and the United States of America.

30. "Peoples Creek Basin" means Water Court Basin 40I, consisting of the mainstem of Peoples Creek to its confluence with the Milk River, and its tributaries including: Duck Creek; the South Fork of Peoples Creek; Little Peoples Creek; Jim Brown Creek; Lodge Pole Creek; Lone Tree Coulee; and Mud Creek, as shown in Appendix 2.

31. "Perennial Flowing Stream" means a stream that historically flowed and is currently flowing continuously during all seasons of the year including dry as well as wet years.

32. "Person(s)" means an individual or individuals or any other entity, public or private, including the State, the Tribes, and the government of the United States and all officers, agents, and departments thereof.

33. "Reservation" means the Fort Belknap Reservation and includes all lands and interests in lands which are now and in the future held in trust by the United States for the Gros Ventre and Assiniboine Tribes which compose the Fort Belknap Indian Community of the Fort Belknap Reservation within the boundary established by the Treaty ratified by Congress on May 1, 1888, 25 Stat. 113, as modified by: The Grinnell Agreement of October 9, 1895 and ratified by Congress in 1896, 29 Stat. 350; and the Fort Belknap Allotment Act of March 3, 1921, 41 Stat. 1355.

34. "Same Source" means the same aquifer in reference to wells and developed springs of 35 gallons per minute or less that do not exceed a use of 10 Acre-feet per year.

35. "Secretary" means the Secretary of the United States Department of the Interior, or his or her duly authorized representative.

36. "Seniority of the Water Rights Set Forth in Sections B.1.a. and d. of this Article III Shall not be Asserted Over" means the senior water rights specified in Sections B.1.a. and d. of Article III shall be administered as subordinate to the junior water rights specified and referenced in Section B.2.a of Article III.

37. "State" means the State of Montana and all officers, agencies, departments, and political subdivisions thereof.

38. "Transfer" means, as applied to the Tribal Water Right, to authorize a Person or Persons to use all or any part of the Tribal Water Right through a service contract, lease, or other similar agreement of limited duration.

39. "Tribal Water Resources Department" or "TWRD" means the Fort Belknap Tribal Water Resources Department, or any successor agency.

40. "Tribal Water Right" means the right of the Gros Ventre and Assiniboine Tribes which compose the Fort Belknap Indian Community, Tribal members, and Allottees within the Fort Belknap Reservation, to divert, use, or store water as described by Article III of this Compact.

41. "Tribes" means the Gros Ventre and Assiniboine Tribes which compose the Fort Belknap Indian Community of the Fort Belknap Reservation and all officers, agencies, and departments thereof.

42. "Undepleted Flow" means the stream flow in a watershed without the effects of diminishment by water uses for specific beneficial purposes including, but not limited to, irrigation, municipal, domestic, mining, commercial, industrial, stockwatering, recreational, and environmental concerns.

43. "United States" means the federal government and all officers, agencies, and departments thereof.

44. "United States' Share of the Natural Flow of the Milk River" means the allocation to the United States of water in the Milk River and its tributaries pursuant to Article VI of the "Treaty Between the United States and Great Britain Relating to Boundary Waters, and Questions Arising Between the United States and Canada," January 11, 1909, and ratified by the Senate on May 13, 1910, 36 Stat. 2455, and the Order of the International Joint Commission on October 4, 1921, pertaining to "In the matter of the Measurement and Apportionment of the Waters of the St. Mary and Milk Rivers and their Tributaries in the State of Montana and the Provinces of Alberta and Saskatchewan."

45. "Water Bank" means a water purchasing mechanism whereby willing sellers are paid to forego use of a portion of their supplies in a year of water shortage, and purchased water is either stored or reallocated to meet specified needs.

46. "Western Crossing" means the most upstream location at which the mainstem of the Milk River crosses the 49th parallel to enter Canada from the United States.

ARTICLE III - TRIBAL WATER RIGHT

The Tribal Water Right set forth in this Article III shall be the water allocation in settlement of the claims including Winters reserved water rights claims of the Tribes, Tribal members, and Allottees, and the United States on behalf of the Tribes, Tribal members, and Allottees within the Fort Belknap Reservation, to water within the State of Montana, as those claims exist on the Effective Date of the Compact, and shall be held in trust by the United States for the benefit of the Tribes, Tribal members, and Allottees within the Fort Belknap Reservation. Non-use of all or any of the Tribal Water Right does not constitute a relinquishment, forfeiture, or abandonment of such rights.

A. **Basin 40J: Milk River Basin 40J.**

1. **Quantification.**

a. The Tribes have the right to divert up to 645 cubic feet per second "Cfs" of the United States' Share of the Natural Flow of the Milk River and its tributaries upstream from the diversion point on the Reservation as calculated pursuant to Section E.2. of Article IV. The right to divert 645 Cfs is in addition to allocation to the Tribes of storage in Fresno Reservoir pursuant to the Memorandum of Agreement between the Bureau of Reclamation and the Office of Indian Affairs (BIA) Milk River Project Montana, I-1-Ind. 18725, July 8, 1946.

(1) Of the right to divert 645 Cfs, up to 125 Cfs may be diverted for Direct Use to a maximum of 10,425 irrigated acres within the Fort Belknap Indian Irrigation Project. This water right is intended to preserve the historic water use protected in Winters v. United States, 207 U.S. 564 (1908). Irrigation of the Fort Belknap Indian Irrigation Project pursuant to this paragraph may be on land within the external boundaries of the Project on the Effective Date of the Compact or as modified pursuant to applicable federal law.

(2) Of the right to divert 645 Cfs and in addition to the 125 Cfs water right quantified in Section A.1.a.(1) of this Article III, up to 520 Cfs may be diverted for Direct Use or to off-stream storage, or both, for subsequent use for both of the following: use on an additional 19,390 present and future irrigated acres (including land irrigated historically within the Milk River Basin 40J); and up to 4000 AFY of use for non-irrigation purposes. The off-stream storage pursuant to this Section A.1.a.(2) of Article III is limited to a maximum combined capacity of 60,000 Acre-feet. Irrigation by diversion to Direct Use pursuant to this paragraph may be accomplished through expansion or modification of the Fort Belknap Indian Irrigation Project pursuant to applicable federal law.

b. In addition to the water rights set forth in Section A.1.a. of this Article III, the Tribes have the right to divert surface flow from tributaries to the Milk River on the Reservation in Basin 40J to irrigate the acreage identified in Section A.1.a.(1) and (2) of this Article III.

c. In addition to the water rights set forth in Sections A.1.a. and b. of this Article III, the Tribes have the right to develop surface water in the Milk River Basin 40J within the Reservation for use by livestock if the maximum capacity of each impoundment or pit is less than 15 Acre-feet and the total amount impounded in each impoundment or pit is less than 30 Acre-feet per year and is from a source other than a Perennial Flowing Stream. The cumulative development of stock impoundments pursuant to this Section A.1.c., of Article III following the Effective Date of this Compact may not exceed a storage capacity of fifteen Acre-feet times the number of square miles in Basin 40J on the Reservation. This capacity limit does not apply to the water right quantified in Sections A.1.a., b., and d. of this Article III.

d. In addition to the water rights set forth in Sections A.1.a., b., and c. of this Article III, the Tribes have the right to use or authorize the use of water for non-irrigation purposes developed prior to the Effective Date of the Compact in the Milk River Basin 40J within the Reservation, provided that, any portion of this water right diverted from the mainstem of the Milk River shall be part of the 4000 AFY non-irrigation water right set forth in Section A.1.a.(2) of this Article III. These water uses are subject to the reporting requirements of Section A.7. of Article IV.

2. **Priority Date/Administrative Priority.**

a. For purposes of this Compact only, the priority date of the water rights set forth in Sections A.1.a., b., and d. of this Article III is October 17, 1855. The Parties agree that the senior water right quantified in Section A.1.a. of this Article III, shall be satisfied in the following manner:

(1) In the event that the water available for use by the Tribes at the diversion point on the Reservation is less than the amount to which the Tribes are entitled to pursuant to Section A.1.a. of this Article III and Section E.1.b.(2) of Article IV, the Tribes shall seek delivery of the difference between what they are entitled to and what is available solely from release or bypass of water from or through Fresno Dam by the Milk River Project. The Milk River Project shall, pursuant to Section E. of Article IV and applicable federal law, release or bypass the additional water necessary to fulfill the water right of the Tribes.

(2) The allocation between and relative priority of satisfaction of the water rights set forth in Section A.1.a. of this Article III and the water right of the Blackfeet Tribe in the Milk River Basin shall be resolved among the Fort Belknap Indian Community of the Fort Belknap Reservation, the Blackfeet Tribe, and the United States, or in the event an agreement is not reached, as ultimately decreed by the Montana Water Court or other court of competent jurisdiction, and shall not be prejudiced by this Compact including any agreement on priority date. The amount of the United States' Share of the Natural Flow of the Milk River available to the Tribes as calculated pursuant to Section E.2. of Article IV shall be modified to reflect any adjudication of the water rights of the Blackfeet Tribe or agreement between the Blackfeet Tribe and the Fort Belknap Indian Community of the Fort Belknap Reservation to the extent such agreement or adjudication affects the Calculated Undepleted Flow of the Milk River. The Milk River Project will not be required to provide any exchange water to the Tribes for diversion of the Blackfeet tribal water right.

b. The priority date of the water rights set forth in Section A.1.c. of this Article III for stock impoundments shall be the date of development of the right.

3. **Period of Use.** The period of use of the water rights set forth in Section A.1. of this Article III is:

a. March 1 through October 31 of each year for the 125 Cfs diversion set forth in Section A.1.a.(1) of this Article III.

b. January 1 through December 31 of each year for the 520 Cfs right set forth in Section A.1.a.(2) of this Article III.

c. March 1 through October 31 for water diverted from tributaries set forth in Section A.1.b. of this Article III.

d. January 1 through December 31 of each year for the water rights set forth in Section A.1.c. and d. of this Article III.

4. **Points and Means of Diversion.**

a. Subject to the terms and conditions set forth in Article IV, the water right set forth in Section A.1.a. of this Article III may be diverted from the mainstem of the Milk River in the Milk River Basin 40J, or from Groundwater beneath the Reservation that is Hydrologically Connected to the surface water from any place and by any means in the Milk River Basin 40J.

b. Subject to the terms and conditions set forth in Article IV, the water right set forth in Section A.1.b. of this Article III may be diverted for Direct Use from any place and by any means from tributaries to the Milk River in Basin 40J on the Reservation.

c. Subject to the terms and conditions set forth in Article IV, the water right set forth in Section A.1.c. of this Article III may be developed from a surface water source anywhere within the Milk River Basin 40J within the Reservation, provided that, the development may not be on a Perennial Flowing Stream.

d. Subject to the terms and conditions set forth in Article IV, the water rights set forth in Section A.1.d. of this Article III may be diverted from any place and by any means in Basin 40J from surface water or Groundwater that is Hydrologically Connected to surface water, within the Reservation in Basin 40J.

5. **Place of Use.**

a. Subject to the terms and conditions set forth in Article IV, the Tribes may use or authorize the use of the water rights set forth in Sections A.1.a. and b. of this Article III any place within the Reservation.

b. Subject to the terms and conditions of Article IV, the Tribes may transfer water developed (pursuant to Section A.1.a. of this Article III) prior to the date of application for a Change in Use or Transfer or stored (pursuant to Section A.1.a.(2) of this Article III) prior to the date of application for a Change in Use or Transfer for use off the Reservation within the Missouri River Basin.

c. The Tribes may use or authorize the use of the water rights set forth in Sections A.1.c. and d. of this Article III any place within the Reservation.

6. **Purposes.**

a. The water rights set forth in Sections A.1.a. and b. of this Article III may be used within the Reservation for any purpose allowed by Tribal and federal law, including fish and wildlife purposes, provided that, Non-Exempt New Development, Change in Use, or Transfer of any portion of the Tribal Water Right, is subject to the terms and conditions of Section A. of Article IV

b. The water rights set forth in Section A.1.c. of this Article III may be used for the purpose of watering stock and may not be changed to any other use.

c. The water rights set forth in Section A.1.d. of this Article III may be used within the Reservation in Basin 40J for any non-irrigation purposes.

B. **Basin 40I: Peoples Creek Basin.**

1. **Quantification.**

a. The Tribes have the right to the surface water and Groundwater that is Hydrologically Connected to surface water that remains in the Peoples Creek Basin within the Reservation after satisfaction of water rights Arising Under State Law set forth in Appendix 3. The Tribes have the right to store water within the Peoples Creek Basin pursuant to this water right. The reservoir or reservoirs must be entirely within the Reservation unless otherwise agreed to with affected landowners off the Reservation.

b. In addition to the water rights set forth in Section B.1.a. of this Article III, the Tribes' right to use water in the Peoples Creek Basin includes the right to use water conveyed from the Missouri River Basin 40EJ pursuant to Section E.1.b. of this Article III. The Tribes have the right to store water within the Peoples Creek Basin pursuant to this water right. The reservoir or reservoirs must be entirely within the Reservation unless otherwise agreed to with affected landowners off the Reservation.

c. In addition to the water rights set forth in Sections B.1.a. and b. of this Article III, the Tribes have the right to develop surface water in the Peoples Creek Basin within the Reservation for use by livestock if the maximum capacity of each impoundment or pit is less than 15 Acre-feet and the total amount impounded in each impoundment or pit is less than 30 Acre-feet per year and is from a source other than a Perennial Flowing Stream. The cumulative development of stock impoundments pursuant to this Section B.1.c., of this Article III following the Effective Date of this Compact may not exceed a storage capacity of fifteen Acre-feet times the number of square miles in Basin 40I on the Reservation. This capacity limit does not apply to the water right quantified in Sections B.1.a., b., and d. of this Article III.

d. In addition to the water rights set forth in Sections B.1.a., b., and c. of this Article III, the Tribes have the right to use or authorize the use of water for non-irrigation purposes developed prior to the Effective Date of the Compact in the Peoples Creek Basin within the Reservation. These water uses are subject to the reporting requirements of Section A.7. of Article IV.

2. **Priority Date/Administrative Priority.**

a. For purposes of this Compact, the priority date of the water rights set forth in Sections B.1.a. and d. of this Article III is October 17, 1855. For the purposes of providing a more reliable water right and simplification of administration, the Parties agree that this senior water right shall be satisfied in the following manner:

(1) Subject to the terms of Section B.2.a.(2) of this Article III, the Seniority of the Water Rights Set Forth in Sections B.1.a. and d. of this Article III Shall Not be Asserted Over non-irrigation water rights Arising Under State Law upstream from the Reservation in the Peoples Creek Basin with a priority date before the Effective Date of the Compact, and irrigation water rights set forth in Appendix 3, provided that water rights numbers W017296, W166075, and C016704 are not protected by this agreement. The Tribes may assert the senior priority of water rights and storage that have been actually developed over water rights Arising Under State Law that are developed after the Effective Date of this Compact, and over any water rights Arising Under State Law not set forth in Appendix 3.

(2) The agreement set forth in Section B.2.a.(1) of this Article III is not effective until completion of construction of a reservoir or reservoirs of a minimum capacity of 3000 AF on the Reservation in upper Peoples Creek for use by the Tribes. Prior to construction of the reservoir, the Tribes may only assert the senior priority of water rights actually developed.

b. The priority date of the water right set forth in Section B.1.b. of this Article III shall be as set forth in Section E.2.b. of this Article III.

c. The priority date of the water rights set forth in Section B.1.c. of this Article III for stock impoundments shall be the date of development of the right.

3. **Period of Use.** The period of use of the water rights set forth in Section B.1. of this Article III is January 1 through December 31 of each year.

4. **Points and Means of Diversion.**

a. The water right set forth in Sections B.1.a. and d. of this Article III may be diverted for Direct Use or storage from surface water or from Groundwater that is Hydrologically Connected to surface water from any place and by any means within the Peoples Creek Basin within the Reservation.

b. The point and means of diversion of the water right set forth in Section B.1.b. of this Article III shall be as set forth in Section E.4.b. of this Article III.

c. The water right set forth in Section B.1.c. of this Article III may be developed on a surface water source anywhere within the Peoples Creek Basin within the Reservation, provided that, the development may not be on a Perennial Flowing Stream.

5. **Place of Use.**

a. The Tribes may use or authorize the use of the water rights set forth in Sections B.1.a. and b. of this Article III for use any place within the Reservation within the Peoples Creek Basin. Subject to the terms and conditions set forth in Article IV, the Tribes may Transfer water stored pursuant to Sections B.1.a. and b. of this Article III for use off the Reservation within the Milk River Basin.

b. The Tribes may use or authorize the use of the water rights set forth in Sections B.1.c., and d. of this Article III for use any place within the Reservation.

6. **Purposes.**

a. The water rights set forth in Sections B.1.a. and b. of this Article III may be used for any purpose allowed by Tribal and federal law, including fish and wildlife purposes, provided that, any Transfer of the water rights stored pursuant to Sections B.1.a. and b. of this Article III off the Reservation, after the Effective Date of the Compact is subject to the terms and conditions of Section A. of Article IV.

b. The water rights set forth in Section B.1.c. of this Article III may be used for the purpose of watering stock and may not be changed to any other use.

c. The water rights set forth in Section B.1.d. of this Article III may be used within the Reservation in Basin 40I for any non-irrigation purposes.

C. **Basin 40M: Beaver Creek Basin.**

1. **Quantification.**

a. The Tribes have the right to divert 8,024 AFY for irrigation of 2,241 acres from surface flow, or from Groundwater that is Hydrologically Connected to surface flow, within the Reservation in the Beaver Creek Basin. The Tribes agree to use their best efforts to bypass a minimum flow when naturally available.

b. In addition to the water rights set forth in Section C.1.a. of this Article III, the Tribes have the right to develop surface water in the Beaver Creek Basin within the Reservation for use by livestock if the maximum capacity of each impoundment or pit is less than 15 Acre-feet and the total amount impounded in each impoundment or pit is less than 30 Acre-feet per year and is from a source other than a Perennial Flowing Stream. The cumulative development of stock impoundments pursuant to this Section C.1.b., of this Article III following the Effective Date of this Compact may not exceed a storage capacity of 15 Acre-feet times the number of square miles in Basin 40M on the Reservation. This capacity limit does not apply to the water right quantified in Sections C.1.a. and c. of this Article III.

c. In addition to the water rights set forth in Sections C.1.a. and b. of this Article III, the Tribes have the right to use or authorize the use of water for non-irrigation purposes developed prior to the Effective Date of the Compact in the Beaver Creek Basin within the Reservation. These water uses are subject to the reporting requirements of Section A.7. of Article IV.

2. **Priority Date/Administrative Priority.**

a. For purposes of this Compact, the priority date of the water rights set forth in Sections C.1.a. and c. of this Article III is October 17, 1855.

b. The priority date of the water rights set forth in Section C.1.b. of this Article III for stock impoundments shall be the date of development of the right.

3. **Period of Use.** The period of use of the water rights set forth in Section C.1. of this Article III is:

a. March 1 through October 31 for the 8,024 AFY water right set forth in Section C.1.a. of this Article III.

b. January 1 through December 31 of each year for the water rights set forth in Sections C.1.b. and c. of this Article III.

4. **Points and Means of Diversion.**

a. Subject to the terms and conditions set forth in Article IV, the Tribes may divert or authorize the diversion of the water rights set forth in Sections C.1.a. and c. of this Article III from any place and by any means from surface water or Groundwater that is Hydrologically Connected to surface water in the Beaver Creek Basin within the Reservation. When constructing diversion facilities, the Tribes agree to use their best efforts to allow bypass of a minimum flow, when naturally available.

b. Subject to the terms and conditions set forth in Article IV, the water right set forth in Section C.1.b. of this Article III may be developed on a surface water source anywhere within the Beaver Creek Basin within the Reservation, provided that, the development may not be on a Perennial Flowing Stream.

5. **Place of Use.** Subject to the terms and conditions set forth in Article IV, the Tribes may use or authorize the use of the water rights set forth in Sections C.1.a., b., and c. of this Article III any place within the Reservation within the Beaver Creek Basin.

6. **Purposes.**

a. The Tribes may use or authorize the use of the water rights set forth in Section C.1.a. of this Article III within the Reservation for any purpose allowed by Tribal and federal law, including fish and wildlife purposes, provided that, use of the water rights set forth in Section C.1.a. of this Article III, for any purpose other than irrigation is subject to the terms and conditions of Section A. of Article IV.

b. The water rights set forth in Section C.1.b. of this Article III may be used for the purpose of watering stock and may not be changed to any other use.

c. The water rights set forth in Section C.1.c. of this Article III may be used within the Reservation in the Beaver Creek Basin for any non-irrigation purposes.

D. **Reservation Portion of Missouri River Basin 40EJ.**

1. **Quantification.**

a. The Tribes have the right to use or authorize the use of water for non-irrigation purposes developed prior to the Effective Date of the Compact in Basin 40EJ within the Reservation. These water uses are subject to the reporting requirements of Section A.7. of Article IV.

b. In addition to the water rights set forth in Section D.1.a. of this Article III, the Tribes have the right to develop surface water in Basin 40EJ within the Reservation for use by livestock if the maximum capacity of each impoundment or pit is less than 15 Acre-feet and the total amount impounded in each impoundment or pit is less than 30 Acre-feet per year and is from a source other than a Perennial Flowing Stream.

2. **Priority Date/Administrative Priority.**

a. For purposes of this Compact, the priority date of the water rights set forth in Section D.1.a. of this Article III is October 17, 1855.

b. The priority date of the water rights set forth in Section D.1.b. of this Article III for stock impoundments shall be the date of development of the right.

3. **Period of Use.** The period of use of the water rights set forth in Section D.1. of this Article III is January 1 through December 31 of each year.

4. **Points and Means of Diversion.**

a. Subject to the terms and conditions set forth in Article IV, the Tribes may continue to divert or authorize the diversion of the water rights set forth in Section D.1.a. of this Article III from any place and by any means from surface water or Groundwater that is Hydrologically Connected to surface water, within the Reservation in Basin 40EJ.

b. Subject to the terms and conditions set forth in Article IV, the water right set forth in Section D.1.b. of this Article III may be developed on a surface water source anywhere within Basin 40EJ within the Reservation, provided that, the development may not be on a Perennial Flowing Stream.

5. **Place of Use.** Subject to the terms and conditions set forth in Article IV, the Tribes may use or authorize the use of the water rights set forth in Section D.1. of this Article III on any place within the Reservation within Basin 40EJ.

6. **Purposes.**

a. The Tribes may use or authorize the use of the water rights set forth in Section D.1.a. of this Article III for any non-irrigation purposes.

b. The water rights set forth in Section D.1.b. of this Article III may be used for the purpose of watering stock and may not be changed to any other use.

E. **Off-Reservation Tribal Fee and Trust Lands - Missouri Basin 40EJ and Peoples Creek Basin 40I.** The Tribes have the following water rights on trust and fee land off the Reservation in Missouri Basin 40EJ and Peoples Creek Basin 40I. Unless Congress acts to modify the Reservation boundary to include the Tribal trust and fee land, the rights shall not be considered part of the Tribal Water Right for purposes of administration pursuant to Article IV. The water rights set forth in this Section E. of Article III shall be administered by the State pursuant to Section B.1.b. of Article IV, except that non-use of all or any of the rights shall not constitute a relinquishment, forfeiture, or abandonment of such rights.

1. **Quantification.**

a. The Tribes have the right to divert up to 1135 AFY for irrigation of:

(1) 297 acres of land historically irrigated in Basin 40EJ; and

(2) 18 acres of land in Basin 40EJ developed after the Effective Date of the Compact.

b. In addition to the water rights set forth in Section E.1.a. of this Article III, the Tribes have the right to divert up to 1290 AFY for conveyance to the Peoples Creek Basin.

c. In addition to the water rights set forth in Sections E.1.a. and b. of this Article III, the Tribes have the right to use or authorize the use of water for non-irrigation purposes developed prior to the Effective Date of the Compact on Tribal fee and trust land off the Reservation in Basin 40EJ and Basin 40I. These water uses are subject to the reporting requirements of Section A.7. of Article IV.

d. In addition to the water rights set forth in Sections E.1.a., b., and c. of this Article III, the Tribes have the right to develop surface and Groundwater in Basin 40EJ and Basin 40I on Tribal fee and trust land off the Reservation pursuant to State law.

e. In addition to the water rights set forth in Sections E.1.a., b., c., and d. of this Article III, the Tribes have the right, pursuant to State law, to develop surface water in Basin 40EJ and Basin 40I on Tribal fee and trust land off the Reservation for use by livestock if the maximum capacity of each impoundment or pit is less than 15 Acre-feet and the total amount impounded in each impoundment or pit is less than 30 Acre-feet per year and is from a source other than a Perennial Flowing Stream.

2. **Priority Date/Administrative Priority.**

a. The priority date of the water rights set forth in Section E.1.a. of this Article III is:

(1) July 24, 1893 for the water right set forth in Section E.1.a.(1) of this Article III.

(2) The date of development for the 18 acres set forth in Section E.1.a.(2) of this Article III.

b. The priority date of the water right set forth in Section E.1.b. of this Article III is January 1, 1935.

c. The priority dates of the water rights set forth in Section E.1.c. of this Article III are the date on which the water was developed for stock and domestic purposes. The priority date of these rights is subject to the reporting requirements of Section A.7. of Article IV.

d. The priority date of the water rights set forth in Sections E.1.d., and e. of this Article III shall be as provided by State law.

3. **Period of Use.** The period of use of the water rights set forth in Section E.1. of this Article III is:

a. March 1 through October 31 of each year for the irrigation water rights set forth in Section E.1.a. of this Article III.

b. January 1 through December 31 of each year for diversion of the water right set forth in Section E.1.b. of this Article III.

c. January 1 through December 31 of each year for the water rights set forth in Section E.1.c. of this Article III.

d. As provided by State law for the water rights set forth in Sections E.1.d., and e. of this Article III.

4. **Points and Means of Diversion.**

a. The points and means of diversion for the water rights set forth in Section E.1.a. of this Article III are as follows:

(1) The water right set forth in Section E.1.a.(1) of this Article III may be diverted from any point by any means on Tribal trust or fee land within Section 30, T28N, R22E and the SW 1/4 of Section 18, T27N, R22E;

(2) The water right set forth in Section E.1.a.(2) of this Article III may be diverted from any point by any means on Tribal trust or fee land within Section 19, T27N, R22E.

b. The water right set forth in Section E.1.b. of this Article III may be diverted from any point by any means on Tribal trust or fee land in the SWSESW, Section 9, T26N, R22E.

c. The water rights set forth in Section E.1.c. of this Article III may be diverted from the place and by the means in use prior to the Effective Date of the Compact, on Tribal fee or trust land in Basin 40EJ and Basin 40I. Subject to the terms and conditions of Section B. of Article IV, the Tribes may change the point and means of diversion of a water right set forth in Section E.1.c. of this Article III to any place and any means from surface or Groundwater that is Hydrologically Connected to surface water, on Tribal fee or trust land in Basin 40EJ or Basin 40I.

d. The water right set forth in Sections E.1.d. and e. of this Article III may be diverted from any point by any means on Tribal fee or trust land in Basin 40EJ and Basin 40I, pursuant to State law.

5. **Place of Use.**

a. The Tribes may use the water rights set forth in Section E.1.a.(1) of this Article III on Tribal trust or fee land in Sections 29, 30, 31, and 32, T28N, R22E, and on the W1/2 of the SE1/2 and the E1/2 of the W1/2 of Section 19, T27N, R22E. The Tribes may use the water rights set forth in Section E.1.a.(2) of this Article III on Tribal trust or fee land in Sections 19 and 30, T27N, R22E.

b. The water rights set forth in Section E.1.b. of this Article III may be used any place authorized in Section B.5.a. of this Article III, and shall be administered as part of the Tribal Water Right.

c. Subject to the requirements of State law, the water rights set forth in Section E.1.c. of this Article III may be used any place on Tribal fee or trust land in Basin 40EJ and Basin 40I on which the water has been used prior to the Effective Date of the Compact.

d. The water rights set forth in Sections E.1.d. and e. of this Article III may be used on any Tribal fee and trust land in Basin 40EJ and Basin 40I, pursuant to State law.

6. **Purposes.**

a. The water rights set forth in Section E.1.a. of this Article III may be used for irrigation. Subject to the terms and conditions of Section B. of Article IV, the Tribes may change the use of the water rights set forth in Section E.1.a. of this Article III to any other purpose allowed by State law.

b. The water rights set forth in Section E.1.b. of this Article III may be used for any purpose allowed by federal and Tribal law.

c. The water rights set forth in Section E.1.c. of this Article III may continue to be used for stock and domestic purposes according to their purpose on the Effective Date of the Compact. Subject to the terms and conditions of Section B. of Article IV, the Tribes may change the use of the water rights set forth in Section E.1.c. of this Article III to any other purpose allowed by State law.

d. The water rights set forth in Sections E.1.d., and e. of this Article III may be used for any purpose allowed by State law.

F. **Temporary Emergency Appropriations.** The Tribes or the United States on behalf of the Tribes may divert water from sources on the Reservation for use on or off the Reservation for temporary emergency use necessary for public health and safety. Temporary emergency use of water from a source for which a water right is quantified in this Article III of this Compact shall not be considered an exercise of that right.

G. **Groundwater.**

1. **Groundwater that is Hydrologically Connected to Surface Water.** The Tribes have the right to develop Groundwater that is Hydrologically Connected to surface water within the quantification limits for surface water provided in Sections A., B., C., D., and E. of this Article III. The attributes of the water right are as set forth in Sections A., B, C., D., and E. of this Article III.

2. **Existing Groundwater Development.**

a. **Quantification.** The Tribes have the right to the use of Groundwater developed before the Effective Date of the Compact within the Reservation as provided in Sections A.1.d., B.1.d., C.1.c., and D.1.a. of this Article III. These Groundwater uses are subject to the reporting requirements of Section A.7. of Article IV.

3. **New Development of Small Groundwater Wells and Springs.**

a. **Quantification.** In addition to the water rights set forth in Sections A., B., C., and D., of this Article III, the Tribes have the right to develop Groundwater within the Reservation by means of wells or developed springs if the maximum flow of each well or developed spring is 35 gallons per minute or less and does not exceed a use of 10 Acre-feet per year. This size limitation includes a Combined Development from the Same Source from two or more wells or developed springs.

b. **Priority Date/Administrative Priority.**

The priority date of the water rights set forth in Section G.3.a. of this Article III shall be the date of development of the right.

c. **Period of Use.** The period of use of the water rights set forth in Section G.3.a. of this Article III is January 1 through December 31 of each year.

d. **Points and Means of Diversion.** Subject to the terms and conditions set forth in Article IV, the water right set forth in Section G.3.a. of this Article III may be diverted from Groundwater from any point by any means within the Reservation.

e. **Place of Use.** Subject to the terms and conditions set forth in Article IV, the Tribes may use or authorize the use of the water rights set forth in Section G.3.a. of this Article III any place within the Reservation.

f. **Purposes.** Subject to the terms and conditions set forth in Article IV, the water rights set forth in Section G.3.a. of this Article III may be used for any purpose authorized by Tribal or federal law.

4. **New Groundwater Development not Hydrologically Connected to Surface Water.**

a. **Quantification.** In addition to the water rights set forth in Sections A., B., C., D., and E. of this Article III, the Tribes have the right to develop or authorize the development of Groundwater within the Reservation that is not Hydrologically Connected to surface water subject to the following conditions:

(1) The development of Groundwater that is not Hydrologically Connected to surface water must comply with the provisions of Sections A.5. and 6. of Article IV for determination of Adverse Effect. Pursuant to Section A.5.a. of Article IV, the Tribal Water Resources Department and the DNRC may jointly agree to exempt certain development of Groundwater from a showing of no Adverse Effect due to location, size, or other agreed upon parameter.

(2) If a conflict arises between use of the water right set forth in this Section G.4. of Article III and a water right Arising Under State Law, DNRC and TWRD shall attempt to resolve the controversy. In attempting to resolve the controversy, DNRC and TWRD may establish controlled Groundwater areas off and on the Reservation and may manage them cooperatively pursuant to Sections A.2.d. and B.2. of Article IV. If DNRC and TWRD are unable to resolve the controversy, the Tribes, State or the Person whose water use is affected may seek relief from the

Compact Board. Among the remedies the Compact Board may order is imposition of a controlled Groundwater area that includes Groundwater use both on and off the Reservation pursuant to Sections A.2.d. and B.2. of Article IV. The controlled Groundwater area is to be administered by the TWRD on the Reservation and the DNRC off the Reservation pursuant to Article IV and Tribal and State law.

b. **Priority Date.** The priority date of the water rights set forth in Section G.4.a. of this Article III for new Groundwater development shall be the date of development of the right.

c. **Period of Use.** The period of use of the water rights set forth in Section G.4.a. of this Article III for new Groundwater development is January 1 through December 31 of each year.

d. **Points and Means of Diversion.** Subject to the requirements set forth in Article IV, the water rights set forth in Section G.4.a. of this Article III may be diverted from Groundwater that is not Hydrologically Connected to surface water at any point by any means within the Reservation.

e. **Place of Use.** Subject to the requirements set forth in Article IV, the water rights set forth in Section G.4.a. of this Article III may be used on any place within the Reservation.

f. **Purpose.** Subject to the requirements set forth in Article IV, the Tribes may use or authorize the use of the water rights set forth in Section G.4.a. of this Article III for any purpose allowed by Tribal and federal law.

H. **Additional Water.** As a part of the Tribal Water Right, the Tribes shall be entitled to an allocation of stored water in Lake Elwell as agreed to by the Parties and as provided by Congress, measured at the dam, for use or disposition by the Tribes for any beneficial purpose, either on or off the Reservation, pursuant to the terms of this Compact; provided that, such allocation shall be in accordance with the terms and conditions of any Act of Congress ratifying this Compact. This allocation is subject to the prior reserved water rights, if any, of any other Indian tribe, or persons holding such reserved water rights through that tribe or through the United States. Any use or disposition of water from Lake Elwell off the Reservation by the Tribes is subject to the specific provisions relating to such use or disposition in any Act of Congress ratifying this Compact. The United States shall have no responsibility or obligation to provide any facility for the transport of the water allocated under this Section H. of Article III. to the Fort Belknap Reservation or to any other location.

I. **Basin Closures.**

1. The following closure does not apply to development of the Tribal Water Right as provided for in this Compact. In the Milk River Basin from the Eastern Crossing to the confluence between the Milk River and the Missouri River comprised of Basins 40F, 40G, 40H, 40I, 40J, 40K, 40L, 40M, 40N, and 40O both above the Western Crossing and below the Eastern Crossing, DNRC shall not process or grant an application for an appropriation pursuant to State law after this Compact has been ratified by the Montana legislature, provided that, after compliance by the applicant with all applicable provisions of State and federal law, DNRC may issue a certificate of water right or permit for:

a. An appropriation for municipal use of surface or Groundwater that is Hydrologically Connected to surface water. In addition to compliance with applicable State law, the application shall be treated as a change in use for the purposes of Section B. of Article IV, if the point of diversion is located upstream from any point on the Reservation. For purposes of compliance with State law other than this Compact, the appropriation shall be treated as a new use.

b. An appropriation of Groundwater that is not Hydrologically Connected to surface water. In addition to compliance with applicable State law, the application shall be treated as a change in use for the purposes of Section B. of Article IV, if the point of diversion is within an aquifer that might extend onto the Reservation. For purposes of compliance with State law other than this Compact, the appropriation shall be treated as a new use.

c. An appropriation of Groundwater by means of a well or developed spring with a maximum appropriation of 35 gallons per minute or less that does not exceed a use of 10 Acre-feet per year. This size limitation includes a Combined Development from the Same Source from two or more wells or developed springs. This exemption includes development on fee land on the Reservation.

d. An appropriation of water for use by livestock if the maximum capacity of the impoundment or pit is less than 15 Acre-feet and the appropriation is less than 30 Acre-feet per year and is from a source other than a Perennial Flowing Stream. This exemption includes development on fee land on the Reservation. With the exception of Peoples Creek Basin 40I, the cumulative development of stock impoundments pursuant to this exemption following the Effective Date of this Compact may not exceed a storage capacity of 15 Acre-feet times the number of square miles in the Water Court basin in which the new impoundment is located. In the Peoples Creek Basin 40I, development of stock impoundments pursuant to this exemption following the Effective Date of this Compact must be constructed with the ability to bypass inflow.

e. An appropriation for instream use of water by livestock.

f. Temporary emergency appropriations as provided in § 85-2-113(3), MCA.

g. An appropriation necessary for the purposes of new storage of imported water or modification and replacement of existing storage as set forth in Section I.4. of this Article III.

h. An appropriation necessary for new storage off the Reservation approved by the Milk River Coordinating Committee pursuant to Section C.3.g. of Article IV.

i. An appropriation for a nonconsumptive use as defined under State law.

j. With the exception of applications for appropriations in Basin 40I upstream from the Reservation, an appropriation of water for an impoundment of any size for use for fish and wildlife purposes if the cumulative development under this provision and Section I.1.d. of this Article III, does not exceed 15 Acre-feet times the number of square miles owned by the applicant in the Water Court basin in which the new impoundment is located.

2. The basin closure is not a limit on change of use or transfer of any water right Arising Under State Law, provided that, applicable provisions of State and federal law and this Compact are followed. For purposes of this Compact, any change in a water right for the purpose of moving instream stockwatering to off-stream stockwatering that does not result in an increase in the historic consumptive use of water shall be considered a change in use, and is not a new use subject to the basin closure.

3. Due to the shortage of water in the Milk River Basin, water salvaged through efficiency measures may not be used to expand irrigation from a water right Arising Under State Law with a point of diversion in the United States' portion of the Milk River Basin under the following circumstances:

a. the efficiency measures are funded in whole or in part by the State, United States, Tribes, or water users as part of the implementation of this Compact; or

b. the salvaged water may be used to alleviate water shortage in the Milk River Basin. Pursuant to Section B.3. of Article IV, DNRC may promulgate rules to implement this provision.

4. The basin closure is not a limit on: the modification or replacement of existing storage when there is no enlargement of that storage; the modification or development of storage pursuant to this Compact and the federal legislation that ratifies this Compact; or the development of storage to impound water imported to the Milk River Basin from another basin.

5. Within 120 days of the date this Compact is ratified by the Montana Legislature, DNRC shall publish notice of the basin closures set forth in Section I. of this Article III once in newspapers of general circulation in the area of the sources.

ARTICLE IV - IMPLEMENTATION OF COMPACT

A. Tribal Administration.

1. Tribal Authority Over Tribal Water Right.

a. The Tribes have the right, subject to the limits imposed by this Compact (including Sections C., D., and E. of this Article IV, and Section B.3. of Article VII), and federal law (including 25 U.S.C. § 381), to administer the use of the Tribal Water Right.

b. Once the Tribal Water Right is diverted to the facilities of the Fort Belknap Indian Irrigation Project on units held by the United States, distribution shall be conducted by the United States Department of the Interior, Bureau of Indian Affairs or its successor in accordance with applicable federal laws. Operation and maintenance of the Fort Belknap Indian Irrigation Project shall be conducted by the United States Department of the Interior, Bureau of Indian Affairs or its successor in accordance with applicable federal laws.

c. Once the Tribal Water Right is diverted to the facilities of the Ereaux Unit, and any other unit previously part of the Fort Belknap Indian Irrigation Project which has been subsequently quit claimed by the United States to specific irrigation companies, distribution shall be conducted by the irrigation companies. Administration of the Tribal Water Right to the points of diversion of the listed irrigation projects shall be conducted by the Tribes on Peoples Creek and other tributaries to the Milk River on the Reservation, and pursuant to Sections C., D., and E., of this Article IV, and Section B.3. of Article VII on the mainstem of the Milk River.

d. Owners of fee land within the Reservation may apply to the Tribes to continue their historic use of water in the manner and to the extent existing on the Effective Date of the Compact on fee land within the Reservation as determined by the TWRD pursuant to the Tribal water code as part of the Tribal Water Right if no claim was filed by the landowner in the state adjudication, or may continue their use pursuant to state law and as decreed by state court if a claim was filed.

2. **Tribal Water Code.** Administration of the Tribal Water Right by the Tribes shall be pursuant to a comprehensive Tribal water code governing the Tribal Water Right set forth in this Compact. Pending the adoption of the Tribal water code, the administration of the Tribal Water Right shall be by the Secretary of the Interior. The Tribal water code shall be developed and adopted by the Tribes with approval by the Secretary within two (2) years following the Effective Date of this Compact and shall include:

a. A process by which any Tribal member or Allottee may request and be provided with an equitable distribution of water for use on his or her trust lands.

b. A process for notice and a right to be heard for the consideration and determination of any request by a Tribal member or Allottee for an equitable distribution of water, including a process for formal review of denied or disputed distributions and for resolution of contested administrative decisions.

c. A process by which an owner of fee land within the boundaries of the Reservation may apply for use of a portion of the Tribal Water Right.

d. A process for establishment of a controlled Groundwater area and for management of such Area in cooperation with establishment of a contiguous controlled Groundwater area off the Reservation established pursuant to Section B.2. of this Article IV and State law.

3. **Persons Authorized to Use the Tribal Water Right.** The Tribal Water Right may be used by the Tribes, or Persons authorized by the Tribes (including Tribal members, Allottees, and holders of fee land within the boundaries of the Fort Belknap Reservation).

4. **Authorization for New Development of the Tribal Water Right.** Subject to Article III and the following conditions, the Tribes may use or authorize the use of the Tribal Water Right within the Reservation for any purpose allowed by this Compact and Tribal and federal law:

a. Impact of new development of the Tribal Water Right within the Reservation for the purposes of irrigation and non-irrigation use as expressly identified under the quantification in Article III, and new development for any purpose within the Reservation within the Peoples Creek Basin, have been accounted for in design of mitigation and administration in the Compact. Thus, new development for the purposes expressly identified in Article III within the Reservation and all new development within the Reservation within the Peoples Creek Basin are exempt from any review by DNRC under the process set forth in Sections A.5. and 6. of this Article IV. All such development will be referred to as "Exempt New Development." Specifically, Exempt New-Development is as follows:

(1) Use of the Tribal Water Right for purposes of irrigation with the place of use on the Reservation and as set forth in Article III.

(2) Use of up to 4000 AFY of water diverted from the Milk River pursuant to Section A.1.a.(2) of Article III for non-irrigation purposes on the Reservation.

(3) Use of the Tribal Water Right quantified for the Peoples Creek Basin within the Reservation for any purpose allowed by Tribal or federal law.

(4) Use of the Tribal Water Right for stockwatering on the Reservation if the maximum capacity of the impoundment or pit is less than 15 Acre-feet and the appropriation is less than 30 Acre-feet per year and is from a source other than a Perennial Flowing Stream.

(5) Use of Groundwater on the Reservation that is Hydrologically Connected to surface water by means of a well or developed spring with an appropriation of 35 gallons per minute

or less, and a use that does not exceed 10 Acre-feet per year. This size limitation includes a Combined Development from the Same Source from two or more wells or developed springs.

b. Any Tribal authorization for the development of Groundwater that is not Hydrologically Connected to surface water by means of a well or developed spring with an appropriation of greater than 35 gallons per minute, or in excess of 10 Acre-feet per year, developed after the Effective Date of this Compact, shall not have an Adverse Effect on water rights Arising Under State Law with a priority date before the date of the application for Groundwater development. The development is considered a Non-Exempt New Development and is subject to the procedures set forth in Sections A.5. and 6. of this Article IV.

5. **Non-Exempt New Development, Change in Use, or Transfer of the Tribal Water Right.** Subject to the following conditions, the Tribes may make or authorize a Non-Exempt New Development, Change in Use, or Transfer of the Tribal Water Right.

a. A Non-Exempt New Development, Change in Use, or Transfer of the Tribal Water Right on or off the Reservation may not Adversely Affect a water right Arising Under State Law with a priority date before the date of the application to the TWRD for the Non-Exempt New Development, Change in Use, or Transfer. Determination of Adverse Effect for the purposes of this Section shall be pursuant to the procedures set forth in Section A.6. of this Article IV and Appendix 5. In addition, the TWRD and DNRC may jointly agree to exempt certain Change in Use, Transfer or Non-Exempt New Development from a showing of no Adverse Effect due to location, size, or other agreed upon parameter.

b. Off Reservation Change in Use or Transfer of the Tribal Water Right is limited as follows:

(1) Off Reservation use of the Tribal Water Right on non-Tribal land shall be limited to the following portion of the Tribal Water Right developed or stored prior to the date of application for Change in Use or Transfer:

(a) Water developed by Direct Use prior to the date of the application for Change in Use or Transfer from the Milk River pursuant to Section A.1.a. of Article III; or

(b) Water stored from the Milk River pursuant to Section A.1.a.(2) of Article III.

(c) Water stored from Peoples Creek pursuant to Sections B.1.a., and b. of Article III.

(2) The off-Reservation new development, Change in Use, or Transfer of the transferable portion of the Tribal Water Right set forth in Section A.1.a. of Article III is limited to a place of use within the Missouri River Basin.

(a) If the Tribes receive a good faith offer from a Person for Transfer of a portion of the Tribal Water Right outside the Milk River Basin, the Tribes shall allow water users receiving water from the Milk River Project the first opportunity, and other water users in the Milk River Basin the second opportunity, to acquire use of such rights at a price consistent with the market value of water within the Milk River Basin at the time of the offer.

(b) The Tribes are not required to offer the first or second right to use a portion of the Tribal Water Right to any water user in the Milk River Basin who is currently marketing a portion of their own water right.

(3) The off-Reservation new development, Change in Use, or Transfer of the transferable portion of the Tribal Water Right set forth in Sections B.1.a., and b. of Article III is limited to a place of use within the Milk River Basin.

(4) The off-Reservation new development, Change in Use, or Transfer of the portion of the Tribal Water Right set forth in Section H. of Article III is limited to a place of use in the Missouri River Basin.

(5) Any off-Reservation Change in Use or Transfer of a portion of the Tribal Water Right may not exceed a term of 100 years, but may include provisions authorizing renewal for an additional term not to exceed 100 years.

(6) No off-Reservation Change in Use or Transfer of a portion of the Tribal Water Right may permanently alienate the water right.

(7) The development or use of the Tribal Water Right pursuant to an off-Reservation new development, Change in Use, or Transfer must comply with State law, provided that, approval of an application for a change in water right by DNRC shall be conditioned on a valid Tribal approval for such use, Change in Use or Transfer. Due to this requirement of compliance with State law, the off-Reservation Change in Use or Transfer shall be exempt from the process set forth in Section A.6. of this Article IV. Any diversion of the Tribal Water Right located off

the Reservation for use on the Reservation shall not be considered an off-Reservation use for purposes of this provision.

(8) The Tribes or any Person using diversion or transportation facilities located off the Reservation in connection with a use of the Tribal Water Right shall apply for and obtain all permits, certificates, variances and other authorizations required by State laws regulating, conditioning or permitting the siting, construction, operation, alteration or use of any equipment, device, facility or associated facility proposed to use or transport water, prior to exercising a use of the Tribal Water Right off the Reservation.

6. **Administrative Procedure for Determination of Adverse Effect for Non-Exempt New Development, Change in Use, or Transfer, Within the Reservation.**

a. The procedures set forth in Sections A.6.b. through i. of this Article IV apply to determine whether the following actions will Adversely Affect a water right Arising Under State Law and must be followed before a Person may seek relief from the Compact Board:

(1) A Change in Use or Transfer of the Tribal Water Right; and

(2) A Non-Exempt New Development of the Tribal Water Right.

b. The proposal for a Non-Exempt New Development, Change in Use, or Transfer of a portion of the Tribal Water Right after the Effective Date of this Compact shall be made to TWRD.

c. TWRD shall review the proposal and make a determination of whether it will Adversely Affect a water right Arising Under State Law with a priority date before the date of the proposal for the Non-Exempt New Development, Change in Use, or Transfer.

(1) Upon request, DNRC shall provide to TWRD information on water rights Arising Under State Law as recorded in the DNRC database.

(2) For purposes of determining whether a Non-Exempt New Development of surface water Adversely Affects a water right Arising Under State Law, the existing use shall be deemed to be the use for which the water right is quantified explicitly in Article III of this Compact.

(3) If TWRD determines that the Non-Exempt New Development, Change in Use, or Transfer will Adversely Affect a water right Arising Under State Law with a priority date before the date of the proposal for the Non-Exempt New Development, Change in Use, or Transfer, TWRD shall deny the proposal, provided that, the Tribal water code may allow the applicant to modify the proposal to eliminate Adverse Affect.

(4) If TWRD determines that the Non-Exempt New Development, Change in Use, or Transfer will not Adversely Affect a water right Arising Under State Law with a priority date before the date of the proposal for the Non-Exempt New Development, Change in Use, or Transfer, TWRD shall forward the proposal with its determination to DNRC by certified mail with return receipt requested.

d. Upon receipt of notice from the TWRD, DNRC shall publish notice of the proposed Non-Exempt New Development, Change in Use, or Transfer, once in a newspaper of general circulation in the area of the source and shall serve notice by first-class mail on any holder of a water right Arising Under State Law who, according to the records of the DNRC, has a water right with a priority date before the date of the proposal that may be affected by the proposed Non-Exempt New Development, Change in Use, or Transfer. DNRC shall notify TWRD of the date of publication of notice.

e. A holder of a water right Arising Under State Law who objects to the proposed Non-Exempt New Development, Change in Use, or Transfer on the basis that it will Adversely Affect the exercise of their water right may notify DNRC, and must do so within thirty (30) days of the publication of notice.

f. DNRC shall review the proposal and the determination by TWRD of no Adverse Effect and any objections raised pursuant to Section A.6.e. of this Article IV. In its review, DNRC shall apply the same principles used in a determination of adverse effect or adverse affect pursuant to the Water Use Act, Title 85, Chapter 2, MCA, and Appendix 5. Any Non-Exempt New Development, Change in Use, or Transfer of the Tribal Water Right to a place of use and point of diversion within the Reservation that is within the minimum depletions set forth in Appendix 5 shall be presumed by DNRC to have no Adverse Effect. The TWRD may provide information that the Adverse Effect will be less than that predicted by application of Appendix 5 and DNRC may use the new information in its evaluation.

g. DNRC shall notify TWRD of the outcome of its review within thirty (30) days after the end of the time period for objection set forth in Section A.6.e. of this Article IV. If TWRD is not notified by DNRC within sixty (60) days of publication of notice by DNRC, TWRD may authorize the proposal pursuant to Tribal law.

h. DNRC and TWRD shall attempt to resolve objections or disagreement on TWRD's determination of no Adverse Effect on a cooperative basis. Measures to resolve objections may include agreement to release water from storage.

i. If resolution of an objection or disagreement is not achieved, DNRC or an objector may seek relief from the Compact Board established in Section D. of this Article IV.

7. **Reporting Requirements.**

a. Upon request by DNRC, on no more than an annual basis, the TWRD shall provide the MRCC, State and the United States with a listing of: all Non-Exempt New Development and Exempt New Development of the Tribal Water Right and any temporary emergency use or diversion of water on the Reservation.

b. The Tribes or the United States on behalf of the Tribes shall inventory the use of water rights for water developed before the Effective Date of the Compact set forth in Sections A.1.d., B.1.d. C.1.c., D.1.a., E.1.c., and G.2.a. of Article III, and shall report the inventory to DNRC within one year of the decree of the Tribal Water Right. Developments of Groundwater by means of a well or developed spring if the maximum flow of each well or developed spring is 35 gallons per minute or less and does not exceed a use of 10 Acre-feet per year are not required to be included in the inventory. This size limitation includes a Combined Development from the Same Source from two or more wells or developed springs.

B. **State Administration.**

1. **State Authority.**

a. Except as provided in Section C., D., and E., of this Article IV and Section B.3. of Article VII, the State shall administer and enforce all water rights Arising Under State Law to the use of surface water and Groundwater.

b. The State shall administer and enforce water rights set forth in Section E. of Article III on Tribal trust and fee land for use in the portion of the Missouri Basin 40EJ and Peoples Creek Basin 40I off the Reservation unless Congress acts to modify the Reservation boundary to include the Tribal trust and fee land. In administering the Tribal water rights on trust and fee land off the Reservation in Basins 40EJ and 40I, the State shall treat the Tribal rights as water rights Arising Under State Law except that non-use of all or any of the Tribal water rights off the Reservation in Basins 40EJ and 40I shall not constitute a relinquishment, forfeiture, or abandonment of such rights.

2. **Cooperative Management of a Controlled Groundwater Area.**

a. DNRC may designate or modify a controlled Groundwater area adjacent to the Reservation under the following circumstances:

(1) Pursuant to the requirements of § 85-2-506, MCA; or

(2) In cooperation with designation or modification by TWRD of a similar area on contiguous land within the Reservation; or

(3) Under order of the Compact Board as set forth in Section G.4.a.(2) of Article III.

b. The following procedures apply to designation or modification of a controlled Groundwater area pursuant to Section B.2.a. of this Article IV:

(1) Designation or modification of a controlled Groundwater area pursuant to Section B.2.a.(1) of this Article IV, or in the portion of an area off the Reservation pursuant to Section B.2.a.(2) of this Article IV, shall be governed by procedures set forth in § 85-2-506, MCA.

(2) Designation or modification of a portion of a controlled Groundwater area off the Reservation pursuant to Section B.2.a.(3) of this Article IV shall be with substitution of the following procedures for those set forth in §§ 85-2-506(3) and (4), MCA:

(a) DNRC shall hold a meeting to inform the public of the designation or modification of a controlled Groundwater area as ordered by the Compact Board.

(b) The DNRC shall publish notice of the time and place of the meeting to inform the public of the designation or modification of a controlled Groundwater area. The notice shall include the description by legal subdivision of all lands included in the area, and shall be published at least once in each week for 3 successive weeks not less than 30 days before the date of the meeting in a newspaper of general circulation in the county or counties in which the controlled Groundwater area is located.

c. Management within the portion of a controlled Groundwater area adjacent to the Reservation shall be as follows:

(1) Management within a controlled Groundwater area established pursuant to Section B.2.a.(1) of this Article IV shall be pursuant to §§ 85-2-501 to 520, MCA.

(2) Management within the portion of a controlled Groundwater area off the Reservation established pursuant to Sections B.2.a.(2) and (3) of this Article IV shall be pursuant to §§ 85-2-501 to 520, MCA, and in cooperation with the TWRD.

3. **New Development and Change in a Water Right Arising Under State Law.**

a. Any Person making a new development or change in a water right or portion of a water right Arising Under State Law, including a change in water right for the Milk River Project, must comply with State law, provided that, DNRC may not approve a change in water right for expansion of irrigation through use of salvaged water pursuant to § 85-2-402(2)(e), MCA, within the Milk River Basin under the following circumstances:

(1) the efficiency measures are funded in whole or in part by the State, United States, Tribes, or water users as part of the implementation of this Compact; or

(2) the salvaged water may be used to alleviate water shortage in the Milk River Basin. DNRC may promulgate rules to implement this provision.

b. Change in a water right Arising Under State Law upstream from any point on the Reservation, new development of water due to new storage approved by the Milk River Coordinating Committee, new development of water for municipal purposes upstream from any point on the Reservation, and new development of Groundwater that is not Hydrologically Connected to surface water within the Milk River Basin may not Adversely Affect a use of the Tribal Water Right developed before the date of the change. Determination of Adverse Effect for the purposes of this Section shall be pursuant to the procedures set forth in Section B.4. of this Article IV. The TWRD and DNRC may jointly agree to exempt certain changes in water rights from a showing of no Adverse Effect to the Tribal Water Right due to location, size, or other agreed upon parameter.

4. **Administrative Procedure for Preventing Adverse Effect Resulting from New Development or Change in a Water Right Arising Under State Law.** Except for changes exempt by agreement pursuant to Section B.3.b. of this Article IV and new development of stock impoundments or small wells exempt from the basin closure pursuant to Sections I.1.c. and d. of Article III, the following procedure for determining whether a new development or change in a water right Arising Under State Law within the Milk River Basin (including all tributary basins) upstream from the Reservation and below the Eastern Crossing, must be followed in addition to procedures set forth under state law, prior to a Person seeking relief from the Compact Board:

a. Application for a permit for new development or for a change in a water right Arising Under State Law shall be made to DNRC pursuant to State law.

b. DNRC shall review any application for a permit for new development or for a change in a water right and make a determination of whether it will Adversely Affect any use of the Tribal Water Right developed before the date of the application. In its review, DNRC shall apply the same principles used in a determination of adverse effect or adverse affect pursuant to the Water Use Act, Title 85, Chapter 2, MCA.

(1) Upon request, TWRD shall provide to DNRC information on uses of the Tribal Water Right.

(2) If DNRC determines that the new development or change will Adversely Affect a use of the Tribal Water Right developed before the date of the change, DNRC shall deny the application.

(3) If DNRC determines that the new development or change will not Adversely Affect a use of the Tribal Water Right developed before the date of the change, DNRC shall forward the application with its determination to TWRD by certified mail with return receipt requested.

c. Upon receipt of notice from DNRC, TWRD shall follow any requirements set forth in the Tribal Water Code for notification and objection of Persons authorized to use the Tribal Water Right. TWRD shall notify DNRC of the date of any notice to Persons authorized to use the Tribal Water Right.

d. TWRD may allow up to thirty (30) days after notification to Persons authorized to use the Tribal Water Right for objection by Persons authorized to use the Tribal Water Right. Any objection shall be made to TWRD.

e. TWRD shall review the application and the determination by DNRC of no Adverse Effect and any objections raised pursuant to Section B.4.d. of this Article IV.

f. TWRD shall notify DNRC of the outcome of its review within thirty (30) days of the end of the time period for objections set forth in Section B.4.d. of this Article IV. If DNRC is not notified by TWRD within sixty (60) days of notice by TWRD to Persons authorized to use the Tribal Water Right, DNRC may proceed with the application process.

g. DNRC and TWRD shall attempt to resolve objections or disagreement on DNRC's determination of no Adverse Effect on a cooperative basis.

h. If resolution of an objection or disagreement is not achieved, TWRD or an objector may seek relief from the Compact Board established in Section D. of this Article IV.

5. **Reporting Requirements.** Upon request by TWRD on no more than an annual basis, the DNRC shall provide the MRCC, Tribes, and the United States with a listing of all new development of water rights Arising Under State Law and any temporary emergency use or diversion of water, for the off-Reservation portion of the Milk River Basin upstream from any point of diversion or place of use of the Tribal Water Right.

6. **Peoples Creek Administration**

a. The DNRC shall develop a database covering water use upstream from the Reservation in Peoples Creek Basin 40I. The database shall include, at a minimum: identification of acreage irrigated on an annual basis; and any change in the use of a water right or storage facility.

b. If the Tribes or a Person authorized to use a portion of the Tribal Water Right within the Peoples Creek Basin 40I disputes a use or uses of water upstream from the Reservation in Basin 40I because the use or uses are in excess of a water right Arising Under State Law, or if the Tribes or Person authorized to use a portion of the Tribal Water Right believes that depletions in excess of water rights Arising Under State Law are occurring upstream from the Reservation but cannot identify the illegal use, the Tribes or Person shall contact the TWRD. The TWRD shall contact the DNRC concerning the dispute or excess depletion. If requested, the DNRC shall, within a reasonable time, investigate the disputed water use, or uses, or excess depletion and a representative of the TWRD may accompany DNRC on the investigation. If DNRC finds that the disputed water use or uses or excess depletion is in excess of a water right Arising Under State Law, DNRC may order any owner or operator of the diversion or storage facilities to curtail the use to within the water right. If any owner or operator does not comply with the order by DNRC or repeats the infraction, DNRC may: impose penalties pursuant to § 85-2-122, MCA; and may require any owner or operator of the appropriation facility to install and maintain suitable controlling and measuring devices to allow the DNRC to track compliance with the water right. Disputes unresolved by the process set forth in this Section may be brought before the Compact Board established pursuant to Section D. of this Article IV.

C. **Milk River Coordinating Committee.** A basin-wide coordinating committee is necessary to improve the coordination of storage operations and to provide for the coordination of releases of water from storage within or for the diversion to the Milk River Basin. A coordinating committee is also necessary to improve the management of diversions from the Milk River and to establish priorities for a grant and loan program to improve water supply conditions in the basin.

1. **Establishment of Milk River Coordinating Committee.** There is hereby established the Milk River Coordinating Committee ("MRCC.").

2. **Membership.**

a. The MRCC consists of the following nine (9) voting members and four advisory members. Six (6) voting members of the MRCC constitutes a quorum and decisions shall be by a majority of the membership of the MRCC present, except as provided in Sections C.3.a. and C.5.c. of this Article IV. On the addition of members pursuant to Section C.3.a. of this Article IV, the quorum shall increase by one (1) for every two (2) members added to the original nine (9).

(1) Two (2) representatives of the Tribes;

(2) Three (3) representatives of the Joint Board of Control of the Milk River irrigation districts;

(3) One (1) representative of DNRC;

(4) One (1) representative of the Bureau of Reclamation;

(5) One (1) representative of the Bureau of Indian Affairs;

(6) One (1) representative selected at large by the other 8 members;

(7) One (1) advisory, non-voting, member from the United States Geological Survey;

(8) One (1) advisory, non-voting, member from the United States Fish and Wildlife Service;

(9) One (1) advisory, non-voting, member from the United States Bureau of Land Management; and

(10) One (1) advisory, non-voting, member from the Montana Department of Fish, Wildlife, and Parks.

b. All members shall be appointed by their respective agencies within six (6) months of the Effective Date of this Compact and within thirty (30) days of the date any vacancy occurs. Should the eight appointed members fail to agree, by a majority of a quorum as provided in Section C.2. of this Article IV, on the selection of a ninth member within sixty (60) days of the date of appointment of the eighth member, or within thirty (30) days after a vacancy in the ninth position occurs, the following procedure shall be utilized:

(1) Within five (5) days thereafter, each member shall nominate one person to serve as a member of the MRCC;

(2) Within five (5) days thereafter, the eight nominees shall be submitted to the chief judge of the United States District Court for the District of Montana for selection of the ninth member of the MRCC. If the chief judge declines for any reason to select the ninth member, the chief justice of the Montana Supreme Court shall make the selection from the eight nominees.

c. Each member shall serve a five-year term and shall be eligible for reappointment. The initial terms of each voting member shall be staggered with three members serving a five-year term, three members a four-year term, and three members a three-year term. The initial term of each voting member shall be chosen by lot. The initial term of the advisory members shall be five years. A member seeking to resign prior to expiration of a term must provide written notice to the remaining MRCC members thirty (30) days prior to withdrawal.

d. The MRCC shall select a chair from the voting members within six (6) months of the initial selection of the ninth member and shall rotate the chairmanship on a yearly basis among the voting members.

e. The MRCC shall provide published notice of the time, place, and purpose of its meetings, or other proceedings, and shall hold such proceedings in a forum open to the public unless compelled to close certain portions of a proceeding to protect an individual right to privacy.

f. The MRCC shall adopt necessary rules, pursuant to the Montana Administrative Procedure Act §§ 2-4-101 et. seq. (MCA), to carry out its responsibilities within six (6) months of the initial selection of the ninth member. The MRCC may amend and repeal rules as necessary to carry out the purposes of this Article IV.

g. Costs and compensation for State, federal, and Tribal members of the MRCC shall be covered by their respective entities.

h. Subject to the availability of funds, the MRCC may compensate any MRCC member not compensated by the entity they represent for time and travel devoted to MRCC business. Compensation shall be based on the average hourly compensation of the other MRCC members.

3. **Authority and Duties of the MRCC.** Notwithstanding any other provision of State, Tribal, and, if this Compact is approved by Congress, federal law, the MRCC shall have the following authority and duties:

a. The initial authority of the MRCC is restricted to the mainstem of the Milk River downstream from the Eastern Crossing. The MRCC has the authority to expand the boundaries of its area by a unanimous vote of the MRCC, including the area within which it may levy a tax, to include tributaries to the Milk River or the portion of the Milk River Basin upstream from the Western Crossing. Such expansion shall require the agreement of Persons holding a majority of the water rights by amount on the source added pursuant to the following procedure:

(1) Any Person or Persons owning 10% or more of the water rights by rate or volume on any tributary to the Milk River within the United States or on the mainstem of the Milk River upstream from the Western Crossing may petition the MRCC for addition to the area covered by the MRCC and for representation on the MRCC.

(2) On receipt of a petition, the MRCC shall notify DNRC and provide a copy of the petition.

(3) Within 60 days of receipt of the petition, DNRC shall hold a hearing in or near the area proposed for addition. DNRC shall publish notice of the hearing once in a newspaper of general circulation in the proposed area and serve notice by first-class mail on any holder of a water right Arising Under State Law and any holder of an adjudicated federal or Indian water right who, according to the records of the DNRC, has a water right within the area proposed for addition with a priority date before the date of the petition.

(4) The MRCC shall preside over the hearing. If the MRCC determines, based on the facts presented at the hearing and other relevant facts and information as may be available, and in the interest of improving water supply or allocation, that there is a need for addition of the area, the MRCC will notify the DNRC.

(5) On receipt of notice for the addition of an area to the MRCC, the DNRC shall send a ballot by first-class mail, with a 30-day deadline for its return, providing for a vote on the proposed addition, to any holder of a water right Arising Under State Law and any holder of an adjudicated federal or Indian water right who, according to the records of the DNRC, has a water right with a priority date before the date of the petition.

(6) Following expiration of the 30 day deadline for receipt of ballots, the DNRC shall count the votes and notify the MRCC of the results.

(7) The area proposed for inclusion in the MRCC shall be added to the MRCC with a representative if a majority of those voting are in favor of the addition.

b. Members of the MRCC may seek technical support from their respective agencies to facilitate the activities of the MRCC. To this end, the Parties agree to seek any necessary authorization to provide technical support to the MRCC. In addition, the MRCC shall have the following authority:

(1) The MRCC may employ a secretary and such other officers, agents, and employees, permanent and temporary, as it may require and shall determine their qualifications, duties, and compensation.

(2) The MRCC shall provide for the execution of surety bonds for all employees and officers who are entrusted with funds or property; shall provide for the keeping of a full and accurate record of all proceedings and of all resolutions, regulations, and orders issued or adopted; and shall provide for an annual audit of the accounts of receipts and disbursements.

(3) The MRCC may call upon the county attorney of any county in which the MRCC has authority or the attorney general of the state for any legal services it may require, or it may employ their own counsel and legal staff.

c. The MRCC shall hold a meeting on an annual basis with, at a minimum, the Bureau of Reclamation, the Bureau of Indian Affairs, the Tribes, the Milk River Joint Board of Control, DNRC, and Hill County to coordinate reservoir storage.

d. The MRCC shall coordinate the establishment and yearly update of a common database and associated maps on actual water use of water diverted from the mainstem of the Milk River downstream from the Eastern Crossing between: DNRC; the Bureau of Reclamation; the Bureau of Indian Affairs; the irrigation districts within the Milk River Project; and the Tribes. At a minimum, each entity will maintain a database and share information on daily diversions, yearly number of acres irrigated, and yearly changes in use. The MRCC role is one of coordination. The BOR, BIA, TWRD and irrigation districts will continue to maintain the portion of the database covering their own water distribution. The DNRC will continue to maintain its database covering water rights and diversions from the water sources.

(1) The MRCC shall make the database and associated maps available to any water commissioner appointed by a court to enforce water rights in the Milk River Basin.

(2) The DNRC and TWRD shall offer assistance as may be appropriate to the MRCC to update, maintain, and provide training for use of the database.

e. The MRCC shall consult with the Bureau of Reclamation in the Bureau's development of operating criteria pursuant to Section C.11. of this Article IV, for coordination of storage and release of water from storage facilities within the portion of the Milk River Basin in the United States and contributing to the water supply of the Milk River Basin, provided that, except as explicitly provided for in this Compact or by Congress, allocations in the federal and future Tribal reservoirs within the Milk River Basin or contributing to the water supply of the Milk

River Basin shall remain unchanged and the right of the owner of a storage facility to exercise discretion in the daily operation and use of its facilities shall not be preempted.

f. Notwithstanding the rights to the use of water existing on the date of a determination by the BOR of excess water flow pursuant to Section C.11.f. of this Article IV, the MRCC may permit the owner of storage in the Milk River Basin to store water regardless of priority if capacity exists and the water would otherwise be lost to the Milk River Basin. Water stored pursuant to this provision may be used to satisfy water rights served by the entity storing the excess flow.

g. The MRCC shall review applications for new storage in the Milk River Basin below the Eastern Crossing.

(1) Any Person or Persons, including the Tribes, seeking to develop or enlarge storage in the United States' portion of the Milk River Basin below the Eastern Crossing, other than new or enlarged storage agreed to in the Compact or pursuant to the federal Act ratifying this Compact, must comply with each of the following criteria:

(a) Application describing the project shall be made to the MRCC; and

(b) The applicant must prove by a preponderance of the evidence that the project will result in a net increase in available water supply within the Milk River Basin below the Eastern Crossing.

(2) The MRCC shall issue a report on its findings and determination.

(3) If the MRCC determines that the application for new storage does not meet the criteria in Section C.3.g.(1)(b) of this Article IV, the determination is final, subject to the right of appeal under the following subsection (4).

(4) Appeal of decisions by the MRCC concerning new storage may be sought in a court of competent jurisdiction. Any appeal heard by a court of competent jurisdiction shall be a trial de novo.

(5) Any applicant that the MRCC determines meets the criteria in Section C.3.g.(1)(b) of this Article IV must further comply with all other applicable State, federal, and Tribal law. The determination of the MRCC or any final appeal is binding on the Tribes, the State, and the United States in consideration of any application for development of new storage.

h. The MRCC does not have the authority to coordinate storage or storage releases in a manner that is inconsistent with any applicable provisions of State, Tribal, and federal law, and the decrees of the Water Court. The responsibility for storage and storage releases in the Milk River Project facilities rests solely with the Bureau of Reclamation, its successors or assigns; provided that, if approved by Congress, the BOR shall participate in efforts at coordination as a member of the MRCC.

i. The MRCC shall have the authority to review applications for grants and loans from the Milk River Watershed Improvement Trusts and to determine prioritization for receipt of grants and loans pursuant to this Compact and § 85-20-1006, MCA, and C. 6., 7., 8., 9., and 10. of this Article IV. The DNRC shall offer assistance as may be appropriate to the MRCC for review of applications for grants and loans. The Milk River Watershed Improvement Trusts are permanent accounts established by this Compact and § 85-20-1005, MCA, to provide interest for grants for purchase of water for a Water Bank in times of significant short term water shortage, and for loans for long term improvements within the Milk River Basin.

4. **Legal Status of MRCC - Immunity.**

a. The MRCC may make and execute agreements necessary to perform its responsibilities as provided in this Compact.

b. The MRCC may apply for State and federal grants and loans available to governmental entities or watershed organizations.

c. The MRCC may sue and be sued to enforce agreements entered into pursuant to this Section C.4. of Article IV in the name of the MRCC. The MRCC, an MRCC member, or MRCC employee is immune from suit for any liability that might otherwise be incurred or imposed for an act or omission committed while engaging in MRCC activities pursuant to this Article IV, unless the act or omission constitutes criminal behavior, gross negligence, was committed in bad faith, or was committed with malicious purposes. Nothing in this provision is intended to waive immunity that is applicable to the United States or any federal employee, to the State or any State employee, or to the Tribes or any Tribal employee.

5. **MRCC Finance.**

a. The MRCC may request up to 15% per year of the interest on the Milk River Watershed Improvement Trusts to cover administrative costs, including but not limited to: the cost of review of applications for grants and loans; and the cost of compensation for MRCC members pursuant to Section C.2.h. of this Article IV.

b. The MRCC may apply for grants and loans from applicable State, Federal, and Tribal programs.

c. Subject to § 15-10-420, MCA, the MRCC may, on unanimous vote of all voting members, levy taxes on water use pursuant to a water right Arising Under State Law from the mainstem of the Milk River, including, water use under contract with the Bureau of Reclamation, to pay any obligation of the MRCC and to fulfill its duties established by this Compact.

(1) The assessment shall be limited to land irrigated by water from the Milk River, and other non-irrigation water use from the Milk River Project.

(2) The assessment in any one year may not exceed: 0.5% of the assessed value of irrigated land; 0.5% of the taxable portion of the assessed value of a household, and 0.5% of the taxable portion of the assessed value of industrial or commercial land where water is used, with such assessments as determined by the Montana Department of Revenue, without the consent of the majority of the water users subject to the assessment.

(3) Subject to § 15-10-420, MCA, the board of county commissioners of each county in which the MRCC imposes an assessment may, annually at the time of levying county taxes, levy an assessment on the applicable water use. The levy must be known as the "Milk River Coordinating Committee regular assessment." The assessment must be certified to the Department of Revenue and entered on the property tax record of each county.

(4) Any special assessment levied pursuant to this Section shall constitute a lien against the property upon which such assessment is levied from the date of such levy. This lien can only be extinguished by payment of such assessment with all penalties, costs, and interest.

d. The Parties agree to seek funding to cover a Tribal contribution to the MRCC. Any Tribal participation in contribution shall be equivalent to assessments associated with lands and uses off the Reservation.

e. On an annual basis, the MRCC shall make a report of its expenditures available to the public.

6. **Milk River Watershed Improvement Trusts.**

a. The Milk River Watershed Improvement Trusts established pursuant to this Compact and § 85-20-1005, MCA, are permanent trusts for the generation of interest on the Trusts' principal for the allocation of grants and loans to improve conditions of water supply, water quality, and habitat in the Milk River basin.

b. The MRCC shall review and rank in order of priority, pursuant to the criteria in Sections C. 6., 7., 8., 9., and 10. of this Article IV, applications for grants and loans from the Milk River Watershed Improvement Trusts. The MRCC may seek technical assistance from the Department of Natural Resources and Conservation, the TWRD, and the United States Bureau of Reclamation for review of applications for grants and loans.

c. Allocation of funds from the Milk River Watershed Improvement Trusts shall be managed by the Department of Natural Resources and Conservation. Disbursement of grants and loans from interest on the Milk River Watershed Improvement Trusts by DNRC must be pursuant to prioritization provided by the MRCC.

d. The DNRC shall adopt rules:

(1) prescribing the form and content of applications for grants and loans from the Milk River Watershed Improvement Trusts;

(2) providing for the servicing of loans, including arrangements for obtaining security interests and the establishment of reasonable fees or charges;

(3) providing for the confidentiality of financial statements submitted;

(4) prescribing the conditions for making grants and loans;

(5) establishing the interest rate for the loans; and

(6) determining the type and amount of security interest in real estate that will be accepted and any conditions to be made upon the security interest.

e. At the request of the MRCC, the DNRC may allocate up to 15% of the annual interest from the Milk River Watershed Improvement Trusts to cover capital and administrative costs of the MRCC.

7. **Milk River Watershed Improvement Trusts - Applications for Grants and Loans for Watershed Improvements.**

a. An application for a grant or loan from the Milk River Watershed Improvement Trusts established by this Compact and § 85-20-1005, MCA, must be in the form prescribed by the DNRC and contain or be accompanied by any information necessary to adequately describe the proposed project and provide for evaluation under Sections C.8., and 9., and 10. of this Article IV.

b. Application for a grant or loan from the Milk River Watershed Improvement Trusts may be made by Persons, including but not limited to:

(1) individuals holding water rights Arising Under State Law;
(2) tribes;
(3) persons authorized to use water by a tribe;
(4) municipalities;
(5) irrigation districts; and
(6) conservation districts.

8. **Milk River Watershed Improvement Trusts - Establishment of Water Bank.** The purpose of this Section is to establish a water bank for implementation in years of significant short term water shortage. The bank is not intended to alleviate normal water shortage within the Milk River Basin.

a. By March 1 of each year and on a monthly basis through October 31, the BOR shall notify the MRCC, DNRC, the Tribes, the U.S. and the Milk River irrigation districts, if it expects, based on current information, water deliveries to be restricted during the current irrigation season due to a critical water shortage. Water shortage may be caused by factors which include, but are not limited to:

(1) low precipitation;
(2) requirements for fish and wildlife species of special concern; or
(3) temporary delivery system outage caused by an unexpected failure or a natural disaster.

b. Following notice by the BOR of expected restrictions in water delivery, the MRCC shall publish notice in newspapers of general circulation within the Milk River Basin of the availability of grants to purchase water for the purpose of alleviating shortage.

c. The MRCC may offer the grants at a fixed price per Acre-foot or may seek bids. For any applicant banking water received from the Milk River Project, the grant must be sufficient to cover payments to the Project, including any assessments or fees paid to an irrigation district.

d. The MRCC may allocate banked water to storage, or may market or allocate banked water to alleviate shortage. Any fees obtained by the MRCC through marketing of banked water must be returned to the Trust as part of the expendable interest. Banked water may be marketed or allocated: on a pro rata basis; to alleviate critical shortages; to meet critical environmental or water quality needs; for irrigation needs; or may be allocated to storage.

e. Grants obtained for the temporary retirement of Milk River Project water must first be used by the applicant to cover payments to the Milk River Project, including any assessments or fees paid to an irrigation district.

f. Nothing within this Section C.8. of Article IV is intended to preclude a more comprehensive water marketing system within the Milk River Basin.

9. **Milk River Watershed Improvement Trusts - Eligibility for Grants for Water Banking or Water Transfers.**

a. The Milk River Coordinating Committee shall apply the following criteria in ranking applications for grants:

(1) the need for temporary retirement of irrigation or conversion to low water-use crops for the purpose of banking water to alleviate a critical shortage of water in a particular year;

(2) the extent to which the proposed water banking will alleviate significant short term water shortage in the Milk River Basin as set forth in Section C.8. of this Article IV;

(3) the proposed retirement of irrigation involves lands irrigated the year prior to the declaration of a critical water shortage in the Milk River Basin and involves a valid water right;

(4) the feasibility and practicality of the proposed irrigation retirement or conversion;

(5) the number of related resources that will benefit, including but not limited to: water quality, fisheries habitat, wildlife habitat, and recreation;

(6) preference for an applicant in an area identified by the MRCC as beneficial for temporary irrigation retirement, or if no specific area has been identified for preference, the MRCC shall attempt to rank applicants in a manner that distributes temporary irrigation retirement equally among the counties in the Milk River Basin; and

(7) any additional factor that, in the judgment of the MRCC, is important to the evaluation of land retirement in light of the purposes of the Milk River Watershed Improvement Trusts.

b. The MRCC shall not recommend grants for acreage in excess of that necessary to save sufficient water to alleviate the temporary water shortage. The MRCC shall not recommend grants in excess of the interest available from the Milk River Watershed Improvement Trusts.

c. The DNRC may award a grant to an applicant ranked by the MRCC for the purpose of water banking only if the DNRC finds, based on the application, the investigation and evaluation of the proposal by members of the MRCC, and the technical review by DNRC, TWRD, and BOR, that the primary purpose of the application is:

(1) the temporary retirement of the right to irrigate land irrigated in the year prior to the declaration of a critical water shortage in the Milk River Basin; or

(2) the irrigation proposed for temporary retirement or crop conversion is subject to a valid water right pursuant to State, federal, or Tribal law, and the applicant has the legal right to transfer the water.

(3) the criteria set forth in Sections C.9.a. and b. of this Article IV have been met.

10. **Milk River Watershed Improvement Trusts - Eligibility for a Loan.**

a. The Milk River Coordinating Committee shall apply the following criteria in ranking applications for loans:

(1) the extent to which the project will alleviate water shortage in the Milk River Basin;

(2) the engineering feasibility and practicality of the project;

(3) the number of related benefits, including but not limited to improvements in: water quality; fish habitat; wildlife habitat; conservation; recreation; water use efficiency; water management; and water right measurement;

(4) any additional factor that, in the judgment of the MRCC, is relevant to the purposes of the Milk River Watershed Improvement Trusts, including reducing the ranking due to the fact that the application is for a project in a portion of the Milk River Basin that is not a part of the Milk River Coordinating Committee regular assessment.

b. The DNRC may award a loan to an applicant ranked by the MRCC, if the DNRC finds, based on the application, the investigation and evaluation of the proposal by members of the MRCC, and the technical review by DNRC, TWRD, and BOR, that:

(1) the criteria in Section C.10.a. of this Article IV have been met;

(2) the proposal will be economically feasible;

(3) the proposal will comply with statutory and regulatory standards protecting the quality of resources such as air, water, land, fish, wildlife, and recreational opportunities;

(4) the applicant has adequate financial resources to construct, operate, develop, and maintain the project; and

(5) the applicant is credit-worthy and is able and willing to enter into a contract with the DNRC for loan repayment and for construction, operation, development, and maintenance of the proposed project.

11. **Coordination of Storage and Release Within the Portion of the Milk River Basin in the United States and New Storage.** Subject to the applicable provisions of State, Tribal, and federal law, the MRCC shall, within five (5) years of the Effective Date of the Compact, consult with the Bureau of Reclamation on development of operating criteria for coordination of storage and release of water from storage facilities within the portion of the Milk River Basin in the United States. Except as explicitly provided for in this Compact or by Congress, allocations in the federal and future Tribal reservoirs within the Milk River Basin or contributing to the water supply of the Milk River Basin, shall be unchanged. The

operating criteria may be modified as necessary and such modification shall not be considered a modification of the Compact.

a. At a minimum, the operating criteria shall include coordination of storage among: Sherburne, Fresno, and Nelson Reservoirs and Hill County Reservoir near Havre, any new storage on the Reservation filled by diversion from the Milk River or Peoples Creek, and any new storage developed pursuant to Section C.3.g. of Article IV.

b. The Bureau of Reclamation shall take comment on development of the operating criteria from, at a minimum, any entity or individual owning, benefiting from, or operating storage within the Milk River Project, or operating storage within the Milk River Basin below the Eastern Crossing. The process for such comment may be pursuant to existing federal and State law.

c. In developing the operating criteria, the Bureau of Reclamation shall make all reasonable efforts to maximize the amount of water stored through coordination of storage and release within the Milk River Basin as a whole without regard to the priority date of water rights associated with a particular storage facility. The purpose of coordination shall be to provide the maximum use of storage possible for the Milk River Basin, including providing flexibility on a temporary basis.

d. The coordination of storage and release to maximize the amount of water stored shall not modify the storage right of any Person in any storage facility or alter the obligations of any Person to pay construction, operation, maintenance and replacement costs for a facility, or alter the right and discretion of the owner of a storage facility to use or release water to satisfy water rights under its jurisdiction.

e. The operating criteria shall include, at a minimum: a method for accounting for water stored in various storage facilities in the Milk River Basin; a method for coordination of fill and release from storage facilities in the Milk River Basin on a yearly basis; and a method for notification of Persons with the right to divert water from the mainstem of the Milk River below the Eastern Crossing of the predictions for water availability on a yearly basis.

f. As part of the process to develop operating criteria, the BOR will establish criteria for determining the existence of a critical shortage or excess water flows.

g. The Bureau of Reclamation in consultation with the MRCC shall modify the operating criteria as necessary to address changes in the Milk River Basin including the addition, modification, or reduction of storage. The operating criteria is required by, but is not in substance, a part of or enforceable under the Compact. Its modification is not a modification of the Compact.

D. **Compact Enforcement: Fort Belknap - Montana Compact Board**

1. **Establishment of Board.** There is hereby established the Fort Belknap - Montana Compact Board.

2. **Membership.**

a. The Board consists of three members: a member selected by the Governor of the State of Montana from up to four nominees, one nominated by the Commissioners of each of the following counties: Hill, Blaine, Phillips, and Valley; a Tribal member selected by the Fort Belknap Community Council Tribal Chair; and one member selected by the other two members.

b. All members shall be appointed within six (6) months of the Effective Date of this Compact and within thirty (30) days of the date any vacancy occurs. If an appointment is not timely made by the Governor, the Director of DNRC or his/her designee shall fill the State's position. If an appointment is not timely made by the Tribes, the Director of the TWRD or his/her designee shall fill the Tribes' position.

c. Should the two appointed members fail to agree on the selection of a third member within sixty (60) days of the date of appointment of the second member, or within thirty (30) days after a vacancy in the third position occurs, the following procedure shall be utilized:

(1) Within five (5) days thereafter, each member shall nominate two persons to serve as a member of the Board;

(2) Within fifteen (15) days thereafter, each member shall reject one of the persons nominated by the other member;

(3) Within five (5) days thereafter, the remaining two nominees shall be submitted to the chief judge of the United States District Court for the District of Montana for selection of the

third member of the Board. If the chief judge declines for any reason to select the third member, the chief justice of the Montana Supreme Court shall make the selection from the remaining two nominees.

d. Each member shall serve a five-year term and shall be eligible for reappointment. The initial term of each member shall be staggered with one member serving a five-year term, one a four-year term, and one a three-year term. The initial term of each member shall be chosen by lot. A member seeking to resign prior to expiration of a term must provide written notice to the remaining Board members thirty (30) days prior to withdrawal.

e. The Board shall provide reasonable notice of the time, place, and purpose of any meeting, hearing, or other proceeding to each of its members. Two members of the Board shall constitute a quorum.

f. The Board shall adopt necessary rules and regulations to carry out its responsibilities within six (6) months after its first meeting.

3. **Jurisdiction of the Board.** The Fort Belknap-Montana Compact Board shall have the jurisdiction to resolve controversies over the right to the use of water between Persons authorized to use any portion of the Tribal Water Right and Persons holding any water rights Arising Under State Law. Controversies under the jurisdiction of the Compact Board may include disputes concerning the meaning of this Compact. The jurisdiction of the Compact Board does not extend to controversies within the scope of the order appointing a water commissioner or commissioners to distribute water from the mainstem of the Milk River pursuant to Section B.3. of Article VII. Such controversies shall be resolved by the court appointing the water commissioner or commissioners.

4. **Administrative Remedy Prior to Board Action.**

a. **Change in Use, Transfer, or Non-Exempt New Development of the Tribal Water Right:** Any Person with a water right Arising Under State Law objecting to a Change in Use, Transfer, or Non-Exempt New Development of the Tribal Water Right, shall comply with the administrative procedures set forth in Section A.6. of this Article IV for review of applications for Change in Use, Transfer, or Non-Exempt New Development prior to seeking relief from the Compact Board.

b. **Change in water rights Arising Under State Law:** The Tribes or any Person authorized to use a portion of the Tribal Water Right objecting to a change in water right, or new development of a water right Arising Under State Law, shall comply with the administrative procedures set forth in Section B.3. of this Article IV for review of applications for change in appropriative right, prior to seeking relief from the Compact Board.

5. **Funding of the Board.** Expenses of the members of the Board appointed by the State and the Tribe shall be the responsibility of the entity appointing the member, subject to the availability of funds. The expenses of the third member and all other expenses, including the cost of notice, shall be shared equally by the Tribe and the State, subject to the availability of funds.

6. **Hearings Before the Board.**

a. In proceedings before it, the Board shall issue notice and hold hearings. The Board may seek the assistance of DNRC and TWRD in issuing notice.

b. In proceedings before it, the Board shall have the power to administer oaths, take evidence, and issue subpoenas to compel attendance of witnesses or production of documents or other evidence. The Board may apply to a state or federal district court, or Tribal court to compel compliance with subpoenas or the giving of testimony. The Tribes and the State shall enforce the subpoenas in the same manner as prescribed by the laws of the Tribes and the State for enforcing a subpoena issued by the courts of each respective sovereign in a civil action.

c. The Board may appoint technical experts.

d. The parties to the controversy may present evidence and cross examine any witnesses.

e. The Board shall determine the controversy and order any appropriate relief, including the installation of measuring devices and temporary relief, provided that, the Board shall have no power to award money damages or attorneys fees. The Board may assess costs, provided that, the Board may not assess costs against the Tribes or the State, or against the United States.

f. All Board decisions shall be by a majority of the Board, shall be in writing, and, together with any dissenting opinions, shall be served on all parties in the proceeding before the Board and on the Parties to this Compact.

g. All records of the Board shall be open to public inspection, except as otherwise ordered by the Board to protect matters of individual privacy.

h. **Waiver of Immunity.** The Tribes and the State waive their respective immunities from suit, including for the appeal or judicial enforcement of Board decisions, to permit the resolution of disputes by the Fort Belknap - Montana Compact Board. Such waiver of immunity by the Tribes or the State shall not extend to any action for money damages, costs, or attorneys' fees.

i. **Review and Enforcement of Board Decisions.**

(1) Decisions by the Board are effective immediately, unless stayed by the Board. Unless otherwise provided by Congress, only parties to the proceedings before the Board or the United States may appeal any final decision by the Board to a court of competent jurisdiction within thirty (30) days of service of such decision. The hearing on appeal by any party except the United States (unless otherwise provided by Congress) shall be on the record. The United States may seek a trial de novo on appeal. The notice of appeal shall be filed with the Board and served personally or by registered mail on all parties to the proceeding before the Board.

(2) Unless appeal is filed within thirty (30) days of a final decision of the Board, the decision shall be recognized and enforced by any court of competent jurisdiction on petition of: the Board; any party before the Board in the proceeding in which the decision was made; the State; the Tribes, or the United States.

(3) A court of competent jurisdiction in which a timely appeal is filed or in which a petition to confirm or enforce a decision by the Board is filed, may order such temporary or permanent relief as it determines to be appropriate.

(4) Any appeal may be taken from a decision of the court in which an appeal from a Board decision is filed or in which a petition to confirm or enforce a decision of the Board is filed, in the manner and to the same extent as from orders of judgments of the court in a civil action.

(5) In any appeal from a Board decision or petition to confirm or enforce a Board decision, the Board shall file with the court the record of the proceedings before the Board within sixty (60) days of the filing of the appeal or petition.

E. **Administration of the Milk River to Satisfy the Tribal Water Right.**

1. **Operation of the Milk River to Satisfy the Tribal Water Right.**

a. Delivery of water on the mainstem of the Milk River shall include measures necessary to assure satisfaction of the Tribal Water Right.

b. To satisfy the Tribal Water Right, including to replace water depleted on tributaries to the Milk River excluding Peoples Creek, and water depleted on the mainstem of the Milk River upstream from the Western Crossing through exercise of water rights Arising Under State Law, the Milk River Project storage facilities shall be operated to release or bypass the water necessary to assure satisfaction of the water right set forth in Section A.1.a. of Article III, subject to the following conditions:

(1) The Tribes shall notify the Bureau of Reclamation or its successor as operator of the Milk River Project and any water commissioner appointed following petition by the Parties pursuant to Section B.3. of Article VII, or any other person or entity, when the Tribes seek release or bypass of water to satisfy the water right set forth in Section A.1.a. of Article III. The obligation of the Bureau of Reclamation ends with the release or bypass. Enforcement necessary to deliver the water to the Reservation shall be pursuant to this Compact.

(2) The amount of water released or bypassed to satisfy the water right set forth in Section A.1.a. of Article III shall not exceed the lesser of:

i. 645 Cfs; or

ii. the Calculated Undepleted Flow of the Milk River calculated pursuant to Section E.2. of this Article IV, modified to reflect any agreement or adjudication between the Blackfeet Tribe and the Fort Belknap Indian Community of the Fort Belknap Reservation on allocation of water from the Milk River to the Blackfeet Tribe, to the extent such agreement or adjudication affects the Calculated Undepleted Flow of the Milk River; or

iii. the amount and flow rate of water the Tribes can actually divert for use, storage, or diversion under an agreement for Transfer at the time of their notice to the Bureau of Reclamation and any water commissioner.

(3) In assuring satisfaction of the Tribal Water Right, the operators of the Milk River Project storage facilities shall use their best efforts to operate those facilities consistent with the criteria developed pursuant to Section C.11. of this Article IV. Provided, however, that any effort to maximize the amount of storage within the Milk River Basin or to comply with the operating criteria developed pursuant to Section C.11. of this Article IV shall not diminish or alter the obligations contained in Sections E.1.a. and b. of this Article IV to assure satisfaction of the Tribal Water Right.

2. **Calculated Undepleted Flow of the Milk River.**

a. The determination of the Calculated Undepleted Flow of the Milk River at the point where the Milk River intersects the diversion point on the Reservation shall be done by the United States Bureau of Reclamation, in consultation with DNRC and TWRD, with review by the U.S.G.S. pursuant to the formula set forth in Appendix 4.

b. The amount of the United States' Share of the Natural Flow of the Milk River available for the Tribes shall be modified as necessary to reflect any agreement between the Blackfeet Tribe and the Fort Belknap Indian Community of the Fort Belknap Reservation on allocation of water from the Milk River, or adjudication of the Blackfeet Tribe's reserved water rights.

c. The Calculated Undepleted Flow of the Milk River may be modified pursuant to Appendix 4. and such modification shall not be considered a modification of the Compact.

ARTICLE V - DISCLAIMERS AND RESERVATION OF RIGHTS

A. **No Effect on Other Tribal Rights or Federal Reserved Water Rights.**

1. Except as provided in Sections A.2.a. of Article III, the relationship between the Tribal Water Rights of the Gros Ventre and Assiniboine Tribes which compose the Fort Belknap Indian Community, Tribal members, and Allottees on the Fort Belknap Reservation described in this Compact and any rights to water of any other Indian tribe, tribal member, or Indian owner of trust lands claiming water under federal or tribal law, or of the United States on behalf of such tribe, tribal member, or Indian owner of trust lands, shall be determined by the rule of priority unless otherwise agreed to by such tribe, tribal member, or Indian owner of trust lands, or the United States on behalf of such tribe, tribal member, or Indian owner of trust lands.

2. Nothing in this Compact may be construed or interpreted as a precedent to establish the nature, extent, or manner of administration of the rights to water of any other Indian tribes, tribal members, or Indian owner of trust land of other Indian tribes outside of the Fort Belknap Reservation.

3. Except as provided in Sections C., D., and E. of Article IV and Section B.3. of Article VII pertaining to administration in the Milk River Basin, nothing in this Compact is otherwise intended to affect a right or claim of an Indian Tribe other than the Gros Ventre and Assiniboine Tribes which compose the Fort Belknap Indian Community of the Fort Belknap Reservation.

4. Except as provided in Sections C., D. and E, of Article IV and Section B.3. of Article VII pertaining to administration in the Milk River Basin, nothing in this Compact may be construed or interpreted in any manner to establish the nature, extent, or manner of administration of the rights to water of the United States on federal lands outside the Fort Belknap Reservation.

B. **General Disclaimers.** Nothing in this Compact may be construed or interpreted:

1. As a precedent for the litigation of reserved water rights;

2. As a precedent for the interpretation or administration of future compacts between the United States and the State, or the United States and any other state;

3. Except as provided in Section I. of Article III closing certain basins to new appropriations under State law, to preclude the acquisition or exercise of a right Arising Under State Law to the use of water by any Allottee or member of the Tribes outside the Reservation by purchase of such right or by application to the State in accordance with state law;

4. To determine the relative rights inter sese of Persons using water under the authority of the State or the Tribes;

5. To limit in any way the rights of the Parties or any other Person to litigate any issues or questions not resolved by this Compact;

6. To authorize the taking of a water right which is vested under State or federal law;

7. To create or deny substantive rights through headings or captions used in this Compact;

8. To prejudge how, in any interstate apportionment, the Tribal Water Right shall be counted;

9. To constitute a waiver of sovereign immunity by the Tribes or State except as is expressly set forth in this Compact;

10. To constitute a waiver of sovereign immunity by the United States except as expressly set forth in 43 U.S.C. § 666 (1952);

11. To prohibit the Tribes, Tribal members, or Allottees, or the United States on behalf of the Tribes, Tribal members, or Allottees except as agreed to in Appendix 3, or the United States in any other capacity from objecting in any general stream adjudication in Montana Water Court to any claims to water rights;

12. Except as provided by Congress, to prevent the Tribes, or the United States on behalf of the Tribes, from filing an action in a court of competent jurisdiction to prevent any Person or Party from interfering with the Tribes in the enjoyment of the Tribal Water Right;

13. To affect or determine the applicability of any state or federal law, including, without limitation, environmental and public safety laws, on activities of the Tribe, Tribal members, or Allottees, or the State or state water right holders, or the United States or the United States Bureau of Reclamation;

14. To modify any portion of Article VI of the "Treaty Between the United States and Great Britain Relating to Boundary Waters, and Questions Arising Between the United States and Canada," January 11 1909, and ratified by the Senate on May 13, 1910, 36 Stat. 2455, and the Order of the International Joint Commission on October 4, 1921 pertaining to "In the matter of the Measurement and Apportionment of the Waters of the St. Mary and Milk Rivers and their Tributaries in the State of Montana and the Provinces of Alberta and Saskatchewan;"

15. To prevent the Tribes from participating in any project to import water to, or improve storage in the Milk River Basin; or

16. To modify or prevent modification of the Memorandum of Agreement between the Bureau of Reclamation and the Office of Indian Affairs Milk River Project Montana, I-1-Ind. 18725, July 8, 1946.

17. To prevent the water court from adjudicating claims to water rights Arising Under State Law on fee land within the Reservation.

18. Except as expressly provided herein, to modify the obligation of any agency of the United States pursuant to federal law.

19. To limit the ability of the State, the Tribes, or the United States to enforce any state, tribal, or federal laws or any common law rights relating to the protection of the environment.

20. To limit any existing, present, or future claims of the Tribes or the United States on behalf of the Tribes concerning water quality.

C. **Obligations of the United States Contingent.**

1. Notwithstanding any other language in this Compact, except as authorized under other provisions of federal law, the obligations of the United States under this Compact shall be contingent on ratification and necessary authorization by Congress.

2. The expenditure or advance of any money or the performance of any work by the United States or the Tribes pursuant to this Compact which may require appropriation of money by Congress or allotment of funds is contingent on such appropriation or allotment being made.

3. The State and the Tribes recognize that this Compact has not been approved by the United States or any agency thereof and ratification by the Montana legislature or ratification by the Tribal Council in no manner binds or restricts the discretion of the United States in the negotiation of all related matters.

D. **Obligations of the State Contingent.** The expenditure or advance of any money or the performance of any work by the State pursuant to this Compact which may require appropriation of money by the Montana Legislature or allotment of funds shall be contingent on such appropriation or allotment being made.

ARTICLE VI - CONTRIBUTIONS TO SETTLEMENT

A. **St. Mary Diversion Facilities.** The Parties agree that the delivery of water through the facilities of the Milk River Project at least at its existing or design capacities, and especially the St. Mary Diversion Facilities for diversion of water to the Milk River and use downstream from the Eastern Crossing, is essential to the permanent success of the Compact and the finality of the reserved water rights settlement and to the continued irrigation of lands in the Milk River Project. The Parties further understand and agree that the facilities of the Milk River Project, especially the St. Mary Diversion Facilities, are old and are in need of repair, rehabilitation, and to the extent feasible, restoration to their original design capacities. In recognition of the essential nature of the Milk River Project facilities, especially the St. Mary Diversion Facilities, the Parties agree to work with the United States, the Blackfeet Tribe, and the Milk River Project water users to obtain the necessary authorization and funding for the repair, rehabilitation, and restoration of the St. Mary Diversion facilities. The Parties agree that this Compact and its federal legislation may or may not be the appropriate means to fund this project. The Parties further agree that any discussion of the repair, rehabilitation, and restoration of the St. Mary Diversion facilities as part of the negotiation of the federal legislation ratifying this Compact shall be preceded by an invitation to the Blackfeet Tribe to participate as a party in such discussions.

B. **Mitigation of Impacts on the Milk River Project.**

1. The Parties agree that, as a result of development and use of the Tribal Water Right and protection of water use on tributaries, the Milk River Project and its water users will, at times, be adversely affected if no change is made to the Milk River System. The Parties agree that hydrologic and engineering analyses have identified the impacts and have demonstrated that such impacts can be mitigated through a number of alternatives. The Parties agree that such alternatives, together with such other alternatives as may be identified by the Parties or any other person or entity and by the Bureau of Reclamation, are currently included or will be included in the Bureau of Reclamation's Milk River Basin Regional Feasibility Study, authorized by Congress in Public Law 106-163, and will receive appropriate environmental analyses in that Study. The Parties further agree that funding for water efficiency improvements (Watershed Improvements) and water banking will be included in the total funding for the Compact. In addition to funding for voluntary efficiency improvements and for water banking, mitigation measures authorized and funded as a part of the Compact must mitigate at least to the level of 35,000 Acre-feet Per Year, or a larger amount on agreement by the Parties if information or improved modeling available at the time of completion of the Milk River Basin Regional Feasibility Study indicates that more is necessary for mitigation based on full development of the Tribal Water Right on the Milk River and tributary protection as contemplated in Section A.1. of Article III. The Parties agree to seek establishment of a fund and a schedule for incremental development of mitigation measures to assure that such measures are in place when needed to prevent impact from development of the Tribal Water Right. Mitigation measures identified by the Parties to be studied in the Feasibility Study include the following:

a. Pumped storage from the Milk River to Nelson Reservoir;

b. Enlargement of the storage capacity of Nelson Reservoir through the construction of a secondary dam or dike dividing the Reservoir into two separate controllable storage facilities;

c. Rehabilitation and restoration of the St. Mary Diversion Facilities;

d. Enlargement of Fresno Dam and Reservoir to restore storage capacity lost by siltation and obtain additional storage capacity;

e. Construction of a dam and reservoir on lower Peoples Creek on the Reservation and on other tributaries to the Milk River, including Thirtymile Creek;

f. Construction of new facilities to import water to the Milk River Basin, including but not limited to: the Virgelle diversion, direct importation from Lake Elwell; and importation from the Missouri River or Fort Peck Reservoir to Vandalia via Duck Creek;

g. Construction of facilities to improve the water quality of the Fish and Wildlife Service's Bowdoin National Wildlife Refuge and to allow the use of Bowdoin as a storage facility for mitigation of impacts of the Compact;

h. Such other mitigation alternatives which the Parties may identify to be included in the Bureau of Reclamation's Milk River Basin Regional Feasibility Study, or additional studies agreed to by the Parties.

2. On completion of the Milk River Basin Regional Feasibility Study, the Bureau of Reclamation, in consultation with the irrigation districts and the Parties, shall select the appropriate mitigation measures.

C. **Upper Peoples Creek Dam and Reservoir.** The Parties agree that, as a result of the protections provided to the Upper Peoples Creek water users in the Compact and the variable natural water supply in the Peoples Creek Basin, the water supply available for development of the Tribal Water Right in Peoples Creek may be limited. The Parties agree that such impacts can and shall be mitigated, in whole or in part, through the construction of a dam and reservoir for the benefit of the Tribes in the upper Peoples Creek Basin, if a dam and reservoir is determined to be feasible from an engineering, geologic, and environmental analysis. Accordingly, the Parties agree to seek authorization of appropriations, appropriations, and a schedule for development of a dam and reservoir on Peoples Creek for the benefit of the Tribes.

D. **State Contribution to Settlement.** The Parties agree that the State contribution to settlement shall be negotiated by the State, the Tribes, and the United States as part of the negotiations on the Federal legislation. The agreement to, expenditure, or advance of any State contribution which may require authorization and appropriation of money by the Montana Legislature or allotment of funds is contingent on such appropriation or allotment being made. Any local contribution to cost share shall be allocated to all Persons that benefit from the protections provided by the Compact.

E. **Federal Contribution to Settlement.** The Parties agree that the federal contribution to settlement shall be negotiated by the State, the Tribes, and the United States as part of the negotiations on the Federal legislation.

F. **State Lands on the Reservation.** The Parties agree to work together in the future to obtain the authorization necessary to exchange State lands on the Reservation for federal lands off the Reservation, and that any State lands acquired by the United States in an exchange shall be held in trust for the Tribes.

G. **Project Lands.** The Parties agree to work together to facilitate land classification and reclassification in the Milk River Project.

ARTICLE VII - FINALITY

A. **Ratification and Effectiveness of Compact.**

1. This Compact becomes Effective on the latest of the dates it is ratified by the Tribes, the State and by Congress. Following the first ratification by any party, the terms of this Compact may not be modified without the consent of the Parties. In the event of permanent or long term loss of the continued operation of the St. Mary Diversion facilities for diversion of water to the Milk River and use downstream from the Eastern Crossing, either due to loss, or to reallocation of water on agreement by the Parties, the Parties agree to enter negotiations on alternative remedies to supply water to portions of the Reservation served from the Milk River and to water rights Arising Under State Law within the Milk River Project. Minor loss or reallocation of water from the St. Mary Diversion facilities shall not be considered a permanent or long term loss. Until satisfactory completion of the above referenced negotiation or litigation and construction of water supply facilities to remedy the long term loss of the continued operation of the St. Mary Diversion facilities, the Tribes' diversion right from the Milk River shall be the amount developed for diversion at the time of the failure. All other provisions of the Compact shall remain in place. Should the Parties fail to reach agreement on alternative remedies within five (5) years of the permanent or long term loss of the continued operation of the St. Mary Diversion facilities, the Parties may seek a remedy in court for opening of the decree and adjudication of the portion of the Tribal Water Right in the Milk River Basin 40J. In opening the decree, there shall be no question of the validity of the Tribes' right to water currently developed.

2. Notwithstanding any other provision in this Compact, the Tribes reserve the right to withdraw as a party if:

a. Congress has not ratified this Compact and authorized appropriations within five (5) years from the date the Compact is ratified by the State;

b. The Tribes and United States do not reach agreement on the federal contribution to settlement; or

c. Appropriations are not made in the manner contemplated by the federal legislation ratifying this Compact.

d. The Parties do not reach agreement on the State contribution to settlement.

e. The State has not authorized appropriations within three (3) years from the date the Compact is ratified by the United States.

f. Appropriations are not made by the State in the manner contemplated by any agreement for contributions to settlement made pursuant to Section D. of Article VI of this Compact.

3. The Tribes may exercise their right to withdraw from the Compact under Section A.2. of Article VII of the Compact by sending to the Governor of Montana and to the Secretary of the Interior by certified mail a resolution of the Fort Belknap Community Council stating the Tribes' intent to withdraw and specifying a withdrawal date not sooner than thirty (30) days from the date of the resolution. On the date designated in the resolution for Tribal withdrawal, this Compact shall become null and void without further action by any party.

4. Improvements to the Milk River Project to mitigate the impact of potential development of the Tribal Water Right and of tributary protection is essential to the agreement of the State to this Compact. Thus, notwithstanding any other provision in this Compact, the State reserves the right to withdraw as a party if:

a. The Tribes and Congress have not ratified this Compact within five (5) years from the date the Compact is ratified by the State;

b. Congress requires a State contribution to settlement that exceeds the contribution authorized by the Montana Legislature or the contribution agreed to by the Parties if Congressional authorization precedes authorization by the Montana Legislature without the agreement of the State; or

c. Congress does not authorize and appropriate the federal share of funding for the modifications to the Milk River Project or other alternatives necessary to mitigate the impact of development of the Tribal Water Right as outlined generally in Section B. of Article VI, as enacted in the federal legislation ratifying this Compact and such modifications or other alternatives are not constructed

5. The State may exercise its right to withdraw from the Compact under Section A.4. of this Article VII of the Compact by sending to the Fort Belknap Tribal Chair and to the Secretary of the Interior by certified mail a letter from the Governor of Montana stating the intent of the State to withdraw and specifying a withdrawal date not sooner than thirty (30) days from the date of the letter. In considering exercise of the right to withdraw, the Governor shall consult with Persons affected by this Compact including the Milk River Joint Board of Control. On the date designated in the letter for State withdrawal, this Compact shall become null and void without further action by any party.

B. **Incorporation into Decrees.**

1. Within one hundred eighty (180) days of the date this Compact is ratified by the Tribes, the State, and Congress, whichever is latest, the Tribes, and/or the State, and/or the United States shall file, in the general stream adjudication initiated by the State pursuant to the provisions of § 85-2-702(3), MCA, a motion for entry of the proposed decree set forth in Appendix 1 as the decree of the water rights held by the United States in trust for the Gros Ventre and Assiniboine Tribes which compose the Fort Belknap Indian Community and Tribal members of the Fort Belknap Reservation. The Parties understand and agree that the submission of this Compact to a state court or courts, as provided for in this Compact, is solely to comply with the provisions of § 85-2-702(3), MCA, and does not expand the jurisdiction of the state court or expand in any manner the waiver of sovereign immunity of the United States in the McCarran Amendment, 43 U.S.C. 666 or other provisions of federal law.

2. Consistent with § 3-7-224, MCA, and for the purposes of § 85-2-702(3), MCA, the review by the Montana Water Court shall be limited to Article III, and Appendix 1, and may extend to other Sections of the Compact only to the extent that they relate to the determination of existing water rights. The final decree shall consist of Article III as displayed in Appendix 1, and such other information as may be required by § 85-2-234, MCA. Nevertheless, pursuant to

§ 85-2-702(3), MCA, the terms of the entire Compact must be included in the preliminary decree without alteration for the purpose of notice.

3. Concurrent with filing of the motion for entry of the proposed decree, the Parties shall seek appointment of a water commissioner or commissioners pursuant to Title 85, Chapter 2, Parts 1-3 of the Montana Code Annotated in the appropriate state district court pursuant to § 85-2-406, MCA, and as set forth in Appendix 1, to enforce water use pursuant to decrees of the Water Court, permits issued by DNRC, contracts issued by the BOR, and use pursuant to Tribal law, from the mainstem of the Milk River downstream from the Eastern Crossing pursuant to this Compact, federal, Tribal, and State law, and the final decrees. The Parties shall ask the district court to stay the appointment pending issuance of preliminary decrees on the Milk River Basin downstream from the Eastern Crossing. The request for appointment of a water commissioner by the Parties shall be sufficient to meet the requirements of § 85-5-101, MCA pertaining to the persons who may request appointment of a water commissioner. Notwithstanding the requirement of yearly appointment of a water commissioner under state law, the Parties shall seek, and the district court may appoint, a permanent water commissioner or commissioners. The petition by the Parties does not preclude the right of any Person to seek appointment of a water commissioner or enforcement of water rights pursuant to applicable law.

4. The Parties agree to seek a mechanism for funding the Tribal share of the cost of the water commissioner or commissioners in the federal legislation ratifying the Compact.

5. Water users with rights to divert water from the mainstem of the Milk River downstream from the Eastern Crossing under authority of State, federal or Tribal law, shall notify the water commissioner within a reasonable period in advance of a need to divert water.

6. Any Person authorized to use water from the mainstem of the Milk River Basin downstream from the Eastern Crossing objecting to the distribution of water by the water commissioner, or to a use of water by another Person, may use the remedies provided by § 85-5-301, MCA.

7. In the distribution of water, the water commissioner or commissioners shall be bound by the decrees of the water court, however, the commissioner or commissioners may use the databases developed pursuant to Section C.3.d. of Article IV to facilitate understanding of the distribution of water within a particular water right.

8. Nothing in this Compact shall prevent the holders of water rights Arising Under State Law or Tribal Water Rights with a source on the mainstem of the Milk River below the Eastern Crossing from agreeing to an alternative water distribution plan that allows sharing of shortages, distribution of shortage, operation of storage, or exchange of storage in a manner other than priority. Such agreement shall be enforced by the court appointing the water commissioner.

C. **Disposition of Federal Suit.**

1. On issuance of a final decree by the Montana Water Court or its successor, and the completion of any direct appeals therefrom, or on expiration of the time for filing any such appeal, the United States, the Tribes, and the State shall execute and file joint motions pursuant to Rule 41(a), Fed.R.Civ.P., to dismiss without prejudice the claims of the Tribes, Tribal members, and Allottees and any claims made by the United States for benefit of the Tribes, Tribal members, and Allottees in United States v. Aageson, No. CIV-79-21-GF (filed April 5, 1979). The case may only be resumed if the State or Tribes exercise their rights under Section A. of this Article VII.

2. The Decree shall be filed by the Parties as a consent decree in Aageson, or in federal court as a new proceeding after the dismissal of Aageson conditional on agreement by the Parties to seek the necessary State, Tribal, and federal legislation to implement the remaining provisions of the Compact, if it is finally determined in a judgment binding on the State of Montana that the state courts lack jurisdiction over, or that the state court proceedings are inadequate to adjudicate some or all of the water rights asserted in Aageson.

D. **Settlement of Tribal Water Right Claims.**

1. The water rights and other benefits confirmed to the Tribes in this Compact are in full and final satisfaction of and are intended to be in replacement of and substitution for all claims to water or to the use of water by the Tribes, Tribal members, and Allottees and the United States on behalf of the Tribes, Tribal members, and Allottees existing on the Effective Date of

this Compact, including federal reserved water rights claims based on or recognized in Winters v. United States, 207 U.S. 564 (1908), within the State of Montana.

2. In consideration of the rights confirmed to the Tribes, Tribal members, and Allottees in this Compact, and of performance by the State and the United States of all actions required by this Compact, and on entry of a final order issuing the decree of the Tribal Water Right held in trust by the United States as quantified in this Compact and displayed in Appendix 1, and except for water rights, benefits and uses confirmed in this Compact, the Tribes and the United States as trustee for the Tribes, Tribal members, and Allottees hereby waive, release, and relinquish any and all claims to water rights or to the use of water within the State existing on the Effective Date of this Compact.

3. Any claim to water by the Tribes, Tribal members, or Allottees within the Reservation shall be satisfied out of the Tribal Water Right confirmed by this Compact.

E. **Settlement of Tribal Claims Against the United States.** Waiver of claims against the United States, by the Tribes and Tribal members shall be as provided by Congress.

F. **Binding Effect.** After the Effective Date of this Compact and entry of a final decree, its terms shall be binding on:

1. The State and any Person or entity using, claiming or in any manner asserting any right under the authority of the State to the use of water in Montana; provided that, the validity of consent, ratification, or authorization by the State is to be determined by Montana law;

2. The Tribes and any Person or entity using, claiming or in any manner asserting any right to the use of the Tribal Water Right, or any right arising under any doctrine of reserved or aboriginal water rights for the Tribes or Tribal members, or any rights arising under tribal law; provided that, the validity of consent, ratification or authorization by the Tribes is to be determined by Tribal law; and

3. The United States and any Person or entity using, claiming or in any manner asserting any right under the authority of the United States to the use of water in Montana; provided that, the validity of consent, ratification or authorization by the United States is to be determined by federal law;

ARTICLE VIII - LEGISLATION/DEFENSE OF COMPACT

A. **State Legislation.** The State and Tribes agree to seek ratification of the Compact by the Montana Legislature and any additional state legislation necessary to effectuate the Compact.

B. **Federal Legislation.** The State and Tribes agree to seek ratification of the Compact by Congress and any additional federal legislation necessary to effectuate the Compact.

C. **Tribal Legislation.** The State and Tribes agree to seek ratification of the Compact by the Fort Belknap Community Council and any Tribal legislation necessary to effectuate the Compact.

D. **Defense of the Compact.** The Parties agree to defend the Compact from all challenges and attacks and in all proceedings pursuant to Sections B. and C. of Article VII, and agree that no provision of the Compact shall be modified as to substance except as may be provided in the Compact, or by agreement among the Parties.

IN WITNESS WHEREOF the representatives of the State of Montana, the Fort Belknap Indian Community of the Fort Belknap Reservation, and the United States, have signed this Compact on the ____ day of ________, 20__.

History: En. Sec. 1, Ch. 256, L. 2001.

85-20-1002. Findings and purpose. (1) It is the policy of the state to seek negotiated settlements of federal and Indian reserved water rights claims in Montana under Title 85, chapter 2, part 7.

(2) Pursuant to this policy, the reserved water rights compact commission commenced negotiations with the Gros Ventre and Assiniboine Tribes which compose the Fort Belknap Indian Community of the Fort Belknap Reservation and the United States.

(3) A compact, 85-20-1001, has been agreed to between the state of Montana and the Fort Belknap Indian Community of the Fort Belknap Reservation that, among other things, provides an allocation of water to the tribes in settlement of their water right claims and provides protection for certain water rights arising under state law. Approval of the compact by the United States requires ratification by congress.

(4) (a) For purposes of implementing the compact, 85-20-1002 through 85-20-1008:
(i) establish accounts necessary to meet certain obligations agreed to in the compact;
(ii) provide a structure for the issuance of grants and loans; and
(iii) provide for the facilitation of the development of an economic development plan.

(b) Funding for the accounts established under 85-20-1004, 85-20-1005, and 85-20-1007 is subject to state and federal cost-share negotiations, approval of state cost-share by the legislature, and approval of federal cost-share by the United States congress.

(5) The state's obligation to provide funding to implement the compact and to satisfy the state's cost-share, once approved by the legislature, must be conditioned on:

(a) final court approval of a decree of the water rights of the tribes as set forth in Article VII, sections B. through D., of the compact; and

(b) validity of the compact under Article VII, section A., of the compact.

(6) Funds appropriated to accounts established under 85-20-1004, 85-20-1005, and 85-20-1007 and interest on appropriated funds are not available for expenditure unless the conditions, provided in subsection (5), are met.

(7) If a court does not approve a final decree, if the compact becomes null and void, or if one of the parties withdraws from the compact, the funds appropriated by the state to accounts established in 85-20-1004, 85-20-1005, and 85-20-1007 must revert to the general fund and any federal funds must be returned to the United States treasury. If a portion of the funding or interest on funding provided in 85-20-1004, 85-20-1005, and 85-20-1007 has been expended prior to the return of funds to the general fund, any claim against the state by the tribes or by the United States on behalf of the tribes for adjudication of the water rights of the tribes must be offset by the amount of the expenditures of state funds or interest on state funds.

History: **En. Sec. 2, Ch. 256, L. 2001.**

85-20-1003. Definitions. The definitions provided for in 85-20-1001 apply to 85-20-1002 through 85-20-1008. The absence of capitalization of defined terms in 85-20-1002 through 85-20-1008 does not affect the meaning or application of a defined term.

History: **En. Sec. 3, Ch. 256, L. 2001.**

85-20-1004. Mitigation account. (1) A private purpose trust account, called the mitigation account, is established, as provided for in 17-2-102, for deposit of funds and interest on funds appropriated by the state for mitigation measures required by Article VI of the compact.

(2) On approval of a final decree pursuant to Article VII of the compact, the funds and interest on funds in the mitigation account must be made available to the department of natural resources and conservation to cover the state's cost-share for construction of mitigation measures chosen on completion of a feasibility study and appropriate state and federal environmental review and on consideration of the economic development plan authorized by 85-20-1008.

History: **En. Sec. 4, Ch. 256, L. 2001; amd. Sec. 128, Ch. 114, L. 2003; amd. Sec. 1, Ch. 440, L. 2009.**

85-20-1005. Watershed improvement trusts. (1) A permanent fund account, called the state Milk River watershed improvement trust, is established, as provided for in 17-2-102, for deposit of funds appropriated pursuant to the compact for a permanent trust. Interest income may be used by the Milk River coordinating committee established pursuant to the compact for the purpose of allocating grants and loans.

(2) A permanent fund account, called the federal Milk River watershed improvement trust, is established, as provided for in 17-2-102, for receipt of federal funds appropriated for a permanent trust. Interest income may be used by the Milk River coordinating committee established pursuant to the compact for the purpose of allocating grants and loans.

(3) The state and federal Milk River watershed improvement trusts must be collectively referred to as the Milk River watershed improvement trusts.

History: **En. Sec. 5, Ch. 256, L. 2001; amd. Sec. 129, Ch. 114, L. 2003.**

85-20-1006. Terms and conditions of loan. A Milk River watershed improvement trusts loan is subject to the following terms and conditions:

(1) Except for loan agreements with an Indian tribe, the DNRC shall obtain a security interest in real estate that would be obtained by a reasonable, careful, and prudent lender.

(2) A current appraisal of real estate offered as security and a commitment for title insurance on that land must be secured by the borrower at the borrower's expense. All costs incident to the loan and loan closing must be paid by the borrower.

(3) For a loan agreement with an Indian tribe, security must be pursuant to the appropriate federal authority to secure a loan on trust land, and with an allottee, security must be pursuant to 25 U.S.C. 483A.

(4) The term of the loan may not be greater than the life of the project and may not exceed 30 years.

History: En. Sec. 6, Ch. 256, L. 2001.

85-20-1007. Peoples Creek minimum flow account. (1) A state special revenue account, called the Peoples Creek minimum flow account, is established, as provided for in 17-2-102, for deposit of funds and interest on funds for efficiency improvements and bypass structures for irrigation upstream from the Fort Belknap Reservation in the Peoples Creek Basin 40I and for a reservoir on the Reservation for the purpose of improving minimum stream flow.

(2) On approval of a final decree pursuant to Article VII of the compact, the funds and interest on funds in the Peoples Creek minimum flow account must be made available to the water users and the tribes to cover the cost of construction of improvements as agreed to in the state and federal cost-share negotiations.

History: En. Sec. 7, Ch. 256, L. 2001; amd. Sec. 130, Ch. 114, L. 2003; amd. Sec. 1, Ch. 47, L. 2011.

85-20-1008. Economic development plan. (1) The DNRC is directed to facilitate development of an economic development plan focused on future use of water and currently irrigated land, including but not limited to use of water and irrigated land for irrigation, industrial, recreational, fisheries, and habitat purposes in the Milk River basin.

(2) The Milk River regional feasibility study examines alternative measures for mitigation of impacts of development of the tribal water right for the purpose of determining feasibility and environmental impact. The purpose of the economic development plan is to supplement the federal studies and provide information to assist in choosing mitigation measures by examining the long-term economic potential of water use in the Milk River basin.

(3) At a minimum, the DNRC shall include irrigation districts, individual irrigators, conservation districts, county governments, and municipalities in the development of the economic development plan.

History: En. Sec. 8, Ch. 256, L. 2001.

Part 11

United States of America, Department of Agriculture, Agricultural Research Service, Fort Keogh Livestock and Range Research Laboratory-Montana Compact

85-20-1101. United States of America, Department of Agriculture, Agricultural Research Service, Fort Keogh Livestock and Range Research Laboratory-Montana compact ratified. The Compact entered into by the State of Montana and the United States of America, Department of Agriculture, Agricultural Research Service, Fort Keogh Livestock and Range Research Laboratory and filed with the Secretary of State of the State of Montana under the provisions of 85-2-702, MCA, on March 27, 2007, is ratified. The compact is as follows:

WATER RIGHTS COMPACT
STATE OF MONTANA
UNITED STATES OF AMERICA, DEPARTMENT OF AGRICULTURE,
AGRICULTURAL RESEARCH SERVICE,
FORT KEOGH LIVESTOCK AND RANGE RESEARCH LABORATORY

This Compact is entered into by the State of Montana and the United States of America to settle for all time any and all claims existing on the Effective Date of This Compact to reserved water rights in the State of Montana for the United States Fort Keogh Livestock and Range Research Laboratory administered by the U.S. Department of Agriculture, Agricultural Research Service.

RECITALS

WHEREAS, the State of Montana, in 1979, pursuant to Title 85, chapter 2, of the Montana Code Annotated, commenced a general adjudication of the rights to the use of water within the State of Montana including all federal reserved and appropriative water rights;

WHEREAS, 85-2-703, MCA, provides that the State may negotiate compacts concerning the equitable division and apportionment of water between the State and its people and the federal government with claims to non-Indian reserved water rights within the State of Montana;

WHEREAS, the United States wishes to quantify and have decreed the amount of water necessary to fulfill the purposes of the reservation of lands for the United States Fort Keogh Livestock and Range Research Laboratory in the State of Montana;

WHEREAS, the United States Attorney General, or a duly designated official of the United States Department of Justice, has authority to execute this Compact on behalf of the United States pursuant to the authority to settle litigation contained in 28 U.S.C. 516-17 (1968);

WHEREAS, the Secretary of the Agriculture, or a duly designated official of the United States Department of the Agriculture, has authority to execute this Compact on behalf of the United States Department of Agriculture pursuant to 7 U.S.C. 2201 note, Section 1(a);

NOW THEREFORE, the State of Montana and the United States agree as follows:

ARTICLE I
DEFINITIONS

For purposes of this Compact only, the following definitions shall apply:

(1) "Abstracts" mean the copy of the documents entitled "Abstracts of United States Fort Keogh Livestock and Range Research Laboratory Water Rights" referenced in this Compact as Appendices 2, 3, 4, 6, and 7.

(2) "Acre-Feet per Year" means an annual quantity of water measured in acre-feet over a period of a year. "Acre-foot" or "Acre-feet" means the amount of water necessary to cover 1 acre to a depth of 1 foot and is equivalent to 43,560 cubic feet of water.

(3) "Animal Unit" means a measure of livestock numbers, where one Animal Unit equals 1 beef cow, 1 beef cow and calf, 3 pigs, 5 sheep, or 300 chickens. One dairy cow or 1 horse equals 1.5 Animal Units.

(4) "Consumptive" means a use of water which removes water from the source of supply such that the quality or quantity is reduced or the timing of return delayed, making it unusable or unavailable for use by others, and includes evaporative loss from impoundments or natural lakes.

(5) "Department" means the Montana Department of Natural Resources and Conservation or its successor.

(6) "Effective Date of This Compact" means the date of the ratification of the Compact by the Montana legislature, written approval by the United States Department of Agriculture, or written approval by the United States Department of Justice, whichever is latest.

(7) "Groundwater" means water that is beneath the ground surface.

(8) "Parties" means the State of Montana and the United States.

(9) "Person" means an individual, association, partnership, corporation, state agency, political subdivision, or any other entity, but does not include the United States.

(10) "State" means the State of Montana and all officers, agents, departments, and political subdivisions thereof. Unless otherwise indicated, for purposes of notification or consent, "State" means the Director of the Department or the Director's designee.

(11) "Stock Use" means the use of water for livestock, including but not limited to cattle, horses, pigs, sheep, and chickens. This term does not include use of water for domestic animals, such as dogs or cats, or wild animals.

(12) "Supplemental Right" means a separate water right for the same purpose, owned by the United States, and used on a common place of use.

(13) "United States" means the federal government and all officers, agencies, departments, and political subdivisions thereof. Unless otherwise indicated, for purposes of notification or consent other than service in litigation, "United States" means the Secretary of the Department of Agriculture or the Secretary's designee.

(14) "United States Fort Keogh Livestock and Range Research Laboratory" means those lands located in the State of Montana that were withdrawn from disposition and reserved by the Act of April 15, 1924, 43 Stat. 99. The lands that comprise the United States Fort Keogh Livestock and Range Research Laboratory are depicted on the map attached as Appendix 1 to this Compact.2

(15) "Water Spreading" means surface flood irrigation involving the diversion of occasional (flood or runoff) surface water from natural, usually nonperennial, watercourses by means of dams, dikes, or ditches or a combination of these. It differs from conventional irrigation because it is totally dependent on and regulated by the availability of water, not crop needs.

ARTICLE II
WATER RIGHT

The Parties agree that the following water rights are in settlement of all of the United States' federal reserved water rights for the United States Fort Keogh Livestock and Range Research Laboratory.

A. **Purpose of Reservation for the United States Fort Keogh Livestock and Range Research Laboratory.**

The United States Fort Keogh Livestock and Range Research Laboratory was created for the purpose of stock raising experiments and growing of forage crops in connection therewith. Act of April 15, 1924, 43 Stat. 99. The United States' federal reserved water rights for the United States Fort Keogh Livestock and Range Research Laboratory shall be used only for purposes relating to its experimental research regarding stock raising and crop growing on United States Fort Keogh Livestock and Range Research Laboratory lands.

B. **Quantification.**

Subject to the terms of Article III, the United States shall have the right to water for the following purposes from the sources identified on United States Fort Keogh Livestock and Range Research Laboratory lands.

1. **Irrigation Use.**

(a) **Current Irrigation Use From the Yellowstone River — Water Court Basin 42KJ.**

(i) The United States has a federal reserved water right to withdraw or divert water from the Yellowstone River in Water Court Basin 42KJ of 58 cubic feet per second for current irrigation use on 1,523 acres within United States Fort Keogh Livestock and Range Research Laboratory lands. The specific elements of this right are set forth in the Abstract attached as Appendix 2 to this Compact. Provided that, the reserved right described in this subsection is a Supplemental Right to any United States' water right under state law for irrigation use on United States Fort Keogh Livestock and Range Research Laboratory lands with a priority date senior to the reserved right described in this subsection.

(ii) The United States has a federal reserved water right for irrigation use by Water Spreading on Reservation Creek, a tributary of the Yellowstone River, in Water Court Basin 42KJ for current irrigation use on 450 acres within United States Fort Keogh Livestock and Range Research Laboratory lands. The specific elements of this right are set forth in the Abstract attached as Appendix 3 to this Compact.

(b) **Current Irrigation Use From the Tongue River Drainage — Water Court Basin 42C.**

The United States has a federal reserved water right for irrigation use by Water Spreading on an unnamed tributary of the Tongue River in Water Court Basin 42C for current irrigation use on 203 acres within United States Fort Keogh Livestock and Range Research Laboratory lands. The specific elements of this right are set forth in the Abstract attached as Appendix 4 to this Compact.

(c) **Future Irrigation Use From the Yellowstone River — Water Court Basin 42KJ.**

The United States has a federal reserved water right to withdraw or divert water from the Yellowstone River, a tributary, or Groundwater in Water Court Basin 42KJ for future irrigation use on up to a total of additional 620 acres on United States Fort Keogh Livestock and Range Research Laboratory lands with a combined flow rate of up to a total additional 23 cubic feet per second to fulfill the purposes of the United States Fort Keogh Livestock and Range Research Laboratory.

2. **Stock Use.**

(a) **Current Stock Use.**

The United States has federal reserved water rights for Consumptive use for stockwatering purposes at the locations identified in the table attached as Appendix 5 for the volume of water specified from each source, provided that the total current Stock Use on United States Fort Keogh Livestock and Range Research Laboratory lands shall not exceed the historic maximum of 3,000 Animal Units. The specific elements of these rights are set forth in the Abstracts attached as Appendix 6 to this Compact.

(b) **Future Stock Use.**

In addition to the current Stock Use described in Article II, section B.2.(a), the United States has federal reserved water rights for Consumptive use for stockwatering purposes at the same locations and the same volume of water as described in Article II, section B.2.(a) for future Stock Use on United States Fort Keogh Livestock and Range Research Laboratory lands not to exceed an additional 2,000 Animal Units.

3. **Administrative Uses.**

(a) **Current Administrative Uses.**

The United States has federal reserved rights for Consumptive use for current administrative uses on United States Fort Keogh Livestock and Range Research Laboratory lands totaling 26.70 Acre-Feet per Year. The specific elements of these rights are set forth in the Abstracts attached as Appendix 7 to this Compact.

(b) **Future Administrative Uses.**

The United States has federal reserved water rights from surface water or Groundwater for Consumptive use for future administrative uses up to a total additional volume of 18 Acre-Feet per Year to fulfill the purposes of the United States Fort Keogh Livestock and Range Research Laboratory. The types of use of the United States' federal reserved water rights for administrative uses may include but are not limited to domestic, administrative, storage, dust abatement, reclamation, and research.

4. **Emergency Fire Suppression.**

The use of water for emergency fire suppression benefits the public and is necessary for the purposes of the United States Fort Keogh Livestock and Range Research Laboratory. The United States may, as part of its reserved water right, divert or withdraw water for fire suppression on the United States Fort Keogh Livestock and Range Research Laboratory lands as needed and without a definition of the specific elements of a recordable water right. Use of water for fire suppression shall not be considered an exercise of the United States' water rights for Consumptive use.

5. **Period of Use.**

(a) The period of use of the United States' federal reserved water rights for Consumptive use set forth in Article II, sections B.1.(a)(i) shall be from March 15 to November 19 of each year.

(b) The period of use of the United States' federal reserved water rights for Consumptive use set forth in Article II, sections B.1.(a)(ii) and B.1.(b) shall be from January 1 to December 31 of each year.

(c) The period of use of the United States' federal reserved water rights for Consumptive use set forth in Article II, sections B.2. through B.4. shall be from January 1 to December 31 of each year.

6. **Priority Date.**

The priority date for all federal reserved water rights for the United States Fort Keogh Livestock and Range Research Laboratory is April 15, 1924.

ARTICLE III
IMPLEMENTATION

A. **Abstracts.**

Concurrent with this Compact, the Parties have prepared Abstracts, copies of which are attached as Appendices 2, 3, 4, 6, and 7 to this Compact, which specifically identify all of the United States' current use of water for the United States Fort Keogh Livestock and Range Research Laboratory described in this Compact and quantified in accordance with this Compact. The Parties prepared the Abstracts to comply with the requirements for a final decree as set forth in 85-2-234, MCA, and in an effort to assist the state courts in the process of entering decrees accurately and comprehensively reflecting the rights described in this Compact. The rights specified in the Abstracts are subject to the terms of this Compact.

B. **Enforcement and Administration of Water Right.**

1. The United States, the State, or a holder of a water right recognized under state law may petition a state or federal court of competent jurisdiction for relief when a controversy arises between the United States' reserved water rights described by this Compact and a holder of a water right recognized under state law. Resolution of the controversy shall be governed by the terms of this Compact where applicable or, to the extent not applicable, by appropriate state or federal law.

2. For purposes of the administration of federal reserved water rights provided for in Article II, the United States agrees that a water commissioner or other official appointed by a court of competent jurisdiction may enter the United States Fort Keogh Livestock and Range Research Laboratory lands to collect data, inspect structures for the diversion and measurement of water, and distribute the federal reserved water rights described in Article II. The terms of entry or distribution may be limited, as appropriate, by an order of a court of competent jurisdiction. Nothing herein waives the right of the United States, with respect to a specific action or anticipated action by a water commissioner or other official under this subsection, to seek terms of entry or distribution consistent with purposes of the United States Fort Keogh Livestock and Range Research Laboratory including but not limited to terms of entry that respect the integrity of ongoing or proposed research, or to seek terms of entry or distribution consistent with federal law if in conflict with state law.

3. The Department may enter the United States Fort Keogh Livestock and Range Research Laboratory lands upon which a federal reserved water right is described in Article II for the purposes of data collection on United States Fort Keogh Livestock and Range Research Laboratory water diversions or water uses. The Department shall notify the United States by certified mail or in Person at least 24 hours prior to entry.

4. The federal reserved water right described in Article II, section B.1.(b) shall not be the basis of a call on a water right recognized under state law and shall not be enforceable by the United States in an administrative or judicial proceeding except as needed to protect against a call from a junior water right under state law.

C. **Use of Federal Reserved Water Rights.**

1. **Federal Reserved Water Rights.**

The reserved rights of the United States described in this agreement are federal water rights. Nonuse of all or a part of the federal reserved water rights described in this Compact shall not constitute abandonment or forfeiture of those rights. The federal reserved water rights described in this Compact need not be applied to a use deemed beneficial under state law, but shall be restricted to uses necessary to fulfill the purposes of the United States Fort Keogh Livestock and Range Research Laboratory.

2. **Development of Future Uses.**

The United States, without prior approval of the Department, may develop a future use after the Effective Date of This Compact as described in Article II, sections B.1.(c), B.2.(b), and B.3.(b), provided that:

(a) the purpose of use is for the use authorized under Article II, sections B.1.(c), B.2.(b), or B.3.(b);

(b) the total quantity of water shall not exceed the amount set forth in Article II, sections B.1.(c), B.2.(b), or B.3.(b);

(c) the source of supply shall be restricted as set forth in Article II, section B.1.(c);

(d) any Groundwater development pursuant to Article II, section B.1.(c) in Section 8, Township 7 North, Range 47 East, Custer County, shall not interfere with the exercise of water right number 42C 183101-00 or 42C 183102-00; and

(e) the use shall not adversely affect a senior water right recognized under state law.

D. **Change in Use of Federal Reserved Water Rights.**

1. **Irrigation Use.**

The United States may change its federal reserved water rights for irrigation use, provided that:

(a) the action shall be in fulfillment of the purposes of the United States Fort Keogh Livestock and Range Research Laboratory described in Article II, section A;

(b) the use of water is irrigation use;

(c) the total use shall not exceed the total acreage, and flow rate or volume described in Article II, sections B.1.(a) and B.1.(c) and the Abstracts attached as Appendices 2 and 3 to this Compact;

(d) the source of supply shall be restricted to the source of supply set forth in Article II, sections B.1.(a) and B.1.(c);

(e) the federal reserved water right for irrigation use described in Article II, section B.1.(b) shall not be subject to change; and

(f) the change shall not adversely affect a water right recognized under state law.

2. **Stock Use.**

The United States may change its federal reserved water rights for Stock Use, provided that:

(a) the action shall be in fulfillment of the purposes of the United States Fort Keogh Livestock and Range Research Laboratory described in Article II, section A;

(b) the total Stock Use shall not exceed the amount of water or number of Animal Units described in Article II, section B.2.; and

(c) the change shall not adversely affect a water right recognized under state law.

3. **Administrative Use.**

The United States may change its federal reserved water rights for administrative use, provided that:

(a) the action shall be in fulfillment of the purposes of the United States Fort Keogh Livestock and Range Research Laboratory described in Article II, section A;

(b) the total administrative use shall not exceed the amount of water described in Article II, section B.3.; and

(c) the change shall not adversely affect a water right recognized under state law.

4. **Emergency Fire Suppression.**

The United States' federal reserved water right to divert or withdraw water for emergency fire suppression as described in Article II, section B.4, shall not be changed to any other use.

E. **Reporting Requirements.**

The United States shall provide a report to the Department on an annual basis, or on a periodic basis agreed to by the Parties, containing specific information on:

1. the development of new uses as described in Article II, sections B.1.(c), B.2.(b), and B.3.(b);
2. changes in use as described in Article III, section D; and
3. the source of supply, the dates of use, and the estimated amount of water used for emergency fire suppression as described in Article II, section B.4.

ARTICLE IV
GENERAL PROVISIONS

A. **No Effect on Tribal Rights or Other Federal Reserved Water Rights.**

1. The relationship between the water rights of the United States described herein and any rights to water of an Indian Tribe, or of any federally derived water right of an individual, or of the United States on behalf of such Tribe or individual shall be determined by the rule of priority.

2. Nothing in this Compact may be construed or interpreted in any manner to establish the nature, extent, or manner of administration of the rights to water of any other federal agency or federal lands in Montana other than those of the United States Fort Keogh Livestock and Range Research Laboratory.

3. Nothing in this Compact may be construed or interpreted in any manner to establish the nature, extent, or manner of administration of the rights to water of any Indian Tribes and tribal members.

4. Nothing in this Compact is otherwise intended to conflict with or abrogate a right or claim of any Indian Tribe regarding boundaries or property interests.

B. **General Disclaimers.**

Nothing in this Compact may be construed or interpreted:

1. as a precedent for the litigation of reserved water rights or the interpretation or administration of future compacts between the United States and the State or of the United States and any other state;

2. as a waiver by the United States on behalf of the Agricultural Research Service of its right under state law to raise objections in state court to individual water rights claimed pursuant to the State Water Use Act, Title 85, of the Montana Code Annotated, in the basins affected by this Compact or any right to raise objections in an appropriate forum to individual water rights subject to a provisional permit under the State Water Use Act, Title 85, of the Montana Code Annotated, in the basins affected by this Compact;

3. as a waiver by the United States of its right to seek relief from a conflicting water use not entitled to protection under the terms of this Compact;

4. to establish a precedent for other agreements between the State and the United States or an Indian Tribe;

5. to determine the relative rights, inter sese, of Persons using water under the authority of state law or to limit the rights of the Parties or a Person to litigate an issue not resolved by this Compact;

6. to create or deny substantive rights through headings or captions used in this Compact;

7. to expand or restrict any waiver of sovereign immunity existing pursuant to federal law as of the Effective Date of This Compact;

8. to limit the authority of the United States to manage its lands in accordance with the Constitution, statutes, and regulations of the United States;

9. to affect in any manner the entitlement to or quantification of other federal water rights;

10. to be binding on the United States with regard to the water rights of the United States for any area other than the United States Fort Keogh Livestock and Range Research Laboratory;

11. to affect the water rights of any other federal agency that is not a successor in interest to the water rights subject to this Compact;

12. to prevent the United States from seeking a permit to appropriate water under state law for use within or outside the United States Fort Keogh Livestock and Range Research Laboratory boundaries.

C. **Reservation of Rights.**

The Parties expressly reserve all rights not granted, described, or relinquished in this Compact.

D. **Severability.**

The provisions of this Compact are not severable.

E. **Multiple Originals.**

This Compact is executed in quintuplicate. Each of the five (5) Compacts bearing original signatures shall be deemed an original.

F. **Notice.**

Unless otherwise specifically provided for in this Compact, service of notice required hereunder, except service in litigation, shall be:

1. State: Upon the Director of the Department and such other officials as the Director may designate in writing.

2. United States: Upon the Secretary of Agriculture, the United States Fort Keogh Livestock and Range Research Laboratory Research Leader, and such other officials as the Secretary may designate in writing.

ARTICLE V
FINALITY OF COMPACT

A. **Binding Effect.**

1. The Effective Date of This Compact is the date of the ratification of this Compact by the Montana legislature, written approval by the United States Department of Agriculture, or written approval by the United States Department of Justice, whichever occurs later. Once effective, all of the provisions of this Compact shall be binding on the Parties.

2. Following the effective date, this Compact shall not be modified without the consent of both Parties. Either party may seek enforcement of this Compact in a court of competent jurisdiction.

3. On approval of this Compact by a state or federal court of competent jurisdiction and entry of a decree by such court confirming the rights described herein, this Compact and such rights are binding on all Persons bound by the final order of the court.

4. If an objection to this Compact is sustained pursuant to 85-2-703, MCA, and 85-2-702(3), MCA, this Compact shall be voidable by action of and without prejudice to either party.

B. **Filing Compact with State Court.**

Subject to the following stipulations and within one hundred eighty (180) days of the Effective Date of This Compact, the Parties shall submit this Compact to an appropriate state court or courts having jurisdiction over this matter in an action commenced pursuant to 43 U.S.C. 666, for approval in accordance with state law and for the incorporation of the water rights described in this Compact into a decree or decrees entered therein. The Parties understand and agree that the submission of this Compact to a state court or courts, as provided for in this Compact, is solely to comply with the provisions of 85-2-702(3), MCA, and does not expand the jurisdiction of the state court or expand in any manner the waiver of sovereign immunity of the United States in the McCarran Amendment, 43 U.S.C. 666, or other provision of federal law.

C. **Dismissal of Filed Claims.**

At the time the state courts approve the water rights described in this Compact and enter a decree or decrees confirming the rights described herein, such courts shall dismiss, with prejudice, all water right claims specified in Appendix 8 of this Compact for the United States Fort Keogh Livestock and Range Research Laboratory. If this Compact is not approved or a water right described herein is not confirmed, these claims shall not be dismissed.

D. **Settlement of Claims.**

The Parties intend that the water rights described in this Compact are in full and final settlement of the federal reserved water right claims for the United States Fort Keogh Livestock and Range Research Laboratory land in Montana described in this Compact and administered by the Agricultural Research Service on the Effective Date of This Compact. On the Effective Date of This Compact, the United States hereby and in full settlement of any and all claims to federal reserved water rights by the United States, including all claims that the Agricultural Research Service filed or could have filed as part of the ongoing statewide adjudication process, relinquishes forever all claims to federal reserved water rights within the State of Montana for the United States Fort Keogh Livestock and Range Research Laboratory. The State agrees to recognize the water rights described and quantified herein and shall, except as expressly provided for herein, treat them in the same manner as a water right recognized by the State. Nothing in this Compact precludes the Agricultural Research Service from filing for future water use permits under Montana state law.

E. **Defense of Compact.**

The Parties agree to defend the provisions and purposes of this Compact from all challenges and attacks.

IN WITNESS WHEREOF the representatives of the State of Montana and the United States have signed this Compact on the _____ day of _____________, 200__.

History: En. Sec. 1, Ch. 79, L. 2007.

Part 12
United States of America, Department of Agriculture, Agricultural Research Service, Sheep Experiment Station-Montana Compact

85-20-1201. United States of America, Department of Agriculture, Agricultural Research Service, Sheep Experiment Station-Montana Compact ratified. The Compact entered into by the State of Montana and the United States of America, Department of Agriculture, Agricultural Research Service, Sheep Experiment Station, and filed with the secretary of state of the State of Montana under the provisions of 85-2-702, MCA, on March 27, 2007, is ratified. The compact is as follows:

WATER RIGHTS COMPACT
STATE OF MONTANA
UNITED STATES OF AMERICA, DEPARTMENT OF AGRICULTURE, AGRICULTURAL RESEARCH SERVICE, SHEEP EXPERIMENT STATION

This Compact is entered into by the State of Montana ("State") and the United States of America ("United States") to settle for all time any and all claims existing on the Effective Date of this Compact to reserved water rights in the State for the United States Sheep Experiment Station ("U.S. Sheep Experiment Station") administered by the United States Department of Agriculture, Agricultural Research Service.

RECITALS

WHEREAS, the State, in 1979, pursuant to Title 85, chapter 2, of the Montana Code Annotated, commenced a general adjudication of the rights to the use of water within the State, including all federal reserved and appropriative water rights;

WHEREAS, 85-2-703, MCA, provides that the State may negotiate compacts concerning the equitable division and apportionment of water between the State and its people and the federal government with claims to non-Indian reserved water rights within the State;

WHEREAS, the United States wishes to quantify and have decreed the amount of water necessary to fulfill the purposes of the reservation of lands for the U.S. Sheep Experiment Station in the State;

WHEREAS, the United States Attorney General, or a duly designated official of the United States Department of Justice, has authority to execute this Compact on behalf of the United States pursuant to the authority to settle litigation contained in 28 U.S.C. 516 and 517;

WHEREAS, the Secretary of Agriculture, or a duly designated official of the United States Department of Agriculture, has authority to execute this Compact on behalf of the United States Department of Agriculture pursuant to 7 U.S.C. 2201 note, Section 1(a).

NOW, THEREFORE, the State and the United States agree as follows:

ARTICLE I
DEFINITIONS

For purposes of this Compact only, the following definitions apply:

(1) "Abstracts" means the copy of the document entitled "Abstracts of U.S. Sheep Experiment Station Water Rights" referenced in this Compact as Appendix 3.

(2) "Consumptive" means a use of water that removes water from the source of supply such that the quality or quantity is reduced or the timing of return delayed, making it unusable or unavailable for use by others, and includes evaporative loss from impoundments or natural lakes.

(3) "Department" means the Montana Department of Natural Resources and Conservation or its successor.

(4) "Effective Date of this Compact" means the date of the ratification of the Compact by the Montana legislature, written approval by the United States Department of Agriculture, or written approval by the United States Department of Justice, whichever is latest.

(5) "Groundwater" means water that is beneath the ground surface.

(6) "Parties" means the State and the United States.

(7) "Person" means an individual, association, partnership, corporation, state agency, political subdivision, or any other entity, but does not include the United States.

(8) "State" means the State of Montana and all officers, agents, departments, and political subdivisions thereof. Unless otherwise indicated, for purposes of notification or consent, "State" means the Director of the Department or the Director's designee.

(9) "United States" means the federal government and all officers, agencies, departments, and political subdivisions thereof. Unless otherwise indicated, for purposes of notification or consent other than service in litigation, "United States" means the Secretary of the Department of Agriculture or the Secretary's designee.

(10) "U.S. Sheep Experiment Station" means those lands within Montana that were withdrawn and reserved by Executive Order No. 3767, dated December 19, 1922, as depicted on the map attached as Appendix 1 to this Compact. For purposes of this Compact, it does not

include portions of the U.S. Sheep Experiment Station located in the State of Idaho that the United States owns and the U.S. Department of Agriculture, Agricultural Research Service, administers.

ARTICLE II
WATER RIGHT

The Parties agree that the following water rights are in settlement of all of the United States' federal reserved water rights for the U.S. Sheep Experiment Station.

A. **Purpose of Reservation for the U.S. Sheep Experiment Station.**

The U.S. Sheep Experiment Station was created for agricultural experiment purposes, and the land in Montana was set aside for experimental sheep grazing by Executive Order No. 3767, dated December 19, 1922.

B. **Quantification.**

Subject to the terms of Article III, the United States has federal reserved water rights from sources located on the U.S. Sheep Experiment Station as described below.

1. **Current Stockwater Use.**

The United States has federal reserved rights on U.S. Sheep Experiment Station lands for Consumptive use for stockwatering purposes at the 53 locations identified in the table attached as Appendix 2 for the volume of water identified. Abstracts for each of these federal reserved water rights are attached as Appendix 3 to this Compact. In the event of a discrepancy between the summary of U.S. Sheep Experiment Station water rights in Appendix 2 and the Abstracts contained in Appendix 3, the Abstracts in Appendix 3 control. The period of use of the United States' water rights for Consumptive use set forth in Article II, section B.1., shall be from May 1 to October 31 of each year.

2. **Future Uses.**

In addition to the current stockwater uses identified in Article II, section B.1., the United States has a federal reserved water right to develop uses of surface water or Groundwater consistent with Article II, section B.5., to fulfill the purposes of the U.S. Sheep Experiment Station up to a total additional volume of 15 acre feet per year for uses within the U.S. Sheep Experiment Station.

3. **Emergency Fire Suppression.**

The use of water for emergency fire suppression benefits the public and is necessary for the purposes of the U.S. Sheep Experiment Station. The United States has a federal reserved water right to divert or withdraw water for fire suppression on U.S. Sheep Experiment Station lands as needed and without a definition of the specific elements of a recordable water right. Use of water for fire suppression shall not be considered an exercise of the United States' water rights for current or future uses described in Article II, section B.1. and 2.

4. **Priority Date.**

The priority date for all federal reserved water rights for the U.S. Sheep Experiment Station is December 19, 1922.

5. **Purposes.**

The United States' reserved water rights for the U.S. Sheep Experiment Station shall be used for purposes as described in Article II, section A. The types of use may include but are not limited to: stockwater, domestic, irrigation, storage, dust abatement, reclamation, and research.

ARTICLE III
IMPLEMENTATION

A. **Abstracts.**

Abstracts for all the United States' federal reserved water rights for current stockwater uses are set forth in Appendix 3. The Parties prepared the Abstracts to comply with the requirements for a final decree as set forth in 85-2-234, MCA, and in an effort to assist the state courts in the process of entering decrees accurately and comprehensively reflecting the rights described in this Compact. The rights specified in the Abstracts are subject to the terms of this Compact.

B. **Enforcement and Administration of Water Right.**

1. The United States, the State, or a holder of a water right recognized under state law may petition a state or federal court of competent jurisdiction for relief when a controversy arises

between the United States' reserved water rights described by this Compact and a holder of a water right recognized under state law. Resolution of the controversy shall be governed by the terms of this Compact where applicable or, to the extent not applicable, by appropriate state or federal law.

2. For purposes of the administration of federal reserved water rights provided for in Article II, the United States agrees that a water commissioner, or other official appointed by a court of competent jurisdiction, may enter the U.S. Sheep Experiment Station to collect data, inspect structures for the diversion and measurement of water, and distribute the federal reserved water rights in Article II. The terms of entry or distribution may be limited, as appropriate, by an order of a court of competent jurisdiction. Nothing herein waives the right of the United States, with respect to a specific action or anticipated action by a water commissioner or other official under this subsection, to seek terms of entry or distribution consistent with purposes of the U.S. Sheep Experiment Station, including but not limited to terms of entry that respect the integrity of ongoing or proposed research, or to seek terms of entry or distribution consistent with federal law if in conflict with state law.

3. The Department may enter the U.S. Sheep Experiment Station lands upon which a federal reserved water right is described in Article II for the purposes of data collection on U.S. Sheep Experiment Station water diversions or water uses. The Department shall notify the United States by certified mail or in person at least 72 hours prior to entry.

C. **Use of Reserved Water Rights.**

The reserved rights of the United States described in this agreement are federal water rights. Nonuse of all or a part of the federal water rights described in this Compact shall not constitute abandonment or forfeiture of those rights. The federal water rights described in this Compact need not be applied to a use deemed beneficial under state law, but shall be restricted to uses necessary to fulfill the purposes of the U.S. Sheep Experiment Station.

D. **Change in Use.**

1. The United States may make a change in the use of its reserved water rights described in Article II, sections B.1. and 2., provided that:

(a) the use must fulfill the purposes of the U.S. Sheep Experiment Station described in Article II, section A;

(b) the total use shall not exceed the amount described in this Compact; and

(c) the change shall not adversely affect a senior water right recognized under state law.

2. The United States' federal reserved water right to divert or withdraw water for emergency fire suppression as described in Article II, section B.3., shall not be changed to any other use.

E. **Reporting Requirements.**

The United States shall provide a report to the Department on an annual basis, or on a periodic basis agreed to by the Parties, containing specific information on:

1. the development of new uses as described in Article II, section B.2.;
2. changes in use as described in Article III, section D; and
3. the source of supply, the dates of use, and the estimated amount of water used for emergency fire suppression as described in Article II, section B.3.

ARTICLE IV
GENERAL PROVISIONS

A. **No Effect on Tribal Rights or Other Federal Reserved Water Rights.**

1. The relationship between the water rights of the United States described herein and any rights to water of an Indian Tribe, or of any federally derived water right of an individual, or of the United States on behalf of such tribe or individual shall be determined by the rule of priority.

2. Nothing in this Compact may be construed or interpreted in any manner to establish the nature, extent, or manner of administration of the rights to water of any other federal agency or federal lands in Montana other than those of the U.S. Sheep Experiment Station.

3. Nothing in this Compact may be construed or interpreted in any manner to establish the nature, extent, or manner of administration of the rights to water of any Indian Tribes and tribal members.

4. Nothing in this Compact is otherwise intended to conflict with or abrogate a right or claim of any Indian Tribe regarding boundaries or property interests.

B. **General Disclaimers.**

Nothing in this Compact may be construed or interpreted:

1. as a precedent for the litigation of reserved water rights or the interpretation or administration of future compacts between the United States and the State or of the United States and any other state;

2. as a waiver by the United States on behalf of the Agricultural Research Service of its right under state law to raise objections in state court to individual water rights claimed pursuant to the state Water Use Act, Title 85, of the Montana Code Annotated, in the basins affected by this Compact or any right to raise objections in an appropriate forum to individual water rights subject to a provisional permit under the state Water Use Act, Title 85, of the Montana Code Annotated, in the basins affected by this Compact;

3. as a waiver by the United States of its right to seek relief from a conflicting water use;

4. to establish a precedent for other agreements between the State and the United States or an Indian tribe;

5. to determine the relative rights, inter sese, of Persons using water under the authority of state law or to limit the rights of the Parties or a Person to litigate an issue not resolved by this Compact;

6. to create or deny substantive rights through headings or captions used in this Compact;

7. to expand or restrict any waiver of sovereign immunity existing pursuant to federal law as of the Effective Date of this Compact;

8. to limit the authority of the United States to manage its lands in accordance with the Constitution, statutes, and regulations of the United States;

9. to affect in any manner the entitlement to or quantification of other federal water rights;

10. to be binding on the United States with regard to the water rights of the United States for any area other than the U.S. Sheep Experiment Station;

11. to affect the water rights of any other federal agency that is not a successor in interest to the water rights subject to this Compact;

12. to prevent the United States from seeking a permit to appropriate water under state law for use within or outside the U.S. Sheep Experiment Station boundaries.

C. **Reservation of Rights.**

The Parties expressly reserve all rights not granted, described, or relinquished in this Compact.

D. **Severability.**

The provisions of this Compact are not severable.

E. **Multiple Originals.**

This Compact is executed in quintuplicate. Each of the five (5) Compacts bearing original signatures shall be deemed an original.

F. **Notice.**

Unless otherwise specifically provided for in this Compact, service of notice required hereunder, except service in litigation, shall be:

1. State: Upon the Director of the Department and such other officials as the Director may designate in writing.

2. United States: Upon the Secretary of Agriculture, the U.S. Sheep Experiment Station Director, and such other officials as the Secretary may designate in writing.

ARTICLE V
FINALITY OF COMPACT

A. **Binding Effect.**

1. The Effective Date of this Compact is the date of the ratification of this Compact by the Montana legislature, written approval by the United States Department of Agriculture, or written approval by the United States Department of Justice, whichever occurs later. Once effective, all of the provisions of this Compact shall be binding on the Parties.

2. Following the Effective Date of this Compact, this Compact shall not be modified without the consent of both Parties. Either party may seek enforcement of this Compact in a court of competent jurisdiction.

3. On approval of this Compact by a state or federal court of competent jurisdiction and entry of a decree by such court confirming the rights described herein, this Compact and such rights are binding on all Persons bound by the final order of the court.

4. If an objection to this Compact is sustained pursuant to 85-2-702(3) and 85-2-703, MCA, this Compact shall be voidable by action of and without prejudice to either party.

B. **Filing Compact with State Court.**

Subject to the following stipulations and within one hundred eighty (180) days of the Effective Date of this Compact, the Parties shall submit this Compact to an appropriate state court or courts having jurisdiction over this matter in an action commenced pursuant to 43 U.S.C. 666 for approval in accordance with state law and for the incorporation of the water rights described in this Compact into a decree or decrees entered therein. The Parties understand and agree that the submission of this Compact to a state court or courts, as provided for in this Compact, is solely to comply with the provisions of 85-2-702(3), MCA, and does not expand the jurisdiction of the state court or expand in any manner the waiver of sovereign immunity of the United States in the McCarran Amendment, 43 U.S.C. 666, or other provision of federal law.

C. **Dismissal of Filed Claims.**

At the time the state courts approve the water rights described in this Compact and enter a decree or decrees confirming the rights described herein, such courts shall dismiss, with prejudice, all water right claims specified in Appendix 4 of this Compact for the U.S. Sheep Experiment Station. If this Compact is not approved or a water right described herein is not confirmed, these claims shall not be dismissed.

D. **Settlement of Claims.**

The Parties intend that the water rights described in this Compact are in full and final settlement of the federal reserved water right claims for the U.S. Sheep Experiment Station land in Montana described in this Compact and administered by the Agricultural Research Service on the Effective Date of this Compact. On the Effective Date of this Compact, the United States hereby and in full settlement of any and all claims to federal reserved water rights by the United States, including all claims that the Agricultural Research Service filed or could have filed as part of the ongoing statewide adjudication process, relinquishes forever all claims to federal reserved water rights within the State for the U.S. Sheep Experiment Station. The State agrees to recognize the water rights described and quantified herein and shall, except as expressly provided for herein, treat them in the same manner as a water right under Montana state law. Nothing in this Compact precludes the Agricultural Research Service from filing for future water use permits under Montana state law.

E. **Defense of Compact.**

The Parties agree to defend the provisions and purposes of this Compact from all challenges and attacks.

IN WITNESS WHEREOF, the representatives of the State of Montana and the United States have signed this Compact on the _____ day of ____________, 2007.

History: En. Sec. 1, Ch. 80, L. 2007.

Part 13

United States of America, Fish and Wildlife Service, Bowdoin National Wildlife Refuge-Montana Compact

85-20-1301. United States of America, fish and wildlife service, Bowdoin national wildlife refuge-Montana compact ratified. The compact entered into by the State of Montana and the United States of America to settle for all time any and all claims to federal reserved water rights for the Bowdoin National Wildlife Refuge administered by the U.S. Fish and Wildlife Service within the State of Montana and filed with the secretary of state of the State of Montana under the provisions of 85-2-703 on April 6, 2007, is ratified. The compact is as follows:

ARTICLE I - RECITALS

WHEREAS, in 1979, the United States brought several actions in the United States District Court for the District of Montana to adjudicate, inter alia, its rights to water with respect to the Bowdoin National Wildlife Refuge; see United States v. Aageson, No. CV-79-GF (filed April 5, 1979);

WHEREAS, Congress consented to state court jurisdiction over the quantification of claims to water rights held by the United States of America; see "the McCarran Amendment", 43 U.S.C. 666(a)(1) (1952);

WHEREAS, the State of Montana in 1979 pursuant to Title 85, chapter 2, of the Montana Code Annotated (MCA), commenced a general adjudication of the rights to use water within the State of Montana, including all federal reserved and appropriative water rights;

WHEREAS, the Montana Reserved Water Rights Compact Commission, pursuant to 85-2-703, MCA, is authorized to negotiate settlement of water rights claims filed by the United States for areas in which the United States claims reserved waters within the State of Montana;

WHEREAS, the United States wishes to quantify and have decreed the amount of water necessary to fulfill the purposes of Bowdoin National Wildlife Refuge in the State of Montana;

WHEREAS, the United States Attorney General, or a duly designated official of the United States Department of Justice, has authority to execute this Compact on behalf of the United States pursuant to the authority to settle litigation contained in 28 U.S.C. 516-517 and 519 (1968);

WHEREAS, the Secretary of the Interior, or a duly designated official of the United States Department of the Interior, has authority to execute this Compact on behalf of the United States Department of the Interior pursuant to 43 U.S.C. 1457 (1986, Supp. 1992), inter alia;

WHEREAS, it is in the best interest of all Parties that the water rights claims for the Bowdoin National Wildlife Refuge be settled through agreement between the State of Montana and the United States;

NOW, THEREFORE, the Parties agree to enter into this Compact for the purpose of settling the water rights claims of the United States for the Bowdoin National Wildlife Refuge.

ARTICLE II - DEFINITIONS

For purposes of this compact only, the following definitions shall apply:

(1) "Abstract" means the copy of the document entitled "Abstract of U.S. Fish and Wildlife Service Water Rights" referenced in this Compact as Appendix 1.

(2) "Acre-Foot" or "Acre-Feet" or "AF" means the amount of water necessary to cover one acre to a depth of one foot and is equivalent to 43,560 cubic feet of water.

(3) "Acre-Foot per Year" or "Acre-Feet per Year" or "AFY" means an annual quantity of water measured in Acre-Feet over a period of a year.

(4) "Aquifer" means any underground geological structure or formation which is capable of yielding water or is capable of recharge.

(5) "Arising Under State Law" means, as applied to a water right, a water right created under Montana law and does not include water rights created under federal law.

(6) "Beaver Creek Basin" means Montana Water Court Basin 40M, consisting of the mainstem of Beaver Creek and its tributaries, including Big Warm Creek, Little Warm Creek, and Black Coulee, to its confluence with the Milk River.

(7) "Bowdoin National Wildlife Refuge" or "Refuge" means those lands and interests in lands located in Montana that were acquired pursuant to or withdrawn and reserved by Executive Order No. 7295 of February 14, 1936, and Executive Order No. 8592 of November 12, 1940, for purposes of providing a refuge and breeding ground for migratory bird and other wildlife.

(8) "Change in Use" means, as applied to the Refuge water right, a change in the point of diversion, the place of use, the purpose of use, or the place of storage.

(9) "Consumptive Use" means a use of water that removes water from the source of supply such that the quality or quantity is reduced or the timing of return delayed, making it unusable or unavailable for use by others, and includes evaporative loss from impoundments and natural lakes.

(10) "Deep Ground Water" means water extracted from any deep regional Aquifer that is located in any geologic formation dating from the Jurassic Period or older.

(11) "Department" means the Montana Department of Natural Resources and Conservation or any successor agency.

(12) "Effective Date" means the date on which the Compact is given ratification by the Montana Legislature, written approval by the United States Department of the Interior, or written approval by the United States Department of Justice or on which the Memorandum of Understanding concerning the exercise of certain of the water rights quantified in this Compact and attached hereto as Appendix 3 is executed by the State of Montana and the United States Fish and Wildlife Service, whichever date is latest.

(13) "FWS" means the United States Fish and Wildlife Service of the United States Department of the Interior or any successor agency.

(14) "Ground Water" means any water that is beneath the surface of the ground.

(15) "Jurassic Period" means the middle period of the Mesozoic era, spanning the time between approximately 213 million and 145 million years before the Effective Date of this Compact, as identified on the geologic table attached hereto as Appendix 4.

(16) "Milk River Basin" means the mainstem of the Milk River and its tributaries from its headwaters to the confluence with the Missouri River and consists of: Montana Water Court Basins 40F, 40G, 40H, 40I, 40JW, 40JE, 40K, 40L, 40M, 40N, and 40O, as those Basin names may be modified by the Montana Water Court from time to time, and the portion of the Milk River and its tributaries flowing through the Provinces of Alberta and Saskatchewan in Canada.

(17) "Party" or "Parties" means the State of Montana, the United States of America, or both.

(18) "Person" or "Persons" means an individual or individuals or any other entity, public or private, including the State, a tribe, and the United States and all officers, agents, and departments thereof.

(19) "State" means the State of Montana and all officers, agents, departments, and political subdivisions thereof, and unless otherwise indicated, for purposes of notification or consent, "State" means the Director of the Department or the Director's designee.

(20) "United States" means the federal government and all officers, agencies, and departments thereof, and unless otherwise indicated, for purposes of notification or consent other than service in litigation, "United States" means the Secretary of the Department of the Interior or the Secretary's designee.

ARTICLE III - REFUGE WATER RIGHT

The Parties agree that the following water rights are in settlement of the reserved water rights of the United States for the Refuge. All water rights described in this Article are subject to Article IV of this Compact as well as any specific additional conditions set forth below.

A. Quantification.

The United States shall have the right to water from the following sources:

1. Natural Flow.

Subject to the provisions of Article III.B.2, the United States has the right to the surface flow in Basin 40M that drains naturally into the Refuge after satisfaction of the following water rights Arising Under State Law:

(a) all water rights Arising Under State Law with a priority date before the Effective Date of this Compact;

(b) any right excepted from the permitting requirements of State law to appropriate stock water for impoundments or pits with a priority date after the Effective Date of this Compact; and

(c) any right excepted from the permitting requirements of State law to appropriate Ground Water for domestic and/or lawn and garden use with a priority date after the Effective Date of this Compact.

2. Diversion from Beaver Creek - Consumptive Use.

Subject to the provisions of Article III.B.2, the United States has the right to divert up to 24,714 Acre-Feet per Year from Beaver Creek.

3. Ground Water - Consumptive Use.

Subject to the provisions of Article III.B.2:

(a) the United States has the right to develop 223 Acre-Feet of Ground Water extracted from well(s) located within the exterior boundaries of the Refuge; and

(b) subject also to the provisions of Article III.H, the United States has the right to develop 5,300 Acre-Feet of Deep Ground Water extracted from well(s) located any place within the Refuge.

B. Relative Priority.

1. Priority Date.

Subject to the provisions of Article III.H., the United States has a priority date of November 12, 1940, for the water rights described in this Compact for the Refuge.

2. Subordination.

The water rights described in Article III.A are subordinated to:

(a) all rights Arising Under State Law with a priority date before the Effective Date of this Compact;

(b) any right excepted from the permitting requirements of State law to appropriate stock water for impoundments or pits with a priority date after the Effective Date of this Compact; and

(c) any right excepted from the permitting requirements of State law to appropriate Ground Water for domestic and/or lawn and garden use with a priority date after the Effective Date of this Compact.

C. Period of Use.

The period of use of the water right set forth in Article III.A is January 1 through December 31 of each year.

D. Points and Means of Diversion.

1. Diversion of the water right set forth in Article III.A.2 may be located on Beaver Creek off the Refuge, subject to applicable State and federal law and/or any place within the Refuge.

2. Diversion of the water right set forth in Article III.A.1 and 3 may be located any place within the Refuge.

E. Place of Use.

The water rights set forth in Article III.A may be used anywhere within the Refuge.

F. Purposes.

The water rights set forth in Article III.A may be used for the purposes of the Refuge, including wildlife habitat maintenance and enhancement (including grazing needs for habitat management purposes), stock watering, and administrative uses, including but not limited to domestic, lawn and garden, institutional, and dust abatement uses.

G. Temporary Emergency Appropriations.

The use of water for emergency fire suppression benefits the public and is necessary for the purposes of the Refuge. The United States may divert water for emergency fire suppression at the Refuge without definition of the specific elements of a recordable water right. Temporary emergency use of water for emergency fire suppression from a source for which a water right is quantified in Article III shall not be considered an exercise of that right.

H. Deep Ground Water Use.

The development and use of the water right set forth in Article III.A.3(b) is subject to:

1. The provisions of Article III.I.1.b. and Article IV.B of the Fort Belknap-Montana Compact, 85-20-1001 through 85-20-1008, MCA; and

2. All applicable State laws pertaining to Ground Water wells, including but not limited to authorization under 85-2-311, MCA, and all state and federal water quality standards, with the exception that the priority date for this use shall be the Effective Date of this Compact and the water developed pursuant to this right may be used only for the purposes set forth in Article III.F of this Compact.

I. Exercise of Right Subject to Agreement.

In addition to the foregoing, the exercise of the water rights quantified in this Compact are subject to the provisions set forth in that Memorandum of Understanding (MOU) executed between the FWS and the State and attached hereto as Appendix 3. The MOU may at any time be modified by the mutual consent of the Parties, and such modification shall not be considered a modification of this Compact. Prior to execution of the MOU or of any changes to it, the Parties shall: (1) provide notice to water users in the affected basins of the proposed terms of the MOU and any proposed changes to it; (2) hold at least one meeting in Malta, Montana, and one meeting in Glasgow, Montana, preceded by such notice as may be required under State law for public meetings, at which representatives of the State and the United States will explain the proposed MOU or any change(s) to it and allow for public comment; and (3) provide a reasonable period for receipt of any written public comment concerning the MOU or the proposed change(s).

ARTICLE IV - IMPLEMENTATION OF COMPACT

A. Enforcement of Water Right.

1. The United States, the State, or a holder of a water right Arising Under State Law may petition a state or federal court of competent jurisdiction for relief when a controversy arises between the United States' water right described by this Compact and a holder of a water right Arising Under State Law. Resolution of the controversy shall be governed by the terms of this Compact where applicable, or to the extent not applicable, by applicable state or federal law.

2. The United States agrees that a water commissioner appointed by a state or federal court of competent jurisdiction, or other official authorized by law, may enter the Refuge for the purpose of data collection, including the collection of information necessary for water distribution on or off the Refuge, and to inspect structures for the diversion and measurement of water described in this Compact for Consumptive Use. The terms of entry shall be as specified in an order of a state or federal court of competent jurisdiction.

3. The Department may enter the Refuge at a reasonable hour of the day for the purposes of data collection on water diversion and stream flow or inspection of devices maintained by the United States pursuant to this Compact. The Department shall notify the United States by certified mail, telephone, e-mail, or in person, at least 24 hours prior to entry.

4. The United States may request an investigation by the Department of a diversion located on a stream for which a water right is described in this Compact. The Department may investigate. If an investigation occurs, the United States may accompany the Department.

5. The United States shall maintain structures, including wellhead equipment and casing, for the diversion and measurement of water authorized for consumptive use by this Compact and shall measure all exercises of its consumptive use water right. The United States shall maintain any devices it deems necessary for enforcement of its water right for natural flow described in this Compact.

B. Use of Water Right.

The rights of the United States described in this Compact are federal reserved water rights. Non-use of all or a part of the federal reserved water rights described in this Compact shall not constitute abandonment of the right. The federal reserved water rights described in this Compact need not be applied to a use deemed beneficial under State law, but shall be restricted to uses necessary to fulfill the purposes of the Refuge.

C. Change in Use.

1. Natural flow.

Water rights specified in this Compact for natural flow shall not be subject to Change in Use, provided that: the emergency use of water for fire suppression as provided for in Article III.G. shall not be deemed a Change in Use or violation of a water right for natural flow.

2. Consumptive uses.

The United States may make a Change in Use of its Consumptive Use water rights described in Article III.A. of this Compact provided that:

(a) the Change in Use shall be in fulfillment of the purposes of the Refuge;

(b) the total Consumptive Use shall not exceed the amount described in this Compact;

(c) the Change in Use shall not adversely affect any water right Arising Under State Law; and

(d) with the exception of the provisions governing a change in the purpose for which the water right is used, the United States, in making the change, shall comply with the provisions of the Montana Water Use Act, Title 85, chapter 2, MCA, applicable to change in appropriation right at the time of the change.

3. Reporting by the United States.

For any action affecting the use of a consumptive right, whether or not such action is deemed a Change in Use, the United States agrees to provide the following information to the Department upon request:

(a) Well Log:

A well log for any use that includes the drilling of a well or enlargement of an existing wellbore, such well log(s) also to be supplied to the Montana Bureau of Mines and Geology.

(b) Emergency Use:

(i) The use to which water was put, the dates of use, and the estimated amount of water used, for any temporary emergency use for fire suppression authorized by Article III.G of this Compact;

(ii) Such information needs to be provided to the Department, in response to its request, only after the commencement and subsequent cessation of any such emergency use.

(c) Periodic Report:

Within 60 days after receiving a request from the Department, the United States agrees to provide the Department with a report on:

(i) actions since the Effective Date of the Compact or any prior periodic report, whichever is later, affecting the use of a Consumptive Use right described in this Compact;

(ii) the initiation of new uses of any water right recognized in this Compact that were completed since the Effective Date of the Compact or any prior periodic report, whichever is later; and

(iii) any data and documents generated or received by the FWS since the Effective Date of the Compact or any prior periodic report, whichever is later, on measurement of stream flow on a stream with a natural flow water right set forth in this Compact.

4. Reporting by the State.

Upon request and no more often than once in each calendar year, the Department shall provide the United States with a report of:

(a) changes in appropriation granted, as defined by State law, since the Effective Date of the Compact or any prior report, whichever is later, of water rights upstream of the Refuge on Beaver Creek;

(b) any data and documents generated by the Department since the Effective Date of the Compact or any prior report, whichever is later, on the measurement of stream flows, diversions, and well use on or tributary to a stream for which a water right for natural flow is described in this Compact;

(c) any certificate of water right issued since the Effective Date of the Compact or any prior report, whichever is later, for the right to appropriate Ground Water in Basin 40M; and

(d) any permit issued since the Effective Date of the Compact or any prior report, whichever is later, for the right to appropriate stock water for impoundment or pit in Basin 40M.

ARTICLE V - GENERAL PROVISIONS

A. No Effect on Tribal Rights or Other Federal Reserved Water Rights.

1. The relationship between the water rights of the United States described in this Compact and any rights to water of any Indian tribe, or any federally derived water right of an individual, or of the United States on behalf of such tribe or individual, shall be determined by the rule of priority. The Parties agree that the water rights described in this Compact are junior to any rights to water of any Indian tribe, or any federally derived water right of an individual, or of the United States on behalf of such tribe or individual, currently quantified or as may be quantified after the Effective Date of this Compact and with a priority date before the Effective Date of this Compact, including aboriginal rights, if any, in the basins affected.

2. Nothing in the Compact may be construed or interpreted as a precedent to establish the nature, extent, or manner of administration of the rights to water of any other federal agency or federal lands in Montana other than those of the FWS at the Refuge.

3. Nothing in this Compact may be construed or interpreted in any manner to establish the nature, extent, or manner of administration of the water rights of any Indian tribe or tribal member.

4. Nothing in this Compact is otherwise intended to conflict with or abrogate a right or claim of any Indian tribe regarding its boundaries or property interests in the State of Montana.

B. State Water Rights.

Nothing in this Compact may limit the exclusive authority of the State, including the authority of a water commissioner authorized by State law, to administer all current and future water rights Arising Under State Law within and upstream of the Refuge, provided that in administration of those water rights in which the United States has an interest, such authority is limited to that granted under federal law.

C. Abstract.

Concurrent with this Compact, the Parties have prepared an Abstract, a copy of which is referenced as Appendix 1, which is a specific listing of all of the United States' water rights for the Refuge that are described in this Compact and quantified in accordance with this Compact. The Parties prepared the Abstract to comply with the requirements for a final decree as set forth in 85-2-234, MCA, and in an effort to assist the state courts in the process of entering decrees accurately and comprehensively reflecting the rights described in this Compact. The rights specified in the Abstract are subject to the terms of this Compact. In the event of a discrepancy between a right listed in the Abstract and that same right as quantified in accordance with Articles III and IV of this Compact, the Parties intend that the quantification in accordance with Articles III and IV of this Compact shall be reflected in a final decree.

D. General Disclaimers.

Nothing in this Compact may be construed or interpreted:

1. as a precedent for the litigation of reserved water rights or the interpretation or administration of future compacts between the United States and the State or the United States and any other state;

2. as a waiver by the United States of its right under State law to raise objections in state court to individual water rights claimed pursuant to the state Water Use Act, Title 85, MCA, in the basins affected by this Compact or any right to raise objections in an appropriate forum to individual water rights subject to a provisional permit under the state Water Use Act, Title 85, MCA, in the basins affected by this Compact;

3. as a waiver by the United States of its right to seek relief from a conflicting water use not entitled to protection under the terms of this Compact;

4. to determine the relative rights inter sese of Persons using water under the authority of state or tribal law or to limit the rights of the Parties or any other Person to litigate any issues or questions not resolved by this Compact;

5. to authorize the taking of a water right that is vested under state or federal law;

6. to create or deny substantive rights through headings or captions used in this Compact;

7. to expand or restrict any waiver of sovereign immunity existing pursuant to federal law as of the Effective Date of this Compact;

8. to affect or determine the applicability of any state or federal law, including, without limitation, environmental and public safety laws, on activities of the FWS;

9. to affect the right of the State to seek fees or reimbursement for costs or the right of the United States to contest the imposition of such fees or costs, pursuant to a ruling by a state or federal court of competent jurisdiction or Act of Congress;

10. to affect in any manner the entitlement to or quantification of other federal water rights. This Compact is only binding on the United States with regard to the water rights of the United States for the Refuge and does not affect the water rights of any other federal agency that is not a successor in interest to the water rights subject to this Compact.

11. to prevent the United States from constructing or modifying an outlet to an impoundment at the Refuge in compliance with all applicable laws;

12. to prevent the United States from seeking a permit to appropriate water under State law;

13. to modify or prevent modification of the March 9, 1937, Memorandum of Agreement between the Secretary of the Interior and the Secretary of Agriculture in the Matter of a Water Supply for the Lake Bowdoin Migratory Water Fowl Refuge;

14. to prevent the United States from entering into an agreement pursuant to applicable law(s) to obtain additional water from the Milk River or Beaver Creek Basins by contract, lease, or purchase or from participating in efforts to improve water supply in the Milk River Basin.

E. Reservation of Rights.

The Parties expressly reserve all rights not granted, described, or relinquished in this Compact.

F. Severability.

The provisions of this Compact are not severable.

G. Multiple Originals.

This compact is executed in quintuplicate. Each of the five (5) Compacts bearing original signatures shall be deemed an original.

H. Notice.

Unless otherwise specifically provided for in this Compact, service of notice required hereunder, except service in litigation, shall be:

1. State: Upon the Director of the Department and such other officials as the Director may designate in writing; and

2. United States: Upon the Secretary of the Interior and such other officials as the Secretary may designate in writing.

ARTICLE VI - FINALITY

A. Binding Effect.

1. After the Effective Date of this Compact, all of the provisions of this Compact shall be binding on:

(a) the State, and any Person, using, claiming, or in any manner asserting a right under the authority of the State to the use of water; and

(b) except as otherwise provided in Article V.A., the United States, and any Person, using, claiming, or in any manner asserting a right under the authority of the United States to the use of water.

2. Following the Effective Date, this Compact shall not be modified without the mutual consent of the Parties. Either Party may seek enforcement of this Compact in a court of competent jurisdiction. Attempt to unilaterally modify this Compact by either Party shall render this Compact voidable at the election of the other Party.

3. On approval of this Compact by a state or federal court of competent jurisdiction and entry of a decree by such court confirming the rights described herein, this Compact and such rights are binding on all Persons bound by the final order of the court.

4. If an objection to this Compact is sustained pursuant to 85-2-702, MCA, this Compact shall be voidable by action of and without prejudice to either Party.

5. Notwithstanding any other provision in this Compact, the State reserves the right to withdraw as a Party if, within five (5) years of ratification of this Compact by the Montana legislature:

(a) this Compact is not given written approval by the United States Department of the Interior;

(b) this Compact is not given written approval by the United States Department of Justice; or

(c) the Memorandum of Understanding concerning the exercise of certain of the water rights quantified in this Compact and attached hereto as Appendix 3 is not executed by the State and the FWS.

6. Notwithstanding any other provision in this Compact, the United States reserves the right to withdraw as a Party if, within five (5) years of ratification of this Compact by the Montana legislature, the Memorandum of Understanding concerning the exercise of certain of the water rights quantified in this Compact and attached hereto as Appendix 3 is not executed by the State and the FWS.

7. Notwithstanding any other provision in this Compact, the State reserves the right to withdraw as a Party if, at any point subsequent to the Effective Date of this Compact, the United States unilaterally withdraws from the Memorandum of Understanding attached hereto as Appendix 3.

B. Disposition of Actions.

Subject to the following stipulations and within one hundred eighty (180) days of the Effective Date, the Parties shall submit this Compact to an appropriate state court or courts having jurisdiction over this matter in an action commenced pursuant to 43 U.S.C. 666, for approval in accordance with State law and for the incorporation of the reserved water rights described in this Compact into a decree or decrees entered therein. The Parties understand and agree that the submission of this Compact to a state court or courts, as provided for in this Compact, is solely to comply with the provisions of 85-2-702, MCA, and does not expand the jurisdiction of the state court or expand in any manner the waiver of sovereign immunity of the United States in the McCarran Amendment, 43 U.S.C. 666, or other provision of federal law.

1. Dismissal of Filed Claims.

At the time the state courts approve the reserved water rights described in this Compact and enter a decree or decrees confirming the rights described herein, such courts shall dismiss, with prejudice, all of the water right claims specified in Appendix 2 to this Compact. If this Compact fails approval or a reserved water right described herein is not confirmed, the specified claims shall not be dismissed.

2. Disposition of Federal Suits.

Within ninety (90) days of the issuance of a final decree or decrees by the state courts approving this Compact and confirming the reserved water rights described herein and the completion of any direct appeals therefrom or the expiration of the time for filing such appeal, the Parties shall execute and file joint motions pursuant to Rule 41(a), Fed. R. Civ. P., to dismiss with prejudice any claims made by the United States for the FWS for the Refuge described in this Compact in federal court. This Compact may be filed as a consent decree in those federal suits only if, prior to the dismissal of the federal suits as provided in this Article, it is finally determined in a judgment binding on the State that the state courts lack jurisdiction over some or all of the reserved water rights described in this Compact. Within one (1) year of such judgment, the United States agrees to commence such additional proceedings in the federal district court for the District of Montana as may be necessary to judicially confirm the reserved water rights described herein which are not included within an existing action.

3. Continuation of Negotiations.

The Parties were unable to finalize agreement on quantification of the water rights for the National Bison Range and the Charles M. Russell and UL Bend National Wildlife Refuges and UL Bend Wilderness Area, prior to the Effective Date of this Compact. The Parties agree to continue to pursue, in good faith, quantification of water rights for these areas. In the event the Parties are unable to agree on quantification, the United States retains its right to have the quantity of any reserved water right for these areas adjudicated in a state or federal court of competent jurisdiction.

C. Settlement of Claims.

The Parties intend that the water rights described in this Compact are in full and final settlement of the water right claims for the reserved land described in this Compact and administered by the FWS in Montana on the Effective Date of this Compact. Pursuant to this settlement, the United States hereby and in full settlement of any and all claims filed by the United States or which could have been filed by the United States for the Refuge relinquishes forever on the Effective Date of this Compact all said claims to water within the State for the Refuge. The State agrees to recognize the reserved water rights described and quantified herein and shall, except as expressly provided for herein, treat them in the same manner as a water right recognized by the State.

D. Defense of Compact.

The Parties agree to defend the provisions and purposes of this Compact from all challenges and attacks.

History: En. Sec. 1, Ch. 161, L. 2007.

Part 14
United States of America, Department of Agriculture, Forest Service-Montana Compact

85-20-1401. United States of America, department of agriculture, forest service-Montana compact ratified. The compact entered into by the state of Montana and the United States of America, Department of Agriculture, Forest Service and filed with the secretary of state of the state of Montana under the provisions of 85-2-702 on April 17, 2007, is ratified. The compact is as follows:

WATER RIGHTS COMPACT
STATE OF MONTANA
UNITED STATES OF AMERICA,
DEPARTMENT OF AGRICULTURE, FOREST SERVICE

This Compact is entered into by the State of Montana ("State") and the United States of America ("United States") to settle for all time any and all claims existing on the Effective Date of This Compact to federal reserved water rights for National Forest System Lands administered by the Forest Service, an agency of the United States Department of Agriculture ("Forest Service"), within the State of Montana.

RECITALS

WHEREAS, the State of Montana, in 1979, pursuant to Title 85, chapter 2, of the Montana Code Annotated, commenced a general adjudication of the rights to the use of water within the State of Montana, including all federal reserved and appropriative water rights;

WHEREAS, section 85-2-703, MCA, provides that the State may negotiate compacts concerning the equitable division and apportionment of water between the State and its people and the federal government with claims to non-Indian federal reserved water rights within the State of Montana;

WHEREAS, section 85-2-228, MCA, provides that a federal reserved water right with a priority date of July 1, 1973, or later be subject to the same process and adjudication as a federal reserved water right with a priority date before July 1, 1973;

WHEREAS, the United States wishes to secure water rights to fulfill the purposes of National Forest System Lands in the State of Montana;

WHEREAS, the United States, in quantifying and securing water rights to meet National Forest System purposes, seeks cooperatively to accommodate the interests of the State and its citizens and to avoid the conflict and uncertainty inherent in litigating federal reserved water rights claims. The United States believes that the natural flows needed for favorable conditions of flow, for fisheries, and for other resource management goals and obligations on National Forest System Lands can be achieved, without materially affecting the interests of the United States, through the use of state law as provided in this Compact.

WHEREAS, the United States Attorney General or a duly designated official of the United States Department of Justice has authority to execute this Compact on behalf of the United States pursuant to the authority to settle litigation contained in 28 U.S.C. 516 and 517;

WHEREAS, The Secretary of Agriculture or a duly designated official of the United States Department of Agriculture has authority to execute this Compact on behalf of the United States Department of Agriculture pursuant to 7 U.S.C. 2201 note, Section 1(a);

NOW THEREFORE, the State of Montana and the United States agree as follows:

ARTICLE I
DEFINITIONS

For purposes of this Compact only the following definitions shall apply:

(1) "Abstracts" means the documents included in Appendix 1 of this Compact, entitled "Abstracts of Forest Service Federal Reserved Water Rights for Current Discrete Administrative Uses", referenced in this Compact as Appendix 1.

(2) "Concurrently" for the purposes of instream uses means not cumulative to the flow of other instream, nondiversionary water rights on the same reach of stream and for the purposes

of in situ uses means not cumulative to the volume or flow of other in situ, nondiversionary water rights from the same source of water.

(3) "Department" means the Montana Department of Natural Resources and Conservation or its successor.

(4) "Discrete Administrative Use" means a federal reserved water right to divert or withdraw water from a source of supply for use authorized under the Organic Administrative Act, 16 U.S.C. 473, et seq., necessary to fulfill the primary purposes of a National Forest at administrative sites on National Forest System Lands and includes but is not limited to federal reserved water rights for the following purposes: water for district offices, ranger stations, guard stations, work centers, and housing; water used for facilities operated for administrative purposes; water used for permanently established tree nurseries and seed orchards; and water for maintaining riding and pack stock used for administrative purposes.

(5) "Dispersed Administrative Use" means a federal reserved water right to divert or withdraw water from time to time, as needed, from a source of supply for use authorized under the Organic Administrative Act, 16 U.S.C. 473, et seq., necessary to fulfill the primary purposes of a National Forest within a specified area on National Forest System Lands and includes but is not limited to federal reserved water rights for the following purposes: water for dust abatement and road construction; water for prescribed fire management; water for reclamation; water used to establish vegetation; water used temporarily for establishment of nursery stock and seed orchards; and water for other incidental administrative purposes.

(6) "Effective Date of This Compact" means the date of the ratification of the Compact by the Montana Legislature, written approval by the United States Department of Agriculture, or written approval by the United States Department of Justice, whichever is later.

(7) "In situ" means water with a surface expression used in the place of its natural occurrence and without need of a diversion structure, measured as a flow, level, or volume of water.

(8) "National Forest System Lands" means all lands within Montana that are owned by the United States and administered by the Secretary of Agriculture through the Forest Service, but does not include any lands within the exterior boundaries of National Forest System units that are not owned by the United States and administered by the Secretary of Agriculture through the Forest Service.

(9) "Parties" means the State and the United States.

(10) "Person" means an individual, association, partnership, corporation, state agency, political subdivision, or any other entity, but does not include the United States.

(11) "South Fork Flathead Wild and Scenic River" means the segment of the South Fork of the Flathead River from its origin to Hungry Horse Reservoir located in Montana that, pursuant to the Wild and Scenic Rivers Act, 16 U.S.C. 1271, et seq., was designated as a component of the National Wild and Scenic Rivers System by Public Law 94-486, 16 U.S.C. 1274(a)(13), on October 12, 1976.

(12) "State" means the State of Montana and all officers, agents, departments, and political subdivisions thereof. Unless otherwise indicated, for purposes of notification or consent, "State" means the Director of the Montana Department of Natural Resources and Conservation or the Director's designee.

(13) "United States" means the United States of America and all officers, agencies, departments, and political subdivisions thereof. Unless otherwise indicated, for purposes of notification or consent other than service in litigation, "United States" means the Secretary of the Department of Agriculture or the Secretary's designee.

(14) "Water Right Recognized Under State Law" means a water right or use created and administered under Montana law and includes all Forest Service water rights created in Article V of this Compact and state water reservations granted, but does not include a federal or tribal reserved water right recognized by the State.

(15) "Wetted Perimeter Methodology" means an instream flow methodology for fisheries flow based on habitat for food production in the shallow, fast-moving water of a stream. The wetted perimeter is the distance across the bottom and sides of a stream channel, measured at a riffle area, that is in contact with the water. A graph of the wetted perimeter versus discharge generally yields two inflection points. The upper inflection point of the graph is the level above

which large increases in discharge result in a small increase of the wetted perimeter. The lower inflection point of the graph is the level below which small decreases in discharge result in large decreases of the wetted perimeter.

ARTICLE II
FEDERAL RESERVED WATER RIGHTS

The Parties agree that the following water rights are the federal reserved water rights of the United States for the National Forest System Lands.

A. **Discrete Administrative Uses on National Forest System Lands.**

The United States has federal reserved water rights for current and future Discrete Administrative Uses on National Forest System Lands, subject to the terms of Article III of this Compact:

1. **Current Discrete Administrative Uses on National Forest System Lands.**

The United States has federal reserved water rights for current Discrete Administrative Uses on National Forest System Lands as set forth in Table 1 and the specific listing and Abstracts attached to this Compact as Appendix 1. In the event there is a discrepancy between Table 1 and an Abstract contained in Appendix 1, the Abstract in Appendix 1 controls.

2. **Future Discrete Administrative Uses on National Forest System Lands.**

The United States has federal reserved water rights for future Discrete Administrative Uses on National Forest System Lands as set forth in Table 1.

B. **Dispersed Administrative Uses on National Forest System Lands.**

The United States has federal reserved water rights for Dispersed Administrative Uses on National Forest System Lands, subject to the terms of Article III of this Compact, as set forth in Table 1. The period of use for Dispersed Administrative Uses on National Forest System Lands can be for any period throughout the year.

TABLE 1

C. **Emergency Fire Suppression.**

The use of water for emergency fire suppression benefits the public and is necessary for the primary purposes of the National Forest System Lands in Montana. The United States has a federal reserved water right to divert or withdraw water on National Forest System Lands, with the priority date for each Water Court basin set forth in Table 1 of this Compact, from a stream, lake, or pond, as needed for emergency fire suppression for the benefit of National Forest System Lands, and without a definition of the specific elements of a recordable water right, subject to the terms of Article III. Use of water for emergency fire suppression shall not be considered an exercise of the United States' federal reserved water rights for Discrete Administrative Uses as described in Article II, section A., or Dispersed Administrative Uses as described in Article II, section B.

D. **South Fork Flathead Wild and Scenic River.**

The United States has a federal reserved water right with a priority date of October 12, 1976, for instream flow on the South Fork Flathead Wild and Scenic River in the amount of the entire flow of the river, less any of the United States' Discrete Administrative Uses as described in Article II, section A., and Dispersed Administrative Uses as described in Article II, section B., provided that the instream flow water right is subordinate to all Water Rights Recognized Under State Law with a priority date before the Effective Date of This Compact. This federal reserved water right ends at the point where the South Fork Flathead Wild and Scenic River flows into Hungry Horse Reservoir.

ARTICLE III
IMPLEMENTATION OF FEDERAL RESERVED WATER RIGHTS

A. **Abstracts.**

Abstracts for all the United States' federal reserved water rights for Current Discrete Administrative Use on National Forest System Lands are set forth in Appendix 1. The Parties prepared the Abstracts to comply with the requirements for a final decree as set forth in 85-2-234, MCA, and in an effort to assist the state courts in the process of entering decrees accurately and comprehensively reflecting the rights for current Discrete Administrative Uses as described in this Compact. The rights specified in the Abstracts are subject to the terms of this Compact.

B. **Enforcement and Administration of Federal Reserved Water Rights.**

1. When a controversy arises between the United States' federal reserved water rights described by this Compact and another holder of a Water Right Recognized Under State Law or, for enforcement pursuant to Article VIII, section B., when there is a question concerning the use of water on National Forest System Lands under this Compact, the United States, the State, or a holder of a Water Right Recognized Under State Law may petition a court of competent jurisdiction for relief. Resolution of any controversy must be governed by the terms of this Compact when applicable or, to the extent not applicable, by appropriate federal or state law.

2. For the purpose of the administration of federal reserved water rights provided for in Article II, the United States agrees that a water commissioner or other official appointed by a court of competent jurisdiction may enter National Forest System Lands to collect data, inspect structures for the diversion and measurement of water, and distribute the federal reserved water rights in Article II. The terms of entry or distribution may be limited, as appropriate, by an order of a court of competent jurisdiction. Nothing in this Compact waives the right of the United States, with respect to a specific action or anticipated action by a water commissioner or other official under this subsection, to seek terms of entry or distribution consistent with federal law if in conflict with state law.

3. The Department may enter National Forest System Lands for which a federal reserved water right is described in Article II for the purposes of data collection on Forest Service water diversions or notice requirements by the United States, pursuant to Article III, section C.3., of this Compact.

C. **Use of Federal Reserved Water Rights.**

1. **Federal Reserved Water Rights.**

The rights of the United States described in Article II of this Compact are federal reserved water rights. Non-use of all or a part of the federal reserved water rights described in this Compact shall not constitute abandonment of the right.

2. **Development of Future Discrete Administrative Uses.**

The United States, without prior approval of the Department, may develop a Discrete Administrative Use after the Effective Date of This Compact as described in Article II, section A.2., provided that:

(a) the purpose of use of the water is for a Discrete Administrative Use as defined in Article I(4) and described in Article II, section A.2.;

(b) the quantity of water for Discrete Administrative Uses diverted or withdrawn shall not exceed the total amount as set forth in Article II, Table 1; and

(c) the use shall not adversely affect a senior Water Right Recognized Under State Law.

3. **Use of Dispersed Administrative Uses.**

The United States, without prior approval of the Department, may use its federal reserved water right for Dispersed Administrative Uses, as needed, provided that:

(a) the purpose of use of the water is for a Dispersed Administrative Use as defined in Article I(5) and described in Article II, section B.;

(b) the total quantity of water for Dispersed Administrative Uses diverted or withdrawn shall not exceed the amount as set forth in Article II, Table 1;

(c) the Forest Service shall provide notice of a Dispersed Administrative Use as follows:

(i) for uses of 20,000 gallons or less per day from a single source of supply, no notice is required;

(ii) for uses greater than 20,000 gallons per day and less than 60,000 gallons per day from a single source of supply, a notice must be posted at the site of the diversion or withdrawal for the entire period during which water is being diverted or withdrawn. The notice posted shall be clearly legible and visible and provide the following information:

(A) source of water;

(B) purpose of use;

(C) starting and ending date of diversion;

(D) place of use;

(E) diversion flow rate;

(F) maximum volume of water to be diverted or withdrawn per day; and

(G) name and contact information for the contractor, the local Forest Service Ranger District, and the local Department Water Resources Regional Office.

(iii) for uses greater than 60,000 gallons per day from a single source of supply, the local Department Water Resources Regional Office must be notified at least 10 days but not more than 45 days in advance of the initial use of the water. Notice must be posted at the site of the diversion or withdrawal, as provided in Article III, section C.3.(c)(ii). Notification to the Department Water Resources Regional Office must provide the following information:

(A) source of water;

(B) legal description of the point of diversion or withdrawal;

(C) place of use;

(D) map showing preceding three items;

(E) purpose of use;

(F) starting and ending date of use;

(G) diversion flow rate;

(H) maximum volume of water to be diverted or withdrawn per day; and

(I) name and contact information for the contractor and the local Forest Service Ranger District.

(d) the diversion or withdrawal of water for a Dispersed Administrative Use shall not adversely affect a senior Water Right Recognized Under State Law; and

(e) if notified that the diversion or withdrawal for a Dispersed Administrative Use is adversely affecting a senior Water Right Recognized Under State Law, the Forest Service will immediately cease diversion or withdrawal from that source of supply. To resume the diversion or withdrawal, the Forest Service can move the diversion or withdrawal to another source of supply or satisfy the senior user and the Department Water Resources Regional Office Manager that use will not adversely affect the senior user or users.

D. **Change in Use of Federal Reserved Water Rights.**

1. **Discrete Administrative Uses.**

The United States, without approval of the Department, may change a Discrete Administrative Use described in Article II, section A., provided that:

(a) the purpose of use of the water remains a Discrete Administrative Use as defined in Article I(4) and described in Article II, section A.;

(b) the quantity of water for Discrete Administrative Uses diverted or withdrawn shall not exceed the total amount as set forth in Article II, Table 1; and

(c) the change shall not adversely affect a Water Right Recognized Under State Law.

2. **Dispersed Administrative Uses.**

The United States' federal reserved water right to divert or withdraw water for Dispersed Administrative Uses as described in Article II, section B., shall not be changed to any other use.

3. **Emergency Fire Suppression.**

The United States' federal reserved water right to divert or withdraw water for Emergency Fire Suppression as described in Article II, section C., shall not be changed to any other use.

4. **South Fork Flathead Wild and Scenic River.**

The United States' federal reserved water right for instream flow for the South Fork Flathead Wild and Scenic River, as described in Article II, section D., shall not be changed to any other use.

E. **Reporting Requirements.**

1. The Forest Service agrees to provide a report to the Department on an annual basis or on a periodic basis agreed to by the Parties containing information on development of Discrete Administrative Uses, as described in Article III, section C.2., and any change of a Discrete Administrative Use, as described in Article III, section D.1.

2. Upon request by the Department, the Forest Service shall report to the Department information it has regarding water use for Emergency Fire Suppression, as described in Article II, section C.

3. For Dispersed Administrative Uses, as described in Article III, section C.3.(c)(ii) and (iii), upon request by the Department, the Forest Service shall provide copies of notice postings for the stream or basin requested.

4. For Dispersed Administrative Uses, as described in Article III, section C.3.(c)(i), upon request by the Department, the Forest Service shall report information it has available. In the event the Department requests additional information for future reports on a stream or basin for enforcement or water distribution purposes, the Forest Service agrees to comply with the request.

F. **Ownership Interest in Water for Purposes of Statewide Adjudication.**

The federal reserved water rights for Administrative Uses and Emergency Fire Suppression described in Article II, sections A., B., and C., are ownership interests in water and its use for each water source within National Forest System Lands that has been affected by a temporary preliminary decree or preliminary decree.

ARTICLE IV
STATE LAW PROVISIONS

A. **Compact Principles.**

In order to promote settlement of issues between the United States and the State, the United States agrees to relinquish any and all claims to federal reserved water rights for instream flows on National Forest System Lands. The State agrees that, in consideration for the United States' agreement not to pursue federal reserved water rights for instream flows on National Forest System Lands, the following principles, subject to the terms of this Compact, shall be included in state law:

1. **Forest Service Water Rights Recognized Under Law Created in This Compact.**

There shall be created by this Compact Water Rights Recognized Under State Law held by the Forest Service as set forth in Article V, Table 2.

2. **State Water Reservation Process.**

(a) There shall be a state water reservation process providing a means for the United States to appropriate state-law-based water rights for a minimum instream flow, level, or quality of water that provides an opportunity for hearing and judicial review.

(i) Any appropriation granted under this process will result in a water right held by the United States that is protectable and enforceable under state law, and shall not be subject to periodic review or reallocation.

(ii) The date of appropriation for water rights granted under the state water reservation process will be the date of filing of the application for state water reservations and will be senior in priority to any applications for state water reservations filed after that date.

(b) The Parties agree that the language of 85-2-316, MCA, on the Effective Date of This Compact and the terms of Article VI of this Compact satisfy the principles in Article IV, section A.2.

3. **New State Water Reservation Section.**

The United States shall have the right to apply for a state water reservation under a new specific procedure in limited circumstances for state water reservations as set forth in Article VI, section B.

4. **Standing.**

In the ongoing statewide adjudication, the United States shall have the right to object to and participate as an objector to any water right claim for water use or storage on or water conveyed across National Forest System Lands. The Parties agree that the language of 85-2-233, MCA, on the Effective Date of This Compact satisfies the principles in Article IV, section A.4.

B. **State Law Adopted as a Condition Precedent to This Compact.**

Subject to Article VIII, section D., the Parties agree that as a condition precedent to this Compact, the following provisions will be adopted as state law:

1. **Sequencing.**

(a) The permitting process for water appropriations under state law and the permitting for the access and use of National Forest System Lands in relation to water appropriations will be sequenced to avoid conflict between state and federal permitting.

(b) The applicant is required to show proof of federal authorization before the application for a new appropriation of water or a change of appropriation will be correct and complete when:

(i) a state permit is required prior to a new appropriation of water, including ground water, or a change of appropriation; and

(ii) a federal authorization is required to occupy, use, or traverse National Forest System Lands for the purpose of diversion, impoundment, storage, transportation, withdrawal, use, or distribution of water for the appropriation or change of appropriation.

(c) The state permit for a new appropriation shall be subject to any terms, conditions and limitations related to the use of water contained in the required federal authorization.

(d) The Parties agree that the language of 85-2-302, 85-2-310, 85-2-311, 85-2-312, and 85-2-402, MCA, on the Effective Date of This Compact satisfies this condition precedent.

2. **Change of Diversionary Use to Instream Flow.**

In addition to any other process available under state law, the Forest Service may apply for a change of use from an appropriation right to divert or withdraw water on land owned by the United States that is located within or immediately adjacent to the exterior boundaries of National Forest System Lands on the Effective Date of This Compact to an instream flow water right on National Forest System Lands within or immediately adjacent to the exterior boundaries of National Forest System Lands on the Effective Date of This Compact in accordance with procedures required under state law. The Parties agree that the language of 85-2-320 on the Effective Date of This Compact satisfies the principles in Article IV, section B.2.

ARTICLE V
WATER RIGHTS RECOGNIZED UNDER STATE LAW

There is created by this Compact appropriations of Water Rights Recognized Under State Law held by the Forest Service for instream flow or in situ use as set forth in Article V.

B. **Priority Date.**

The priority date of each of the Forest Service Water Rights Recognized Under State Law created in Article V, section A., is the Effective Date of This Compact.

C. **Purpose of Use.**

Except for Water Right Number 76M-30023928, the purpose of use of each of the Forest Service Water Rights Recognized Under State Law created in Article V, section A., is fishery. The purpose of use for Water Right Number 76M-30023928, created in Article V, section A., is wildlife, which includes habitat.

D. **Period of Use.**

The period of use of each of the Forest Service Water Rights Recognized Under State Law created in Article V, section A., is January 1 to December 31.

E. **Limitation on Objections to Changes.**

A Forest Service Water Right Recognized Under State Law created in Article V, section A., shall not be the basis to preclude a change in point of diversion, means of diversion, or place of use of a senior, direct-from-source, stock water right within an allotment on National Forest System Lands if the change is for dispersing stock in the allotment and the proposed change does not expand historic consumptive use of the stock water right.

F. **Administration and Enforcement.**

The Forest Service Water Rights Recognized Under State Law created in Article V, section A., are appropriations under state law and, as such, will be administered by the State and enforced in accordance with state law. The United States, as owner and user of these water rights, is entitled to the same benefits and is subject to the same regulations as all other holders of a Water Right Recognized Under State Law.

G. **Concurrent With Other Instream Flow Uses.**

The Forest Service Water Rights Recognized Under State Law created in Article V, section A., are for instream uses or in situ nonconsumptive use, meaning that there is no diversion, impoundment, or withdrawal associated with the use and the use does not cause a net loss of water in the source of supply. The Forest Service Water Rights Recognized Under State Law created in Article V, section A., shall run Concurrently with other instream flow or in situ rights.

ARTICLE VI

APPLICATIONS FOR STATE WATER RESERVATIONS UNDER STATE LAW

A. **State Water Reservation.**

The Forest Service may apply for a state water reservation to maintain a minimum flow, volume, level, or quality of water on National Forest System Lands under 85-2-316, MCA, in all basins within the State including basins or subbasins closed to new appropriations on or after the Effective Date of This Compact, subject to the terms of this Compact, for any purpose authorized by federal law applicable to National Forest System Lands. Any purpose authorized by federal law applicable to National Forest System Lands shall be considered a beneficial use under state law for the purposes of this Compact but shall set no precedent as to whether such purposes are beneficial uses under state law outside the terms of this Compact. A state water reservation issued under 85-2-316, MCA, is a Water Right Recognized Under State Law.

B. **Specific Procedure in Limited Circumstances.**

1. (a) For a state water reservation application pursuant to Article VI, section A., when the purpose of the reservation is to maintain a minimum flow for fish and the amount requested is based on the Wetted Perimeter Methodology or other methodology adopted pursuant to Article VI, section B.1.(b), a correct and complete application shall constitute:

(i) conclusive evidence of the purpose of the reservation;
(ii) conclusive evidence of the need for the reservation;
(iii) prima facie evidence that the amount requested is accurate and suitable:
(A) at the lower inflection point of the Wetted Perimeter Methodology; or
(B) at the upper inflection point of the Wetted Perimeter Methodology or other methodology adopted pursuant to Article VI, section B.1.(b), when the purpose of the reservation is for an existing population of bull trout, westslope cutthroat trout, Yellowstone cutthroat trout, Columbia River redband trout, arctic grayling, or any other fish species listed in the future under the Endangered Species Act of 1973, 16 U.S.C. 1531, et seq.; and
(iv) prima facie evidence that the reservation is in the public interest.

(b) By mutual agreement of the Parties, the Department may propose an administrative rule under the Montana Administrative Procedure Act, Title 2, chapter 4, of the Montana Code Annotated, to establish a methodology, other than the Wetted Perimeter Methodology, for an application for a state water reservation to maintain a minimum flow under Article VI, section B.1.(a), for fish species identified in Article VI, section B.1.(a)(iii)(B). Rulemaking under this subsection shall not be considered a modification of this Compact. The Department may adopt a rule under this subsection only if it finds, based on scientific and technical evidence in the administrative record, that:

(i) the proposed methodology enjoys acceptance in the scientific community as a methodology for establishment of minimum flow for pertinent fish species based on evidence that includes the existence of peer-reviewed studies, testimony or publications by experts in the field, and previous use in Montana or another relevant location; and

(ii) the results of the proposed methodology with respect to the stream that is the subject of the application are either based on field data collected with respect to the stream or susceptible to verification based on field data.

2. For purposes of Article VI, section B., a correct and complete application shall be substantially in the form attached to this Compact as Appendix 3. Appendix 3 may be modified at any time by the consent of both Parties and shall not be considered a modification of the Compact.

3. For the purposes of Article VI, section B., the Department shall issue a state water reservation unless an objector proves by a preponderance of the evidence that:

(a) the amount of water under the Wetted Perimeter Methodology or other methodology adopted pursuant to Article VI, section B.1.(b), was not accurately measured or calculated, that the Wetted Perimeter Methodology or other methodology adopted pursuant to Article VI, section B.1.(b), could not suitably be applied to the stream reach applied for, or that there is not an existing population of the fish species set forth in Article VI, section B.1.(a)(iii)(B), identified in the application for state water reservation in the stream reach applied for; or

(b) for the public interest, there is a projected water development project:
(i) that is feasible;
(ii) that is reliably projected to be commenced within ten (10) years or within ten (10) years after a basin closure is removed;
(iii) in which the objector has or can reasonably obtain a possessory interest or the written consent of the Person or Party with the possessory interest in the property where the water is to be diverted, impounded, stored, transported, and put to beneficial use;
(iv) for which the amount of water needed for the project is reasonable;
(v) for which water needed for the project is not reasonably available from any other water source;
(vi) for which the water needed for the project, based on amount and period of use, would be unavailable if the proposed reservation was granted;
(vii) that would not be feasible with water either in a lesser amount or at a different location if the reservation was granted; and
(viii) that serves a significant public need.

4. If the Department determines that proofs under Article VI, section B.3.(a), are met or that proofs for all criteria under Article VI, section B.3.(b), are met, the Department may issue, modify, or deny the reservation or may subordinate the reservation to the actual development of the project identified in Article VI, section B.3.(b).

C. **General Provisions.**

1. The Forest Service's ability to apply for a state water reservation pursuant to Article VI in any basin or subbasin terminates thirty (30) years after the state court issues a final decree for that water basin under 85-2-234(1), MCA, or thirty (30) years after the Effective Date of This Compact, whichever is later. The termination of the Forest Service's ability to apply for a state water reservation pursuant to Article VI under this subsection shall not restrict the Forest Service's ability to apply for a water right in any process available to the Forest Service under state law, including 85-2-316, MCA, provided that, the terms of this Compact shall not apply.

2. A state water reservation issued to the Forest Service under Article VI shall not be the basis to preclude a change in point of diversion, means of diversion, or place of use of a senior, direct-from-source, stock water right within an allotment on National Forest System Lands if the change is for dispersing stock in the allotment and the proposed change does not expand historic consumptive use of the stock water right.

3. In any contested case proceeding held under the Montana Administrative Procedure Act, Title 2, chapter 4, of the Montana Code Annotated, pursuant to this Compact, the common law and statutory rules of evidence shall apply only upon stipulation of all entities who are involved in a proceeding.

4. Any appeal of an administrative decision under Article VI shall be in state court and shall be filed at the First Judicial District in Helena, and the review shall be conducted according to the procedures for judicial review of contested cases under the Montana Administrative Procedure Act, Title 2, chapter 4, of the Montana Code Annotated.

5. A state water reservation issued to the Forest Service pursuant to Article VI is not subject to periodic review by the Department as set forth in 85-2-316(10), MCA. A state water reservation issued to the Forest Service pursuant to Article VI shall not be reallocated to another qualified reservant with a retained priority date as set forth in 85-2-316(11), MCA. Unless provided in this Compact, all other provisions of state law apply to a state water reservation issued to the Forest Service.

D. **Administration and Enforcement.**

Any state water reservation issued pursuant to Article VI is a Water Right Recognized Under State Law and, as such, will be administered by the State and enforced in accordance with state law. The United States, as owner and user of these water rights, is entitled to the same benefits and is subject to the same regulations of water use as all other holders of a Water Right Recognized Under State Law.

E. **Concurrent With Other Instream Flow Uses.**

Any state water reservation issued pursuant to Article VI is a Water Right Recognized Under State Law for instream uses or in situ nonconsumptive uses, meaning that there is no diversion, impoundment, or withdrawal associated with the use and the use does not cause a net loss of water in the source of supply. Unless otherwise provided in the terms and conditions, a state water reservation issued pursuant to Article VI shall run Concurrently with other instream flow rights.

F. **Department Reporting to Montana Legislature.**

For the period of time set forth in Article VI, section C.1., the Department shall biennially report to the Environmental Quality Council or other appropriate legislative committee the state water reservations applied for by the Forest Service since the previous report and the Department action on applications for state water reservations by the Forest Service since the previous report.

ARTICLE VII
GENERAL PROVISIONS

A. **No Effect on Tribal Rights or Other Federal Reserved Water Rights.**

1. The relationship between the water rights of the Forest Service described in this Compact and any rights to water of an Indian tribe in Montana or of any federally derived water right of an individual or of the United States on behalf of such tribe or individual shall be determined by the rule of priority. The Parties to this agreement recognize that the water rights described in This Compact are junior to any tribal water rights with a priority date before the Effective Date of This Compact, including aboriginal rights, if any, in the basins affected.

2. Nothing in this Compact may be construed or interpreted in any manner to establish the nature, extent, or manner of administration of the rights to water of any other federal agency or federal lands in Montana other than National Forest System Lands.

3. Nothing in this Compact may be construed or interpreted in any manner to establish the nature, extent, or manner of administration of the rights to water of any Indian tribes and tribal members in Montana.

4. Nothing in this Compact is otherwise intended to conflict with or abrogate a right or claim of any Indian tribe regarding boundaries or property interests in the State of Montana.

B. **General Disclaimers.**

Nothing in this Compact may be construed or interpreted:

1. as a precedent for the litigation of federal reserved water rights or the interpretation or administration of future compacts between the United States and the State or between the United States and any other state;

2. as a waiver by the United States of its right under state law to raise objections in state court to individual water rights claimed pursuant to state law on National Forest System Land in the basins affected by this Compact or any right to raise objections in an appropriate forum to individual water rights subject to a provisional permit under state law in the basins affected by this Compact;

3. to establish a precedent for other agreements between the State and the United States or an Indian tribe;

4. to determine the relative rights, inter sese, of Persons using water under the authority of state law or to limit the rights of the Parties or a Person to litigate an issue not resolved by this Compact;

5. to create or deny substantive rights through headings or captions used in this Compact;

6. to expand or restrict any waiver of sovereign immunity existing pursuant to federal law as of the Effective Date of This Compact;

7. with respect to federal reserved water rights, to affect the right of the State to seek fees or reimbursement for costs or the right of the United States to contest the imposition of such fees or costs pursuant to a ruling by a court of competent jurisdiction or Act of Congress;

8. to affect in any manner the entitlement to or quantification of other federal water rights. This Compact is only binding on the United States with regard to the water rights of the Forest Service and does not affect the water rights of any other federal agency that is not a successor in interest to the water rights subject to this Compact;

9. to prevent the United States from seeking a permit to appropriate water under state law from a source not closed to new permits by law; or

10. to expand or restrict rights of the United States under federal law except as expressly provided in this Compact.

C. **Reservation of Rights.**

The Parties expressly reserve all rights not granted, described, or relinquished in this Compact.

D. **Severability.**

Except as provided in Article VIII, section C., the provisions of this Compact are not severable.

E. **Multiple Originals.**

This Compact is executed in quintuplicate. Each of the five (5) Compacts bearing original signatures shall be deemed an original.

F. **Notice.**

Unless otherwise specifically provided for in this Compact, service of notice required under this Compact, except service in litigation, shall be:

1. State: Upon the Director of the Department or other officials that the Director may designate in writing.

2. United States: Upon the Secretary of Agriculture or other officials that the Secretary may designate in writing.

ARTICLE VIII
FINALITY OF COMPACT AND DISMISSAL OF CLAIMS

A. **Binding Effect.**

1. The Effective Date of This Compact is the date of the ratification of this Compact by the Montana Legislature, written approval by the United States Department of Agriculture, or written approval by the United States Department of Justice, whichever occurs later. Subject to Article VIII, section C., once effective, all of the provisions of this Compact shall be binding on:

(a) the State and a Person or entity of any nature whatsoever using, claiming, or in any manner asserting a right under the authority of the State to the use of water; and

(b) except as otherwise provided in Article VII, section A., the United States and a Person or entity of any nature whatsoever using, claiming, or in any manner asserting a right under the authority of the United States to the use of water.

2. Following the Effective Date of This Compact, this Compact shall not be modified without the consent of both Parties. Unilateral substantive modification of the terms of this Compact by either Party, as determined by a court of competent jurisdiction, shall render this Compact voidable at the election of the other Party.

3. On approval of this Compact by a court of competent jurisdiction and entry of a decree by such court confirming the rights described in this Compact, this Compact and such rights are binding on all Persons bound by the final order of the court.

4. If an objection to this Compact is sustained under 85-2-233, MCA, this Compact shall be voidable by action of and without prejudice to either Party.

B. **Enforcement of Compact.**

1. Either Party may seek enforcement of the terms of this Compact in a court of competent jurisdiction, subject to the limitations of remedies provided in Article VIII, section C.

2. When the enforcement action involves issues of notice or reporting required under Article III, sections C.3.(c) and E., the State shall provide written notice to the Forest Service and allow a reasonable opportunity to resolve the issue prior to filing an enforcement action.

3. Except as provided in Article VIII, section C., the remedy for an action for enforcement of the terms of this Compact shall not include termination of the Compact in whole or in part.

C. **Exclusive Remedy for Changes in State Law.**

1. For the time period set forth in subsection 11, if the State enacts a law that results in an alleged material impairment of any principle set forth in Article IV, section A.2., A.3., or A.4., the United States may, within 90 days of the effective date of the law, provide notice to the State of the alleged material impairment. If the United States fails to provide notice within 90 days of the effective date of the law, the United States is barred from taking any action under this section regarding alleged material impairment by enactment of the law.

2. Following the receipt of notice provided in subsection 1, the Parties shall meet within 30 days to discuss the alleged material impairment. The Parties may each appoint a negotiator and may utilize a neutral third party to discuss resolution of the alleged material impairment.

3. If the State does not agree that the legislation has resulted in material impairment within 90 days or such time as the Parties may agree or if no other alternative resolution has been found, the United States may seek a judgment in a court of competent jurisdiction declaring that the specified act of the Montana Legislature has resulted in material impairment of a principle set forth in Article IV, section A.2., A.3., or A.4. The only remedy available under this subsection is a declaratory judgment as to whether or not the change in state law results in a material impairment of a principle set for in Article IV, section A.2., A.3., or A.4. The Parties shall jointly request the court to retain jurisdiction through all proceedings under this section.

4. If the State agrees or if a court finds that changes to state law have materially impaired a principle set forth in Article IV, section A.2., A.3., or A.4., the United States may take no action under subsection 5 until the final adjournment of the next regular session of the Montana Legislature. If the material impairment is cured through enacted legislation to the satisfaction of the United States, the United States is barred from taking further action under this section.

5. If, in the opinion of the United States, the State has failed to enact legislation that cures a material impairment as provided in subsection 4, the United States may initiate severance and termination of portions of the Compact as provided in subsection 8 by sending notice to the State within 90 days from the end of the regularly scheduled legislative session. If this notice is

not served within the 90-day period, the United States is barred from severing and terminating portions of the Compact based on material impairment.

6. If the State has enacted a law to cure the material impairment and the United States does not agree that the material impairment has been cured by the enactment, the State shall have the opportunity within 90 days from receipt of the notice served by the United States to seek a judgment declaring that the specific enactment has cured the material impairment of a principle set forth in Article IV, section A.2., A.3., or A.4., either by:

(a) invoking any retained jurisdiction of the court; or

(b) if no court has retained jurisdiction over the dispute, seeking a judgment in a court of competent jurisdiction.

7. If the State does not file an action within the 90-day period provided in subsection 6, the notice served by the United States becomes effective at the expiration of the 90-day period. If the State files for declaratory judgment and the court finds that legislation enacted by the State cures the material impairment, then the notice served by the United States does not operate to sever or terminate portions of the Compact under subsection 8. If the court finds that the enacted legislation does not cure the material impairment, the notice served by the United States becomes effective when the court's judgment becomes final either through the exhaustion of all available appeals or the running of the time for taking an appeal.

8. If the United States elects to sever and terminate portions of the Compact under this section, the Parties agree that Article IV, section A.2., A.3., and A.4., and Article VI together and in their entirety are severed from the Compact and all rights and obligations under those provisions are terminated. All other provisions of this Compact remain in force and effect. If the portions of the Compact are severed and terminated, the Parties agree that the United States shall retain all water rights contained in Articles II and V and state water reservations granted to the United States prior to severance and termination under this subsection.

9. If the United States severs and terminates portions of the Compact as provided in subsection 8, the United States may file federal reserved water right claims in the state general stream adjudication, in the Montana Water Court or other state court that succeeds to the Montana Water Court's jurisdiction to conduct the general stream adjudication, for instream flow for any stream on which the United States has not been granted a Water Right Recognized Under State Law for an instream flow or an in situ right. The United States shall file all federal reserved water right claims for instream flow with the state court within twelve (12) months after severance and termination of portions of the Compact become effective. The United States agrees that, regardless of the dates of the reservation of the National Forest System Lands for which a federal reserved water right is claimed, the priority date of the federal reserved water right claim will be the Effective Date of This Compact.

10. The remedy provided in Article VIII, section C., is the exclusive remedy for actions brought as a result of changes to state law that materially impair the provisions of Article IV, section A.2., A.3., or A.4. There is no remedy under this Compact for changes to state law except as applied under this section to Article IV, section A.2., A.3., and A.4., and as provided in Article VIII, section A.2.

11. This section and the procedure and remedy provided under this section shall remain in effect for a period of thirty (30) years after the state court issues a final decree for all water basins under 85-2-234(1), MCA, that contain National Forest System Lands. This period of time under this subsection is tolled for any period of time during which state law materially impaired the interest of the United States as agreed to by the State or determined by a court of competent jurisdiction. After this period, all rights and remedies under this section terminate.

D. **Limits on Article IV, Section B.**

Article IV, section B., is not an enforceable term of this Compact, and changes to the provisions of state law as described in Article IV, sections B.1. and B.2., after the Effective Date of This Compact shall not give rise to any cause of action in law or in equity or provide any remedy under this Compact.

E. **State Court Filing.**

Subject to the following stipulations and within one hundred eighty (180) days of the Effective Date of This Compact, the Parties shall submit this Compact to an appropriate state court having jurisdiction over this matter in an action commenced pursuant to 43 U.S.C. 666, for approval in accordance with state law and for the incorporation of the federal reserved water rights described in this Compact into a decree or decrees entered in the court. The Parties understand and agree that the submission of this Compact to a state court, as provided for in this Compact, does not expand or restrict the jurisdiction of the state court or expand or restrict in any manner the waiver of sovereign immunity of the United States in the McCarran Amendment, 43 U.S.C. 666, or other provision of federal law.

F. **Dismissal of Filed Claims.**

At the time the state courts approve the federal reserved water rights described in Article II of this Compact and enter a decree or decrees confirming the rights described, such courts shall dismiss, with prejudice, all of the water right claims specified in Appendix 2 of this Compact for National Forest Service Lands. If this Compact fails approval or a federal reserved water right described in this Compact is not confirmed, the specified claims shall not be dismissed.

G. **Consent Decree.**

This Compact may be filed as a consent decree in federal court if it is finally determined in a judgment binding on the State of Montana that the state courts lack jurisdiction over some or all of the water rights described in this Compact. Within one (1) year of such judgment, the United States agrees to commence such proceedings in the federal district court for the District of Montana as may be necessary to judicially confirm the water rights described in this Compact.

H. **Settlement of Claims.**

The Parties intend that the water rights described in this Compact, together with the rights and obligations set forth in Article IV, are in full and final settlement of all federal reserved water right claims filed by the United States or that could have been filed by the United States as of the Effective Date of This Compact for the primary purposes of the National Forest System Lands in the State of Montana. Pursuant to this settlement, the United States hereby relinquishes forever on the Effective Date of This Compact all said federal reserved water right claims.

I. **Defense of Compact.**

The Parties agree to defend the provisions and purposes of this Compact from all challenges and attacks.

IN WITNESS WHEREOF the representatives of the State of Montana and the United States have signed this Compact on the 17th day of April, 2007.

History: En. Sec. 1, Ch. 213, L. 2007.

Compiler's Comments

Explanatory Note: In Art. II, Table 1, in basins that contain parts of more than one national forest, the discrete administrative uses apply basinwide. The dispersed administrative uses are allocated to each specific forest.

Part 15

Blackfeet Tribe-Montana-United States Compact

85-20-1501. Water rights compact entered into by the Blackfeet Tribe of the Blackfeet Indian Reservation, the State of Montana, and the United States ratified. The compact entered into by the Blackfeet Tribe, the State of Montana and the United States of America to settle for all time any and all claims to federal reserved water rights for the Blackfeet Tribe within the boundaries of the Blackfeet Indian Reservation within the State of Montana and filed with the secretary of state of the State of Montana under the provisions of 85-2-703 on [date of filing] is ratified. The compact is as follows:

ARTICLE I - RECITALS

WHEREAS, pursuant to the Treaty of 1855, 11 Stat. 657, a Reservation was established in Montana for the Blackfeet Tribe; and

WHEREAS, pursuant to said Treaty, the Blackfeet Tribe claims reserved water rights to fulfill the purposes of the Treaty and the Reservation; and

WHEREAS, in 1979, the United States, on its own behalf and on behalf of the Blackfeet Tribe, its members and Allottees brought suit in the United States District Court for the District of Montana to obtain a final determination of the Tribe's water rights claims, see United States v. Aageson, No. CIV-79-21-GF (filed April 5, 1979); and

WHEREAS, Congress consented to state court jurisdiction over the quantification of claims to water rights held by the United States of America in trust for Indian tribes; see "the McCarran Amendment," 43 U.S.C. 666(a)(1) (1952); Colorado River Water Conservation Dist. v. United States, 424 U.S. 800 (1976); Arizona v. San Carlos Apache Tribe, 463 U.S. 545 (1983); and

WHEREAS, the State of Montana initiated a general stream adjudication pursuant to the provisions of Chapter 697, Laws of Montana 1979, which includes Blackfeet tribal water rights; and

WHEREAS, the United States has filed claims on its own behalf and on behalf of the Blackfeet Tribe, its members and Allottees in the general stream adjudication initiated by the State of Montana, see In the Matter of the Adjudication of the Existing and Reserved Rights to the Use of Water, Both Surface and Underground, of the Blackfeet Tribe of the Blackfeet Reservation within the State of Montana, Civil No. WC-91-1; and

WHEREAS, the Montana Reserved Water Rights Compact Commission, under 85-2-702(1), MCA, is authorized to negotiate settlement of water rights claims filed by Indian tribes and/or on their behalf by the United States claiming reserved waters within the State of Montana; and

WHEREAS, the federal district court litigation was stayed in 1983 pending the outcome of Montana State court water adjudication proceedings, see Northern Cheyenne v. Adsit, 721 F.2d 1187 (9th Cir., 1983); and

WHEREAS, the adjudication of Blackfeet tribal water rights in the State court proceeding has been stayed while negotiations are proceeding to conclude a compact resolving all water rights claims of the Blackfeet Tribe within the Reservation; and

WHEREAS, the Blackfeet Tribal Business Council, or its duly designated representatives, have authority to negotiate this Compact pursuant to Article VI, Section 1(a) of the Constitution and By-Laws for the Blackfeet Tribe of the Blackfeet Indian Reservation of Montana, as amended; and

WHEREAS, the United States Attorney General, or a duly designated official of the United States Department of Justice, has authority to execute this Compact on behalf of the United States pursuant to the authority to settle litigation contained in 28 U.S.C. sections 516-17; and

WHEREAS, the Secretary of the Interior, or a duly designated official of the United States Department of the Interior, has authority to execute this Compact on behalf of the United States Department of the Interior pursuant to 43 U.S.C. 1457, inter alia; and

WHEREAS, the Blackfeet Tribe of the Blackfeet Indian Reservation, the State of Montana, and the United States agree that the Tribal Water Right described in this Compact is in satisfaction of the water rights claims of the Tribe, its members and Allottees, and of the United States on behalf of the Tribe and its members and Allottees within the Blackfeet Indian Reservation; and

WHEREAS, the Parties agree that it is in the best interest of all Parties that the water rights claims of the Blackfeet Tribe be settled through agreement between and among the Tribe, the State of Montana, and the United States.

NOW THEREFORE, the Parties agree to enter into this Compact for the purpose of settling the federally reserved water rights claims of the Blackfeet Tribe, its members, and Allottees of the Blackfeet Indian Reservation and of the United States on behalf of the Tribe, its members and Allottees within the Blackfeet Indian Reservation.

ARTICLE II- DEFINITIONS

The following definitions shall apply for purposes of this Compact:

(1) "Acre-foot" or "Acre-feet" or "AF" means the amount of water necessary to cover one acre to a depth of one foot and is equivalent to 43,560 cubic feet of water.

(2) "Acre-Feet per Year" or "AFY" means an annual quantity of water measured in acre-feet over a period of a calendar year.

(3) "Allottee" or "Allottees" means any individual or individuals who own or hold a trust allotment or interest in a trust allotment on the Reservation under the authority of the General Allotment Act (24 Stat. 388) and the Blackfeet Allotment Acts (34 Stat. 1035 and 41 Stat. 3), and subject to the terms and conditions of those Acts.

(4) "Annual" means during one calendar year.

(5) "Available St. Mary River Water" means:

(a) water from the St. Mary River allocated to the United States under the Boundary Waters Treaty minus that quantity of water required for the Milk River Project Water Right; and/or

(b) water otherwise part of the Milk River Project Water Right but made available to the Tribe by the United States without any net reduction to the legal entitlements to water of water users within entities with contracts for water from the Milk River Project Water Right, as those legal entitlements may be determined initially by the Secretary or subsequently by a court of competent jurisdiction.

(6) "Badger Creek Drainage" means Badger Creek and its tributaries within the Reservation within Basin 41M, as shown in Appendix 2.

(7) "Basin 40F" means the hydrologic Basin 40F, including the Milk River and its tributaries, as shown in Appendix 2.

(8) "Basin 41L" means the hydrologic Basin 41L, including Cut Bank Creek and its tributaries, as shown in Appendix 2.

(9) "Basin 41M" means the hydrologic Basin 41M, including Birch Creek, Badger Creek, Two Medicine River and their respective tributaries, as shown in Appendix 2.

(10) "Basin 40T" means the hydrologic Basin 40T, including the St. Mary River and its tributaries, as shown in Appendix 2.

(11) "Birch Creek" means the mainstem of the southern boundary stream of the Reservation from the southwestern Reservation boundary to the confluence of the Two Medicine River, as shown in Appendix 2.

(12) "Birch Creek Drainage" means Birch Creek and its tributaries within the Reservation within Basin 41M, as shown in Appendix 2.

(13) "Birch Creek Management Plan" means the management plan entered into by the Tribe, the State, the Bureau of Indian Affairs and the Pondera County Canal and Reservoir Company, attached hereto as Appendix 1, and any amendments thereto. Such amendments are pursuant to, and shall not be deemed a modification or amendment of, this Compact.

(14) "Blackfeet Irrigation Project" means the irrigation project authorized by federal law for development on the Reservation in Basins 41L and 41M, and currently administered by the United States Department of the Interior, Bureau of Indian Affairs.

(15) "Blackfeet Water Resources Department" or "BWRD" means the Blackfeet Water Resources Department, or any successor agency.

(16) "Board" means the Blackfeet-Montana Compact Board established by Section J.1 of Article IV of this Compact.

(17) "Boundary Waters Treaty" means the "Treaty Between the United States and Great Britain Relating to Boundary Waters, and Questions Arising Between the United States and Canada," entered into on January 11, 1909, and ratified by the Senate on May 13, 1910 (36 Stat. 2448).

(18) "Call" means the right of the holder of a water right with a senior priority and an immediate need for a recognized use to require a holder of a water right with a junior priority to refrain from diverting water otherwise physically available.

(19) "Cfs" means cubic feet per second.

(20) "Change in Use" means a change in the point of diversion, the place of use, the purpose of use, the period of use or the place or means of storage, including for Lease.

(21) "Compact" means this water rights settlement entered into by the Blackfeet Tribe, the State and the United States.

(22) "Cut Bank Creek Drainage" means Cut Bank Creek and its tributaries within the Reservation within Basin 41L, as shown in Appendix 2.

(23) "Direct Use" means diversion of water from the Natural Flow of a source to be used for a designated purpose without intermediate storage.

(24) "DNRC" means the Montana Department of Natural Resources and Conservation, or any successor agency.

(25) "Effective Date" means the date on which the Compact is finally approved by the Tribe, by the Montana legislature and by the Congress of the United States, whichever date is latest.

(26) "Excepted Rights" means any right excepted from the permitting requirements of State law to appropriate Stock Water for impoundments or pits with a priority date after the Effective Date of this Compact, any right exempt from the permitting requirements of State law to appropriate Ground Water with a priority date after the Effective Date of this Compact, temporary emergency appropriations made after the Effective Date of this Compact and as provided in 85-2-113, MCA, and those small Stock Water and Ground Water rights that are developed free from pre-development review, and those temporary emergency uses to protect lives or property, under tribal law, as each may be applicable.

(27) "Existing Uses" means, as applied to the Tribal Water Right, uses both existing and that historically existed, from both Natural Flow and Ground Water, including irrigation use on all assessable and temporarily non-assessable lands within the Blackfeet Irrigation Project, as of the date the ratification of the Compact by the Montana legislature becomes effective. The following shall be considered Existing Uses and not New Developments:

(a) water made available by the replacement, repair or rehabilitation of storage facilities existing as of the Effective Date of the Compact to their originally designed capacity;

(b) water made available by the rehabilitation, betterment, enlargement, improvement and/or construction of facilities of the Badger-Fisher Irrigation Unit of the Bureau of Indian Affairs' Blackfeet Irrigation Project and other related facilities, specifically:

(i) rehabilitation and betterment of the Four Horns Feeder Canal system up to at least 300 cfs in capacity;

(ii) enlargement of the existing off-stream Four Horns Dam and Reservoir to its maximum practical capacity;

(iii) construction of facilities to deliver a minimum of 15,000 acre-feet of water per year from the enlarged Four Horns Dam to a point on Birch Creek to be designated by the Parties;

(iv) rehabilitation and betterment of the outlet canal delivery system from Four Horns Dam to Blacktail Creek;

(v) rehabilitation and betterment of the Badger-Fisher Main Canal; and

(vi) measures to enhance on-farm efficiency in the Badger-Fisher Irrigation Unit of the Blackfeet Irrigation Project;

(c) water made available by the rehabilitation and betterment of Lower Two Medicine Lake and Mission Lake;

(d) water used by the development of the Two Medicine Water Treatment Plant and Municipal Water Project and associated delivery works, including delivery of water to East Glacier, Browning, Seville and Cut Bank; and

(e) water used by the development of the Babb municipal water supply system.

(28) "Ground Water" means any water that is beneath the ground surface.

(29) "Harm" means an impact on a water right resulting in a material injury.

(30) "Lake Elwell" means the water impounded on the Marias River in Montana by Tiber Dam, a feature of the Lower Marias Unit, Pick-Sloan Missouri Basin Program built pursuant to the Act of December 22, 1944 (58 Stat. 887), as set forth in House Document 475 and Senate Document 191, as revised and coordinated by Senate Document 247, 78th Congress, Second Session.

(31) "Lease" means, as applied to the Tribal Water Right, to authorize a Person or Persons to use all or any part of the Tribal Water Right through a service contract, temporary assignment, or other similar agreement of limited duration.

(32) "Milk River Drainage" means the Milk River and its tributaries within the Reservation within Basin 40F, as shown in Appendix 2.

(33) "Milk River Project" means the Bureau of Reclamation project conditionally approved by the Secretary of the Interior on March 14, 1903, under the Act of June 17, 1902 (32 Stat. 388, chapter 1093), commencing at Lake Sherburne Reservoir and providing water to a point approximately 6 miles east of Nashua, Montana. The St. Mary Storage Unit was authorized on March 25, 1905 by the Secretary of the Interior. Fresno Dam, constructed under the National Industrial Recovery Act, was approved by the President in August 1935, pursuant to the acts of June 25, 1910, and December 5, 1924. The Dodson Pumping Unit was approved by the President on March 17, 1944, under the Water Conservation and Utilization Act of August 11, 1939.

(34) "Milk River Project Water Right" is included herein as a Water Right Arising Under State Law and means those water rights held by the United States Bureau of Reclamation on behalf of the Milk River Project as finally adjudicated by the Montana Water Court.

(35) "Missouri River Basin" means the hydrologic basin of the Missouri River and its tributaries.

(36) "Natural Flow" means the water that would exist in a watercourse absent human intervention.

(37) "New Development" means the development of a use of the Tribal Water Right set forth in this Compact, from any source, commencing after the date the ratification of the Compact by the Montana legislature becomes effective, and encompasses all uses of the Tribal Water Right not defined as Existing Uses.

(38) "Non-irrigation Use" means the use of a water right for purposes other than irrigation.

(39) "Parties" means the Tribe, the State, and the United States.

(40) "Person" means an individual or any other entity, public or private, including the Tribe, the State, and the United States, and all officers, agents and departments of each of the above.

(41) "Recognized Under State Law" means, as applied to a water right, a water right arising under Montana law and does not include water rights arising under federal law.

(42) "Reservation" means the Blackfeet Indian Reservation of Montana as established by the Treaty of October 17, 1855, 11 Stat. 657, and as the Reservation was modified by Executive Order of July 5, 1873, I Kappler 855; the Act of April 15, 1874, 18 Stat. 28; Executive Order of August 19, 1874, I Kappler 856; Executive Order of April 13, 1875, I Kappler 856; Executive Order of July 13, 1880, I Kappler 856; Agreements with the Blackfeet, ratified by the Act of May 1, 1888, 25 Stat. 113; and Agreement with the Blackfeet, ratified by the Act of June 10, 1896, 29 Stat. 321, 353.

(43) "St. Mary River Drainage" means the St. Mary River and its tributaries within the Reservation within Basin 40T, as shown in Appendix 2.

(44) "Secretary" means the Secretary of the United States Department of the Interior, or the Secretary's duly authorized representative.

(45) "State" means the State of Montana and all officers, agencies, departments and political subdivisions thereof.

(46) "Stock Water" means water used for livestock.

(47) "Tribal Water Right" means the right of the Blackfeet Tribe, including any Tribal member or Allottee, to divert, use or store water as described in Article III of this Compact.

(48) "Tribe" means the Blackfeet Tribe of the Blackfeet Indian Reservation and all officers, agencies, and departments thereof.

(49) "Two Medicine River Drainage" means the Two Medicine River and its tributaries within the Reservation within Basin 41M, as shown in Appendix 2.

(50) "Upper Birch Creek Drainage" means that portion of the Birch Creek Drainage within the Reservation from Swift Dam to the confluence of Blacktail Creek, as shown in Appendix 2.

(51) "United States" means the federal government and all officers, agencies and departments thereof.

(52) "Water Rights Arising Under State Law" means those valid water rights Recognized Under State Law existing as of the date the ratification of the Compact by the Montana legislature becomes effective, and not subsequently relinquished or abandoned, as: decreed or to be decreed by the Montana Water Court pursuant to 85-2-234, MCA; permitted by DNRC; issued, as State water reservations, by the Montana Board of Natural Resources and Conservation or DNRC; exempted from filing in the State adjudication pursuant to 85-2-222, MCA; excepted from the permitting process pursuant to 85-2-306, MCA. The following State water reservations, though Recognized Under State Law, do not constitute Water Rights Arising Under State Law as that term is used in this Compact: Water Reservation Nos. 41L 71688 and 41M 72585 other than the portion authorized for use as PO-171-071-01; and Water Reservation Nos. 41M 30017392, 41M 30017536 other than the portion arising off the Reservation, and 41L 30017445, as shown in Appendix 3.

ARTICLE III - TRIBAL WATER RIGHT

A. Religious or Cultural Uses. The Tribal Water Right described in this Article III includes all traditional religious or cultural uses of water by Blackfeet Tribal members within the Reservation.

B. Right of Use. All Existing Uses by the Tribe, its members and Allottees are included in the Tribal Water Right recognized in this Compact. Such uses include but are not limited to irrigation, Stock Water, domestic, municipal, storage and those uses identified in Article III.A.

C. Basin 41M - Birch Creek Drainage.

1. Quantification.

a. Irrigation right. The Tribe has a Direct Use water right of 100 Cfs of the Natural Flow of Birch Creek for irrigation use in the Upper Birch Creek Drainage. This right may be changed to another place of use or purpose of use only in accordance with Article IV.D.3.

b. In-stream Flow Right.

i. The Tribe also has an in-stream Natural Flow right in Birch Creek of 15 Cfs from October 1 to March 31, and 25 Cfs from April 1 to September 30 of each year. The Tribe may establish, in its discretion and after conferral with appropriate fish and wildlife agencies, a lesser in-stream Natural Flow level of not less than 10 Cfs. Subject to Appendix 1, the Tribe may use all or part of the difference between the in-stream Natural Flow right set forth herein and any lesser in-stream Natural Flow level of not less than 10 Cfs at any place of use and for any purpose of use.

ii. Other than as set forth in Article III.C.1.b.i, the in-stream flow right set forth herein shall not be subject to change to any other use, provided that the emergency use of water pursuant to Article III.H.5 shall not be considered a change or alteration in use, or a violation of a water right for in-stream flow.

c. Additional Flow Right. After satisfaction of all Water Rights Arising Under State Law in Basin 41M, the Tribe may divert or authorize the use of the Natural Flow in Birch Creek as measured at the State Highway 358 bridge crossing Birch Creek and any gaining flows available from the same bridge crossing to Birch Creek's confluence with the Two Medicine River.

d. Ground Water Right. The Tribe also has a right to all Ground Water in the Birch Creek Drainage that is not hydrologically connected to Birch Creek, and to develop or permit the development of Excepted Rights in the Birch Creek Drainage.

2. Priority Date. The priority date of the Tribal Water Right set forth in Article III.C.1 shall be October 17, 1855.

3. Period of Use.

a. Except as provided in Article IV.D.3, the period of use of the water right set forth in Article III.C.1.a shall be April 1 to October 1 of each year.

b. The period of use of the water right set forth in Article III.C.1.b, c and d shall be January 1 to December 31 of each year.

4. Points and Means of Diversion. Subject to the terms and conditions of Article IV of this Compact, and in addition to what is specifically authorized in Article III.C.1.b.i, the Tribe may divert or permit the diversion of the water right set forth in Article III.C.1.a and c from any point on Birch Creek for use within the Reservation and by any means authorized by the Tribal Water Code, or permit the diversion of the water right set forth in Article III.C.1.c from a point off the Reservation pursuant to a Lease under Article IV.D.2.

5. Purposes. The water right set forth in Article III.C.1 may be used for any purpose consistent with the terms of this Compact and allowed by Tribal or federal law.

6. Call Protection. All Water Rights Arising Under State Law using water from sources other than Birch Creek within Basin 41M shall be protected from any Call for the in-stream flows set forth in Article III.C.1.b.

7. Birch Creek Management Plan. The use of the water right set forth in Article III.C.1.a shall also be governed by the terms of the Birch Creek Management Plan, set forth as Appendix 1.

8. Commencement of Development. In addition to the foregoing, the exercise of the water rights set forth in Article III.C.1.a and b is subject to the Agreement Regarding Birch Creek Water Use entered into by the Tribe and the State on January 31, 2008.

D. Basin 41M - Badger Creek Drainage and Two Medicine River Drainage.

1. Quantification.

a. The Tribe has a water right to all Natural Flow and Ground Water within the Badger Creek and Two Medicine Drainages, with the exception of those waters subject to the Water Rights Arising Under State Law in those drainages.

b. Of the Tribal Water Right set forth in Article III.D.1.a, 20 Cfs shall be dedicated to maintain an in-stream flow in the mainstem of Badger Creek within the Badger Creek Drainage, and 20 Cfs shall be dedicated to maintain an in-stream flow in the mainstem of the Two Medicine River within the Two Medicine River Drainage. The in-stream flow right set forth in this Article III.D.1.b shall not be subject to change to any other use, provided that the emergency use of water pursuant to Article III.H.5 shall not be considered a change or alteration in use, or a violation of a water right for in-stream flow.

c. The Tribe is entitled to develop such storage as is necessary to effectuate the right set forth in Article III.D.1.a.

2. Priority Date. The priority date of the Tribal Water Right set forth in Article III.D.1 shall be October 17, 1855.

3. Period of Use. The period of use of the water right set forth in Article III.D.1 shall be January 1 to December 31 of each year.

4. Points and Means of Diversion. Subject to the terms and conditions of Article IV of this Compact, the Tribe may divert or permit the diversion of the water right set forth in Article III.D.1 from any point within the Reservation for use within the Reservation and by any means authorized by the Tribal Water Code, or permit the diversion of the water right set forth in Article III.D.1 from a point off the Reservation pursuant to a Lease under Article IV.D.2.

5. Purposes. The water right set forth in Article III.D.1 may be used for any purpose consistent with the terms of this Compact and allowed by Tribal or federal law.

6. Call Protection. All Water Rights Arising Under State Law within Basin 41M shall be protected from any Call from any user of the Tribal Water Right, with the exceptions of Calls for the in-stream flows set forth in Article III.D.1.b, Calls for stored water, and Calls for water diverted from another hydrologic basin.

E. Basin 41L - Cut Bank Creek Drainage.

1. Quantification.

a. The Tribe has a water right to all Natural Flow and Ground Water within the Cut Bank Creek Drainage, with the exception of those waters subject to the Water Rights Arising Under State Law in that drainage.

b. Of the water right set forth in Article III.E.1.a, 2 Cfs shall be dedicated to maintain an in-stream flow in the mainstem of Cut Bank Creek as shown on Appendix 2. The in-stream flow right set forth in this Article III.E.1.b shall not be subject to change to any other use, provided that the emergency use of water pursuant to Article III.H.5 shall not be considered a change or alteration in use, or a violation of a water right for in-stream flow.

c. The Tribe is entitled to develop such storage as is necessary to effectuate the right set forth in Article III.E.1.a.

d. The Tribe shall defer New Development of the Tribal Water Right set forth in Article III.E.1.a for irrigation uses not relying exclusively on stored water or water diverted from another hydrologic basin for a period of ten years after the Effective Date of this Compact.

2. Priority Date. The priority date of the Tribal Water Right set forth in Article III.E.1 shall be October 17, 1855.

3. Period of Use. The period of use of the water right set forth in Article III.E.1 shall be January 1 to December 31 of each year.

4. Points and Means of Diversion. Subject to the terms and conditions of Article IV of this Compact, the Tribe may divert or permit the diversion of the water right set forth in Article III.E.1 from any point within the Reservation for use within the Reservation and by any means authorized by the Tribal Water Code, or permit the diversion of the water right set forth in Article III.E.1 from a point off the Reservation pursuant to a Lease under Article IV.D.2.

5. Purposes. The water right set forth in Article III.E.1 may be used for any purpose consistent with the terms of this Compact and allowed by Tribal or federal law.

6. Call Protection. All Water Rights Arising Under State Law for Non-Irrigation Uses within Basin 41L shall be protected from any Call from any user of the Tribal Water Right, with the exceptions of Calls for the in-stream flows set forth in Article III.E.1.b, Calls for stored water, and Calls for water diverted from another hydrologic basin.

F. Basin 40F - Milk River Drainage.

1. Quantification.

a. The Tribe has a water right to all Natural Flow and Ground Water available to the United States under the Boundary Waters Treaty and all Ground Water not subject to the Boundary Waters Treaty in Basin 40F within the Reservation, with the exception of those waters subject to the Water Rights Arising Under State Law in Basin 40F on the Reservation.

b. Of the water right set forth in Article III.F.1.a, 2 Cfs shall be dedicated to maintain an in-stream flow in the Milk River, as shown on Appendix 2. The in-stream flow right set forth in this Article III.F.1.b shall not be subject to change to any other use, provided that the emergency use of water pursuant to Article III.H.5 shall not be considered a change or alteration in use, or a violation of a water right for in-stream flow.

c. The Tribe is entitled to develop such storage as is necessary to effectuate the right set forth in Article III.F.1.a.

d. The Tribe shall defer New Development of the Tribal Water Right set forth in Article III.F.1.a for irrigation uses not relying exclusively on stored water or water diverted from another hydrologic basin for a period of ten years after the Effective Date of this Compact.

2. Priority Date. The priority date of the Tribal Water Right set forth in Article III.F.1 shall be October 17, 1855.

3. Period of Use. The period of use of the water right set forth in Article III.F.1 shall be January 1 to December 31 of each year.

4. Points and Means of Diversion. Subject to the terms and conditions of Article IV of this Compact, the Tribe may divert or permit the diversion of the water right set forth in Article III.F.1 from any point within Basin 40F within the Reservation for use within the Reservation and by any means authorized by the Tribal Water Code, or permit the diversion of the water right set forth in Article III.F.1 from a point off the Reservation pursuant to a Lease under Article IV.D.2.

5. Purposes. The water right set forth in Article III.F.1 may be used for any purpose consistent with the terms of this Compact and allowed by Tribal or federal law.

6. Call Protection. All Water Rights Arising Under State Law for Non-Irrigation Uses within Basin 40F on the Reservation shall be protected from any Call from any user of the Tribal Water Right, with the exceptions of Calls for the in-stream flows set forth in Article III.F.1.b, Calls for stored water, and Calls for water diverted from another hydrologic basin.

G. Basin 40T - St. Mary River Drainage.

1. Quantification.

a. St. Mary River. The Tribe has a water right to:

i. 50,000 Acre Feet per Year of water from the St. Mary River Drainage, other than Lee Creek and Willow Creek, subject to the Boundary Waters Treaty and the terms of Article IV.D.4; and

ii. all Ground Water in the St. Mary River Drainage not subject to the Boundary Waters Treaty.

b. Lee Creek. The Tribe also has the right to all Natural Flow available to the United States under the Boundary Waters Treaty and all Ground Water in Lee Creek within the Reservation, with the exception of those waters subject to Water Rights Arising Under State Law in Lee Creek.

c. Willow Creek. The Tribe also has the right to all Natural Flow available to the United States under the Boundary Waters Treaty and all Ground Water in Willow Creek (also known as Rolf Creek) within the Reservation, with the exception of those waters subject to Water Rights Arising Under State Law in Willow Creek.

d. Additional Waters. After satisfaction of all Water Rights Arising Under State Law and full development, pursuant to Article IV.D.4, of the Tribal Water Right set forth in Article III.G.1.a.i, the Tribe also has the right to the remaining portion of the United States' share of the St. Mary River under the Boundary Waters Treaty for any tribally authorized use and need.

e. Storage. The Tribe is entitled to develop such storage within the Reservation as is necessary to effectuate the right set forth in Article III.G.1.a-d.

2. Priority Date. The priority date of the Tribal Water Right set forth in Article III.G.1 shall be October 17, 1855.

3. Period of Use. The period of use of the water right set forth in Article III.G.1 shall be from January 1 through December 31 of each year.

4. Points and Means of Diversion. Subject to the terms and conditions of Article IV of this Compact, the Tribe may divert or permit the diversion of the water right set forth in Article III.G.1 from any point within the Reservation for use within the Reservation and by any means authorized by the Tribal Water Code and, if necessary, federal law, or permit the diversion of the water right set forth in Article III.G.1 from a point off the Reservation pursuant to a Lease under Article IV.D.2.

5. Purposes. The water right set forth in Article III.G.1 may be used for any purpose consistent with the terms of this Compact and allowed by Tribal or federal law.

6. Call Protection. All Water Rights Arising Under State Law within Basin 40T shall be protected from any Call from any user of the Tribal Water Right, except for Calls for stored water or water diverted from another hydrologic basin.

H. Additional Rights to Water. In addition to the water rights specifically set forth in Article III.A-G of this Compact, the Tribe has the following rights to water:

1. Lake Elwell. As part of the Tribal Water Right, the Tribe shall be entitled to an allocation of stored water in Lake Elwell as agreed to by the Parties and as provided by Congress, measured at the dam, for use or disposition by the Tribe for any beneficial purpose, pursuant to the terms of this Compact; provided that such allocation shall be in accordance with the terms and conditions of any Act of Congress ratifying this Compact. Except as directed by Congress, the United States shall have no responsibility or obligation to provide any facility for the transport of water allocated under Article III.H.1 to the Reservation or to any other location.

2. Appurtenant Water Rights. For land within the Reservation acquired after the Effective Date of this Compact, the Tribe has the right to any Water Right Arising Under State Law acquired as an appurtenance to the land. At such time as the acquired land is transferred to trust status, the water right appurtenant to the land acquired shall be added to the Tribal Water Right quantified in this Compact with an October 17, 1855 priority date, provided that the Tribe shall continue to use the acquired right as historically used or may change the use of the right pursuant to the provisions set forth in Article IV.D. The Tribe shall notify DNRC of any acquisition of water upon acquisition or no later than in the Tribe's annual report and shall identify the water right acquired, as set forth in Article IV.I.5. Any water right acquired shall be added as decreed by the Montana Water Court to the list of Existing Uses of the Tribal Water Right as provided in Article IV.I.3 of this Compact.

3. Water Rights Arising Under State Law - Relinquishment or Abandonment. Any portion of a Water Right Arising Under State Law within the Reservation that is voluntarily relinquished or is determined under State law to be abandoned, relinquished, or having otherwise ceased to exist, shall be stricken from the relevant basin decree as a Water Right Arising Under State Law and be entitled to no further protection as such a right pursuant to this Compact.

4. Lakes, Ponds and Wetlands. As part of the Tribal Water Right, the Tribe, its members and Allottees have the right to all water naturally occurring in all lakes, ponds, wetlands and other such water bodies located within the Reservation on trust lands and fee lands owned by the Tribe, its members or Allottees as of the Effective Date of this Compact.

5. Emergency Use. The Tribe has the right to use or authorize the use of water from any source on the Reservation for temporary emergency appropriations necessary to protect lives or property.

I. Use of the Tribal Water Right on the Blackfeet Irrigation Project. The use of the water rights set forth in Article III.C through E on units of the Blackfeet Irrigation Project as part of that Blackfeet Irrigation Project is a use of the Tribal Water Right, and the use of this water shall be subject to federal law.

J. Basin Closures.

1. In those portions of Basins 40F, 40T, 41L and 41M within the Reservation, and from the mainstems of the Reservation boundary streams (Birch Creek, Cut Bank Creek, and the

Two Medicine River), DNRC shall not process or grant any application for an appropriation received after the ratification of this Compact by the Montana legislature becomes effective. Provided that, in accordance with the terms and conditions of Article IV.G.1, DNRC may issue a certificate of water right or permit for use on fee land for Excepted Rights from the sources otherwise closed by this subsection. Provided further that, after such time as the Tribe promulgates an amended water code pursuant to the provisions of Article IV.C, DNRC shall not issue a certificate of water right or permit for use on fee land within the Reservation for Excepted Rights from the sources otherwise closed by this subsection.

2. The basin closures set forth in Article III.J.1 are not a limit on use of the Tribal Water Right as set forth in this Compact.

3. The basin closures set forth in Article III.J.1 are not a limit on Change in Use or transfers of Water Rights Arising Under State Law, subject to the terms and conditions in Article IV.G.2.

K. Proposed Decree. For purposes of entry in the Montana Water Court, the proposed decree of the Tribal Water Right set forth in Article III of this Compact is attached as Appendix 5. If there are differences between Appendix 5 and the Final Decree, the Final Decree shall control.

ARTICLE IV - IMPLEMENTATION OF COMPACT

A. Trust Status of Tribal Water Right. The Tribal Water Right shall be held in trust by the United States for the benefit of the Tribe, its members and Allottees.

B. Use of Tribal Water Right.

1. Persons Entitled to Use Tribal Water Right. The Tribal Water Right may be used by the Tribe, and/or Persons authorized by the Tribe.

2. Effect of Non-Use of the Tribal Water Right. Non-use of all or any portion of the Tribal Water Right described in Article III shall not constitute a relinquishment, forfeiture, or abandonment of such rights.

C. Tribal Water Right: Administration.

1. Except as otherwise provided in this Compact, the use of the Tribal Water Right shall be administered by the Tribe, and the Tribe has the final and exclusive jurisdiction to resolve all disputes between or among users of the Tribal Water Right. The Tribal Water Right shall be administered and enforced pursuant to an amended tribal water code. The amended code shall be developed and adopted by the Tribe, following public comment, within one year of the Effective Date of this Compact. The code and any subsequent amendments thereto will not take effect until the Secretary has timely approved the code or any subsequent amendment thereto. The amended tribal water code shall include:

a. a process by which any Allottee may request and be provided with an equitable distribution of water for irrigation use on the Allottee's trust allotment;

b. a process for notice and a right to be heard for the consideration and determination of any request by an Allottee for an equitable distribution of water for irrigation use on the Allottee's trust allotment, including a process for formal review of denied or disputed distributions and for resolution of contested administrative decisions;

c. a process by which any Person within the Reservation may apply for use of a portion of the Tribal Water Right, including for their historic use of water;

d. a process by which any Person shall receive authorization for an Excepted Right, without pre-development review, including a Ground Water use, a Stock Water impoundment or pit, or an emergency use to protect lives or property, consistent with standards no more restrictive than those under State law for uses excepted from permitting requirements.

e. a process by which determination of Harm shall be made, which shall include notice to potentially affected water users and the DNRC, due process, a written determination and the basis therefor, and full access to all information on which the determination is based.

f. a process for protecting Ground Water from New Developments in areas where Ground Water may be inadequate due to either quantity or quality.

2. Administration and delivery of the Tribal Water Right within the Blackfeet Irrigation Project shall be conducted by the United States Department of the Interior, Bureau of Indian Affairs (BIA), in accordance with applicable federal laws. In the event the Tribe assumes ownership of the Blackfeet Irrigation Project or the Tribe contracts the administration,

operation and maintenance, and/or other functions of the Blackfeet Irrigation Project under the Indian Self-Determination and Education Assistance Act, P.L. 93-638, or the Tribe establishes a separate entity that assumes ownership of the Blackfeet Irrigation Project or contracts the administration, operation and maintenance, and/or other functions of the Blackfeet Irrigation Project under P.L. 93-638, administration and delivery of the Tribal Water Right within the Blackfeet Irrigation Project shall be conducted by the Tribe in accordance with applicable federal laws.

3. After approval by the Secretary of the Tribe's amended water code, the Tribe shall have sole and exclusive jurisdiction to issue authorizations for Excepted Rights, provided that any filing for use of a portion of the Tribal Water Right for an Excepted Right made with the DNRC shall be made on a form provided by the Tribe and, including any fee submitted in conjunction with the filing, shall be promptly forwarded to the BWRD for processing pursuant to the Tribal water code.

D. Tribal Water Right: New Development or Change in Use.

1. Authorization. Except as specifically set forth in Article IV.D.3, and subject to the conditions set forth immediately below, the Tribe may make or authorize a New Development or Change in Use of the Tribal Water Right. Except as set forth in the tribal water code pursuant to Article IV.C.1.e, any New Development or Change in Use shall not Harm any Water Right Arising Under State Law for Non-irrigation Uses.

2. Lease.

a. The Tribe may make a Lease for use off the Reservation of the following portion of the Tribal Water Right that has been put to use and/or stored prior to the provision of notice to the DNRC, pursuant to Article IV.D.2.b, or the date of the application for Change in Use, as applicable:

i. Water developed by Direct Use from Birch Creek pursuant to Article III.C.1.c, the Badger Creek Drainage and/or Two Medicine River Drainage pursuant to Article III.D.1, and/or the St. Mary River Drainage pursuant to Article III.G.1;

ii. Water stored from the Badger Creek Drainage and/or Two Medicine River Drainage pursuant to Article III.D.1; from the Cut Bank Creek Drainage pursuant to Article III.E.1; from the Milk River Drainage pursuant to Article III.F.1; from the St. Mary River Drainage pursuant to Article III.G.1; and/or in Tiber Reservoir as allocated to the Tribe pursuant to Article III.H.1 or otherwise and federal law; and

iii. That portion of the Tribal Water Right quantified in Article III.C.1.b.i that the Tribe may use for purposes other than in-stream flow pursuant to the terms of that subsection.

b. The Tribe may make a Lease for use off the Reservation from the storage sources listed in Article IV.D.2.a.ii and from the source identified in Article IV.D.2.a.iii so long as it provides notice in advance to the DNRC of the terms of the Lease and any modifications thereto or termination thereof. For Leases from the sources identified in Article IV.D.2.a.ii lasting one irrigation season or less, notice to the DNRC shall be provided as far in advance as practicable. For Leases from the sources identified in Article IV.D.2.a.ii lasting longer then one year, notice shall be provided to the DNRC no later than the later of 120 days prior to the date on which the Lease is to take effect or March 31 of the year in which the Lease is to take effect. Provision of notice regarding Leases from the source identified in Article IV.D.2.a.iii shall be governed by the provisions of the Birch Creek Management Plan (Appendix 1). The point of delivery for a lease from the storage sources listed in Article IV.D.2.a.ii shall be the dam of the storage project. The point of delivery for leases from the source identified in Article IV.D.2.a.iii shall be the Reservation boundary. If disputes arise between or among holders of Water Rights Arising Under State Law as to the reasonable transmission and carriage losses from the point of delivery to the place of use of the Lease, the district court pursuant to its powers and duties under Title 85, Chapter 5, MCA, shall calculate such losses.

c. The Tribe may make a Lease for use off the Reservation from the sources listed in Article IV.D.2.a.i provided that either the Tribe or its assignee, on behalf of the Tribe, first complies with the following provisions of State law as those provisions read on October 31, 2007:

i. Subsections (1)-(3), (5)(a) (with the exception of that portion of subsection (5)(a) that requires the application of 85-2-402(4), which shall not apply) and of 85-2-402(8) through (17), MCA;

ii. Subsections (1) through (8) of 85-2-407, MCA, provided, however, that the term of any such Lease may be for up to 99 years, and the DNRC may approve the renewal of such a Lease for a period of up to 99 years; and

iii. 85-2-408, MCA. If the assignee is the party submitting the change application (pursuant to 85-2-402 and 85-2-407, MCA) on behalf of the Tribe, the assignee must first have obtained approval of the Lease from the Tribe pursuant to the Tribal Water Code.

d. In the event that, after the Effective Date of this Compact, the Montana legislature substantively amends or repeals any of the sections identified in Article IV.D.2.c, the Tribe and the DNRC shall meet no later than 60 days after the effective date of the State legislative action amending or repealing to determine whether the provisions set forth in Article IV.D.2.c or the new provisions of State law shall govern the process for off- Reservation Leases under this Compact. In the event that the Tribe and the DNRC are unable to agree, the provisions of Article IV.D.2.c shall remain in effect. Any modification to the provisions of Article IV.D.2.c agreed to by the Tribe and the DNRC in response to future State legislative action shall be pursuant to and not a modification or amendment to this Compact.

e. If the Tribe receives a good faith offer from a Person for Lease of a portion of the Tribal Water Right in Birch Creek pursuant to Article III.C.1.c to an off-Reservation point of diversion or place of use, or in the Badger Creek Drainage set forth in Article III.D.1 to an off-Reservation point of diversion or place of use, and if delivery facilities exist to otherwise allow the diversion of Badger Creek water into Birch Creek, the Tribe shall allow holders of Water Rights Arising Under State Law using water out of Birch Creek the first opportunity to acquire use of such rights on the same terms and conditions as the good faith offer.

f. If the Tribe receives a good faith offer from a Person for Lease of a portion of the Tribal Water Right in the Cut Bank Creek Drainage set forth in Article III.E.1 to an off-Reservation point of diversion or place of use, the Tribe shall allow holders of Water Rights Arising Under State Law using water from the Cut Bank Creek Drainage the first opportunity to acquire use of such rights on the same terms and conditions as the good faith offer.

g. If the Tribe receives a good faith offer from a Person for Lease of a portion of the Tribal Water Right in the Milk River Drainage set forth in Article III.F.1 to an off-Reservation point of diversion or place of use, the Tribe shall allow holders of Water Rights Arising Under State Law using water from the Milk River Drainage the first opportunity to acquire use of such rights on the same terms and conditions as the good faith offer.

h. If the Tribe receives a good faith offer from a Person for Lease of a portion of the Tribal Water Right in the St. Mary River set forth in Article III.G to an off-Reservation point of diversion or place of use, the Tribe shall allow water users receiving water from the Milk River Project the first opportunity, and other Milk River water users the second opportunity, to acquire use of such rights on the same terms and conditions as the good faith offer.

i. Except as may be provided by Congress, the off-Reservation use of any portion of the Tribal Water Right set forth in Article III.C.1.b, III.D.1, III.E.1 or III.F.1 is limited to a place of use within the Missouri River Basin.

j. No Lease of any portion of the Tribal Water Right may permanently alienate the water right.

k. The Tribe or any Person using diversion or transportation facilities located off the Reservation in connection with a use of the Tribal Water Right shall apply for and obtain all permits, certificates, variances and other authorizations required by State laws regulating, conditioning or permitting the siting, construction, operation, alteration or use of any equipment, device, facility or associated facility proposed to use or transport water, prior to exercising a use of the Tribal Water Right off the Reservation.

3. Special Rules for Changes in Use of the Birch Creek Water Right Set Forth in Article III.C.1.a.

a. Change in Place of Use. The Tribe may change or authorize a change in the place of use of the water right set forth in Article III.C.1.a only if:

i. the proposed change in place of use is to the Badger-Fisher Unit of the Blackfeet Irrigation Project, or to other areas of the Birch Creek Drainage served by water out of the Badger Creek Drainage; and

ii. there is a need for irrigation water beyond available supplies in those areas due to constraints imposed on the Badger-Fisher Unit by the physical availability of water other than as a result of Leases, a failure of delivery capabilities, or significant adverse environmental impacts of continued delivery of Badger Creek water due to degraded delivery systems or otherwise; and

iii. total annual diversions to the Badger-Fisher Unit pursuant to the water right set forth in Article III.C.1.a do not exceed the volume of water needed to supply 75% of the net irrigation requirement for a crop mix of 75% alfalfa and 25% small grains delivered at 50% efficiency for 6000 acres, and the flow rate of the right set forth in Article III.C.1.a for use in the Upper Birch Creek Drainage is reduced by the flow rate of water being diverted for use in the Badger-Fisher Unit.

b. Change in Purpose of Use. The Tribe may change or authorize a change in the purpose of use of the water right set forth in Article III.C.1.a up to a maximum of 6250 AFY. The relationship between the quantity and flow rate of water proposed for change and the quantity of water available for irrigation pursuant to the water right set forth in Article III.C.1 shall be determined by the following formula: The volume of water proposed to be changed will be divided by 50% to determine the diverted volume of the Tribal change. This diverted volume of the Tribal change is subtracted from the modeled average diversion volume (12,500 acre-feet) to determine the changed average diversion volume. The new irrigation diversion flow rate is established by dividing the changed average diversion volume by the modeled diversion volume and multiplying this quotient by the flow rate set forth in Article III.C.1.a (100 Cfs). Several example scenarios are shown in Appendix 4.

4. Development of the Tribe's St. Mary River Right Set Forth in Article III.G.1.a.i. As directed by Congress, and after appropriate investigation and study, the Parties shall identify and the United States shall provide the Tribe, from Available St. Mary River Water, and/or from any other source mutually agreed to by the Parties, sufficient water to fulfill the Tribe's water right set forth in Article III.G.1.a.i. The fulfillment of the Tribe's water right set forth in Article III.G.1.a.i, pursuant to this subsection, from any water subject to the Milk River Project Water Right may occur only in a manner that causes no injury to the Milk River Project and shall not require current or future Milk River Project water users or their contracting entity or entities to subsidize or pay for any costs required to develop or fulfill the water right set forth in Article III.G.1.a.i. The use of the Tribe's water right set forth in Article III.G.1.a.i, or of any portion of that right, shall commence only after the Parties have mutually agreed in writing that water has been identified and is available to fulfill that right or any portion of it consistent with the terms of this Compact.

E. Subsequent Federal or State Law. Administration under Article IV.C.2 and Article IV.F.1 shall be as set forth in this Compact except as may otherwise be determined by a court of competent jurisdiction or established by Congress.

F. Water Rights Arising Under State Law: Administration.

1. The State shall administer and enforce all Water Rights Arising Under State Law to the use of Natural Flows and Ground Water within and outside the Reservation. The State shall have the final and exclusive jurisdiction to resolve all disputes between holders of Water Rights Arising Under State Law.

2. The State shall not administer or enforce any part of the Tribal Water Right within the Reservation.

G. Water Rights Arising Under State Law: New Uses or Change in Use.

1. Limit on New Uses. DNRC shall not process or grant an application for an appropriation within those portions of the Basins closed pursuant to Article III.J received after the ratification of this Compact by the Montana legislature becomes effective, provided that, DNRC may process applications and issue certificates of water right or permits for use on fee land of those uses excepted from the closures as set forth in Article III.J until such time as the Secretary approves an amended tribal water code promulgated pursuant to the provisions of Article IV.C. After approval of the amended water code by the Secretary, filings for Excepted Rights shall be processed pursuant to the provisions of Article IV.C.3.

2. Change in Use of Water Rights Arising Under State Law within the Reservation. The State may authorize a Change in Use of a Water Right Arising Under State Law within the

Reservation in accordance with State law. DNRC shall provide timely notice to the Tribe of every application for change.

H. Cooperative Ground Water Management. BWRD may designate or modify a controlled Ground Water area within the Reservation pursuant to Article IV.C.1.f and applicable tribal law. DNRC may designate or modify a controlled Ground Water area adjacent to the Reservation pursuant to applicable State law. DNRC may manage a permanent or temporary controlled Ground Water area adjacent to the Reservation in cooperation with BWRD.

I. Information Sharing.

1. Within one year after a hydrologic basin subject to this Compact is finally decreed by the Montana Water Court, the DNRC shall provide the BWRD and the United States with a report listing all decreed Water Rights Arising Under State Law within that hydrologic basin.

2. Within one year after the date the ratification of this Compact by the Montana legislature becomes effective, the DNRC shall provide the BWRD and the United States with a report listing all uses pursuant to permits and water reservations, and those uses excepted from the permitting requirements of State law to the extent that the DNRC has such information.

3. Within one year after the ratification of this Compact by the Montana legislature becomes effective, the BWRD and the United States shall provide the DNRC with a report listing all Existing Uses of the Tribal Water Right, provided that, due to the small and varied nature of the traditional religious and cultural uses identified in Article III.A, such uses need not be included on the report required by this subsection. The Parties shall concur in the listing of all Existing Uses of the Tribal Water Right within six months after receipt of the report.

4. On an annual basis DNRC shall provide the Tribe and the United States with a listing of all Excepted Rights for which a certificate of water right or permit has been issued or a Change in Use has been approved by DNRC within the Reservation and in drainages affected by this Compact, and an ownership update for each water right within the Reservation and in drainages affected by this Compact whose owner of record has been changed in DNRC's database.

5. On an annual basis BWRD shall provide the DNRC and the United States with an update since the last report listing all New Development of the Tribal Water Right described in this Compact within and outside the Reservation, of all Changes in Use of water rights within and outside the Reservation, and of all appurtenant water rights acquired pursuant to Article III.H.2.

6. The BWRD, the DNRC, and the United States may agree to modify the reporting requirements set forth in Article IV.I. Such modification is pursuant to, and shall not be deemed a modification of, this Compact.

7. Any Party may request additional information from any other Party to assist in reviewing any report made by one Party to another.

J. Enforcement: Blackfeet-Montana Compact Board.

1. Establishment of Board. There is hereby established the Blackfeet-Montana Compact Board. The Board shall consist of three members: one member selected by the Governor of the State of Montana, after consultation with affected water users; one member appointed by the Chairman of the Blackfeet Tribal Business Council; and one member selected by the other two members. All members shall be appointed within six months of the Effective Date of this Compact and within thirty days of the date any vacancy occurs. If an appointment is not timely made by the Governor, the Director of DNRC or the Director's designee shall fill the State's position. If an appointment is not timely made by the Chairman of the Blackfeet Tribal Business Council, the Director of BWRD or the Director's designee shall fill the Tribe's position. Each member shall serve a five-year term and shall be eligible for reappointment. The initial term of each member shall be staggered with one member serving a five-year term, one a four-year term, and one a three-year term. The initial term of each member shall be chosen by lot. Expenses of the members appointed by the State and the Tribe shall be borne by the entity appointing the member. The expenses of the third member and all other expenses shall be borne equally by the Tribe and the State, subject to the availability of funds.

2. Membership. Should the two appointed members fail to agree on the selection of a third member within sixty days of the date of appointment of the second member, or within thirty days after any vacancy occurs, the following procedure shall be utilized:

a. Within five days thereafter each member shall nominate three persons to serve as a member of the Board;

b. Within fifteen days thereafter each member shall reject two of the persons nominated by the other member;

c. Within five days thereafter, the remaining two nominees shall be submitted to the chief judge of the United States District Court for the District of Montana for selection of the third member of the Board.

3. Quorum and Vote Required. Two members of the Board shall constitute a quorum if reasonable notice of the time, place, and purpose of the meeting, hearing, or other proceeding has been provided in advance to the absent member. All Board decisions shall be by a majority of the Board.

4. Jurisdiction of the Board.

a. The Blackfeet-Montana Compact Board shall have jurisdiction to resolve controversies over the right to the use of water as between the Parties or holders of water rights developed or authorized under the Tribal Water Right and holders of Water Rights Arising Under State Law. Such controversies shall include, but shall not be limited to, disputes as to the meaning of this Compact, disputes over the application and interpretation of the provisions of Article IV.D.3, disputes over the application and interpretation of the provisions of the Birch Creek Management Plan, and disputes between holders of Excepted Rights issued pursuant to Article IV.C.3 who are not enrolled members of the Tribe and other water right holders under either State or tribal law.

b. The jurisdiction of the Board shall not extend to the administration or distribution of water on lands served by the Milk River Project, nor to the diversion of water made outside the Reservation for Milk River Project use, nor to the administration or distribution of water on lands served by the Blackfeet Irrigation Project, nor to the administration or distribution of water on lands served by the Pondera County Canal and Reservoir Company.

5. Prerequisite Administrative Procedures.

a. Any Tribal Water Right holder concerned that a use of water by a holder of a Water Right Arising Under State Law is inconsistent with the Compact shall first contact the BWRD. If the BWRD and the DNRC are unable to resolve the issue in a manner acceptable to the Tribal Water Right holder within a reasonable time through discussion, the BWRD or the Tribal Water Right holder may seek relief through the Compact Board. The DNRC agrees to assist the BWRD in obtaining reasonable access onto the land of the holder of the Water Right Arising Under State Law to acquire information regarding the challenged use.

b. Any holder of a Water Right Arising Under State Law concerned that an exercise of the Tribal Water Right is inconsistent with the Compact shall first contact the DNRC. If the DNRC and the BWRD are unable to resolve the issue in a manner acceptable to the water right holder within a reasonable time through discussion, the DNRC or the water right holder may seek relief through the Compact Board. The Tribe agrees to allow the DNRC reasonable access onto Tribal land or to assist the DNRC in obtaining reasonable access onto the land of the Tribal Water Right holder to acquire information regarding the challenged exercise.

c. The BWRD and the DNRC may jointly develop supplemental procedures as necessary or appropriate after consultation with affected water right holders. Such supplemental procedures are pursuant to, and shall not be deemed a modification of, this Compact.

d. Any authorized user of a portion of the Tribal Water Right appealing a decision of the DNRC to the Compact Board may seek technical assistance from the BWRD in preparing and presenting the appeal.

e. Any holder of a Water Right Under State Law appealing a decision of the BWRD to the Compact Board may seek technical assistance from the DNRC in preparing and presenting the appeal.

6. Powers and Duties.

a. Hearings. The Board shall hold hearings upon notice in proceedings before it and shall have the power to administer oaths, take evidence and issue subpoenas to compel attendance of witnesses or production of documents or other evidence, and to appoint technical experts. The Tribe and the State shall enforce the Board's subpoenas in the same manner as prescribed by the laws of the Tribe and the State for enforcing a subpoena issued by the courts of each respective sovereign in a civil action. The Persons involved in the controversy may present evidence and cross examine any witnesses. The Board shall determine the controversy and grant any appropriate relief, including a temporary order; provided that, the Board shall have no power to award money damages, costs, or attorneys' fees. All decisions of the Board shall be in writing, and, together with a written justification for the decision and any dissenting opinions, shall be served personally or by certified mail on all Persons involved in the proceeding before the Board, the Tribe, the State and the United States. The Board shall adopt necessary rules and regulations to carry out its responsibilities within six months after its first meeting. All records of the Board shall be open to public inspection, except as otherwise ordered by the Board consistent with applicable federal, State and tribal law.

b. Appointment of Water Commissioner.

i. The Board shall have the authority to appoint one or more commissioners to provide day to day administration of water subject to this Compact, including the opening and closing of headgates. The Tribe and the State shall agree on a recommendation for each commissioner to be appointed by the Board. If the Tribe and the State fail to agree, each may nominate one individual for consideration for each commissioner position, and the Board shall select from between the nominees.

ii. Under the jurisdiction of the Board, the commissioners shall have the authority to administer and distribute water on the Reservation and from the off-reservation portions of the Reservation boundary streams (the mainstems of Birch Creek, Cut Bank Creek and the Two Medicine River), to water right holders under the Tribal Water Right and the holders of Water Rights Arising Under State Law according to the rights fixed by all applicable decrees and this Compact. The authority of any commissioners appointed pursuant to this Article IV.J.6.b, as it pertains to facilities owned by the United States, shall extend only to the provision of written orders to the federal representative with the authority to adjust diversions or releases, which the federal representative, or his or her designee, shall then promptly carry out, so long as the federal representative determines that execution of the order does not threaten the safety, security or physical integrity of the facility, and does not extend to the actual opening or closing of headgates. The authority of any commissioners appointed pursuant to this Article IV.J.6.b, as it pertains the use of the Milk River Project Water Right, shall extend only to the delivery of water to the diversion facilities of the Milk River Project on the Reservation and shall not extend to the administration, diversion or distribution of water to or from any facilities or lands served by the Milk River Project off the Reservation. The authority of any commissioners appointed pursuant to this Article IV.J.6.b, as it pertains to portions of the Tribal Water Right used within the Blackfeet Irrigation Project, extends only to the delivery of water to Blackfeet Irrigation Project diversion facilities and shall not extend to the administration of that water on lands served by the Blackfeet Irrigation Project, which shall remain subject to Article IV.C.2. The authority of any commissioners appointed pursuant to this Article IV.J.6.b, as it pertains to the use of the Water Rights Arising Under State Law of the Pondera County Canal and Reservoir Company (PCCRC), extends only to the delivery of water to PCCRC diversion facilities from Birch Creek and shall not extend to the administration of that water on lands served by PCCRC.

iii. The State and the Tribe shall share the costs of any water commissioners appointed by the Board.

7. Review and Enforcement of Board Decisions.

a. Decisions by the Board shall be effective immediately, unless stayed by the Board. Persons involved in the proceedings before the Board may appeal any final decision by the Board to a court of competent jurisdiction within thirty days of such decision. The hearing on appeal shall be a trial de novo. The notice of appeal shall be filed with the Board and served personally or by certified mail upon all Persons involved in the proceeding before the Board, the Tribe, the State and the United States.

b. Unless an appeal is filed within thirty days of a final decision of the Board, as provided in Article IV.J.7.a, any decision of the Board shall be recognized and enforced by any court of competent jurisdiction on petition of the Board, or any Person before the Board in the proceeding in which the decision was made.

c. A court of competent jurisdiction in which a timely appeal is filed pursuant to Article IV.J.7.a, or in which a petition to confirm or enforce is filed pursuant to Article IV.J.7.b, may order such temporary or permanent relief as it considers just and proper.

d. An appeal may be taken from any decision of the court in which a timely appeal is filed pursuant to Article IV.J.7.a, or in which a petition to confirm or enforce is filed pursuant to Article IV.J.7.b, in the manner and to the same extent as from orders or judgments of the court in a civil action.

e. In any appeal or petition to confirm or enforce the Board's decision, the Board shall file with the court the record of the proceedings before the Board within sixty days of filing of a notice of appeal.

8. Waiver of Immunity. The Tribe and the State hereby waive their respective immunities from suit, including any defense the State shall have under the Eleventh Amendment of the Constitution of the United States, in order to permit the resolution of disputes under this Compact by the Blackfeet-Montana Compact Board, and the appeal or judicial enforcement of Board decisions as provided herein, except that such waivers of sovereign immunity by the Tribe or the State shall not extend to any action for money damages, costs, or attorneys' fees. The Parties agree that only Congress can waive the immunity of the United States. The participation of the United States in the proceedings of the Compact Board shall be as provided by Congress.

K. Notice and Reporting. All notices and reports required by this Compact to be delivered to or served on a Party shall be sent to:

1. The Chairman of the Blackfeet Tribal Business Council, Browning, Montana;

2. The Director of DNRC, Helena, Montana; and

3. The Director of the Rocky Mountain Regional Office of the Bureau of Indian Affairs, Billings, Montana.

ARTICLE V - DISCLAIMERS AND RESERVATION OF RIGHTS

A. No Effect on Other Tribal Rights or Federal Reserved Water Rights.

1. Except as otherwise provided herein, the relationship between the Tribal Water Right described herein and any rights to water of any other Indian Tribe, or of any federally derived water right of an individual, or of the United States on behalf of such Tribe or individual shall be determined by the rule of priority.

2. Nothing in this Compact may be construed or interpreted as a precedent to establish the nature, extent, or manner of administration of the rights to water of any other Indian tribes, tribal members, or Indian owner of trust land of other Indian tribes outside of the Blackfeet Reservation.

3. Nothing in this Compact is otherwise intended to affect or abrogate a right or claim of an Indian Tribe other than the Blackfeet Tribe.

4. Except as provided herein and authorized by Congress, nothing in this Compact may be construed or interpreted in any manner to establish the nature, extent, or manner of administration of the rights to water of the United States on federal lands outside the Reservation.

B. General Disclaimers. Nothing in this Compact shall be so construed or interpreted:

1. As a precedent for the litigation of reserved water rights;

2. As a precedent for the interpretation or administration of future compacts between the United States and the State, or the United States and any other state;

3. Except as provided in Article III.J pertaining to basin closures, to preclude the acquisition or exercise of a Water Right Arising Under State Law to the use of water by any Allottee or member of the Tribe outside the Reservation by purchase of such right or by application to the State in accordance with State law;

4. To determine the relative rights inter sese of Persons using water under the authority of the State or the Tribe;

5. To limit in any way the rights of the Parties or any other Person to litigate any issues or questions not resolved by this Compact;

6. To authorize the taking of a water right that is vested under State or federal law;

7. To create or deny substantive rights through headings or captions used in this Compact;

8. To address or prejudge how, in any interstate or international apportionment, the Tribal Water Right shall be counted;

9. To constitute a waiver of sovereign immunity by the Tribe or State, except as is expressly set forth in this Compact;

10. To constitute a waiver of sovereign immunity by the United States except as expressly set forth in 43 U.S.C. 666 (1952) or as otherwise provided by Congress;

11. To prohibit the Tribe, its members, or Allottees, or the United States on behalf of the Tribe, its members, or Allottees, or the United States in any other capacity from objecting in any general stream adjudication in Montana Water Court to any claims to water rights;

12. To prevent the Tribe, its members or Allottees, or the United States on behalf of the Tribe, its members or Allottees, from filing an action in a court of competent jurisdiction to prevent any Person or Party from interfering with the Tribe in the enjoyment of the Tribal Water Right;

13. To affect or determine the applicability of any State or federal law, including, without limitation, environmental and public safety laws, on activities of the Tribe, its members, or Allottees, the State or holders of Water Rights Arising Under State law, or the United States;

14. To limit any existing, present or future claims of the Tribe, its members or Allottees, or the United States on behalf of the Tribe, its members or Allottees, concerning water quality;

15. To prevent the Montana Water Court from adjudicating any properly filed claims to the use of water within the Reservation;

16. Except as expressly provided herein and as required by Congress, to modify the obligation of any agency of the United States pursuant to federal law;

17. To limit the ability of the Tribe, the State, or the United States to enforce any tribal, State, or federal laws or any common law rights relating to the protection of the environment;

18. To prejudice any right that Tribal members may have to secure a portion of the Tribal Water Right from the Tribe;

19. To affect the right, if any, of the Tribe to establish, through a final court judgment or congressional act, that its aboriginal or treaty title to lands outside the Reservation, including but not limited to lands within Glacier National Park and the Lewis and Clark National Forest, has not been extinguished; and

20. To determine the rights, if any, of the Tribe on lands within Glacier National Park and the Lewis and Clark National Forest.

21. Nothing in this Compact shall be construed or interpreted to create any right, title or interest in federal lands off the Reservation.

C. Rights Reserved. The Parties expressly reserve all rights not granted, recognized or relinquished in this Compact.

D. Obligations of the United States Contingent.

1. Notwithstanding any other language in this Compact, except as authorized under other provisions of federal law, the obligations of the United States under this Compact shall be contingent on ratification and necessary authorization by Congress.

2. The expenditure or advance of any money or the performance of any work by the United States or the Tribe pursuant to this Compact which may require appropriation of money by Congress or allotment of funds is contingent on such appropriation or allotment being made.

3. The State and the Tribe recognize that this Compact has not been approved by the United States or any agency thereof and ratification by the Montana legislature or ratification by the Tribe in no manner binds or restricts the discretion of the United States in the negotiation of all related matters.

E. Obligations of the State Contingent. The expenditure or advance of any money or the performance of any work by the State pursuant to this Compact which may require appropriation of money by the Montana legislature or allotment of funds shall be contingent on such appropriation or allotment being made.

ARTICLE VI - CONTRIBUTIONS TO SETTLEMENT

A. State Contribution to Settlement. The Parties agree that the State contribution to settlement shall be negotiated by the State, the Tribe, and the United States as part of the negotiations on the federal legislation contemplated by Article VI.C. The agreement to, expenditure, or advance of any State contribution which may require authorization and appropriation of money by the Montana legislature or allotment of funds is contingent on such appropriation or allotment being made.

B. Federal Contribution to Settlement. The Parties agree that the federal contribution to settlement shall be negotiated by the Tribe, the State, and the United States as part of the negotiations on the Federal legislation.

C. Federal Legislation. The Tribe and the State agree to seek ratification of the Compact by Congress and any additional federal legislation necessary to effectuate the Compact.

ARTICLE VII - FINALITY

A. Ratification and Effectiveness of Compact.

1. Following the first ratification by any Party, the terms of this Compact may not be modified without the consent of the Parties.

2. Notwithstanding any other provision in this Compact, the Tribe reserves the right to withdraw as a Party if:

a. Congress has not ratified this Compact and authorized appropriations within four years from the date the ratification of the Compact by the Montana legislature becomes effective;

b. Appropriations are not made in the manner contemplated by the federal legislation ratifying this Compact;

c. The Parties do not reach agreement on the State contribution to settlement;

d. The State has not authorized appropriations within five years from the date the Compact is ratified by the United States; or

e. Appropriations are not made by the State in the manner contemplated by any agreement for contributions to settlement made pursuant to Article VI.A.

3. The Tribe may exercise its right to withdraw from the Compact under Article VII.A.2 by sending to the Governor of Montana and to the Secretary of the Interior by certified mail a resolution of the Blackfeet Tribal Business Council stating the Tribe's intent to withdraw and specifying a reason for withdrawal and a withdrawal date not sooner than one hundred and twenty days from the date of the resolution. On the date designated in the resolution for Tribal withdrawal, this Compact shall become null and void without further action by any Party, and the Parties agree to resume negotiation in good faith for quantification of the water rights of the Blackfeet Tribe and entry of a decree in a court of competent jurisdiction.

4. Notwithstanding any other provision in this Compact, the State reserves the right to withdraw as a Party to this Compact if:

a. the Tribe and Congress have not ratified this Compact within four years from the date the ratification of the Compact by the Montana legislature becomes effective;

b. Congress requires a State contribution to settlement that exceeds the contributions described in Article VI.A;

c. Congress does not authorize and appropriate the federal share of funding agreed to pursuant to Article VI.B; or

d. the DNRC does not concur in the list of Existing Uses of the Tribal Water Right pursuant to Article IV.I.2.

5. The State may exercise its right to withdraw by sending to the Chairman of the Blackfeet Tribal Business Council and to the Secretary of the Interior a letter delivered by certified mail from the Governor of the State of Montana stating the State's intent to withdraw and specifying a reason for withdrawal and a withdrawal date not sooner than one hundred and twenty days from the date of the letter. On the date designated in the letter for State withdrawal, this Compact shall become null and void without further action by any Party, and the Parties agree to resume negotiation in good faith for quantification of the water rights of the Blackfeet Tribe and entry of a decree in a court of competent jurisdiction.

6. Notwithstanding any other provision in this Compact, the Department of the Interior reserves the right to refuse to support federal legislation ratifying this Compact.

B. Incorporation into Decrees.

1. Within one hundred eighty days of the date this Compact is ratified by the Tribe, the State, and Congress, whichever is latest, the Tribe, the State, or the United States shall file, in the case In the Matter of the Adjudication of the Existing and Reserved Rights to the Use

of Water, Both Surface and Underground, of the Blackfeet Tribe of the Blackfeet Reservation within the State of Montana, Civ. No. WC-91-1, pursuant to the provisions of State law, a motion for entry of the proposed decree set forth in Appendix 5 as the decree of the water rights held by the United States in trust for the Blackfeet Tribe. If the Montana Water Court does not approve the proposed decree submitted with the motion within three years following the filing of the motion, the Compact shall be voidable by agreement of the State and the Tribe. If the Montana Water Court approves the proposed decree within three years, but the decree is subsequently set aside by the Montana Water Court or on appeal, the Compact shall be voidable by agreement of the State and the Tribe. Any effect of the failure of approval or setting aside of the decree on the approval, ratification, and confirmation by the United States shall be as provided by Congress. The Parties understand and agree that the submission of this Compact to a State court or courts, as provided for in this Compact, is solely to comply with the provisions of State law, and does not expand the jurisdiction of the State court or expand in any manner the waiver of sovereign immunity of the United States in the McCarran Amendment, 43 U.S.C. 666, or other provision of federal law.

2. Consistent with 3-7-224, MCA, setting forth the jurisdiction of the chief water judge, for the purposes of 85-2-702(3), MCA, the review by the Montana Water Court shall be limited to Article III, and Appendix 5 (proposed decree), and may extend to other sections of the Compact only to the extent that they relate to the determination of existing water rights. The final decree shall consist of Article III as displayed in Appendix 5, and such other information as may be required by 85-2-234, MCA. Nevertheless, pursuant to 85-2-702(3), MCA, the terms of the entire Compact must be included in the preliminary decree without alteration for the purpose of notice.

C. Disposition of Federal Suit.

1. On issuance of a final decree by the Montana Water Court or its successor, and the completion of any direct appeals therefrom, or on expiration of the time for filing any such appeal, the United States, the Tribe, and the State shall execute and file joint motions pursuant to Rule 41(a), Fed.R.Civ.P., to dismiss without prejudice the claims of the Tribe, Tribal members, and Allottees and any claims made by the United States for benefit of the Tribe, Tribal members, and Allottees in United States v. Aageson, No. CIV-79-21-GF (filed April 5, 1979). The case may only be resumed if the State or Tribe exercises their rights under Article VII.A.

2. The Decree shall be filed by the Parties as a consent decree in Aageson, or in federal court as a new proceeding after the dismissal of Aageson conditional on agreement by the Parties to seek the necessary State, Tribal, and federal legislation to implement the remaining provisions of the Compact, if it is finally determined in a judgment binding on the State of Montana that the State courts lack jurisdiction over, or that the State court proceedings are inadequate to adjudicate some or all of the water rights asserted in Aageson.

D. Settlement of Tribal Water Right Claims.

1. The water rights and other benefits confirmed to the Tribe in this Compact are in full and final satisfaction of and are intended to be in replacement of and substitution for all claims to water or to the use of water by the Tribe, Tribal members, and Allottees and the United States on behalf of the Tribe, Tribal members, and Allottees existing on the Effective Date of this Compact, including water rights claims based on or recognized in Conrad Inv. Co. v. United States, 161 F. 829 (9th Cir. 1908), within the Reservation.

2. In consideration of the rights confirmed to the Tribe, Tribal members, and Allottees in this Compact, and of performance by the State and the United States of all actions required by this Compact, and on entry of a final order issuing the decree of the Tribal Water Right held in trust by the United States as quantified in this Compact and displayed in Appendix 5, and except for water rights, benefits and uses confirmed in this Compact, the Tribe and the United States as trustee for the Tribe, Tribal members, and Allottees hereby waive, release, and relinquish any and all claims to water rights or to the use of water within the Reservation existing on the Effective Date of this Compact.

3. Any claim to water by the Tribe, its members or Allottees within the Reservation shall be satisfied out of the Tribal Water Right confirmed by this Compact, except for any Water Rights Arising Under State Law held by the Tribe, its members or Allottees as of the Effective Date of this Compact, which shall be satisfied pursuant to their own terms.

E. Settlement of Tribal Claims Against the United States. Waiver of claims against the United States, by the Tribe, its members and Allottees shall be as provided by Congress.

F. Binding Effect. After the Effective Date of this Compact and entry of a final decree, its terms shall be binding on:

1. The State and any Person using, claiming or in any manner asserting any right under the authority of the State to the use of water in Montana; provided that, the validity of consent, ratification, or authorization by the State is to be determined by Montana law;

2. The Tribe and any Person using, claiming or in any manner asserting any right to the use of the Tribal Water Right, or any right arising under any doctrine of reserved or aboriginal water rights for the Tribe or Tribal members, or any rights arising under tribal law; provided that, the validity of consent, ratification or authorization by the Tribe is to be determined by Tribal law; and

3. The United States and any Person using, claiming or in any manner asserting any right under the authority of the United States to the use of water in Montana; provided that, the validity of consent, ratification or authorization by the United States is to be determined by federal law.

ARTICLE VIII - LEGISLATION/DEFENSE OF COMPACT

A. State Legislation. The State and Tribe agree to seek ratification of the Compact by the Montana legislature and any additional State legislation necessary to effectuate the Compact.

B. Federal Legislation. The State and Tribe agree to seek ratification of the Compact by Congress and any additional federal legislation necessary to effectuate the Compact.

C. Tribal Legislation. The State and Tribe agree to seek ratification of the Compact by the Blackfeet Tribe and any Tribal legislation necessary to effectuate the Compact.

D. Defense of the Compact. The Parties agree to defend the Compact after its Effective Date from all challenges and attacks and in all proceedings pursuant to Article VII.B and C, and agree that no provision of the Compact shall be modified as to substance except as may be provided in the Compact, or by agreement among the Parties.

History: En. Sec. 1, Ch. 204, L. 2009.

85-20-1502 reserved.

85-20-1503. Definitions. As used in 85-20-1503 through 85-20-1506, the following definitions apply:

(1) "Blackfeet Tribe" means the Blackfeet Tribe of the Blackfeet Indian reservation of Montana; and

(2) "Department" means the department of natural resources and conservation provided for in Title 2, chapter 15, part 33.

History: En. Sec. 1, Ch. 489, L. 2007.

85-20-1504. Blackfeet Tribe water rights compact mitigation account — use. (1) There is an account within the state special revenue fund called the Blackfeet Tribe water rights compact mitigation account. The department shall administer the account. All interest and other income earned on money in the account must be deposited in the account.

(2) The Blackfeet Tribe water rights compact mitigation account may be used only for:

(a) expenditures for grants to or matching funds for federal or other grants to water right holders under state law for water from Birch Creek, Badger Creek, Cut Bank Creek, the Two Medicine River, and the portion of the Milk River within the exterior boundaries of the Blackfeet Indian reservation for projects approved by the department to enhance water availability or otherwise mitigate the economic and hydrologic impacts on water right holders under state law caused by the development of the Blackfeet Tribe's water rights under a water rights compact pursuant to 85-2-702 quantifying the water rights of the Blackfeet Tribe; and

(b) implementation of the water rights compact among the Blackfeet Tribe, the state, and the United States and any associated agreements as may be specified in the compact or agreements.

(3) (a) At least $4.5 million of this account must be dedicated to mitigate impacts on water right holders under state law for use of water out of Birch Creek.

(b) The amount of $14 million in this account must be used to mitigate impacts of development of the tribal water right on water users as provided for in a February 13, 2009, amendment to an agreement between the Blackfeet Tribe of the Blackfeet Indian reservation and the state of Montana regarding Birch Creek water use entered into January 31, 2008.

(c) The amount of $10 million in this account must be held in escrow. The department shall negotiate the terms of an escrow agreement.

(4) Funds from this account may not be disbursed unless a water rights compact among the Blackfeet Tribe, the state, and the United States has been finally ratified by the legislature, the Congress of the United States, and the Blackfeet Tribe.

(5) Money in the Blackfeet Tribe water rights compact mitigation account is statutorily appropriated, as provided in 17-7-502, to the department of natural resources and conservation.

History: En. Sec. 2, Ch. 489, L. 2007; amd. Sec. 2, Ch. 57, L. 2011; amd. Sec. 1, Ch. 209, L. 2017; amd. Sec. 1, Ch. 623, L. 2023.

85-20-1505. Blackfeet Tribe water rights compact infrastructure account — use. (1) There is an account within the state special revenue fund called the Blackfeet Tribe water rights compact infrastructure account. The department shall administer the account.

(2) The Blackfeet Tribe water rights compact infrastructure account may be used only for water-related infrastructure projects within the exterior boundaries of the Blackfeet Indian reservation.

(3) Funds from this account may not be disbursed unless a water rights compact among the Blackfeet Tribe, the state, and the United States has been finally ratified by the legislature, the Congress of the United States, and the Blackfeet Tribe.

(4) All interest and other income earned on money in the account must be deposited in the account.

(5) All proceeds of the bonds authorized in 85-20-1511 must be deposited in a bond proceeds subaccount established in the Blackfeet Tribe water rights compact infrastructure account.

(6) Subject to subsection (3), money in the Blackfeet Tribe water rights compact infrastructure account, including the proceeds of the bonds authorized in 85-20-1511 deposited in the bond proceeds subaccount, is statutorily appropriated, as provided in 17-7-502, to the department of natural resources and conservation for the purpose of funding the state's portion of the cost of the Four Horns Project as provided for in the agreement between the Blackfeet Tribe of the Blackfeet Indian reservation and the state of Montana regarding Birch Creek water use, dated January 31, 2008, as may be amended.

History: En. Sec. 3, Ch. 489, L. 2007; amd. Sec. 2, Ch. 204, L. 2009; amd. Sec. 3, Ch. 147, L. 2011.

85-20-1506. Administrative rules. (1) The department shall adopt reasonable rules for implementing and administering 85-20-1503 through 85-20-1505.

(2) In proposing rules, the department shall:

(a) consult with affected stakeholders, including the Pondera County conservation district and the Glacier County conservation district; and

(b) give priority to mitigating impacts on water right holders under state law who use water out of Birch Creek.

History: En. Sec. 4, Ch. 489, L. 2007.

85-20-1507 through 85-20-1510 reserved.

85-20-1511. Authorization of bonds — condition. (1) Subject to subsection (3) and upon request of the director of the department of natural resources and conservation, the board of examiners may issue and sell general obligation bonds in a principal amount not exceeding $16.15 million, of which $16 million is to pay the state's costs for water-related infrastructure projects within the exterior boundaries of the Blackfeet Indian reservation as provided for in 85-20-1505 and no more than $150,000 is to pay bond issuance costs.

(2) (a) Except as provided in subsection (2)(b), the proceeds from the bonds authorized under this section must be deposited in a bond proceeds subaccount created in the Blackfeet Tribe water rights compact infrastructure account provided for in 85-20-1505.

(b) The proceeds to pay bond issuance costs must be deposited into a state special revenue account.

(3) The bonds must be sold and issued pursuant to the provisions of Title 17, chapter 5, part 8.

(4) The bonds may not be issued or sold unless a water rights compact among the Blackfeet Tribe, the state, and the United States has been finally ratified by the Blackfeet Tribe, the legislature, and the Congress of the United States.

History: En. Sec. 1, Ch. 147, L. 2011.

Part 16

United States of America, Fish and Wildlife Service, National Bison Range-Montana Compact

85-20-1601. United States of America, fish and wildlife service, national bison range-Montana compact ratified. This Compact is entered into by the State of Montana and the United States of America to settle for all time any and all claims to federal reserved water rights for the National Bison Range administered by the U.S. Fish and Wildlife Service within the State of Montana.

ARTICLE I - RECITALS

WHEREAS, in 1979, the United States brought several actions in the United States District Court for the District of Montana to adjudicate, inter alia, its rights to water with respect to the National Bison Range, see United States v. Abell, No. CV 79-33-M (filed April 5, 1979);

WHEREAS, Congress consented to state court jurisdiction over the quantification of claims to water rights held by the United States of America; see "the McCarran Amendment," 43 U.S.C. 666(a)(1) (1952);

WHEREAS, the State of Montana in 1979 pursuant to Title 85, Chapter 2 of the Montana Code Annotated (MCA), commenced a general adjudication of the rights to use water within the State of Montana, including all federal reserved and appropriative water rights;

WHEREAS, the Montana Reserved Water Rights Compact Commission, pursuant to 85-2-703, MCA, is authorized to negotiate settlement of water rights claims filed by the United States for areas in which the United States claims reserved waters within the State of Montana;

WHEREAS, the United States wishes to quantify and have decreed the amount of water necessary to fulfill the purposes of the National Bison Range, in the State of Montana;

WHEREAS, the United States Attorney General, or a duly designated official of the United States Department of Justice, has authority to execute this Compact on behalf of the United States pursuant to the authority to settle litigation contained in 28 U.S.C. 516-517 and 519 (1968);

WHEREAS, the Secretary of the Interior, or a duly designated official of the United States Department of the Interior, has authority to execute this Compact on behalf of the United States Department of the Interior pursuant to 43 U.S.C. § 1457 (1986, Supp 1992), inter alia; and

WHEREAS, it is in the best interest of all Parties that the water rights claims for the National Bison Range be settled through agreement between the State of Montana and the United States;

NOW THEREFORE, the Parties agree to enter into this Compact for the purpose of settling the water rights claims of the United States for the National Bison Range.

ARTICLE II - DEFINITIONS

For purposes of this Compact only, the following definitions shall apply:

(1) "Abstract" means the copy of the documents entitled "Abstract of U.S. Fish and Wildlife Service Water Rights" referenced in this Compact as Appendices 3, 4, 5 and 6.

(2) "Acre-foot" or "Acre-feet" or "AF" means the amount of water necessary to cover one acre to a depth of one foot and is equivalent to 43,560 cubic feet of water.

(3) "Acre-foot per year" or "Acre-feet per year" or "AFY" means an annual quantity of water measured in acre-feet over a period of a year.

(4) "Animal Unit" means a measure of animal numbers, where one male bison equals 1.5 Animal Units, one female bison equals 0.9 Animal Units, one elk equals 0.75 Animal Units, and one mule deer, whitetail deer, bighorn sheep, or antelope equals 0.2 Animal Units.

(5) "Arising Under State Law" means, as applied to a water right, a water right created under Montana law and does not include water rights created under federal law.

(6) "Change in Use" means, as applied to the National Bison Range water right, a change in the point of diversion, the place of use, the purpose of use, or the place of storage.

(7) "Consumptive Use" means a use of water that removes water from the source of supply such that the quality or quantity is reduced or the timing of return delayed, making it unusable or unavailable for use by others, and includes evaporative loss from impoundments and natural lakes.

(8) "Department" means the Montana Department of Natural Resources and Conservation, or any successor agency.

(9) "Effective Date" means the date on which the Compact is given ratification by the Montana Legislature, written approval by the United States Department of the Interior, or written approval by the United States Department of Justice, whichever date is latest.

(10) "FWS" means the United States Fish and Wildlife Service of the United States Department of the Interior, or any successor agency.

(11) "Ground Water" means any water that is beneath the surface of the ground.

(12) "National Bison Range" means those lands located in the State of Montana that were withdrawn from disposition and reserved by the Act of May 23, 1908, 35 Stat. 267; and that were expanded by the Agricultural Appropriations Bill of 1910 (35 Stat. 1051 - Act of March 4, 1909). The lands that comprise the National Bison Range are depicted on the map attached as Appendix 1 to this Compact.

(13) "Nonconsumptive Use" means the use of a water right considered to be nonconsumptive by the decree, permit, or law authorizing the use because it results in no depletion of water from the source.

(14) "Party" or "Parties" means the State of Montana, the United States of America or both.

(15) "Person" or "Persons" means an individual or individuals or any other entity, public or private, including the State, a tribe and the United States and all officers, agents, and departments thereof.

(16) "State" means the State of Montana and all officers, agents, departments, and political subdivisions thereof, and unless otherwise indicated, for purposes of notification or consent "State" means the Director of the Department, or the Director's designee.

(17) "Tribal Water Right" means those water rights held by the Confederated Salish and Kootenai Tribes (the "Tribes" or "CSKT") or by the United States in trust for the Tribes, their members and allottees.

(18) "United States" means the federal government and all officers, agencies, and departments thereof, and unless otherwise indicated, for purposes of notification or consent other than service in litigation "United States" means the Secretary of the Department of the Interior, or the Secretary's designee.

ARTICLE III - NATIONAL BISON RANGE WATER RIGHT

The Parties agree that the following water rights are in settlement of the reserved water rights of the United States for the National Bison Range.

A. Purpose of Reservation for the National Bison Range. The National Bison Range was created on May 23, 1908 for the purpose of being a permanent range for the care and maintenance of a herd of bison and other mammals. 35 Stat. 267, 35 Stat. 1051. An executive order of December 22, 1921, (No. 3596) added the purpose of a bird refuge to the National Bison Range as well.

B. Quantification. Subject to the terms of Article IV, the United States shall have the right to water for the following purposes from the sources identified on National Bison Range lands.

1. Wildlife Use.

a. Consumptive Use. The United States has federal reserved water rights for Consumptive Use for wildlife purposes at the locations identified in the table attached as Appendix 2, provided that the total Consumptive Use for wildlife purposes on National Bison Range lands shall not exceed the amount of water needed to feed and water the historic maximum carrying capacity of the National Bison Range of 755 Animal Units. The specific elements of these rights are set forth in the Abstracts attached as Appendix 3 to this Compact.

b. Nonconsumptive Use. The United States also has federal reserved water rights in the amount of 18.48 Acre-feet per year for largely Nonconsumptive Uses to fill the Ravalli Potholes, when the water is naturally available, and an in-stream flow in the amount of 177 gallons per minute from Mission, Pauline, Trisky and Elk Creeks, when such flows are naturally available. The specific elements of these rights are set forth in the Abstracts attached as Appendix 4 to this Compact.

2. Administrative Uses.

a. Current Administrative Uses. The United States has federal reserved rights for Consumptive Use for current administrative uses on National Bison Range lands totaling 35.2 Acre-feet per year. The United States also has a federal reserved water right of up to 536 Acre-feet per year of flood flows from Mission Creek for largely Nonconsumptive Uses for administrative purposes, when such flows are naturally available. The specific elements of these rights are set forth in the Abstracts attached as Appendix 5 to this Compact.

b. Future Administrative Uses. The United States has federal reserved water rights from Ground Water for Consumptive Use for future administrative uses up to a total additional volume of 15 Acre-feet per year to fulfill the purposes of the National Bison Range. The types of use of the United States' federal reserved water rights for administrative uses may include, but are not limited to: domestic, lawn and garden, storage, and dust abatement.

3. Emergency Fire Suppression. The use of water for emergency fire suppression benefits the public, and is necessary for the purposes of the National Bison Range. The United States may, as part of its reserved water right, divert or withdraw water for fire suppression on National Bison Range lands as needed and without a definition of the specific elements of a recordable water right. Use of water for fire suppression shall not be considered an exercise of the United States' water rights for Consumptive Use.

4. Period of Use. The period of use of the United States' federal reserved water rights quantified in the Compact shall be from January 1 to December 31 of each year.

5. Priority Date. The priority date for the federal reserved water rights set forth in this Compact is May 23, 1908.

ARTICLE IV - IMPLEMENTATION OF COMPACT

A. Abstracts. Concurrent with this Compact, the Parties have prepared Abstracts, copies of which are attached as Appendices 3, 4, and 5 to this Compact, which specifically identify all of the United States' use of water for the National Bison Range described in this Compact and quantified in accordance with this Compact. These abstracts specifically do not include that use of water that is the subject of water right claim number 76L 187042 00, which claim the FWS and the State agree that the FWS shall retain (unless it shall choose voluntarily to withdraw or abandon it in the future) and have adjudicated by the Montana Water Court as a water right Arising Under State Law subject to the terms, conditions and procedures of the Montana Water Use Act, Title 85, Chapter 2, MCA, and the Montana general water rights adjudication. The Parties prepared the Abstracts to comply with the requirements for a final decree as set forth in state law, and in an effort to assist the state courts in the process of entering decrees accurately and comprehensively reflecting the rights described in this Compact. The rights specified in the Abstracts are subject to the terms and conditions of this Compact. In the event of a discrepancy between a right listed in an Abstract and that same right as quantified in accordance with Articles III and IV of this Compact, the Parties intend that the quantification in accordance with Articles III and IV of this Compact shall be reflected in a final decree.

B. Enforcement of Water Right.

1. The United States, the State, a holder of a water right Arising Under State Law or a holder of a right to use any portion of the Tribal Water Right, may petition a state or federal court of competent jurisdiction for relief when a controversy arises between the United States' water rights described by this Compact, and a holder of a water right Arising Under State Law or a holder of a right to use any portion of a Tribal Water Right. Resolution of the controversy shall be governed by the terms of this Compact where applicable, or to the extent not applicable, by applicable state, federal and tribal law.

2. The United States agrees that a water commissioner appointed by a state or federal court of competent jurisdiction, or other official authorized by law, may enter the National Bison

Range for the purpose of data collection, including the collection of information necessary for water distribution on or off the National Bison Range, and to inspect structures for the diversion and measurement of water described in this Compact for Consumptive Use. The terms of entry shall be as specified in an order of a court of competent jurisdiction or other entity authorized by law to prescribe such terms of entry.

3. So long as the Department remains the administrative entity responsible for the water rights quantified in this Compact, the Department may enter the National Bison Range at a reasonable hour of the day, for the purposes of data collection on water diversion and stream flow or inspection of devices maintained by the United States pursuant to this Compact. The Department shall notify the United States by certified mail, telephone, e-mail or in person, at least 24 hours prior to entry. If some other body becomes responsible for the administration of the National Bison Range water rights, representatives of that entity may enter the National Bison Range on the same terms and conditions set forth above in this subsection.

4. So long as the Department remains the administrative entity responsible for the water rights quantified in this Compact, the United States may request an investigation by the Department of a diversion located on a stream for which a water right is described in this Compact. The Department may investigate. If an investigation occurs, the United States may accompany the Department. If some other body becomes responsible for the administration of the National Bison Range water rights, the United States may request an investigation by that entity in the same manner and on the same terms and conditions set forth above in this subsection.

5. The United States shall maintain structures, including wellhead equipment and casing, for the diversion of water authorized for Consumptive Use by this Compact. The United States shall maintain any devices it deems necessary for enforcement of its water right for natural flow described in this Compact.

C. Use of Federal Reserved Water Rights.

1. Federal Reserved Water Rights. The reserved rights of the United States described in this agreement are federal water rights. Nonuse of all or a part of the federal reserved water rights described in this Compact shall not constitute abandonment or forfeiture of those rights. The federal reserved water rights described in this Compact need not be applied to a use deemed beneficial under state law, but shall be restricted to uses necessary to fulfill the purposes of the National Bison Range.

2. Development of Future Uses. The United States, without prior approval of the Department, or any other administrative entity with regulatory authority over the water rights of the National Bison Range, may develop a future use after the Effective Date of this Compact as described in Article III.B.2.(b), provided that:

(a) the purpose of use is for the use authorized under Article III.B.2.(a);
(b) the total quantity of water shall not exceed the amount set forth in Article III.B.2.;
(c) the source of supply shall be restricted as set forth in Article III; and
(d) the use shall not adversely affect a senior water right Arising Under State Law.

D. Change in Use of Federal Reserved Water Rights.

1. Nonconsumptive Uses. Water rights specified in this Compact for natural flow or other Nonconsumptive Uses shall not be subject to Change in Use, provided that the emergency use of water for fire suppression as provided for in Article III.B.3 shall not be deemed a Change in Use or violation of a water right for natural flow.

2. Consumptive Uses. The United States may make a Change in Use of its Consumptive Use water rights described in Article III of this Compact provided that:

(a) the Change in Use shall be in fulfillment of the purposes of the National Bison Range;
(b) the total Consumptive Use shall not exceed the amount described in this Compact;
(c) the Change in Use shall not adversely affect any water right Arising Under State Law; and
(d) with the exception of the provisions governing a change in the purpose for which the water right is used, the United States, in making the change, shall comply with the provisions of the Montana Water Use Act, Title 85, chapter 2, MCA, applicable to change in appropriation rights at the time of the change.

3. Emergency Fire Suppression. The United States' federal reserved water right to divert or withdraw water for emergency fire suppression as described in Article III.B.3 shall not be changed to any other use.

E. Reporting Requirements. The United States shall provide a report to the Department and the Tribes on an annual basis, or on a periodic basis agreed to by the Parties and the Tribes, containing specific information on:

1. the development of new uses as described in Article III.B.2.(b);
2. changes in use as described in Article IV.D; and
3. the source of supply, the dates of use, and the estimated amount of water used for emergency fire suppression as described in Article III.B.3.

ARTICLE V - GENERAL PROVISIONS

A. No Effect on Tribal Rights or Other Federal Reserved Water Rights. The relationship between the water rights of the United States described in this Compact and any rights to water of any Indian tribe, or any federally derived water right of an individual, or of the United States on behalf of such tribe or individual, shall be determined by the rule of priority. The Parties agree that the water rights described in this Compact are junior to any rights to water of any Indian tribe, or any federally derived water right of an individual, or of the United States on behalf of such tribe or individual, currently quantified or as may be quantified after the Effective Date of this Compact and with a priority date before the Effective Date of this Compact, including aboriginal rights, if any, in the basins affected.

2. Nothing in the Compact may be construed or interpreted as a precedent to establish the nature, extent, or manner of administration of the rights to water of any other federal agency or federal lands in Montana other than those of the FWS at the National Bison Range.

3. Nothing in this Compact may be construed or interpreted in any manner to establish the nature, extent or manner of administration of the water rights of any Indian tribe or tribal member.

4. Nothing in this Compact is otherwise intended to conflict with or abrogate a right or claim of any Indian tribe regarding its boundaries or property interests in the State of Montana.

B. State Water Rights. Nothing in this Compact may limit the authority of the State, including the authority of a water commissioner authorized by state law, to administer all current and future water rights Arising Under State Law within and upstream of the National Bison Range, provided that in administration of those water rights in which the United States has an interest, such authority is limited to that granted under federal law, and provided that any scheme of comprehensive administration of all water rights located within the exterior boundaries of the Flathead Indian Reservation (which include the water rights recognized in this Compact) that is negotiated and approved in a water rights settlement among the State, the CSKT and the United States shall supersede any administrative provisions in this Compact the conflict with a State-CSKT water rights settlement.

C. General Disclaimers. Nothing in this Compact may be construed or interpreted:

1. as a precedent for the litigation of reserved water rights or the interpretation or administration of future compacts between the United States and the State, or the United States and any other state;
2. as a waiver by the United States of its right under state law to raise objections in state court to individual water rights claimed pursuant to the Montana Water Use Act, Title 85, MCA, in the basins affected by this Compact; or any right to raise objections in an appropriate forum to individual water rights subject to a provisional permit under the Montana Water Use Act, Title 85, MCA, in the basins affected by this Compact;
3. as a waiver by the United States of its right to seek relief from a conflicting water use not entitled to protection under the terms of this Compact;
4. to determine the relative rights inter sese of Persons using water under the authority of state or tribal law, or to limit the rights of the Parties or any other Person to litigate any issues or questions not resolved by this Compact;
5. to authorize the taking of a water right that is vested under state or federal law;
6. to create or deny substantive rights through headings or captions used in this Compact;

7. to expand or restrict any waiver of sovereign immunity existing pursuant to federal law as of the Effective Date of this Compact;

8. to affect or determine the applicability of any state or federal law, including, without limitation, environmental and public safety laws, on activities of the FWS;

9. to affect the right of the State to seek fees or reimbursement for costs or the right of the United States to contest the imposition of such fees or costs, pursuant to a ruling by a State or federal court of competent jurisdiction or Act of Congress;

10. to affect in any manner the entitlement to or quantification of other federal water rights. This Compact is only binding on the United States with regard to the water rights of the United States for the National Bison Range, and does not affect the water rights of any other federal agency that is not a successor in interest to the water rights subject to this Compact;

11. to prevent the United States from constructing or modifying an outlet to an impoundment at the National Bison Range in compliance with all applicable laws;

12. to prevent the United States from seeking a permit to appropriate water under applicable State or other law.

D. Reservation of Rights. The Parties expressly reserve all rights not granted, described or relinquished in this Compact.

E. Severability. The provisions of this Compact are not severable.

F. Multiple Originals. This Compact is executed in triplicate. Each of the three Compacts bearing original signatures shall be deemed an original.

G. Notice. Unless otherwise specifically provided for in this Compact, service of notice required hereunder, except service in litigation, shall be:

1. State: Upon the Director of the Department and such other officials as the Director may designate in writing; and

United States: Upon the Secretary of the Interior and such other officials as the Secretary may designate in writing.

CSKT: Upon the Tribal Chairman of the CSKT and such other officials as the Chairman may designate in writing.

ARTICLE VI - FINALITY

Binding Effect.

1. The Effective Date of this Compact is the date of the ratification of this Compact by the Montana legislature, written approval by the United States Department of the Interior, or written approval by the United States Department of Justice, whichever occurs later. Once effective, all of the provisions of this Compact shall be binding on the Parties.

2. Following the Effective Date, this Compact shall not be modified without the consent of both Parties. Either Party may seek enforcement of this Compact in a court of competent jurisdiction.

3. On approval of this Compact by a state or federal court of competent jurisdiction and entry of a decree by such court confirming the rights described herein, this Compact and such rights are binding on all Persons bound by the final order of the court.

4. If an objection to this Compact is sustained pursuant to 85-2-703, MCA, and 85-2-702(3), MCA, this Compact shall be voidable by action of and without prejudice to either Party.

B. Filing Compact with State Court. Subject to the following stipulations and within one hundred eighty (180) days of the Effective Date of this Compact, the Parties shall submit this Compact to an appropriate state court or courts having jurisdiction over this matter in an action commenced pursuant to 43 U.S.C. 666, for approval in accordance with state law and for the incorporation of the water rights described in this Compact into a decree or decrees entered therein. The Parties understand and agree that the submission of this Compact to a state court or courts, as provided for in this Compact, is solely to comply with the provisions of 85-2-702(3), MCA, and does not expand the jurisdiction of the state court or expand in any manner the waiver of sovereign immunity of the United States in the McCarran Amendment, 43 U.S.C. 666, or other provision of federal law.

C. Dismissal of Filed Claims. At the time the state courts approve the water rights described in this Compact and enter a decree or decrees confirming the rights described herein, such courts shall dismiss, with prejudice, all water right claims specified in Appendix 6 of this

Compact for the National Bison Range. If this Compact is not approved or a federal reserved water right described herein is not confirmed, any corresponding state law-based claim filed by the FWS for use on the National Bison Range shall not be dismissed.

D. Settlement of Claims. The Parties intend that the water rights described in this Compact are in full and final settlement of the federal reserved water right claims for the National Bison Range described in this Compact and administered by the FWS on the Effective Date of this Compact. On the Effective Date of this Compact, the United States hereby and in full settlement of any and all claims to federal reserved water rights by the United States, including all claims that the FWS filed or could have filed as part of the ongoing statewide adjudication process, relinquishes forever all claims to federal reserved water rights within the State of Montana for the National Bison Range. The State agrees to recognize the water rights described and quantified herein and shall, except as expressly provided for herein, treat them in the same manner as a water right recognized by the State. Nothing in this Compact precludes the FWS from filing for future water use permits under Montana state law.

E. Continuation of Negotiations. The Parties have not finalized agreement on quantification of the water rights for the Charles M. Russell and UL Bend National Wildlife Refuges and UL Bend Wilderness Area, prior to the Effective Date of this Compact. The Parties agree to continue to pursue, in good faith, negotiations toward compacts for the quantification of water rights for these areas. In the event the Parties are unable to agree on quantification, the United States retains its right to have the quantity of any reserved water right for these areas adjudicated in a state or federal court of competent jurisdiction.

F. Defense of Compact. The Parties agree to defend the provisions and purposes of this Compact from all challenges and attacks.

IN WITNESS WHEREOF the representatives of the State of Montana and the United States have signed this Compact on the ____ day of ________, 2009.

History: En. Sec. 1, Ch. 280, L. 2009.

Part 17
United States of America, Fish and Wildlife Service, Charles M. Russell National Wildlife Refuge-Montana Compact

85-20-1701. United States of America, fish and wildlife service, Charles M. Russell national wildlife refuge-Montana compact ratified. This compact is entered into by the State of Montana and the United States of America to settle for all time any and all claims to federal reserved water rights for the Charles M. Russell National Wildlife Refuge administered by the U.S. Fish and Wildlife Service within the State of Montana.

ARTICLE I
RECITALS

WHEREAS, the State of Montana, in 1979 pursuant to Title 85, Chapter 2 of the Montana Code Annotated, commenced a general adjudication of the rights to the use of water within the State of Montana including all federal reserved and appropriative water rights;

WHEREAS, 85-2-228, MCA, provides that a federal reserved water right with a priority date of July 1, 1973, or later be subject to the same process and adjudication as a federal reserved water right with a priority date before July 1, 1973;

WHEREAS, 85-2-703 and 85-2-228(3), MCA, provide that the Montana Reserved Water Rights Compact Commission may negotiate settlement of claims by the federal government to non-Indian reserved waters within the State of Montana;

WHEREAS, the United States wishes to quantify and have decreed the amount of water necessary to fulfill the purposes of the Charles M. Russell National Wildlife Refuge as articulated in Executive Order 7509 of December 11, 1936;

WHEREAS, the Attorney General, or a duly designated official of the United States Department of Justice, has authority to execute this compact on behalf of the United States pursuant to the authority to settle litigation contained in 28 U.S.C. 516-517 (1968);

WHEREAS, the Secretary of the Interior, or a duly designated official of the United States Department of the Interior, has authority to execute this compact on behalf of the United States Department of Interior pursuant to 43 U.S.C. 1457 (1986, Supp. 1992);

NOW THEREFORE, the State of Montana and the United States agree as follows:

ARTICLE II
DEFINITIONS

For purposes of this compact only, the following definitions shall apply:

(1) "Abstract" means copies of the documents collectively entitled "Abstracts of U.S. Fish and Wildlife Service Water Rights for the Charles M. Russell National Wildlife Refuge" referenced in this compact as Appendices 1-3.

(2) "Acre-foot" or "Acre-feet" or "AF" means the amount of water necessary to cover one acre to a depth of one foot and is equivalent to 43,560 cubic feet of water.

(3) "Charles M. Russell National Wildlife Refuge" means the federal reservation of land that was designated under the Act of June 25, 1910, ch. 421, 36 Stat. 847, as amended by the Act of August 24, 1912, ch. 369, 37 Stat. 497.

(4) "Coextensive" means equal or coincident in space, time or scope. As applied to this compact, "Coextensive" rights to instream flow are non-additive water rights that constitute a usufructuary interest held by two or more parties with each party being subject to the same limits on quantity of water regardless of whether one or both parties are exercising the right.

(5) "Department" means the Montana Department of Natural Resources and Conservation or its successor.

(6) "Effective Date" means the date on which the compact is given ratification by the Montana Legislature, written approval by the United States Department of the Interior, and written approval by the United States Department of Justice, whichever occurs later.

(7) "Groundwater" means any water that is beneath the ground surface.

(8) "Instream Flow" means the water that the Parties agree must remain in the stream for non-consumptive uses to protect and maintain water flow and Wildlife Habitat throughout the Refuge for the purposes of the federal reservation.

(9) "Non-Consumptive Use" means a beneficial use of water that does not cause a reduction in the source of supply or result in a reduction in the quantity or quality of water and in which substantially all of the water returns without delay to the source of supply, causing little or no disruption in stream conditions.

(10) "Order" means Executive Order 7509, withdrawing from the public domain the Fort Peck Game Range, signed December 11, 1936.

(11) "Parties" means the State of Montana and the United States.

(12) "Recognized Under State Law" when referring to a water right or use means a water right or use protected by state law, but does not include state recognition of a federal or tribal reserved water right arising under federal law.

(13) "Refuge" means the Charles M. Russell National Wildlife Refuge.

(14) "Reserved Right" means collectively the United States' water rights for stock, wildlife, and Wildlife Habitat within Refuge as described herein.

(15) "Restricted Reach" means the portion of stream reach subject to the on-stream impoundment limitation described in Articles III.E. and IV.C. and depicted in Appendix 5 of this compact.

(16) "Stacked" means a series of impoundments on the same stream placed in proximity to one another such that water impounded by a down-stream dam reaches an elevation less than or equal to five feet below the elevation of the base of the embankment of the next upstream dam.

(17) "State" means the State of Montana and all officers, agents, departments, and political subdivisions thereof. Unless otherwise indicated, "state" means the Director of the Montana Department of Natural Resources and Conservation or the Director's designee.

(18) "United States" means the federal government and all officers, agencies, departments, and political subdivisions thereof. Unless otherwise indicated, for purposes of notification or consent other than service in litigation, "United States" means the Secretary of the Department of the Interior or the Secretary's designee.

(19) "Wildlife Habitat" means a combination of food, water, shelter, and space that sustains wildlife and includes, but is not limited to, riparian areas and the stream flows that sustain them. This definition may not be construed to increase the quantity of the water rights set forth in Article III of this compact.

ARTICLE III
WATER RIGHT

The Parties agree that the following water rights are in settlement of the reserved water rights claims of the United States for the Refuge. All water rights described in this Article are subject to Article IV of this compact as well as any specific additional conditions set forth below.

A. Priority date. The Reserved Right for stock, wildlife, and Wildlife Habitat uses within the Refuge described herein has a priority date of December 11, 1936. The United States agrees to subordinate its 1936 Reserved Right to water rights Recognized Under State Law existing on the Effective Date of this compact. Accordingly, any water right Recognized Under State Law with a priority date prior to the Effective Date of this compact is functionally senior in priority to any component of the Reserved Right and is not subject to a call for enforcement or administration by the United States in the exercise of the Reserved Right. The final decree for the United States' Reserved Right must include the above prohibition on call.

B. Quantified instream rights. The United States holds water rights in the following named streams from the point furthest upstream where the Refuge boundary crosses the mainstem stream channel to its confluence with Fort Peck Lake or the Missouri River. The water right is in the amount of one (1) or one-half (1/2) cubic feet per second (cfs) for instream use for the purposes of stock, wildlife, and Wildlife Habitat as set forth in Table 1 and the Abstracts attached to this compact as Appendix 1, and as depicted in Appendix 4. The period of use is from March 1 to June 30. The United States may exercise its quantified instream rights during the period of use provided by this Compact if water is available.

*The downstream end of the quantified reaches of Telegraph Creek and Valentine Creek end at their confluence with Fourchette Creek.

C. Instream Flow right on Musselshell River. The United States holds a water right in the Musselshell River from the point furthest upstream where the mainstem river channel enters U.S. Fish and Wildlife Service owned land within the Refuge (near the SESE of section 11, T.18N, R.29E) to its confluence with Fort Peck Lake as described in the Abstract attached to this compact as Appendix 2. The water right is in the amount of a minimum instream flow of seventy (70) cfs. The water right is for the purposes of stock, wildlife, and Wildlife Habitat and must be Coextensive with any other non-consumptive instream uses during the specified period of use. The period of use for this right is from March 1 to June 30.

D. Wells, ponds, and springs. Water rights for wells, developed springs, and ponds will be recognized and quantified as set forth in the Abstracts attached to this compact as Appendix 3.

E. Conditions to be applied to permits issued after the Effective Date of the Compact. On the Restricted Reaches set forth in Table 2 and depicted in Appendix 5, no new on-stream impoundments may be constructed after the Effective Date of this Compact, except as provided by Article IV.C.

ARTICLE IV
COMPACT IMPLEMENTATION

A. Quantified reaches. Flows of designated quantified reaches set forth in Table 1 and Appendix 1 that are not already appropriated as of the Effective Date of this compact will be available for future development, subject to the Reserved Right and applicable permit conditions described herein. The Department may approve new uses after the Effective Date of this compact, but the Department shall condition any permit or approval of new uses to provide that such uses may not cause the quantified reaches to fall below the minimum flows set forth in Table 1 and Appendix 1 during the time period from March 1 to June 30. Appropriations occurring after the Effective Date of this compact will be subject to call by the United States in the exercise of the Reserved Right at any time streamflows are available but fall below the levels set forth in Table 1 and Appendix 1 of this compact, as measured where each quantified stream enters Fort Peck Lake or the Missouri River, or at the closest upstream confluence for those streams that intersect another stream before reaching Fort Peck Lake or the Missouri River, with a proper device for measurement of the waters flowing in the quantified reach.

B. Musselshell River. Musselshell River flows that are not already appropriated as of the Effective Date of this compact will be available for future development subject to the Reserved

Right and applicable permit conditions described herein. The Department may approve new uses after the Effective Date of this compact but shall condition any permit or approval of new uses to provide that such uses may not cause the flow of the Musselshell River to fall below seventy (70) cfs where the mainstem river channel enters U.S. Fish and Wildlife Service owned land within the Refuge during the period from March 1 to June 30. Appropriations occurring after the Effective Date of this compact will be subject to a call by the United States in the exercise of the Reserved Right at any time streamflow falls below 70 cfs for five (5) consecutive days.

C. Conditions to be applied to permits issued after the Effective Date of the compact. Impoundments of less than the capacity and appropriation limits excepted from permitting under 85-2-306, MCA, may be constructed on the stream reaches identified in Table 2 and Appendix 5. These impoundments may not be Stacked to achieve a volume greater than the statutory exception. The Department may permit no new on-stream impoundments that do not meet the permit exception requirements of 85-2-306, MCA, on the Restricted Reaches identified in Table 2 and Appendix 5.

1. Reclamation, repair, or rehabilitation of an existing impoundment may not be considered a new impoundment, except that reclamation, repair, or rehabilitation cannot cause the impoundment to exceed the storage volume listed on the statement of claim.

2. Off-stream impoundments larger than the capacity and appropriation limits excepted from permitting by 85-2-306, MCA, may be constructed and filled in accordance with state permitting requirements from a diversion works located on the stream reaches identified in Table 2 and Appendix 5; and

3. On-stream impoundments larger than the capacity and appropriation limits excepted from permitting by 85-2-306, MCA, may be constructed and filled in accordance with state permitting requirements on the streams identified in Table 2 and Appendix 5 upstream of the designated Restricted Reach.

D. Uses exempted from curtailment by the United States' exercise of the Reserved Right during times of shortage. During times when there is insufficient water to satisfy the Reserved Right, and curtailment of junior water rights is otherwise contemplated under Article III, the following water rights will not be subject to call or curtailment for the benefit of the Reserved Right:

1. Non-Consumptive Uses located upstream of the instream reaches identified in Table I and Appendix 1.

2. Groundwater uses of thirty-five (35) gallons per minute (gpm) or less not to exceed ten (10) AF per year.

3. Stockwater impoundments of less than fifteen (15) AF capacity and total appropriation less than thirty (30) AF per year.

4. Temporary emergency appropriations under 85-2-113(3), MCA.

5. An application submitted pursuant to 85-20-1401, MCA, Article VI.

6. An application for a permit to appropriate surface water to conduct response actions related to natural resource restoration required for:

a. Remedial actions pursuant to the federal Comprehensive Environmental Response, Compensation, and Liability Act of 1980, 42 U.S.C. 9601, et seq.;

b. Aquatic resource activities carried out in compliance with and as required by the federal Clean Water Act of 1977, 33 U.S.C. 1251-1387; or

c. Remedial actions taken pursuant to Title 75, chapter 10, part 7.

E. Action for enforcement of provisions of Article III. The United States may file an original action in a court of competent jurisdiction to enforce the provisions of Article III at any time. The United States cannot be required to exhaust any administrative remedies in order to enforce Article III of this compact.

ARTICLE V
GENERAL PROVISIONS

A. The Parties recognize that the U.S. Fish and Wildlife Service has an interest in maintaining water flow and wildlife habitat throughout the Refuge.

B. No effect on tribal rights or other federal reserved water rights.

1. The relationship between the water rights of the U.S. Fish and Wildlife Service described herein and any rights to water of an Indian Tribe in Montana, or of any federally derived water right of an individual, or of the United States on behalf of a Tribe or individual shall be determined by the rule of priority.

2. Nothing in this compact may be construed or interpreted in any manner to establish the nature, extent, or manner of administration of the rights to water of any Indian Tribes and Tribal members in the State of Montana.

3. Nothing in this compact is otherwise intended to conflict with or abrogate a right or claim of an Indian Tribe regarding boundaries or property interests in the State of Montana.

4. Nothing in this compact may be construed or interpreted in any manner to establish the nature, extent, or manner of administration of the rights to water of any other federal agency or federal lands in the State of Montana other than those of the U.S. Fish and Wildlife Service for the Charles M. Russell National Wildlife Refuge.

C. General Disclaimers. Nothing in this Compact may be construed or interpreted:

1. As a precedent for the litigation of reserved water rights or the interpretation or administration of existing or future compacts between the United States and the State; or of the United States and any other state;

2. As a waiver by the United States of its right under state law to raise objections in state court to individual water rights claimed pursuant to the state Water Use Act, Title 85, of the Montana Code Annotated, in the basins affected by this compact, or, except as provided in this compact, any right to raise objections in an appropriate forum to individual water rights subject to a provisional permit under the state Water Use Act, Title 85, of the Montana Code Annotated, in the basins affected by this compact;

3. As a waiver by the United States of its right to seek relief from a conflicting water use not entitled to protection under the terms of this compact;

4. To establish a precedent for other agreements between the State and the United States or an Indian tribe;

5. To determine the relative rights, inter se, of persons using water under the authority of state law or to limit the rights of the parties or a person to litigate an issue not resolved by this compact;

6. To authorize the taking of a water right that is vested under state or federal law;

7. To create or deny substantive rights through headings or captions used in this compact;

8. To expand or restrict any waiver of sovereign immunity existing pursuant to federal law as of the Effective Date of this compact;

9. To affect or determine the applicability of any state or federal law, including, without limitation, environmental and public safety laws, on activities of the U.S. Fish and Wildlife Service;

10. To affect the right of the State to seek fees or reimbursement for costs or the right of the United States to contest the imposition of fees or costs, pursuant to a ruling by a state or federal court of competent jurisdiction or an act of Congress;

11. To affect, in any manner, the entitlement to or quantification of other federal water rights. This compact is binding on the United States solely in regard to the water rights of the United States for the Charles M. Russell National Wildlife Refuge, and this compact does not affect the water rights of any other federal agency that is not a successor in interest to the water rights subject to this compact.

D. Use of water right. Non-use of all or a part of the Reserved Right may not constitute abandonment of the right. The Reserved Right need not be applied to a use deemed beneficial under state law, but must be restricted to uses necessary to fulfill the purposes outlined in the Order.

E. Coextensive with other non-consumptive instream water uses. The Reserved Right for Instream Flows for the Refuge described in this compact must be Coextensive with any other non-consumptive instream water uses, and may not be cumulative to other instream uses.

F. Appropriation pursuant to State law. Nothing in this compact may prevent the United States from seeking a water appropriation pursuant to state law for use on the reserved land within the Refuge or for use outside the boundaries of the federal reservation for which a water right is described in this compact. A water right obtained in this manner shall be Recognized Under State Law and must be administered pursuant to state law.

G. Reservation of rights. The Parties expressly reserve all rights not granted, described, or relinquished in this compact.

H. Severability. The provisions of this compact are not severable.

I. Multiple originals. This compact is executed in quintuplicate. Each of the five (5) compacts bearing original signatures must be deemed an original.

J. Notice. Unless otherwise specifically provided for in this compact, service of notice, except service in litigation, must be:

1. State. Upon the Director of the Department or its successor agency, and such other officials as the Director may designate in writing.

2. United States. Upon the Secretary of the Interior and such other officials as the Secretary may designate in writing.

ARTICLE VI
FINALITY OF COMPACT

A. Binding effect.

1. The Effective Date of this Compact is the date of the ratification of this compact by the Montana legislature, written approval by the United States Department of the Interior, and written approval by the United States Department of Justice. Once effective, all of the provisions of this compact shall be binding on:

a. The State and a person or entity of any nature whatsoever using, claiming or in any manner asserting a right under the authority of the State to the use of water; and

b. Except as otherwise provided in Article V, Section B, the United States, a person or entity of any nature whatsoever using, claiming, or in any manner asserting a right under the authority of the United States to the use of water.

2. Following the Effective Date, this compact may not be modified without the written consent of the Parties. Any attempt to unilaterally modify this compact by either Party shall render this compact voidable at the election of the other Party.

B. Settlement of claims. The Parties intend that the Reserved Right described in this compact is in full and final settlement of the reserved water right claims of the United States for the Charles M. Russell National Wildlife Refuge. Pursuant to this settlement, by which certain federal reserved water rights are expressly recognized by the State in this compact, the United States hereby and in full settlement of any and all claims filed by the United States or which could have been filed by the United States for the Refuge relinquishes forever all said claims on the Effective Date of this compact to water within the State of Montana for federal reserved water rights for the above mentioned unit. The State agrees to recognize the Reserved Right described and quantified herein, and shall, except as expressly provided for herein, treat them in the same manner as any other appropriation.

C. The parties agree to defend the provisions and purposes of this compact from all challenges and attacks.

IN WITNESS WHEREOF the representatives of the State of Montana and the United States have signed this Compact on the 11th day of May, 2015.

History: En. Sec. 1, Ch. 227, L. 2013.

Part 18
United States of America, Bureau of Land Management, Upper Missouri River Breaks National Monument-Montana Compact

85-20-1801. United States of America, Bureau of Land Management, Upper Missouri River Breaks National Monument-Montana compact ratified. This Compact is entered into by the state of Montana and the United States of America to settle for all time any and all claims to federal reserved water rights for the Upper Missouri River Breaks National Monument administered by the U.S. Bureau of Land Management within the state of Montana.

ARTICLE I
RECITALS

WHEREAS, the State of Montana, in 1979 pursuant to Title 85, chapter 2, of the Montana Code Annotated, commenced a general adjudication of the rights to the use of water within the State of Montana including all federal reserved and appropriative water rights;

WHEREAS, 85-2-228, MCA, provides that a federal reserved water right with a priority date of July 1, 1973, or later be subject to the same process and adjudication as a federal reserved water right with a priority date before July 1, 1973;

WHEREAS, 85-2-703 and 85-2-228(3), MCA, provide that the State may negotiate settlement of claims by the federal government to non-Indian reserved waters within the State of Montana;

WHEREAS, the United States wishes to quantify and have decreed the amount of water necessary to fulfill the purposes of the Upper Missouri River Breaks National Monument as articulated in the Proclamation of January 17, 2001;

WHEREAS, the Attorney General, or a duly designated official of the United States Department of Justice, has authority to execute this Compact on behalf of the United States pursuant to the authority to settle litigation contained in 28 U.S.C. 516-517 (1968);

WHEREAS, the Secretary of the Interior, or a duly designated official of the United States Department of the Interior, has authority to execute this Compact on behalf of the United States Department of Interior pursuant to 43 U.S.C. 1457 (1986, Supp. 1992);

NOW THEREFORE, the State of Montana and the United States agree as follows:

ARTICLE II
DEFINITIONS

For Purposes of this Compact only, the following definitions shall apply:

(1) "Abstract" means copies of the documents entitled "Abstract of U.S. Bureau of Land Management Water Right for the Judith River" and "Abstract of U.S. Bureau of Land Management Water Right for Arrow Creek," referenced in this Compact as Appendices 1 and 2.

(2) "Acre-foot" or "Acre-feet" or "AF" means the amount of water necessary to cover one acre to a depth of one foot and is equivalent to 43,560 cubic feet of water.

(3) "Arrow Creek Basin" means the watershed of Arrow Creek designated as Montana Water Court Basin 41R.

(4) "BLM" means the United States Department of Interior, Bureau of Land Management or its successor.

(5) "Concurrent" means occurring or existing simultaneously or side by side. As applied to this compact, "Concurrent" rights to instream flow are non-additive water rights that constitute a usufructuary interest held by two or more parties in the same volume of water.

(6) "Department" means the Montana Department of Natural Resources and Conservation or its successor.

(7) "Effective Date" means the date on which the Compact is given ratification by the Montana Legislature, written approval by the United States Department of the Interior, and written approval by the United States Department of Justice, whichever occurs later.

(8) "Groundwater" means any water that is beneath the ground surface.

(9) "Instream Flow" means the water that the parties agree shall remain in the stream in satisfaction of the United States' reserved water right for the purposes of the federal reservation.

(10) "Judith River Basin" means the watershed of the Judith River designated as Montana Water Court Basin 41S.

(11) "Monument" means the "Upper Missouri River Breaks National Monument" as defined herein.

(12) "Non-Consumptive Use" means a beneficial use of water that does not cause a reduction in the source of supply or result in a reduction in the quantity or quality of water and in which substantially all of the water returns without delay to the source of supply, causing little or no disruption in stream conditions.

(13) "Parties" means the State of Montana and the United States.

(14) "Proclamation" means Presidential Proclamation 7398 of January 17, 2001, designating the Upper Missouri River Breaks National Monument.

(15) "Proportionally Enforceable Stream Flow" means, as applied to the Arrow Creek water right described herein, a rate of flow that when measured at a point upstream of the designated enforcement point described in Article III.B.2, shall be equivalent to an instream flow right of five (5) cfs measured at the designated enforcement point.

(16) "Ramped Diversion" means a condition on new diversions that allows for an increase in diversion of up to twenty (20) cubic feet per second (cfs) per day to prevent sudden drops in the natural recession rate of the river hydrograph.

(17) "Recognized Under State Law" when referring to a water right or use means a water right or use protected by state law, but does not include state recognition of a federal or tribal reserved water right arising under federal law.

(18) "Reserved Water Right" means collectively the federal reserved water rights to quantified instream flows in the Judith River and Arrow Creek as described herein.

(19) "State" means the state of Montana and all officers, agents, departments, and political subdivisions thereof. Unless otherwise indicated, "state" means the Director of the Montana Department of Natural Resources and Conservation or the Director's designee.

(20) "Upper Missouri River Breaks National Monument" means the federal reservation of land that was designated under the Antiquities Act of 1906, 16 U.S.C. 431-433 (1906, Supp. ____) by Presidential Proclamation 7398.

(21) "United States" means the federal Government and all officers, agencies, departments, and political subdivisions thereof. Unless otherwise indicated, for purposes of notification or consent other than service in litigation, "United States" means the Secretary of the Department of the Interior or the Secretary's Designee.

ARTICLE III
WATER RIGHT

The Parties agree that the following water rights are in settlement of the reserved water rights claims of the United States for the Monument. All water rights described in this Article are subject to Article IV of this Compact as well as any specific additional conditions set forth below.

A. Priority Date. The United States' water rights for instream flow purposes within the Upper Missouri River Breaks National Monument that are described herein have a priority date of January 17, 2001. The United States' January 17, 2001, water rights are subordinate in priority to water rights Recognized Under State Law existing on June 1, 2012. Accordingly, any water right Recognized Under State Law with a priority date before June 1, 2012, is not subject to call by the United States in the exercise of the Reserved Water Right.

B. Instream Flow. The United States has water rights for minimum instream flows in the Judith River and Arrow Creek as follows:

1. The Judith River. From the point furthest upstream where the Monument boundary crosses the mainstem river channel on the southern boundary of the NW 1/4 SE 1/4 of section 2, T.21N., R.16E., MPM, to the confluence with the Missouri River. The water right is in the amount of an instream flow rate of one hundred and sixty (160) cubic feet per second (cfs), to be measured at the United States Geological Survey (USGS) Gaging Station #06114700 near the confluence of the Judith River with the Missouri River. The period of use for this right is from January 1 to December 31.

2. Arrow Creek. From the point furthest upstream where the Monument Boundary crosses the mainstem creek channel on the western boundary of the SW 1/4 of section 6, T.20N., R.15E., MPM, to the confluence with the Missouri River. The water right is in the amount of an instream flow rate of five (5) cfs enforceable at the point immediately upstream of the confluence of Arrow Creek and Flat Creek in the SE 1/4 NE 1/4 of section 6, T.22N., R15E., MPM (the designated enforcement point). The period of use for this right is from March 1 to July 31.

i. Provision for Alternate Enforcement Location. The parties recognize that measurement at the confluence of Arrow Creek and Flat Creek may be difficult to administer and that measurement at an upstream point may be more feasible. The enforceable level of the flow rate shall be adjusted to an amount proportional to the 5 cfs if measurement is conducted at an upstream measurement point rather than at the designated enforcement point described above. The Proportionally Enforceable Stream Flow shall be determined jointly by the BLM and the Department, after additional stream flow monitoring is conducted by the BLM to provide the Parties sufficient data to make a determination. Prior to implementing a Proportionally Enforceable Stream Flow, the Parties shall: (1) provide notice to water users in the affected basin of the proposed revision to the enforceable amount; (2) hold at least one meeting in Stanford, Montana, preceded by such notice as may be required under State law for public meetings, at which the Parties shall explain the proposed revision; and (3) provide a reasonable period for receipt of any written public comment concerning the proposed revision. Any future revision of the designated enforcement point and implementation of a Proportionally Enforceable Stream Flow as provided in this section shall be based solely on stream flow monitoring considerations and shall be subject to the same conditions as provided above. Such future revision shall not be considered a modification of this Compact or an enlargement or diminution of the 5 cfs instream flow right in Arrow Creek.

C. Stream Reaches on which new mainstem impoundments will be prohibited after the Effective Date of the Compact.

1. The Judith River. From the confluence of the Middle and South Forks of the Judith River downstream to its confluence with the Missouri River.

2. Arrow Creek. From its confluence with Hay Creek downstream to its confluence with the Missouri River.

D. Conditions to be applied to permits issued after the Effective Date of the Compact.

1. Direct from source diversions from the Judith River or Arrow Creek that have a diversion capacity greater than 20 cfs shall be operated as a Ramped Diversion. The permit conditions shall require such diversions to be implemented incrementally with an increase of no more than 20 cfs in any 24-hour period.

ARTICLE IV
COMPACT IMPLEMENTATION

A. Judith River. Judith River flows that are not already appropriated as of the Effective Date of this Compact will be available for future development, subject to the Reserved Water Right and applicable permit conditions as described herein. The Department may approve new uses after the Effective Date of this Compact, but the Department shall condition any permit or approval of new uses to provide that such uses may not cause the flow of the Judith River to fall below one hundred and sixty (160) cfs from January 1 through December 31 at the United States Geological Survey gaging station #06114700 on the lower Judith River near the mouth of the Judith River near Winifred, Montana; and, if required, with the diversion restrictions described under Article III.C. Appropriations occurring after June 1, 2012, shall be subject to a call by the United States in the exercise of the Reserved Water Right at any time streamflow falls below the minimum instream flow requirement for five (5) consecutive days.

B. Arrow Creek. Arrow Creek flows that are not already appropriated as of the Effective Date of this Compact will be available for future development subject to the Reserved Water Right and applicable permit conditions as described herein. The Department may approve new uses after the Effective Date of this Compact but shall condition any permit or approval of new uses to provide that such uses may not cause the flow of Arrow Creek to fall below five (5) cfs if measured at the confluence of Arrow Creek and Flat Creek at the designated enforcement point described in Article III.B.2 above—or if measured at an alternate enforcement location as described in Article III.B.2.i above, a Proportionally Enforceable Stream Flow amount as described therein—from March 1 through July 31; and, if required, with the diversion restrictions described under Article III.C. New appropriations occurring after June 1, 2012, shall be subject to a call by the United States in the exercise of the Reserved Water Right at any time stream flow falls below the minimum instream flow requirement as measured at the designated enforcement point as described in Article III.B.2 above, or at an alternate enforcement point provided for in Article III.B.2.i.

C. Conditions to be applied to permits issued after the Effective Date of the Compact.

1. Direct from source diversions from the Judith River or Arrow Creek that have a diversion capacity greater than twenty (20) cfs shall be operated as a Ramped Diversion. The permit conditions shall require that diversions be implemented incrementally with an increase of no more than 20 cfs in any 24-hour period.

D. Uses exempted from curtailment by the United States' exercise of the Reserved Water Right during times of shortage. During times when there is insufficient water to satisfy the Reserved Water Right, and curtailment of junior water rights is otherwise contemplated under Articles III.A and B, the following water rights shall not be subject to call or curtailment for the benefit of the Reserved Water Right:

1. Non-Consumptive Uses located upstream of the instream flow reaches identified in Article III.

2. Groundwater Uses developed pursuant to 85-2-306, MCA. Water permits/certificates under the provisions of 85-2-306, MCA, shall not be subject to call by the Reserved Water Right. Should the Montana Legislature amend the requirements of this section to a more restrictive standard than that in effect under this subsection on the Effective Date of this Compact (35 gallons per minute or less and not to exceed 10 acre-feet per year), the more restrictive standard shall apply to appropriations permitted after the effective date of the amending legislation when determining whether the right is subject to curtailment by the United States in the exercise of the Reserved Right.

3. Stockwater impoundments of less than 15 acre-feet capacity and total appropriation less than 30 acre-feet per year.

a. Stockwater impoundments of less than 15 acre-feet capacity and a total appropriation of less than 30 acre-feet per year that are not diverted from a perennial flowing stream and that are constructed on and will be accessible to a parcel of land that is owned or under control of the applicant and that is 40 surface acres or larger shall not be subject to call by the Reserved Water Right.

4. Temporary Emergency Appropriations under 85-2-113(3), MCA.

5. An Application submitted pursuant to 85-20-1401, MCA, Article VI.

6. An application for a permit to appropriate surface water to conduct response actions related to natural resource restoration required for:

a. Remedial actions pursuant to the federal Comprehensive Environmental Response, Compensation, and Liability Act of 1980, 42 U.S.C. 9601, et seq.;

b. Aquatic resource activities carried out in compliance with and as required by the federal Clean Water Act of 1977, 33 U.S.C. 1251 through 1387; or

c. Remedial actions taken pursuant to Title 75, chapter 10, part 7, of the Montana Code Annotated.

E. Prohibition on Future Mainstem Impoundment. DNRC may permit no new impoundments that do not meet the permit exception requirements of 85-2-306, MCA, on the mainstem of the Judith River or Arrow Creek as described in Article III.C. Reclamation, repair, or rehabilitation of an existing impoundment shall not be considered a new impoundment, provided that reclamation, repair, or rehabilitation shall not cause the impoundment to exceed the storage volume listed on the statement of claim.

F. Action for enforcement of Provisions of Article III. The United States may file an original action in a court of competent jurisdiction to enforce the provisions of Article III at any time. The United States shall not be required to exhaust any available administrative remedies in order to enforce Article III of this Compact.

ARTICLE V
GENERAL PROVISIONS

A. No Effect on Tribal Rights or Other Federal Reserved Water Rights.

1. The relationship between the water rights of the Bureau of Land Management described herein and any rights to water of an Indian Tribe in Montana, or of any federally derived water right of an individual, or of the United States on behalf of such Tribe or individual shall be determined by the rule of priority.

2. Nothing in this Compact may be construed or interpreted in any manner to establish the nature, extent, or manner of administration of the rights to water of any Indian Tribes and Tribal members in Montana.

3. Nothing in this Compact is otherwise intended to conflict with or abrogate a right or claim of an Indian Tribe regarding boundaries or property interests in the State of Montana.

4. Nothing in this Compact may be construed or interpreted in any manner to establish the nature, extent, or manner of administration of the rights to water of any other federal agency or federal lands in Montana other than those of the Bureau of Land Management for the Upper Missouri River Breaks National Monument.

B. General Disclaimers. Nothing in this Compact may be construed or interpreted:

1. As a precedent for the litigation of reserved water rights or the interpretation or administration of existing or future compacts between the United States and the State; or of the United States and any other state;

2. As a waiver by the United States of its right under state law to raise objections in state court to individual water rights claimed pursuant to the state Water Use Act, Title 85, of the Montana Code Annotated, in the basins affected by this Compact, or, except as provided in this Compact, any right to raise objections in an appropriate forum to individual water rights subject to a provisional permit under the State Water Use Act, Title 85, of the Montana Code Annotated, in the basins affected by this Compact;

3. As a waiver by the United States of its right to seek relief from a conflicting water use not entitled to protection under the terms of this Compact;

4. To establish a precedent for other agreements between the State and the United States or an Indian tribe;

5. To determine the relative rights, inter sese, of persons using water under the authority of state law or to limit the rights of the parties or a person to litigate an issue not resolved by this Compact;

6. To create or deny substantive rights through headings or captions used in this Compact;

7. To expand or restrict any waiver of sovereign immunity existing pursuant to federal law as of the Effective Date of this Compact;

8. To affect the right of the State to seek fees or reimbursement for costs or the right of the United States to contest the imposition of such fees or costs, pursuant to a ruling by a state or federal court of competent jurisdiction or an Act of Congress;

9. To affect, in any manner, the entitlement to or quantification of other federal water rights. This Compact is binding on the United States solely in regard to the water rights of the United States for the Upper Missouri River Breaks National Monument, and this Compact does not affect the water rights of any other federal agency that is not a successor in interest to the water rights subject to this Compact.

C. Use of Water Right. Non-use of all or a part of the Reserved Right shall not constitute abandonment of the right. The Reserved Right need not be applied to a use deemed beneficial under state law, but shall be restricted to uses necessary to fulfill the purposes outlined in the Proclamation.

D. Concurrent with other Non-Consumptive Instream Water Uses. The federal reserved water right for instream flows for the Upper Missouri River Breaks National Monument described in this Compact shall run concurrently with any other non-consumptive instream water rights, and shall not be additive to such non-consumptive instream rights.

E. Appropriation Pursuant to State Law. Nothing in this Compact may prevent the United States from seeking a water appropriation pursuant to State law for use on the reserved land within the Upper Missouri River Breaks National Monument or for use outside the boundaries of the federal reservation for which a water right is described in this Compact, provided that a water right obtained in this manner shall be Recognized Under State Law and shall be administered pursuant to State law.

F. Reservation of Rights. The parties expressly reserve all rights not granted, described, or relinquished in this Compact.

G. Severability. The provisions of this Compact are not severable.

H. Multiple Originals. This Compact is executed in quintuplicate. Each of the five (5) Compacts bearing original signatures shall be deemed an original.

I. Notice. Unless otherwise specifically provided for in this Compact, service of notice, except service in litigation, shall be:

1. State. Upon the Director of the Department or its successor agency, and such other officials as the Director may designate in writing.

2. United States. Upon the Secretary of the Interior and such other officials as the Secretary may designate in writing.

ARTICLE VI
FINALITY OF COMPACT

A. Binding Effect.

1. The Effective Date of this Compact is the date of the ratification of this Compact by the Montana Legislature, written approval by the United States Department of the Interior, and written approval by the United States Department of Justice. Once effective, all of the provisions of this Compact shall be binding on:

a. the State and a person or entity of any nature whatsoever using, claiming or in any manner asserting a right under the authority of the State to the use of water; and

b. except as otherwise provided in Article V.A, the United States, a person or entity of any nature whatsoever using, claiming, or in any manner asserting a right under the authority of the United States to the use of water.

2. Following the Effective Date, this Compact may not be modified without the written consent of both parties. Any attempt to unilaterally modify this Compact by either party shall render this Compact voidable at the election of the other party.

B. Settlement of Claims. The parties intend that the Reserved Water Rights described in this Compact are in full and final settlement of the reserved water right claims of the United States for the Upper Missouri River Breaks National Monument. Pursuant to this settlement, by which certain federal Reserved Water Rights are expressly recognized by the State in this Compact, the United States hereby and in full settlement of any and all claims filed by the United States or which could have been filed by the United States for the Monument relinquishes forever all said claims on the Effective Date of this Compact to water within the State of Montana for Reserved Water Rights for the above mentioned unit. The State agrees to recognize the Reserved Water Right described and quantified herein, and shall, except as expressly provided for herein, treat them in the same manner as any other appropriation.

C. The parties agree to defend the provisions and purposes of this Compact from all challenges and attacks.

IN WITNESS WHEREOF the representatives of the State of Montana and the United States have signed this Compact on the .... day of ...., 2013.

History: En. Sec. 1, Ch. 224, L. 2013.

Part 19
Confederated Salish and Kootenai-Montana Compact

85-20-1901. Water rights compact entered into by the Confederated Salish and Kootenai Tribes of the Flathead Reservation, Montana, the State of Montana, and the United States ratified. This Compact is entered into by and among the Confederated Salish and Kootenai Tribes of the Flathead Reservation, Montana, the State of Montana, and the United State of America to settle all existing claims to water of or on behalf of the Confederated Salish and Kootenai Tribes within the State of Montana.

ARTICLE I - RECITALS

WHEREAS, pursuant to the Hellgate Treaty of 1855, 12 Stat. 975, the Confederated Salish and Kootenai Tribes reserved the Flathead Indian Reservation; and

WHEREAS, the Confederated Salish and Kootenai Tribes claim aboriginal water rights and, pursuant to said Treaty, reserved water rights to fulfill the purposes of the Treaty and the Reservation; and

WHEREAS, in 1979, the United States, on its own behalf and on behalf of the Confederated Salish and Kootenai Tribes, their members and Allottees brought suit in the United States District Court for the District of Montana to obtain a final determination of the Tribes' water rights claims, see United States v. Abell, No. CIV-79-33-M (filed April 5, 1979); and

WHEREAS, as a result of Congressional action and subsequent judicial interpretation, state courts have been found to possess, under certain circumstances, adjudicatory jurisdiction over federal reserved water rights held in trust by the United States for the benefit of Indians; see, McCarran Amendment 43 U.S.C. 666; Colorado River Conservation District v. United States, 424 U.S. 800 (1976); Arizona v. San Carlos Apache Tribe, 463 U.S. 545 (1983); and

WHEREAS, the State of Montana initiated a general stream adjudication pursuant to the provisions of Chapter 697, Laws of Montana 1979, which includes claims regarding the Confederated Salish and Kootenai Tribes' water rights; and

WHEREAS, the Montana Reserved Water Rights Compact Commission, under 85-2-702(1), MCA, is authorized to negotiate settlement of water rights claims filed by Indian tribes or filed on their behalf by the United States claiming reserved waters within the State of Montana; and

WHEREAS, the Federal district court litigation was stayed in 1983 pending the outcome of Montana State court water adjudication proceedings, see Northern Cheyenne v. Adsit, 721 F.2d 1187 (9th Cir.1983); and

WHEREAS, the adjudication of Confederated Salish and Kootenai Tribes' water rights in the State court proceeding has been stayed while negotiations are proceeding to conclude a compact resolving all water rights claims of the Confederated Salish and Kootenai Tribes; and

WHEREAS, the Confederated Salish and Kootenai Tribes, or their duly designated representatives, have authority to negotiate the Compact and the Tribal Council has the authority to execute this Compact pursuant to Article 6, Section 1, subsections (a), (c), and (u) of the Constitution and Bylaws of the Confederated Salish and Kootenai Tribes said Constitution adopted and approved under Section 16 of the Act of June 18, 1934 (48 Stat. 984), as amended; and

WHEREAS, the United States Attorney General, or a duly designated official of the United States Department of Justice, has authority to execute this Compact on behalf of the United States pursuant to the authority to settle litigation contained in 28 U.S.C. 516-17 and the Federal legislation ratifying this Compact identified in Article VIII.B; and

WHEREAS, the Secretary of the Interior, or a duly designated official of the United States Department of the Interior, has authority to execute this Compact on behalf of the United States Department of the Interior pursuant to 43 U.S.C. 1457, inter alia, and appropriate Federal legislation ratifying this Compact as identified in Article VIII.B; and

WHEREAS, the Confederated Salish and Kootenai Tribes, the State of Montana, and the United States agree that the Tribal Water Right and other water rights described in this Compact, subject to the provisions of the Act of Congress identified in Article VIII.B, is in satisfaction of the water rights claims of the Tribes, their members and Allottees, and of the United States on behalf of the Tribes and their members and Allottees; and

WHEREAS, the Parties agree that it is in the best interest of all Parties that the water rights claims of the Confederated Salish and Kootenai Tribes be settled through agreement between and among the Tribes, the State of Montana, and the United States; and

WHEREAS, the Parties agree that there is a clear hydrological interrelationship between the surface water and Groundwater of the Reservation, and each use of water on the Reservation may affect water use by all water users on the Reservation; and

WHEREAS, the Parties agree that prudent and knowledgeable conservation, management, and protection of the water resources of the Reservation are essential to the health and welfare of all residents of the Reservation; and

WHEREAS, the Parties seek to secure to all residents of the Reservation the quiet enjoyment of the use of waters of the Reservation for beneficial uses; and

WHEREAS, the Parties agree to protect Tribal Instream Flows, Existing Uses, and Historic Farm Deliveries to Flathead Indian Irrigation Project irrigators; and

WHEREAS, the Parties desire to create a unitary administration system that would provide a single system for the appropriation and administration of the waters of the Reservation and for the establishment and maintenance of a single system of centralized records for all water uses of the Reservation regardless of whether the use is based on State or Federal law.

NOW THEREFORE, the Parties agree to enter into the Compact for the purpose of settling the water rights claims of the Confederated Salish and Kootenai Tribes, their members, and Allottees of the Flathead Indian Reservation, and of the United States on behalf of the Tribes, their members and Allottees, and to provide the necessary foundation for the establishment of a board composed of Tribal and State appointed representatives to provide for the unified administration of all water resources on the Reservation.

ARTICLE II - DEFINITIONS

The following definitions shall apply for purposes of the Compact:

1. "Acre-foot" or "Acre-feet" means the amount of water necessary to cover one acre to a depth of one foot and is equivalent to 43,560 cubic feet of water.

2. "Adaptive Management" means an ongoing process of decision-making, based on water measurement and accounting designed to continuously manage and improve the allocation of water between Instream Flows, Minimum Reservoir Pool Elevations, and FIIP Water Use Rights pursuant to the Adaptive Management Appendix 3.5.

3. "Allottee" or "Allottees" means an owner of an interest in a tract of land held in trust by the United States which was allotted pursuant to the Act of April 23, 1904, 33 Stat. 302, as amended, or the Act of February 25, 1920, 41 Stat. 452, as amended.

4. "Alternate Value" means, as applied to the consensual agreements provided for by Article III.G.3, the quantity of water allowed under a claim decreed by the Montana Water Court or water right granted by the DNRC.

5. "Appropriation Right" means a right to appropriate water issued by the Water Management Board pursuant to the terms of this Compact and the Law of Administration.

6. "Arising Under State Law" means, as applied to a water right, a water right created under Montana law or a water right held by a nonmember of the Tribes on land not held in trust by the United States for the Tribes or a Tribal member and for which a claim was required to be filed in the Montana general stream adjudication.

7. "Basin 76D" means the hydrologic Basin 76D, including the Kootenai River and its tributaries, as shown in Appendix 1.

8. "Basin 76E" means the hydrologic Basin 76E, including Rock Creek and its tributaries, as shown in Appendix 1.

9. "Basin 76F" means the hydrologic Basin 76F, including the Blackfoot River and its tributaries, as shown in Appendix 1.

10. "Basin 76G" means the hydrologic Basin 76G, including the Clark Fork River above the Blackfoot River, and its tributaries, as shown in Appendix 1.

11. "Basin 76GJ" means the hydrologic Basin 76GJ, including Flint Creek and its tributaries, as shown in Appendix 1.

12. "Basin 76H" means the hydrologic Basin 76H, including the Bitterroot River and its tributaries, as shown in Appendix 1.

13. "Basin 76I" means the hydrologic Basin 76I, including the Middle Fork of the Flathead River and its tributaries, as shown in Appendix 1.

14. "Basin 76J" means the hydrologic Basin 76J, including the South Fork of the Flathead River and its tributaries, as shown in Appendix 1.

15. "Basin 76K" means the hydrologic Basin 76K, including the Swan River and its tributaries, as shown in Appendix 1.

16. "Basin 76L" means the hydrologic Basin 76L, including the Flathead River below Flathead Lake, and its tributaries, as shown in Appendix 1.

17. "Basin 76LJ" means the hydrologic Basin 76LJ, including the Flathead River to and including Flathead Lake, and its tributaries, as shown in Appendix 1.

18. "Basin 76M" means the hydrologic Basin 76M, including the Clark Fork River between the Blackfoot River and the Flathead River, and its tributaries, as shown in Appendix 1.

19. "Basin 76N" means the hydrologic Basin 76N, including the Clark Fork River below the Flathead River, and its tributaries, as shown in Appendix 1.

20. "Call" means the right of the holder of a water right with a senior priority date and an immediate need for a use of water to require a holder of a water right with a junior priority date to refrain from appropriating water otherwise physically available until the senior water right is satisfied.

21. "Cfs" means cubic feet per second.

22. "Change in Use" means an authorized change in the point of diversion, the place of use, the period of use, the purpose of use, or the place of storage of an Appropriation Right issued by the Water Management Board under this Compact and the Law of Administration, or of an Existing Use. A changed water right retains the original priority date of that right.

23. "Compact" means this water rights settlement entered into by the Confederated Salish and Kootenai Tribes, the State and the United States.

24. "Compact Implementation Technical Team" or "CITT" means the entity established by this Compact to plan and advise the Project Operator on the implementation of FIIP Operational Improvements, Rehabilitation and Betterment, and Adaptive Management. The CITT duties and responsibilities are defined in more detail in Appendix 3.5.

25. "Compact Management Committee" or "CMC" means the entity described in Article IV.G.5 formed to provide policy and administrative oversight of the CITT.

26. "Court of Competent Jurisdiction" means a State or Tribal court that otherwise has jurisdiction over the matter so long as the parties to the dispute to be submitted to that court consent to its exercise of jurisdiction, but if no such court exists, a Federal court.

27. "DNRC" means the Montana Department of Natural Resources and Conservation, or any successor agency.

28. "Effective Date" means the date on which the Compact is finally approved by the Tribes, by the State, and by the United States, and on which the Law of Administration has been enacted and taken effect as the law of the State and the Tribes, whichever date is latest.

29. "Existing Use" means a use of water under color of Tribal, State or Federal law in existence as of the Effective Date, including uses in existence on that date that are eligible for either of the registration processes set forth in the Law of Administration; provided that any portion of a Water Right Arising Under State Law within the Reservation that is, at any point after the date the ratification of the Compact by the Montana Legislature takes effect under State law, voluntarily relinquished or is legally determined to be abandoned, relinquished, or have otherwise ceased to exist, shall be stricken from the relevant basin decree as a Water Right Arising Under State Law and be entitled to no further protection as such a right or as an Existing Use.

30. "Flathead Indian Irrigation Project" or "FIIP" means the irrigation project developed by the United States to irrigate lands within the Reservation pursuant to the Act of April 23, 1904, Public Law 58-159, 33 Stat. 302 (1904), and the Act of May 29, 1908, Public Law 60-156, 35 Stat. 441 (1908), and includes, but is not limited to, all lands, reservoirs, easements, rights-of-way, canals, ditches, laterals, or any other FIIP facilities (whether situated on or off the Reservation), headgates, pipelines, pumps, buildings, heavy equipment, vehicles, supplies, records or copies of records and all other physical, tangible objects, whether of real or personal property, used in the management and operation of the FIIP.

31. "FIIP Influence Area" means the lands influenced by the operations of the FIIP as identified on the map attached hereto as Appendix 2.

32. "FIIP Water Use Right" means the water right set forth in Article III.C.1.a that is dedicated to use by the FIIP and FIIP irrigators and includes uses of water for irrigation and Incidental Purposes allowed by the FIIP through water service contracts. This water right is the source for the entitlement to delivery of available irrigation water for assessed parcels as provided by Article IV.D.2.

33. "Flathead Indian Reservation" or "Reservation" means all land within the exterior boundaries of the Indian Reservation established under the July 16, 1855 Treaty of Hellgate (12 Stat. 975), notwithstanding the issuance of any patent, and including rights-of-way running through the Reservation.

34. "Flathead Reservation Water Management Board," "Water Management Board," or "Board" means the entity established by this Compact and the Law of Administration to administer the use of all water rights on the Reservation upon the Effective Date.

35. "Flathead System Compact Water" means that portion of the Tribal Water Right consisting of 229,383 Acre-feet per year that the Tribes may withdraw from the Flathead River or Flathead Lake, which includes up to 90,000 Acre-feet per year stored in Hungry Horse Reservoir, with a maximum total volume consumed of 128,158 Acre-feet per year.

36. "Historic Farm Deliveries" means the aggregate annual volume of water for irrigation and Incidental Purposes on the FIIP that was delivered to all farm turnouts within an individual River Diversion Allowance Area prior to the date the ratification of the Compact by the Montana Legislature takes effect under State law. Historic Farm Deliveries include historic crop consumption and estimated standard rates of on-farm conveyance and irrigation

application inefficiencies and are used to evaluate RDA values pursuant to Article IV.D.1.e. Historic Farm Delivery volumes are specified in Appendix 3.3.

37. "Groundwater" means any water that is beneath the surface of the earth.

38. "High Mountain Lakes" means those lakes shown in Appendix 17.

39. "Hungry Horse Dam" means the dam that is a part of the Hungry Horse Project.

40. "Hungry Horse Project" means that project authorized by the Act of June 5, 1944 (58 Stat. 270, Public Law 78-329) to be constructed and operated by the US Bureau of Reclamation. The Act of May 29, 1958 (Public Law 85-428) amended the authorizing act to make Hungry Horse a Reclamation project subject to Reclamation laws.

41. "Hungry Horse Reservoir" means the reservoir that is a part of the Hungry Horse Project.

42. "Incidental Purpose(s)" means water delivered through or diverted from FIIP facilities for purposes incidental to irrigation, including but not limited to Rehabilitation and Betterment, and lawn and garden purposes allowed by the FIIP through water service contracts.

43. "Individual Indian Owner" means a Tribal member and his or her heirs or an Allottee and his or her heirs who is an owner of an interest in trust or restricted lands and who has a documented use of the Tribal Water Right registered pursuant to the terms of this Compact and the Law of Administration.

44. "Instream Flow" means a stream flow retained in a watercourse to benefit the aquatic environment. Instream Flow may include Natural Flow or streamflow affected by regulation, diversion, or other modification. A water right for Instream Flow purposes is quantified for a stream reach and measured for enforcement purposes at a specified point.

45. "Law of Administration" or "Unitary Administration and Management Ordinance" means the body of laws enacted by both the State and the Tribes to provide for the administration of surface water and Groundwater within the Reservation, that are both materially consistent with the substantive provisions of Appendix 4.

46. "Lease" means, as applied to the Tribal Water Right, an authorization for a Person or Persons to use any part of the Tribal Water Right through a service contract, temporary assignment, or other similar agreement of limited duration.

47. "MFWP" means the Montana Department of Fish, Wildlife, and Parks, or any successor agency.

48. "Minimum Enforceable Instream Flows" or "MEFs" means the schedule of monthly minimum enforceable streamflow levels that are set forth in Appendix 3.1.

49. "Minimum Reservoir Pool Elevations" means the minimum pool water elevations for FIIP reservoirs specified in the table attached hereto as Appendix 3.1 and abstracts of water right attached hereto as Appendix 15.

50. "Natural Flow" means the rate and volume of water movement past a specified point on a natural stream, produced from a drainage area for which there have been no effects caused by diversion, storage, import, export, return flow, or changes in consumptive use.

51. "New Development" means the development of a use of the Tribal Water Right set forth in the Compact, from any source, commencing after the Effective Date, and encompasses all uses of the Tribal Water Right not included within the definition of Existing Use.

52. "Operational Improvements" means practices that improve the ability of the Project Operator to plan for and manage water storage and allocation between Instream Flows and FIIP Water Use Rights. Operational Improvements address water supply planning, reservoir management, Instream Flow management, water accounting and reporting, Stock Water delivery, irrigation wastewater, measurement at diversion works, water measurement at farm delivery locations, and water measurement at irrigation wasteways. Operational Improvements are set forth in the schedule attached hereto as Appendix 3.4.

53. "Parties" means the Tribes, the State, and the United States.

54. "Person" means an individual or any other entity, public or private, including the Tribes, the State, and the United States, and all officers, agents and departments of each sovereign.

55. "Project Operator" means the entity with the legal authority and responsibility to operate the Flathead Indian Irrigation Project.

56. "Reallocated Water" means the water from that portion of any given FIIP diversion or RDA that is made available through increased efficiency resulting from Rehabilitation and Betterment projects.

57. "Rehabilitation and Betterment" means both irrigation facility upgrades that improve water management and operational control at irrigation diversion works, and irrigation facility upgrades to reduce losses in conveyance of water from irrigation sources of supply to irrigation points of use. Rehabilitation and Betterment actions include, but are not limited to, reconstruction, replacement, and automation at irrigation diversion works; lining of open canals; and placement of open canals in pipe.

58. "River Diversion Allowance" or "RDA" means initially the volume of water identified in Appendix 3.2 and defined for wet, normal and dry Natural Flow years that is necessary to be diverted or pumped to supply the FIIP Water Use Right. As Reallocated Water is made available through Rehabilitation and Betterment, the RDA is the amount defined in Appendix 3.2, reduced by the volume of Reallocated Water made available by a particular Rehabilitation and Betterment project.

59. "River Diversion Allowance Area" or "RDA Area" means geographic divisions of the FIIP to which water is diverted. RDA Areas are depicted in Appendix 3.2.

60. "Secretary" means the Secretary of the United States Department of the Interior, or the Secretary's duly authorized representative.

61. "Shared Shortages" means a water management procedure to be applied when water supply is insufficient to satisfy both MEFs and RDAs simultaneously.

62. "State" means the State of Montana and all officers, agencies, departments and political subdivisions thereof.

63. "Stock Water" means water used for livestock.

64. "Target Instream Flows" or "TIFs" means the schedule of monthly Instream Flow levels, defined for normal and wet Natural Flow years that are identified in Appendix 3.1.

65. "Tribal Council" means the duly elected governing body of the Confederated Salish and Kootenai Tribes of the Flathead Reservation, Montana.

66. "Tribal Natural Resources Department" means the governmental subdivision of the Tribes authorized by Tribal Ordinance No. 78-B, as amended, or any successor agency.

67. "Tribal Water Right" means the water rights of the Confederated Salish and Kootenai Tribes, including any Tribal member or Allottee, the basis of which are federal law, as set forth in Article III.A, Article III.C.1.a through j, Article III.C.1.k.i, Article III.C.1.l.i, Article III.D.1 through 3 and Article III.D.7 and 8. The term "Tribal Water Right" also includes those rights identified in Article III.H that are appurtenant to lands taken into trust by the United States on behalf of the Tribes.

68. "Tribes" means the Confederated Salish and Kootenai Tribes of the Flathead Reservation, Montana, and all officers, agencies, and departments thereof.

69. "United States" means the Federal government and all officers, agencies and departments thereof.

70. "Water Rights Arising Under State Law" means those valid water rights Arising Under State Law existing as of the Effective Date and not subsequently relinquished or abandoned, as those rights are: decreed or to be decreed by the Montana Water Court pursuant to 85-2-234, MCA; permitted by the DNRC; exempted from filing in the Montana general stream adjudication pursuant to 85-2-222, MCA; or excepted from the permitting process pursuant to 85-2-306, MCA.

71. "Wetland" means an area that is inundated or saturated by surface water or Groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs and similar areas.

ARTICLE III - WATER RIGHTS OF THE TRIBES

The water rights of the Tribes quantified in Article III are composed of two parts: water rights whose basis is Federal law that are defined and referred to as the Tribal Water Right and those Water Rights Arising Under State Law identified in Article III.C.1.k.ii, III.C.1.l.ii, III.D.4, 5, and 6, and III.H.

A. Religious or Cultural Uses. The Tribal Water Right described in this Article III includes all traditional, religious, or cultural uses of water by members of the Confederated Salish and

Kootenai Tribes within Montana. Individual exercises of traditional, religious, or cultural uses are exempt from the Registration process contained in the Law of Administration.

B. Abstracts of Water Right. Abstracts of water right appended to this Compact are a substantive element of this Compact. The language of the abstracts, including all informational remarks, shall control in the event of any inconsistency between the Compact and the abstracts of water right; provided however, that the Parties upon written mutual agreement may make technical corrections to the abstracts prior to the Parties submission to the Montana Water Court of the motion for entry of the Proposed Decree identified in Article VII.B. Such modifications are pursuant to, and shall not be deemed an amendment of, this Compact.

C. Basins 76L and 76 LJ and Flathead Indian Irrigation Project Irrigation Water Diversions from Basins 76F and 76N.

1. Quantification.

a. Flathead Indian Irrigation Project. The Tribes have the right to water that is supplied to the Flathead Indian Irrigation Project to be used for such purposes in such volumes and flow rates and from such sources of supply as identified in the abstracts of water right attached hereto as Appendix 5. The FIIP will serve up to, but not more than 135,000 acres. The exercise of this portion of the Tribal Water Right shall be satisfied by meeting the RDA values for each RDA Area described in Appendix 3.2 as evaluated pursuant to Article IV.D.1.e, and is subject to Article IV.D through F.

The priority date for the portion of the Tribal Water Right used by the FIIP is July 16, 1855.

b. Existing Uses by the Tribes, their Members and Allottees.

i. The Tribal Water Right includes all Existing Uses by the Tribes, their members and Allottees that are not Water Rights Arising Under State Law and are not otherwise specifically quantified in other sections of this Article III.

ii. Water Rights Arising Under State Law held by the Tribes, their members and Allottees will be satisfied pursuant to their own terms as finally decreed by the Montana Water Court or permitted by the DNRC.

iii. For each Existing Use identified in Article III.C.1.b.i to be valid and enforceable, the Tribes, or each Tribal member or Allottee claiming such an Existing Use, shall complete the process for the registration of uses of the Tribal Water Right set forth in the Law of Administration. Such uses include but are not limited to irrigation, Stock Water, domestic, commercial, municipal and industrial purposes, as well as those historically irrigated allotments that are held for individuals in trust by the United States that are not served by the FIIP and that are identified on the map and table attached hereto as Appendix 6.

iv. Uses of the Tribal Water Right for which abstracts are appended to this Compact, including uses on the FIIP, are exempt from the registration requirement set forth in Article III.C.1.b.iii.

v. The priority date for water uses registered pursuant to Article III.C.1.b.iii and the Law of Administration is July 16, 1855.

c. Flathead System Compact Water. The Tribes have a direct flow water right from the Flathead River with the following elements:

Source of Water: Flathead River, Flathead Lake, and the South Fork of the Flathead River up to Hungry Horse Reservoir

Point of Diversion: From Flathead Lake or the Flathead River, either on or off of the Reservation

Purpose: Any beneficial use

Diversion Volume: 229,383 Acre-feet per year

Depletion Volume: 128,158 Acre-feet per year

Period of Diversion and Depletion: January 1 through December 31

i. As part of the Tribal Water Right quantified in this Article III.C.1.c, the Tribes shall be entitled to an allocation of 90,000 Acre-feet per year, as measured at the Hungry Horse Dam, of storage water in Hungry Horse Reservoir.

ii. This water right shall be used in a manner that ensures impacts associated with the exercise of this water right are no greater than those identified in model run: Natural Q + 90K of the United States Bureau of Reclamation's Final Flathead Basin Depletions Study (USBR, October 2012), attached hereto as Appendix 7. In the event that the impacts exceed those identified in model run: Natural Q + 90K of the United States Bureau of Reclamation's Final Flathead Basin Depletions Study, the use of the water right set forth in this Article III.C.1.c shall be reduced in such amounts as are necessary to immediately achieve impacts that are no greater than those identified in model run: Natural Q + 90K of the United States Bureau of Reclamation's Final Flathead Basin Depletions Study.

iii. The releases of the stored water identified in Article III.C.1.c.i shall be limited in accordance with the "Biological Impact Evaluation and Operational Constraints for a proposed 90,000 Acre-foot withdrawal" (State of Montana, September 14, 2011) attached hereto as Appendix 8. The Parties upon mutual written agreement, and in conformance with other applicable provisions of law including but not limited to the Endangered Species Act of 1973, 16 U.S.C. 1531, et seq. (ESA), may amend the Biological Impact Evaluation Constraints identified in the September 14, 2011 report. Such modifications are pursuant to, and shall not be deemed an amendment of, this Compact.

iv. The exercise of this water right shall conform with the minimum instream flow schedules, as measured at the USGS gaging station on the Flathead River at Columbia Falls (12363000) and the USGS gaging station on the Flathead River at Polson (12372000) as identified in Tables 3 through 6 of Appendix 7, as well as the minimum flow requirements set forth in Table 5 that must also be met downstream at the USGS gaging station on the Flathead River at Perma (123887000). The exercise of this water right shall also conform to the ramping rates, as measured below Kerr and Hungry Horse Dams, and identified in Tables 3 through 6 of Appendix 7. In the event that the minimum instream flow schedules or ramping rates are not met, the use of the water right set forth in this Article III.C.1.c shall be suspended until such time as those minimum instream flow schedules and ramping rates are achieved. The Parties upon mutual written agreement, and in conformance with applicable ESA and Federal Energy Regulatory Commission licensing requirements for the three previously identified sites, may amend the limitations for releases from Hungry Horse Reservoir that are required to conform with minimum instream flow and ramping rate schedules at these sites. Such modifications are pursuant to, and shall not be deemed an amendment of, this Compact.

v. The exercise of this water right shall also conform with the Flathead Lake filling criteria identified on page 12 of Appendix 7.

vi. The Tribes may use any amount of the stored water identified in Article III.C.1.c.i that is not necessary to be released each year pursuant to the provisions of Article III.C.1.c.ii through v, for any beneficial purpose, subject to the terms and conditions of this Compact.

vii. Use of the 90,000 Acre-feet of water from Hungry Horse Reservoir is subject to the approval of, and any terms and conditions specified by, Congress.

viii. The priority date for Flathead System Compact Water is July 16, 1855.

ix. Any development by the Tribes of this Flathead System Compact Water Right outside the boundaries of the Reservation shall be pursuant to Article IV.B.5.c.

x. The Parties agree that nothing in this Compact precludes the Tribes from leasing Flathead System Compact Water to FIIP irrigators.

xi. The abstract of water right for this Flathead System Compact Water Right is attached hereto as Appendix 9.

d. Instream Flow Rights on Reservation.

i. Natural Instream Flows. The Tribes have Instream Flow rights in the quantities and locations identified in the abstracts of water right attached hereto as Appendix 10.

ii. FIIP Instream Flows. The Tribes have Instream Flow rights in the quantities and locations identified in the abstracts of water right attached hereto as Appendix 11. The exercise of this portion of the Tribal Water Right is subject to Article IV.C through F.

iii. Other Instream Flows. The Tribes have Instream Flow rights in the quantities and locations identified in the abstracts of water right attached hereto as Appendix 12. The Parties agree that a right identified in Appendix 12 shall only become enforceable on the date that an enforceable flow schedule for that right has been established pursuant to the process set forth in the Law of Administration, Section 2-1-115 of this Ordinance, for the development of such enforceable schedules.

iv. Interim Instream Flows. Until such time as the Instream Flow water rights set forth in Article III.C.1.d.ii become enforceable pursuant to Article IV.C, the Tribes shall be entitled to enforce the interim Instream Flows contained in Appendix 13 consistent with the provisions in Article IV.C and IV.E. The Tribes and the United States shall enforce these interim Instream Flows pursuant to Appendix 13 or existing practice as of December 31, 2014, and as described in the protocols in Appendix 14.

v. The priority date for the Instream Flow water rights set forth in this Article III.C.1.d is time immemorial.

e. Minimum Reservoir Pool Elevations in Flathead Indian Irrigation Project Reservoirs.

i. The Tribes have the right to water necessary to maintain Minimum Reservoir Pool Elevations for FIIP reservoirs in the quantities and locations set forth in the table and abstracts of water right attached hereto as Appendix 15. The exercise of this portion of the Tribal Water Right is subject to Article IV.C and E and superseding Federal law allowing for regulation of reservoir elevations.

ii. The Minimum Reservoir Pool Elevations will become enforceable according to the schedule attached hereto as Appendix 3.4.

iii. The priority date for the water rights set forth in this Article III.C.1.e is July 16, 1855.

iv. Until such time as the Minimum Reservoir Pool Elevations set forth in Article III.C.1.e become enforceable pursuant to Article IV.C, the Tribes shall be entitled to enforce those interim reservoir pool elevations identified in Appendix 13. The Tribes and the United States shall enforce these interim reservoir pool elevations only pursuant to Appendix 13 or existing practice as of December 31, 2014, and subject to superseding Federal law allowing for regulation of reservoir elevations.

f. Wetland Water Right. The Tribes have the right to all naturally occurring water necessary to maintain the Wetlands identified in the abstracts of water right attached hereto as Appendix 16. The priority date for the Wetland water rights set forth in this Article III.C.1.f is time immemorial.

g. High Mountain Lakes Water Right. The Tribes have the right to all naturally occurring water necessary to maintain the High Mountain Lakes identified in the abstracts of water right attached hereto as Appendix 17. The priority date for the High Mountain Lakes water rights set forth in this Article III.C.1.g is time immemorial.

h. Flathead Lake. The Tribes have the right to all naturally occurring water necessary to maintain the level of the entirety of Flathead Lake at an elevation of 2,883 feet as described in the abstract of water right attached hereto as Appendix 18. The priority date for the Flathead Lake water right set forth in this Article III.C.1.h is time immemorial.

i. Boulder Creek Hydroelectric Project. The Tribes have the right to water necessary to operate the Boulder Creek Hydroelectric Project as identified in the abstracts of water right attached hereto as Appendix 19. The priority date for the Boulder Creek Hydroelectric Project water right set forth in this Article III.C.1.i is July 16, 1855.

j. Hellroaring Hydroelectric Project. The Tribes have the right to water necessary to operate the Hellroaring Hydroelectric Project as identified in the abstracts of water right attached hereto as Appendix 20. The priority date for the Hellroaring Hydroelectric Project water right set forth in this Article III.C.1.j is July 16, 1855.

k. Wetlands Appurtenant to Lands Owned by Montana Fish Wildlife and Parks.

i. The Tribes and Montana Fish Wildlife and Parks (MFWP) have the right to all naturally occurring water necessary to maintain the Wetlands identified in the abstracts of water right attached hereto as Appendix 21. The priority date for Wetland water rights appurtenant to lands owned by MFWP is time immemorial.

ii. Upon the Effective Date, the Tribes shall be added as a co-owner with MFWP of water right number 76L 153988-00, the abstract of which is attached hereto as Appendix 22. MFWP shall make reasonable efforts to defend this right in the Montana general stream adjudication. The Tribes have the right but not the duty to participate in the defense of this right in the Montana general stream adjudication.

iii. The Tribes shall be added in an expeditious manner as a co-owner to any water right with a fish or fish and wildlife purpose that is appurtenant to land acquired by MFWP on the Reservation after the Effective Date.

iv. The Tribes shall be added in an expeditious manner as a co-owner to any Wetlands water right acquired by MFWP pursuant to the Law of Administration after the Effective Date.

v. MFWP shall be the sole entity entitled to manage the water rights identified in Article III.C.1.k. The recognition of these co-owned water rights does not confer on the Tribes any authority over the management of the MFWP-owned lands to which these water rights are appurtenant.

vi. MFWP shall meet and confer with the Tribes on a biennial basis, or on such other timeframe as the Tribes and MFWP may mutually agree, to discuss the exercise of these water rights. Such modifications to the meeting schedule are pursuant to, and shall not be deemed an amendment of, this Compact.

l. Wetlands Appurtenant to Lands Owned by Department of Interior Fish and Wildlife Service.

i. The Tribes and the Department of the Interior's Fish and Wildlife Service (FWS) have the right to all naturally occurring water necessary to maintain the Wetlands identified in the abstracts of water right attached hereto as Appendix 23. The priority date for Wetland water rights appurtenant to lands owned by FWS is time immemorial.

ii. Upon the Effective Date, the Tribes shall be added as a co-owner with FWS of water right numbers 76L 99338 00, 76L 99339 00, and 76L 99340 00, the abstracts of which are attached hereto as Appendix 24. FWS shall make reasonable efforts to defend these rights in the Montana general stream adjudication. The Tribes have the right but not the duty to participate in the defense of these rights in the Montana general stream adjudication.

iii. The Tribes shall be added in an expeditious manner as a co-owner to any water right with a fish or fish and wildlife purpose that is appurtenant to land acquired by FWS on the Reservation after the Effective Date.

iv. The Tribes shall be added in an expeditious manner as a co-owner to any Wetlands water right acquired by FWS pursuant to the Law of Administration, after the Effective Date.

v. FWS shall be the sole entity entitled to manage the water rights identified in this Article III.C.1.l. The recognition of these co-owned water rights does not confer on the Tribes any authority over the management of the FWS-owned lands to which these water rights are appurtenant.

vi. FWS shall meet and confer with the Tribes on a biennial basis, or on such other timeframe as the Tribes and FWS may mutually agree, to discuss the exercise of these water rights. Such modifications to the meeting schedule are pursuant to, and shall not be deemed an amendment of, this Compact.

D. Instream Flow Water Rights Off of the Reservation.

1. Mainstem Instream Flow Right in the Kootenai River (Basin 76D). The Tribes have an Instream Flow water right for the mainstem of the Kootenai River for the reach and with the associated flow rates set forth in the abstract of water right attached hereto as Appendix 25. The measurement point for this water right is USGS streamflow gage #12305000 located at Leonia, Idaho.

a. The priority date for this water right is time immemorial.

b. The period of use of this water right is January 1 to December 31 of each year.

c. The purpose of this water right is for the maintenance and enhancement of fish habitat to benefit the instream fishery. This right shall not be changed to any other or additional purpose, changed to consumptive use, or transferred to different ownership.

d. The point of diversion and place of use for this water right is instream. This water right shall not be exercised in conjunction with any artificial diversion.

e. The ability to enforce this right shall be suspended so long as Libby Dam remains in existence and the Army Corps of Engineers' operations of that dam are conducted consistently with the 2008 Federal Columbia River Power System Biological Opinion, the 2010 updated Biological Opinion, and the 2014 Supplemental Federal Columbia River Power System Biological Opinion, specifically as described in Reasonable and Prudent Alternative Action (RPA) No. 4 (Storage Project Operations), Table No. 1 (Libby Dam), including the Northwest Power and Conservation Council's 2003 mainstem amendments to the Columbia River Basin Fish and Wildlife Program, or any subsequent Biological Opinion(s) governing the same RPAs and Operations.

f. In the event of changes to the U.S. Army Corps of Engineers' (Corps) responsibilities under the ESA, such as the delisting of resident and anadromous fish species, that no longer require the

Corps to operate Libby Dam pursuant to ESA section 7 biological opinions or other substantive ESA requirements, the United States, acting through the Corps, the Tribes, and the State shall establish written protocols and understandings on meeting and enforcing the Tribes' mainstem Instream Flow right in the Kootenai River while also ensuring that the Corps' operations of Libby Dam meet all Federal statutory and regulatory requirements and obligations. Provided however, that any such enforcement protocol shall not alter the limitations on Call set forth in Article III.D.1.g. The establishment of such protocols and understandings are pursuant to, and shall not be deemed an amendment of, this Compact.

g. Should the suspension on enforcement set forth in Article III.D.1.e be lifted due to the removal of Libby Dam, this water right may be exercised to make a Call only against junior users whose point of diversion is from the mainstem of the Kootenai River and not its tributaries, the purpose of whose rights is irrigation and whose source of supply is surface water, or against junior users the purpose of whose rights is irrigation, whose source of supply is Groundwater that is connected to the mainstem of the Kootenai River, and whose flow rate is greater than 100 gallons per minute.

h. Call may be made only when the average daily flow drops below the enforceable level for the previous 24-hour period.

2. Mainstem Instream Flow Right in the Swan River (Basin 76K). The Tribes have an Instream Flow water right for the reach of the mainstem of the Swan River with the associated flow rates set forth in the abstract of water right attached hereto as Appendix 26. The measurement point for this water right is USGS streamflow gage #12370000 located immediately below Swan Lake near Big Fork, Montana.

a. The priority date for this water right is time immemorial.

b. The period of use of this water right is January 1 to December 31 of each year.

c. The purpose of this water right is for the maintenance and enhancement of fish habitat to benefit the instream fishery. This right shall not be changed to any other or additional purpose, changed to consumptive use, or transferred to different ownership.

d. The point of diversion and place of use for this water right is instream. This water right shall not be exercised in conjunction with any artificial diversion.

e. The Tribes, and/or the United States on behalf of the Tribes, shall be entitled to make a Call to enforce this water right only against junior users the purpose of whose rights is irrigation and whose source of supply is surface water, or against junior users the purpose of whose rights is irrigation, whose source of supply is Groundwater connected to surface sources in Basin 76K and whose flow rate is greater than 100 gallons per minute.

f. Call may be made only when the average daily flow drops below the enforceable level for the previous 24-hour period.

3. Mainstem Instream Flow Right in the Lower Clark Fork River (Basins 76M and 76N). The Tribes have a 5000 cfs Instream Flow water right for the reach of the mainstem of the Clark Fork River as set forth in the abstract of water right attached hereto as Appendix 27. The measurement point for this water right is USGS streamflow gage #12391950 located immediately below Cabinet Gorge Dam in Idaho.

a. The priority date for this water right is time immemorial.

b. The period of use of this water right is January 1 to December 31 of each year.

c. The purpose of this water right is for the maintenance and enhancement of fish habitat to benefit the instream fishery. This right shall not be changed to any other or additional purpose, changed to consumptive use, or transferred to different ownership.

d. The point of diversion and place of use for this water right is instream. This water right shall not be exercised in conjunction with any artificial diversion.

e. The Tribes, and/or the United States on behalf of the Tribes, shall be entitled to make a Call to enforce this water right only against junior users whose point of diversion is from the mainstem of the Clark Fork River and not its tributaries, the purpose of whose rights is irrigation and whose source of supply is surface water, or against junior users the purpose of whose rights is irrigation, whose source of supply is Groundwater connected to the mainstem of the Clark Fork River and whose flow rate is greater than 100 gallons per minute.

f. Call may be made only when the average daily flow drops below the enforceable level for the previous 24-hour period.

g. For so long as the Cabinet Gorge and Noxon Dams remain in existence, the enforceable level of this right is a flow rate equal to the lesser of 5000 cfs or the minimum flow level established by the FERC as a condition on the license for the Cabinet Gorge and Noxon Dams as that license condition may be modified over time.

4. Co-ownership of Instream and Public Recreation Water Rights Held by MFWP.

a. Upon the Effective Date, the Tribes shall be added as a co-owner with MFWP of the Water Rights Arising Under State Law held by MFWP for Instream Flow and recreation purposes that are identified on the tables attached hereto as Appendix 28 and Appendix 29. Nothing in this co-ownership changes any of the other elements of these Water Rights Arising Under State Law, including their priority dates or flow rates.

i. The Water Rights Arising Under State Law identified in Appendix 28 shall be included as part of the proposed decree to be filed with the Montana Water Court pursuant to Article VII.B.1.

ii. The Water Rights Arising Under State Law identified in Appendix 29 shall proceed through the Montana general stream adjudication as though they were not included in this Compact. MFWP shall make reasonable efforts to defend each of these rights identified in Appendix 29 in the Montana general stream adjudication. The Tribes have the right but not the duty to participate in the defense of these rights in the Montana general stream adjudication.

b. As co-owners, the Tribes and MFWP shall meet and confer on a biennial basis, or on such other timeframe as the Tribes and MFWP may mutually agree, to discuss the exercise of the rights identified in Article III.D.4.a, with a goal of establishing a joint plan for the exercise of these rights. Notwithstanding this planning process, the Tribes and MFWP each retain(s) the unilateral right to exercise each water right identified in Article III.D.4.a as each deem(s) appropriate, but neither the Tribes nor MFWP has any affirmative duty to take any particular action in regard to the exercise of any of these rights.

5. Co-ownership of Water Right Number 76M 94404-00 (Milltown Dam) in Basin 76G (Upper Clark Fork).

a. Upon the date the ratification of this Compact by the Montana Legislature becomes effective under State law, Water Right Arising Under State Law number 76M 94404-00 is changed as follows: the right is split into two separate active and enforceable Water Rights Arising Under State Law, 76M 94404-01 and 76M 94404-02, and the original water right elements are changed to support the maintenance and enhancement of fish habitat and take the form of two enforceable hydrographs. The elements of the changed and split water right are set forth in the two water rights abstracts attached hereto as Appendix 30. The measurement point for 76M 94404-01 is the USGS gage #12334550 at Turah, Montana, and the measurement point for 76M 94404-02 is the USGS gage #1234000 at Bonner, Montana.

i. The period of use of these water rights is January 1 to December 31 of each year.

ii. The point of diversion and place of use for these water rights is instream.

iii. These water rights shall not be exercised in conjunction with any artificial diversion.

iv. MFWP, and the Tribes after they become co-owners, and subject to the limitation on enforcement set forth in Article III.D.5.c, shall be entitled to make a Call to enforce these water rights only against junior users the purpose of whose rights is irrigation and whose source of supply is surface water, or against junior users the purpose of whose rights is irrigation, whose source of supply is Groundwater and whose flow rate is greater than 100 gallons per minute.

v. The enforceable levels of these water rights are identified in the table attached hereto as Appendix 31. The minimum enforceable level of this right is 700 cfs at the location of USGS gage #1234000 at Bonner, and 500 cfs at the location of USGS gage #12334550 at Turah.

vi. Call may be initiated on the day following a five-consecutive-day-period in which four out of five average daily river flows fall below their respective daily enforceable hydrograph values. Call may persist until such time as two average daily flows of the previous five-consecutive-day-period are in excess of their respective enforceable hydrograph values.

b. Upon the Effective Date, the Tribes shall be a co-owner with MFWP of these water rights. As co-owners, the Tribes and MFWP shall meet and confer on a biennial basis, or on such other timeframe as the Tribes and MFWP may mutually agree to, regarding the exercise of these rights, with a goal of establishing a joint plan for the exercise of these rights. The establishment of such a plan is pursuant to, and shall not be deemed an amendment of, this Compact.

Notwithstanding this planning process, the Tribes and MFWP each retains the unilateral right to exercise these water rights as each deems appropriate, but neither the Tribes nor MFWP has any affirmative duty to take any particular action in regard to the exercise of these rights.

c. The ability to enforce these rights shall be suspended for a period of 10 years from the date the ratification of this Compact by the Montana Legislature becomes effective under State law. During and after this period, the Tribes and MFWP shall engage with other stakeholders in the Upper Clark Fork Basin on water management subjects including, but not limited to, drought planning and the exercise of these water rights in conjunction with the other water rights in the Upper Clark Fork Basin.

d. For any analysis of the legal availability of water in the Upper Clark Fork Basin, these rights shall be considered to have a combined year-round flow rate of 2,000 cfs as measured at the location of USGS gauge #12340500 below the confluence of the Blackfoot and Clark Fork Rivers.

e. No owner of these water rights, acting independently or jointly, shall be entitled to lease, sell or change the purpose of these water rights.

f. The Water Rights Arising Under State Law identified in this Article III.D.5 shall be finally decreed as part of the decree of this Compact that will be proposed to the Montana Water Court pursuant to Article VII.B.1.

6. Contract Rights to Stored Water Held by MFWP in Basin 76H (Bitterroot).

a. MFWP is a party to two contracts for the delivery of stored water from Painted Rocks Reservoir: MFWP Water Purchase Contract Painted Rocks, between MFWP and DNRC, July 12, 2004 (attached hereto as Appendix 32); and Water Purchase Contract, March 5, 1958, as amended on March 5, 1958 (attached hereto as Appendix 33). In the event that MFWP obtains an ownership interest in any water rights pursuant to these contracts or obtains an ownership interest in any water rights pursuant to any future contract for the delivery of water from Painted Rocks Reservoir, MFWP shall expeditiously take all steps necessary to add the Tribes as a co-owner of said water rights.

b. MFWP is a party to a contract for the delivery of stored water from Lake Como: Agreement Between the Bitterroot Irrigation District and the United States Department of the Interior, Bureau of Reclamation for the Operation of the Enlarged Storage Pool at Lake Como, July, 1994 (attached hereto as Appendix 34). In the event that MFWP obtains an ownership interest in any water rights pursuant to this contract, or obtains an ownership interest in any water rights pursuant to any future contract for delivery of water from Lake Como, MFWP shall expeditiously take all steps necessary to add the Tribes as a co-owner of said water rights.

c. MFWP shall manage the Painted Rocks and Como contract rights, in a prudent, biologically based and environmentally sound manner, and within the terms and conditions of these contracts. MFWP will manage in the same manner any future contracts for the delivery of water from Painted Rocks or Lake Como to which MFWP becomes a party. The Tribes are an intended beneficiary of MFWP's management of these contracts, and have the right to challenge MFWP's management decisions in a Court of Competent Jurisdiction.

d. MFWP shall meet and confer with the Tribes on a biennial basis, or on such other timeframe as the Tribes and MFWP may mutually agree to, regarding the management of these contract rights. Such modifications to the meeting schedule are pursuant to, and shall not be deemed an amendment of, this Compact. If the Tribes become co-owners of any water right pursuant to this Article III.D.6 of the Compact, the Tribes and MFWP shall each retain the independent right to exercise each water right as each deems appropriate. Neither the Tribes nor MFWP has any affirmative duty to take any particular action in regard to the exercise of any of such rights. The Tribes do not assume any liability arising out of or resulting from any of the contracts identified in this Article III.D.6 pertaining to co-ownership of rights to stored water in Basin 76H.

7. Instream Flow Right on the North Fork of Placid Creek (Basin 76F). The Tribes have an Instream Flow water right for the upper reach of the North Fork of Placid Creek with the associated flow rates set forth in the abstract of water right attached hereto as Appendix 35. The measurement point for this water right shall be within the main channel of the North Fork of Placid Creek, below the North Fork Placid Creek FIIP Diversion located within the SE 1/4 of the NW 1/4 of the SE 1/4 of Section 29 in Township 17 North Range 16 West.

a. The priority date for this water right is time immemorial.

b. The period of use of this water right is January 1 to December 31 of each year.

c. The purpose of this water right is for the maintenance and enhancement of fish habitat to benefit the instream fishery. This right shall not be changed to any other or additional purpose, changed to consumptive use, or transferred to different ownership.

d. The point of diversion and place of use for this water right is instream. This water right shall not be exercised in conjunction with any artificial diversion.

e. The Tribes, and/or the United States on behalf of the Tribes, shall be entitled to make a Call to enforce this water right only against junior users the purpose of whose rights is irrigation and whose source of supply is surface water of Placid Creek, or against junior users the purpose of whose rights is irrigation, whose source of supply is Groundwater connected to Placid Creek and whose flow rate is greater than 100 gallons per minute.

f. Call may be made only when the average daily flow drops below the enforceable level for the previous 24-hour period.

8. Instream Flow Rights on Kootenai River Tributaries (Basin 76D). The Tribes have Instream Flow water rights for the reaches of the Kootenai River tributaries Big Creek, Boulder Creek, Steep Creek and Sutton Creek, with the associated flow rates set forth in the abstracts of water right attached hereto as Appendix 36.

a. The priority date for this water right is time immemorial.

b. The period of use of this water right is January 1 to December 31 of each year.

c. The purpose of this water right is for the maintenance and enhancement of fish habitat to benefit the instream fishery. This right shall not be changed to any other or additional purpose, changed to consumptive use, or transferred to different ownership.

d. The point of diversion and place of use for this water right is instream. This water right shall not be exercised in conjunction with any artificial diversion.

e. Water rights held by the United States Forest Service pursuant to the United States Forest Service-Montana Water Rights Compact, 85-20-1401, MCA, shall not be subject to Call by the Tribes and/or the United States on behalf of the Tribes.

f. The recognition of the Instream Flow water rights in this Article III.D.8 does not confer on the Tribes any authority over the management of National Forest System lands within Basin 76D, or any claim to ownership or other rights in that land. With the exception of future diversionary uses by the United States on National Forest System lands in excess of the Forest Service's reserved rights identified in Article III.D.8.e, the Tribes hold the United States harmless for delivery of water or maintenance of flows to meet this Instream Flow water right in Basin 76D.

E. Period of Use. The period of use of the Tribal Water Right set forth in this Article III shall be January 1 to December 31 of each year, provided however, that any portion of that water right that is dedicated to seasonal use, including irrigation use, shall have a period of use as set forth in the abstracts attached hereto as Appendix 5 or as set forth in the registration of such right pursuant to the Law of Administration, as applicable.

F. Points and Means of Diversion. The points and means of diversion for use of the Tribal Water Right set forth in this Article III are as set forth in the abstracts of water rights attached to this Compact or as may be provided for under the Law of Administration.

G. Call Protection.

1. Non-Irrigators. The Tribes, on behalf of themselves and the users of any portion of the Tribal Water Right set forth in this Compact, and the United States agree to relinquish their right to exercise the Tribal Water Right to make a Call against any Water Right Arising Under State Law whose purpose(s) do(es) not include irrigation.

2. Groundwater Irrigators with Flow Rates Less Than or Equal to 100 Gallons Per Minute. The Tribes, on behalf of themselves and the users of any portion of the Tribal Water Right set forth in this Compact and the United States agree to relinquish their right to exercise the Tribal Water Right to make a Call against any Water Right Arising Under State Law whose purpose is irrigation and whose source of supply is Groundwater and whose flow rate is less than or equal to 100 gallons per minute.

3. Irrigators Within the FIIP Influence Area.

a. The Tribes, the United States, and the Project Operator, agree to relinquish their right to exercise the Tribal Water Right to make a Call against that portion of any Water Right

Arising Under State Law identified in Article III.G.3.b that is equal to the quantity of water established as the annual FIIP quota for the current irrigation season, or an equivalent farm delivery amount within the FIIP as implemented by the Project Operator within the applicable RDA Area, or the quantity allowed under a claim decreed by the Montana Water Court or water right granted by the DNRC (an Alternate Value), whichever is less, whose owner enters into a consensual agreement as described in this Article III.G.3.

b. Water Rights Arising Under State Law whose owners are eligible to enter into consensual agreements as described in this Article III.G.3 are those rights:

i. whose purpose is irrigation;

ii. whose point(s) of diversion or place(s) of use are within the FIIP Influence Area; and

iii. whose source of supply is surface water; or

iv. whose source of supply is Groundwater and whose flow rate is greater than 100 gallons per minute.

c. The Tribes, the United States, and the Project Operator, agree to enter into the consensual agreement described in this Article III.G.3 with every owner of a Water Right Arising Under State Law described in Article III.G.3.b who wishes to enter into such an agreement. The following conditions shall apply to any such consensual agreement:

i. the owner of a Water Right Arising Under State Law that meets the criteria described in Article III.G.3.b shall measure all diversions, report the measured amount of those diversions to the Project Operator, agree to divert no more water each year than the lesser of the quantity established as the annual FIIP quota or an Alternate Value, and shall not expand water use beyond the terms of the agreement;

ii. the owner of a Water Right Arising Under State Law does not acquire any entitlement to any delivery or diversion of water from the FIIP, whether the water is stored or run of the river, by entering into a consensual agreement as described in this Article III.G.3;

iii. irrigation use pursuant to any Water Right Arising Under State Law whose owner enters into a consensual agreement as set forth in this Article III.G.3 shall be limited to the irrigation season identified annually by the FIIP and to such period of use limitation as may apply to FIIP irrigators;

iv. the method and frequency of measurement of the diversion must be described and occur at a reasonable level of accuracy and frequency to demonstrate that the diversion does not exceed the lesser of the annual FIIP quota for a given irrigation season or an Alternate Value; and

v. the agreement is permanent and is binding on the heirs and assigns of the owner of each Water Right Arising Under State Law who enters into such agreement.

d. The entering into a consensual agreement as set forth in this subsection (3) does not relieve the owner of any claim to a Water Right Arising Under State Law that is at issue in the Montana general stream adjudication from the obligation of prosecuting that water right claim through the Montana general stream adjudication.

e. If a consensual agreement is entered into among the Tribes, United States, the Project Operator and the owner of a Water Right Arising Under State Law described in Article III.G.3.b prior to the issuance of the final decree for Montana Water Court Basin 76L and 76 LJ, as applicable, that agreement shall terminate as a matter of law if the claimed Water Right is terminated as a result of proceedings conducted in the Montana general stream adjudication.

f. If a consensual agreement is entered into among the Tribes, the United States, the Project Operator, and the owner of a Water Right Arising Under State Law described in Article III.G.3.b prior to the issuance of the final decree for Montana Water Court Basin 76L and 76 LJ, as applicable, and such owner has a claim in the Montana general stream adjudication that is ultimately decreed a quantity of water for that claim less than the quantity established in the agreement, the consensual agreement shall protect only the lesser amount of water.

g. If the owner of a Water Right Arising Under State Law described in Article III.G.3.b ceases to use that portion of that water right in excess of the lesser of the annual FIIP quota for a given irrigation season, or an Alternate Value, pursuant to a consensual agreement as set forth in Article III.G.3:

i. that nonuse does not represent an intent by the owner of that water right to wholly or partially abandon that water right or to not comply with the terms and conditions of that right; and

ii. the period of nonuse may not create or may not be added to any previous period of nonuse to create a presumption of abandonment.

h. Any use of a Water Right Arising Under State Law subject to a consensual agreement described in this Article III.G.3 exceeding the volume of water specified in the consensual agreement shall be subject to Call by the Tribes, the United States, or the Project Operator for that amount of water in excess of the terms of the consensual agreement.

i. A Person who has both an entitlement to the delivery of water from the FIIP and a Water Right Arising Under State Law to serve the same acreage may only protect from Call, by entering into a consensual agreement pursuant to this Article III.G.3, a total quantity of water equal to the lesser of the annual FIIP quota for a given irrigation season, or an Alternate Value, for each acre served, irrespective of whether the water applied to each acre is pursuant to that Person's FIIP delivery right or that Person's Water Right Arising Under State Law.

4. Water Rights Upstream of the Reservation (Basins 76I, 76J, and 76LJ). The Tribes, on behalf of themselves and the users of any portion of the Tribal Water Right set forth in this Compact, and the United States agree to relinquish their right to exercise the Tribal Water Right to make a Call against any water right located upstream of the Flathead Reservation in Basins 76I, 76J, and 76LJ, except for those Water Rights Arising Under State Law:

a. Whose purpose is irrigation and whose source of supply is surface water, and whose point of diversion is:

i. the mainstem of the Flathead River, including Flathead Lake;

ii. the North Fork of the Flathead River;

iii. the Middle Fork of the Flathead River; or

iv. the South Fork of the Flathead River.

b. Whose purpose is irrigation, whose source of supply is Groundwater connected to one of the sources identified in Article III.G.4.a, and whose flow rate is greater than 100 gallons per minute.

c. The Tribes and the United States agree that the Tribal Water Right recognized in the Compact may not be exercised to make Call against any Water Right Arising Under State Law upstream of the Flathead Reservation and located on a tributary to the Flathead River not identified in Article III.G.4.a.

5. Water Rights on the Little Bitterroot River Outside the Reservation (Basin 76L). The Tribes, on behalf of themselves and the users of any portion of the Tribal Water Right set forth in this Compact, and the United States agree to relinquish their right to exercise the Tribal Water Right to make a Call against any Water Right Arising Under State Law whose point of diversion is outside the Flathead Reservation and whose source of supply is the Little Bitterroot River or its tributaries.

6. Any Water Right Arising Under State Law the purpose of which is irrigation and that is susceptible to Call by the Tribes pursuant to Article III.D.1.g, III.D.2.e, III.D.3.e, III.D.5.a.iv, III.D.7.e, III.G.4.a, or III.G.4.b whose purpose is changed after the Effective Date to something other than irrigation shall remain susceptible to Call pursuant to the terms and conditions of this Compact as though the purpose of the Water Right Arising Under State Law was still irrigation.

H. Water Rights Arising Under State Law Appurtenant to Lands Acquired by the Tribes. For lands acquired by the Tribes within the Reservation, the Tribes have the right to any Water Right Arising Under State Law acquired as an appurtenance to the land. Starting upon the Effective Date of the Compact, the Tribes may file a Trust Transfer form with the Board for any lands acquired by the Tribes with appurtenant Water Rights Arising Under State Law that have been taken into trust by the United States on behalf of the Tribes, as provided in the Law of Administration and the water right appurtenant to the land shall be transferred to the Tribal Water Right quantified in this Compact with a priority date of July 16, 1855, provided that the Tribes shall continue to use the acquired water right as it was historically used or may change the use of the acquired water right pursuant to the provisions for change of use set forth in Article IV.B.4 and the Law of Administration. Such transfer does not shield the underlying right from abandonment based on acts or omissions of the holder of that water right prior to its acquisition by the Tribes.

ARTICLE IV - IMPLEMENTATION OF COMPACT

A. Trust Status of Tribal Water Right. The Tribal Water Right shall be held in trust by the United States for the benefit of the Tribes, their members and Allottees.

B. Use of Tribal Water Right.

1. Persons Entitled to Use the Tribal Water Right. The Tribal Water Right may be used by the Tribes, their members, Allottees, or their lessees or assigns. FIIP customers who have assessed land within the FIIP who are in compliance with the applicable BIA rules and guidelines are entitled to have delivered an equitable share of the FIIP Water Use Right as provided by Article IV.D.2.

2. Effect of Non-Use of the Tribal Water Right. Non-use of all or any portion of the Tribal Water Right described in Article III shall not constitute a relinquishment, forfeiture, or abandonment of such right.

3. Review of Registration of Existing Uses of the Tribal Water Right.

a. Within five (5) years after the Effective Date, the Board shall provide the DNRC with a report, in a form materially consistent with that of abstracts of water rights decreed by the Montana Water Court, of the Tribal Water Right registered pursuant to the Law of Administration as being in existence as of the Effective Date.

b. Within six (6) months after receipt of the report, the DNRC must agree, agree in part, or disagree with the report. If the DNRC takes no action by the end of the six-month period after the report is received, the report shall be deemed accepted. If the DNRC agrees in part or disagrees with the report, the State, the Tribes, and the United States shall meet within ninety (90) days of issuance of the DNRC's notice of disagreement in an effort to resolve the issue(s) giving rise to the disagreement. If, after meeting and conferring, the State, the Tribes, and the United States are still unable to come to agreement on the list of Existing Uses, all disagreements over the contents of the list must be brought to the Water Management Board for resolution of the dispute under Article IV.I.4.c within 180 days of the issuance of the DNRC's notice of disagreement.

4. Changes in Use of the Tribal Water Right. Any user of a portion of the Tribal Water Right who proposes a change of such use must seek authorization to change the use of that portion of the right. Such applications for authorization to change a use shall be heard and decided by the Board pursuant to Article IV.I.4.b of the Compact and the Law of Administration, provided that the Board may not consider any change application of Flathead System Compact Water unless the applicant has secured the written consent of the Tribal Council to apply for a Change in Use authorization.

5. New Development of the Tribal Water Right.

a. The Tribes, or any Person with authorization from the Tribes, may develop a new use of the Tribal Water Right on the Reservation after the Effective Date. Such development may only proceed upon the issuance of an Appropriation Right for the New Development by the Board pursuant to Article IV.I.4.a and the Law of Administration.

b. The Tribes, or any Person with authorization from the Tribes, may develop a new use of the Flathead System Compact Water Right set forth in Article III.C.1.c off the Reservation after the Effective Date, but only after complying with the provisions of Article IV.B.5.c.

c. Any New Development by the Tribes of a portion of the Tribes' Flathead System Compact Water Right off the Reservation shall be treated as a change in use. The DNRC shall process each change application pursuant to the provisions of 85-2-302, 85-2-307 through 85-2-310, and 85-2-314, MCA. Prior to developing Flathead System Compact Water for beneficial use off the Reservation, the Tribes must comply with the provisions of subsections (1) through (3) and (8) through (17) of 85-2-402, MCA, as those provisions read on December 31, 2014.

d. In the event that, after the date the ratification of the Compact by the Montana Legislature takes effect under State law, the Montana Legislature substantively amends or repeals any of the sections identified in Article IV.B.5.c, the Tribes and the DNRC shall meet no later than 60 days after the effective date of the State legislative action amending or repealing to determine if they can agree whether the provisions of State law set forth in Article IV.B.5.c or the new provisions of State law shall govern the process for off-Reservation development of new uses of the Flathead System Compact Water Right set forth in Article III.C.1.c. In the event that the Tribes and the DNRC are unable to agree, the provisions of State law identified in Article

IV.B.5.c shall remain in effect. Such modifications are pursuant to, and shall not be deemed an amendment of, this Compact.

e. If the Tribes' use of Flathead System Compact Water off the Reservation involves diversion works or facilities for the transport of water located off the Reservation, the Tribes shall apply for and obtain all permits, certificates, variances and other authorizations required by State laws regulating, conditioning or permitting the siting, construction, operation, alteration or use of any equipment, device, facility or associated facility proposed to use or transport water, prior to exercising a use of the Flathead System Compact Water Right off the Reservation.

6. Lease of the Tribal Water Right.

a. Lease of the Tribal Water Right generally.

i. Pursuant to the terms and conditions of this Compact, the Tribes may Lease, for use on or off the Reservation, any portion of the Tribal Water Right set forth in Article III.C.1.a, b, i, and j; provided, that either the Tribes or its assignee, on behalf of the Tribes, first comply with the procedures for changing the use of water rights set forth in subsections iii and iv of this Article IV.B.6.a, as applicable.

ii. The Tribes may make or authorize a Lease of the Tribal Water Right for use within or outside the Reservation; provided that, any Lease shall be for a term not to exceed 99 years, and may include provisions authorizing renewal for an additional term not to exceed 99 years. The off-Reservation use of any portion of the Tribal Water Right is limited to a place of use within the Flathead or Clark Fork River Basins in Montana.

iii. A Lease of the Tribal Water Right shall not adversely affect a Water Right Arising Under State Law with a priority date before the date of the Lease or an Appropriation Right issued pursuant to this Compact with a priority date before the date of the Lease. Uses of the Tribal Water Right being exercised prior to the date of the Lease shall not be adversely affected by a Lease of the Tribal Water Right, except that the Tribes may allow uses of the Tribal Water Right on Tribally owned land to be adversely affected by declining to object to the Change in Use application associated with the Lease.

1. If the Lease is for use on the Reservation, the determination of adverse effect shall be made by the Water Management Board pursuant to the process set forth regarding applications for Change in Use authorizations under the Law of Administration.

2. If the Lease is for use off the Reservation, the Lease shall be treated as a change in use. The DNRC shall process each change application pursuant to the provisions of 85-2-302, 85-2-307 through 85-2-310, and 85-2-314, MCA. Prior to the lessee putting leased water to beneficial use, the Tribes or their assignee, on behalf of the Tribes, must comply with the following provisions of State law as those provisions read on December 31, 2014:

a. Subsections (1) through (3) and (8) through (17) of 85-2-402, MCA;

b. Subsections (1) through (8) of 85-2-407, MCA, provided, that the term of any such Lease may be for up to 99 years, and the DNRC may approve the renewal of such a Lease for a period of up to 99 years; and

c. 85-2-408, MCA, as limited by the provisions of Article IV.B.6.a.iii.2.a.

iv. In the event that, after the date the ratification of the Compact by the Montana Legislature takes effect under State law, the Montana Legislature substantively amends or repeals any of the sections identified in Article IV.B.6.a.iii.2, the Tribes and the DNRC shall meet, no later than 60 days after the effective date of the State legislative action amending or repealing, to determine if they can agree whether the provisions set forth in Article IV.B.6.a.iii.2 or the new provisions of State law shall govern the process for off-Reservation Leases under this Compact. In the event that the Tribes and the DNRC are unable to agree, the provisions of Article IV.B.6.a.iii.2 shall remain in effect. Such modifications are pursuant to, and shall not be deemed an amendment of, this Compact.

v. The Tribes or any Person using diversion works or facilities for the transportation of water located off the Reservation in connection with a use of the Tribal Water Right shall apply for and obtain all permits, certificates, variances and other authorizations required by State laws regulating, conditioning or permitting the siting, construction, operation, alteration or use of any equipment, device, or facility proposed to use or transport water, prior to exercising a use of the Tribal Water Right off the Reservation.

b. Lease of the Tribal Water Right by an Individual Indian Owner.

i. An Individual Indian Owner may enter into a Lease to authorize a Person or Persons to use the Individual Indian Owner's allocated portion of the Tribal Water Right on the Reservation.

ii. If the lessee intends to put the water to beneficial use in a manner different than how the Individual Indian Owner had been using the water prior to the date of the Lease, the Individual Indian Owner or the lessee must comply with the provisions of the Law of Administration pertaining to securing Change in Use authorizations from the Water Management Board before the use of water may be changed.

iii. Any Lease entered into pursuant to subsection b of this section may be for a term not to exceed 25 years, and may include provisions authorizing renewal for an additional term not to exceed 25 years.

iv. A Lease of the Tribal Water Right by an Individual Indian Owner shall not adversely affect a Water Right Arising Under State Law with a priority date before the date of the Lease or an Appropriation Right issued pursuant to this Compact with a priority date before the date of the Lease. Uses of the Tribal Water Right being exercised prior to the date of the Lease shall not be adversely affected by a Lease of the Tribal Water Right by an Individual Indian Owner, except that the Tribes may allow uses of the Tribal Water Right on Tribally owned land to be adversely affected by declining to object to the Change in Use application associated with the Lease.

c. Lease of the Flathead System Compact Water Right.

i. Pursuant to the terms and conditions of this Compact, the Tribes may Lease Flathead System Compact Water for use on or off the Reservation, provided that either the Tribes or their lessee comply with the Law of Administration and the relevant provisions of this section, as applicable.

ii. The Tribes shall make available Flathead System Compact Water for short-term Lease within the FIIP or the FIIP Influence Area pursuant to the Shared Shortages provisions set forth at Article IV.E. The Lease term may not exceed the period during which Shared Shortage provisions are in effect. The baseline annual price for this water shall be $8 per Acre-foot plus a $25 administrative fee per Lease as of July 1, 2015. From that date, the baseline annual price and the administrative fee shall be indexed for inflation and consequently adjusted annually on July 1st of each successive year thereafter (the Adjustment Date) by the percentage change over the previous twelve months in the most recent monthly Consumer Price Index for All Urban Consumers (CPI-U) published by the United States Department of Labor, Bureau of Labor Statistics, or such other index as the Parties may agree to use. The initial price for each Lease of any portion of the Flathead System Compact Water entered into during that year pursuant to the Shared Shortage provisions contained in Article IV.E shall be the adjusted baseline price. During the term of any given Lease, the price per Acre-foot shall continue to adjust annually on the Adjustment Date by the percentage change in the CPI-U, or such other index as the Parties may agree to use, of the previous twelve-month period. The foregoing provisions regarding the adjusted baseline price and per-Lease administrative fee shall constitute the sole and exclusive price terms of each Lease entered under this Article IV.B.6.c.ii. Any modifications of the index are pursuant to, and shall not be deemed an amendment of, this Compact.

iii. The Tribes may make or authorize a Lease of the Tribal Water Right for use within or outside the Reservation; provided that, any Lease shall be for a term not to exceed 99 years, and may include provisions authorizing renewal for an additional term not to exceed 99 years. The off-Reservation use of any portion of the Tribal Water Right is limited to a place of use within the Flathead or Clark Fork River Basins in Montana.

iv. If the Lease is for a portion of the Tribes' Flathead System Compact Water right to be delivered wholly from water stored in Hungry Horse Reservoir, the Tribes shall provide notice to the DNRC and the Water Management Board, in advance of the effective date of the Lease, of the terms of the Lease and any modifications thereto or termination thereof. For Leases lasting one irrigation season or less, notice to the DNRC and the Water Management Board shall be provided as far in advance as practicable. For Leases lasting longer than one year, notice shall be provided to the DNRC and the Water Management Board by the later of 120 days prior to the date on which the Lease is to take effect or March 31 of the year in which the Lease is to take effect. The point of delivery for a Lease shall be the outlet works at the Hungry Horse Dam.

If disputes arise between or among holders of Water Rights Arising Under State Law as to the reasonable transmission and carriage losses from the point of delivery to the place of use of the Lease, the district court pursuant to its powers and duties under Title 85, Chapter 5, MCA, shall calculate such losses.

v. Any Lease or portion of a Lease to be delivered from water stored in Hungry Horse Reservoir is subject to reduction due to conditions defined in Appendix 8 on a pro rata basis as set forth in Article III.C.1.c.iii.

vi. If the Lease is for the off-Reservation use of a portion of the Tribes' Flathead System Compact Water right to be delivered from a combination of stored water and direct flow water from the Flathead River, or exclusively from direct flow water from the Flathead River, the Lease shall be treated as a change in use as it pertains to the use of the direct flow water. The DNRC shall process each change application pursuant to the provisions of 85-2-302, 85-2-307 through 85-2-310, and 85-2-314, MCA. Prior to the lessee putting leased water to beneficial use, the Tribes or the lessee must comply with the following provisions of State law as those provisions read on December 31, 2014:

1. Subsections (1) through (3) and (8) through (17) of 85-2-402, MCA;

2. Subsections (1) through (8) of 85-2-407, MCA, provided, however, that the term of any such Lease may be for up to 99 years, and the DNRC may approve the renewal of such a Lease for a period of up to 99 years; and

3. 85-2-408, MCA, as limited by the provisions of Article IV.B.6.c.vi.1.

vii. In the event that, after the date the ratification of the Compact by the Montana Legislature takes effect under State law, the Montana Legislature substantively amends or repeals any of the sections identified in Article IV.B.6.c.vi.1 through 3, the Tribes and the DNRC shall meet no later than 60 days after the effective date of the State legislative action amending or repealing to determine if they can agree whether the provisions set forth in Article IV.B.6.c.vi.1 through 3 or the new provisions of State law shall govern the process for off-Reservation Leases under this Compact. In the event that the Tribes and the DNRC are unable to agree, the provisions of Article IV.B.6.c.vi.1 through 3 shall remain in effect. Any agreed upon modifications are pursuant to, and shall not be deemed an amendment of, this Compact.

viii. The Tribes or any Person using diversion works or facilities for the transportation of water located off the Reservation in connection with a use of the Flathead System Compact Water Right shall apply for and obtain all permits, certificates, variances and other authorizations required by State laws regulating, conditioning or permitting the siting, construction, operation, alteration or use of any equipment, device, or facility proposed to use or transport water, prior to exercising a use of the Flathead System Compact Water Right off the Reservation.

7. Lease of 11,000 Acre-Feet per Year of Water From Hungry Horse Reservoir for Off-Reservation Mitigation.

a. The Tribes shall make available for Lease off the Reservation 11,000 Acre-feet of the water identified in Article III.C.1.c.i stored in Hungry Horse Reservoir pursuant to the process, and subject to the terms and conditions, set forth in this Article IV.B.7.

b. The water identified in Article IV.B.7.a shall be available for the mitigation of net depletions arising from new or existing domestic, commercial, municipal and/or industrial uses of water at any point in the Flathead or Clark Fork Basins in Montana for which the 11,000 Acre-feet per year of water is capable of providing mitigation.

c. The DNRC, under Title 85, MCA, shall retain the responsibility for determining if, when, where, and how much mitigation water is needed for any proposed new development and if the water identified in Article IV.B.7.a meets the appropriate mitigation criteria for any proposed mitigation plan.

d. The water identified in Article IV.B.7.a is subject to reduction due to conditions defined in Appendix 8 on a pro rata basis as set forth in Article III.C.1.c.iii.

e. The mechanism for entering into a Lease for any portion of the water set forth in this Article IV.B.7.a shall be as follows:

i. Any interested Person may approach the Tribes, through the Tribal Lands Department or successor Tribal department, to negotiate a Lease of a portion of this water;

ii. The baseline annual per Acre-foot price for this water shall be set at $40 as of July 1, 2015. From that date, the baseline price shall be indexed for inflation and consequently adjusted annually on July 1st of each year thereafter (the Adjustment Date) by the percentage change over the previous year in the most recent monthly Consumer Price Index for All Urban Consumers (CPI-U) published by the United States Department of Labor, Bureau of Labor Statistics, or such other index as the Parties may agree. The initial price for each Lease of any portion of the 11,000 Acre-feet identified in this Article IV.B.7 entered into during that year shall be the adjusted baseline price. During the term of any given Lease, the price per Acre-foot shall continue to adjust annually on the Adjustment Date by the percentage change in the CPI-U, or such other index as the Parties may agree to use, of the previous twelve-month period. The foregoing provisions regarding the adjusted baseline price shall constitute the sole and exclusive price term of each Lease;

iii. Each Lease between the Tribes and a lessee shall be for a term of 99 years, with the lessee holding an option to renew for an additional 99 years, unless the Tribes and the lessee affirmatively agree on an alternate duration not to exceed 99 years. Any Lease including a term of alternate duration may also include an option to renew for a term not to exceed 99 years; and

iv. The Tribes and each prospective lessee shall negotiate any and all other non-price terms of the Lease arrangement.

f. In the event of an impasse between the Tribes and a prospective lessee over any non-price term, the prospective lessee may file a notice of impasse with the Water Management Board, invoking the Board's authority to resolve any such impasse pursuant to the process set forth in Article IV.B.7.g.

g. Process for resolving disputes over Lease terms.

i. Upon receipt of a notice of impasse, the Board shall date stamp it. Within three days of the filing of a notice of impasse, the Board shall provide notice of the filing to the Tribes, with a copy to the prospective lessee, identifying a date certain between 30 and 60 days from the date of receipt of the notice for the Tribes and the prospective lessee each to submit a last, best offer concerning all of the non-price terms.

ii. No later than the date set by the Board, the Tribes and the prospective lessee shall file a last, best offer with the Board in the form of a proposed Lease agreement and shall serve the same on each other. To be filed, the offer must be placed in the custody of the Board within the time fixed for filing. Filing may be accomplished by mail addressed to the Board, but filing shall not be timely unless the papers are actually received within the time fixed for filing. Immediately upon receipt by the Board, the offers shall be date stamped. If the Tribes fail to timely file an offer, the offer filed by the prospective lessee shall become the terms of the Lease. If the prospective lessee fails to timely file an offer, no Lease shall be concluded.

iii. The Board shall issue a decision selecting one side's offer or the other's between 15 and 45 days after the filing of the offer. At any time prior to the Board's decision, the prospective lessee may choose to withdraw the prospective lessee's offer and decline to enter into the Lease.

iv. The Board shall provide notice of its decision to both the Tribes and the prospective lessee. The Lease shall be concluded on the terms selected by the Board, but must include the price term identified in Article IV.B.7.e.ii of this Compact. The effective date of the Lease shall be ten days after the Board's issuance of its decision.

v. The Tribes or a prospective lessee dissatisfied with a decision of the Board made pursuant to this Article IV.B.7.g may appeal that decision by filing a petition for judicial review with a Court of Competent Jurisdiction within 30 days of the issuance of the Board's decision. The court shall review the Board's decision for abuse of discretion.

C. Exercise of Certain Portions of the Tribal Water Right Related to the FIIP.

1. Priority for the Exercise of the FIIP Instream Flow and FIIP Water Use Rights. Once the water rights described in Article III.C become enforceable, the following relative priorities among those rights shall apply:

a. Minimum Enforceable Instream Flows.

b. Minimum Reservoir Pool Elevations.

c. River Diversion Allowances.

d. Target Instream Flows.

2. Reallocated Water in excess of Target Instream Flows will be split as equally as hydrologically practicable between the Instream Flow water rights set forth in Article III.C.1.d.ii and the FIIP Water Use Right set forth in Article III.C.1.a.

3. MEF and TIF implementation and schedule. Exercise of FIIP Instream Flow Rights set forth in Article III.C.1.d.ii shall be accomplished through the implementation and enforcement of MEFs and TIFs and is subject to the Shared Shortage and Adaptive Management provisions set forth in Article IV.E and F and Appendix 3.5.

a. MEFs and TIFs shall be enforceable at the values set forth in Appendix 3.1.

b. Implementation and enforceability of MEFs and TIFs.

i. Incremental implementation of Operational Improvements will result in additional FIIP Instream Flow.

ii. MEFs and TIFs shall be enforceable following the completion of Operational Improvements according to the schedule attached hereto as Appendix 3.4.

iii. Reallocated Water from Rehabilitation and Betterment Projects shall be used to incrementally achieve FIIP Instream Flows set forth in Article III.C.1.d.ii.

iv. If the schedule attached hereto as Appendix 3.4 cannot be met due to lack of available funding or other circumstances outside of the control of the Parties or Project Operator, the Parties may agree to adjust the schedule as necessary to allow for timely implementation of MEFs and TIFs. Such modifications are pursuant to, and shall not be deemed an amendment of, this Compact.

v. If the Project Operator fails to implement the schedule attached hereto as Appendix 3.4 due to acts, errors, or omissions of the Project Operator, MEFs and TIFs will be enforceable as though the schedule had been implemented.

c. Until an MEF has become enforceable, the interim Instream Flow, where applicable, for that location shall be the enforceable Instream Flow. Where the Instream Flow has been incrementally increased above the interim Instream Flow level as a result of the partial completion of actions listed in the Implementation Schedule attached hereto as Appendix 3.4, the incrementally achieved level may be maintained until the MEF is achieved.

d. Until a Minimum Reservoir Pool Elevation has become enforceable, the interim reservoir pool elevation, where applicable, for that location shall be enforced.

e. TIFs shall be determined seasonally according to Appendix 3.5, and will vary between the wet and normal year levels attached hereto as Appendix 3.1.

4. Minimum Reservoir Pool Elevations. Minimum Reservoir Pool Elevations attached hereto as Appendix 3.1 shall be enforceable according to the schedule specified in Appendix 3.4. Enforceability of Minimum Reservoir Pool Elevations is subject to Article IV.E, Appendix 3.5, and superseding Federal law allowing for regulation of reservoir elevations.

D. Exercise of the FIIP Water Use Right.

1. FIIP Water Use Right.

a. The FIIP Water Use Right shall be satisfied by meeting the RDA values for each RDA Area attached hereto as Appendix 3.2 and as evaluated pursuant to Article IV.D.1.e.

b. RDAs shall be enforceable according to the schedule attached hereto as Appendix 3.4, subject to evaluation pursuant to Article IV.D.1.e.

c. Headworks diversion amounts shall be progressively adjusted to achieve the RDAs as Operational Improvements are completed pursuant to Appendix 3.4.

d. Once RDAs are achieved through completion of Operational Improvements, headworks diversion amounts shall be progressively adjusted as Rehabilitation and Betterment is completed pursuant to Appendix 3.6. The enforceable RDA for the location in which a particular Rehabilitation and Betterment project has been completed is the amount defined in Appendix 3.2, reduced by the volume of Reallocated Water made available by that Rehabilitation and Betterment project. The amount actually diverted may be adjusted pursuant to the evaluation process described in Article IV.D.1.e.

e. RDA values shall be evaluated to ensure their adequacy to meet Historic Farm Deliveries. Initial evaluation of RDAs shall occur once the Parties and Project Operator have completed all Operational Improvements in a given RDA Area according to the schedule attached hereto as Appendix 3.4. Evaluation of RDAs will continue as part of the responsibilities of the CITT described in Appendix 3.5 as follows:

i. The Project Operator must measure and record farm turnout deliveries within a given RDA Area.

ii. If the aggregate measured deliveries to farm turnouts do not meet Historic Farm Deliveries for a given RDA Area, actual diversions shall be adjusted to assure that Historic Farm Deliveries are met for wet, normal and dry water years. If water in excess of the RDA is needed to meet Historic Farm Deliveries, it will be provided through an increase of the Flathead River pumping plant diversion allowed by the Flathead Pumping Station RDA attached hereto as Appendix 3.2. If the aggregate measured deliveries to farm turnouts exceed Historic Farm Deliveries within an RDA Area, the actual diversions shall be reduced accordingly.

iii. Any adjustment of actual diversions pursuant to this section shall not result in decrease of the MEFs, TIFs, or Minimum Reservoir Pool Elevations.

f. RDAs are quantified for wet, normal, and dry Natural Flow years, attached hereto as Appendix 3.2, and shall be set each year according to the process specified in Appendix 3.5.

2. FIIP Delivery Entitlement Statement. Assessed land within the FIIP is entitled to have water delivered by the Project Operator if the FIIP customer is in compliance with the applicable BIA rules and guidelines for FIIP. Beginning on the Effective Date, an owner of assessed land within the FIIP may request of the Project Operator a delivery entitlement statement, which must be tendered within 90 days of the request or denied for cause. Beginning on the date one year after the Effective Date, the delivery entitlement statement must be tendered or denied within 30 days. The delivery entitlement runs with the land and is valid so long as the land remains assessed and the FIIP customer is in compliance with the applicable BIA rules and guidelines for FIIP.

E. Shared Shortages Provision.

1. In the event that water supplies are inadequate to simultaneously satisfy an enforceable Instream Flow water right and a corresponding RDA, the provisions of Article IV.E govern the exercise of the water rights set forth in Articles III.C.1.a and III.C.1.d.ii and iv at that location. The CITT shall determine when Shared Shortages conditions begin and end as specified in Appendix 3.5.

2. For purposes of Article IV.E, once MEFs and RDAs have become enforceable, they shall be maintained at the levels set forth in Appendices 3.1 and 3.2, as adjusted pursuant to Article IV.D.1.e. Prior to enforceability of the MEF and RDA levels attached hereto as Appendices 3.1 and 3.2, Instream Flows will be maintained as provided by Article IV.C.3.c and RDAs will be maintained as provided by Article IV.D.1.b and c.

3. Subject to the priority system set forth in Article IV.C.1, RDAs shall be maintained by implementing the following measures in the order of priority set forth below:

a. Available Natural Flow or regulated streamflow shall be diverted by the Project Operator to satisfy RDAs.

b. If the application of Article IV.E.3.a does not satisfy RDAs, Flathead River pumping plant diversions shall be increased as allowed by the Flathead Pumping Station RDA attached hereto as Appendix 3.2.

c. If the application of Article IV.E.3.a and b does not satisfy RDAs, FIIP reservoirs may be reduced below the Minimum Reservoir Pool Elevations specified in Appendix 3.1 to supply RDAs, subject to Article IV.E.5.

d. If the application of Article IV.E.3.a through c does not satisfy RDAs, the Tribes shall make available for short-term lease Flathead System Compact Water for use within the FIIP as provided by Article IV.B.6.c.ii.

4. Within the Basin 76LJ portion of the Little Bitterroot Valley, RDAs shall be maintained by sequentially applying the procedures in Article IV.E.3.a through c, where applicable.

5. As set forth in Article IV.E.3.c, FIIP reservoirs may be reduced below the Minimum Reservoir Pool Elevations set forth in Article III.C.1.e to support RDAs as follows:

a. FIIP reservoirs may be reduced pursuant to this section for no more than four consecutive years.

b. Article IV.E.3.c does not apply to Mission Reservoir.

c. FIIP reservoirs may not be reduced below the interim reservoir pool elevations set forth in Article III.C.1.e.iv and attached hereto as Appendix 13.

d. RDAs may be met from carryover reservoir storage, at the discretion of the Project Operator.

F. Requirement to Implement Adaptive Management and Water Measurement.

1. The Parties agree that Adaptive Management and a comprehensive water measurement program, as described in Appendix 3.5, are essential to the successful implementation of this Compact.

2. The Parties, upon mutual written agreement, and in conformance with the Compact and other applicable provisions of law, may amend Appendix 3.5. Such modifications are pursuant to, and shall not be deemed an amendment of, this Compact.

G. Compact Implementation Technical Team. Within six months of the date the ratification of the Compact by the Montana Legislature takes effect under State law, the Parties shall establish a Compact Implementation Technical Team (CITT) to allow planning for and implementation of Operational Improvements, Rehabilitation and Betterment, and Adaptive Management prior to and following the Effective Date.

1. The CITT membership shall be as provided for in Appendix 3.5.

2. The CITT shall carry out the duties specified by Appendix 3.5.

3. The CITT shall develop criteria for prioritizing and selecting projects.

4. Public Meetings and Records:

a. All regularly scheduled meetings of the CITT shall be open to the observation of the general public pursuant to State and Tribal open meeting laws. Where there is a conflict of laws, the law that provides for greater openness to the public applies.

b. CITT records are public records and shall be made available to the public for inspection under such reasonable terms and conditions as the CITT shall establish.

5. Disputes Related to the Compact Implementation Technical Team. The Parties agree to perform each obligation set forth in this Compact in good faith and with diligence and loyalty to this agreement. The Parties shall form a Compact Management Committee (CMC) comprised of the Director of the Montana Department of Natural Resources, the Chairman of the Tribal Council, and the Regional Director of the Northwest Region of the Bureau of Indian Affairs or their designees. The CMC will provide policy and administrative oversight of the CITT.

a. The CITT shall attempt to reach consensus on all of its actions.

b. Where consensus is not achieved, the CITT will resolve disputed issues by majority vote.

c. If the CITT vote results in a tie, or is appealed, the disputed issue will be referred to the CMC. The CMC will review and attempt to reach consensus on the disputed issue and if consensus is not possible, will resolve the issue by majority vote.

d. A majority vote of the CMC may be appealed using the following procedures:

i. Disputes arising out of any act, failure to act, error or omission of the BIA or Project Operator involving Operational Improvements or Rehabilitation and Betterment or otherwise affecting real property owned by the United States may be appealed under Title 25, Part 2, Code of Federal Regulations.

ii. For disputes raising questions of Compact interpretation, the CMC shall immediately seek a determination of those questions from the Water Management Board, which determination will be provided in writing within 30 days.

iii. All other disputes may be appealed to a Court of Competent Jurisdiction. In considering a petition for relief, a Court of Competent Jurisdiction will review the CMC's legal conclusions for correctness and its factual findings for abuse of discretion.

H. Power Provisions

1. Low-Cost Block of Power

The Parties recognize that Article 40 of the Kerr Project License, as amended, jointly issued to the Montana Power Company and the Tribes for the Kerr Project, Project No. 5, requires Montana Power Company, through its successor-in-interest, NorthWestern Energy, to make available the capacity and energy up to 3.734 megawatts at up to 100 percent load factor during the months of April through October to the United States, for and on behalf of the FIIP, at the rates set forth in and adjusted in accordance with such Article.

The Parties agree that the Kerr Project License Article 40 Low Cost Block of Power is equivalent to the delivery of 19,178,000 kilowatt hours of electricity per year, and generally supplies electricity necessary to pump approximately 46,000 Acre-feet of water per year to the FIIP. If the operation and maintenance, and all other rights and responsibilities for the Kerr Project are assumed by the Tribes or their wholly-owned corporation, the Tribes agree, to the extent permitted under applicable license(s) and Federal law, to make the Low Cost Block of Power available in the same manner and at the same rates, as adjusted, as NorthWestern Energy. If the Tribes seek a new license for the Kerr Project, the Tribes or their wholly-owned corporation, agree that their license application will request authority from FERC to make the Low Cost Block of Power available in the same manner and at the same rates, as adjusted, as NorthWestern Energy.

2. Net Power in Excess of Low Cost Block

For purposes of Article IV.E, power required to run the Flathead Pumping Station in excess of the Low Cost Block of Power identified in Article IV.H.1 shall be purchased at the price at which Mission Valley Power sells power for irrigation purposes.

3. Net Power Revenues

The State and Tribes agree to seek provisions in the Federal legislation ratifying this Compact for Mission Valley Power to budget annually for an anticipated amount of $200,000 of Net Power Revenues to be made available in the subsequent year to meet the needs of both the power system and the FIIP with an initial allocation of the Net Power Revenue that provides fifty percent to the Project Operator and fifty percent to the Tribes. These funds shall only be used for work on the FIIP that has significant fisheries, water conservation, or water management benefits. If on an annual basis such work by the Project Operator or the Tribes does not require the full amount of such net revenues the remainder shall be set aside and accumulated for future expenditure for these purposes. This initial allocation may be changed by mutual agreement of the Parties within nine (9) years of the Effective Date, with any subsequent agreement to become effective on the tenth (10th) anniversary of the Effective Date. Any such modification is pursuant to, and shall not be deemed an amendment of, this Compact.

I. Administration: Establishment of Flathead Reservation Water Management Board.

1. Establishment of Board. There is hereby established the Flathead Reservation Water Management Board. Upon the Effective Date, the Board shall be the exclusive regulatory body on the Reservation for the issuance of Appropriation Rights and authorizations for Changes in Use of Appropriation Rights and Existing Uses, and for the administration and enforcement of all Appropriation Rights and Existing Uses. The Board shall also have exclusive jurisdiction to resolve any controversy over the meaning and interpretation of the Compact on the Reservation, and any controversy over the right to the use of water as between the Parties or between or among holders of Appropriation Rights and Existing Uses on the Reservation except as explicitly provided otherwise in Article IV.G.5. The jurisdiction of this Board does not extend to any water rights whose place of use is located outside the exterior boundaries of the Reservation.

2. Membership.

a. Voting Members. The Board shall consist of five voting members: two members selected by the Governor of the State pursuant to Article IV.I.2.b, after consultation with holders of Water Rights Arising Under State Law located on the Reservation; two members appointed by the Tribal Council; and one member selected by the other four members. All members shall be appointed within six months of the Effective Date.

b. Appointment by Governor. Within 90 days of the Effective Date, or 15 days of any vacancy in one or more of the Board positions selected by the Governor, the commissioners of each county whose boundaries include any portion of the Reservation shall nominate individuals for the Governor's consideration for appointment to the Board as follows:

i. The Commissioners of Lake County shall choose five (5) nominees;
ii. The Commissioners of Sanders County shall choose three (3) nominees;
iii. The Commissioners of Missoula County shall choose two (2) nominees;
iv. The Commissioners of Flathead County shall choose one (1) nominee; and
v. Each nominee must meet the eligibility requirements of Article IV.I.2.f.

The Governor shall choose two Board members from the group of nominees. If the county commissioners fail to nominate a minimum of seven (7) individuals for selection by the Governor within the time set forth in Article IV.I.2.b, the Governor may select any two individual(s) who meet the eligibility requirements set forth in Article IV.I.2.f after consultation with Holders of Water Rights Arising Under State Law located on the Reservation.

c. Should the four appointed members fail to agree on the selection of a fifth voting member within sixty days of the date of appointment of the fourth member, or within thirty days after any vacancy in that fifth position occurs, the following procedure shall be utilized:

i. Within five days thereafter the two members appointed by the Tribal Council shall nominate three individuals to serve as a member of the Board and the two members appointed by the Governor shall nominate three individuals to serve as a member of the Board;

ii. Within fifteen days thereafter the two members appointed by the Tribal Council shall reject two of the individuals nominated by the two members appointed by the Governor, and the two members appointed by the Governor shall reject two of the individuals nominated by the two members appointed by the Tribal Council; and

iii. Within five days thereafter, the remaining two nominees shall be submitted to the Chief Judge of the United States District Court for the District of Montana for selection of the fifth member of the Board.

d. Ex Officio Member. The Board shall also have a sixth, non-voting member appointed by the Secretary.

e. Term. Initially, three voting members of the Board shall serve for four years, and two shall serve for two years. One member appointed by the Governor, one member appointed by the Tribal Council and the fifth voting member shall serve for four years. One member appointed by the Governor and one member appointed by the Tribal Council shall serve for two years. The member appointed by the Secretary shall be appointed for four years. At the expiration of the initial two-year appointments, all subsequently appointed Board members shall serve four year terms.

f. Eligibility. To be eligible to serve on the Board, an individual must be over 18 years of age and be a Reservation resident. For the purposes of filling a position on the Water Management Board, a Reservation resident is an individual who:

i. does business within Flathead Indian Reservation boundaries;

ii. is domiciled within Flathead Indian Reservation boundaries; or

iii. owns and maintains a seasonal residence within Flathead Indian Reservation boundaries.

An eligible individual must also have education and experience in one or more of the following fields: natural resources management, public administration, agriculture, engineering, commerce or finance, hydrology, biological sciences, water law or water policy.

No elected official of the State of Montana, or any political subdivision thereof, or of the United States, or of the Tribes is eligible for nomination to the Board while holding such elective office. However, a nominee for Board membership shall not be disqualified by reason of the fact that he or she is an employee or contractor of the State of Montana or any political subdivision thereof, or of the Tribes, or of the United States.

No Board member may vote on any application or appeal that the member participated in personally and substantially in any non-Board capacity.

g. Vacancies. Subject to the provisions of Article IV.I.2.a and c regarding the filling of a vacancy of the fifth member of the Board, upon the occurrence of any other vacancy in a Board position, the Tribal Council, if the vacancy is in a position appointed by the Tribal Council, or the Governor, if the vacancy is in a position appointed by the Governor, shall name a new Board member within 30 days of the occurrence of the vacancy. Should Board action be required during the period of any such vacancy, the Department Head of the Tribal Natural Resources Department, if the vacancy is in a position appointed by the Tribal Council, or the Director of the DNRC, if the vacancy is in a position appointed by the Governor, shall fill the vacant position on an acting basis until a new appointment is made.

h. Compensation and Expenses of the Board. Each Board member shall receive such compensation for services and reimbursement for expenses for attendance at Board meetings as shall be fixed by the State and the Tribal Council for the Board members appointed by the same. The compensation for the fifth Board member shall be set jointly by the State and the Tribal Council. The expenses of the Federal ex officio member shall be covered by the United States.

3. Quorum and Vote Required. Four Board members appointed pursuant to Article IV.I.2.a shall constitute a quorum. No Board action may be voted upon in the absence of a quorum. All Board decisions shall be by affirmative vote of a majority of the Board, except as set forth

in Article IV.I.5.d for the appointment of water commissioners. If a proposal put to a vote of a quorum of Board members ends in a tie vote, the proposal is deemed disapproved or denied.

4. Jurisdiction of the Board.

a. Issuance of Appropriation Rights. Upon the Effective Date, the Board shall have exclusive jurisdiction over the issuance of all new Appropriation Rights on the Reservation. The process for the consideration, issuance or denial of all Appropriation Rights is set forth in the Law of Administration.

b. Authorizations for Changes in Use. Upon the Effective Date, the Board shall have exclusive jurisdiction over the issuance of authorizations for Changes in Use of all water rights on the Reservation. The process for the consideration, issuance or denial of such Change in Use authorizations is set forth in the Law of Administration.

c. Enforcement. Upon the Effective Date, the Board shall have the jurisdiction to enforce the terms of this Compact as provided by Article IV.I.1. All controversies cognizable under this subsection shall be heard and resolved pursuant to the Compact and the Law of Administration.

d. Water Right Ownership Updates. The Board shall not have jurisdiction over water right ownership updates on water rights appurtenant to fee lands, which shall remain with the DNRC as set forth in 85-2-421 through 85-2-424, 85-2-426, and 85-2-431, MCA.

5. Powers and Duties.

a. In General. The Board shall have the power to promulgate procedures, prescribe forms, develop additional materials and implement amendments thereto as may be necessary and proper to exercise its jurisdiction and carry out its assigned functions under this Compact and the Law of Administration. A set of forms for initial use by the Board in the implementation of the Law of Administration is attached hereto as Appendix 37. The Board may amend these forms at its discretion. Such modifications are pursuant to, and shall not be deemed an amendment of, this Compact.

b. Hearings. Pursuant to the procedures set forth in the Law of Administration, the Board shall hold hearings upon notice in proceedings before it and shall have the power to administer oaths, take evidence and issue subpoenas to compel attendance of witnesses or production of documents or other evidence, and to appoint technical experts. The Tribes and the State shall enforce the Board's subpoenas in the same manner as prescribed by the laws of the Tribes and the State for enforcing a subpoena issued by the courts of each respective sovereign in a civil action. The Persons involved in the controversy may present evidence and cross-examine any witnesses. The Board shall cause all hearings to be recorded, and shall determine the controversy and grant any declaratory or injunctive relief allowed by the Law of Administration, including a temporary order. The Board shall not have power to award money damages, attorneys' fees or costs; however it shall have the power to impose fines pursuant to the terms of the Law of Administration and award any kind of equitable relief. All decisions of the Board shall be in writing, and, together with a written justification for the decision and any dissenting opinions, shall be served personally or by certified mail on all Persons involved in the proceeding before the Board. All records of the Board shall be open to public inspection.

c. Employment of Water Engineer. The Board shall have the authority to employ a Water Engineer to carry out such functions as assigned by the Board pursuant to the Law of Administration, including the supervision of any water commissioners appointed by the Board. As set forth in the Law of Administration, the Engineer shall hold hearings upon notice in proceedings before the Engineer and shall have the power to administer oaths, take evidence and issue subpoenas to compel attendance of witnesses or production of documents or other evidence, and to appoint technical experts. The Tribes and the State shall enforce the Engineer's subpoenas in the same manner as prescribed by the laws of the Tribes and the State for enforcing a subpoena issued by the courts of each respective sovereign in a civil action. The Persons involved in the controversy may present evidence and cross examine any witnesses. The Engineer shall cause all hearings to be recorded, and shall determine the controversy and grant any relief allowed by the Law of Administration, including a temporary order. All decisions of the Engineer shall be in writing, and, together with a written justification for the decision, shall be served personally or by certified mail on all Persons involved in the proceeding before the Engineer. All records of the Engineer shall be open to public inspection.

d. Appointment of Water Commissioner(s)

i. The Board shall have the authority, upon a unanimous vote of all five members of the Board, to appoint one or more commissioners to provide day-to-day administration of water on the Reservation. The compensation for any such commissioner and the identification of the Person(s) responsible for paying costs associated with the appointment of any such commissioner must also be established by a unanimous vote of all five members of the Board as part of the Board action appointing any such commissioner. Any commissioner appointed shall act under the supervision of the Water Engineer.

ii. Under the jurisdiction of the Board, and as set forth in the Law of Administration, the commissioner(s) shall have the authority to administer and distribute water only on the Reservation. The authority of any commissioner(s) appointed pursuant to this subsection, as it pertains to portions of the Tribal Water Right used within the FIIP, extends only to the delivery of water to FIIP diversion facilities and shall not extend to the administration of that water in FIIP facilities or on lands served by the FIIP, which shall remain subject to the authority of the Project Operator.

6. Review and Enforcement of Board Decisions.

a. Decisions by the Board shall be effective immediately, unless stayed by the Board. Persons involved in the proceedings before the Board may appeal any final decision by the Board to a Court of Competent Jurisdiction within thirty days of such decision. An appeal of a final decision of the Board shall be styled as a petition for judicial review of an agency decision pursuant to the rules of procedure of the court from which review is sought. The petition for judicial review shall be filed with the Board and the court and served upon all Persons involved in the proceeding before the Board, as well as the Tribes, the State and the United States. Service shall be accomplished according to the requirements of the court's rules of procedure.

b. Unless a petition is filed within thirty days of a final decision of the Board, as provided in Article IV.I.6.a, any decision of the Board shall be recognized and enforced by any court with personal and subject matter jurisdiction over the matter on petition by any Person, or a successor in interest, before the Board in the proceeding in which the decision was made.

c. A Court of Competent Jurisdiction in which a timely petition is filed pursuant to Article IV.I.6.a, or any court with personal and subject matter jurisdiction over the matter in which a petition to confirm or enforce is filed pursuant to Article IV.I.6.b, may order such temporary or permanent relief as it considers just and proper subject to the limited waivers of immunity set forth in Article IV.I.8.

d. An appeal may be taken from any decision of the court in which a timely appeal is filed pursuant to Article IV.I.6.a, or in which a petition to confirm or enforce is filed pursuant to Article IV.I.6.b, in the manner and to the same extent as from orders or judgments of the court in a civil action.

e. In any petition to confirm or enforce the Board's decision, the Board shall file with the court to which appeal is taken the record of the proceedings before the Board within the time and in the manner provided by the court's rules of procedure.

f. The appellate court shall conduct the review on the record made before the Board. In considering the petition, the Board's legal conclusions shall be reviewed for correctness and its factual findings for abuse of discretion.

g. In the event that a court determines that it lacks subject matter or personal jurisdiction to rule on a petition for judicial review of a Board decision, the party filing the petition shall be entitled to petition for judicial review from any other Court of Competent Jurisdiction within thirty days from the date of a final court order finding a lack of jurisdiction.

7. Public Meetings and Records

a. Notwithstanding any other provisions of law, the Board is a public agency for purposes of the applicability of State and Tribal right to know laws.

b. All regular and special meetings of the Board, including all hearings conducted by the Office of the Engineer or the Board, shall be open to the observation of the general public pursuant to State and Tribal open meeting laws. Where there is a conflict of laws, the law that provides for greater openness to the public applies.

c. Where no more specific notice provisions are set forth in the Law of Administration, notice of any meeting, including an agenda, shall be provided to the public in a manner and timeframe consistent with the criteria set forth in State and Tribal law. Where there is a conflict of laws, the law that provides for earlier notice shall apply.

d. The Board shall keep the following records:

i. minutes of all meetings;

ii. recordings of all hearings conducted by the Board or the Office of the Engineer;

iii. all documents filed with or generated by the Board or the Office of the Engineer;

iv. any other records required by applicable provisions of Federal, State or Tribal law, provided that if there is a conflict of laws, the law that provides for more expansive record retention shall apply.

e. All Board records are public records and shall be made available to the public for inspection under such reasonable terms and conditions as the Board shall establish.

8. Waiver of Immunity. The Tribes and the State hereby waive their respective immunities from suit, including any defense the State shall have under the Eleventh Amendment of the Constitution of the United States, in order to permit the resolution of disputes under the Compact by the Board, and the appeal or judicial enforcement of Board decisions as provided herein, except that such waivers of sovereign immunity by the Tribes or the State shall not extend to any action for money damages, costs, or attorneys' fees. The Parties recognize that only Congress can waive the immunity of the United States and that the participation of the United States in the proceedings of the Board shall be governed by Federal law, including 43 U.S.C. 666.

J. Amendments to the Law of Administration. The Board may not amend the Law of Administration. No amendment by the Tribes or the State of the Law of Administration shall be effective unless and until the other makes an analogous amendment. Such modifications are pursuant to, and shall not be deemed an amendment of, this Compact.

K. Water Rights Database. The Board shall cause all Appropriation Rights and Changes in Use authorized by the Board and all uses of water registered pursuant to the Law of Administration to be entered into the DNRC water rights database in a format agreed to by the Board and the DNRC.

ARTICLE V - DISCLAIMERS AND RESERVATION OF RIGHTS

A. No Effect on Water Rights of Other Tribes or on other Federal Reserved Water Rights.

1. Except as otherwise provided herein, the relationship between the Tribal Water Right described herein and any water rights of any other Indian tribe or its members, or of any federally-derived water right of an individual outside the boundaries of the Flathead Indian Reservation, or of the United States in its own right or on behalf of such other tribes or individuals, shall be determined by the rule of priority.

2. Nothing in this Compact shall be construed or interpreted as a precedent to establish the nature, extent, or manner of administration of the rights to water of any other Indian tribe, its members or Indian owners of trust land outside of the Flathead Indian Reservation.

3. Nothing in this Compact is intended, nor shall it be used, to affect or abrogate a right or claim of an Indian tribe other than the Confederated Salish and Kootenai Tribes.

4. Except as provided herein and authorized by Congress, nothing in this Compact shall be construed or interpreted to establish the nature, extent, or manner of administration of rights to water of the United States on Federal lands outside of the Flathead Indian Reservation.

B. General Disclaimers. Nothing in this Compact shall be construed or interpreted:

1. To preclude the Tribes, Tribal members, and Allottees, or the United States, from applying to the Water Management Board for an Appropriation Right under the Law of Administration on the same basis as any other Person;

2. As a precedent for litigation of aboriginal or reserved water rights;

3. As precedent for interpretation or administration of future compacts between the United States and the State, or between the United States and any other state, or between the State and any other state;

4. As precedent for negotiation, interpretation or administration of any existing or future Compact, negotiated settlement, judicial settlement or other form of accommodation of water rights involving Indian tribes or individual Indians;

5. To preclude the possession, acquisition or exercise of Water Rights Arising Under State Law by the Tribes or Allottees or members of the Tribes;

6. To limit in any way the right of the Parties or any other Person to litigate any issue or question not resolved by this Compact;

7. To authorize the taking of any water right that is vested under State, Tribal or Federal law;

8. To affect the ability of tribes or qualified individuals under Title 25, Sections 151.4 and 151.8, Code of Federal Regulations, to purchase land from willing sellers or the Secretary's ability to convert fee land to trust land status;

9. To create or deny substantive rights through headings or captions used in this Compact;

10. To address or prejudge how the Tribal Water Right may be treated or interpreted in any interstate or international water apportionment proceeding;

11. To constitute a waiver of sovereign immunity by the Tribes or the State except as expressly set forth in this Compact;

12. To constitute a waiver of sovereign immunity by the United States except as expressly set forth in 43 U.S.C. 666 or as otherwise provided by Congress;

13. Except as expressly provided herein and as may be required by Congress, to modify the obligations of any agency of the United States;

14. To limit or prohibit the Tribes, their members or Allottees, or to limit the United States in any capacity, from objecting in any general stream adjudication in the Montana Water Court to any claims to water rights on or off the Flathead Indian Reservation;

15. To prevent the Montana Water Court from adjudicating any properly filed claims or objections to the use of water within the Flathead Indian Reservation;

16. To limit or prohibit the Tribes, their members or Allottees, or the United States in any capacity, from filing any necessary action to prevent any Person or Party from interfering with the Tribal Water Right;

17. To affect or determine the applicability of any State, Tribal or Federal law not subject to this Compact, including, but not limited to environmental and public safety laws, on activities of the Tribes, their members or Allottees or the United States;

18. To prejudice or predetermine any right that Tribal members or Allottees have to obtain the use of a portion of the Tribal Water Right under the provisions of this Compact and the Law of Administration;

19. To affect the capacity of any Tribal member or Allottee to lease his or her land;

20. To empower the Water Management Board to assess a fee for the use of water;

21. To confer any jurisdiction on the Water Management Board over any water right whose place of use is located outside the exterior boundaries of the Reservation;

22. To limit, diminish, modify, or enlarge any Party's adjudicatory or legislative jurisdiction except as expressly provided herein;

23. To constitute a waiver of an individual's right to object to the Compact during the Water Court decree process; or

24. To transfer, convert, or otherwise change the ownership or trust/fee status of land on the Reservation. Specifically, nothing in this Compact changes fee owned land to trust land or trust land to fee land, or in any way alters the ownership status of land within the exterior boundaries of the Flathead Indian Reservation.

C. Other Rights Reserved.

1. Nothing in this Compact is intended, nor shall be interpreted or applied, in any manner to alter, limit, or diminish the right of the Tribes to take all steps they deem necessary or prudent before any court or adjudicative forum, any legislature or legislative entity, or any State or Federal administrative agency, including but not limited to the Federal Energy Regulatory Commission, to protect any interests in Water Rights Arising Under State Law that the Tribes may acquire or seek to acquire and which are associated with the Federal Energy Regulatory Commission license for the Kerr Hydroelectric Project, FERC Project No. 5 (32 FERC # 61,070, July 17, 1985, as amended) or any other hydroelectric facility located on the Reservation subject to FERC jurisdiction.

2. The Parties expressly reserve all rights not granted, recognized or relinquished in this Compact, including but not limited to the right to the continued exercise by members of the

Tribes of Tribal off-Reservation rights to hunt, fish, trap and gather food and other materials, as reserved in Article III of the Hellgate Treaty of July 16, 1855 (12 Stat. 975).

D. Obligations of the United States Contingent.

1. Notwithstanding any language contained herein and except as authorized under Federal law, the obligations of the United States under this Compact shall be contingent upon ratification and necessary authorization by Congress.

2. The expenditure or advance of any money or the performance of any work by the United States or the Tribes pursuant to this Compact which requires appropriation of money by Congress or by the Tribes is contingent on such appropriation being timely made.

3. The Tribes and the State recognize that this Compact has not been finally approved by the United States as of the date of execution by the Tribes or the State, and that ratification by the Tribes or by the State in no manner limits or restricts the discretion of the United States in the negotiation of all matters related to this Compact.

E. Obligations of the State Contingent. The expenditure or advance of any money or the performance of any work by the State pursuant to this Compact that requires appropriation of money by the Montana Legislature or allotment of funds shall be contingent upon such appropriation or allotment.

ARTICLE VI - CONTRIBUTIONS TO SETTLEMENT

A. State Contribution to Settlement. The Parties agree that the State contribution to settlement shall be $55 million. The agreement to, expenditure, or advance of any State contribution which may require authorization and appropriation of money by the Montana Legislature or allotment of funds is contingent on such appropriation or allotment being made pursuant to Article V, Section 11(4) of the Montana Constitution. The Parties recognize that the amount and structure of the State funding is contingent on action of the Montana Legislature. If the Legislature appropriates funds in a manner inconsistent with the structure contemplated by the Parties in this section, the Parties agree to meet and confer to consider adjustments to the funding structure and priorities described in Articles IV.H.1.a and b above. Such modifications are pursuant to, and shall not be deemed an amendment of, this Compact.

1. The State Contribution to Settlement shall be allocated as follows:

a. $4 million for water measurement activities;

b. $4 million for improving on-farm efficiency;

c. $4 million for mitigating the loss of Stock Water deliveries from the FIIP;

d. $30 million to offset pumping costs associated with Compact implementation and related projects; and

e. $13 million to provide for aquatic and terrestrial habitat enhancement.

B. Federal Contribution to Settlement. The Parties agree that the Federal contribution to settlement shall be negotiated by the Tribes, the State, and the United States as part of the negotiations on the Federal legislation to ratify and effectuate the Compact.

ARTICLE VII - FINALITY

A. Ratification and Effectiveness of Compact.

1. The terms of the Compact may not be amended without the consent of all the Parties following the first ratification by any Party. After the Effective Date, no provision of the Compact shall be modified except as expressly provided in the Compact. Any amendment that is not expressly provided for in the Compact must be ratified in the same manner as the Compact; however, if the proposed amendment concerns non-monetary matters and does not affect the water rights of the Tribes determined in this Compact or other property held in trust by the United States on behalf of the Tribes or Indians, the Secretary may ratify such amendment on behalf of the United States, as determined by Congress. The State and the Tribes will support provisions in the Federal legislation ratifying the Compact that delegates to the Secretary the authority to ratify such future amendments on behalf of the United States.

2. Notwithstanding any other provision in the Compact, the Tribes reserve the unilateral right to withdraw as a Party if:

a. Congress has not ratified this Compact and authorized appropriations for the Federal contribution to the settlement within four years from the date on which the ratification of the

Compact by the Montana Legislature takes effect under State law. This is a continuing right until Congress ratifies the Compact;

b. Appropriations are not made in the manner contemplated by the Federal legislation ratifying this Compact;

c. The Parties do not reach agreement on the State contribution to settlement;

d. The State has not authorized appropriations for the State contribution to settlement within five years from the date the Compact is ratified by the United States; or

e. Appropriations are not made by the State in the manner contemplated by any agreement for contributions to settlement made pursuant to Article VI.A.

3. The Tribes may exercise their right to withdraw from the Compact under Article VII.A.2 by sending to the Governor of the State and to the Secretary by certified mail a resolution of the Tribal Council expressing the Tribes' intent to withdraw and specifying a reason for withdrawal and a withdrawal date not sooner than one hundred and twenty days from the date of the resolution. On the date designated in the resolution for Tribal withdrawal, the Compact shall become null and void without further action by any Party.

4. Notwithstanding any other provision in the Compact, the State reserves the unilateral right to withdraw as a Party to the Compact if:

a. Congress has not ratified this Compact within four years from the date on which the ratification of the Compact by the Montana Legislature takes effect under State law. This is a continuing right until Congress ratifies the Compact;

b. The Tribes have not ratified this Compact within five years from the date on which the ratification of the Compact by the Montana Legislature takes effect under State law;

c. Congress requires a State contribution to settlement that exceeds the contributions described in Article VI.A; or

d. Congress does not authorize and appropriate the Federal share of funding agreed to pursuant to Article VI.B.

5. The State may exercise its right to withdraw under Article VII.A.4 by sending to the Chair of the Tribal Council and to the Secretary a letter delivered by certified mail from the Governor of the State expressing the State's intent to withdraw and specifying a reason for withdrawal and a withdrawal date not sooner than one hundred and twenty days from the date of the letter. On the date designated in the letter for State withdrawal, the Compact shall become null and void without further action by any Party.

B. Incorporation into Decrees.

1. Within one hundred eighty (180) days of the date this Compact is ratified by the Tribes, the State, and the United States, whichever is latest, the Tribes, the State, and/or the United States shall file, in the general stream adjudication initiated by the State, pursuant to the provisions of 85-2-702(3), MCA, a motion for entry of the proposed decree attached hereto as Appendix 38 as the decree of the water rights held by the United States in trust for the Tribes, Tribal members, and the Allottees of the Tribes as well as those Water Rights Arising Under State Law set forth in Article III.D.4.a.i and Article III.D.5, of which the Tribes become co-owners pursuant to this Compact, and such other provisions of the Compact as are related to the determination of these water rights and their administration. If the Montana Water Court does not approve the proposed decree submitted with the motion within three years following the filing of the motion, the Compact shall be voidable by written agreement of the State and the Tribes. If the Montana Water Court approves the proposed decree within three years, but the decree is subsequently set aside by the Montana Water Court or on appeal, the Compact shall be voidable by written agreement of the State and the Tribes. Any effect of the failure of approval or setting aside of the decree on the approval, ratification, and confirmation by the United States shall be as provided by Congress. The Parties understand and agree that the submission of the Compact to a State court or courts, as provided for in the Compact, is solely to comply with the provisions of 85-2-702(3), MCA, and does not expand the jurisdiction of the State court or expand in any manner the waiver of sovereign immunity of either the United States or the Tribes in the McCarran Amendment, 43 U.S.C. 666, or other provision of Federal law.

2. Consistent with 3-7-224, MCA, setting forth the jurisdiction of the chief water judge, for the purposes of 85-2-702(3), MCA, the review by the Montana Water Court shall be limited to the contents of Appendix 38, and may extend to other sections of the Compact only to the extent

that they relate to the determination of water rights and their administration. The final decree shall consist of the contents of Appendix 38, and such other information as may be required by 85-2-234, MCA. Nevertheless, pursuant to 85-2-702(3), MCA, the terms of the entire Compact must be included in the preliminary decree without alteration for the purpose of notice.

C. Disposition of State and Federal Suits.

1. On issuance of a final decree by the Montana Water Court or its successor, and the completion of any direct appeals therefrom, or on expiration of the time for filing any such appeal:

a. the United States, the Tribes, and the State shall execute and file joint motions pursuant to Rule 41(a), Fed.R.Civ.P., to dismiss without prejudice any and all claims of the Tribes, Tribal members, and Allottees and any and all claims made by the United States for the benefit of the Tribes, Tribal members, and Allottees in United States v. Abell, No. CIV-79-33-M (filed April 5, 1979). The case may only be resumed if either the State or the Tribes exercise the rights each holds under Article VII.A;

b. the Tribes and the State shall execute and file joint motions to dismiss without prejudice the case entitled Confederated Salish and Kootenai Tribes v. Bud Clinch, Director, Montana Department of Natural Resources and Conservation, and the Montana Department of Natural Resources and Conservation, Montana First Judicial Court, County of Lewis and Clark, Cause No. BDV-2001-253, Montana First Judicial District Court, Lewis and Clark County, Montana;

c. The United States, the Tribes, and the State shall execute and file joint motions pursuant to Rule 41(a), Mont.R.Civ.P., to dismiss without prejudice any and all claims of the Tribes, Tribal members, and Allottees and any and all claims made by the United States for the benefit of the Tribes, Tribal members, and Allottees that have been filed in the Montana Water Court as contemplated by Article VII.D.2. The case adjudicating those claims may only be resumed if either the State or the Tribes exercise the rights each holds under Article VII.A.2 and 4; and

d. The Decree shall be filed by the Parties as a consent decree in Abell, or in Federal court as a new proceeding after the dismissal of Abell conditional on agreement by the Parties to seek the necessary State, Tribal, and Federal ratification of the Compact, if it is finally determined in a judgment binding on the State that the State courts lack jurisdiction over, or that the State court proceedings are inadequate to adjudicate some or all of the water rights asserted in Abell.

D. Settlement of Water Rights Claims.

1. The water rights and other benefits confirmed to the Tribes in this Compact are in full and final satisfaction of and are intended to be in replacement of and substitution for all claims to water or to the use of water by the Tribes, Tribal members, and Allottees and the United States on behalf of the Tribes, Tribal members, and Allottees existing on the Effective Date, except for any Appropriation Rights or Water Rights Arising Under State Law held by the Tribes, their members, or Allottees as of the Effective Date or acquired thereafter, which shall be satisfied pursuant to their own terms.

2. The Tribes and United States will file all of their claims to water on and off of the Flathead Indian Reservation on or before July 1, 2015, pursuant to 85-2-702(3), MCA. Upon filing, the Tribes and United States will request that the Montana Department of Natural Resources and Conservation stay any action on such claims pending the occurrence of the following events:

a. The passage of an Act of Congress ratifying the Compact and authorizing appropriations for monetary settlement to the Tribes;

b. Approval by the Tribes of the Compact and the Act described in Article VII.D.2.a.

c. Issuance by the Montana Water Court of a final water right decree or decrees incorporating the water rights quantified pursuant to this Compact; and

d. All portions of the final Water Court decree or decrees survive exhaustion of all avenues of appeal.

3. Upon occurrence of these events, the waiver and dismissal described in Article VII.C.1.c and VII.D.3 shall be accomplished.

4. In consideration of the water rights and other benefits confirmed to the Tribes, Tribal members, and Allottees in this Compact, and of performance by the State and the United States of all actions required by this Compact, and on entry of a final order issuing the decree of the Tribal Water Right held in trust by the United States as quantified in this Compact and displayed in Appendix 38 and occurrence of the events set forth in Article VII.D.2, the Tribes

and the United States as trustee for the Tribes, Tribal members, and Allottees shall waive, release, and relinquish any and all claims to water rights or to the use of water, and shall dismiss any such claims filed pursuant to Article VII.D.2, existing on the Effective Date.

E. Settlement of Tribal Claims Against the United States. Waiver of claims against the United States by the Tribes, their members and Allottees shall be as provided by Congress.

F. Binding Effect. After the Effective Date and the entry of a final decree by the Montana Water Court of the water rights quantified by this Compact, or if necessary the Federal court in Abell, the Compact's terms shall be binding on:

1. The State and any Person using, claiming or in any manner asserting any right under the authority of the State to the use of water in the State; provided that, the validity of consent, ratification, or authorization by the State is to be determined by State law;

2. The Tribes and any Person using, claiming or in any manner asserting any right to the use of the Tribal Water Right, or any right arising under any doctrine of reserved or aboriginal water rights for the Tribes, Tribal members, and Allottees, or any rights arising under Tribal law; provided that, the validity of consent, ratification or authorization by the Tribes is to be determined by Tribal and, if applicable, Federal law; and

3. The United States and any Person using, claiming or in any manner asserting any right under the authority of the United States to the use of water in the State; provided that, the validity of consent, ratification or authorization by the United States is to be determined by Federal law.

ARTICLE VIII - LEGISLATION/DEFENSE OF COMPACT

A. State Legislation. The State and the Tribes agree to seek ratification of the Compact by the Montana Legislature and any additional State legislation necessary to effectuate the Compact.

B. Federal Legislation. The State and the Tribes agree to seek ratification of the Compact by Congress and any additional Federal legislation necessary to effectuate the Compact.

1. The State and the Tribes will support provisions in the Federal legislation ratifying this Compact that authorizes the United States District Court for the District of Montana in Missoula to review decisions of the Board and the MFWP authorized in the Compact; provided that, the sovereign immunity of the United States is not waived by such provision of the legislation.

2. The State and Tribes will support provisions in the Federal legislation ratifying this Compact that authorizes the Net Power Revenues distributions described in Article IV.H.3.

3. The State and the Tribes will support provisions in the Federal legislation ratifying this Compact that delegates to the Secretary the authority to ratify future amendments on behalf of the United States pursuant to Article VII.A.1.

C. Tribal Legislation. The State and the Tribes agree to seek ratification of the Compact by the Tribes and any Tribal legislation necessary to effectuate the Compact.

D. Defense of the Compact. The Parties agree to defend the Compact after its Effective Date from all challenges and attacks and in all proceedings pursuant to Article VII.B and C.

IN WITNESS WHEREOF the representatives of the Confederated Salish and Kootenai Tribes, the State of Montana, and the United States, have signed the Compact on the ____ day of ____, 201_.

History: En. Sec. 1, Ch. 294, L. 2015.

85-20-1902. Unitary administration and management ordinance.

CHAPTER I

WATER RESOURCES CONSERVATION, DEVELOPMENT AND ADMINISTRATION

PART 1 - GENERAL PROVISIONS

1-1-101. Authority.

1. This Ordinance parallels legislation adopted by the Confederated Salish and Kootenai Tribes pursuant to Tribal approval of the Confederated Salish and Kootenai Tribes-Montana Compact and the Montana Water Use Act of 1973 to effectuate Unitary Administration and Management on the Flathead Indian Reservation.

2. This Ordinance and the parallel Tribal legislation are contingently effective; neither operates with the force and effect of law without the other. No modification by the Tribes or the State of Montana of these respective laws shall be effective within the exterior boundaries of the Reservation unless and until the other makes an analogous modification. No amendment of this Ordinance that may affect a use of the Tribal Water Right may be made without Secretarial approval.

3. Upon the Effective Date of the Compact, this Ordinance shall govern all water rights, whether derived from tribal, state or federal law, and shall control all aspects of water use, including all permitting of new uses, changes of existing uses, enforcement of water right calls and all aspects of enforcement within the exterior boundaries of the Flathead Indian Reservation. Any provision of Title 85, MCA, that is inconsistent with this Law of Administration is not applicable within the Reservation.

1-1-102. Reserved.

1-1-103. Reserved.

1-1-104. Definitions. Unless otherwise defined herein, capitalized terms used in this Ordinance shall have the meaning set forth in the Compact.

1. "Allottee" or "Allottees" means an owner of an interest in a tract of land held in trust by the United States which was allotted pursuant to the Act of April 23, 1904, 33 Stat. 302, as amended, or the Act of February 25, 1920, 41 Stat. 452, as amended.

2. "Appropriate" means to divert, impound, maintain an instream, inlake, inwetland or impoundment use, or withdraw a quantity of water for a beneficial use on the Flathead Indian Reservation under color of law.

3. "Appropriation" means the diversion, impoundment, maintenance of an instream, lake, Wetland, or impoundment use, or the withdrawal of a quantity of water for a Beneficial Use on the Flathead Indian Reservation under color of law.

4. "Appropriation Right" means a right to Appropriate water issued by the Water Management Board pursuant to the terms of the Compact and this Ordinance.

5. "Aquifer Injection" means the subsurface discharge of fluids into the ground by means of an Injection Well.

6. "Appropriator" means a Person who Appropriates water.

7. "Beneficial Use" means a consumptive or non-consumptive use of water for the benefit of the Appropriator, other Persons, the Tribes, one or more Tribal members, or the general public, including but not limited to agricultural, stock water, domestic, fish and wildlife, cultural and religious practices, industrial, Instream Flow, irrigation, mining, Mitigation Water, municipal, power, recreational uses, and Wetlands purposes.

8. "Business" means a building or site where commercial work is carried on, including but not limited to a factory, store, or office.

9. "Change in Use" means an authorized change in the point of diversion, the place of use, the period of use, the purpose of use, or the place of storage of an Appropriation Right issued by the Water Management Board under the Compact and this Ordinance, or of an Existing Use. A changed water right retains the original priority date of that right.

10. "Compact" means that water rights settlement entered into by the Confederated Salish and Kootenai Tribes, the State of Montana, and the United States.

11. "Complainant" means one who files a Complaint.

12. "Complaint" means a written assertion of injury submitted to the Engineer pursuant to Section 3-1-102 of this Ordinance.

13. "Consumptive Use" means the amount of water used for a beneficial purpose, such as water transpired by growing vegetation, evaporated from soils or water surfaces, or incorporated into products, that does not return to the Groundwater or surface water source.

14. "Designee" means an individual selected by the Engineer to exercise, in regard to a particular application or objection, those powers assigned to the Engineer under Chapter II of this Ordinance. Any Staff is eligible to be selected as a Designee provided that he or she has not previously worked on the particular application or objection at issue.

15. "Developed Spring" means any artificial opening or excavation in the ground, however made, including any physical alteration at the point of discharge regardless of whether it results

in any increase in the yield of Groundwater, from which Groundwater is sought or can be obtained or through which it flows under natural pressures or is artificially withdrawn.

16. "Development" means contiguous or closely grouped parcels of land under the same or affiliated ownership, including, but not limited to, housing subdivisions or any combination of business and residential units.

17. "DNRC" means the Montana Department of Natural Resources and Conservation, or any successor agency.

18. "Domestic Allowance" means an entitlement to use water issued to households and small businesses pursuant to the provisions of Section 2-2-117 of this Ordinance; Domestic Allowances include Individual Domestic Allowances, Shared Domestic Allowances, and Development Domestic Allowances.

19. "Domestic Use" means those water uses common to a household, including washing, drinking, bathing, waste disposal, cooling and heating, domestic animals, and garden and landscape irrigation. Domestic Use does not include the filling of ponds, pits, pit-dams or reservoirs.

20. "Effective Date" means the date on which the Compact is finally approved by the Tribes, by the State, and by the United States, and on which the Law of Administration has been enacted and taken effect as the law of the State and the Tribes, whichever date is latest.

21. "Emergency" means a situation that demands unusual or immediate action to prevent imminent injury to life, property, or the environment.

22. "Enclosed Storage" means a storage container fully enclosed to include a cistern or tank.

23. "Existing Use" means a use of water under color of Tribal, State or Federal law in existence as of the Effective Date, including uses in existence on that date that are eligible for either of the registration processes set forth in Sections 2-1-101 through 2-1-108 of this Ordinance; provided that any portion of a Water Right Arising Under State Law within the Reservation that is, at any point after the date the ratification of the Compact by the Montana Legislature takes effect under State law, voluntarily relinquished or is legally determined to be abandoned, relinquished, or have otherwise ceased to exist, shall be stricken from the relevant basin decree as a Water Right Arising Under State Law and be entitled to no further protection as such a right or as an Existing Use.

24. "Flathead Indian Irrigation Project" or "FIIP" means the irrigation project developed by the United States to irrigate lands within the Reservation pursuant to the Act of April 23, 1904, Public Law 58-159, 33 Stat. 302 (1904), and the Act of May 29, 1908, Public Law 60-156, 35 Stat. 441 (1908), and includes, but is not limited to, all lands, reservoirs, easements, rights-of-way, canals, ditches, laterals, or any other FIIP facilities (whether situated on or off the Reservation), head gates, pipelines, pumps, buildings, heavy equipment, vehicles, supplies, records or copies of records and all other physical, tangible objects, whether of real or personal property, used in the management and operation of the FIIP.

25. "FIIP Influence Area" means the lands influenced by the operations of the FIIP as identified on the map attached to the Compact as Appendix 2.

26. "Flathead Indian Reservation" or "Reservation" means all land within the exterior boundaries of the Indian Reservation established under the July 16, 1855 Treaty of Hellgate (12 Stat. 975), notwithstanding the issuance of any patent, and including rights-of-way running through the Reservation.

27. "Flathead System Compact Water" means that portion of the Tribal Water Right consisting of 229,383 acre feet per year that the Tribes may withdraw from the Flathead River or Flathead Lake, which includes up to 90,000 acre feet per year stored in Hungry Horse Reservoir, with a maximum total volume consumed of 128,158 acre feet per year.

28. "Groundwater" means any water that is beneath the surface of the earth.

29. "Groundwater Management Area" means an area designated and managed under Section 1-1-109 of this Ordinance.

30. "Heating/Cooling Exchange Well" means a Well for the purpose and with the attributes set forth in Section 2-2-119(1) of this Ordinance.

31. "Home" means a house, apartment, or other shelter that is a permanent or temporary residence of a Person, family, or household.

32. "Illegal" or "Illegally" means, as it pertains to the use of water, to Appropriate water not pursuant to an Appropriation Right or Existing Use.

33. "Injection Well" means a Well utilized for injecting fluids or gases into geologic materials. Open pits, ponds, or excavations are not considered Injection Wells.

34. "Instream Flow" means a stream flow retained in a watercourse to benefit the aquatic environment. Instream Flow may include Natural Flow or streamflow affected by regulation, diversion, or other modification. A water right for Instream Flow purposes is quantified for a stream reach and measured for enforcement purposes at a specified point.

35. "Livestock" means cattle, bison, sheep, swine, horses, mules, goats, or other animals specifically raised and used for food or fiber or as a beast of burden.

36. "Mitigation" means the reallocation of surface water or Groundwater through a Change in Use or other means to offset adverse effect resulting from Net Depletion by any proposed new Appropriation.

37. "Mitigation Plan" means a plan as developed by an applicant to provide Mitigation.

38. "NRD" means the Confederated Salish and Kootenai Tribes' Natural Resources Department.

39. "Natural Wetland" means a Wetland area that is maintained with a natural surface water source, natural Groundwater source or a combination of natural surface water and natural Groundwater without any artificial means of diversion, impoundment, withdrawal, excavation, or other artificial means of control.

40. "Net Depletion" means the calculated volume, rate, timing, and location of reductions to a water source resulting from a proposed new Appropriation that are not offset by the corresponding accretions to that source caused by the proposed new Appropriation.

41. "Non-consumptive Use" means any beneficial use of water that does not meet the definition of consumptive use.

42. "Other Instream Flows" means the Tribal instream flow water rights for stream reaches described in Article III.C.1.d.iii of the Compact.

43. "Office of the Engineer" means the Engineer and Staff, acting in their official capacities.

44. "Person" means an individual or any other entity, public or private, including the Tribes, the State, and the United States, and all officers, agents and departments of each sovereign.

45. "Pits, Pit-dams, Constructed Ponds, or Reservoirs" refer to bodies of water that are created by man-made means and which store water for beneficial use.

46. "Project Manager" means the person or team of persons hired by the Project Operator to operate and manage the FIIP in accordance with its direction, this and other applicable agreements, and applicable law, including the Compact.

47. "Project Operator" means that entity with the legal authority and responsibility to operate the Flathead Indian Irrigation Project.

48. "Public Water Supply System" means a system for the provision of water for human consumption that has at least 15 service connections or that regularly serves at least 25 Persons daily for any 60 or more days in a calendar year.

49. "Publish" or "Publication" means, unless otherwise designated, the printing of an announcement of document availability, or the text of the document itself, in a newspaper of general circulation on the Reservation and in the Tribal newspaper and posting on the Water Management Board's website.

50. "Redundant Well" means a Well to provide a backup source of water for a Public Water Supply System.

51. "Restored Natural Wetland" means a Wetland area that, upon restoration, shall be maintained with a natural surface water source, natural Groundwater source, or a combination of natural surface water and natural Groundwater without any artificial means of diversion, impoundment, withdrawal, excavation, or other artificial means of control.

52. "Secretary" means the Secretary of the United States Department of the Interior or the Secretary's duly assigned representative.

53. "Shall" means a mandatory and not a discretionary act.

54. "Shared Well" means a single Well that is physically manifold to multiple homes and/or businesses and is cooperatively used pursuant to a Shared Well Agreement.

55. "Shared Well Agreement" means a legally binding document that stipulates the manner in which a Shared Well is jointly used between or among all Homes or Businesses connected to the well; to be valid, it must be signed by representatives for each Person having a possessory interest in each individual Home or Business connected to a Shared Well.

56. "Spring" means a perennial hydrologic occurrence of water involving the natural flow of water originating from beneath the land surface and arising to the surface of the ground.

57. "Staff" means the employees, contractors and others assigned to or engaged by the Board or the Engineer to assist or facilitate the Engineer in carrying out the duties assigned to the Engineer by the Compact and this Ordinance, and by the Board pursuant to the same.

58. "Stock Tank" means a 30 to 1500 gallon tank used to provide drinking water for Livestock that is equipped with a water level regulator that shuts off supply to keep the Stock Tank from overflowing.

59. "Substitute Well" means a Well that replaces an existing Well which is to be abandoned.

60. "Temporary Emergency Appropriation" means the temporary beneficial use of water necessary to protect lives, property, or the environment, by reason of fire, storm, earthquake or other disaster, or unforeseen combination of circumstances which call for immediate action. An appropriation made necessary due to drought conditions is not a temporary emergency appropriation.

61. "Temporary Groundwater Management Area" means an area established pursuant to Section 1-1-109(10) of this Ordinance.

62. "Tribal Member" means a Person who is lawfully enrolled by and whose name appears on the official enrollment list of the Confederated Salish and Kootenai Tribes.

63. "Tribal Water Right" means the water rights of the Confederated Salish and Kootenai Tribes, including any Tribal member or Allottee, that arise under Federal law, as set forth in Article III.A, Article III.C.1.a through j, Article III.C.1.k.i, Article III.C.1.l.i, Article III.D.1 through 3, and Article III.D.7 and 8 of the Compact. The term "Tribal Water Right" also includes those rights identified in Article III.H of the Compact that are appurtenant to lands taken into trust by the United States on behalf of the Tribes.

64. "Tribes" means the Confederated Salish and Kootenai Tribes of the Flathead Reservation, and all officers, agencies, and departments thereof.

65. "Waste" or "Wasting" means the unreasonable loss of water resulting from the design, construction, operation or maintenance of a water diversion, storage or distribution facility, Well, Developed Spring, or the application of water to anything but a beneficial use.

66. "Water Engineer" or "Engineer" means the Person satisfying the criteria in Section 1-2-109 of this Ordinance employed by the Water Management Board pursuant to Article IV.I.5.c of the Compact to exercise the powers and duties of the Water Engineer as set forth in the Compact and this Ordinance.

67. "Water Management Board" or "Board" means the board created by Article IV.I of the Compact and vested with the responsibilities set forth in the Compact and in Tribal and State law for the administration of water within the Reservation.

68. "Water Rights Arising Under State Law" means those valid water rights Arising Under State Law existing as of the Effective Date and not subsequently relinquished or abandoned, as those rights are: decreed or to be decreed by the Montana Water Court pursuant to 85-2-234, MCA; permitted by the DNRC; exempted from filing in the Montana general stream adjudication pursuant to 85-2-222, MCA; or excepted from the permitting process pursuant to 85-2-306, MCA.

69. "Well" means any artificial opening or excavation in the ground, however made, by which Groundwater is sought or can be obtained or through which it flows under natural pressures or is artificially withdrawn.

70. "Well Log Report" means DNRC Form No. 603 (see ARM 36.12.102), or any successor reporting form and requirement promulgated in State law.

71. "Well Shaft Casing" means an impervious durable pipe placed in a well or Developed Spring to prevent the walls from caving, to seal off surface drainage, or undesirable water, gas, or other fluids to prevent their entering the well, and to prevent the Waste of Groundwater.

72. "Wetland" means an area that is inundated or saturated by surface water or Groundwater at a frequency and duration sufficient to support, and that under normal circumstances does

support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs and similar areas.

73. "Wetland Quantified Appropriation Right" means an Appropriation Right issued for a Wetlands purpose that utilizes any man-made diversions, impoundment, withdrawals, excavations, or other artificial means for the purposes of appropriation for either all or a portion of a Wetland.

74. "Wetland Protective Appropriation Right" means an Appropriation Right issued for either a Natural Wetland or Restored Natural Wetland.

75. "Works" means all property, real or personal, necessary or convenient to the appropriation, conservation, storage, diversion, distribution, development, screening and utilization of water.

1-1-105. Measurement of Water. Upon the effective date of this Ordinance, legal standards of measurement of water within the Flathead Reservation shall be as follows:

1. Flow rates shall be measured in cubic feet per second, unless otherwise provided herein. Where documentary evidence of an existing use is expressed in gallons per minute, 448.8 gallons per minute shall be considered equivalent to a flow of one cubic foot per second. Where documentary evidence of an existing use is expressed in statutory or miner's inches, 40 statutory or miner's inches shall be considered equivalent to a flow of one cubic foot per second.

2. Volumes of water shall be measured in acre-feet, unless otherwise provided herein. One acre-foot shall be considered equivalent to a volume of 43,560 cubic feet. One cubic foot shall be considered equivalent to a volume of 7.48 gallons.

1-1-106. Measurement of Time. Whenever in this Ordinance an action is required to be performed within a certain number of days, the time for completion of the act shall be measured in calendar days unless the last day falls on a Friday, Saturday, Sunday, or Tribal, State or Federal legal holiday, in which case the time for performance is extended to the next subsequent business weekday.

1-1-107. Appropriation Rights Allowed.

1. The following Appropriation Rights or Changes in Use may be authorized by the Board pursuant to the Compact and this Ordinance:

a. Appropriation Rights for Groundwater appropriations for Redundant or Substitute Wells as set forth in Section 2-2-115 of this Ordinance.

b. Appropriation Rights for Stock Water Allowances as set forth in Section 2-2-116 of this Ordinance.

c. Appropriation Rights for Domestic Allowances as set forth in Section 2-2-117 of this Ordinance.

d. Appropriation Rights for uses of Flathead System Compact Water as set forth in Section 2-2-118 of this Ordinance.

e. Appropriation Rights for non-consumptive geothermal heating or cooling exchange Wells as set forth in Section 2-2-119 of this Ordinance.

f. Appropriation Rights for Temporary Emergency Appropriations as set forth in Section 2-2-120 of this Ordinance.

g. Appropriation Rights or Change in Use authorizations for Wetlands as set forth in Sections 2-2-123 and 2-2-124 of this Ordinance.

h. Appropriation Rights for Non-consumptive Uses, including, but not limited to, hydropower generation and not including flow-through ponds.

i. Appropriation Rights for which adverse effects to existing Appropriators are offset by Mitigation.

j. Changes in Use of all Appropriation Rights or Existing Uses except for those Appropriation Rights authorized under subsections (1)(a), (1)(b), (1)(c), (1)(e), (1)(f), (1)(k), or (1)(l) of this Section or those for Existing Uses exempt from the permitting requirements of 85-2-306, MCA, or from the claim filing requirements of 85-2-221, MCA, as set forth in 85-2-222, MCA; provided that a use authorized under subsection (1)(h) may not be changed from a Non-consumptive Use to a consumptive use.

k. Appropriation Rights to Appropriate surface water to conduct response actions related to natural resource restoration required for:

i. remedial actions pursuant to the federal Comprehensive Environmental Response, Compensation, and Liability Act of 1980, 42 U.S.C. 9601, et seq.;

ii. aquatic resource activities carried out in compliance with and as required by the federal Clean Water Act of 1977, 33 U.S.C. 1251 through 1387; or

iii. remedial actions taken pursuant to the Remedial Action Upon Release of Hazardous Substance Act, Title 75, chapter 10, part 7, MCA.

No Appropriation Rights issued pursuant to this subsection may be used for dilution.

l. Appropriation Rights for uses of surface water for or by a municipality or regional distribution system.

m. Appropriation Rights for new uses of the Tribal Water Right by the Tribes, Tribal Members, or Allottees, provided that any such new uses be sourced from:

i. Flathead System Compact Water; or

ii. another source, provided that any adverse effects to existing Appropriators caused by the Net Depletion of the new Appropriation Right must be offset by Mitigation pursuant to Section 1-1-112 of this Ordinance.

2. Other than those Appropriation Rights set forth in subsection (1) of this Section, the Board may not grant an Appropriation Right or other authorization to Appropriate surface water or Groundwater within the exterior boundaries of the Flathead Indian Reservation.

1-1-108. Reservation Water Rights Database. The Board shall cause all Appropriation Rights and Changes in Use authorized by the Board, including those uses registered pursuant to the provisions of Sections 2-1-101 through 2-1-107 of this Ordinance, to be entered into the DNRC water rights database in a format agreed to by the Board and the DNRC.

1-1-109. Groundwater Management Areas. The Board may designate, modify, or repeal either permanent or Temporary Groundwater Management Areas as provided in this part.

1. Each designation of a Groundwater Management Area shall identify the need for the special management, the boundaries of the area, the water resources targeted for special management, and the specific restrictions that will apply in the Groundwater Management Area.

2. The designation, modification, or repeal of a Groundwater Management Area may be initiated by submission of a correct and complete petition by:

a. the Tribes, the State, or the United States;

b. a local public health agency;

c. a municipality, county, or conservation district; or

d. at least one-third of the water rights holders in a proposed Groundwater Management Area.

3. A correct and complete petition shall:

a. be in a form prescribed by the Board;

b. contain facts and analysis prepared by a hydrologist, hydrogeologist, qualified scientist, or a qualified licensed professional engineer demonstrating the existence of one or more of the criteria set forth in subsection (8) are met; and

c. describe proposed measures, if any, needed to mitigate effects of the criteria identified in subsection (8) of this Section; and that are alleged in the petition or describe the rationale as to why a Groundwater Management Area should be repealed or modified.

4. Upon receipt of a completed petition complying with subsection (3) of this Section, the Office of the Engineer shall date stamp the petition.

5. Office of the Engineer review:

a. within 180 days of the date of receipt of the petition pursuant to subsection (4) of this Section, the Office of the Engineer shall:

i. determine in writing that the petition is correct and complete; or

ii. notify the petitioner of any defects in a petition, with an explanation in writing of the defect(s).

b. any petition that is returned pursuant to subsection (5)(a)(ii) of this Section and not corrected within 90 days from the date of return shall be deemed terminated.

c. if the Office of the Engineer does not notify the petitioner pursuant to subsection (5)(a) of this Section, the petition shall be treated as correct and complete.

6. Board review:

a. within 60 days after a petition is determined to be correct and complete, the Board shall:

i. deny the petition in writing in whole or part, stating the reasons for denial;

ii. inform the petitioner in writing that the Board will study the information presented in the petition for a period not to exceed 90 days before denying or proceeding with the petition; or

iii. publish notice of the Board's consideration of action concerning a permanent or Temporary Groundwater Management Area pursuant to subsection (8) of this Section.

b. failure of the Board to act under subsection (6)(a) of this Section shall be deemed a denial of the petition.

7. If the Board determines that a correct and complete petition contains sufficient information to warrant the Board granting the petition, the Board shall proceed to hear the petition. The Board shall provide public notice of the hearing by:

a. publishing a notice at least once each week for 3 successive weeks, with the first notice not less than 30 days before the date of the hearing in a newspaper of general circulation on the Reservation;

b. serving by mail a copy of the notice, not less than 30 days before the hearing, upon each Person or public agency known from an examination of the records of the Board to be a water right holder within the proposed or existing Groundwater Management Area;

c. serving by mail a copy of the notice upon any other Person, including Tribal, State or federal agencies, that the Board knows to be interested in or affected by the proposed designation, modification, or repeal of a Groundwater Management Area.

d. the notice under subsections (7)(a) through (7)(c) must include a summary of the basis for the proposed action. Publication and mailing of the notice as prescribed in this Section, when completed, is considered to be sufficient notice of the hearing to all interested parties.

e. the Board shall make available to the public on its website a complete copy of the petition or request to designate, modify, or repeal either permanent or Temporary Groundwater Management Areas.

8. The Board may designate a permanent Groundwater Management Area if it finds by a preponderance of the evidence that any of the following criteria have been met:

a. current or projected reductions of recharge to the aquifer or aquifers within the boundaries of the proposed permanent Groundwater Management Area will cause Groundwater levels to decline to the extent that water rights holders cannot reasonably exercise their water rights;

b. current or projected Groundwater withdrawals from the aquifer or aquifers in the boundaries of the proposed Groundwater Management Area have reduced or will reduce Groundwater levels or surface water availability necessary for water rights holders to reasonably exercise their water rights;

c. current or projected Groundwater withdrawals from the aquifer or aquifers in the proposed permanent Groundwater Management Area have impaired or will impair Groundwater quality necessary for water right holders to reasonably exercise their water rights based on relevant water quality standards;

d. Groundwater within the proposed permanent Groundwater Management Area is not suitable for any beneficial use; or

e. public health, safety, or welfare is or will become at risk.

9. Monitoring and studies:

a. if the Board finds that sufficient facts, including monitoring information, are not available to designate a permanent Groundwater Management Area, the Board may designate a Temporary Groundwater Management Area to allow studies to obtain the facts needed to:

i. correct deficiencies that the Board identifies in a petition for a permanent Groundwater Management Area;

ii. determine the extent to which the criteria identified in subsection (8) are met or not met;

iii. determine appropriate control measures to implement to designate a permanent Groundwater Management Area.

b. the Board shall set the length of time that the Temporary Groundwater Management Area shall be in effect. The term of a Temporary Groundwater Management Area may be extended by the Board, but may not exceed a total of 6 years.

c. the Board shall determine the responsibility for funding the costs associated with subsection (9)(a). Any person on whom a funding responsibility is placed by the Board pursuant to this subsection may appeal that determination to a Court of Competent Jurisdiction, which shall review the determination for an abuse of discretion.

d. prior to designating a Temporary Groundwater Management Area, the Board shall provide notice and the opportunity for public hearing pursuant to the notice provisions of subsection (7) of this Section.

e. a Temporary Groundwater Management Area designation is for the purpose of monitoring and study and shall not include the control provisions set forth in subsection (10) of this Section, other than measurement, water quality testing, and reporting.

f. prior to expiration of a Temporary Groundwater Management Area, and subject to the limitations of subsection (9)(b) of this Section, the Board may amend or repeal the establishment of the Temporary Groundwater Management Area, or may designate a permanent Groundwater Management Area under this Section.

10. A permanent Groundwater Management Area may include, but is not limited to, one or more of the following provisions:

a. closing the permanent Groundwater Management Area to further appropriation of surface water and/or Groundwater;

b. restricting the development of future surface water and/or Groundwater appropriations within the permanent Groundwater Management Area;

c. prohibiting or restricting the issuance of Stock Water Allowances pursuant to Section 2-2-116 of this Ordinance;

d. prohibiting or restricting the issuance of Domestic Allowances pursuant to Section 2-2-117 of this Ordinance;

e. requiring measurement and reporting of future surface water or Groundwater appropriations within the permanent Groundwater Management Area;

f. requiring water conservation measures within the permanent Groundwater Management Area;

g. requiring mitigation of Groundwater withdrawals within the permanent Groundwater Management Area;

h. reporting data to the Board within the permanent Groundwater Management Area; and

i. other provisions that the Board determines are appropriate and adopts.

11. The Board, upon petition, may modify or repeal a Groundwater Management Area. Any petition seeking the modification or repeal of a permanent Groundwater Management Area must demonstrate by a preponderance of the evidence that current or projected recharge to the aquifer or aquifers or changes to current or projected Groundwater withdrawals from the aquifer or aquifers in the boundaries of an existing Groundwater Management Area justify modification or repeal of that Groundwater Management Area.

12. Appeal from any final decision of the Board concerning the designation, modification or repeal of any permanent Groundwater Management Area pursuant to this Section shall be as set forth in Section 2-2-112 of this Ordinance.

13. If the Board determines that it is appropriate for a Groundwater Management Area identified pursuant to this section to extend to an area adjacent to but outside the boundaries of the Reservation, the Board, through the Office of the Engineer, may petition the DNRC, pursuant to 85-2-506(2)(c)(i), MCA, to designate a Controlled Groundwater Area in that adjacent area. Designation or modification by the DNRC of a Controlled Groundwater Area in any such adjacent area shall be governed by the procedures set forth in 85-2-506, MCA.

1-1-110. Standards for Applications for Appropriation Rights and Changes in Use. For any application for an Appropriation Right or Change in Use that is not one of the categories of Appropriation Right identified in Sections 1-1-112(1) or 2-2-118 of this Ordinance, in addition to whatever information is required by specific provisions of the Ordinance, all applications for Appropriation Rights and Changes in Use must include:

1. An identification of the proposed beneficial use.

2. An identification of the source of water supply.

3. A project description, including an identification of any water right(s) to be changed to a new use, if applicable.

4. A legal description of the point of diversion and the place of use.

5. The monthly volume(s) and flow rate(s) of the water supply to be diverted, withdrawn, or impounded, and the monthly volume(s) to be consumed; however the Office of the Engineer may require a more frequent quantification time step.

6. The monthly historic diverted, withdrawn, or impounded volume(s) and flow rate(s) and the historically consumed volume(s) of the water right(s) to be changed to a new use, if applicable; however, the Office of the Engineer may require a more frequent quantification time step.

7. The calculations, references and methodologies used to determine the volume(s) and flow rate(s) in subsections (5) and (6) above.

8. Identification of physical water availability and existing legal demands on the source of supply of water.

9. Evidence that the proposed means of diversion, construction, and operation of the appropriation Works are adequate.

10. Evidence of possessory interest or the written consent of the person with the possessory interest in the property where the water is to be put to beneficial use, diverted, conveyed, impounded, stored, transported, withdrawn, used, and distributed.

11. Information showing that the water quantity or quality of an Appropriator will not be adversely affected, if applicable.

12. A United States Geological Survey (USGS) quadrangle map or United States Department of Agriculture (USDA) aerial photo must be included with the application.

a. The following items shall be clearly identified on the map:

(1) North arrow;
(2) Scale bar;
(3) Section corners and numbers;
(4) Township and range numbers;
(5) Property lines and ownership;
(6) Source(s);
(7) Point(s) of diversion;
(8) Means of conveyance;
(9) Place(s) of use;
(10) Place(s) of storage, if applicable;
(11) Surface water features;
(12) Measurement and instrument locations associated with the application; and
(13) The place(s) of use of all associated and supplemental water rights.

b. If the application is for a Change in Use, the site map shall also show the historic point(s) of diversion, place(s) of use, and place(s) of storage, as applicable.

c. Additional maps shall be submitted if the information on one map cannot convey the required information clearly and shall be of the same scale so the maps can be overlain.

1-1-111. Groundwater Diversion Standards

1. Wells:

a. Persons that drill, make, or construct Wells, including monitoring Wells, on the Reservation shall comply with Title 37 Chapter 43, MCA, and ARM 36 Chapter 21 licensing, conduct, and regulatory requirements, or any successor provisions promulgated in State law.

b. All Well construction on the Reservation shall meet the standards set forth in ARM 36 Chapter 21, or any successor provisions promulgated in State law.

c. Construction and operations of all Wells must comply with all applicable federal, State, Tribal, and local environmental regulations.

2. Developed Springs:

a. All Developed Spring collection components, including but not limited to infiltration galleries, infiltration basins, and French drains, shall be installed and buried under the surface of the ground.

b. All means of storage and conveyance, including but not limited to supply pipes, cisterns, and pump housings, shall be sealed and made impervious to water and designed in a manner that protects the source from backflow and surface contamination.

c. Open pits, ponds, or excavations shall not be used as a means of diversion for Developed Springs.

d. Construction and operation of all Developed Springs must comply with all applicable federal, State, Tribal, and local environmental regulations.

3. Aquifer Injection and Injection Wells are not allowed except when used exclusively for Heating/Cooling Exchange Wells.

1-1-112. Mitigation

1. Unless any provision of a Groundwater Management Area established pursuant to Section 1-1-109 of this Ordinance specifically requires Mitigation for any of the following categories of Appropriation Rights, Mitigation is not required for Appropriation of:

a. Redundant or Substitute Wells pursuant to Section 2-2-115 of this Ordinance;

b. Stock Water Allowances pursuant to Section 2-2-116 of this Ordinance;

c. Domestic Allowances pursuant to Section 2-2-117 of this Ordinance;

d. Heating/Cooling Exchange Wells pursuant Section to 2-2-119 of this Ordinance;

e. Temporary Emergency Appropriations pursuant to Section 2-2-120 of this Ordinance; or

f. Short-term uses of an Appropriation Right pursuant to Sections 2-2-121 and 2-2-122 of this Ordinance.

2. Mitigation is not required for Appropriation of Flathead System Compact Water Pursuant to 2-2-118 of this Ordinance.

3. Any Appropriation Right that results in a Net Depletion of either surface water or Groundwater shall offset the entire Net Depletion that results in adverse effect to any Appropriator through the use of Mitigation pursuant to a Mitigation Plan.

4. An adverse effect to a Wetland Protective Appropriation Right recognized in Article III.C.1.f of the Compact or a Wetland Protective Appropriation Right issued pursuant to Section 2-2-123 of this Ordinance that requires Mitigation shall include, but is not limited to, a water supply alteration that would cause:

a. reductions of the Wetland boundary in excess of the normal range of variability in water; or

b. unnatural Wetland plant community change.

5. A Mitigation Plan must include:

a. a plan of use for the proposed Appropriation Right for which the Mitigation Plan is required;

b. an identification of the location, volume, and timing (by monthly or more frequent time step as determined by the Engineer) of the adverse effect to be mitigated;

c. if necessary, evidence that an application for a Change in Use has been submitted;

d. the amount of water reallocated through exchange or substitution that is required to mitigate the adverse effect;

e. evidence that the water for Mitigation is legally and physically available;

f. evidence of how the Mitigation Plan will offset the Net Depletion in a manner that will offset any adverse effect to any Appropriator; and

g. evidence that the necessary water quality permits, if any, have been applied for pursuant to the Tribal Water Quality Management Ordinance.

6. No applicant for an Appropriation Right shall be required to provide more Mitigation than the quantity needed to offset the adverse effects of that proposed new Appropriation Right on any Appropriator.

7. Compliance with a Mitigation Plan and proof of any water quality permit(s) issued pursuant to the Tribal Water Quality Management Ordinance, if applicable, must be included as a written condition on any Appropriation Right or Change in Use authorization that is conditioned on Mitigation.

8. If compliance with a Mitigation Plan or any applicable water quality permit(s) issued pursuant to the Tribal Water Quality Management Ordinance ceases or terminates, the holder of the Appropriation Right conditioned on compliance with the Mitigation Plan shall immediately notify the Office of the Engineer, and use of the Appropriation Right shall be suspended immediately until a new Mitigation Plan is approved and implemented pursuant to this Ordinance.

1-1-113. Codification, Severability and Defense.

1. The provisions of this Ordinance are severable, and a finding of invalidity of one or more provisions hereof shall not affect the validity of the remaining provisions.

2. This Ordinance is intended to function in conjunction with the legislation adopted by the Confederated Salish and Kootenai Tribes pursuant to Tribal approval of the Confederated

Salish and Kootenai Tribes-Montana Compact and the Montana Water Use Act of 1973 to effectuate Unitary administration and Management on the Flathead Indian Reservation. Should those portions of the parallel Tribal Legislation be amended by subsequent legislation without contemporaneous and materially identical State amendment to this Ordinance, this Ordinance shall govern the use of waters within the Reservation, irrespective of the amended provisions of Tribal law, until such time as the laws of the Tribes and the State are rendered mutually consistent. Similarly, should this Ordinance be amended without contemporaneous and materially identical amendment of the provisions adopted into Tribal law, those pre-existing provisions of Tribal law shall govern the use of waters within the Reservation, irrespective of the amended provisions, until such time as the laws of the Tribes and the State are rendered mutually consistent.

3. Any amendment to this Ordinance that is approved by the Tribes, the State and the Secretary is pursuant to, and shall not be deemed a modification of, the Compact.

4. The State adopts this Ordinance only after concluding its provisions are lawful. Should the legality of the Ordinance, or parallel Tribal legislation, or any provision thereof be challenged in any court, the parties shall use their best effort jointly to defend the enforceability of the Ordinance, the parallel Tribal legislation and each of the respective provisions.

1-1-114. Effective Date. This Ordinance and each provision hereof according to its terms shall take on the Effective Date of the Compact.

PART 2 - UNITARY ADMINISTRATION AND MANAGEMENT

1-2-101. Purpose. The purpose of this Part is to establish the processes applicable to all surface and Groundwater use within the exterior boundaries of the Flathead Indian Reservation.

1-2-102. Establishment and Composition of the Water Management Board. Pursuant to Article IV.I of the Compact, the Water Management Board is established.

1-2-103. Qualifications of Board Members. As set forth in Article IV.I.2.f of the Compact:

1. A Board member shall be over 18 years of age.

2. A Board member shall be a Reservation resident, which means, for the purposes of filling a position on the Board, an individual who:

a. does business within Flathead Indian Reservation boundaries;

b. is domiciled within Flathead Indian Reservation boundaries; or

c. owns and maintains a seasonal residence within Flathead Indian Reservation boundaries.

3. No elected official of the State of Montana, or any political subdivision thereof, or of the United States, or of the Tribes is eligible for nomination to the Board while holding such elective office. However, a nominee for Board membership shall not be disqualified by reason of the fact that he or she is an employee or contractor of the State of Montana or any political subdivision thereof, or of the Tribes, or of the United States.

4. A Board member shall have education and experience in one or more of the following fields: natural resources management, public administration, agriculture, engineering, commerce or finance, hydrology, biological sciences, water law or water policy.

5. No Board member may vote on any application or appeal that the member participated in personally and substantially in any non-Board capacity.

1-2-104. Public Meetings and Records. As set forth in Article IV.I.7 of the Compact:

1. Notwithstanding any other provisions of law, the Board is a public agency for purposes of the applicability of State and Tribal right to know laws.

2. All regular and special meetings of the Board, including all hearings conducted by the Office of the Engineer or the Board pursuant to the provisions of Chapter 2 Part 2, and Chapter 3 of this Ordinance, shall be open to the observation of the general public pursuant to State and Tribal open meeting laws. Where there is a conflict of laws, the law that provides for greater openness to the public applies.

3. Where no more specific notice provisions are set forth in this Ordinance, notice of any meeting, including a draft agenda, shall be provided to the public in a manner and on a timeframe consistent with the criteria set forth in State and Tribal law. Where there is a conflict of laws, the law that provides for earlier notice shall apply.

4. The Board shall keep the following records:

a. minutes of all meetings;

b. recordings of all hearings conducted by the Board or the Office of the Engineer pursuant to the provisions of Chapter 2 Part 2, and Chapter 3 of this Ordinance;

c. all documents filed with or generated by the Board or the Office of the Engineer pursuant to this Ordinance;

d. any other records required by applicable provisions of State or Tribal law, provided that if there is a conflict of laws, the law that provides for more expansive record retention shall apply.

5. All Board records are public records and shall be made available to the public for inspection under such reasonable terms and conditions as the Board shall establish.

1-2-105. Compensation and Expenses of the Board. As set forth in Article IV.I.2.h of the Compact, each Board member shall receive such compensation for services and reimbursement for expenses for attendance at Board meetings as shall be fixed by the State and the Tribal Council for the Board members appointed by the same. The compensation for the fifth Board member shall set jointly by the State and the Tribal Council. The compensation and expenses of the Federal ex officio member shall be paid by the United States.

1-2-106. Quorum and Voting of the Board. As set forth in Article IV.I.3 of the Compact, four voting members of the Board shall constitute a quorum. No Board action may be voted upon in the absence of a quorum. All Board decisions shall be by affirmative vote of a majority of the Board. If a proposal put to a vote of a quorum of Board members ends in a tie vote, the proposal, or matter under consideration is deemed disapproved or denied.

1-2-107. Powers and Duties of the Board.

1. The Board shall have those powers and duties set forth in Article IV.I.4 and 5 of the Compact and in this Ordinance, including those powers necessary and proper to carry out all Board responsibilities as set forth in the Compact and this Ordinance.

2. As set forth in the Compact, the Board shall have exclusive jurisdiction to resolve any controversy as between the Parties or between or among holders of Appropriation Rights and Existing Uses on the Reservation over the meaning and interpretation of the Compact and this Ordinance.

1-2-108. Technical Assistance to the Board and the Engineer. The NRD and the DNRC shall, within the limits of their respective expertise and resources, and when so requested by the Board or the Office of the Engineer, collect, compile, and analyze information related to waters of the Reservation, their use, and the Works associated with their use, and produce reports and provide technical assistance and advice to the Board or the Office of the Engineer.

1-2-109. Qualifications of the Water Engineer.

1. The Water Engineer shall be a professional in one or more of the following water resources or management related fields:

a. water resources management;
b. hydrology;
c. hydrogeology;
d. environmental science;
e. business or public administration;
f. biological science;
g. civil engineering;
h. environmental engineering; or
i. law.

2. The Water Engineer shall have a minimum of a bachelor's degree with 10 years of increasingly responsible experience, including three years of management experience, or a master's degree with seven years of increasingly responsible experience, including three years of management experience, or an appropriate combination of education and experience.

3. The Water Engineer shall have the skill to deal with a diverse and sometimes contentious public.

4. The Water Engineer shall have the ability to:

a. successfully manage the water resources staff;
b. provide technical assistance to the Board; and
c. act as a hearings officer and document decisions and orders in writing.

1-2-110. Duties of the Engineer. The Engineer shall be an employee of the Board and shall exercise the duties set forth in the Compact and this Ordinance, and as assigned by the Board pursuant to the Compact and this Ordinance. These duties include, but are not limited to:

1. The administration of water rights on the Reservation, and the enforcement of the terms of this Ordinance and the conditions of all Appropriation Rights, determinations, orders, regulations, plans, policies, guidelines, and other actions taken by the Engineer or the Board, pursuant to the Compact and this Ordinance;

2. Coordination with the Project Manager, as far as practicable, of the operations of the FIIP with the administration and enforcement of water rights outside of the FIIP;

3. The supervision and management of Staff; and

4. The development and submission to the Board of budget requests for approval by the Board and forwarding to the Tribes and State for the purpose of securing necessary appropriations.

1-2-111. Immunity from Suit. Members of the Board, the Engineer, any Designee, any Water Commissioner appointed pursuant to Section 3-1-114 of this Ordinance, and any Staff shall be immune from suit for damages arising from the lawful discharge of an official duty associated with the carrying out of powers and duties set forth in the Compact or this Ordinance relating to the authorization, administration or enforcement of water rights on the Reservation.

1-2-112. Filing Fees. A filing fee shall be paid at the time an application is filed with the Office of the Engineer under Section 2-1-107, 2-2-104, 2-2-115, 2-2-116, 2-2-117, 2-2-118, 2-2-119, 2-2-123, or 2-2-124 of this Ordinance. The amount of the fee shall be the same as the fee charged by DNRC for the same type of application under State law, as those fees may be modified from time to time by the DNRC. The Board shall post notice of the applicable amount of these fees at the Office of the Engineer and on the Board's website.

CHAPTER II
WATER USE

PART 1 - GENERAL PROVISIONS

2-1-101. Registration of Uses of the Tribal Water Right in Existence as of the Effective Date of the Compact.

1. Pursuant to Article III.C.1.b of the Compact, the Tribes, each Tribal Member, and each Allottee who claims to have an Existing Use of waters of the Reservation which is part of the Tribal Water Right shall file a registration of Existing Use of the Tribal Water Right with the Engineer. Uses of the Tribal Water Right for which abstracts are appended to this Compact, including uses on the FIIP, are exempt from this registration requirement.

2. Historically irrigated allotments with serviceable delivery systems that are held by individuals and in trust by the United States, and are not served by the FIIP, shall be eligible to be registered pursuant to the provisions of Sections 2-1-101 et seq. of this Ordinance even if such allotments are not being irrigated on the Effective Date of the Compact.

3. The NRD shall provide assistance to the Tribes, Tribal Members, and Allottees in preparing registrations of Existing Uses of the Tribal Water Right for filing.

4. No Tribal Member or Allottee may exercise, for the same water use, both a registration of Existing Use of the Tribal Water Right and a Water Right Recognized Under State Law.

2-1-102. Process for Registration of Existing Use of the Tribal Water Right.

1. The Tribes, Tribal Members, and Allottees claiming a use of water that falls under the terms of Section 2-1-101 of this Ordinance shall, within five years of the Effective Date of this Ordinance, file a Registration Form with the Board documenting the registration of Existing Use of the Tribal Water Right and identifying:

a. the rate and volume of water used;
b. the source of supply for the use;
c. the point of diversion by legal land description;
d. the place of use by legal land description;
e. the period of use;
f. the period of diversion;
g. the place of storage (if applicable);
h. the capacity of storage (if applicable);

i. the purpose; and

j. the means of diversion.

2. Upon receipt, the Board shall transmit the Registration Form to the Office of the Engineer.

3. Upon receipt of the Registration Form, the Office of the Engineer shall review the Registration Form within 180 days and may either issue a Registration Certificate or return a defective Registration Form to the filer, together with the reasons for returning it. Upon receiving a corrected Registration Form, the Office of the Engineer has 90 days from the certified receipt of the corrected Registration Form to issue a Registration Certificate or reject the registration. If the Office of the Engineer neither issues a Registration Certificate nor rejects the registration within the initial 180 day review period, the Registration Form shall be deemed approved and the Board shall issue a Registration Certificate. If the Office of the Engineer neither issues a Registration Certificate nor rejects the registration within 30 days of certified receipt of a corrected Registration Form, the Registration Form shall be deemed approved and the Board shall issue a Registration Certificate.

4. Any Person filing a Registration Form or a corrected Registration Form with the Office of the Engineer pursuant to subsections (1) and (3) of this Section who is dissatisfied with the rejection of that corrected Registration Form by the Office of the Engineer pursuant to subsection (3) of this Section may appeal that rejection to the Board by filing a notice of appeal to the Board within 30 days of the rejection of the corrected Registration Form. To be filed, a notice must be placed in the custody of the Board within the time fixed for filing. Filing may be accomplished by mail addressed to the Board, but filing shall not be timely unless the papers are actually received within the time fixed for filing. Immediately upon receipt by the Board, the notice of appeal shall be date stamped.

5. Any appeal to the Board filed pursuant to subsection (4) of this Section shall be conducted pursuant to the provisions of Section 3-1-104 of this Ordinance.

2-1-103. Fee for Filing Registration of Existing Use of the Tribal Water Right. The Board shall not charge a fee for the processing of registrations or corrected registrations of Existing Uses of the Tribal Water Right.

2-1-104. Tribal Member and Allottee Entitlements Pursuant to 25 U.S.C. Section 381. All Tribal Members' and Allottees' entitlements pursuant to 25 U.S.C. Section 381 are hereby recognized and confirmed. The attributes of these entitlements shall be defined through either:

1. the process set forth in Section 2-1-101 et seq. of this Ordinance, if the Tribal Member or Allottee with an entitlement pursuant to 25 U.S.C. Section 381 also has a use of water eligible for the registration process set forth in those sections of this Ordinance; or

2. by applying for a New Appropriation as provided in Section 2-2-101 et. seq. of this Ordinance or by applying to develop a use of Flathead System Compact Water as provided in Section 2-2-118 of this Ordinance, if the Tribal Member or Allottee with an entitlement pursuant to 25 U.S.C. Section 381 does not have a use of water eligible for the registration process set forth in Section 2-1-101 et seq. of this Ordinance.

2-1-105. Tribal, Tribal Member and Allottee Challenge of a Registration Certificate Issued by the Office of the Engineer. The Tribes, Tribal Members, and Allottees may seek judicial review of any final decision by the Board pursuant to Section 2-1-102(4) of this Ordinance by filing a petition for judicial review with the Tribal Court of the Tribes within 30 days of the issuance of the final Board decision. In considering the petition, the Board's legal conclusions shall be reviewed for correctness and its factual findings for abuse of discretion.

2-1-106. Registration of Certain Other Previously Unrecorded Existing Uses. Persons who have Existing Uses on the Reservation as of the effective date of this Ordinance shall register such Existing Uses with the Board if those uses:

1. Were not required to be filed, pursuant to 85-2-222, MCA, and in fact were not filed as claims in the Montana General Stream Adjudication for a pre-1973 use of water arising under State law; or

2. Were developed on or after July 1, 1973, at a volume and flow rate that would qualify as an exception to the permit requirements of 85-2-306, MCA, and for which a notice of completion of Groundwater development (DNRC Form 602) or an application for provisional permit for completed Stock Water pit or reservoir (DNRC Form 605) was filed with the DNRC but not processed by the DNRC.

3. Were developed after July 1, 1973, at a volume and flow rate that would qualify as an exception to the permit requirements of 85-2-306, MCA, and for which a notice of completion of Groundwater development (DNRC Form 602) or an application for provisional permit for completed Stock Water pit or reservoir (DNRC Form 605) was not filed with the DNRC.

2-1-107. Process for Registration of Certain Other Previously Unrecorded Existing Uses.

1. Each Person claiming an Existing Use of water that falls under the terms of Section 2-1-106 of this Ordinance shall, within 180 days of the effective date of this Ordinance, file a Registration Form with the Board documenting that the Existing Use is for a purpose and with a flow rate and volume that falls within the terms of Section 2-1-106, and identifying:

a. the date of first use of the water;

b. the source of supply for the use;

c. the point of diversion by legal land description;

d. the place of use by legal land description; and

e. the period of use.

2. Within 30 days of the Effective Date, the DNRC shall transmit to the Board all filed but not processed completion notices (DNRC Form 602 or 605) it has received for water uses excepted from the permitting requirements of State law developed within the boundaries of the Reservation after August 22, 1996. The transmission of these notices shall constitute compliance with Section 2-1-107(1) of this Ordinance for those uses eligible for registration pursuant to Section 2-1-106(2) of this Ordinance. No additional fee shall be required for the processing of the forms transmitted by the DNRC.

3. Upon receipt, the Board shall transmit the Registration Form to the Office of the Engineer.

4. Upon receipt of the Registration Form, the Office of the Engineer shall review the Registration Form within 180 days and may either issue a Registration Certificate or return a defective Registration Form to the filer, together with the reasons for returning it. If a corrected Registration Form is submitted within 30 days of its return by the Engineer, no new filing fee shall be required. Upon receiving a corrected Registration Form, the Office of the Engineer has 90 days from the certified receipt of the corrected Registration Form to issue a Registration Certificate or reject the registration. If the Office of the Engineer neither issue a Registration Certificate nor rejects the registration within the initial 180 day review period, the Registration Form shall be deemed approved and the Board shall issue a Registration Certificate. If the Office of the Engineer neither issues a Registration Certificate nor rejects the registration within 90 days of certified receipt of a corrected Registration Form, the Registration Form shall be deemed approved and the Board shall issue a Registration Certificate.

5. For any use registered under Section 2-1-106(1) of this Ordinance, the priority date of the use shall be the date of first beneficial use, and such a date shall be reflected on the Registration Certificate.

6. For any use under Section 2-1-106(2) of this Ordinance, the priority date for the use shall be the date of filing of the appropriate form, and such a date shall be reflected on the Registration Certificate.

7. For any use under Section 2-1-106(3) of this Ordinance, the priority date for the use shall be the Effective Date of the Compact, and that date shall be reflected on the Registration Certificate.

8. Any Person filing a corrected Registration Form with the Office of the Engineer pursuant to subsection (2) of this Section who is dissatisfied with the rejection of that corrected Registration Form by the Office of the Engineer pursuant to subsection (2) of this Section may appeal that rejection to the Board by filing a notice of appeal to the Board within 30 days of the rejection of the corrected Registration Form. To be filed, a notice must be placed in the custody of the Board within the time fixed for filing. Filing may be accomplished by mail addressed to the Board, but filing shall not be timely unless the papers are actually received within the time fixed for filing. Immediately upon receipt by the Board, the notice of appeal shall be date stamped.

9. Any appeal to the Board filed pursuant to subsection (6) of this Section shall be conducted pursuant to the provisions of Section 3-1-104 of this Ordinance.

2-1-108. Failure to Register an Existing Use of Water. Failure to register an Existing Use that is subject to registration as provided for under Sections 2-1-101, 2-1-102, and 2-1-106(2) and (3) of this Ordinance, shall divest the holder of the Existing Use of any legal protections otherwise afforded under the Compact and this Ordinance, to the extent not inconsistent with federal law.

2-1-109. Limitation to Beneficial Use. Beneficial use shall be the basis, measure and limit to Appropriation Rights issued pursuant to this Ordinance.

2-1-110. No Adverse Possession. No right to use water within the Reservation may be acquired by prescription or by adverse possession of use.

2-1-111. Abandonment of Appropriation Right.

1. No part of the Tribal Water Right is subject to abandonment by nonuse.

2. If an Appropriator, other than a user of any portion of the Tribal Water Right, ceases to use all or a part of an Appropriation Right, or any Existing Use, with the intention of wholly or partially abandoning the right, or if the appropriator ceases using the right according to its terms and conditions with the intention of not complying with those terms and conditions, the Appropriation Right or Existing Use is, to the extent of the nonuse, considered abandoned and must immediately expire.

3. If an Appropriator, other than a user of any portion of the Tribal Water Right, ceases to use all or part of an Appropriation Right or Existing Use, or ceases using the Appropriation Right or Existing Use according to its terms and conditions for a period of 10 successive years and there was water available for use, there is a prima facie presumption that the Appropriator has abandoned the right for the part not used.

4. If an Appropriator ceases to use all or part of an Appropriation Right or Existing Use in compliance with a candidate conservation agreement initiated pursuant to 50 CFR 17.32 or because the land to which the water is applied to a beneficial use is contracted under a state, tribal, or federal conservation, mitigation, or set-aside program:

a. the land set-aside and resulting reduction in use of the Appropriation Right or Existing Use from the conservation, mitigation, or set-aside program shall not be construed as an intent by the appropriator to wholly or partially abandon the Appropriation Right or Existing Use or to not comply with the terms and conditions attached to the right; and

b. the period of nonuse that occurs for part or all of the Appropriation Right or Existing Use as a result of the conservation, mitigation, or set-aside program shall not create and shall not be added to any previous period of nonuse to create a prima facie presumption of abandonment.

2-1-112. Procedure for Declaring Abandonment.

1. An Appropriator who claims to have been or alleges will be injured by the resumption of use of an Appropriation Right or Existing Use alleged to have been abandoned may file a petition with the Office of the Engineer to declare the Appropriation Right or Existing Use abandoned in whole or in part. Upon receipt of the petition, the Office of the Engineer shall date stamp it.

2. If the Engineer or Designee finds that the petition provides enough information to give rise to a question of abandonment, the petition shall be posted on the Board's website within 10 working days of the determination of validity. If the Engineer or Designee finds that the petition fails to provide enough information to give rise to a question of abandonment, the petition shall be rejected.

3. Upon a finding of validity pursuant to subsection (2) of this Section, a hearing shall be set within 180 days of the determination of validity, or any extended period of time, not to exceed 90 days, granted by the Engineer, for the Engineer or Designee to determine whether the Appropriation Right or Existing Use has been abandoned. Discovery prior to hearing will be as provided by the Engineer or Designee, and may commence following the notice of the hearing.

4. The owner of the right alleged to have been abandoned shall be personally served notice of the hearing by the Office of the Engineer and the hearing shall be publicly noticed by the Office of the Engineer once via a legal notice in a local newspaper of general circulation and posted by the Office of the Engineer on the Board's website for a period of 10 days commencing not less than 30 days from the date of the hearing.

5. At the hearing on the petition, the burden of proof shall be on the petitioner who must prove by a preponderance of the evidence that the Appropriation Right or Existing Use has been abandoned pursuant to Section 2-1-111 of this Ordinance, unless a prima facie presumption of abandonment has arisen pursuant to Section 2-1-111(3). In such circumstances, the burden of

proof is shifted to the owner of the right alleged to have been abandoned, who must prove by a preponderance of the evidence a lack of intent to abandon the right in question.

6. The hearing shall be recorded electronically and an official record maintained. All evidence that, in the opinion of the Engineer or Designee, possesses probative value shall be admitted, including hearsay, if it is the type of evidence commonly relied upon by reasonably prudent Persons in the conduct of their normal business affairs. Rules of privilege recognized by law shall be given effect. Evidence which is irrelevant, immaterial, or unduly repetitious shall be excluded.

7. A written decision by the Engineer or Designee shall be rendered within 60 days of the hearing, disseminated to the parties, and posted by the Office of the Engineer on the Board's website within 10 days of its issuance. If the individual who conducted the hearing becomes unavailable to the Office of the Engineer, a decision may be prepared by an individual who has read the record only if the demeanor of witnesses is considered immaterial by all parties; if any party considers the demeanor of any witness to be material to the resolution of the appeal, a new hearing must be held.

8. Any party to the abandonment hearing dissatisfied with the decision of the Engineer or Designee may appeal to the Board (and become an appellant) and obtain review of the Engineer's or Designee's decision. A notice of appeal to the Board must be filed with the Board within 30 days of the Engineer's or Designee's decision. To be filed, a notice must be placed in the custody of the Board within the time fixed for filing. Filing may be accomplished by mail addressed to the Board, but filing shall not be timely unless the papers are actually received within the time fixed for filing. Immediately upon receipt by the Board, the notice of appeal shall be date stamped.

9. Appeal to the Board pursuant to subsection (8) of this Section, shall be made and resolved pursuant to the provisions of Section 2-2-111 of this Ordinance.

10. Any petitioner whose petition is rejected by the Engineer or Designee as failing to provide enough information to give rise to a question of abandonment may appeal the Engineer's decision to the Board pursuant to the provisions of Section 3-1-104 of this Ordinance.

2-1-113. Prevention of Waste and Interference with Lawful Use.

1. Waters within the Reservation may not be wasted, nor may water be used unlawfully, nor may a lawful use of water be interfered with.

2. All facilities, Works and equipment associated with the withdrawal, impoundment, pumping, diversion, drainage, or transmission of waters on the Reservation shall be so constructed, installed, and maintained as to prevent the Waste, contamination, or pollution of surface and Groundwater and to avoid injury to the lands and property of others. All wells, producing and non-producing, which may contaminate other surface or Groundwater must be properly abandoned or upgraded with a sanitary seal, in accordance with the water well criteria incorporated by reference in Section 1-1-111 of this Ordinance. All flowing wells shall be capped or equipped with valves so that the flow of water can be stopped when the water is not being put to beneficial use.

3. The Board, on its own initiative or through the Office of the Engineer, may require the recipient of any Appropriation Right issued pursuant to this Ordinance to construct or install a weir, head gate, valve, meter, gauge, or other reasonable and appropriate device for the control and measurement of water and for the prevention of Waste.

2-1-114. Issuance of Appropriation Right Does Not Constitute Permission to Trespass. The issuance of an Appropriation Right pursuant to this Ordinance does not constitute a license or permission to trespass on land which the holder of the Appropriation Right does not otherwise have a legal right to access, not does it constitute a ditch right.

2-1-115. Development of Enforceable Schedule for the Tribes' Other Instream Flow Rights.

1. As set forth in the Compact, each of the Tribes' instream flow rights identified in Article III.C.1.d.iii of the Compact shall not be enforceable until after an enforceable schedule for that stream reach is promulgated pursuant to the process set forth in this Section. This process shall not commence for any stream reach until the Compact has been finally approved by the Montana Water Court, and until the Montana Water Court has issued a final decree for the water court basin (76L or 76LJ) in which that stream reach lies, including the expiration of all time for appeals, or the resolution of any such appeal, whichever date is latest (the "Eligibility Date").

2. At any time after the Eligibility Date, the Tribes may initiate the enforceable schedule process for any given stream reach included in the rights identified in Article III.C.1.d.iii of the Compact by:

a. providing notice to water rights holders in the reach of the Tribes' initiation of the process to finalize and implement the enforceable schedule;

b. developing a full summary of all Water Rights Arising Under State Law in the reach, including a monthly time-step pattern of water use;

c. developing a summary of streamflow conditions, at or near each enforceable schedule compliance point within the reach area, utilizing:

i. streamflow gaging information; or

ii. an accepted hydrologic analysis procedure to estimate streamflow conditions. The method to develop streamflow information will be based on the professional judgment of the Tribes' hydrologist responsible for coordinating the enforceable schedule process; and

d. preparing a report on the availability of water to fulfill the Tribes' instream flow water right for that reach area.

3. The Tribes shall prepare each proposed enforceable schedule based on a water budget that allows valid water rights to be exercised.

4. The Tribes shall hold one or more public meetings, and provide timely advanced notice to affected water users of each such meeting, to report on the completion of the water availability study and the proposed enforceable schedule for that reach area.

5. The Tribes shall consider the public comment received either at the public meeting(s) or within 30 days thereafter, and shall finalize the proposed enforceable schedule for a given reach area no fewer than 45 days after the day of the last public meeting.

6. The Tribes shall provide written notice to the Engineer of the finalized proposed enforceable schedule, including an explanation of the technical basis therefore. Upon receipt, the Engineer shall forward the proposed enforceable schedule to Staff for review.

7. Staff, using information from the written notice, as well as their own compilation of independent resources and analysis, if available, shall issue a recommended decision as to whether to adopt the enforceable schedule within 90 days of the date of the written notice provided by the Tribes pursuant to subsection (6) of this Section.

8. If the recommended decision is to adopt the enforceable schedule, a summary of the proposed enforceable schedule and the recommended decision shall be publicly noticed by the Office of the Engineer once via a legal notice in a local newspaper of general circulation and posted by the Office of the Engineer on the Board's website for a period not less than 45 days from the date the recommendation is issued. A summary of the proposed enforceable schedule and the recommended decision shall also be distributed electronically to individuals or entities who have registered with the Board to receive electronic notice. If no objections are filed within 45 days of the initial Publication of the recommended decision by the Office of the Engineer, or if all filed objections are unconditionally withdrawn prior to being ruled upon, the application shall be granted by the Engineer or Designee within 10 days after expiration of the time for filing objections or after the unconditional withdrawal of the last objection, whichever date is later.

9. Objections to a proposed enforceable schedule may be filed only by holders of water rights in the particular stream reach for which the enforceable schedule is proposed. The only cognizable ground for objection is that the proposed enforceable schedule will have an adverse effect on the objector's water right. An objection must describe the alleged adverse effect on the objector's water right. The burden of proof shall be on the objector.

10. An objector or the Tribes may elect to have any valid objection decided on the record or after hearing. If the objector elects to have a hearing, that request must be made at the same time as the filing of the objection or the objector's right to a hearing is waived. The Tribes must invoke the right to a hearing within 10 days of receiving notice of the objection or the Tribes' right to a hearing is waived.

11. Discovery prior to hearing will be as provided by the Engineer or Designee, and may commence following the receipt of a valid objection.

12. The Engineer or Designee, after issuance of notice of hearing, may not communicate with any party to that case or any party's representative(s) in connection with any issue of fact or law in the case except upon notice and opportunity for all parties to participate.

13. The hearing shall be recorded electronically and an official record maintained.

14. All evidence that, in the opinion of the Engineer or Designee, possesses probative value shall be admitted, including hearsay, if it is the type of evidence commonly relied upon by reasonably prudent Persons in the conduct of their normal business affairs. Rules of privilege recognized by law shall be given effect. Evidence which is irrelevant, immaterial, or unduly repetitious shall be excluded.

15. A written decision by the Engineer or Designee shall be rendered within 60 days of the hearing, disseminated to the parties, and posted by the Office of the Engineer on the Board's website within 10 days of its issuance. If the individual who conducted the hearing becomes unavailable to the Office of the Engineer, a decision may be prepared by an individual who has read the record only if the demeanor of witnesses is considered immaterial by all parties to the case. If any party considers the demeanor of any witness to be material to the resolution of the appeal, a new hearing must be held.

16. The Tribes or any objector dissatisfied with the final decision of the Engineer or Designee may appeal to the Board (and become an appellant) and obtain review of the Engineer's or Designee's decision. A notice of appeal to the Board must be filed with the Board within 30 days of the Engineer's or Designee's decision. To be filed, a notice must be placed in the custody of the Board within the time fixed for filing. Filing may be accomplished by mail addressed to the Board, but filing shall not be timely unless the papers are actually received within the time fixed for filing. Immediately upon receipt by the Board, the notice of appeal shall be date stamped. Appeal to the Board shall be resolved pursuant to the provisions of Section 2-2-111 of this Ordinance.

17. If the recommended decision is to reject the proposed enforceable schedule, the Tribes may withdraw the proposed enforceable schedule within 10 days of the issuance of the recommended decision, or may appeal the recommended decision to the Engineer by filing a notice of appeal within 30 days of issuance of the recommended decision. The Tribes may elect to have the appeal decided on the record, after submission of additional evidence and argument, or after hearing. If the Tribes elect to have a hearing, that request must be made at the same time as the filing of the notice of appeal or the right to a hearing is waived. The notice of appeal must specify those parts of the recommended decision claimed to be in error.

18. Within 60 days from the filing of the notice of appeal, or any extended period of time, not to exceed 60 days, granted by the Engineer or Designee, the Tribes may submit additional factual evidence and legal argument in support of the proposed enforceable schedule. Staff who issued the recommended decision shall have 45 days from the Tribes' submission to revise, amend, or affirm the recommended decision in a second recommended decision that explains in writing the rationale for the second recommended decision.

19. If the recommended decision or second recommended decision is to reject the proposed enforceable schedule and no notice of appeal is filed pursuant to this Section, the proposed enforceable schedule shall be deemed rejected the day after expiration of the time for filing a notice of appeal. The rejection of a proposed enforceable schedule does not preclude the Tribes from filing another proposed enforceable schedule for the same or any other stream reach identified in the rights set forth in Article III.C.1.d.iii of the Compact.

20. The Tribes bear the burden of demonstrating to the Engineer or Designee by a preponderance of the evidence, whether a hearing is held or not, that the recommended decision or second recommended decision is in error.

21. If the Tribes request a hearing before the Engineer or Designee, a hearing shall be held no later than the latest of the following:

a. 90 days after the filing of the notice of appeal; or

b. 30 days after the issuance of a second recommended decision pursuant to subsection (2) of this Section, whichever is later.

22. The hearing shall be recorded electronically and an official record maintained. All evidence that, in the opinion of the Engineer or Designee, possesses probative value shall be admitted, including hearsay, if it is the type of evidence commonly relied upon by reasonably

prudent Persons in the conduct of their normal business affairs. Rules of privilege recognized by law shall be given effect. Evidence which is irrelevant, immaterial, or unduly repetitious shall be excluded.

23. A decision by the Engineer or Designee to reverse, modify, or affirm the recommended decision or the second recommended decision shall be made in writing within 60 days after the later of:

a. the filing of a notice of appeal pursuant to subsection (1) of this Section;

b. the submission of additional evidence or legal argument pursuant to subsection (2) of this Section;

c. issuance of Staff's second recommended decision; or

d. the completion of the hearing.

24. If the Engineer or Designee reverses the recommended decision or the second recommended decision, and determines that the enforceable schedule should not have been rejected, the proposed enforceable schedule shall be publicly noticed to the public and processed pursuant to the provisions of subsections (8)-(16) of this Section.

25. If the Engineer or Designee affirms the recommended decision or the second recommended decision, resulting in the rejection of the proposed enforceable schedule, the Tribes may either accept that decision by withdrawing the proposed enforceable schedule or taking no further action, or may appeal that decision to the Board pursuant to Section 2-2-111 of this Ordinance. If no timely notice of appeal is filed, the proposed enforceable schedule shall be deemed rejected on the day after the expiration of the time to file the notice of appeal.

26. Any final Board decision on implementation of the enforceable schedule made pursuant to the process outlined in this Section may be appealed pursuant to Section 2-2-112 of this Ordinance.

PART 2 - PERMIT AND CHANGE APPLICATION PROCESS

2-2-101. Appropriation Rights and Change in Use authorizations on the Reservation. After the Effective Date, a Person within the exterior boundaries of the Reservation may not Appropriate surface water or Groundwater for a new beneficial use, or change an Existing Use, or commence construction of diversion, impoundment, withdrawal, or related distribution Works except by applying for and receiving an Appropriation Right, or Change in Use authorization, from the Board.

2-2-102. Burden of Proof for Ground or Surface Water Permits and Change Authorizations.

1. For any application for an Appropriation Right or Change in Use that is not one of the categories of Appropriation Right identified in Sections 1-1-112(1) or 2-2-118 of this Ordinance, applicants for an Appropriation Right, or for a Change in Use authorization must prove by a preponderance of the evidence that the proposed new Appropriation Right or Change in Use authorization will not adversely affect any Appropriator.

2. For any application for an Appropriation Right or Change in Use that is not one of the categories of Appropriation Right identified in Sections 1-1-112(1) or 2-2-118 of this Ordinance, the Board, Engineer, or Designee may modify or condition the issuance of Appropriation Right or Change in Use authorization applied for, to assure that:

a. the new Appropriation Right or Change in Use authorization will not adversely affect any Appropriator;

b. the proposed means of diversion, construction, and operation of the appropriation Works are adequate;

c. except in the case of instream flows or other non-consumptive uses, the applicant has the possessory interest or the written consent of the Person(s) with possessory interest in the property where the water is to be put to beneficial use;

d. the water quality of an Appropriator will not be adversely affected;

e. the proposed use will be consistent with the classification of water set for the source of supply pursuant to water quality standards established under the federal Clean Water Act, 33 USC Section 1251 et seq., and contained in regulations promulgated under the Confederated Salish and Kootenai Tribes' Water Quality Management Ordinance, Tribal Ordinance 89B; and

f. the proposed Appropriation Right or Change in Use authorization will not impair the ability of a discharge permit holder to satisfy effluent limitations set forth in a permit issued in accordance with water quality standards established under the federal Clean Water Act, 33 USC Section 1251 et seq., and contained in regulations promulgated under the Confederated Salish and Kootenai Tribes' Water Quality Management Ordinance, Tribal Ordinance 89B.

2-2-103. Pre-Application Meeting with Office of the Engineer. Prior to applying to the Board for a new Appropriation Right or Change in Use authorization, within the exterior boundaries of the Flathead Reservation, applicants may meet informally with Staff regarding the application process and information requirements.

2-2-104. Application to Board.

1. An applicant for a new Appropriation Right or Change in Use authorization must:

a. pay the appropriate application fee in the amount set by the Board;

b. fill out completely:

i. the Flathead Reservation Appropriation Right Application; or

ii. the Flathead Reservation Application for a Change in Use authorization; and

iii. all applicable addenda;

c. attach to each application all required maps; and

d. sign, date, and notarize or otherwise swear under appropriate oath to the accuracy of the contents of each application.

2. Upon the day of the receipt of an application, or amendment to an application, for a new Appropriation Right or Change in Use authorization, the Office of the Engineer must stamp it received.

3. If an application for a new Appropriation Right is ultimately granted, the priority date of the application is the date the application is stamped received by the Office of the Engineer.

4. All application forms may, upon recommendation by the Engineer, be modified by a unanimous vote of the Board. Any such modification is pursuant to and does not constitute a modification of this Ordinance or the Compact.

2-2-105. Adequate to Process Review.

1. Within 30 days of receipt by the Office of the Engineer of an application for a new Appropriation Right or Change in Use authorization, Staff shall review the application and make a determination whether the application is adequate to process. An application is adequate to process if it:

a. clearly identifies the proposed project; and

b. contains the information required by the following forms:

i. Flathead Reservation Appropriation Right Application, including for Groundwater applications Addendum B - "Flathead Reservation Groundwater Minimum Aquifer Testing Requirements"; or

ii. Flathead Reservation Application for a Change in Use authorization.

2. Staff may waive aquifer testing requirements if sufficient hydrogeologic information already exists on the source and in the location of the proposed development.

3. An application determined to be adequate to process shall be posted on the Board's website within 10 working days of the determination of adequacy.

2-2-106. Not Adequate to Process Determination.

1. If Staff determines an application for a new Appropriation Right or Change in Use authorization is not adequate to process, the Office of the Engineer shall send a letter to the applicant notifying the applicant of the defects in the application.

2. An applicant has 90 days from the date of mailing of the notice of inadequacy pursuant to subsection (1) of this Section to make the application adequate to process. An application for a new Appropriation Right whose defects are timely corrected and which is ultimately granted retains its priority of the date of the initial application.

3. Upon receipt of the information from the applicant to correct deficiencies, Staff must review the updated application and make a determination within 30 days whether the application is adequate to process.

4. An application that is not timely made adequate to process, either through the applicant's failure to respond to the notice of inadequacy issued pursuant to subsection (1) of this Section within the timeframe set forth in subsection (2) of this Section, or by the applicant's failure to provide sufficient information in response to a notice of inadequacy issued pursuant to

subsection (1) of this Section within the timeframe set forth in subsection (2) of this Section, shall be deemed denied.

5. An applicant who disagrees with the decision to deny may appeal that decision to the Board pursuant to Section 3-1-104 of this Ordinance. If such an appeal is filed, the Engineer shall be the appellee.

2-2-107. Application Analysis and Recommended Decision.

1. Prior to the expiration of the time periods set forth in Sections 2-2-105(1), 2-2-106(2), 2-2-106(3), or 2-2-108(2) of this Ordinance, Staff may meet informally with an applicant to discuss an application, including any proposed Mitigation Plan. The results of such meetings shall be documented by a summary memo prepared by Staff and included in the application file. An applicant may also submit a memo documenting the meeting, which becomes part of the application file. If an application submitted pursuant to Section 2-2-104 or a Mitigation Plan submitted pursuant to Section 2-2-108(2) of this Ordinance is amended during this informal process, the amended application shall be reviewed by an individual on Staff who was not involved in the informal process to determine whether the amendments are so substantial that they constitute a new application. If it is determined that the amended application constitutes a new application, that application must be reviewed in its entirety pursuant to Sections 2-2-105 and 2-2-106 of this Ordinance. A new application fee must be submitted. A determination that an application amendment is so substantial as to constitute a new application may be appealed to the Engineer pursuant to Section 2-2-109 of this Ordinance.

2. Staff shall analyze an application determined to be adequate to process pursuant to Section 2-2-105 of this Ordinance within 180 days of the determination of adequacy using tools or techniques that may include:

a. independent resources compiled by Staff (including, but not limited to, Water Resources Surveys and field notes, aerial photographs, water rights decrees, stream gauging records, well logs, and water rights records);

b. water use records (water measurement, ranch logs, etc.) submitted by the applicant;

c. field inspection by Staff;

d. hydrologic or geohydrologic evaluation completed by Staff, provided that all model results, if any, shall be documented.

3. All information relied on by Staff in analyzing an application pursuant to this Section shall be documented in the application file.

4. Staff, using information from the application as well as their own compilation of independent resources and analysis, shall draft a recommended decision with findings of fact and conclusions of law determining:

a. whether the proposed Appropriation Right or Change in Use authorization will cause adverse effect to any Appropriator; and

b. whether and, if so, what amount of Mitigation is required before the proposed Appropriation Right or Change in Use authorization may be issued.

5. If the recommended decision is to grant the application, a summary of the application and the recommended decision shall be publicly noticed by the Office of the Engineer once via a legal notice in a local newspaper of general circulation and posted by the Office of the Engineer on the Board's website for a period not less than 45 days from the date the recommendation is issued. A summary of the application and the recommended decision shall also be distributed electronically to individuals or entities who have registered with the Board to receive electronic notice. If no objections are filed within 45 days of the initial Publication of the recommended decision by the Office of the Engineer, or if all filed objections are unconditionally withdrawn prior to being ruled upon, the application shall be granted by the Engineer or Designee within 10 days after expiration of the time for filing objections or after the unconditional withdrawal of the last objection, whichever date is later.

6. If the recommended decision is to deny the application, the applicant may withdraw the application within 10 days of the issuance of the recommended decision or appeal the recommended decision to the Engineer pursuant to Section 2-2-109 of this Ordinance. The application filing fee shall not be refunded upon withdrawal. Failure to withdraw the application or file an appeal within the applicable timeframes shall result in the application being deemed denied on the day after the expiration of the time to appeal.

7. If the recommended decision is to grant the application with conditions other than Mitigation, the application shall be noticed to the public and processed pursuant to the procedures set forth in Sections 2-2-107(5) and 2-2-110 of this Ordinance unless the applicant withdraws the application within 30 days of the issuance of the recommended decision or appeals the recommended decision to the Engineer pursuant to Section 2-2-109 of this Ordinance. The application filing fee shall not be refunded upon withdrawal.

8. Amendments to applications are not allowed after the issuance of a recommended decision on that application, except as provided in Section 2-2-108(2) of this Ordinance.

2-2-108. Process if Mitigation Required.

1. If Staff analysis of an application concludes that Mitigation is necessary to approve an application, a recommended decision shall be issued to that effect. Upon issuance of a recommended decision finding that Mitigation is required, the applicant may:

a. withdraw the application (with no refund of the application filing fee);

b. appeal the recommended decision to the Engineer pursuant to Section 2-2-109 of this Ordinance; or

c. prepare a Mitigation Plan.

2. If the applicant chooses to prepare a Mitigation Plan, the running of the time set forth in Section 2-2-107(2) of this Ordinance for processing that application is suspended until a timely Mitigation Plan is received from the applicant. The Mitigation Plan must be submitted within 180 days of issuance of the recommended decision requiring Mitigation, or of the decision of the Engineer or Designee as set forth in Section 2-2-109(10) of this Ordinance, whichever date is later, and must include either or both of:

a. an application for a Change in Use authorization for another water right so as to provide for the required Mitigation; and/or

b. amendments describing the source, volume, flow rate, point of diversion, place of use, period of use, and place of storage of mitigation water that comes from other than a change authorization.

3. The running of the time set forth in Section 2-2-107(2) of this Ordinance for analyzing the application and issuing a recommended decision resumes upon the timely receipt by the Office of the Engineer of the material(s) required by subsection (2) of this Section.

4. If a Mitigation Plan is timely submitted by an applicant following a decision of the Engineer or Designee as set forth in Section 2-2-109(10) of this Ordinance, Staff shall issue a new recommended decision concerning the application within 180 days of the timely submission of the Mitigation Plan.

5. If the recommended decision is to grant the application conditioned on the Mitigation Plan submitted by the applicant pursuant to subsection (2) of this Section, the application shall be noticed to the public and processed pursuant to the procedures set forth in Sections 2-2-107(5) and 2-2-110 of this Ordinance.

6. If the recommended decision is to deny the application, the applicant may withdraw the application within 10 days of the issuance of the recommended decision or appeal the recommended decision to the Engineer pursuant to Section 2-2-109 of this Ordinance. The application filing fee shall not be refunded upon withdrawal. Failure to withdraw the application or file an appeal within the applicable timeframes shall result in the application being deemed denied on the day after the expiration of the time to appeal.

7. If the Mitigation Plan is not submitted within 180 days of issuance of the recommended decision requiring Mitigation the application shall be deemed denied.

2-2-109. Appeal to Engineer from Recommended Decision.

1. If a recommended decision issued pursuant to Sections 2-2-107 or 2-2-108 of this Ordinance is to deny an application, or grant it with a requirement of Mitigation or other conditions, the applicant may appeal to the Engineer by filing a notice of appeal within 30 days of issuance of the recommended decision. An applicant may elect to have the appeal decided on the record, after submission of additional evidence and argument, or after hearing. If the applicant elects to have a hearing, that request must be made at the same time as the filing of the notice of appeal or the right to a hearing is waived. The notice of appeal must specify those parts of the recommended decision claimed to be in error.

2. Within 60 days from the filing of the notice of appeal, or any extended period of time, not to exceed 60 days, granted by the Engineer or Designee, the applicant may submit additional factual evidence and legal argument in support of the application. Staff who issued the recommended decision shall have 45 days from the applicant's submission to revise, amend, or affirm the recommended decision in a second recommended decision that explains in writing the rationale for the second recommended decision.

3. If the recommended decision or second recommended decision is to deny an application and no notice of appeal is filed pursuant to this Section, the application shall be deemed denied the day after expiration of the time for filing a notice of appeal.

4. The applicant bears the burden of demonstrating to the Engineer or Designee by a preponderance of the evidence, whether a hearing is held or not, that the recommended decision or second recommended decision is in error.

5. If the applicant requests a hearing before the Engineer or Designee, a hearing shall be held no later than the latest of the following:

a. 90 days after the filing of the notice of appeal; or

b. 30 days after the issuance of a second recommended decision pursuant to subsection (2) of this Section, whichever is later.

6. The hearing shall be recorded electronically and an official record maintained. All evidence that, in the opinion of the Engineer or Designee, possesses probative value shall be admitted, including hearsay, if it is the type of evidence commonly relied upon by reasonably prudent Persons in the conduct of their normal business affairs. Rules of privilege recognized by law shall be given effect. Evidence which is irrelevant, immaterial, or unduly repetitious shall be excluded.

7. A decision by the Engineer or Designee to reverse, modify, or affirm the recommended decision or the second recommended decision shall be made in writing within 60 days after the later of:

a. the filing of a notice of appeal pursuant to subsection (1) of this Section;

b. the submission of additional evidence or legal argument pursuant to subsection (2) of this Section;

c. issuance of Staff's second recommended decision; or

d. the completion of the hearing.

8. If the Engineer or Designee reverses the recommended decision or the second recommended decision, and determines that the application should be granted, the application shall be publicly noticed to the public and processed pursuant to the provisions of Section 2-2-107(5) and Section 2-2-110 of this Ordinance.

9. If the Engineer or Designee affirms the recommended decision or the second recommended decision, resulting in the denial of an application, the applicant may either accept that decision by withdrawing the application or taking no further action, or may appeal that decision to the Board pursuant to Section 2-2-111 of this Ordinance. The application filing fee shall not be refunded upon withdrawal. If no timely notice of appeal is filed, the application shall be deemed denied on the day after the expiration of the time to file the notice of appeal.

10. If the Engineer or Designee affirms the recommended decision or the second recommended decision, resulting in the granting of an application with a requirement of conditions other than Mitigation, the applicant may withdraw the application; file with the Office of the Engineer written acceptance of the conditions within 30 days of the Engineer's or Designee's decision, in which case the application will be noticed to the public and processed pursuant to the provisions of Sections 2-2-107(5) and 2-2-110 of this Ordinance; or appeal the decision to the Board pursuant to Section 2-2-111 of this Ordinance. The application filing fee shall not be refunded upon withdrawal. Failure to withdraw the application, file written acceptance of the condition, or file an appeal within the applicable timeframes shall result in the application being deemed denied on the day after the expiration of the time to appeal.

11. If an applicant has appealed to the Engineer a Staff determination that Mitigation is necessary pursuant to Section 2-2-108(1)(b) of this Ordinance, and the Engineer or Designee affirms the recommended decision resulting in a determination that Mitigation is required before the application may be granted, the applicant may withdraw the application; appeal the decision to the Board pursuant to Section 2-2-111 of this Ordinance; or prepare a Mitigation

Plan pursuant to Section 2-2-108(2) of this Ordinance. The application filing fee shall not be refunded upon withdrawal. Failure to withdraw the application, file a Mitigation Plan, or file an appeal within the applicable timeframes shall result in the application being deemed denied on the day after the expiration of the time to file a Mitigation Plan.

12. If the Engineer or Designee affirms a recommended decision or second recommended decision that found a Mitigation Plan inadequate to justify the issuance of the proposed Appropriation Right or Change in Use authorization, the applicant may either accept that decision by withdrawing the application or taking no further action, or may appeal that decision to the Board pursuant to Section 2-2-111 of this Ordinance. The application filing fee shall not be refunded upon withdrawal. If no timely notice of appeal is filed, the application shall be deemed denied on the day after the expiration of the time to file the notice of appeal.

13. Any applicant wishing to appeal a decision of the Engineer or Designee pursuant to this Section must file a notice of appeal with the Board. Any such notice of appeal must be filed with the Board within 30 days of the Engineer's or Designee's decision. To be filed, a notice must be placed in the custody of the Board within the time fixed for filing. Filing may be accomplished by mail addressed to the Board, but filing shall not be timely unless the papers are actually received within the time fixed for filing. Immediately upon receipt by the Board, the notice of appeal shall be date stamped.

2-2-110. Notice and Hearing on Recommended Decision to Grant.

1. Any Person alleging that they will suffer adverse effect from the grant of an application for proposed Appropriation Right or Change in Use authorization may file an objection to a recommended decision to grant an application. To be valid, an objection must describe the alleged adverse effect on the objector's water right.

2. An objector or an applicant may elect to have any valid objection decided on the record or after hearing. If the objector elects to have a hearing, that request must be made at the same time as the filing of the objection or the objector's right to a hearing is waived. The applicant must invoke the right to a hearing within 10 days of receiving notice of the objection or the applicant's right to a hearing is waived.

3. Discovery prior to hearing will be as provided by the Engineer or Designee, and may commence following the receipt of a valid objection.

4. If, prior to the hearing, valid objections are withdrawn pursuant to an agreement between or among the applicant and objector(s) setting forth various conditions on the application, the Engineer or Designee shall grant the application subject to those conditions necessary to satisfy the criteria set forth in Section 2-2-102(1) of this Ordinance, but the Engineer or Designee has the discretion to accept or reject other conditions of the agreement between or among the applicant and objector(s).

5. The Engineer or Designee, after issuance of notice of hearing, may not communicate with any party to that case or any party's representative(s) in connection with any issue of fact or law in the case except upon notice and opportunity for all parties to participate.

6. The hearing shall be recorded electronically and an official record maintained.

7. All evidence that, in the opinion of the Engineer or Designee, possesses probative value shall be admitted, including hearsay, if it is the type of evidence commonly relied upon by reasonably prudent Persons in the conduct of their normal business affairs. Rules of privilege recognized by law shall be given effect. Evidence which is irrelevant, immaterial, or unduly repetitious shall be excluded.

8. The burden of proof is on the applicant to prove the applicable criteria of Section 2-2-102(1) of this Ordinance by a preponderance of evidence.

9. A written decision by the Engineer or Designee shall be rendered within 60 days of the hearing, disseminated to the parties, and posted by the Office of the Engineer on the Board's website within 10 days of its issuance. If the individual who conducted the hearing becomes unavailable to the Office of the Engineer, a decision may be prepared by an individual who has read the record only if the demeanor of witnesses is considered immaterial by all parties to the case. If any party considers the demeanor of any witness to be material to the resolution of the appeal, a new hearing must be held.

10. Any applicant or objector dissatisfied with the final decision of the Engineer or Designee may appeal to the Board (and become an appellant) and obtain review of the Engineer's or

Designee's decision. A notice of appeal to the Board must be filed with the Board within 30 days of the Engineer's or Designee's decision. To be filed, a notice must be placed in the custody of the Board within the time fixed for filing. Filing may be accomplished by mail addressed to the Board, but filing shall not be timely unless the papers are actually received within the time fixed for filing. Immediately upon receipt by the Board, the notice of appeal shall be date stamped.

2-2-111. Appeal to the Board.

1. Any question not raised before the Engineer or Designee may not be raised in the appeal to the Board unless it is shown to the satisfaction of the Board that there was good cause for failure to raise the question before the Engineer or Designee.

2. Appeal to the Board of decisions of the Engineer or Designee shall be confined to the record. If, before the date set for hearing the appeal, application is made to the Board for leave to present additional evidence and it is shown to the satisfaction of the Board that the additional evidence is material and that there were good reasons for failing to present it in the proceeding before the Engineer or Designee, the Board may order that the additional evidence be taken before the Engineer or Designee upon conditions determined by the Board, including the deadline for submission of additional evidence to the Engineer or Designee and for the conclusion of the Engineer's or Designee's review of any such additional evidence. The Engineer or Designee may modify the findings and decision by reason of the additional evidence or may affirm the prior decision and shall file a modified decision or notice of affirming the decision with the Board pursuant to a reasonable deadline set by the Board.

3. If the appellant requests an oral argument, the Board must hold oral argument on the appeal. If the appellant does not request an oral argument, the Board may, in its discretion, order oral argument or may resolve the appeal without one.

4. Review by the Board:

a. the review by the Board must be confined to the record. In cases of alleged irregularities in procedure before the Engineer or Designee not shown in the record, proof of the irregularities may be taken by the Board. The Board, upon request, shall hear oral argument and receive written briefs.

b. the Board may not substitute its judgment for that of the Engineer or Designee as to the weight of the evidence on questions of fact.

c. the Board may affirm the decision of the Engineer or Designee or remand the case for further proceedings.

d. the Board may reverse or modify the decision if substantial rights of an appellant have been prejudiced because:

i. the Engineer's or Designee's findings, inferences, conclusions, or decisions are:

(1) in violation of constitutional or statutory provisions;
(2) in excess of the authority of the Engineer or Designee;
(3) made upon unlawful procedure;
(4) affected by other error of law;
(5) clearly erroneous in view of the record as a whole;
(6) arbitrary or capricious or characterized by abuse of discretion or clearly unwarranted exercise of discretion; or

ii. findings of fact, upon issues essential to the decision, were not made although requested.

2-2-112. Appeal to Court of Competent Jurisdiction. Pursuant to Article IV.I.6 of the Compact, an aggrieved party may obtain review of a final decision of the Board by filing a petition for judicial review with a Court of Competent Jurisdiction within 30 days of the issuance of the final Board decision. In considering the petition, the Board's legal conclusions shall be reviewed for correctness and its factual findings for abuse of discretion. In the event that a court determines that it lacks subject matter or personal jurisdiction to rule on a petition for judicial review of a Board decision, the party filing the petition shall be entitled to petition for judicial review from any other Court of Competent Jurisdiction within thirty days from the date of a final court order finding lack of jurisdiction.

2-2-113. Completion.

1. Whenever an Appropriation Right or Change in Use authorization is issued under this Chapter, the Engineer or Designee shall specify in writing as part of the Appropriation Right or Change in Use authorization issued, or in any authorized extension of time provided pursuant

to subsection (2) of this Section, the time limits for commencement of the appropriation Works, completion of construction, and actual application of water to the proposed beneficial use. In fixing those time limits, the Engineer or Designee shall consider the cost and magnitude of the project, the engineering and physical features to be encountered, and, on projects designed for gradual development and gradually increased use of water, the time reasonably necessary for that gradual development and increased use. The Engineer or Designee shall issue the Appropriation Right or Change in Use authorization, or the authorized extension of time, subject to the terms, conditions, restrictions and limitations the Engineer or Designee considers necessary to ensure that work on the Appropriation is commenced, conducted, and completed and that the water is actually applied in a timely manner to the beneficial use specified in the Appropriation Right or Change in Use authorization.

2. The Engineer or Designee, for good cause shown, may extend the time limits specified in the Appropriation Right or Change in Use authorization for commencement of the appropriation Works, completion of construction, and actual application of water to the proposed beneficial use. If commencement of the appropriation Works, completion of construction, or actual application of water to the proposed beneficial use is not completed within the time limit set forth in the Appropriation Right or Change in Use authorization, or by any extension granted pursuant to this subsection, the Appropriation Right or Change in Use authorization is void upon lapse of the time limit.

3. Any owner of an Appropriation Right or Change in Use authorization who disagrees with the time limit specified by the Engineer or Designee pursuant to subsections (1) and (2) of this Section may appeal the Engineer's decision to the Board pursuant to Section 2-2-111 of this Ordinance. A notice of appeal must be filed with the Board within 30 days of the Engineer's or Designee's decision. To be filed, a notice must be placed in the custody of the Board within the time fixed for filing. Filing may be accomplished by mail addressed to the Board, but filing shall not be timely unless the papers are actually received within the time fixed for filing.

2-2-114. Compliance with Completion Deadline. Upon actual application of water to the proposed beneficial use within the time allowed by the Engineer or Designee pursuant to Section 2-2-113 of this Ordinance, the owner of the Appropriation Right or Change in Use authorization shall notify the Office of the Engineer that the Appropriation has been completed. The notification must contain a certified statement by an individual with experience in the design, construction, or operation of appropriation Works describing how the Appropriation was completed. The Office of the Engineer shall review the certified statement and may then inspect the Appropriation, and if it determines that the Appropriation has been completed in substantial accordance with the Appropriation Right or Change in Use authorization, it shall issue the owner of the Appropriation Right or Change in Use authorization a Flathead Reservation Appropriation Right Document. The original of the document shall be sent to the owner of the Appropriation Right or Change in Use authorization, and a duplicate shall be kept in the Office of the Engineer.

2-2-115 Redundant and Substitute Wells.

1. An Appropriator may change an Appropriation Right or Existing Use without first applying for a Change in Use authorization pursuant to Sections 2-2-101 et seq. of this Ordinance for the purpose of constructing a Substitute Well if:

a. the rate and volume of the appropriation from the Substitute Well are equal to or less than that of the Well being replaced;

b. the water from the Substitute Well is appropriated from the same Groundwater source as the water appropriated from the Well being replaced; and

c. a timely, correct and complete Notice of Substitute Well is submitted to the Engineer as provided in subsection 2 of this Section.

2. Review.

a. Within 60 days after a Substitute Well is completed and delivering water, the Appropriator shall file a Notice of Substitute Well with the Office of the Engineer on a form provided by the Board. Upon receipt of the Notice, the Office of the Engineer shall date stamp it.

b. The Engineer or Designee shall review the Notice of Substitute Well within 90 days of the date stamped on it pursuant to subsection (2)(a) of this Section, and shall issue a Change in Use authorization if all of the criteria identified in subsection (1) of this Section have been met and the Notice of Substitute Well is correct and complete.

c. The Engineer or Designee may not issue a Change in Use authorization until a correct and complete Notice of Substitute Well has been filed with the Office of the Engineer. The Office of the Engineer shall return to the Appropriator a Notice that is determined by Staff to be defective, along with a description of defects in the Notice. The Appropriator shall refile a corrected and completed Notice of Substitute Well within 30 days of notification of defects or within a further time as the Engineer or Designee may allow, not to exceed 180 days. If the Appropriator does not refile within that timeframe, the Appropriation Right will be deemed denied and the Appropriator must then comply with the provisions of subsection (d) of this Section.

d. If a Notice of Substitute Well is not completed within the time allowed, the Appropriator shall:

i. cease appropriation of water from the Substitute Well pending approval by the Engineer or Designee; and

ii. submit an application for a Change in Use authorization pursuant to Section 2-2-104 of this Ordinance; or

iii. comply with the well abandonment procedures, standards and rules adopted by the board of water well contractors pursuant to 37-43-202, MCA, or any successor procedures, standards and rules that are promulgated in State law.

3. Wells that have been determined to be abandoned pursuant to Sections 2-1-111 and 2-1-112 of this Ordinance are not eligible to be replaced by Substitute Wells under this Section.

4. For each well that is replaced under subsection (1) of this Section, the appropriator shall follow the well abandonment procedures, standards, and rules adopted by the board of water well contractors pursuant to 37-43-202, MCA, or any successor procedures, standards and rules that are promulgated in State law.

5. An Appropriator may change an Appropriation Right or Existing Use without first applying for a Change in Use authorization pursuant to Section 2-2-101, et seq. of this Ordinance for the purpose of constructing a Redundant Well in a Public Water Supply System if the Redundant Well:

a. withdraws water from the same Groundwater source as the original well; and

b. is required by a State, federal, or Tribal agency.

6. The priority date of the Redundant Well is the same as the priority date of the original well. Only one well may be used at one time.

7. Within 60 days of completion of a Redundant Well, the Appropriator shall file a Notice of Construction of Redundant Well with the Office of the Engineer on a form provided by the Board. The Engineer or Designee shall review and process the Notice pursuant to the procedures set forth in subsection (2) of this Section.

8. If a Notice of Construction of Redundant Well is not completed within the time allowed, the Appropriator shall:

a. cease appropriation of water from the Redundant Well pending approval by the Engineer or Designee; and

b. submit an application for a Change in Use authorization pursuant to Section 2-2-104 of this Ordinance; or

c. comply with the well abandonment procedures, standards and rules adopted by the board of water well contractors pursuant to 37-43-202, MCA, or any successor procedures, standards and rules that are promulgated in State law.

9. Any Appropriator aggrieved by a determination that a corrected Notice required by subsection (2) or (7) of this Section, as applicable, is defective may appeal that determination to the Board by filing a notice of appeal to the Board within 30 days of the rejection of the corrected Notice. To be filed, a notice must be placed in the custody of the Board within the time fixed for filing. Filing may be accomplished by mail addressed to the Board, but filing shall not be timely unless the papers are actually received within the time fixed for filing.

10. Any appeal to the Board filed pursuant to subsection (9) of this Section shall be conducted pursuant to the provisions of Section 3-1-104 of this Ordinance. If such an appeal is filed, the Engineer shall be the appellee.

2-2-116. Appropriation Rights for Stock Water Allowances.

1. Appropriation Rights for Stock Water Allowances include Stock Water Well Allowances, Stock Water Pit Allowances, and Stock Water Tank Served by Surface Water Allowances.

2. A Stock Water Well Allowance may be sourced from either Wells or Developed Springs.

3. A Stock Water Pit Allowance may be sourced from Groundwater seepage or a non-perennial stream.

4. A Stock Water Tank Served by Surface Water Allowance may be sourced from a perennial or non-perennial stream.

5. Before appropriating water for a Stock Water Well, approval from the Engineer is required. The Engineer may approve a Stock Water Well Allowance if:

a. the Well construction complies with the requirements of Section 1-1-111 of this Ordinance;

b. the maximum flow rate is 35 gallons per minute or less;

c. the maximum annual diverted volume is 2.4 acre-feet or less;

d. the means of diversion is a single Well or Developed Spring;

e. the well is not physically connected to a Home or Business;

f. the means of diversion includes Well Shaft Casing; and

g. Stock Water use associated with the Appropriation is dispensed using Stock Tanks.

6. Before appropriating water for a Stock Water Pit Allowance, approval from the Engineer is required. The Engineer can approve a Stock Water Pit allowance if:

a. the capacity of the Stock Water Pit is 5 acre feet or less;

b. the maximum annual appropriated volume is 10 acre feet or less;

c. the Stock Water Pit Allowance is sourced from Groundwater seepage, a non-perennial stream, or both, provided that a ditch or pipeline is not used;

d. the Stock Water Pit Allowance is constructed on and accessible to a parcel of land 40 acres or larger and owned or under control of the applicant; and

e. the construction of the means of diversion complies with Tribal Ordinance 87(A) (Aquatic Lands Conservation Ordinance).

7. Before appropriating water for a Stock Water Tank Served by Surface Water Allowance, approval from the Engineer is required. The Engineer can approve a Stock Water Tank Served by Surface Water Allowance if:

a. the maximum flow rate is 10 gallons per minute or less;

b. the combined maximum annual diverted volume is 2.4 acre-feet or less;

c. the means of conveyance is a fully contained pipe or hose. Open ditch conveyance is not allowed;

d. the construction of the means of diversion complies with Tribal Ordinance 87(A) (Aquatic Lands Conservation Ordinance); and

e. Stock Water associated with the appropriation is dispensed using one or more Stock Tanks.

8. An applicant must file a completed Application for a Stock Water Allowance with the Office of the Engineer and obtain approval from the Engineer before developing and appropriating water for Stock Water use pursuant to this Section. A complete application shall also include:

a. proof that the applicant has the possessory interest or the written consent of the Person(s) with possessory interest in the property where the point of diversion is located and where the water is to be put to beneficial use, and property rights in the diversion Works; and

b. a site-map that shows, in addition to the requirements of Section 1-1-110(12) of this Ordinance, the location of all proposed Stock Water Allowance development(s) including latitude and longitude in decimal degrees. The map must include the entire property boundaries where the Stock Water Allowance development is proposed, or a minimum radius of 500 feet from any proposed Stock Water Allowance development, whichever is greater, and include any of the following that are in existence or are proposed by the applicant:

i. well(s), Pits and Stock Tanks including purpose of each;

ii. buildings on the site, including identification of Well connections;

iii. property lines and ownerships; and

iv. means of conveyance, water right points of diversions, and surface water features.

9. Upon receipt of a completed application form complying with subsection (8) of this Section, the Office of the Engineer shall date stamp the application form.

10. The Engineer or Designee shall review the application within 30 days of the date stamped on the application pursuant to subsection (9) of this Section, and within that timeframe may either approve the application or return a defective application to the applicant with a written explanation of the defects. If a corrected application is submitted within 30 days of its return by the Office of the Engineer, no new filing fee shall be required. Upon receiving a corrected application, which shall be date stamped by the Office of the Engineer upon receipt, the Engineer or Designee has 30 days from the date stamped on the corrected application pursuant to this subsection (10) to approve or deny the application.

11. If the Engineer or Designee does not approve or return an application within 30 days of the date stamped on the application pursuant to subsection (9) of this Section, the application shall be deemed approved. If the Engineer or Designee does not approve or deny a corrected application within 30 days of the date stamped on the application pursuant to subsection (10) of this Section, the application shall be deemed approved.

12. Once an applicant meets the requirements of subsections (5) through (9) of this Section, as applicable, and an application is approved by the Engineer or Designee under subsection (10) or (11) of this Section, the Office of the Engineer shall issue an authorization to develop a Stock Water Allowance. The authorization to develop a Stock Water Allowance entitles an Appropriator to construct the authorized type of Stock Water Allowance within, but not to exceed, one year of the date of approval.

13. An Appropriation Right for a Stock Water Allowance becomes valid and final when, within 120 days of completing the diversion Works and putting the water to beneficial use, an Appropriator files a Stock Water Allowance completion form accurately and completely. The completion form for a Stock Water Well Allowance must include a copy of the companion Well Log Report(s), and must identify the as-built attributes of any Well, Pit or Stock Tank constructed. If the as-built attributes are less than or equal to the size of the Allowance for which the applicant originally applied, a Certificate of Stock Water Allowance shall be issued for the as-built attributes. No Certificate of Stock Water Allowance may be issued if the as-built system exceeds the volumes or flow rates set forth in subsections (5), (6) or (7) of this Section, as applicable.

14. If an Appropriation Right for a Stock Water Allowance is revoked by the Board pursuant to the provisions of Section 3-1-112(3) of this Ordinance, or is determined to be abandoned pursuant to the provisions of Sections 2-1-111 and 2-1-112 of this Ordinance, or is voluntarily abandoned, the Appropriator shall, within 180 days of the revocation or voluntary abandonment, fill in and rehabilitate any Pits, Pit-dams, Constructed Ponds, or Reservoirs associated with the revoked or abandoned Appropriation Right for a Stock Water Allowance, and shall, within 180 days of the revocation or voluntary abandonment, seal any tanks or supply lines associated with the revoked or abandoned Appropriation Right for a Stock Water Allowance.

2-2-117. Appropriation Rights for Domestic Allowances for Homes and Businesses; process for application, review, and issuance.

1. Appropriation Rights for Domestic Allowances include Individual Domestic Allowances, Shared Domestic Allowances and Development Domestic Allowances. An Individual Domestic Allowance may be used only to serve an individual Home or Business. A Shared Domestic Allowance may be used only to serve no less than two and no more than three Homes and/or Businesses. A Development Domestic Allowance may be used only to serve a Development.

2. A Domestic Allowance may be sourced from either Wells or Developed Springs.

3. A Domestic Allowance may not be used to fill or maintain Pits, Pit-Dams, Constructed Ponds, or Reservoirs.

4. Before appropriating water for Domestic Use for an Individual Domestic Allowance, approval from the Engineer is required. The Engineer may approve an Individual Domestic Allowance if:

a. the Well construction complies with the requirements of Section 1-1-111 of this Ordinance;

b. the maximum flow rate is 35 gallons per minute or less;

c. the maximum annual diverted volume is 2.4 acre-feet or less;

d. the means of diversion is a single Well or Developed Spring;

e. the Well is physically connected to and serves one and only one Home or Business;

f. the means of diversion includes Well Shaft Casing;

g. Stock Water use associated with the allowance is dispensed using Stock Tanks; and
h. the amount of land to be irrigated by the allowance is 0.7 acres or less.

5. Before appropriating water for a Shared Domestic Allowance, approval from the Engineer is required. The Engineer may approve a Shared Domestic Allowance if:
a. the Well construction complies with the requirements of Section 1-1-111 of this Ordinance;
b. the maximum flow rate is 35 gallons per minute or less;
c. the maximum annual diverted volume is 2.4 acre-feet or less;
d. the means of diversion is a single Well or Developed Spring;
e. the Well is physically connected to not less than two and not more than three Homes and/or Businesses that are not a Development;
f. the means of diversion includes Well Shaft Casing;
g. Stock Water use associated with the allowance is dispensed using Stock Tanks;
h. if the Well is connected to two homes and/or businesses, the amount of land to be irrigated with the allowances is 0.5 acres or less. If the well is connected to three Homes and/or Businesses, the amount of land to be irrigated by the allowance is 0.75 acres or less; and
i. the application includes a copy of the Shared Well Agreement signed by all parties.

6. Before appropriating water for a Development Domestic Allowance, approval from the Engineer is required. The Engineer may approve a Development Domestic Allowance if:
a. the Well construction complies with the requirements of Section 1-1-111 of this Ordinance;
b. the maximum flow rate from each Well or Developed Spring is 35 gallons per minute or less;
c. the combined maximum annual diverted volume from all wells and Developed Springs is 10 acre-feet or less;
d. Measurement devices approved by the Engineer and capable of recording cumulative volumes are installed on each Well or Developed Spring;
e. the means of diversion is one or more Wells and/or Developed Springs not to exceed one Well or Developed Spring per Home or Business within the Development;
f. the means of diversion includes Well Shaft Casing;
g. the allowance is physically connected to multiple Homes and/or Businesses that together constitute a Development;
h. Stock Water use associated with the allowance is dispensed using Stock Tanks;
i. the amount of land to be irrigated with the allowances is limited to 0.25 acres or less for each Home or Business within the Development;
j. the application includes a copy of any Shared Well Agreement(s) signed by all parties, if applicable;
k. the water supply requirements for all Homes and Businesses within the Development are satisfied by the allowance; and
l. the applicant includes a copy of the development plan, plat, or equivalent as required by the associated county government.

7. The owner(s) or operator(s) of a Development Domestic Allowance must submit a Development Domestic Allowance Water Measurement Report by March 31st of the year following the year covered by the report.

8. An applicant must file a completed Application for a Domestic Allowance and obtain approval from the Engineer before drilling any Well(s) or developing any spring(s) and putting water to use pursuant to this Section. A completed application shall also include:
a. proof that the applicant has a possessory interest or the written consent of the Person(s) with possessory interest in the property where the point of diversion is located and where the water is to be put to beneficial use, and property rights in the diversion Works; and
b. a site-map that shows, in addition to the requirements of Section 1-1-110(12) of this Ordinance, the location of all proposed Wells and Developed Springs including latitude and longitude in decimal degrees. The map must include the entire property boundaries where the Well associated with the Domestic Allowance is proposed, or a minimum of 500 feet in radius around the proposed Well(s) or Developed Spring(s), whichever is greater, and include any existing or proposed by the applicant:
i. Well(s) and Stock Tanks, including purpose of each well;
ii. sewage facilities including septic tanks and drainfields;

iii. buildings on the site, including identification of Well connections;
iv. property lines and ownerships;
v. irrigated acres per lot or unit Well(s); and
vi. means of conveyance, water right points of diversions, and surface water features.

9. Upon receipt of a completed application form complying with subsection (8) of this Section, the Office of the Engineer shall date stamp the application form.

10. The Engineer or Designee shall review the application within 30 days of the date stamped on the application pursuant to subsection (9) of this Section, and within that timeframe may either approve the application or return a defective application to the applicant, together with a written explanation of the defects. If a corrected application is submitted within 30 days of its return by the Office of the Engineer, no new filing fee shall be required. Upon receiving a corrected application, which shall be date stamped by the Office of the Engineer upon receipt, the Engineer or Designee has 30 days from the date stamped on the corrected application pursuant to this subsection (10) to approve or deny the application.

11. If the Engineer or Designee does not approve or return an application within 30 days of the date stamped on the application pursuant to subsection (9) of this Section, the application shall be deemed approved. If the Engineer or Designee does not approve or deny a corrected application within 30 days of the date stamped on it pursuant to subsection (10) of this Section, the application shall be deemed approved.

12. Once an applicant meets the requirements of subsections (4), (5), or (6) of this Section, as applicable, as well as the requirements of subsection (8) of this Section, and an application is approved by the Engineer or Designee under subsection (10) or (11) of this Section, the Office of the Engineer shall issue an authorization to develop a Domestic Allowance. The authorization to develop a Domestic Allowance entitles an Appropriator to construct the authorized type of Domestic Allowance within, but not to exceed, one year of the date of approval.

13. An Appropriation Right for a Domestic Allowance becomes valid and final when, within 120 days of completing the Well(s) or Developed Spring(s) and putting the water to beneficial use, an Appropriator files a Domestic Allowance completion form accurately and completely. The completion form must also include a copy of the companion Well Log Report(s), and must identify the as-build attributes of any Well or Stock Tank constructed. If the as-built attributes are less than or equal to the size of the allowance for which the applicant originally applied, a Certificate of Domestic Allowance shall be issued for the as-built attributes. No Certificate of Domestic Allowance may be issued if the as-built system exceeds the volumes or flow rates set forth in subsections (4), (5) or (6) of this Section, as applicable.

14. If an Appropriation Right for a Domestic Allowance is revoked by the Board pursuant to the provisions of Section 3-1-112(3) of this Ordinance, or is determined to be abandoned pursuant to the provisions of Sections 2-1-111 and 2-1-112 of this Ordinance, or is voluntarily abandoned, the Appropriator shall, within 180 days of the revocation or voluntary abandonment, follow the well abandonment procedures, standards, and rules adopted by the board of water well contractors pursuant to 37-43-202, MCA, or any successor procedures, standards and rules that are promulgated in State law, for any Well associated with the revoked or abandoned Appropriation Right for a Domestic Allowance.

2-2-118. Process for development of new uses from Flathead System Compact Water.

1. Subject to the terms and conditions of the Compact, the Tribal Council or its delegate, or any Person with the written consent of the Tribal Council or its delegate, may apply to utilize Flathead System Compact Water for any beneficial use within the Reservation by submitting a correct and complete application to the Office of the Engineer.

2. A correct and complete application for a use of Flathead System Compact Water shall contain the following information:
a. the name of the applicant;
b. a description of the proposed purpose of use;
c. the point of diversion;
d. the means of diversion;
e. the place of use;
f. the flow rate, volume diverted, and volume consumed;
g. the means of conveyance;

h. the period of use;

i. the duration or term of the proposed use;

j. a project plan, including a proposed completion period and, if applicable, a list of water rights to be used in conjunction with or to be replaced by the proposed use of Flathead System Compact Water for which the application is being filed;

k. a map depicting all the features described in this subsection (2); and

l. if the applicant is not the Tribal Council or its delegate, written authorization from the Tribal Council or its delegate to submit the application.

3. Upon receipt of a completed application for the use of Flathead System Compact Water, the Office of the Engineer shall date stamp it.

4. Staff shall analyze the application for the use of Flathead System Compact Water within 180 days of the date stamped on the application pursuant to subsection (3) of this Section using the tools and techniques identified in Section 2-2-107(2) of this Ordinance to determine compliance with the criteria identified in Section 2-2-102(2)(b) through (f) of this Ordinance.

5. All information relied upon by Staff in analyzing an application pursuant to this Section shall be documented in the application file.

6. Staff, using information from the application as well as their own compilation of independent resources and analysis, shall draft a recommended decision with findings of fact and conclusions of law determining whether the application satisfies the criteria set forth in Section 2-2-102(2)(b) through (f) of this Ordinance.

7. If the recommended decision is to grant the application, a summary of the application and the recommended decision shall be publicly noticed by the Office of the Engineer once via legal notice in a newspaper of general circulation on the Reservation and shall be posted on the Board's website for a period of 45 days from the date the recommended decision is issued, during which time objections may be filed with the Engineer. If no objections are filed, or if all filed objections are withdrawn prior to being ruled upon, the application shall be granted by the Engineer within 10 days after expiration of the time for filing objections, or after the unconditional withdrawal of the last objection, whichever date is later.

8. If the recommended decision is to deny the application, the applicant may appeal the recommended decision to the Engineer pursuant to the provisions of Section 2-2-109 of this Ordinance.

9. If the recommended decision is to grant the application with conditions, the application shall be noticed to the public pursuant to the provisions of subsection (7) of this Section unless the applicant withdraws the application within 30 days of the issuance of the recommended decision or appeals the recommended decision to the Engineer pursuant to the provisions of Section 2-2-109 of this Ordinance. The application filing fee shall not be refunded upon withdrawal.

10. To be valid for processing, an objection to an application for the use of Flathead System Compact Water must assert and describe how the proposed development of Flathead System Compact Water fails to comply with one or more of the criteria set forth in Section 2-2-102(2)(b) through (f) of this Ordinance. Any such valid objection shall be resolved pursuant to the procedures set forth in Sections 2-2-110 through 2-2-112 of this Ordinance, provided however, that the burden of proof in the hearing before the Engineer or Designee shall be on the objector to prove by a preponderance of the evidence that the application fails to comply with one or more of the criteria set forth in Section 2-2-102(2)(b) through (f) of this Ordinance.

11. Unless an objection to the application is sustained, the application shall be granted within 10 days of expiration of the time to appeal the decision relating to any objection or after the exhaustion of the objector's last appeal, whichever date is later.

12. The priority date of any use of Flathead System Compact Water is the date of the Tribes' Flathead System Compact Water right as set forth in Article III.C.1.c of the Compact.

2-2-119. Appropriation Rights for Non-consumptive Geothermal Heating or Cooling Exchange Wells.

1. Appropriation Rights may be issued for non-consumptive geothermal heating or cooling exchange Wells with a maximum appropriation of 350 gallons a minute or less if all of the water extracted is returned without delay to the same source aquifer, if the distance between the extraction well and both the nearest existing well and any hydraulically connected surface

waters is more than twice the distance between the extraction well and the Injection Well, and if all Well construction complies with the requirements of Section 1-1-111 of this Ordinance. Before appropriating water for a use described in this subsection (1), approval of the Engineer is required.

2. An applicant must file a completed application form and obtain approval from the Engineer before drilling any Well(s) or developing any spring(s) and putting water to use pursuant to this Section. A completed application shall also include:

a. proof that the applicant has the possessory interest or the written consent of the Person(s) with possessory interest in the property where the point of diversion is located and where the water is to be put to beneficial use, and property rights in the diversion Works; and

b. a site-map showing the location of all proposed wells including latitude and longitude in decimal degrees. The map must also include the entire property boundaries where the Wells are proposed, or a minimum of 500 feet in radius around the proposed Well(s) or spring(s), whichever is greater, and include any of the following that exist or are proposed by the applicant:

i. well(s) including purpose of each well;

ii. sewage facilities including septic tanks and drainfields;

iii. buildings on the site, including identification of Well connections;

iv. property lines and ownerships;

v. irrigated acres per lot or unit well(s); and

vi. means of conveyance, water right points of diversions, and surface water features.

3. Upon receipt of a completed application form complying with subsection (2) of this Section, the Office of the Engineer shall date stamp the application form.

4. The Engineer or Designee shall review the application within 45 days of the date stamped on the application pursuant to subsection (3) of this Section, and within that timeframe may either approve the application or return a defective application to the applicant, together with a written explanation of the defects. If a corrected application is submitted within 30 days of its return by the Office of the Engineer, no new filing fee shall be required. Upon receiving a corrected application, which shall be date stamped by the Office of the Engineer upon receipt, the Engineer or Designee has 30 days from the date stamped on the corrected application pursuant to this subsection (4) to approve or deny the application.

5. If the Engineer or Designee does not approve or return an application within 45 days of the date stamped on the application pursuant to subsection (3) of this Section, the application shall be deemed approved. If the Engineer or Designee does not approve or deny a corrected application within 30 days of the date stamped on this application pursuant to subsection (4) of this Section, the application shall be deemed approved.

6. Once an applicant meets the requirements of subsection (1) of this Section and the application is approved pursuant to subsection (4) or (5) of this Section, as applicable, the Engineer shall issue an authorization to develop the Appropriation Right for a Heating/Cooling Exchange Well.

7. An Appropriation Right for a Heating/Cooling Exchange Well becomes valid and final when, within 120 days of completing the Well(s) or Developed Spring(s) and putting the water to beneficial use, an Appropriator files a Heating/Cooling Exchange completion form accurately and completely. The completion form must also include a copy of the companion Well Log Report(s) for the extraction Well and the Injection Well.

8. If an Appropriation Right for a Heating/Cooling Exchange Well is revoked by the Board pursuant to the provisions of Section 3-1-112(3) of this Ordinance, or is determined to be abandoned pursuant to the provisions of Sections 2-1-111 and 2-1-112 of this Ordinance, or is voluntarily abandoned, the Appropriator shall, within 180 days of the revocation or voluntary abandonment, follow the well abandonment procedures, standards, and rules adopted by the board of water well contractors pursuant to 37-43-202, MCA, or any successor procedures, standards and rules that are promulgated in State law, for any Well associated with the revoked or abandoned Appropriation Right for a Heating/Cooling Exchange Well.

2-2-120. Temporary Emergency Appropriations.

1. A Temporary Emergency Appropriation may be made without prior approval from the Board, but the use must cease immediately when the water is no longer required to meet the emergency.

2. A Temporary Emergency Appropriation does not include the use of water for the ordinary operation and maintenance of any trade or business, including but not limited to agricultural production.

3. Within 60 days after the cessation of a Temporary Emergency Appropriation, the Appropriator shall notify the Board of the use to which the water was put, the dates of use, and the estimated amount of water used.

4. Except as set forth in subsection (5) of this Section, a Temporary Emergency Appropriation may not include the use of Enclosed Storage.

5. When the Temporary Emergency Appropriation is made by a local governmental fire agency organized under Title 7, chapter 33, MCA, or applicable Tribal law, and the Temporary Emergency Appropriation is used only for emergency fire protection, the Temporary Emergency Appropriation may include enclosed storage.

2-2-121. Short-term use of a portion of the Tribal Water Right for road construction or dust abatement. The Tribes, or a Person with the written consent of the Tribes, may use a portion of the Tribal Water Right for road construction or dust abatement purposes, without the prior approval of the Board, subject to the following provisions:

1. For uses of 20,000 gallons or less per day from a single source of supply, no notice is required;

2. For uses greater than 20,000 gallons per day and less than 60,000 gallons per day from a single source of supply, a notice must be posted at the site of the diversion or withdrawal for the entire period during which water is being diverted or withdrawn. The notice posted shall be clearly legible and visible and provide the following information:

a. source of water;
b. purpose of use;
c. starting and ending date of diversion;
d. place of use;
e. diversion flow rate;
f. maximum volume of water to be diverted or withdrawn per day; and
g. name and contact information for the user of the water and for the Board.

3. For uses greater than 60,000 gallons per day from a single source of supply, the Board must be notified at least 10 days but not more than 45 days in advance of the initial use of the water. Notice must be posted at the site of the diversion or withdrawal, as provided in subsection (2) of this Section. Notification to the Board must provide the following information:

a. source of water;
b. legal description of the point of diversion or withdrawal;
c. place of use;
d. map showing preceding three items;
e. purpose of use;
f. starting and ending date of use;
g. diversion flow rate;
h. maximum volume of water to be diverted or withdrawn per day; and
i. name and contact information for the user.

4. The diversion or withdrawal of water pursuant to this Section shall not adversely affect any legal use of water in existence as of the date of the diversion or withdrawal; and

5. If notified that the diversion or withdrawal of water pursuant to this Section is adversely affecting any legal use of water in existence as of the date of the diversion or withdrawal, the user will immediately cease diversion or withdrawal from that source of supply. To resume the diversion or withdrawal, the user may move the diversion or withdrawal to another source of supply, or may satisfy the Board and the holder(s) of the affected legal use(s) of water in existence as of the date of the diversion or withdrawal that use will not cause adverse effects.

2-2-122. Short-term use of an appropriation right that is not part of the Tribal Water Right for road construction or dust abatement.

1. An Appropriator may lease, for a term not to exceed 90 days, all or part of an Appropriation Right or Existing Use that is not part of the Tribal Water Right for road construction or dust abatement without the prior approval of the Board, subject to the requirements of this Section. The lease agreement must include the following information:

a. the name and address of the lessee;

b. the name of the owner of the Appropriation Right or Existing Use;

c. the number of the Appropriation Right or Existing Use;

d. the purpose of use of water for which the lease is being made;

e. the source of water to be appropriated;

f. the starting and ending date of the proposed use of water;

g. the proposed point of diversion;

h. the proposed place of use;

i. the diversion flow rate and volume of water to be used during the period of use; and

j. a description of how the prior use of water will be reduced to accommodate the temporary change of use of the Appropriation Right or Existing Use, including the number and location of acres to be removed from irrigation, if applicable.

2. A short-term lease of an Appropriation Right or Existing Use under this Section may not exceed 60,000 gallons a day or the amount of the Appropriation Right or Existing Use, whichever is less. Any combination of short-term leases cannot exceed 120,000 gallons a day for one project.

3. Except as provided in subsection (7) of this Section, the following information must be submitted to the Board at least 2 days prior to the use of water by a lessee under this Section:

a. a copy of the Publication notice or copies of the individual notice required under subsection (4) of this Section;

b. a copy of the lease agreement; and

c. for a combination of short-term leases greater than 60,000 gallons a day for one project, an analysis by the lessee of any potential adverse effects and a description of planned actions to mitigate any potential adverse effects to Appropriators in the area of the proposed point of diversion.

4. Except as provided in subsection (7) of this Section, the lessee of an Appropriation Right or Existing Use under this section shall, 30 days prior to the use of the water, publish a notice of the proposed use of water once in a newspaper of general circulation in the area of the diversion or mail individual notice to potentially affected Appropriators in the area of the proposed point of diversion. The published notice or the individual notice must contain the information listed in subsections (1)(a) through (1)(j) and (3)(c) of this Section.

5. Complaints regarding temporary use

a. an Appropriator, whether the water right is prior or subsequent in priority to the short-term lease acquired by a Person under this Section, who cannot satisfy in full the Appropriator's right during the time that the short-term lessee is diverting water, may make a complaint to the Engineer pursuant to Section 3-1-102 of this Ordinance and cause the short-term lessee's diversion to be discontinued.

b. the diversion is discontinued until the complaining Appropriator's water right is satisfied or until the lessee establishes to the Engineer that the discontinuance has had no effect on the complaining Appropriator's water right. Upon establishment that discontinuance has not had an effect, the Engineer shall enter an order allowing the diversion to continue.

6. This Section does not limit the remedies available to an Appropriator to enjoin or to seek damages from a Person appropriating water under this Section.

7. a. a consolidated city-county or a county or an incorporated city or town is not subject to the requirements of subsections (3)(a) and (4) of this Section when conducting dust abatement that was not scheduled or contracted for 30 days or more prior to the use of the water.

b. a consolidated city-county or a county or an incorporated city or town that does not publish notice as provided in subsection (4) of this Section shall post a copy of the lease agreement at the point of diversion at least 24 hours prior to and during the time that water is diverted.

2-2-123. Wetland Protective Appropriation Rights.

1. Pursuant to the provisions of Sections 2-2-101 et seq. of this Ordinance, a Wetland Protective Appropriation Right for a Natural Wetland or Restored Natural Wetland may be issued, subject to the following limitations:

a. except as authorized by Appropriation Rights issued pursuant to Section 1-1-107(1)(k) of this Ordinance, irrigation return flows may not be used as a source for an Appropriation Right issued pursuant to this Section.

b. No Wetland Protective Appropriation Right shall be issued for any Wetland using Pits, Pit-dams, or Constructed Ponds.

c. No Wetland Protective Appropriation Right shall be issued for any Wetland occurring solely as a result of seepage from irrigation reservoirs, canals, laterals or ditches.

d. No Wetland Protective Appropriation Right shall be used for any other purpose and shall not be changed to another purpose.

2. Wetlands eligible for Wetlands Protective Appropriation Rights are:

a. Those Wetlands identified on the map of Wetlands eligible for Wetlands Protective Appropriations Rights (available from the Office of the Engineer); or

b. Those Wetlands not identified on the Map if:

i. the proposed use is a Restored Natural Wetland;

ii. the applicant provides a site-specific Wetlands delineation, using any delineation method approved by the Engineer, that includes:

(1) the total number of acres and a detailed map showing the proposed boundary of the Wetland for which the Wetland Protective Appropriation Right is being applied; and

(2) an identification of the Wetlands delineation method used, along with supporting field data.

2-2-124. Wetland Quantified Appropriation Rights.

1. Pursuant to the provisions of Sections 2-2-101 et seq. of this Ordinance, an Appropriations Right or Change in Use authorization to divert, impound, or withdraw surface water or Groundwater for a Wetland purpose may be issued.

2. All Wetlands that utilize man-made diversions, impoundments, withdrawals, excavations, or other artificial means for the purposes of Appropriation for either all or a portion of a Wetland water supply in excess of a Natural Wetland water supply or Restored Natural Wetland water supply shall obtain, in advance of Appropriation, an Appropriation Right or Change in Use authorization for that Wetland purpose.

3. In addition to the information required by Sections 1-1-110 and 2-2-104 of this Ordinance, an application for an Appropriation Right or Change in Use authorization pursuant to this section shall include the following information:

a. A delineation of pre-project existing Wetlands and post-project Wetlands using a Wetland delineation method approved by the Engineer. The delineation shall describe the following pre-project and post-project Wetland attributes:

i. the outer Wetland boundary and area in acres;

ii. the boundaries of permanently inundated areas, depth in feet, and area in acres;

iii. the boundaries of seasonally inundated areas, period of inundation, depth in feet, and area in acres;

iv. the boundaries of permanently saturated areas and area in acres;

v. the boundaries of seasonally saturated areas, period of saturation, and area in acres; and

vi. Wetland vegetation boundaries and area in acres.

b. The location and description of the manmade diversions, impoundments; withdrawals, excavations, or other artificial means for the purposes of Appropriation;

c. The flow rate and volume of water to be appropriated in monthly time steps; however, the Office of the Engineer may require a more frequent quantification time step;

d. The consumptive volume for each Wetland attribute delineated pursuant to Section 2-2-124(a) of this Ordinance in monthly time steps; however, the Office of the Engineer may require a more frequent quantification time step;

e. non-consumed water, including flow rate and volume estimates, and a description of return flows and their eventual destination and timing; and

f. the volume of Natural Wetland water supply, if applicable, in monthly time steps.

2-2-125. Notice of Trust Status Conversion for Lands with Appurtenant Water Rights Arising Under State Law Acquired by the Tribes. As provided for by the Compact, Article III.H, the following process shall be used to notify the Water Management Board of the transfer of Tribally-owned fee land to trust status:

1. Starting upon the Effective Date of the Compact, the Tribes may file a Trust Transfer form with the Board for any lands acquired by the Tribes with appurtenant Water Rights Arising Under State Law that have been taken into trust by the United States on behalf of the Tribes.

2. A copy of the deed transferring the fee land to trust status shall be attached to the form.

2-2-126. Water Management Board Adjustment of Priority Date Pursuant to Compact. Upon submission of a Trust Transfer form by the Tribes, the priority date of any Water Rights Arising Under State Law appurtenant to land identified on the Trust Transfer form shall be adjusted by the Water Management Board to July 16, 1855. The Board shall cause the adjusted priority date to be entered into the Reservation water rights database identified in Section 1-1-108 of this Ordinance.

2-2-127. Tribal Utilization of Water Right with Adjusted Priority Date. Any water right whose priority date is adjusted pursuant to Section 2-2-126 of this Ordinance shall be subject to the following use conditions:

1. The water right must be used as historically used; or

2. Changes to the water right must be made pursuant to the provisions set for the in Article IV.B.4 of the Compact and Section 2-2-101 et seq. of this Law of Administration.

2-2-128. Public Water Supply Reporting Requirements

1. The following shall comply with the reporting requirements set forth in subsection (2) of this Section:

a. any new Public Water Supply System approved pursuant to this Ordinance;

b. any Public Water Supply System in existence prior to the effective date of this Ordinance whose authorized use is expanded pursuant to this Ordinance.

2. On an annual basis, any entity responsible for the operation of a Public Water Supply System identified in subsection (1) of this Section shall report to the Office of the Engineer the total volume by month of pumping or diversion of the Public Water Supply System.

CHAPTER III
ENFORCEMENT

3-1-101. Scope

1. The enforcement powers set forth in this Chapter apply to the resolution of disputes between Appropriators who are not served by the Flathead Indian Irrigation Project, or between any Appropriators who are not served by the FIIP and any water user(s) or holders of Existing Rights, if any, whose use of water is served by the FIIP. Disputes exclusively between or among users whose water is delivered by the FIIP shall remain subject to the oversight of the Project Operator and the Enforcement provisions of this Ordinance shall not apply. The powers and duties set forth in this Chapter, as they extend to uses of the Tribal Water Right within the FIIP, extend only to the resolution of disputes concerning the delivery of water to FIIP diversion facilities and shall not extend to the administration of that water in FIIP facilities or on lands served by the FIIP, which shall remain subject to the oversight of the Project Operator.

2. Nothing in this Chapter, or in the Ordinance, is intended to preclude a water user from working informally with other water users, any Water Commissioner appointed pursuant to Section 3-1-114 of this Ordinance, or the Engineer, to resolve disputes or real-time water operation issues without recourse to the provisions of this Chapter. A synopsis of all such resolutions between a water user and any Water Commissioner or the Engineer shall be reduced to writing, and dated, a copy of which shall be kept in the Office of the Engineer and available for public inspection. A synopsis of any such resolution between or among water users may be reduced to writing. Provided, however, that any water user not party to any such informal resolution who believes himself or herself to be injured by the informal resolution may seek redress by invoking the provisions of this Chapter, subject to the limitation concerning FIIP water use set forth in subsection (1) of this Section, to challenge the informal resolution.

3. Any of the timeframes set forth in Sections 3-1-102 through 3-1-107 of this Ordinance may be extended upon mutual agreement of the parties to any dispute.

3-1-102. Complaint to the Engineer Regarding Actions or Inactions Between Appropriators.

1. Subject to the limitation concerning FIIP water use set forth in Section 3-1-101(1) of this Ordinance, any Appropriator aggrieved by the action or inaction of any other Appropriator, or by any Person the Complainant believes is Wasting water to the detriment of a right to use water the Complainant possesses, may file a Complaint with the Engineer. Such Complaint must be submitted in writing and describe specifically the action or inaction being complained of and the justification for the Complaint.

2. Upon receipt of a Complaint, the Office of the Engineer shall date stamp it and return a copy to the Complainant along with a written statement indicating that informal resolution of the dispute between the Appropriators, or between an Appropriator and a Person accused of Wasting water, may provide a more timely and cost-effective remedy than having the Complaint adjudicated by the Engineer.

3. Within 3 days of the receipt of the Complaint, the Office of the Engineer shall serve a copy of it on the Appropriator or other Person whose action or inaction is being complained of (the "Respondent"), and shall post notice of the Complaint on the Board's website. The notice to the Respondent shall include a written statement indicating that informal resolution of the dispute between the Complainant and the Respondent may provide a more timely and cost-effective remedy than having the petition adjudicated by the Engineer.

3-1-103. Resolution of Complaint.

1. No later than 15 days after the provision of notice of the Complaint to the Respondent, pursuant to Section 3-1-102(3) of this Ordinance, the Engineer or Designee shall hold a hearing on the Complaint, provided, however that the Engineer or Designee may take an additional 10 days before holding the hearing to perform such independent investigation into the Complaint as the Engineer or Designee deems appropriate. At such time, both the Complainant and the Respondent shall explain their positions concerning the matter complained of. All evidence that, in the opinion of the Engineer or Designee, possesses probative value shall be admitted, including hearsay, if it is the type of evidence commonly relied upon by reasonably prudent Persons in the conduct of their normal business affairs. Rules of privilege recognized by law shall be given effect. Evidence which is irrelevant, immaterial, or unduly repetitious shall be excluded.

2. A decision by the Engineer or Designee on the Complaint shall be made in writing within 7 days after the completion of the hearing.

3. The decision of the Engineer or Designee may include an award of declaratory relief, and/or the imposition of conditions on the use or exercise of a water right. Such conditions may include, but are not limited to, instructions regarding the proper delivery of water, the installation of measuring devices, the construction of suitable ditches to carry the return waters from any ditch or lands to the main stream or proper waste way, or the mandate of structural changes to diversion structures.

4. Any Complainant or Respondent dissatisfied with the final decision of the Engineer or Designee may appeal to the Board (and become an Appellant) and obtain review of the Engineer's or Designee's decision. A notice of appeal to the Board must be received by the Board within 30 days of the issuance of the Engineer's or Designee's written decision. The decision of the Engineer or Designee shall not be stayed during the pendency of the appeal unless the Board expressly orders such a stay upon motion of the Complainant or Respondent.

3-1-104. Appeal to the Board.

1. Upon receipt of a notice of appeal pursuant to Section 3-1-103(4) of this Ordinance, or any other Section of this Ordinance that provides for appeal to the Board pursuant to the provisions of this Section, the Board, acting through the Office of the Engineer, shall date stamp the notice and return a copy to the Appellant. Within three days of receipt of the notice of appeal, the Board, acting through the Office of the Engineer, shall serve a copy of the notice of appeal on the other party to the dispute (who becomes the Appellee).

2. Either party to the appeal may elect to have oral argument prior to the resolution of the appeal. The Appellant must request oral argument at the time of the filing of the notice of appeal or the Appellant's right to oral argument is waived. The Appellee must request oral argument within 10 days of the Appellee's receipt of the notice of appeal pursuant to subsection (1) of this Section, or the Appellee's right to oral argument is waived. If either party to the appeal requests oral argument, such argument must be held within 60 days of the filing of the notice of appeal, or within 30 days of the receipt of evidence or argument pursuant to subsection (3) or (4) of this Section, whichever date is later.

3. Within 60 days from the filing of the notice of appeal, or any extended period of time, not to exceed 60 days, granted by the Board, the Appellant and Appellee may each submit additional factual evidence and legal argument concerning the appeal to the Board and shall serve copies of the same on the other party to the dispute.

4. Either party to the appeal shall have 60 days from the date of receipt of the evidence or argument served pursuant to subsection (3) of this Section, or any extended period of time granted by the Board, not to exceed 60 days, to respond in writing to the evidence and argument submitted by the other party to the dispute pursuant to subsection (3) of this Section.

5. If oral argument is held, the argument shall be recorded electronically and an official record maintained.

6. A decision by the Board on the appeal shall be made in writing within 60 days after the completion of oral argument or, if the right to oral argument is waived, within 60 days after the deadline for the submission of evidence and argument pursuant to subsections (3) and (4) of this Section, whichever is later. The written decision shall set forth the ruling of the Board along with a statement of the reasons therefor.

7. In ruling on the appeal, the Board may sustain the decision of the Engineer or Designee, may overturn that decision and set aside any relief ordered by the Engineer or Designee, or may remand the matter to the Engineer or Designee for such further proceedings as may be specified in the Board's written decision.

3-1-105. Petition to the Engineer by Any Appropriator Aggrieved by Actions or Inactions of a Water Commissioner.

1. Any Appropriator aggrieved by the action or inaction or written directive from any Water Commissioner appointed pursuant to Section 3-1-114 of this Ordinance, may petition the Engineer for relief (and become a Petitioner). Such petition must be submitted in writing and describe with particularity the action, inaction or directive giving rise to the petition and the justification for the petition.

2. Upon receipt of a petition, the Office of the Engineer shall date stamp it and return a copy to the Petitioner along with a written statement indicating that informal resolution of the dispute between the Petitioner and the Water Commissioner may provide a more timely and cost-effective remedy than having the petition adjudicated by the Engineer.

3. Within 3 days of the date stamped on the petition pursuant to subsection (2) of this Section, the Office of the Engineer shall serve a copy of it on the Water Commissioner whose action, inaction or written directive is being petitioned against, and shall post notice of the Petition on the Board's website.

3-1-106. Resolution of Petition.

1. A Petitioner may elect to have the Petition decided on the record after submission of additional evidence and argument, or after hearing. If a Petitioner elects to have a hearing, that request must be made at the same time as the filing of the Petition or the right to a hearing is waived.

2. The Water Commissioner may elect to have the Petition decided after a hearing. The request for a hearing must be made within 5 days of the Water Commissioner's receipt of notice of the Petition pursuant to Section 3-1-105(3) of this Ordinance or the Water Commissioner's right to a hearing is waived.

3. If either the Petitioner or the Water Commissioner elects to have the Petition resolved after a hearing, the Engineer or Designee shall hold a hearing on the Petition no later than 14 days after the filing of the Petition, or within 14 days of the expiration of the time for the submission of evidence or argument pursuant to subsection (5) of this Section, whichever date is later; provided, however that the Engineer or Designee may take an additional 10 days before holding the hearing to perform such independent investigation into the petition as the Engineer or Designee deems appropriate.

4. Within 5 days from the filing of the Petition, or any extended period of time, not to exceed 5 days, granted by the Engineer, the Petitioner and Commissioner may each submit additional factual evidence and legal argument concerning the Petition to the Engineer or Designee and shall serve copies of the same on the other party to the dispute.

5. Either party to the dispute shall have 5 days from the date of receipt of the evidence or argument served pursuant to subsection (4) of this Section, or any extended period of time granted by the Engineer or Designee, not to exceed 5 days, to respond in writing to the evidence and argument submitted by the other party to the dispute pursuant to subsection (4) of this Section.

6. The Petitioner shall bear the burden of proof before the Engineer or Designee.

7. The hearing shall be recorded electronically and an official record maintained. All evidence that, in the opinion of the Engineer or Designee, possesses probative value shall be admitted, including hearsay, if it is the type of evidence commonly relied upon by reasonably prudent Persons in the conduct of their normal business affairs. Rules of privilege recognized by law shall be given effect. Evidence which is irrelevant, immaterial, or unduly repetitious shall be excluded.

8. A decision by the Engineer or Designee on the Petition shall be made in writing within 7 days after the completion of the hearing or, if the right to a hearing is waived, within 7 days after the deadline for the submission of evidence and argument pursuant to subsections (4) and (5) of this Section, whichever is later. If the individual who conducted the hearing becomes unavailable to the Office of the Engineer, a decision may be prepared by an individual who has read the record only if the demeanor of witnesses is considered immaterial by all parties; if any party considers the demeanor of any witness to be material to the resolution of the petition, a new hearing must be held.

9. The decision of the Engineer or Designee may include an award of declaratory relief, and/or the imposition of conditions on the use or exercise of an Appropriation Right or Existing Use. Such conditions may include, but are not limited to, the installation of measuring devices, the construction of suitable ditches to carry the return waters from any ditch or lands to the main stream or proper waste way, or the mandate of structural changes to diversion structures.

10. Any Petitioner or Commissioner dissatisfied with the final decision of the Engineer or Designee may appeal to the Board (and become an Appellant) and obtain review of the Engineer's or Designee's decision. A notice of appeal to the Board must be received by the Board within 30 days of the issuance of the Engineer's or Designee's written decision.

3-1-107. Appeal to the Board from a Decision on a Petition. The process for appeal to the Board of the Engineer's or Designee's decision on a Petition shall be as set forth in Section 3-1-104 of this Ordinance.

3-1-108. Appeal from a Decision of the Board. The process for appeal from a decision of the Board issued pursuant to Section 3-1-104 of this Ordinance shall be as set forth in Section 2-2-112 of this Ordinance.

3-1-109. Emergency Enforcement Powers of the Engineer. In an Emergency, the Engineer, or any Staff who is so directed by the Engineer, or any Water Commissioner appointed pursuant to Section 3-1-114 of this Ordinance, shall have the authority to lock, remove, render inoperative, shut down, close, seal, cap, modify, or otherwise control methods of diversions and withdrawals, and obstructions to the flow of water, subject to expedited appeal to the Board by the affected Person, as provided in Section 3-1-110 of this Ordinance.

3-1-110. Additional Enforcement Powers of the Engineer.

1. The Engineer, or any Staff who is so directed by the Engineer, or any Water Commissioner appointed pursuant to Section 3-1-114 of this Ordinance, may enter upon lands on the Reservation with reasonable notice to the owner or occupant, to investigate and inspect methods of diversion, withdrawal, and other activities affecting water quantity, to install measuring devices at the expense of the water user on surface and Groundwater diversions for the purpose of enforcing and administering this Ordinance, to monitor water use, water quality, and diversion structures.

2. The Engineer, or any Staff who is so directed by the Engineer, or any Water Commissioner appointed pursuant to Section 3-1-114 of this Ordinance, may take action to prevent the Illegal use of water, including, but not limited to the temporary decommissioning of head gates or other diversion Works.

3. The Engineer may issue written notices of violation to Appropriators and to Illegal users of water for violations of this Ordinance or of the terms and conditions of any Appropriation Right or Existing Use or of any lawful order of the Engineer or the Board or any action or directive of any Water Commissioner appointed pursuant to Section 3-1-114 of this Ordinance.

4. Any notice issued pursuant to subsection (3) of this Section shall specify the particular violation or violations, the step(s) to be taken to come into compliance, and identify a reasonable time frame within which such steps are to be taken.

5. In the event of non-compliance with any written notice issued pursuant to subsection (3) of this Section within the specified time frame, the Engineer may move the Board to exercise its powers pursuant to Sections 3-1-112 and 3-1-113 of this Ordinance.

6. Upon receipt of any written recommendation, pursuant to Section 3-1-115(3) of this Ordinance, from any Water Commissioner, the Engineer or Designee may reject the recommendation or may issue notice of intent to hold a hearing to determine whether the imposition of such conditions identified in the recommendation is warranted. The process for the consideration and resolution of any such matter shall be as set forth in Sections 3-1-105 through 3-1-108 of this Ordinance, with the recommendation being treated as a petition, the Water Commissioner as the Petitioner and the affected water user(s) as Respondent(s).

3-1-111. Expedited Appeal to the Board in the Event of Certain Actions by the Engineer.

1. Any Appropriator whose use of water is affected by an action taken pursuant to Section 3-1-109 or 3-1-110(2) of this Ordinance may file a written notice of appeal with the Board (and become an Appellant). The notice of appeal must describe with particularity the action being appealed and the justification for the appeal.

2. The Board must immediately notify the Engineer of the filing of a notice of appeal pursuant to subsection (1) of this Section, and must hear the appeal within 10 days of the notice of appeal being filed.

3. If the Board finds in favor of the Appellant, it may award appropriate relief, including declaratory relief, but not monetary penalties against the Office of the Engineer or any employee thereof, including any Water Commissioner appointed pursuant to Section 3-1-114 of this Ordinance, acting in either their professional or personal capacities.

3-1-112. Additional Enforcement Powers of the Board. Upon motion by the Engineer, and after notice to any affected Appropriator and the opportunity for all parties to be heard, the Board may:

1. Impose fines, as set forth in Section 3-1-113 of this Ordinance.

2. Impose conditions on the future use of any Appropriation Right to prevent further violation, but only upon a finding that the holder of any such Appropriation Right is violating or has violated any provision of that Appropriation Right, or is violating or has violated any order issued by the Engineer or any directive of any Water Commissioner appointed pursuant to Section 3-1-114 of this Ordinance concerning the use of that permit. The process for appeal from any Board decision imposing conditions pursuant to this Section shall be as set forth in Section 2-2-112 of this Ordinance.

3. Revoke or suspend any Appropriation Right, but only upon a finding that the holder of any such Appropriation Right is willfully violating or has willfully violated any provision of that Appropriation Right, or is willfully violating or has willfully violated any order issued by the Engineer concerning the use of that Appropriation Right. The process for appeal from any Board decision revoking or suspending a permit shall be as set forth in Section 2-2-112 of this Ordinance.

3-1-113. Fines.

1. The Board, pursuant to the provisions of this Section, may impose a fine not to exceed $1,000 per violation on any Person who fails to comply with the provisions of this Ordinance, including any written order of the Board or Engineer or written directive of any Water Commissioner.

2. If a Person is using water under the color of law, fines may only be imposed commencing on the day after the resolution of any appeal from the written order of the Board or Engineer or action or written directive of any Water Commissioner whose violation gives rise to the proposed imposition of fines, or the deadline for filing an appeal if no appeal is filed, after receipt of a written notice of violation pursuant to Section 3-1-111(2) of this Ordinance.

3. If a Person is using water Illegally, the Board may impose fines on that Person at any time commencing from the date of that Person's receipt of the notice of violation from the Engineer pursuant to section 3-1-111(3)(a) of this Ordinance, if the Illegal use is not ceased immediately upon receipt of the notice of violation.

4. Each day of violation constitutes a separate violation.

5. The process for appeal from any Board decision imposing fines pursuant to this Section shall be as set forth in Section 2-2-112 of this Ordinance.

3-1-114. Appointment of Water Commissioners. Pursuant to Article IV.I.5.d of the Compact, the Board may appoint one or more Water Commissioners to provide day-to-day administration of water on the Reservation. The appointment shall specify the geographic area for which the commissioner shall have responsibility.

3-1-115. Powers and Duties of Water Commissioners. Subject to the jurisdictional limitation set forth in Article IV.I.5.d.ii of the Compact and Section 3-1-101(1) of this Ordinance, any Water Commissioner appointed pursuant to Section 3-1-114 of this Ordinance:

1. Shall, consistent with the terms and conditions of the Compact, the federal legislation ratifying the Compact, this Ordinance, and the terms of all applicable Appropriation Rights and Existing Uses, distribute water in the proper priority;

2. Shall, as near as may be practicable, divide, regulate and control the use of the water of all streams, springs, lakes or other sources of water within that Water Commissioner's district to prevent the Waste of water or its use in excess of the volume to which any Appropriator is lawfully entitled, including through the opening and closing of headgates. Whenever a Water Commissioner regulates a headgate to a ditch or the controlling Works of reservoirs, it shall be that Water Commissioner's duty to attach to such headgate or controlling Works a written notice, properly dated and signed, setting forth the fact that such headgate or controlling Works has been properly regulated and is wholly under the Water Commissioner's control and such notice shall be a legal notice to all parties interested in the division and distribution of the water of such ditch or reservoir;

3. Shall notify the Engineer in writing of the non-compliance of any water user with a prior order of the Engineer or the Board or any prior written directive of that Water Commissioner issued pursuant to subsection (4) of this Section;

4. May issue written directives to any Appropriator, or any Illegal user of water, concerning day-to-day actions that must be taken to facilitate the execution of the duties of that Water Commissioner as set forth in subsections (1) and (2) of this Section; and

5. May recommend to the Engineer, in writing, conditions to be placed on the exercise of any Appropriation Right or Existing Use on the Reservation, including the requirement of measuring devices and the necessity of structural changes to diversion or other structures. The Water Commissioner shall serve copies of any such written recommendation on the Appropriator(s) whose Appropriation Right(s) or Existing Use(s) are referenced in the recommendation.

3-1-116. Recourse from Water Commissioner Decisions. Any Person who may be injured by the action or inaction of a Water Commissioner has the right to petition the Engineer pursuant to the provisions of Section 3-1-105 of this Ordinance.

3-1-117. Removal of Water Commissioners. Water Commissioners shall serve at the pleasure of the Board and may be removed by unanimous vote of the Board at any time.

CHAPTER 25
COLUMBIA RIVER TREATY ACCOUNT

Part 1 — General Provisions

85-25-101. Definitions.
85-25-102. Columbia River treaty account — use.

Part 1
General Provisions

85-25-101. *(Effective on occurrence of contingency)* **Definitions.** As used in this chapter, the following definitions apply:

(1) "Columbia River treaty" or "treaty" means the Columbia River treaty between Canada and the United States relating to cooperative development of the water resources of the Columbia River basin.

(2) "Department" means the department of natural resources and conservation provided for in Title 2, chapter 15, part 33.

History: En. Sec. 1, Ch. 383, L. 2015.

Compiler's Comments

Effective Date — Contingency: Section 5, Ch. 383, L. 2015, provided: "[This act] is effective when the state receives money from Bonneville Power Administration, the United States federal government, BC Hydro, the British Columbia provincial government, or the federal government of Canada or from another entity that benefits from the waters stored in Lincoln County through irrigation, navigation, recreation, hydropower generation, or other uses."

85-25-102. *(Effective on occurrence of contingency)* **Columbia River treaty account — use.** (1) There is an account within the state special revenue fund provided for in 17-2-102 called the Columbia River treaty account. The department shall administer the account.

(2) The Columbia River treaty account must be used to:

(a) disburse funds to Lincoln County to compensate the county for storage of floodwaters and general river flow, which provides protection of life and property downstream as well as considerable economic benefit over a broad region; and

(b) transfer funds to the state general fund pursuant to subsection (4)(b).

(3) Any money received by the state related to the Columbia River treaty must be deposited in the account.

(4) (a) No later than July 15 following the close of the preceding fiscal year, the department shall distribute to Lincoln County 80% of all funds deposited into the account during the preceding fiscal year.

(b) The department shall transfer the remaining funds deposited into the account during the preceding fiscal year to the state general fund.

(5) Funds in the account are statutorily appropriated, as provided in 17-7-502, to the department for the purposes provided in subsection (2).

(6) Lincoln County shall use the funds received from the account for schools, roads, and general operations and to establish a trust fund with the interest made available for projects and programs that promote social, economic, and environmental well-being in Lincoln County.

History: En. Sec. 2, Ch. 383, L. 2015.

Compiler's Comments

Effective Date — Contingency: Section 5, Ch. 383, L. 2015, provided: "[This act] is effective when the state receives money from Bonneville Power Administration, the United States federal government, BC Hydro, the British Columbia provincial government, or the federal government of Canada or from another entity that benefits from the waters stored in Lincoln County through irrigation, navigation, recreation, hydropower generation, or other uses."

3. Restrictions and Regulations.
4. Commercial Activities.
5. Wildlife Protection.
6. Fish and Wildlife Criminal Provisions.

CHAPTER 1

ORGANIZATION AND OPERATION

Part 1 — General Provisions

87-1-101. Definitions.
87-1-102. Repealed.
87-1-103. Fines, bonds, and penalties.
87-1-104. Payment of cost bill to county.
87-1-105. Duty of attorney general and county attorneys.
87-1-106. Fish, wildlife, and parks offices.
87-1-107. Right to harvest — legislative intent.
87-1-108. Repealed.
87-1-109. Repealed.
87-1-110. Repealed.
87-1-111. Repealed.
87-1-112. Repealed.
87-1-113. Repealed.
87-1-114. Repealed.
87-1-115. Repealed.
87-1-116 through 87-1-119 reserved.
87-1-120. Remedial hunter education program.
87-1-121. Repealed.
87-1-122 through 87-1-124 reserved.
87-1-125. Repealed.
87-1-126. Use of exploding targets prohibited — definition — penalty.

Part 2 — Department of Fish, Wildlife, and Parks

87-1-201. Powers and duties.
87-1-202. Publication of orders and rules.
87-1-203. Effect of orders, rules, and regulations.
87-1-204. Political activity of employees.
87-1-205. Repealed.
87-1-206. Bounty claims for wild animals.
87-1-207. Establishment of checking stations.
87-1-208. Repealed.
87-1-209. Acquisition and sale of lands or waters.
87-1-210. Research, training, and other projects.
87-1-211. Repealed.
87-1-212. Terminated.
87-1-213. Wildlife location data and telemetry frequencies — data-sharing agreements.
87-1-214. Disclosure of information — legislative finding — large predators.
87-1-215. Repealed.
87-1-216. Wild buffalo or bison as species in need of management — policy — department duties.
87-1-217. Policy for management of large predators — legislative intent.
87-1-218. Notice of proposed land acquisitions.
87-1-219 and 87-1-220 reserved.
87-1-221. Acquisition, importation, and propagation of fish and game — waterfowl food.
87-1-222. Construction and maintenance of fish hatcheries and fish ladders.
87-1-223. Control of state waters for propagation of fish.
87-1-224. Destruction of beaver and beaver dams for protection of public health.
87-1-225. Regulation of wild animals damaging property — public hunting requirements.
87-1-226. Disposition of meat of animals damaging property.
87-1-227. Hunting rights on adjoining federal wildlife preserve.
87-1-228. Agreement with Indians concerning hunting and fishing — Indian treaty of 1855.
87-1-229. Entry on private land — policy.
87-1-230. Terminated.
87-1-231. Repealed.

87-1-232. Tattoo records.
87-1-233. Compensation for damage caused by animal held in captivity.
87-1-234. Exceptions to tattoo and compensation requirements.
87-1-235 through 87-1-240 reserved.
87-1-241. Acquisition of wildlife habitat — rules.
87-1-242. Funding for wildlife habitat.
87-1-243 through 87-1-245 reserved.
87-1-246. Funding of upland game bird enhancement program.
87-1-247. Upland game bird enhancement program — authorized use of funds.
87-1-248. Qualification of upland game bird enhancement projects.
87-1-249. Rules.
87-1-250. Upland game bird enhancement program — report.
87-1-251. Upland game bird enhancement program — advisory council.
87-1-252 through 87-1-254 reserved.
87-1-255. Purpose.
87-1-256. Definitions.
87-1-257. River restoration program.
87-1-258. River restoration account.
87-1-259. Funding for river restoration account.
87-1-260 and 87-1-261 reserved.
87-1-262. Montana block management enforcement network — rulemaking.
87-1-263. Veterans' preference for reserving certain block management areas on Veterans' Day.
87-1-264. Expenditure of hunting access program funds on weed control.
87-1-265. Hunting access programs — block management program — private landowner assistance — rules — restriction on landowner liability.
87-1-266. License benefits for landowners enrolled in block management program — rulemaking.
87-1-267. Repealed.
87-1-268. Repealed.
87-1-269. Private land/public wildlife advisory committee — duties — reports.
87-1-270. Allocation of license fees to hunting access programs.
87-1-271. Annual lottery of hunting licenses — proceeds dedicated to hunting access.
87-1-272. Future fisheries improvement program — funding priority — reports required.
87-1-273. Future fisheries review panel — purpose — appointment and duties.
87-1-274. Emergency instream flows — funding.
87-1-275. Annual lottery of hunting licenses — residents only.
87-1-276. Purpose.
87-1-277. Shooting range development grants.
87-1-278. Grant criteria.
87-1-279. Program rules.
87-1-280 through 87-1-282 reserved.
87-1-283. Native Montana fish species enhancement program.
87-1-284 reserved.
87-1-285. Fishing access enhancement program created — private landowner assistance to promote public fishing access — rules.
87-1-286. Fishing access enhancement program — benefits for providing fishing access — cooperative agreement — factors for determining benefits earned — restriction on landowner liability.
87-1-287. Placement of warning sign in water legally accessible to public — liability limitation — role of department.
87-1-288 and 87-1-289 reserved.
87-1-290. Hunting access account.
87-1-291 and 87-1-292 reserved.
87-1-293. Hunters against hunger — findings — optional donation — rulemaking.
87-1-294. Unlocking public lands program — purpose — commission rulemaking authority.
87-1-295. Public access land agreement — terms — application fee.
87-1-296. Repealed.
87-1-297. Repealed.
87-1-298. Supporting bowhunters with disabilities program — findings — optional donation — rulemaking.

Part 3 — Fish and Wildlife Commission

87-1-301. Powers of commission.
87-1-302. Commission meetings.
87-1-303. Rules for use of lands and waters.
87-1-304. Fixing of seasons and bag and possession limits.
87-1-305. Fish and game refuges.
87-1-306. Designation of certain river stretches as no-wake waters — personal watercraft use prohibited.
87-1-307 through 87-1-320 reserved.
87-1-321. Purpose.
87-1-322. Calculation of available habitat.

87-1-323. Viable elk, deer, and antelope populations based on habitat acreage — reduction of populations as necessary.
87-1-324. Sustainable elk, deer, and antelope populations program — funding.
87-1-325. Rulemaking — discounted antlerless elk B tag licenses.

Part 4 — Director of Fish, Wildlife, and Parks

87-1-401. Director to carry out policies.
87-1-402. Oath of director.
87-1-403. Regulation of employees by director.
87-1-404. Appointment of deputy director and wardens.
87-1-405. Publication of laws.

Part 5 — Fish and Game Wardens

87-1-501. Selection and oath of wardens.
87-1-502. Qualifications, powers, and duties.
87-1-503. Ex officio wardens.
87-1-504. Protection of private property — duty of wardens.
87-1-505. Repealed.
87-1-506. Enforcement powers of wardens.
87-1-507 through 87-1-510 reserved.
87-1-511. Sale of confiscated birds and animals — disposition of seized grizzly bears.
87-1-512. Certificate of sale.
87-1-513. Disposition of proceeds of sale.
87-1-514. Record of confiscated property.

Part 6 — Finance

87-1-601. Use of fish and game money.
87-1-602. Payment of salaries, per diem, and expenses.
87-1-603. Department-owned land subject to taxation — exceptions.
87-1-604. Authorization for allocation of funds to school districts.
87-1-605. Fees used to purchase recreational facilities.
87-1-606. Fee limitation for multiple licenses.
87-1-607 through 87-1-609 reserved.
87-1-610. Contributions for leasing appropriation rights — general spending authority.
87-1-611. Fish and wildlife mitigation trust fund created.
87-1-612. Purposes of the fish and wildlife mitigation trust fund.
87-1-613. Agreements for use of fund — department as trustee.
87-1-614. Expenditure of principal and earnings.
87-1-615. Investment of fish and wildlife mitigation trust fund.
87-1-616 through 87-1-620 reserved.
87-1-621. Forest management account.
87-1-622. Forest management plan — sustainable yield study required — definition.
87-1-623. Wolf management account.
87-1-624 reserved.
87-1-625. Funding for wolf management.
87-1-626. Big game and wildlife highway crossings and accommodations license plates — authorization.
87-1-627. Big game and wildlife highway crossings and accommodations account — purpose — funds invested — statutory appropriation.
87-1-628. Hunters against hunger account.
87-1-629. Review of budget — report to legislature.
87-1-630. Supporting bowhunters with disabilities account.

Part 7 — State-Federal Relationships

87-1-701. Assent to Dingell-Johnson Act.
87-1-702. Powers of department relating to fish restoration and management.
87-1-703. Cooperative agreements on federally owned land.
87-1-704. Federal fish-hatching operations.
87-1-705. Acquisition of land by United States for migratory bird reservation.
87-1-706. Regulation of bird reserve in Flathead County.
87-1-707. Water supply for the Benton Lake wildlife refuge.
87-1-708. Assent to Pittman-Robertson Act — authority of department.
87-1-709. Cooperation with United States for wildlife restoration.
87-1-710. Use of hunters' license fees for department purposes only.
87-1-711. Acquisition of land by United States for bison and other big game animals.
87-1-712. Development of national bison range.
87-1-713. Federal waterfowl and wildlife area acquisitions — submission to affected county governing bodies for review.
87-1-714. Hearings on proposed waterfowl and wildlife area acquisitions.

Part 8 — Interstate Wildlife Violator Compact
87-1-801. Compact adopted — text.
87-1-802. Department authorization to effect purposes of compact.
87-1-803. Reciprocal recognition of license suspensions — suspension of privileges for conviction in participating state.
87-1-804. Suspension of privileges for failure to comply with citation issued in participating state.
87-1-805. Hearing on suspension.
Part 9 — Gray Wolf Management
87-1-901. Gray wolf management — rulemaking — reporting.

Part 1
General Provisions

87-1-101. Definitions. Unless the context requires otherwise, in this title the following definitions apply:

(1) "Board" means the state parks and recreation board provided for in 2-15-3406.

(2) "Commission" means the fish and wildlife commission provided for in 2-15-3402.

(3) "Department" means the department of fish, wildlife, and parks provided for in Title 2, chapter 15, part 34.

(4) "Director" means the director of fish, wildlife, and parks provided for in 2-15-3401.

(5) "Warden" means a state fish and game warden.

History: En. 26-101.1 by Sec. 1, Ch. 511, L. 1973; amd. Sec. 3, Ch. 417, L. 1977; R.C.M. 1947, 26-101.1; amd. Sec. 2, Ch. 218, L. 1979; amd. Sec. 2, Ch. 28, L. 1991; amd. Sec. 24, Ch. 235, L. 2013.

87-1-102. Repealed. Sec. 120, Ch. 258, L. 2011.

History: En. Sec. 23, Ch. 238, L. 1921; re-en. Sec. 3706, R.C.M. 1921; amd. Sec. 23, Ch. 192, L. 1925; re-en. Sec. 3706, R.C.M. 1935; amd. Sec. 9, Ch. 224, L. 1947; amd. Sec. 1, Ch. 159, L. 1955; amd. Sec. 29, Ch. 511, L. 1973; amd. Sec. 34, Ch. 9, L. 1977; amd. Secs. 13, 14, Ch. 417, L. 1977; amd. Sec. 1, Ch. 465, L. 1977; R.C.M. 1947, 26-324; amd. Sec. 1, Ch. 334, L. 1987; amd. Sec. 1, Ch. 132, L. 1989; amd. Sec. 2, Ch. 277, L. 1991; amd. Sec. 7, Ch. 609, L. 1991; amd. Sec. 1, Ch. 101, L. 1995; amd. Sec. 1, Ch. 417, L. 1995; amd. Sec. 96, Ch. 552, L. 1997; amd. Sec. 2, Ch. 499, L. 1999; amd. Sec. 2, Ch. 502, L. 1999; amd. Sec. 1, Ch. 59, L. 2005; amd. Sec. 4, Ch. 121, L. 2009; amd. Sec. 1, Ch. 229, L. 2009; amd. Sec. 1, Ch. 253, L. 2009.

87-1-103. Fines, bonds, and penalties. All fines, bonds, and penalties mentioned in this title may be collected by civil action in the name of the state in any court of competent jurisdiction. All fines, bonds, and costs shall be collected without stay of execution.

History: En. Sec. 74, Ch. 173, L. 1917; re-en. Sec. 3753, R.C.M. 1921; amd. Sec. 25, Ch. 77, L. 1923; re-en. Sec. 3753, R.C.M. 1935; amd. Sec. 41, Ch. 511, L. 1973; R.C.M. 1947, 26-1001.

87-1-104. Payment of cost bill to county. In a prosecution for the violation of fish and game laws where costs are incurred, a cost bill shall be prepared. The cost bill shall include the cost of board of prisoners and shall be presented to the department of administration. If the costs are allowed, the state treasurer shall pay them out of the fish and game moneys in the state special revenue fund to the treasurer of the county where the costs were incurred.

History: En. Sec. 75, Ch. 173, L. 1917; re-en. Sec. 3754, R.C.M. 1921; re-en. Sec. 3754, R.C.M. 1935; amd. Sec. 42, Ch. 511, L. 1973; R.C.M. 1947, 26-1002; amd. Sec. 1, Ch. 277, L. 1983.

Cross-References

Payment of prosecution cost bills, 87-1-601.

87-1-105. Duty of attorney general and county attorneys. The attorney general of the state is the legal adviser of the department and shall, together with the several county attorneys, enforce the provisions of this title.

History: En. Sec. 26, Ch. 193, L. 1921; re-en. Sec. 3675, R.C.M. 1921; re-en. Sec. 3675, R.C.M. 1935; amd. Sec. 13, Ch. 417, L. 1977; R.C.M. 1947, 26-126; amd. Sec. 1, Ch. 44, L. 1979.

87-1-106. Fish, wildlife, and parks offices. The principal offices of the commission, the board, and the department must be located in or near Helena, and suitable and adequate space therefor together with janitor services, light, heat, and water must be furnished by the state of Montana.

History: En. Sec. 3, Ch. 193, L. 1921; re-en. Sec. 3652, R.C.M. 1921; amd. Sec. 1, Ch. 77, L. 1923; amd. Sec. 1, Ch. 192, L. 1925; re-en. Sec. 3652, R.C.M. 1935; amd. Sec. 1, Ch. 114, L. 1945; amd. Sec. 1, Ch. 52, L. 1957; amd. Sec. 1, Ch. 119, L. 1959; amd. Sec. 23, Ch. 271, L. 1963; amd. Sec. 2, Ch. 511, L. 1973; R.C.M. 1947, 26-103(part); amd. Sec. 1, Ch. 340, L. 1985; amd. Sec. 25, Ch. 235, L. 2013.

87-1-107. Right to harvest — legislative intent. The legislature, mindful of its constitutional obligations under Article II, section 3, of the Montana constitution protecting the inalienable rights of a person to pursue life's basic necessities, enjoy the person's life and liberties, and pursue happiness in all lawful ways, and Article IX, section 7, of the Montana constitution protecting the opportunity for a person to harvest wild fish and wild game animals while not diminishing other private rights, has enacted the laws of this title pertaining to the lawful means of hunting, fishing, and trapping, as defined in 87-2-101 and 87-6-101, as adequate remedies for the preservation of the harvest heritage of the individual citizens of this state.

History: En. Sec. 1, Ch. 105, L. 2015.

87-1-116 through 87-1-119 reserved.

87-1-120. Remedial hunter education program. (1) The department shall develop a remedial hunter education program for hunting law violators.

(2) The program must be funded through money collected by a court pursuant to 87-6-905 through 87-6-908.

(3) The department shall determine the qualifications for instructors, hire the instructors, and pay the instructors at a rate determined by the department.

(4) A person who is sentenced by the court to complete a remedial hunter education course shall pay the costs directly attributable to the person's participation in the remedial hunter education program.

(5) The course instructor shall notify the sentencing court of the participant's attendance record and of the participant's success or failure in completing the program.

(6) A participant whose hunting, fishing, or trapping license has been revoked shall successfully complete the program before license privileges may be reinstated.

87-1-121. Repealed. Sec. 120, Ch. 258, L. 2011.

History: En. Sec. 7, Ch. 499, L. 1999.

87-1-122 through 87-1-124 reserved.

87-1-125. Repealed. Sec. 120, Ch. 258, L. 2011.

History: En. Sec. 8, Ch. 499, L. 1999.

87-1-126. Use of exploding targets prohibited — definition — penalty. (1) The use of exploding targets on properties managed pursuant to this title is prohibited when the department of natural resources and conservation determines that fire danger is high, very high, or extreme.

(2) For the purposes of this section, "exploding targets" means commercial targets that explode when impacted by a high-velocity projectile or targets created by combining components, including but not limited to ammonium nitrate and aluminum powder, that explode when impacted by a high-velocity projectile.

(3) A person convicted of a violation of this section is guilty of a misdemeanor and shall be fined not more than $500 or be imprisoned in the county jail for not more than 6 months.

History: En. Sec. 3, Ch. 513, L. 2021.

Cooperative agreements with district weed boards, 7-22-2151.

87-1-201. Powers and duties. (1) Except as provided in subsection (13), the department shall supervise all the wildlife, fish, game, game and nongame birds, waterfowl, and the game and fur-bearing animals of the state and may implement voluntary programs that encourage hunting access on private lands and that promote harmonious relations between landowners and the hunting public. The department possesses all powers necessary to fulfill the duties prescribed by law and to bring actions in the proper courts of this state for the enforcement of the fish and game laws and the rules adopted by the department.

(2) Except as provided in subsection (13), the department shall enforce all the laws of the state regarding the protection, preservation, management, and propagation of fish, game, fur-bearing animals, and game and nongame birds within the state.

(3) The department has the exclusive power to spend for the protection, preservation, management, and propagation of fish, game, fur-bearing animals, and game and nongame birds all state funds collected or acquired for that purpose, whether arising from state appropriation, licenses, fines, gifts, or otherwise. Money collected or received from the sale of hunting and fishing licenses or permits, from the sale of seized game or hides, from fines or damages collected for violations of the fish and game laws, or from appropriations or received by the department from any other sources is under the control of the department and is available for appropriation to the department.

(4) The department may discharge any appointee or employee of the department for cause at any time.

(5) The department may dispose of all property owned by the state used for the protection, preservation, management, and propagation of fish, game, fur-bearing animals, and game and nongame birds that is of no further value or use to the state and shall turn over the proceeds from the sale to the state treasurer to be credited to the fish and game account in the state special revenue fund.

(6) (a) The department may not issue firearms within this state to anyone except:

(i) wardens; and

(ii) other qualified employees identified, trained, and certified by the department where necessary to perform assigned duties pursuant to subsection (7).

(b) Wardens, as authorized officers under 87-1-502, are the only department employees with the authority to enforce provisions of state law or administrative rule.

(7) (a) Department employees may be issued a firearm as allowed in subsection (6)(a)(ii) only after submitting a form of final approval as determined and approved by the department.

(b) Department-issued firearms may be carried by an employee other than a warden only when the employee is engaged in work that requires the carrying of a firearm, as determined by the department.

(c) When a department-issued firearm is no longer necessary to perform an employee's required duties, the employee shall return the issued firearm to secure storage in the regional office to which the employee is attached.

(8) Except as provided in subsection (13), the department is authorized to make, promulgate, and enforce reasonable rules and regulations not inconsistent with the provisions of Title 87, chapter 2, that in its judgment will accomplish the purpose of chapter 2.

(9) The department is authorized to promulgate rules relative to tagging, possession, or transportation of bear within or outside of the state.

(10) (a) The department shall implement programs that:

(i) manage wildlife, fish, game, and nongame animals in a manner that prevents the need for listing under 87-5-107 or under the federal Endangered Species Act, 16 U.S.C. 1531, et seq.;

(ii) manage listed species, sensitive species, or a species that is a potential candidate for listing under 87-5-107 or under the federal Endangered Species Act, 16 U.S.C. 1531, et seq., in a manner that assists in the maintenance or recovery of those species;

(iii) manage elk, deer, and antelope populations based on habitat estimates determined as provided in 87-1-322 and maintain elk, deer, and antelope population numbers at or below population estimates as provided in 87-1-323. In implementing an elk management plan, the department shall, as necessary to achieve harvest and population objectives, request that land management agencies open public lands and public roads to public access during the big game hunting season.

(iv) in accordance with the forest management plan required by 87-1-622, address fire mitigation, pine beetle infestation, and wildlife habitat enhancement giving priority to forested lands in excess of 50 contiguous acres in any state park, fishing access site, or wildlife management area under the department's jurisdiction.

(b) In maintaining or recovering a listed species, a sensitive species, or a species that is a potential candidate for listing, the department shall seek, to the fullest extent possible, to balance maintenance or recovery of those species with the social and economic impacts of species maintenance or recovery.

(c) Any management plan developed by the department pursuant to this subsection (10) is subject to the requirements of Title 75, chapter 1, part 1.

(d) This subsection (10) does not affect the ownership or possession, as authorized under law, of a privately held listed species, a sensitive species, or a species that is a potential candidate for listing.

(11) The department shall publish an annual game count, estimating to the department's best ability the numbers of each species of game animal, as defined in 87-2-101, in the hunting districts and administrative regions of the state. In preparing the publication, the department may incorporate field observations, hunter reporting statistics, or any other suitable method of determining game numbers. The publication must include an explanation of the basis used in determining the game count.

(12) The department shall report current sage grouse population numbers, including the number of leks, to the Montana sage grouse oversight team, established in 2-15-243, and the environmental quality council in accordance with 5-11-210 on an annual basis. The report must include seasonal and historic population data available from the department or any other source.

(13) The department may not regulate the use or possession of firearms, firearm accessories, or ammunition, including the chemical elements of ammunition used for hunting. This does not prevent:

(a) the restriction of certain hunting seasons to the use of specified hunting arms, such as the establishment of special archery seasons and the special muzzleloader heritage hunting season established in 87-1-304;

(b) for human safety, the restriction of certain areas to the use of only specified hunting arms, including bows and arrows, traditional handguns, and muzzleloading rifles;

(c) the restriction of the use of shotguns for the hunting of deer and elk pursuant to 87-6-401(1)(f);

(d) the regulation of migratory game bird hunting pursuant to 87-3-403; or

(e) the restriction of the use of rifles for bird hunting pursuant to 87-6-401(1)(g) or (1)(h).

(14) The department shall publish an annual public report that shows the number of licenses sold to nonresidents in the previous license year for each species in which the purchase of a license or permit is required. The report must also show how many licenses were issued through opportunities or programs for nonresidents, such as those for the following:

(a) youths;
(b) college students;
(c) nonresidents who were former residents;
(d) nonresident licenses purchased by utilizing an outfitter preference point;
(e) sponsorships by a landowner, family member, or current Montana resident; or
(f) any other license opportunity or program for nonresidents.

(15) The department shall publish an annual public report that shows the data on each hunting district for elk, deer, and antelope by both resident and nonresident hunters. The report must be created using currently available data and must include:

(a) the estimated number of resident hunters, nonresident hunters, and total hunters who hunted in the district;

(b) the estimated number of days the district was hunted by resident hunters, nonresident hunters, and total hunters;

(c) the estimated average number of days that resident hunters, nonresident hunters, and total hunters used the district per hunter; and

(d) the species being hunted in the district.

87-1-202. Publication of orders and rules. (1) Except as provided in subsection (2), annual and biennial rules adopted by the commission setting seasonal hunting, fishing, trapping, and land use regulations or by the board setting seasonal land use regulations must be published in a pamphlet format that is made available to the public at all department offices and through all license providers.

(2) Site-specific land use regulations applicable to a particular fishing access site, wildlife management area, park site, or other department land, including but not limited to speed limits, road and off-road restrictions or closures, places where camping is allowed or prohibited, and seasonal closures for management purposes, must be indicated to the public by signs on the premises of the particular fishing access site, wildlife management area, park site, or other department land.

(3) (a) Commission orders setting management seasons, providing for game damage hunts, and closing special seasons pursuant to 87-1-304 may be published by:

(i) use of the department's website;

(ii) use of a telephone hotline number; or

(iii) any other method that is readily available to the public.

(b) The method for notifying the public of the closure of a special season must be stated in the rule that establishes the special season.

(4) Public notification of emergency closures of department lands, public waterways, and hunting, fishing, and trapping seasons that are based on public health, safety, and welfare must be made in the manner and to the extent that the department considers necessary in light of the facts surrounding the emergency, including, when practical, onsite posting of the emergency closure.

87-1-206. Bounty claims for wild animals. (1) The department shall pay bounty claims for wild animals that have been filed with and approved by the board of livestock. The department shall pay out of the state fish and game funds, other than those funds derived from license fees paid by hunters and anglers, bounties on predatory wild animals as the bounty claims are presented, not exceeding $7,500 for each calendar year.

(2) The board of livestock shall, after approving the bounty claim, deliver the claim to the department for rejection or approval. If the claim or certificate is rejected, it must be returned by the department to the board of livestock. If approved, it must be delivered to the department of administration for allowance or disallowance. This section does not take from the department the exclusive power to administer the fish and game money at its discretion.

(3) If the department of administration allows the claim, the department shall draw a warrant on the state fish and game money in the state special revenue fund for the amount approved in favor of the claimant in the order in which the claim is approved.

87-1-209. Acquisition and sale of lands or waters. (1) (a) Subject to 87-1-218 and subsection (8) of this section, the department, with the consent of the commission or the board, may acquire for the purpose listed in subsection (1)(b):

(i) land or water by purchase, lease, agreement, gift, transfer, or devise. In the case of land acquisition involving more than 500 acres or land or water acquisition of more than $1 million in value, the approval of the board of land commissioners is also required.

(ii) easements on lands or waters. In the case of easements for which more than $1 million in state funds will be used for the acquisition, the approval of the board of land commissioners is also required. The department shall inform the board of land commissioners of the pending easement once it receives initial endorsement from the commission or board.

(b) The department may develop, operate, and maintain acquired lands or waters:

(i) for fish hatcheries or nursery ponds;

(ii) as lands or water suitable for game, bird, fish, or fur-bearing animal restoration, propagation, or protection;

(iii) for public hunting, fishing, or trapping areas;

(iv) to capture, propagate, transport, buy, sell, or exchange any game, birds, fish, fish eggs, or fur-bearing animals needed for propagation or stocking purposes or to exercise control measures of undesirable species;

(v) for state parks and outdoor recreation;

(vi) to extend and consolidate by exchange, lands or waters suitable for these purposes.

(2) The department, with the consent of the board, may acquire by condemnation, as provided in Title 70, chapter 30, lands or structures for the preservation of historic or archaeological sites that are threatened with destruction or alteration.

(3) (a) Subject to section 2(3), Chapter 560, Laws of 2005, the department, with the consent of the commission or the board, may dispose of lands and water rights acquired by it on those terms after public notice as required by subsection (3)(b) of this section, without regard to other laws that provide for sale or disposal of state lands and with or without reservation, as it considers necessary and advisable. The department, with the consent of the commission or the board, may convey department lands and water rights for full market value to other governmental entities or to adjacent landowners without regard to the requirements of subsection (3)(b) or (3)(c) if the land is less than 10 acres or if the full market value of the interest to be conveyed is less than $20,000. When the department conveys land or water rights to another governmental entity or to an adjacent landowner pursuant to this subsection, the department, in addition to giving notice pursuant to subsection (3)(b), shall give notice by mail to the landowners whose property adjoins the department property being conveyed.

(b) Subject to section 2(3), Chapter 560, Laws of 2005, notice of sale describing the lands or waters to be disposed of must be published once a week for 3 successive weeks in a newspaper with general circulation printed and published in the county where the lands or waters are situated or, if a newspaper is not published in that county, then in any newspaper with general circulation in that county.

(c) The notice must advertise for cash bids to be presented to the director within 60 days from the date of the first publication. Each bid must be accompanied by a cashier's check or cash deposit in an amount equal to 10% of the amount bid. The highest bid must be accepted upon payment of the balance due within 10 days after mailing notice by certified mail to the highest bidder. If that bidder defaults on payment of the balance due, then the next highest bidders must be similarly notified in succession until a sale is completed. Deposits must be returned to the unsuccessful bidders except bidders defaulting after notification.

(d) The department shall reserve the right to reject any bids that do not equal or exceed the full market value of the lands and waters as determined by the department. If the department does not receive a bid that equals or exceeds fair market value, it may then sell the lands or water rights at private sale. The price accepted on any private sale must exceed the highest bid rejected in the bid process.

(4) When necessary and advisable for the management and use of department property, the director is authorized to grant or acquire from willing sellers right-of-way easements for purposes of utilities, roads, drainage facilities, ditches for water conveyance, and pipelines if the full market value of the interest to be acquired is less than $20,000. Whenever possible, easements must include a weed management plan. Approval of the commission or the board is not required for grants and acquisitions made pursuant to this subsection. In granting any right-of-way pursuant to this subsection, the department shall obtain a fair market value, but the department is not otherwise required to follow the disposal requirements of subsection (3). The director shall report any easement grant or acquisition made pursuant to this subsection to the commission or the board at its next regular meeting.

(5) The department shall convey lands and water rights without covenants of warranty by deed executed by the governor or in the governor's absence or disability by the lieutenant governor, attested by the secretary of state and further countersigned by the director.

(6) Subject to 87-1-218, the department, with the consent of the commission, is authorized to utilize the installment contract method to facilitate the acquisition of wildlife management areas in which game and nongame fur-bearing animals and game and nongame birds may breed and replenish and areas that provide access to fishing sites for the public. The total cost of installment contracts may not exceed the cost of purchases authorized by the department and appropriated by the legislature.

(7) The department is authorized to enter into leases of land under its control in exchange for services to be provided by the lessee on the leased land.

(8) Approval of the board for the acquisition or disposal of land or water pursuant to this section is required only for land and water administered under Title 23, chapter 1, or Title 23, chapter 2, parts 1 and 4.

(1) Except as provided in subsections (2) through (5) or as otherwise provided by law, the department may not release wildlife location data or telemetry frequencies, whether collected by the department or held by the department, of hunted or trapped animals.

(2) Wildlife location data used as part of a study that includes a completion report may be released 1 year after the completion of the study and report.

(3) Wildlife location data that is not used as part of a study may be released 1 year after the department collects or acquires the data.

(4) The department may release wildlife location data for environmental permitting activities.

(5) Subject to the restrictions in subsections (2) and (3), the department may share wildlife location data with project partners and other government agencies through data-sharing agreements.

History: En. Sec. 1, Ch. 433, L. 2025.

Compiler's Comments

Effective Date: This section is effective October 1, 2025.

87-1-214. Disclosure of information — legislative finding — large predators. (1) Except for information that is required by law to be reported to state or federal officials, the department may not disclose any information that may identify any person who obtains a permit or license to take a large predator as defined in 87-1-217 or who lawfully takes a large predator without the written consent of the person affected. Information that may not be disclosed includes but is not limited to a person's name, address, phone number, date of birth, social security number, and driver's license number.

(2) The legislature finds that the prohibition on disclosure of information pursuant to subsection (1) is necessary to protect an individual's privacy, safety, and welfare.

(3) The department may publish harvest locations of large predators at the hunting district level.

History: En. Sec. 1, Ch. 178, L. 2011; amd. Sec. 1, Ch. 461, L. 2023.

87-1-215. Repealed. Sec. 4, Ch. 346, L. 1995.

History: En. Sec. 2, Ch. 401, L. 1991.

87-1-216. Wild buffalo or bison as species in need of management — policy — department duties. (1) The legislature finds that significant potential exists for the spread of contagious disease to persons or livestock in Montana and for damage to persons and property by wild buffalo or bison. It is the purpose of this section:

(a) to designate publicly owned wild buffalo or bison originating from Yellowstone national park as a species requiring disease control;

(b) to designate other wild buffalo or bison as a species in need of management; and

(c) to set out specific duties for the department for management of the species.

(2) The department:

(a) is responsible for the management, including but not limited to public hunting, of wild buffalo or bison in this state that have not been exposed to or infected with a dangerous or contagious disease but may threaten persons or property;

(b) shall consult and coordinate with the department of livestock on implementation of the provisions of subsection (2)(a) to the extent necessary to ensure that wild buffalo or bison remain disease-free; and

(c) shall cooperate with the department of livestock in managing publicly owned wild buffalo or bison that enter the state on public or private land from a herd that is infected with a dangerous disease, as provided in 81-2-120, under a plan approved by the governor. The department of livestock is authorized under the provisions of 81-2-120 to regulate publicly owned wild buffalo or bison in this state that pose a threat to persons or livestock in Montana through the transmission of contagious disease. The department may, after agreement and authorization by the department of livestock, authorize the public hunting of wild buffalo or bison that have been exposed to or infected with a contagious disease, pursuant to 87-2-730. The department may, following consultation with the department of livestock, adopt rules to authorize the taking of bison where and when necessary to prevent the transmission of a contagious disease.

(3) The department may adopt rules with regard to wild buffalo or bison that have not been exposed to or infected with a contagious disease but are in need of management because of potential damage to persons or property.

(4) The department may not:

(a) release, transplant, relocate, or allow wild buffalo or bison on any private or public land in Montana that has not been authorized for that use by the private or public owner; or

(b) except for a transfer to a qualified tribal entity pursuant to 81-2-120(1)(a)(ii), release, transplant, or relocate any wild buffalo or bison into any county in the state without authorization of the board of county commissioners of the affected county or counties pursuant to 7-21-3214.

(5) Subject to subsection (4), the department shall develop and adopt a management plan before any wild buffalo or bison under the department's jurisdiction may be released, transplanted, or relocated onto private or public land in Montana. A plan must include but is not limited to:

(a) measures to comply with any applicable animal health protocol required under Title 81, under subsection (2)(b), or by the state veterinarian;

(b) any animal identification and tracking protocol required by the department of livestock to identify the origin and track the movement of wild buffalo or bison for the purposes of subsections (2)(b) and (5)(c);

(c) animal containment measures that ensure that any animal released, transplanted, or relocated on private or public land will be contained in designated areas. Containment measures must include but are not limited to:

(i) any fencing required;

(ii) contingency plans to expeditiously relocate wild buffalo or bison that enter private or public property where the presence of the animals is not authorized by the private or public owner;

(iii) contingency plans to expeditiously fund and construct more effective containment measures in the event of an escape; and

(iv) contingency plans to eliminate or decrease the size of designated areas, including the expeditious relocation of wild buffalo or bison if the department is unable to effectively manage or contain the wild buffalo or bison.

(d) a reasonable means of protecting public safety and emergency measures to be implemented if public safety may be threatened;

(e) a reasonable maximum carrying capacity for any proposed designated area using sound management principles, including but not limited to forage-based carrying capacity, and methods for not exceeding that carrying capacity, including in years of drought or severe winters. The carrying capacity must be based on a forage analysis conducted in accordance with standards contained in the most recent natural resources conservation service field office technical guide by a range scientist who is on the staff of:

(i) the Montana state university-Bozeman college of agriculture;

(ii) the United States natural resources conservation service; or

(iii) a technical service provider certified by either the natural resources conservation service or the society for range management.

(f) identification of long-term, stable funding sources that would be dedicated to implementing the provisions of the management plan for each designated area.

(6) When developing a management plan in accordance with subsection (5), the department shall provide the opportunity for public comment and hold a public hearing in the affected county or counties. Prior to making a decision to release, transplant, or relocate wild buffalo or bison onto private or public land in Montana, the department shall respond to all public comment received and publish a full record of the proceedings at any public hearing.

(7) The department is liable for all costs incurred, including costs arising from protecting public safety, and any damage to private property that occurs as a result of the department's failure to meet the requirements of subsection (5).

(8) When adopting and implementing rules regarding the special wild buffalo or bison license issued pursuant to 87-2-730, the department shall consult and cooperate with the department of livestock regarding when and where public hunting may be allowed and the safe handling of wild buffalo or bison parts in order to minimize the potential for spreading any contagious disease to persons or to livestock.

History: En. Sec. 2, Ch. 346, L. 1995; amd. Sec. 3, Ch. 604, L. 2003; amd. Sec. 1, Ch. 383, L. 2011; amd. Sec. 9, Ch. 403, L. 2011; amd. Sec. 1, Ch. 172, L. 2015; amd. Sec. 4, Ch. 354, L. 2021.

Cross-References

Transplantation or relocation of wild buffalo or wild bison into county — authorization, 7-21-3214.

Taking of publicly owned wild buffalo or bison on private property, 81-2-121.

Nongame and endangered species — legislative policy, 87-5-103.

87-1-217. Policy for management of large predators — legislative intent. (1) In managing large predators, the primary goals of the department, in the order of listed priority, are to:

(a) protect humans, livestock, and pets;

(b) preserve and enhance the safety of the public during outdoor recreational and livelihood activities; and

(c) preserve citizens' opportunities to hunt large game species.

(2) With regard to large predators, it is the intent of the legislature that the specific provisions of this section concerning the management of large predators will control the general supervisory authority of the department regarding the management of all wildlife.

(3) For the management of wolves in accordance with the priorities established in subsection (1), the department may use lethal action to take problem wolves that attack livestock if the state objective for breeding pairs has been met. For the purposes of this subsection, "problem wolves" means any individual wolf or pack of wolves with a history of livestock predation.

(4) The department shall work with the livestock loss board and the United States department of agriculture wildlife services to establish the conditions under which carcasses or parts of carcasses from wolves, mountain lions, or black bears are retrieved during management activities and when those carcasses or parts of carcasses are made available to the livestock loss board for sale or auction pursuant to 2-15-3113.

(5) (a) The department shall ensure that county commissioners and tribal governments in areas that have identifiable populations of large predators have the opportunity for consultation and coordination with state and federal agencies prior to state and federal policy decisions involving large predators and large game species.

(b) The department shall provide verbal and written notice to the county commissioners, sheriff's office, and tribal government located within the county or tribal government boundaries where a large predator is to be relocated:

(i) on the finalization of an annual plan to relocate a large predator into a county or tribal government boundary other than the one it was captured in;

(ii) on the finalization of a change to a plan to relocate a large predator into a county or tribal government boundary other than the one it was captured in;

(iii) within 24 hours of the capture of a large predator if it will be relocated into a county or tribal government boundary other than the one it was captured in; and

(iv) within 24 hours of the relocation of a large predator if the relocation site has been previously approved by the commission for relocation of bears.

(6) As used in this section:

(a) "consultation" means to actively provide information to a county or tribal government regarding proposed policy decisions on matters that may have a harmful effect on agricultural production or livestock operations or that may pose a risk to human health or safety in that county or on those tribal lands and to seek information and advice from counties or tribal governments on these matters;

(b) "large game species" means deer, elk, mountain sheep, moose, antelope, and mountain goats; and

(c) "large predators" means bears, mountain lions, and wolves.

History: En. Sec. 1, Ch. 212, L. 2003; amd. Sec. 1, Ch. 275, L. 2009; amd. Sec. 2, Ch. 71, L. 2011; amd. Sec. 1, Ch. 414, L. 2011; amd. Sec. 1, Ch. 163, L. 2013; amd. Sec. 6, Ch. 76, L. 2017; amd. Sec. 1, Ch. 333, L. 2025; amd. Sec. 6, Ch. 649, L. 2025.

2025 Amendments — Composite Section: See 2025 Session Law for amendment made by sec. 1, Ch. 333, L. 2025. Amendment effective October 1, 2025.

See 2025 Session Law for amendment made by sec. 6, Ch. 649, L. 2025. Amendment effective July 1, 2025.

87-1-218. Notice of proposed land acquisitions. (1) For all land acquisitions proposed pursuant to 87-1-209, the department shall provide notice to the board of county commissioners in the county where the proposed acquisition is located.

(2) The notice must be provided at least 30 days before the proposed acquisition appears before the commission or the board for its consent.

(3) The notice must include:

(a) a description of the proposed acquisition, including acreage and the use proposed by the department;

(b) an estimate of the measures and costs the department plans to undertake in furtherance of the proposed use, including operating, staffing, and maintenance costs;

(c) an estimate of the property taxes payable on the proposed acquisition and a statement that if the department acquires the land pursuant to 87-1-603, the department would pay a sum equal to the amount of taxes that would be payable on the county assessment of the property if it was taxable to a private citizen; and

(d) a draft agenda of the meeting at which the proposed acquisition will be presented to the commission or the board and information on how the board of county commissioners may provide comment.

(4) For all land acquisitions of 640 acres or more proposed pursuant to 87-1-209, the department shall:

(a) conduct a public scoping process to identify issues and concerns as the initial phase of an environmental review pursuant to Title 75, chapter 1, part 2;

(b) provide the public with sufficient notice of the proposed acquisition and an opportunity to provide input on reasonable alternatives, mitigation alternatives, mitigation measures, issues, and potential impacts to be addressed in the environmental review; and

(c) respond to comments received during the public scoping process as part of the environmental review document.

History: En. Sec. 7, Ch. 485, L. 2009; amd. Sec. 28, Ch. 235, L. 2013; amd. Sec. 1, Ch. 326, L. 2015.

87-1-219 and 87-1-220 reserved.

87-1-221. Acquisition, importation, and propagation of fish and game — waterfowl food. The department may:

(1) acquire by gift, purchase, capture, or otherwise any fish, game, game birds, or animals for propagation, experimental, or scientific purposes;

(2) provide for the importation of game birds and game and fur-bearing animals and for the protection, propagation, and distribution of imported or native birds and animals;

(3) use fish and game funds necessary for the construction, maintenance, operation, upkeep, and repair of fish hatcheries or other property or means and appliances for the protection and propagation of fish, game and fur-bearing animals, or game or nongame birds;

(4) appropriate money from the funds at its disposal for the extermination or eradication of predatory animals that destroy fish, game or fur-bearing animals, or game or nongame birds;

(5) spend fish and game funds necessary to introduce and propagate wild waterfowl food and for that purpose may secure expert advice as to what kinds of waterfowl foods are adapted to the climate, soil, and waters of this state.

History: En. 26-104.4 by Sec. 5, Ch. 511, L. 1973; amd. Sec. 13, Ch. 417, L. 1977; R.C.M. 1947, 26-104.4; amd. Sec. 79, Ch. 7, L. 2001; amd. Sec. 132, Ch. 114, L. 2003.

Cross-References

Predator control, Title 81, ch. 7, part 1.

Construction and maintenance of hatcheries, 87-3-201.

87-1-222. Construction and maintenance of fish hatcheries and fish ladders. (1) The department shall furnish plans for, direct, and compel the construction, installation, and repair of fish ladders upon dams and other obstructions in streams. The fish ladders shall be installed and maintained at the expense of the owners of the dam or other obstruction.

(2) The department may purchase and maintain, at the expense of the state fish and game fund, suitable fish screens, fish wheels, or other devices to install in irrigating ditches to prevent fish entering said ditches.

(3) The department may locate, lay out, construct, and maintain nurseries and rearing ponds where fry can be planted, propagated, and reared to be distributed in the waters of this state. The department may spend from fish and game funds sums necessary for this purpose.

History: En. 26-104.5 by Sec. 6, Ch. 511, L. 1973; amd. Sec. 13, Ch. 417, L. 1977; R.C.M. 1947, 26-104.5.

Cross-References

Propagation and distribution of fry or fingerlings, 87-3-201, 87-3-202.

87-1-223. Control of state waters for propagation of fish. The department may control the waters of any lake, pond, or stream that lies wholly within the limits of land owned by the state so far as the use of that lake, pond, or stream for the breeding and propagation of game fish is concerned. Before the right to control any lake, pond, or stream inures to the department, the department shall notify the department of natural resources and conservation that the lake, pond, or stream is wanted for that purpose, giving a description of the land by legal subdivision when surveyed or a sufficient general description when not so surveyed. The department of natural resources and conservation shall make that entry upon its books and maps to serve as notice to a lessor or purchaser of the right claimed by the state in the lake, pond, or stream. The department of natural resources and conservation shall notify a lessor, purchaser, or applicant to lease or purchase of the fact that a right to the use of the lake, pond, or stream is claimed. This right may not continue for more than 1 year after the land is sold by the state. If the right to the control of a lake, pond, or stream lessens the value of that land or prevents the ready sale of it, the right granted to the department may be terminated upon giving 60 days' notice of the termination to the department.

Protection of fishing streams against construction and hydraulic projects, Title 87, ch. 5, part 5.

87-1-224. Destruction of beaver and beaver dams for protection of public health. (1) When a complaint is made to the department of environmental quality that beaver are obstructing the free flow of a stream flowing through a settled area and into which stream sewage of a town or city is dumped and the obstruction endangers public health, the department of environmental quality shall immediately investigate the complaint. If it finds that the work of the beaver endangers public health, it shall report the facts to the department.

(2) The department shall immediately issue a permit, free of charge, to the landowner upon whose land the beaver dams are located for the removal of the beaver, the number of which must be designated by the warden making the inspection. The landowner shall remove all beaver and beaver dams as provided by the permit within 10 days after its issuance. If the

landowner refuses to remove the beaver or the dams in the 10-day period or if the landowner does not desire to do so and so advises the department, then the department may remove the beaver by trapping or transplanting and remove their dam by blasting or other means.

(3) The department shall furnish all labor needed to blast out or otherwise remove the beaver dams. Necessary explosives must be furnished by the county in which the beaver dams are located.

History: En. 3722(A), R.C.M. 1935 by Sec. 1, Ch. 173, L. 1943; amd. Sec. 32, Ch. 511, L. 1973; amd. Sec. 13, Ch. 417, L. 1977; R.C.M. 1947, 26-402; amd. Sec. 2, Ch. 218, L. 1979; amd. Sec. 485, Ch. 418, L. 1995.

General power and duties of Department of Public Health and Human Services, 50-1-202.

87-1-225. Regulation of wild animals damaging property — public hunting requirements. (1) Subject to the provisions of subsection (2), a landowner is eligible for game damage assistance under subsection (3) if the landowner:

(a) allows public hunting during established hunting seasons; or

(b) does not significantly reduce public hunting through imposed restrictions.

(2) The department may provide game damage assistance when public hunting on a landowner's property has been denied because of unique or special circumstances that have rendered public hunting inappropriate.

(3) Within 48 hours after receiving a request or complaint from any landholder or person in possession and having charge of any land in the state that wild animals of the state, protected by the fish and game laws and regulations, are doing damage to the property or crops on the property, the department shall investigate and arrange to study the situation with respect to damage and depredation. The department may then decide to open a special season on the game or, if the special season method is not feasible, the department may destroy the animals causing the damage. The department may authorize and grant the holders of the property permission to kill or destroy a specified number of the animals causing the damage. A wild, ferocious animal damaging property or endangering life is not covered by this section.

History: En. Sec. 1, Ch. 60, L. 1957; amd. Sec. 13, Ch. 417, L. 1977; R.C.M. 1947, 26-135; amd. Sec. 1, Ch. 569, L. 1987; amd. Sec. 1, Ch. 568, L. 1989; amd. Sec. 2835, Ch. 56, L. 2009.

87-1-227. Hunting rights on adjoining federal wildlife preserve. (1) The department shall negotiate for and enter into written agreements with owners, lessors, lessees, or others having control of areas, tracts, or parcels of land adjoining or contiguous to any United States federal wildlife preserve, including any wildlife refuge for migratory waterfowl in any section of Montana, for the purpose of securing equal hunting and shooting rights for all resident holders of fish and game licenses in Montana on such adjoining and contiguous lands and preventing such preserves from being surrounded by lands whereon such licensees may not enter. The department shall, further, open or cause to be opened to public hunting and shooting of migratory waterfowl on any roads, lanes, and trails not a part of the traveled portion of any federal-aid highway system within a 1-mile limit from the boundaries of any such preserve or refuge. The department shall cause any such area, tract, road, lane, or trail to be plainly posted with clear signs showing the boundaries of the areas, tracts, roads, lanes, or trails open to shooting and hunting by licensees.

(2) The department is hereby authorized to negotiate the payment of a reasonable sum to landowners, lessors, or lessees for the right of the department to create a public shooting area upon their lands. The amount that may be paid for such purpose shall rest in the discretion of the department.

History: **En. Secs. 1, 2, Ch. 224, L. 1943; amd. Sec. 13, Ch. 417, L. 1977; R.C.M. 1947, 26-1120, 26-1121.**

87-1-228. Agreement with Indians concerning hunting and fishing — Indian treaty of 1855. (1) Whereas, by treaty of July 16, 1855, between the United States of America and the confederated tribes of the Flathead, Kootenai, and Upper Pend Oreille Indians, the tribes have certain rights to fish and hunt; and whereas, it appears to be to the common advantage of the state and Indian tribes to cooperate in matters involving hunting and fishing. Therefore, the department may negotiate and conclude an agreement with the council of the Confederated Salish and Kootenai tribes of the Flathead Indian reservation for the purpose of:

(a) authorizing individuals to serve on a state-tribal cooperative board to develop hunting and fishing regulations and reimbursing those individuals' expenses pursuant to 2-18-501 through 2-18-503;

(b) doing what in its judgment is necessary by way of granting to tribal Indians state permits to hunt and fish off reservation on open and unclaimed lands, to be issued without charge to the Indians, or allowing Indians to hunt without licenses, permits, or stamps;

(c) issuing jointly with the council hunting and fishing licenses, permits, and stamps under terms established by mutual agreement and recognized as valid for hunting and fishing throughout the state. These joint licensing and permit requirements supersede the general licensing and permit requirements set forth in this title.

(d) authorizing all revenue collected from sale of joint licenses, permits, and stamps to be remitted to the council for the purpose of a fish and wildlife program;

(e) transferring to the council an amount equal to all fines and restitution collected in state court for fish and wildlife violations within reservation boundaries for use in a fish and wildlife program;

(f) policing Indian and other lands for the protection of fish and game and providing responsibility for redress of fish and game violations to state or tribal courts; and

(g) in general carrying out the purposes of this section.

(2) Any agreement entered into under subsection (1) must also satisfy the requirements of Title 18, chapter 11.

(3) Any tribal court judgment for a fish and game violation arising out of an agreement under this section is entitled to full faith and credit in the courts of Montana.

(4) Prior to concluding any agreement under this section, the department shall hold public meetings, after proper public notice of the meetings has been given and the proposed agreement has been made available for public review, to afford an opportunity to comment on the contents of the agreement.

87-1-241. Acquisition of wildlife habitat — rules. (1) Before acquisition of any interest in land for the primary purpose of securing wildlife habitat the commission shall by rule establish a policy for making such acquisitions. With regard to any specific acquisition the policy shall provide for a comprehensive analysis of:
(a) the wildlife populations and use currently associated with the property;
(b) the potential value of the land for protection, preservation, and propagation of wildlife;
(c) management goals proposed for the land and wildlife populations, and where feasible, any additional uses of the land such as livestock grazing or timber harvest;
(d) any potential impacts to adjacent private land resulting from proposed management goals, and plans to address such impacts;
(e) any significant potential social and economic impacts to affected local governments and the state, including but not limited to impacts on:
(i) tax revenue available for the operation of taxing jurisdictions within the county;
(ii) services required to be provided by local governments;
(iii) employment opportunities within the counties;
(iv) local schools; and
(v) private businesses supplying goods and services to the community;
(f) a land maintenance program to control weeds and maintain roads and fences; and
(g) any other matter considered necessary or appropriate by the commission.

(2) The analysis made of any proposed acquisition must be made available for review by each owner of land adjacent to the property that is the subject of analysis, and to any member of the public. A public hearing must be held in the affected area after the analysis has been made available to the public.

History: En. Sec. 1, Ch. 598, L. 1987; amd. Sec. 1, Ch. 515, L. 1989.

87-1-242. Funding for wildlife habitat. (1) The amount of money specified in this subsection from the sale of each hunting license or permit listed must be used exclusively by the commission to secure, develop, and maintain wildlife habitat, subject to appropriation by the legislature:

(a) Class B-10, nonresident combination, $77;
(b) Nonresident antelope, $20;
(c) Nonresident moose, $20;
(d) Nonresident mountain goat, $20;
(e) Nonresident mountain sheep, $20;
(f) Class D-1, nonresident mountain lion, $20;
(g) Nonresident black bear, $20;
(h) Nonresident wild turkey, $10;
(i) Class AAA, combination sports, $7;
(j) Class B-11 nonresident deer combination, $200.

(2) Twenty percent of any increase in the fee for the Class B-7 license or any license or permit listed in subsection (1) must be allocated for use as provided in subsection (1).

(3) Eighty percent of the money allocated by this section, together with the interest and income from the money, must be used to secure wildlife habitat pursuant to 87-1-209.

(4) Twenty percent of the money allocated by this section must be used as follows:

(a) up to 50% a year may be used for development and maintenance of real property used for wildlife habitat; and

(b) the remainder and any money not allocated for development and maintenance under subsection (4)(a) by the end of each odd-numbered fiscal year must be credited to the account created by 87-1-601(5) for use in the manner prescribed for the development and maintenance of real property used for wildlife habitat.

87-1-243 through 87-1-245 reserved.

87-1-246. *(Temporary)* **Funding of upland game bird enhancement program.** The amount of money specified in this section from the sale of each hunting license listed must be used exclusively by the department to preserve and enhance upland game bird populations in Montana in accordance with 87-1-246 through 87-1-249, subject to appropriation by the legislature:

(1) Class A-1, resident upland game bird, $2;
(2) Class B-1, nonresident upland game bird, $23;
(3) Class B-2, 3-day nonresident upland game bird, $10;
(4) Class AAA, combination sports, $2; and
(5) Class B-10, nonresident big game combination, $23.

87-1-246. *(Effective March 1, 2026)* **Funding of upland game bird enhancement program.** The amount of money specified in this section from the sale of each hunting license listed, excluding discounted licenses sold under 87-2-514, 87-2-522, 87-2-525, 87-2-526, 87-2-801, 87-2-803, and 87-2-805(1) and (2), must be used exclusively by the department to preserve and enhance upland game bird populations in Montana in accordance with 87-1-246 through 87-1-249, subject to appropriation by the legislature:

(1) Class A-1, resident upland game bird, $4.50;
(2) Class B-1, nonresident upland game bird, $40;
(3) Class B-2, 3-day nonresident upland game bird, $20;
(4) Class AAA, combination sports, $4.50; and
(5) Class B-10, nonresident big game combination, $40.

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 1, Ch. 676, L. 2025. Amendment effective March 1, 2026.

87-1-247. Upland game bird enhancement program — authorized use of funds. (1) Subject to subsection (2), revenue dedicated to the upland game bird enhancement program pursuant to 87-1-246 must be used by the department to:

(a) prepare and disseminate information to landowners and organizations concerning the upland game bird enhancement program;

(b) review potential upland game bird release sites;

(c) assist applicants in preparing management plans for project areas;

(d) evaluate the upland game bird enhancement program;

(e) develop a strategic plan pursuant to 87-1-251(2)(a);

(f) develop, enhance, and conserve upland game bird habitat in Montana; and

(g) establish and assist an upland game bird citizens' advisory council pursuant to 87-1-251.

(2) As far as practicable, expenditures made pursuant to subsection (1) must be prioritized by administrative region based on need, taking into consideration any biological, recreational, or economic benefit and the objectives established in a strategic plan developed pursuant to 87-1-251(2)(a).

History: En. Sec. 2, Ch. 636, L. 1987; amd. Sec. 2, Ch. 232, L. 1989; amd. Sec. 1, Ch. 365, L. 2001; amd. Sec. 1, Ch. 306, L. 2009; amd. Sec. 1, Ch. 121, L. 2023.

87-1-248. Qualification of upland game bird enhancement projects. (1) A project eligible for funding under the upland game bird release program must contain the proper combination of winter cover, food, nesting cover, and other upland game bird habitat components determined necessary to provide for establishment of a viable upland game bird population.

(2) A project eligible for funding under the habitat enhancement program must include assistance to applicants in the establishment of suitable nesting cover, winter cover, or feeding areas through cost sharing, leases, or conservation easements.

(3) A project containing hunting preserves or any commercial hunting enterprise or in which hunting rights are leased or paid for is not eligible for funding.

(4) Preference must be given for project applications submitted by youth organizations, 4-H clubs, sports groups, and other associations of sufficient size to guarantee completion of all project requirements. However, individual landowners may also apply, as long as the land in the project area remains open to public hunting in accordance with reasonable use limitations imposed by the landowner.

(5) (a) Except when a greater amount, up to $200,000, is authorized by the commission, a project may not receive more than $100,000 in funds collected under 87-1-246.

(b) Total purchases of equipment, land, and buildings under the habitat enhancement program may not exceed $25,000 for each project.

(c) The construction of wells, pipelines, or roads using funds collected under 87-1-246 is only allowed on a cost-share basis, when the applicant pays at least 50% of the funded costs.

(d) Any equipment purchased with funds collected under 87-1-246 remains the property of the department.

(e) A shelterbelt may not be constructed within 400 feet of any residential building or building occupied by livestock.

(f) Funds collected under 87-1-246 may be expended for supplemental feeding programs that are authorized by the department.

History: En. Sec. 3, Ch. 636, L. 1987; amd. Sec. 3, Ch. 232, L. 1989; amd. Sec. 2, Ch. 365, L. 2001.

87-1-249. Rules. (1) The department shall adopt rules for the administration of the upland game bird enhancement program created in 87-1-246 through 87-1-249.

(2) The rules must:

(a) provide for eligibility criteria for project applications, including project evaluation criteria that incorporate the following factors:

(i) proposed project acreage of suitable size;

(ii) proposed project acreage and adjoining lands that are suitable for upland game bird habitat;

(iii) evidence that existing and potential species will benefit from the project;

(iv) the number of acres that will be open to and suitable for public bird hunting under the proposal; and

(v) in addition to the criteria in subsections (2)(a)(i) through (2)(a)(iv), preference to proposed projects with:

(A) longer contract length and larger landowner cost share;

(B) lands with special or unique components, such as wetlands; and

(C) a landowner history of providing hunter access and habitat enhancement;

(b) be consistent with general requirements of the federal conservation reserve program, the agricultural conservation program, and hunting access programs established pursuant to 87-1-265 so that landowners who participate in those programs may also be eligible for participation in the upland game bird enhancement program;

(c) specifically indicate specifications under which upland game birds will be released in project areas, including but not limited to:

(i) habitat requirements;

(ii) number of upland game birds to be released;

(iii) health requirements;

(iv) banding requirements;

(v) time for release;

(vi) age of birds to be released; and

(vii) reimbursement amount for each bird released;

(d) establish application procedures for project funding and review and for approval or denial of applications; and

(e) establish project monitoring and reporting procedures, including a requirement that payments for projects authorized pursuant to 87-1-247 be supported by contracts, invoices, receipts, or other supporting documentation.

History: En. Sec. 4, Ch. 636, L. 1987; amd. Sec. 4, Ch. 232, L. 1989; amd. Sec. 3, Ch. 365, L. 2001; amd. Sec. 2, Ch. 63, L. 2019.

87-1-250. Upland game bird enhancement program — report. The department shall report to each regular session of the legislature, in accordance with 5-11-210, concerning upland game bird enhancement activities undertaken pursuant to 87-1-246 through 87-1-249 and 87-1-251 during the preceding biennium, including providing:

(1) copies of reports made to the upland game bird citizens' advisory council pursuant to 87-1-251(2)(b); and

(2) any recommendations concerning the operation of the program.

History: En. Sec. 9, Ch. 636, L. 1987; amd. Sec. 5, Ch. 232, L. 1989; amd. Sec. 2, Ch. 306, L. 2009; amd. Sec. 125, Ch. 261, L. 2021.

87-1-251. Upland game bird enhancement program — advisory council. (1) There is an upland game bird citizens' advisory council consisting of 12 members appointed by the director and serving staggered 4-year terms. The 12 members must include a public member representing each of the department's administrative regions. Council membership must include:

(a) an upland game bird hunter;

(b) a local chamber of commerce representative;

(c) a conservationist;

(d) an upland game bird biologist;

(e) at least two landowners, one of whom must be enrolled in the block management program; and

(f) a senator and a representative from different political parties.

(2) The council shall meet at least once each year but not more than once each month as necessary to:

(a) advise the department on the development and maintenance of a 10-year strategic plan that at a minimum:

(i) defines quantifiable goals, objectives, and performance measurements for the upland game bird enhancement program based on need by administrative region, taking into consideration any biological, recreational, or economic benefit, including the prioritization of at-risk upland game bird species and their associated habitats;

(ii) establishes regional and statewide priorities for the development of upland game bird habitat based on land management needs, sustaining upland game bird populations, and landowner input;

(iii) prioritizes resource allocation, including funding and personnel, in accordance with objectives and goals established pursuant to this subsection (2)(a);

(iv) promotes landowner outreach and relations with both private and public landowners;

(v) provides for the ongoing monitoring of, access to, and signage for upland game bird enhancement projects, as well as the renewal or replacement of expiring projects; and

(vi) develops strategies to ensure the effective release of upland game birds and use of funding for upland game bird releases; and

(b) provide ongoing monitoring of upland game bird enhancement program activities, including but not limited to receipt from the department of an annual:

(i) activity report to evaluate whether objectives, goals, and performance measurements established pursuant to subsection (2)(a) are being met or are expected to be met;

(ii) financial report, providing a summary of revenue and expenditures for the upland game bird enhancement program and any unreserved balance remaining at the end of the fiscal year from fees collected pursuant to 87-1-246; and

(iii) report reviewing whether upland game bird enhancement project contracts are in compliance with 87-1-248 and rules adopted pursuant to 87-1-249.

(3) The council may recommend rules for adoption by the department.

(4) Each member of the council is entitled to receive compensation as provided in 2-15-122 and travel expenses as provided in 2-18-501 through 2-18-503 for each day spent on official council business. Council members who conduct official council business in their city of residence are entitled to receive a midday meal allowance as provided in 2-18-502.

(5) The department shall provide administrative support as necessary to assist the advisory council in its duties pursuant to this section.

History: En. Sec. 3, Ch. 306, L. 2009; amd. Sec. 8, Ch. 603, L. 2023.

87-1-252 through 87-1-254 reserved.

87-1-255. Purpose. The legislature finds that the conservation of rivers and their fisheries is of vital social and economic importance to Montana. The legislature further finds that some of our state's rivers and fisheries are diminished in value by water pollution, water shortages, and riparian erosion and that there is a need for a program to promote the beneficial use and productivity of our river systems. The legislature further finds that establishment of a river restoration program, funded by anglers from across the state and nation, is a sound and proper method to help ensure that the rivers and fisheries that anglers and others have treasured for Montana's first 100 years will continue to serve the state and its people.

History: En. Sec. 1, Ch. 601, L. 1989.

Cross-References

Recreational use of streams, Title 23, ch. 2, part 3.
Water resources, Title 85, ch. 1.

87-1-256. Definitions. As used in 87-1-255 through 87-1-259, the following definitions apply:

(1) "Account" means the river restoration account provided for in 87-1-258.

(2) "Associated lands" means the beds, banks, and immediately adjacent lands associated with a river.

(3) "Department" means the department of fish, wildlife, and parks provided for in 2-15-3401.

(4) "Program" means the river restoration program provided for in 87-1-257.

(5) "Restoration" means to restore to a good condition, regenerate, or make over in an improved form.

(6) "River" means a river, stream, creek, or other naturally occurring body of flowing water.

History: **En. Sec. 2, Ch. 601, L. 1989.**

87-1-257. River restoration program. (1) The department shall administer a river restoration program.

(2) The program may consist of physical projects to improve rivers and their associated lands in order to conserve and enhance fish and wildlife habitat, including but not limited to a change in appropriation right or leasing of water rights under 85-2-436.

(3) The department shall work cooperatively with individuals, conservation districts, and state, local, private, tribal, and federal organizations to achieve the goals of the program and may contract with private organizations to implement specific river restoration projects.

(4) The department shall present projects to the local conservation district for review and recommendations and obtain any applicable permits.

(5) The department shall receive the consent of the landowner or lessee of any associated lands before initiating physical projects on these lands.

(6) A project conducted under the program may not restrict or interfere with the exercise of any water right.

History: **En. Sec. 3, Ch. 601, L. 1989; amd. Sec. 3, Ch. 175, L. 1993; amd. Sec. 7, Ch. 448, L. 2007.**

87-1-258. River restoration account. (1) There is a river restoration special revenue account administered by the department within the state special revenue fund established in 17-2-102.

(2) There must be deposited in the account:

(a) all proceeds earmarked for this account under 87-2-301, 87-2-302, and 87-2-711; and

(b) money received by the department in the form of gifts, grants, reimbursements, or appropriations from any source intended to be used for the purposes of this account.

(3) The department may spend funds in the account only to carry out the program provided for in 87-1-257.

History: **En. Sec. 4, Ch. 601, L. 1989.**

87-1-259. Funding for river restoration account. The amount of money specified in this section from the sale of each of the following licenses must be deposited in the account provided for in 87-1-258:

(1) Class A—resident fishing license, 50 cents;

(2) Class B—nonresident fishing license, $1; and

(3) Class AAA—combination sports license, 50 cents.

History: **En. Sec. 5, Ch. 601, L. 1989; amd. Sec. 5, Ch. 263, L. 1995.**

87-1-260 and 87-1-261 reserved.

87-1-262. Montana block management enforcement network — rulemaking. (1) The Montana block management enforcement network is intended to establish a framework for assisting landowners enrolled in the block management program established under 87-1-265 with enforcing compliance by hunters with the landowner's rules and Montana law.

(2) Landowners enrolled in the block management program may opt-in to the Montana block management enforcement network.

(3) By electing to opt-in to the Montana block management enforcement network, a landowner does not waive any right to deny access to any property enrolled in the block

management program for cause. Additionally, a landowner may opt-out of the Montana block management enforcement network at any time and may allow an individual who is subject to the restrictions of subsection (4) to access the landowner's property.

(4) Individuals accessing lands enrolled in the Montana block management enforcement network shall adhere to all rules governing access to the block management property. Any conviction based on a violation of those rules or any provision of Titles 45 or 87 by an individual while accessing lands enrolled in the block management program must result in the following:

(a) for a first conviction, the individual shall be prohibited from accessing all lands participating in the Montana block management enforcement network for the remainder of the current license year;

(b) for a second conviction, the individual shall be prohibited from accessing all lands participating in the Montana block management enforcement network for up to 3 consecutive license years; and

(c) for a third conviction, the individual shall be prohibited from accessing all lands participating in the Montana block management enforcement network for life.

(5) The department shall provide educational information to individuals accessing private property under the block management program regarding the requirement to adhere to all rules governing access to those private lands and the consequences for violating those rules on private property enrolled in the Montana block management enforcement network.

(6) The commission may adopt rules to implement the provisions of this section.

History: En. Sec. 1, Ch. 402, L. 2025.

Compiler's Comments

Effective Date: This section is effective October 1, 2025.

87-1-263. Veterans' preference for reserving certain block management areas on Veterans' Day. (1) Subject to the provisions of subsections (2) and (3), on Veterans' Day, veterans may be given preference to use block management areas that require a reservation.

(2) A reservation by a veteran to use a block management area pursuant to subsection (1) must be made at least 1 week in advance of Veterans' Day and in accordance with the existing reservation system for that area.

(3) A person who makes a reservation pursuant to this section shall carry proof of the person's veteran status, such as a DD form 214, U.S. department of veterans affairs identification card, or a driver's license indicating the person's veteran status, while hunting on the block management area for which the reservation was made. The person also shall make proof of the person's veteran status available for review by an employee or authorized officer of the department upon request.

(4) The department shall conduct random verification of the veteran status of persons making reservations pursuant to this section.

(5) The department may adopt rules to implement the provisions of this section.

History: En. Sec. 1, Ch. 188, L. 2017.

87-1-264. Expenditure of hunting access program funds on weed control. The legislature recognizes that the hunting access programs authorized in 87-1-265 successfully encourage landowners to increase public access to private and public lands for purposes of hunting, but that increased public access may also contribute to an increase in the spread of noxious weeds on public and private lands. Therefore, in an effort to improve management and services related to those programs, the department may offer up to 5% in additional incentive payments above the maximum annual payment established in 87-1-265 to landowners who agree to use those additional payments for specific weed management activities on lands under their control.

History: En. Sec. 26, Ch. 407, L. 2001; amd. Sec. 3, Ch. 63, L. 2019.

87-1-265. Hunting access programs — block management program — private landowner assistance — rules — restriction on landowner liability. (1) There is established a block management program administered by the department to provide landowner assistance that encourages public access to private and public lands for hunting purposes.

(2) The department may also develop and administer alternative programs to the block management program that are designed to promote public access to private and public lands for hunting purposes.

(3) Participation in a hunting access program established under this section is voluntary. A lease, acquisition, or other arrangement for public access to or across private property for hunting purposes must be negotiated through a cooperative agreement between the landowner and the department that will guarantee reasonable access for public hunting. Landowners may also form a voluntary association when development of a unified cooperative agreement is advantageous. A cooperative agreement must contain a detailed description of the conditions for use of the private property, including but not limited to:

(a) hunting access management;

(b) services to be provided to the public;

(c) ranch rules and other restrictions; and

(d) any other management information to be gathered, which must be made available to the public.

(4) Private land is not eligible for inclusion in a hunting access program if outfitting, commercial hunting, or fees charged for private hunting access unreasonably restrict public hunting opportunities.

(5) If the department determines that an agreement may adversely influence game management decisions or wildlife habitat on public lands, then other public land agencies, interested sportspersons, and affected landowners must be consulted. An affected landowner's management goals and personal observations regarding game populations and habitat use must be considered in development of the agreement.

(6) The commission may adopt rules to implement the provisions of this section, including but not limited to rules that determine tangible benefits to be provided to a landowner who participates in a hunting access program. Benefits are intended to offset potential impacts associated with public hunting access, including but not limited to those associated with general ranch maintenance, conservation efforts, weed control, fire protection, liability insurance, roads, fences, and parking area maintenance. Factors used in determining benefits may include but are not limited to:

(a) the number of days of public hunting provided by a participating landowner;

(b) wildlife habitat provided;

(c) resident game populations;

(d) number, sex, and species of animals taken; and

(e) access provided to adjacent public lands.

(7) For a proposed agreement that only provides access to adjacent public lands for hunting purposes, the department shall:

(a) notify adjacent public land leaseholders;

(b) ensure the proposed agreement does not violate or interfere with the terms of any adjacent public land lease agreement;

(c) incorporate the relevant terms of an adjacent public land lease agreement into the proposed access agreement; and

(d) allow an adjacent public land leaseholder the opportunity to support or object to the proposed access agreement.

(8) In considering a proposed agreement that only provides access to adjacent public lands for hunting purposes, the commission may:

(a) consider an adjacent leaseholder's support for or objection to a proposed access agreement;

(b) exempt the access agreement from tracking the number of days of public hunting access provided by a participating landowner;

(c) agree to a payment to the landowner that is a flat fee rate and not based on the number of days of public hunting access provided by a participating landowner;

(d) use the amount and opportunity provided by public lands access as factors to determine benefits; and

(e) otherwise implement simplified rules.

(9) (a) Benefits earned by a landowner who participates in a hunting access program may include but are not limited to those applied in the manner described in subsections (9)(b) and (9)(c).

(b) A landowner may receive direct payments:

(i) for weed control or may direct payments to be made directly to the county weed control board;

(ii) for fire protection or may direct fire protection payments to be made to the local fire district or the county where the landowner resides; and

(iii) to offset insurance costs incurred for allowing public hunting access.

(c) The department may provide assistance in the construction and maintenance of roads, gates, and parking facilities and in the signing of property.

(10) (a) Except as provided in 87-1-264 and subsection (10)(b) of this section, payments to a landowner who participates in a hunting access program through an annual agreement may not exceed $50,000 a year, and $25,000 a year for agreements that only provide access to public land for hunting purposes.

(b) Each landowner who participates in a unified cooperative agreement pursuant to subsection (3) may be eligible for payments not to exceed $50,000 a year, and $25,000 a year for agreements that only provide access to public land for hunting purposes.

(11) The restriction on liability of a landowner, agent, or tenant that is provided under 70-16-302(1) applies to a landowner who participates in a hunting access program.

History: En. Sec. 1, Ch. 459, L. 1995; amd. Sec. 1, Ch. 216, L. 2001; amd. Sec. 4, Ch. 63, L. 2019; amd. Sec. 2, Ch. 552, L. 2021; amd. Sec. 1, Ch. 230, L. 2023; amd. Sec. 1, Ch. 527, L. 2025.

Cross-References

Entry on private land — policy, 87-1-229.

87-1-266. *(Temporary)* **License benefits for landowners enrolled in block management program — rulemaking.** (1) As a benefit for enrolling property in the block management program established in 87-1-265, a resident landowner may receive one conservation license and one Class AAA combination sports license and the necessary prerequisites, without charge, if the landowner is the owner of record. The licenses may be used for the full hunting or fishing season in any district where they are valid. The licenses may not be transferred by gift or sale.

(2) As a benefit for enrolling property in the block management program, a nonresident landowner may receive one conservation license and one Class B-10 nonresident big game combination license and the necessary prerequisites, without charge, if the landowner is the owner of record. The licenses may be used for the full hunting or fishing season in any district where they are valid. The licenses may not be transferred by gift or sale. The grant of a license under this subsection also qualifies the licensee to apply for a permit through the normal drawing process. The grant of a license under this subsection does not affect the limits established under 87-2-505.

(3) (a) Instead of receiving the benefits provided in subsection (1) or (2), a landowner of record who enrolls in the block management program may designate an immediate family member or employee to receive, without charge, a conservation license and the necessary prerequisites and:

(i) a Class AAA combination sports license if the designated person is a resident; or

(ii) a Class B-10 nonresident big game combination license if the designated person is a nonresident.

(b) For purposes of this subsection (3), an immediate family member means a parent, grandparent, child, or grandchild of the cooperator by blood or marriage, a spouse, a legally adopted child, a sibling of the cooperator or spouse, or a niece or nephew.

(c) For purposes of this subsection (3), the term "employee" means a person who works full time and year-round for the landowner as part of the active farm or ranch operation enrolled in the block management program.

(d) An immediate family member or employee who is designated to receive a license pursuant to this subsection (3) must be eligible for licensure under current Montana law and may not transfer the license by gift or sale.

(e) The grant of a Class B-10 nonresident big game combination license to an immediate family member or employee pursuant to this subsection (3) does not affect the limits established in 87-2-505.

(4) The department may by rule limit the overall number of licenses that can be provided to landowners pursuant to this section.

(5) For the purposes of this section, the term "necessary prerequisites" includes:

(a) the base hunting license established in 87-2-116;

(b) the aquatic invasive species prevention pass established in 87-2-130; and

(c) the conservation license established in 87-2-201.

87-1-266. *(Effective March 1, 2026)* **License benefits for landowners enrolled in block management program — rulemaking.** (1) As a benefit for enrolling property in the block management program established in 87-1-265, a resident landowner may receive one conservation license and one Class AAA combination sports license and the necessary prerequisites, without charge, if the landowner is the owner of record. The licenses may be used for the full hunting or fishing season in any district where they are valid. The licenses may not be transferred by gift or sale.

(2) As a benefit for enrolling property in the block management program, a nonresident landowner may receive one conservation license and one Class B-10 nonresident big game combination license and the necessary prerequisites, without charge, if the landowner is the owner of record. The licenses may be used for the full hunting or fishing season in any district where they are valid. The licenses may not be transferred by gift or sale. The grant of a license under this subsection also qualifies the licensee to apply for a permit through the normal drawing process. The grant of a license under this subsection does not affect the limits established under 87-2-505.

(3) (a) Instead of receiving the benefits provided in subsection (1) or (2), a landowner of record who enrolls in the block management program may designate an immediate family member, an employee, or a person with a developmental disability or a physical disability as determined by the department to receive, without charge, a conservation license and the necessary prerequisites and:

(i) a Class AAA combination sports license if the designated person is a resident; or

(ii) a Class B-10 nonresident big game combination license if the designated person is a nonresident.

(b) For the purposes of this subsection (3), the following definitions apply:

(i) "Developmental disability" means a developmental disability as defined in 53-20-102.

(ii) "Employee" means a person who works full-time and year-round for the landowner as part of the active farm or ranch operation enrolled in the block management program.

(iii) "Immediate family member" means a parent, grandparent, child, or grandchild of the cooperator by blood or marriage, a spouse, a legally adopted child, a sibling of the cooperator or spouse, or a niece or nephew.

(iv) "Physical disability" means a person experiencing a condition medically determined to be permanent and substantial and resulting in significant impairment of the person's functional ability.

(c) A person who is designated to receive a license pursuant to this subsection (3) must be eligible for licensure under current Montana law and may not transfer the license by gift or sale.

(d) The grant of a Class B-10 nonresident big game combination license to an immediate family member, an employee, or a person with a developmental disability or a physical disability as determined by the department pursuant to this subsection (3) does not affect the limits established in 87-2-505.

(4) The department may by rule limit the overall number of licenses that can be provided to landowners pursuant to this section.

(5) For the purposes of this section, the term "necessary prerequisites" includes:

(a) the base hunting license established in 87-2-116;

(b) the aquatic invasive species prevention pass established in 87-2-130; and

(c) the conservation license established in 87-2-201.

87-1-268. Repealed. Sec. 10, I.M. No. 161, Nov. 2, 2010.

History: En. Sec. 6, Ch. 459, L. 1995.

87-1-269. Private land/public wildlife advisory committee — duties — reports. (1) There is a private land/public wildlife advisory committee composed of persons interested in issues related to hunters, anglers, landowners, and outfitters, including but not limited to hunting access programs established pursuant to 87-1-265, the fishing access enhancement program, landowner-hunter relations, outfitting industry issues, public access land agreements, and other issues related to private lands and public wildlife. The committee must have broad representation of landowners, outfitters, and sportspersons. The department may provide administrative assistance as necessary to assist the private land/public wildlife advisory committee.

(2) The governor shall appoint the members of the private land/public wildlife advisory committee.

(3) (a) The private land/public wildlife advisory committee shall report to the governor and to each regular session of the legislature, in accordance with 5-11-210, regarding the success of various elements of the hunting access programs, including a report of annual landowner participation, the number of acres annually enrolled in the programs, hunter harvest success on enrolled lands, the number of qualified applicants who were denied enrollment because of a shortfall in funding, and an accounting of program expenditures, and make recommendations for funding, modification, or improvement needed to achieve the objectives of the programs. The department shall provide fiscal analyses of all hunting access program funding sources to the review committee for review and recommendations.

(b) The private land/public wildlife advisory committee shall report to the governor and to each regular session of the legislature, in accordance with 5-11-210, regarding the success of the fishing access enhancement program and make recommendations for funding, modification, or improvement needed to achieve the objectives of the program. The department shall provide fiscal analyses of all fishing access enhancement program funding sources to the review committee for review and recommendations.

(4) The private land/public wildlife advisory committee shall review public access land agreement proposals pursuant to 87-1-295 and recommend to the department whether to grant public access land agreements.

(5) The director may appoint additional advisory committees that are considered necessary to assist in the implementation of the hunting access programs, public access land agreements, and the fishing access enhancement program and to advise the commission regarding the development of rules implementing the hunting access programs, public access land agreements, and the fishing access enhancement program.

History: En. Sec. 7, Ch. 459, L. 1995; amd. Sec. 2, Ch. 544, L. 1999; amd. Sec. 3, Ch. 196, L. 2001; amd. Sec. 1, Ch. 48, L. 2005; amd. Sec. 1, Ch. 235, L. 2005; amd. Sec. 4, Ch. 471, L. 2005; amd. Sec. 6, Ch. 63, L. 2019; amd. Sec. 4, Ch. 296, L. 2019; amd. Sec. 126, Ch. 261, L. 2021.

87-1-270. Allocation of license fees to hunting access programs. (1) Except as provided in 87-2-514 and 87-2-805(3), the department shall use $55 from the sale of each Class B-1 nonresident upland game bird license and $25 from the sale of each Class B-2 3-day nonresident upland game bird license to encourage public access to private lands for hunting purposes in accordance with 87-1-265.

(2) The department shall use the hunting access fees collected pursuant to 87-2-116 to encourage public access to private and public lands for hunting purposes in accordance with 87-1-265.

History: **En. Sec. 5, Ch. 544, L. 1999; amd. Sec. 3, Ch. 216, L. 2001; amd. Sec. 1, Ch. 304, L. 2009; amd. Sec. 3, Ch. 204, L. 2013; amd. Sec. 4, Ch. 449, L. 2015; amd. Sec. 7, Ch. 63, L. 2019.**

87-1-271. Annual lottery of hunting licenses — proceeds dedicated to hunting access. (1) The commission may issue through a lottery one license each year for each of the following:

(a) deer;
(b) elk;
(c) shiras moose;
(d) mountain sheep;
(e) mountain goat;
(f) wild buffalo or bison;
(g) antelope; and
(h) mountain lion.

(2) The restriction in 87-2-702(4) that a person who receives a moose, mountain goat, or mountain sheep special license is not eligible to receive another license for that species for the next 7 years does not apply to a person who receives a license through a lottery conducted pursuant to this section.

(3) The commission shall establish rules regarding:
(a) the conduct of the lottery authorized in this section;
(b) the use of licenses issued through the lottery; and
(c) the price of lottery tickets.

(4) Except as provided in 87-2-903, all proceeds from a lottery conducted pursuant to this section must be used by the department for hunting access programs and law enforcement.

History: **En. Sec. 1, Ch. 471, L. 2005; amd. Sec. 1, Ch. 63, L. 2007; amd. Sec. 1, Ch. 298, L. 2011; amd. Sec. 8, Ch. 63, L. 2019.**

87-1-272. Future fisheries improvement program — funding priority — reports required. (1) In order to enhance future fisheries through natural reproduction, the department shall establish and implement a statewide voluntary program that promotes fishery habitats and spawning areas for the rivers, streams, and lakes of Montana's fisheries.

(2) When projects are suggested by the future fisheries review panel, the department shall, through a public hearing process and with the approval of the commission, prioritize projects that have been recommended by the review panel to be funded. Emphasis must be given to projects that enhance the historic habitat of native fish species. The department shall fund and implement the program regarding the long-term enhancement of streams and streambanks, instream flows, water leasing, lease or purchase of stored water, and other voluntary programs that deal with wild fish and aquatic habitats. A project conducted under the future fisheries improvement program may not restrict or interfere with the exercise of any water rights or property rights of the owners of streambeds and property adjacent to streambeds, streambanks, and lakes. The fact that a program project has been completed on private property does not create any right of public access to the private property unless that right is granted voluntarily by the property owner.

(3) The department shall work in cooperation with private landowners, conservation districts, irrigation districts, local officials, anglers, and other citizens to implement the future fisheries improvement program. Any department employee who is employed under this section to facilitate contact with landowners must have experience in commercial or irrigated agriculture. The department shall encourage the use of volunteer labor and grants, matching grants, and private donations to accomplish program purposes. The department may use contracted services:

(a) for negotiations with landowners, local officials, citizens, and others;
(b) for coordination with other agencies that may be involved in projects conducted under this section; and
(c) to perform and supervise project work.

(4) Funds expended under this section may be used only for projects for the protection of the fisheries resource that have been identified by the review panel established in 87-1-273 and approved by the commission and may not be used for the acquisition of any interest in land.

(5) (a) The department shall report to the commission on the progress of the future fisheries improvement program every 12 months and post a copy of the report on a state digital access system to ensure public access to the report.

(b) The department shall also present a detailed report to the legislature in accordance with 5-11-210 on the progress of the future fisheries improvement program. The legislative report must include the department's program activities and expenses since the last report and the project schedules and anticipated expenses for the ensuing 10 years' implementation of the future fisheries improvement program.

(c) In order to implement 87-1-273 and this section, the department may expend revenue from the future fisheries improvement program for up to two additional full-time employees.

History: En. Sec. 1, Ch. 463, L. 1995; amd. Sec. 5, Ch. 440, L. 1997; amd. Sec. 1, Ch. 183, L. 2007; amd. Sec. 118, Ch. 2, L. 2009; amd. Sec. 127, Ch. 261, L. 2021; amd. Sec. 30, Ch. 365, L. 2023.

87-1-273. Future fisheries review panel — purpose — appointment and duties. (1) The governor or governor's designee shall call for nominees for, accept and review recommendations for, and appoint a future fisheries review panel. The panel must consist of at least 13 members, including but not limited to:

(a) one member who is a representative of conservation districts;
(b) one member with expertise in commercial agriculture;
(c) one member with expertise in irrigated agriculture;
(d) one member from the private sector who is a fisheries restoration professional;
(e) two members who are licensed Montana anglers;
(f) one member of the house of representatives, chosen by the speaker of the house;
(g) one member of the senate, chosen by the committee on committees;
(h) one member with expertise in silviculture;
(i) one member who is a Montana high school student;
(j) one member with expertise in mining reclamation techniques;
(k) one member with expertise in fisheries; and
(l) one ex officio member from the Montana department of transportation who has experience in highway impacts mitigation.

(2) A member appointed to the review panel shall serve a 2-year term and may be reappointed.

(3) The purpose of the review panel is to:

(a) review, at least every 6 months, proposed projects that have been submitted by public or private entities for funding;

(b) determine what projects are eligible for inclusion in the future fisheries improvement program;

(c) approve or reject proposed projects; and

(d) forward a list of approved projects to the department.

(4) To be eligible for funding, a project must be generated at the local level and must be developed and presented to the review panel by the department, local landowners, conservation districts, or other interested citizens. Before consideration of any project that involves streambed or streambank restoration, a change in the use of water, or any other purpose that affects a particular property owner's interest in land or water, the review panel is required to find that the project is being proposed for funding with the voluntary approval of the participating property owner.

History: En. Sec. 2, Ch. 463, L. 1995; amd. Sec. 4, Ch. 529, L. 1999.

87-1-274. Emergency instream flows — funding. (1) The legislature recognizes the propriety of establishing voluntary leases or other authorized water augmentation measures for instream flows so that mechanisms will be in place to maintain streamflows sufficient for fisheries and aquatic resources during emergency low-flow conditions.

(2) Funding for voluntary leases and other water augmentation measures authorized under subsection (1) may come from any uncommitted funds allocated to the state under the U.S. fish and wildlife service state wildlife grant program or other available federal funds,

matched by the department with up to $500,000 from the future fisheries improvement program provided for in 87-1-272, from the native Montana fish species enhancement program provided for in 87-1-283, from the river restoration program provided for in 87-1-257, from a combination of funds from these programs, or from any other department funds available for voluntary leases or other water augmentation measures.

(3) All leasing or other authorized water augmentation measures for instream flow must comply with all requirements provided in Title 85, chapter 2, parts 3 and 4.

History: En. Sec. 1, Ch. 84, L. 2005; amd. Sec. 2, Ch. 299, L. 2013.

87-1-275. Annual lottery of hunting licenses — residents only. (1) For each deer or elk general license purchased by a resident, as defined in 87-2-102, the department shall award the resident one free chance in the lottery established by this section.

(2) The commission may issue one license each license year for one of the following:

(a) shiras moose;

(b) mountain sheep; or

(c) mountain goat.

(3) (a) The restriction in 87-2-702(4) that a person who receives a moose, mountain goat, or mountain sheep special license is not eligible to receive another license for that species for the next 7 years does not apply to a person who receives a license through a lottery conducted pursuant to this section.

(b) Residents participating in the lottery pursuant to this section may also participate in the lottery established in 87-1-271.

(4) The commission shall establish rules regarding:

(a) the conduct of the lottery authorized in this section;

(b) the use of licenses issued through the lottery; and

(c) the rotation between the three species each year.

History: En. Sec. 1, Ch. 267, L. 2023.

87-1-276. Purpose. The purpose of 87-1-277 through 87-1-279 and this section is to create a continuing program and mechanism to provide funding, through the department, to private shooting clubs, private organizations, local governments, and school districts for the establishment and improvement of a system of shooting ranges throughout Montana.

History: En. Sec. 1, Ch. 475, L. 1999.

87-1-277. Shooting range development grants. A private shooting club, private organization, unit of local government, or school district may seek a grant for a shooting range development project.

History: En. Sec. 2, Ch. 475, L. 1999.

87-1-278. Grant criteria. (1) An applicant for a grant pursuant to 87-1-277 shall provide matching funds in either cash or in-kind contributions. The match must represent $1 in value for each $1 of the grant. In-kind contributions include but are not limited to labor, materials, and real property. Existing assets and existing shooting range development may not apply to the match.

(2) An applicant that is a private shooting club or a private organization must be a nonprofit corporation pursuant to Title 35, chapter 2, with an organizational structure, officers, directors, and a registered agent.

(3) A grant must be used for the purchase of real property, earthwork, fixed improvements to existing shooting ranges or ranges being established, or reasonable grant application expenses. A grant may not be used for any expendable supplies for a shooting range.

(4) To be eligible for grant assistance, a private shooting club or a private organization:

(a) (i) shall accept in its membership any person who holds or is eligible to hold a Montana hunting license and who pays club or organization membership fees;

(ii) may not limit the number of members;

(iii) may charge a membership fee not greater than the per-member share of the club's or organization's reasonable cost of provision of services, including establishment, improvement, and maintenance of shooting facilities and other membership services; and

(iv) shall offer members occasional guest privileges at no cost to the member or invited guest and shall make a reasonable effort to hold a public sight-in day each September, when the general public may use the shooting range for a day-use fee or at no cost; or

(b) shall admit the general public for a reasonable day-use fee.

(5) A private shooting club, private organization, unit of local government, or school district that accepts a grant under 87-1-276, 87-1-277, 87-1-279, and this section shall provide the department with a future interest, providing that upon the discontinued use of its shooting range facility or its dissolution, the assets of the facility revert to the department. The department may hold the property indefinitely pending identification of a new entity to operate the facility. If a facility funded under 87-1-276, 87-1-277, 87-1-279, and this section is sold for a use other than a shooting range facility and the sale proceeds are not reinvested in another shooting range facility within 1 year of the sale, the entity that sells the facility shall reimburse the grant program for all funds received under 87-1-276, 87-1-277, 87-1-279, and this section.

(6) To be eligible for grant assistance, the applicant shall allow safe shooting of hunting arms. Hunting arms include shotguns, archery equipment, black powder arms, rifles, and pistols.

(7) An entity receiving a grant shall allow use of the facility by hunter education classes for no fee.

(8) A unit of local government or a school district shall compete on an equal basis with other applicants and shall provide access to its facility for a reasonable fee to any person holding or eligible to hold a Montana hunting license.

History: En. Sec. 3, Ch. 475, L. 1999.

87-1-279. Program rules. (1) The department may not use more than 15% of the program funds for administration.

(2) The department shall develop a simple application procedure and accountability system.

(3) The department shall make every effort to expend or obligate funds for shooting range improvement grants within the year for which they are appropriated.

(4) The department shall prioritize grant applications according to those that provide facilities for the greatest number of shooters, that accommodate the use of a combination of hunting arms, and that meet other criteria established by the department.

(5) The department may not grant more than 30% of the eligible funds for the establishment or improvement of any single facility in any year.

(6) The department shall promote the use of publicly owned land for shooting range facilities. The department may negotiate with federal, state, and local agencies to encourage land trades, shared or specific use designations, and other mechanisms to provide land for shooting range facilities.

History: En. Sec. 4, Ch. 475, L. 1999.

87-1-280 through 87-1-282 reserved.

87-1-283. Native Montana fish species enhancement program. (1) In order to enhance populations of native Montana fish species through habitat restoration, reductions in species competition, and natural reproduction, the department shall, through its future fisheries improvement program, restore habitats and spawning areas and reduce species competition in rivers, lakes, and streams for Montana's native fish species.

(2) In order to implement this section, the department may expend revenue from the native Montana fish species enhancement program for one additional full-time employee and one contractor to assist the review panel.

(3) The department shall also work with the department of transportation to implement enhancement of native Montana fish species by providing annual updates to the state transportation improvement program regarding possible additions to projects that will benefit the enhancement effort. State transportation improvement plan funds expended for native Montana fish species must be accounted for separately and reported annually.

History: En. Sec. 1, Ch. 529, L. 1999; amd. Sec. 1, Ch. 299, L. 2013.

87-1-284 reserved.

87-1-285. Fishing access enhancement program created — private landowner assistance to promote public fishing access — rules. (1) The department may establish programs of landowner assistance that encourage public access to and across private lands for purposes of fishing and may adopt rules to carry out program purposes. Rules may address but are not limited to incentives for private landowners who allow public fishing access on or across their lands, where legal access does not presently exist. Participation in the fishing access enhancement program is established through a cooperative agreement between a landowner and the department, including other resource management agencies when appropriate, that allows access for public fishing with certain restrictions or use rules.

(2) The department may also develop similar voluntary programs that are designed to promote public access across private lands for fishing purposes.

(3) Participation in a program established under subsection (1) is voluntary. Programs may not be structured in a manner that provides assistance to a private landowner who charges a fee for fishing access to private land that is enrolled in the program or who does not provide reasonable public fishing access to private land that is enrolled in the program. The commission shall develop criteria by which tangible benefits are allocated to participating landowners, and the department may distribute the benefits to participating landowners.

(4) Funds from the account established pursuant to 87-1-605 may be used to purchase or lease public fishing access at county road bridge crossings or for necessary parking facilities, trails, or ramps to facilitate fishing access to public waters at bridge crossings.

History: En. Sec. 1, Ch. 196, L. 2001.

87-1-286. Fishing access enhancement program — benefits for providing fishing access — cooperative agreement — factors for determining benefits earned — restriction on landowner liability. (1) As provided in 87-1-285, the department may establish and administer a voluntary program to enhance fishing access. The program must be designed to provide tangible benefits to participating private landowners who grant access to or across their land for public fishing.

(2) A contract for participation in the fishing access enhancement program is established through a cooperative agreement between the landowner and the department that will guarantee reasonable access for public fishing, which may include leases, easements, or rights-of-way to rivers, streams, ponds, or lakes on the landowner's property and leases or easements for access along the banks or shorelines of rivers, streams, ponds, or lakes on the property. Landowners may also form a voluntary association when development of a unified cooperative agreement is advantageous. A cooperative agreement must contain a detailed description of the plan developed by the landowner and the department and may include but is not limited to:

(a) fishing access management, which may include off-road parking, foot trails, and vehicle access roads;

(b) services to be provided to the public;

(c) landowner property rules and other restrictions;

(d) any other management information to be gathered, which must be made available to the public; and

(e) notice to adjacent landowners.

(3) If the department determines that the plan referred to in subsection (2) may adversely influence fish management decisions or fishing habitat on public lands, then other public land agencies, interested sportspersons, and affected landowners must be consulted. An affected landowner's management goals and personal observations regarding fish populations and habitat use must be considered in developing the plan.

(4) The commission shall develop rules for determining tangible benefits to be provided to a landowner for providing public fishing access. Benefits will be provided to offset potential impacts associated with public fishing access, including but not limited to those associated with general property maintenance, conservation efforts, weed control, fire protection, liability insurance, roads, fences, and parking area maintenance. Program priority must be given to properties that provide the greatest fishing access for the lowest costs. Factors used in determining benefits may include but are not limited to:

(a) the number of days of public fishing provided by a participating landowner;

(b) fish habitat provided; and

(c) access provided to adjacent public lands.

(5) Benefits earned by a landowner under this section may be applied in, but application is not limited to, the following manner:

(a) A landowner may receive direct monetary compensation for providing fishing access.

(b) A landowner may direct weed control payments to be made directly to the county weed control board or may elect to receive payments directly.

(c) A landowner may direct fire protection payments to be made directly to the local fire district or the county where the landowner resides or may elect to receive payments directly.

(d) A landowner may receive direct payment to offset insurance costs incurred for allowing public fishing access.

(e) The department may provide assistance in the construction and maintenance of roads, fencing, gates, and parking facilities and in the signing of property.

(6) The restriction on liability of a landowner, agent, or tenant that is provided under 70-16-302(1) applies to a landowner who participates in the fishing access enhancement program.

History: **En. Sec. 2, Ch. 196, L. 2001.**

87-1-287. Placement of warning sign in water legally accessible to public — liability limitation — role of department. (1) Unless acting with gross negligence, an individual or a nonprofit organization is not liable for civil damages resulting from the individual's or organization's placement of a sign or marker warning of a hazard in water legally accessible to the public as long as:

(a) the sign or marker is a white plastic milk bottle attached by a cord to the hazard or is a sign or marker approved by the department;

(b) the sign or marker contains or bears the name and telephone number of the individual or nonprofit organization that placed it;

(c) the individual or nonprofit organization maintains or removes the sign or marker when dictated by changing water conditions or seasonal changes; and

(d) the individual or nonprofit organization places the sign or marker only for the purpose of identifying hazards.

(2) (a) The provisions of this section are not intended to prohibit the placement of nonhazard signs or markers for waterskiing, diving, safe channels, or swimming areas or for posting speed limits.

(b) The department shall inform members of the public involved in the recreational use of the waters of this state of the placement, use, and significance of signs or markers warning of hazards in the water that are placed by individuals or nonprofit organizations pursuant to the provisions of this section.

(3) The provisions of this section apply only to the waters of this state that have not been determined to be navigable for purposes of federal jurisdiction over navigation aids.

History: **En. Sec. 1, Ch. 119, L. 2003.**

87-1-288 and 87-1-289 reserved.

87-1-290. Hunting access account. (1) There is a hunting access account in the state special revenue fund. Funds deposited in this account must be used for the purpose of funding any hunting access program.

(2) The following funds must be deposited in the account:

(a) 28.5% of the fee for Class B-10 nonresident big game combination licenses pursuant to 87-2-505 and 28.5% of the fee for Class B-11 nonresident deer combination licenses pursuant to 87-2-510;

(b) 28.5% of the fee for hunting licenses issued to nonresident relatives of a resident pursuant to 87-2-514;

(c) the hunting access fees collected pursuant to 87-2-116; and

(d) limited drawing refunds received pursuant to 87-2-124.

(3) Any interest or income earned on the account must be deposited in the account.

History: **En. Sec. 9, I.M. No. 161, approved Nov. 2, 2010; amd. Sec. 1, Ch. 415, L. 2011; amd. Sec. 5, Ch. 449, L. 2015; amd. Sec. 9, Ch. 63, L. 2019; amd. Sec. 2, Ch. 106, L. 2019.**

87-1-291 and 87-1-292 reserved.

87-1-293. Hunters against hunger — findings — optional donation — rulemaking. (1) The legislature finds that:

(a) hunters play a vital role in achieving population management objectives for game animals;

(b) the donation of game animals to charitable or nonprofit organizations for free distribution to people can help stop hunger; and

(c) hunters should have the option of donating $1 or more above the purchase price for certain licenses toward a program that would process donated wild game and distribute the meat to those in need.

(2) A person who applies for or purchases a deer, antelope, elk, or wild buffalo license may donate $1 or more in addition to the price of each license to the hunters against hunger program.

(3) The department shall deposit donations received pursuant to this section into the hunters against hunger account established in 87-1-628.

(4) The department shall adopt rules to implement the provisions of this section, including:

(a) providing the forms necessary for the hunters against hunger donation option;

(b) regulating the payment of funds from the hunters against hunger account to a nonprofit organization exempt from taxation under 26 U.S.C. 501(c)(3) for the processing of donated or seized game animals; and

(c) establishing guidelines for the donation of game animals to a nonprofit organization exempt from taxation under 26 U.S.C. 501(c)(3) that is paid from the hunters against hunger account and for the donation of processed game meat to those in need.

History: En. Sec. 1, Ch. 83, L. 2013.

87-1-294. *(Temporary)* **Unlocking public lands program — purpose — commission rulemaking authority.** (1) The legislature finds that increasing access to public lands will provide additional opportunities for activities such as hunting, fishing, wildlife viewing, and other recreational activities as determined by the commission.

(2) The department may establish and administer a voluntary program to encourage access through private land to parcels not previously deemed legally accessible to be known as the unlocking public lands program.

(3) Private land is not eligible for the unlocking public lands program if outfitting or commercial hunting restricts public hunting opportunities on that land.

(4) If the parcel not previously deemed legally accessible is leased state land under Title 77, chapter 1, only the lessee with a qualified access to that state land under 15-30-2380 is eligible for the unlocking public lands program.

(5) (a) A contract for participation in the unlocking public lands program is established through a cooperative agreement between the landowner and the department that guarantees reasonable access to public land through the landowner's private land. This contract serves as certification that the landowner is providing qualified access to public land and is eligible for the tax credit identified in 15-30-2380. The contract must include a certification number for identification purposes. The department shall provide a copy of the contract to the landowner and notify the department of revenue of the certification number. Contracts may be established with landowners:

(i) to provide direct access across a landowner's land to a public parcel; or

(ii) who own land adjacent to the point where the corners of two parcels of public land meet. A landowner with a contract pursuant to this subsection (5)(a)(ii) shall grant access through the landowner's land to establish a corridor between the two parcels of public land. At least one of the parcels of public land must be accessible by a public road, waterway, or access granted by a landowner.

(b) Contracts under subsection (5) may be established with landowners who, prior to January 1, 2016, provided access to public land that was otherwise not legally accessible under subsection (9). Landowners who establish contracts under this subsection (5)(b) are eligible to receive the tax credit identified in 15-30-2380.

(6) The commission shall develop rules for establishing contracts under this section regarding:

(a) duration of access;

(b) types of qualified access; and

(c) reasonable landowner-imposed limitations.

(7) The department shall provide public notice of any available qualified access to public land established through the unlocking public lands program.

(8) Recreational users of access established by the unlocking public lands program shall remain in the prescribed access route or corridor as defined by the contract in subsection (5).

(9) For purposes of this section:

(a) "parcels not previously deemed legally accessible" means public land that cannot be accessed by:

(i) public road, right-of-way, or easement;

(ii) public waters;

(iii) adjacent federal, state, county, or municipal land that is open to public use; or

(iv) adjacent private land because that landowner has not granted permission to cross; and

(b) "public land" means:

(i) state land, as defined in 77-1-101; or

(ii) federal land managed by the U.S. forest service or the bureau of land management. *(Terminates December 31, 2027—secs. 1, 2, Ch. 139, L. 2017.)*

History: En. Sec. 2, Ch. 346, L. 2013; amd. Sec. 2, Ch. 392, L. 2015.

87-1-295. Public access land agreement — terms — application fee. (1) A public access land agreement may be granted only to a landowner who is providing access across the landowner's land to public land that is leased by the landowner or to public land for which there is no leaseholder. An agreement may not include land for which the landowner is also compensated pursuant to 76-17-102 or 87-1-294.

(2) The department may negotiate the terms of a proposed public access land agreement with the landowner. Negotiable terms include:

(a) the amount of compensation, not to exceed $15,000 annually, and the duration of the agreement;

(b) improvements to the land provided by the department that may facilitate public access;

(c) the location of the access and the transportation mode by which the public may use the access;

(d) time periods when the access may and may not be used; and

(e) penalties for trespassing on private land not covered by the agreement.

(3) The private land/public wildlife advisory committee appointed pursuant to 87-1-269 shall review proposed public access land agreements and make recommendations to the department. The department shall consider the recommendations when issuing agreements.

(4) The department may revoke a public access land agreement for a violation of the terms of the agreement.

(5) The restriction on liability of a landowner, agent, or tenant that is provided under 70-16-302(1) applies to a landowner who holds a public access land agreement.

(6) The department may adopt rules to implement the provisions of this section.

History: En. Sec. 1, Ch. 296, L. 2019; amd. Sec. 3, Ch. 552, L. 2021; amd. Sec. 1, Ch. 265, L. 2023.

87-1-296. Repealed. Sec. 25, Ch. 552, L. 2021.

History: En. Sec. 2, Ch. 296, L. 2019.

87-1-297. Repealed. Sec. 25, Ch. 552, L. 2021.

History: En. Sec. 3, Ch. 296, L. 2019.

87-1-298. Supporting bowhunters with disabilities program — findings — optional donation — rulemaking. (1) The legislature finds that:

(a) archery hunting is an important part of Montana's harvest heritage that should be accessible to as many individuals as possible;

(b) some hunters require expensive modified archery equipment specifically designed to accommodate their disability;

(c) charitable and nonprofit organizations assist in defraying the costs of modified archery equipment for some hunters;

(d) donations can help organizations provide more modified archery equipment to more hunters with disabilities; and

(e) hunters should have the option of donating $1 or more above the purchase price of certain licenses to assist organizations in being able to provide modified archery equipment to greater numbers of hunters with disabilities.

(2) A person who applies for or purchases a hunting license may donate $1 or more in addition to the price of the license to the supporting bowhunters with disabilities program.

(3) The department shall deposit donations received pursuant to this section into the supporting bowhunters with disabilities account established in 87-1-630.

(4) The department shall adopt rules to implement the provisions of this section, including:

(a) providing the forms or mechanisms necessary for the supporting bowhunters with disabilities donation option;

(b) regulating the payment of funds from the supporting bowhunters with disabilities account to a nonprofit organization exempt from taxation under 26 U.S.C. 501(c)(3) to acquire modified archery equipment for hunters who have a permit to modify archery equipment; and

(c) establishing guidelines for the donation of modified archery equipment purchased with funds from the supporting bowhunters with disabilities account to Montana hunters who have a permit to modify archery equipment.

History: En. Sec. 1, Ch. 563, L. 2025.

Compiler's Comments

Effective Date: Section 6, Ch. 563, L. 2025, provided: "[This act] is effective July 1, 2025."

Part 3
Fish and Wildlife Commission

Part Cross-References

Establishment, composition, and qualifications of Commission — quasi-judicial designation, 2-15-3402.

87-1-301. Powers of commission. (1) Except as provided in subsections (6) and (7), the commission:

(a) shall set the policies for the protection, preservation, management, and propagation of the wildlife, fish, game, furbearers, waterfowl, nongame species, and endangered species of the state and for the fulfillment of all other responsibilities of the department related to fish and wildlife as provided by law;

(b) shall establish the hunting, fishing, and trapping rules of the department;

(c) except as provided in 23-1-111 and 87-1-303(3), shall establish the rules of the department governing the use of lands owned or controlled by the department and waters under the jurisdiction of the department;

(d) shall adopt the rules of the individual landowners governing the public use of each landowner's private property managed by the department under active public access agreements with private landowners;

(e) must have the power within the department to establish wildlife refuges and bird and game preserves;

(f) shall approve all acquisitions or transfers by the department of interests in land or water, except as provided in 23-1-111 and 87-1-209(2) and (4);

(g) except as provided in 23-1-111, shall review and approve the budget of the department prior to its transmittal to the office of budget and program planning;

(h) except as provided in 23-1-111, shall review and approve construction projects that have an estimated cost of more than $1,000 but less than $5,000;

(i) shall manage elk, deer, and antelope populations based on habitat estimates determined as provided in 87-1-322 and maintain elk, deer, and antelope population numbers at or below population estimates as provided in 87-1-323. In developing or implementing an elk management plan, the commission shall consider landowner tolerance when deciding whether to restrict elk hunting on surrounding public land in a particular hunting district. As used in this subsection (1)(i), "landowner tolerance" means the written or documented verbal opinion of an affected landowner regarding the impact upon the landowner's property within the particular hunting district where a restriction on elk hunting on public property is proposed.

(j) shall set the policies for the salvage of antelope, deer, elk, or moose pursuant to 87-3-145;

(k) shall comply with, adopt policies that comply with, and ensure the department implements in each region the provisions of state wildlife management plans adopted following an environmental review conducted pursuant to Title 75, chapter 1, parts 1 through 3; and

(l) shall review and approve the issuance of an either-sex or antlerless elk license, permit, or combination thereof to a landowner or a landowner's designee pursuant to 87-2-513.

(2) The commission may adopt rules regarding the use and type of archery equipment that may be employed for hunting and fishing purposes, taking into account applicable standards as technical innovations in archery equipment change.

(3) The commission may adopt rules regarding the establishment of special licenses or permits, seasons, conditions, programs, or other provisions that the commission considers appropriate to promote or enhance hunting by Montana's youth and persons with disabilities.

(4) (a) The commission may adopt rules regarding nonresident big game combination licenses to:

(i) separate deer licenses from nonresident elk combination licenses;

(ii) set the fees for the separated deer combination licenses and the elk combination licenses without the deer tag;

(iii) condition the use of the deer licenses; and

(iv) limit the number of licenses sold.

(b) The commission may exercise the rulemaking authority in subsection (4)(a) when it is necessary and appropriate to regulate the harvest by nonresident big game combination license holders:

(i) for the biologically sound management of big game populations of elk, deer, and antelope;

(ii) to control the impacts of those elk, deer, and antelope populations on uses of private property; and

(iii) to ensure that elk, deer, and antelope populations are at a sustainable level as provided in 87-1-321 through 87-1-325.

(5) (a) Subject to the provisions of subsection (5)(b), the commission may adopt rules to:

(i) limit the number of nonresident mountain lion hunters in designated hunting districts; and

(ii) determine the conditions under which nonresidents may hunt mountain lion in designated hunting districts.

(b) The commission shall adopt rules for the use of and set quotas for the sale of Class D-4 nonresident hound licenses by hunting district, portions of a hunting district, group of districts, or administrative regions.

(c) The commission shall consider, but is not limited to consideration of, the following factors:

(i) harvest of lions by resident and nonresident hunters;

(ii) history of quota overruns;

(iii) composition, including age and sex, of the lion harvest;

(iv) historical outfitter use;

(v) conflicts among hunter groups;

(vi) availability of public and private lands; and

(vii) whether restrictions on nonresident hunters are more appropriate than restrictions on all hunters.

(6) The commission may not regulate the use or possession of firearms, firearm accessories, or ammunition, including the chemical elements of ammunition used for hunting. This does not prevent:

(a) the restriction of certain hunting seasons to the use of specified hunting arms, such as the establishment of special archery seasons and the special muzzleloader heritage hunting season established in 87-1-304;

(b) for human safety, the restriction of certain areas to the use of only specified hunting arms, including bows and arrows, traditional handguns, and muzzleloading rifles;

(c) the restriction of the use of shotguns for the hunting of deer and elk pursuant to 87-6-401(1)(f);

(d) the regulation of migratory game bird hunting pursuant to 87-3-403; or

(e) the restriction of the use of rifles for bird hunting pursuant to 87-6-401(1)(g) or (1)(h).

(7) Pursuant to 23-1-111, the commission does not oversee department activities related to the administration of state parks, primitive parks, state recreational areas, public camping grounds, state historic sites, state monuments, and other heritage and recreational resources, land, and water administered pursuant to Title 23, chapter 1, and Title 23, chapter 2, parts 1, 4, and 9.

87-1-303. Rules for use of lands and waters. (1) Except as provided in 23-1-111, 87-1-301(6), and subsection (3) of this section, the commission may adopt and enforce rules governing uses of lands that are acquired or held under easement by the commission or lands that it operates under agreement with or in conjunction with a federal or state agency or private owner. The rules must be adopted in the interest of public health, public safety, and protection of property in regulating the use of these lands. All lease and easement agreements must itemize uses as listed in 87-1-209.

(2) Except as provided in 87-1-301(6), the commission may adopt and enforce rules governing recreational uses of all public fishing reservoirs, public lakes, rivers, and streams that are legally accessible to the public or on reservoirs and lakes that it operates under agreement with or in conjunction with a federal or state agency or private owner. These rules must be adopted in the interest of public health, public safety, public welfare, and protection of property and public resources in regulating swimming, hunting, fishing, trapping, boating, including but not limited to boating speed regulations, the operation of motor-driven boats, the operation of personal watercraft, the resolution of conflicts between users of motorized and nonmotorized boats, waterskiing, surfboarding, picnicking, camping, sanitation, and use of firearms on the reservoirs, lakes, rivers, and streams or at designated areas along the shore of the reservoirs, lakes, rivers, and streams. Areas regulated pursuant to the authority contained in this section must be areas that are legally accessible to the public. These rules are subject to review and approval by the department of public health and human services with regard to issues of public health and sanitation before becoming effective. Copies of the rules must show that endorsement.

(3) (a) The commission may not regulate or classify domestic livestock trailing as a commercial activity or commercial use that is subject to licensing, permitting, or fee requirements. Domestic livestock trailing on land owned or controlled by the department is exempt from the requirements of Title 75, chapter 1, parts 1 through 3.

(b) The commission may authorize domestic livestock trailing across land owned or controlled by the department that is designated as a wildlife management area. The commission may adopt rules governing the timing of and the route to be used for domestic livestock trailing activities to the extent that the rules are necessary both to enable the trailing of domestic livestock across the designated wildlife management area and to protect and enhance state lands. The rules may not:

(i) require a fee for domestic livestock trailing or related activities; or

(ii) prohibit or unreasonably interfere with domestic livestock trailing activities.

(4) For the purposes of this section, the following definitions apply:

(a) "Domestic livestock" means domestic animals kept for farm and ranch purposes, including but not limited to horses, cattle, sheep, goats, and dogs.

(b) "Domestic livestock trailing" means the entering upon and crossing of department lands and the use of the lands for forage by domestic livestock for a maximum of 96 consecutive hours.

87-1-304. *(Temporary)* **Fixing of seasons and bag and possession limits.** (1) Subject to the provisions of 87-5-302 and subsections (7) through (9) of this section, the commission may:

(a) fix seasons, bag limits, possession limits, and season limits;

(b) open or close or shorten or lengthen seasons on any species of game, bird, fish, or fur-bearing animal as defined by 87-2-101;

(c) declare areas open to the hunting of deer, antelope, elk, moose, sheep, goat, mountain lion, bear, wild buffalo or bison, and wolf by persons holding an archery stamp and the required license, permit, or tag and designate times when only bows and arrows may be used to hunt deer, antelope, elk, moose, sheep, goat, mountain lion, bear, wild buffalo or bison, and wolf in those areas;

(d) subject to the provisions of 87-1-301(6), restrict areas and species to hunting with only specified hunting arms, including bow and arrow, for the reasons of safety or of providing diverse hunting opportunities and experiences; and

(e) declare areas open to special license holders only and issue special licenses in a limited number when the commission determines, after proper investigation, that a special season is necessary to ensure the maintenance of an adequate supply of game birds, fish, or animals or fur-bearing animals. The commission may declare a special season and issue special licenses when game birds, animals, or fur-bearing animals are causing damage to private property or when a written complaint of damage has been filed with the commission by the owner of that property. In determining to whom special licenses must be issued, the commission may, when more applications are received than the number of animals to be killed, award permits to those chosen under a drawing system. The procedures used for awarding the permits from the drawing system must be determined by the commission.

(2) The commission may adopt rules governing the use of livestock and vehicles by archers during special archery seasons.

(3) Subject to the provisions of 87-5-302 and subsection (7) of this section, the commission may divide the state into fish and game districts and create fish, game, or fur-bearing animal districts throughout the state. The commission may declare a closed season for hunting, fishing, or trapping in any of those districts and later may open those districts to hunting, fishing, or trapping.

(4) The commission may declare a closed season on any species of game, fish, game birds, or fur-bearing animals threatened with undue depletion from any cause. The commission may close any area or district of any stream, public lake, or public water or portions thereof to hunting, trapping, or fishing for limited periods of time when necessary to protect a recently stocked area, district, water, spawning waters, spawn-taking waters, or spawn-taking stations or to prevent the undue depletion of fish, game, fur-bearing animals, game birds, and nongame birds. The commission may open the area or district upon consent of a majority of the property owners affected.

(5) The commission may authorize the director to open or close any special season upon 12 hours' notice to the public.

(6) The commission may declare certain fishing waters closed to fishing except by persons under 15 years of age. The purpose of this subsection is to provide suitable fishing waters for the exclusive use and enjoyment of juveniles under 15 years of age, at times and in areas the commission in its discretion considers advisable and consistent with its policies relating to fishing.

(7) In an area immediately adjacent to a national park, the commission may not:

(a) prohibit the hunting or trapping of wolves; or

(b) close the area to wolf hunting or trapping unless a wolf harvest quota established by the commission for that area has been met.

(8) The commission may authorize a wolf trapping season that opens the first Monday after Thanksgiving and closes March 15 of the following calendar year, except that the commission may adjust the dates for specific wolf management units based on regional recommendations.

(9) There is established a special muzzleloader heritage hunting season that begins on the second Saturday after the end of the regular season and lasts 9 days. During this season, subject to the provisions of 87-6-401(1)(i) and rules adopted by the commission, a person may take a deer or elk with a valid license or permit using plain lead projectiles and a muzzleloading rifle that is charged with loose black powder, loose pyrodex, or an equivalent loose black powder substitute and ignited by a flintlock, wheel lock, matchlock, or percussion mechanism using a percussion or musket cap. The muzzleloading rifle must be a minimum of 45 caliber and may not have more than two barrels.

(10) For the purpose of shed hunting as defined in 87-2-101 in a wildlife management area, the commission shall allow a resident as defined in 87-2-102 access to the area 7 days in advance of a nonresident. A nonresident who violates this subsection (10) is subject to the penalties provided for in 87-2-530.

87-1-304. *(Effective March 1, 2026)* **Fixing of seasons and bag and possession limits.** (1) Subject to the provisions of 87-5-302 and subsections (7) through (10) of this section, the commission may:

(a) fix seasons, bag limits, possession limits, and season limits;

(b) open or close or shorten or lengthen seasons on any species of game, bird, fish, or fur-bearing animal as defined by 87-2-101;

(c) declare areas open to the hunting of deer, antelope, elk, moose, sheep, goat, mountain lion, bear, wild buffalo or bison, and wolf by persons holding an archery stamp and the required license, permit, or tag and designate times when only bows and arrows may be used to hunt deer, antelope, elk, moose, sheep, goat, mountain lion, bear, wild buffalo or bison, and wolf in those areas;

(d) subject to the provisions of 87-1-301(6), restrict areas and species to hunting with only specified hunting arms, including bow and arrow, for the reasons of safety or of providing diverse hunting opportunities and experiences; and

(e) declare areas open to special license holders only and issue special licenses in a limited number when the commission determines, after proper investigation, that a special season is necessary to ensure the maintenance of an adequate supply of game birds, fish, or animals or fur-bearing animals. The commission may declare a special season and issue special licenses when game birds, animals, or fur-bearing animals are causing damage to private property or when a written complaint of damage has been filed with the commission by the owner of that property. In determining to whom special licenses must be issued, the commission may, when more applications are received than the number of animals to be killed, award permits to those chosen under a drawing system. The procedures used for awarding the permits from the drawing system must be determined by the commission.

(2) The commission may adopt rules governing the use of livestock and vehicles by archers during special archery seasons.

(3) Subject to the provisions of 87-5-302 and subsection (7) of this section, the commission may divide the state into fish and game districts and create fish, game, or fur-bearing animal districts throughout the state. The commission may declare a closed season for hunting, fishing, or trapping in any of those districts and later may open those districts to hunting, fishing, or trapping.

(4) The commission may declare a closed season on any species of game, fish, game birds, or fur-bearing animals threatened with undue depletion from any cause. The commission may close any area or district of any stream, public lake, or public water or portions thereof to hunting, trapping, or fishing for limited periods of time when necessary to protect a recently stocked area, district, water, spawning waters, spawn-taking waters, or spawn-taking stations or to prevent the undue depletion of fish, game, fur-bearing animals, game birds, and nongame birds. The commission may open the area or district upon consent of a majority of the property owners affected.

(5) The commission may authorize the director to open or close any special season upon 12 hours' notice to the public.

(6) The commission may declare certain fishing waters closed to fishing except by persons under 15 years of age. The purpose of this subsection is to provide suitable fishing waters for the exclusive use and enjoyment of juveniles under 15 years of age, at times and in areas the commission in its discretion considers advisable and consistent with its policies relating to fishing.

(7) In an area immediately adjacent to a national park, the commission may not:

(a) prohibit the hunting or trapping of wolves; or

(b) close the area to wolf hunting or trapping unless a wolf harvest quota established by the commission for that area has been met.

(8) The commission may authorize a wolf trapping season that opens the first Monday after Thanksgiving and closes March 15 of the following calendar year, except that the commission may adjust the dates for specific wolf management units based on regional recommendations.

(9) There is established a special muzzleloader heritage hunting season that begins on the second Saturday after the end of the regular season and lasts 9 days. During this season, subject to the provisions of 87-6-401(1)(i) and rules adopted by the commission, a person may take a deer or elk with a valid license or permit using plain lead projectiles and a muzzleloading rifle that is charged with loose black powder, loose pyrodex, or an equivalent loose black powder substitute and ignited by a flintlock, wheel lock, matchlock, or percussion mechanism using a percussion or musket cap. The muzzleloading rifle must be a minimum of 45 caliber and may not have more than two barrels."

(10) (a) Except on privately owned lands that are not a part of a hunting access program pursuant to 87-1-246 through 87-1-249 and 87-1-265, the commission shall allow residents as defined in 87-2-102 to begin hunting 10 days prior to nonresidents for all upland game birds, including ring-necked pheasant, but excluding mountain grouse.

(b) For the purposes of this subsection (10), "mountain grouse" means blue grouse, spruce (Franklin) grouse, and ruffed grouse.

(11) For the purpose of shed hunting as defined in 87-2-101 in a wildlife management area, the commission shall allow a resident as defined in 87-2-102 access to the area 7 days in advance of a nonresident. A nonresident who violates this subsection (11) is subject to the penalties provided for in 87-2-530.

87-1-305. Fish and game refuges. (1) The commission may establish and close to hunting, trapping, or fishing any game, bird, or fish refuge on public lands and, with the consent of the owner, on private lands. It may close streams, lakes, or parts of them to hunting, trapping, or fishing.

(2) The commission may establish game refuges in which game and fur-bearing animals, game or nongame birds may breed and replenish. These refuges shall be established by order of the commission upon petition and proper showing that the action is, in judgment of the commission, necessary and in the best interest of the wildlife within the area to be included in the refuge. The purpose of this provision is to establish small refuges rather than large preserves or rather than close large areas to hunting or trapping.

(3) The commission may designate and protect certain areas as resting, feeding, and breeding grounds for migratory birds, in which hunting and molestation are forbidden. The purpose of this provision is not to interfere unduly with the hunting of waterfowl but to provide havens in which they can rest, feed, and breed without molestation.

(4) After a petition has been duly filed with the secretary of the commission requesting that an area be set aside as a game refuge, the secretary shall immediately publish a notice in a paper of general circulation in the county in which the area is located. The notice shall state that a hearing on the matter will be held at a designated place in the county not less than 15 days after first publication, at which time and place all interested parties may appear and be heard.

Game preserves and closed areas, Title 87, ch. 5, part 4.

87-1-306. Designation of certain river stretches as no-wake waters — personal watercraft use prohibited. (1) In the interest of public health, safety, and welfare and protection of property and public resources, the use of personal watercraft is prohibited on the headwaters of the Missouri River downstream to its confluence with Prewett Creek, except in Missouri River reservoirs, and including all tributaries but not their reservoirs.

(2) The waters from Hauser dam downstream to Beaver Creek are limited to a controlled no-wake speed.

(3) This section does not apply to the use of the designated waters for search and rescue, official patrol, or scientific purposes.

(4) This section may not be construed to limit the authority of the commission or department to enact by administrative rule or to enforce any other restrictions on any surface waters in the interests of public health, safety, or welfare, the protection of property or public resources, or the resolution of conflicts between users of motorized and nonmotorized boats.

History: En. Sec. 4, Ch. 569, L. 1999.

87-1-307 through 87-1-320 reserved.

87-1-321. Purpose. The purpose of 87-1-321 through 87-1-325 is to require the commission, with advice of the department, to manage elk, deer, and antelope populations in a sustainable manner that keeps animal populations at a number that does not adversely affect Montana land.

History: En. Sec. 1, Ch. 553, L. 2003.

87-1-322. Calculation of available habitat. When determining the total acreage that serves as habitat for elk, deer, and antelope, the commission shall consider public land and private land for wildlife management or habitat enhancement purposes. This calculation must be reconsidered and provided to the public by October 1 of each odd-numbered year.

History: **En. Sec. 2, Ch. 553, L. 2003.**

87-1-323. Viable elk, deer, and antelope populations based on habitat acreage — reduction of populations as necessary. (1) Based on the habitat acreage that is determined pursuant to 87-1-322, the commission shall determine the appropriate elk, deer, and antelope numbers that can be viably sustained. The department shall consider the specific concerns of private landowners when determining sustainable numbers pursuant to this section.

(2) Once the sustainable population numbers are determined as provided in subsection (1), the department shall implement, through existing wildlife management programs, necessary actions with the objective that the population of elk, deer, and antelope remains at or below the sustainable population. The programs may include but are not limited to:

(a) liberalized harvests;
(b) game damage hunts;
(c) landowner permits; or
(d) animal relocation.

(3) The department shall:

(a) manage with the objective that populations of elk, deer, and antelope are at or below the sustainable population number by January 1, 2009; and

(b) evaluate the elk, deer, and antelope populations on an annual basis and provide that information to the public.

History: **En. Sec. 3, Ch. 553, L. 2003.**

87-1-324. Sustainable elk, deer, and antelope populations program — funding. The department shall use money from the fish and game fund, as described in 87-1-601(3), to implement 87-1-321 through 87-1-325.

History: **En. Sec. 4, Ch. 553, L. 2003.**

87-1-325. Rulemaking — discounted antlerless elk B tag licenses. (1) The department and the commission shall adjust existing wildlife management rules and plans to implement 87-1-321 through 87-1-325.

(2) The department and the commission may adopt rules for determining sustainability. The commission shall consider average carrying capacity and use generally accepted animal unit factors for each species in each commission region.

(3) Any rules adopted by the department pursuant to subsection (2) must be adopted in a timely manner.

(4) The commission may offer for sale at one-half the cost of a regularly priced license Class A-9 resident antlerless elk B tag licenses and Class B-12 nonresident antlerless elk B tag licenses to be used as prescribed by the commission on private lands in hunting districts where the elk population is above the sustainable population number established pursuant to 87-1-323 as determined by the department's most recent elk survey count.

History: **En. Sec. 5, Ch. 553, L. 2003; amd. Sec. 2, Ch. 486, L. 2021.**

Part 4
Director of Fish, Wildlife, and Parks

87-1-401. Director to carry out policies. The director shall carry out the policies of the commission and the board and shall adopt rules authorized by law to implement those policies.

History: **En. 26-106.3 by Sec. 17, Ch. 417, L. 1977; R.C.M. 1947, 26-106.3; amd. Sec. 31, Ch. 235, L. 2013.**

Appointment of Director, Art. VI, sec. 8, Mont. Const.; 2-15-3401.
Reports to Governor, Art. VI, sec. 15, Mont. Const.
Adoption and publication of rules — Montana Administrative Procedure Act, Title 2, ch. 4, part 3.
Member of Water Pollution Control Advisory Council, 2-15-2107.

87-1-402. Oath of director. Before entering upon official duties, the director shall take and subscribe the constitutional oath of office and shall in addition swear or affirm that the director does not hold another position or office or any position under any political committee or party. The oath or affirmation must be filed in the office of the secretary of state.

87-1-403. Regulation of employees by director. (1) The director may suspend without pay, reduce in rank, or remove any employee at any time for cause, providing that any person who has been continuously employed for 1 year or more immediately preceding any suspension or discharge may demand and receive a hearing before the department on the charges filed.

(2) The director shall rate all employees on the basis of merit and efficiency in accordance with rules adopted by the department to secure a proper rating of each person employed. The department shall fix the salaries of employees. Travel expenses, as provided for in 2-18-501 through 2-18-503, are allowed employees on official business away from designated headquarters.

87-1-405. Publication of laws. As soon as practicable after the adjournment of each session of the legislature, the director in cooperation with the attorney general shall make a compilation of the laws relating to fish, game, game birds, and animals in force at the date of the compilation and properly index them. Copies of the compilation, sufficient in number for the purposes of this section, shall be printed in pamphlet form, pocket size. The director shall distribute to justices of the peace, wardens, and other officers and persons empowered to issue licenses for hunting, fishing, and trapping a supply of the compilation sufficient to permit one copy to be given anyone desiring a copy. The expense incurred in printing the laws shall be paid out of fish and game moneys in the state special revenue fund.

Part 5
Fish and Game Wardens

87-1-501. Selection and oath of wardens. (1) Wardens must be selected from applicants who have passed an examination that may be required according to the rules adopted and promulgated by the department. A person may not be appointed as a warden until a certificate has been issued to the person by the department to the effect that the person has passed the required examination and is a fit and proper person to perform the duties of the office.

(2) Before entering upon their official duties, state fish and game wardens shall take and subscribe the constitutional oath of office and shall in addition swear or affirm that they hold no other position or office or any position under any political committee or party. The oath or affirmation must be filed in the office of the secretary of state.

Game wardens' and peace officers' retirement, Title 19, ch. 8.

87-1-502. Qualifications, powers, and duties. (1) Wardens must be qualified by their experience, training, and skill in protection, conservation, and propagation of wildlife, game, fur-bearing animals, fish, and game birds and interested in this work. They shall devote all of their time for which they are appointed to their official duties.

(2) They shall enforce the laws of this state and the rules of the department with reference to the protection, preservation, and propagation of game and fur-bearing animals, fish, and game birds.

(3) They shall see that persons who hunt, fish, or take game or fur-bearing animals, game birds, or fish and that those persons who make recreational use of state lands, as defined in 77-1-101, for hunting and fishing, have the necessary licenses.

(4) They shall assist in the protection, conservation, and propagation of fish, game, fur-bearing animals, and game and nongame birds and assist in the planting, distributing, feeding, and care of fish, game, fur-bearing animals, and game and nongame birds. They shall, when ordered by the department, assist in the destruction of predatory animals, birds, and rodents. They shall perform all other duties prescribed by the department and make a monthly report to the department correctly informing the department of their activities on each day of the preceding month with regard to the enforcement of the fish and game laws, showing where their duties called them and what they did. The reports must contain any pertinent recommendations the wardens may see fit to make.

(5) A warden may not compromise or settle violations of fish and game laws out of court.

(6) A warden has the authority to inspect any and all fish, game and nongame birds, waterfowl, game animals, and fur-bearing animals at reasonable times and at any location other than a residence or dwelling. Upon request therefor, all persons having in their possession any fish, game and nongame birds, waterfowl, game animals, and fur-bearing animals shall exhibit the same and all thereof to the warden for such inspection.

(7) The department is a criminal justice agency for the purpose of obtaining the technical assistance and support services provided by the board of crime control under the provisions of 44-7-101. Authorized officers of the department are granted peace officer status with the power:

(a) of search, seizure, and arrest;

(b) to investigate activities in this state regulated by this title and rules of the department and the commission; and

(c) to report violations to the county attorney of the county in which they occur.

87-1-503. Ex officio wardens. (1) The following are ex officio wardens:

(a) all sheriffs and their deputies;
(b) all constables;
(c) all peace officers of the state or any subdivision of the state;
(d) the executive director and investigators of the board of outfitters;
(e) all state forest officers;
(f) as authorized by cooperative agreement, any officers of the United States forest service, agents of the United States fish and wildlife service, and peace officers of the bureau of land management, national park service, and corps of engineers that are assigned to duty in this state;
(g) as authorized by cooperative agreement, tribal fish and game wardens;
(h) former fish and game wardens; and
(i) field personnel of the department as may be appointed by the director.

(2) Ex officio wardens serve without pay, except that the department may, in its discretion, allow travel expenses as provided for in 2-18-501 through 2-18-503. If allowed, travel expenses must be paid upon proper vouchers from the state fish and game funds.

(3) Ex officio wardens have the same powers with reference to the enforcement of the fish and game laws of this state and the laws relating to parks and outdoor recreation contained in Title 23, chapters 1 and 2, except chapter 2, part 7, as regularly appointed wardens, and it is their duty to assist, whenever possible, in the enforcement of those laws.

History: En. Sec. 14, Ch. 193, L. 1921; re-en. Sec. 3663, R.C.M. 1921; re-en. Sec. 3663, R.C.M. 1935; amd. Sec. 1, Ch. 115, L. 1955; amd. Sec. 1, Ch. 236, L. 1965; amd. 87-1-506. Enforcement powers of wardens. (1) A warden may:

(a) serve a subpoena issued by a court for the trial of a violator of the fish and game laws;
(b) conduct a search, with a search warrant, in accordance with Title 46, chapter 5;
(c) seize game, fish, game birds, and fur-bearing animals and any parts of them taken or possessed in violation of the law or the rules of the department;
(d) seize and hold, subject to law or the orders of the department, devices that have been used to unlawfully take game, fish, birds, or fur-bearing animals;
(e) arrest, in accordance with Title 46, chapter 6, a violator of a fish and game law or rule of the department, violation of which is a misdemeanor;

(f) enforce the disorderly conduct and public nuisance laws, 45-8-101 and 45-8-111, as they apply to the operation of motorboats on all waters of the state;

(g) as provided for in 37-47-345, investigate violations of 37-47-301(1) and (2) and 37-47-404;

(h) enforce the provisions of Title 80, chapter 7, part 10, and rules adopted under Title 80, chapter 7, part 10, for those invasive species that are under the department's jurisdiction;

(i) on the signing of an agreement as described in 77-1-815, enforce the provisions of Title 77 and rules adopted by the department of natural resources and conservation pertaining to the use of state trust lands; and

(j) exercise the other powers of peace officers in the enforcement of the fish and game laws, the rules of the department, and judgments obtained for violation of those laws or rules.

(2) The meat of game animals that are seized pursuant to subsection (1)(c) must be donated directly to the Montana food bank network or to public or charitable institutions to the extent reasonably feasible. Any meat that the department is unable to donate must be sold pursuant to 87-1-511, with the proceeds to be distributed as provided in 87-1-513(2).

History: En. 26-110.3 by Sec. 13, Ch. 511, L. 1973; amd. Sec. 1, Ch. 9, L. 1977; amd. Sec. 13, Ch. 417, L. 1977; R.C.M. 1947, 26-110.3; amd. Sec. 1, Ch. 694, L. 1983; amd. Appointment of wardens, 87-1-404.

87-1-507 through 87-1-510 reserved.

87-1-511. Sale of confiscated birds and animals — disposition of seized grizzly bears. (1) Except as provided in 87-1-226(1), all birds, animals, fish, heads, hides, teeth, or other parts of any animal other than grizzly bear seized by any officer or warden or otherwise acquired by a department employee in the scope of employment may be sold, under the direction of the director or wardens, at a time, place, and manner so as to receive the highest price. The sale must be at public auction to the highest and best bidder. The director or the wardens shall publish notice of the time and place of the sale, together with a description of the birds, fish, animals, or parts or portions of animals to be sold, in a newspaper of general circulation published in the county where the sale is to be held. The notice must be published at least once, and the sale may not be less than 5 or more than 30 days after the last publication. If the property seized is perishable, it may be sold by those officers without publishing notice of the sale. The property may be sold upon that public notice and under those terms and conditions that in the discretion of the officers seem conducive to securing full value.

(2) All grizzly bears or heads, hides, teeth, claws, or other parts of grizzly bears seized by any officer or warden may be donated to museums, educational institutions, government agencies, or persons conducting scientific studies, as approved by the commission. If approved under federal law, parts may be sold at public auction if, after approval by the commission, a reasonable attempt has been made to dispose of the parts.

History: En. Sec. 47, Ch. 173, L. 1917; re-en. Sec. 3726, R.C.M. 1921; re-en. Sec. 3726, R.C.M. 1935; amd. Sec. 35, Ch. 511, L. 1973; R.C.M. 1947, 26-506; amd. Sec. 2, Ch. 120, L. 1985; amd. Sec. 1, Ch. 540, L. 1985; amd. Sec. 2839, Ch. 56, L. 2009.

87-1-512. Certificate of sale. (1) Upon the sale of property as provided in 87-1-511, the officer shall issue a certificate to the purchasing party, certifying that the purchaser has the legal right to be in possession of the property and that anyone so acquiring this property from the state is prohibited from reselling the property for human consumption.

(2) Only one carcass of either deer, moose, or elk may be purchased per person at an auction conducted pursuant to 87-1-511. At its discretion, the department may donate unsold carcasses to welfare departments, public institutions, or charitable institutions.

(3) Subsection (1) does not prohibit the resale of heads, hides, pelts, or mounts.

History: En. Sec. 48, Ch. 173, L. 1917; re-en. Sec. 3727, R.C.M. 1921; amd. Sec. 27, Ch. 192, L. 1925; re-en. Sec. 3727, R.C.M. 1935; amd. Sec. 1, Ch. 45, L. 1975; amd. Sec. 12, Ch. 9, L. 1977; R.C.M. 1947, 26-507; amd. Sec. 1, Ch. 108, L. 1989.

Cross-References
Meat donated to public entities, 87-1-226.

87-1-513. Disposition of proceeds of sale. (1) The money obtained upon the sale of seized property must be retained and accounted for by the department when the person having the property in possession at the time of seizure is prosecuted or when a prosecution of the person is pending. If the person charged with violating fish and game law is convicted or forfeits bond or bail, the money received for the sale of seized property must be paid to the state treasurer and be deposited to the credit of the fish and game fund except as provided in subsection (2). If the party from whom the property was taken is not found guilty, the money must be paid to the party from whom the game birds, wild animals, fish, or parts or portions thereof were taken. An officer is not liable for any damage caused by any search, examination, seizure, or sale. When wild animals, game birds, or fish are seized as provided in this part and the person or persons who killed or captured the wild animals, game birds, or fish cannot be ascertained or when the animals sold were killed pursuant to 87-1-225, then the money received from the sale of the wild animals, game birds, or fish must be paid directly to the state treasurer. The cost of advertising notice of sale, as required by 87-1-511, must be paid from the fish and game fund.

(2) The proceeds, after the department's cost of conducting the sale and costs incurred in donating game animal meat are deducted, from the sale of seized game animal meat must be deposited in the state special revenue fund to the credit of the department of public health and human services for the purposes of awarding grants to the Montana food bank network in this state. Money from the grants awarded to the Montana food bank network must be used for the processing of donated game animal meat. Any grant funds remaining after donated game animal meat is processed may be used for other appropriate purposes by the Montana food bank network.

History: En. Sec. 49, Ch. 173, L. 1917; re-en. Sec. 3728, R.C.M. 1921; re-en. Sec. 3728, R.C.M. 1935; R.C.M. 1947, 26-508; amd. Sec. 3, Ch. 120, L. 1985; amd. Sec. 1, Ch. 170, L. 1993; amd. Sec. 4, Ch. 523, L. 1997; amd. Sec. 13, Ch. 426, L. 2009; amd. Sec. 1, Ch. 134, L. 2011.

Cross-References

87-1-514. Record of confiscated property. The director and wardens shall keep a complete record of all property confiscated because of a violation of the game and fish laws, showing in detail a description of the property, the person from whom it was confiscated, the price received for it upon public sale, and the disposition of the money.

History: En. Sec. 50, Ch. 173, L. 1917; re-en. Sec. 3729, R.C.M. 1921; re-en. Sec. 3729, R.C.M. 1935; amd. Sec. 36, Ch. 511, L. 1973; R.C.M. 1947, 26-509.

Part 6
Finance

87-1-601. Use of fish and game money. (1) (a) Except as provided in 87-1-290, 87-1-293, 87-1-623, 87-1-298, and subsections (8) and (10) of this section, all money collected or received from the sale of hunting and fishing licenses or permits, from the sale of seized game or hides, from damages collected for violations of the fish and game laws of this state, or from appropriations or received by the department from any other state source must be turned over to the department of revenue and placed in the state special revenue fund to the credit of the department.

(b) Any money received from federal sources must be deposited in the federal special revenue fund to the credit of the department.

(c) All interest earned on money from the following sources must be placed in the state special revenue fund to the credit of the department:

(i) the general license account;

(ii) the license drawing account;

(iii) accounts established to administer the provisions of 87-1-246, 87-1-258, 87-1-605, 87-2-411, 87-2-722, and 87-2-724; and

(iv) money received from the sale of any other hunting and fishing license.

(2) Except as provided in 87-2-411, the money described in subsection (1) must be exclusively set apart and made available for the payment of all salaries, per diem, fees, expenses,

and expenditures authorized to be made by the department under the terms of this title. The money described in subsection (1) must be spent for those purposes by the department, subject to appropriation by the legislature.

(3) Any reference to the fish and game fund in Title 87 means fish and game money in the state special revenue fund and the federal special revenue fund.

(4) Except as provided in subsections (8) and (9), all money collected or received from fines and forfeited bonds, except money collected or received by a justice's court, that relates to violations of state fish and game laws under Title 87 must be deposited by the department of revenue and credited to the department in a state special revenue fund account for this purpose. Out of any fine imposed by a court for the violation of the fish and game laws, the costs of prosecution must be paid to the county where the trial was held in any case in which the fine is not imposed in addition to the costs of prosecution.

(5) (a) Except as provided in 87-1-621, section 2(3), Chapter 560, Laws of 2005, and subsection (6) of this section, money must be deposited in an account in the permanent fund if it is received by the department from:

(i) the sale of surplus real property;

(ii) exploration or development of oil, gas, or mineral deposits from lands acquired by the department, except royalties or other compensation based on production; and

(iii) leases of interests in department real property not contemplated at the time of acquisition.

(b) The interest derived from the account, but not the principal, may be used only for the purpose of operation, development, and maintenance of real property of the department and only upon appropriation by the legislature. If the use of money as set forth in this section would result in violation of applicable federal laws or state statutes specifically naming the department or money received by the department, then the use of this money must be limited in the manner, method, and amount to those uses that do not result in a violation.

(6) Money received from the sale or lease of lands acquired and managed for the purposes of Title 23, chapter 1, must be deposited in the state special revenue fund in the account established for miscellaneous funds received for state parks and may be used only for the purposes of Title 23, chapter 1.

(7) Money received from the collection of license drawing applications is subject to the deposit requirements of 17-6-105(6) unless the department has submitted and received approval for a modified deposit schedule pursuant to 17-6-105(8).

(8) Money collected or received from fines or forfeited bonds for the violation of 77-1-801, 77-1-806, or rules adopted under 77-1-804 must be deposited in the state general fund.

(9) The department of revenue shall deposit in the state general fund one-half of the money received from the fines imposed pursuant to Title 87, chapter 6.

(10) The department shall deposit all money received from the voluntary search and rescue donation in 87-2-202 in a state special revenue account to the credit of the department for search and rescue purposes as provided for in 10-3-801.

87-1-603. Department-owned land subject to taxation — exceptions. (1) All land owned by the department of fish, wildlife, and parks is subject to taxation and must be assessed by the department of revenue as if it were taxable to a private citizen, except:

(a) department-owned land purchased before May 10, 2009, totaling less than 100 acres in a county; and

(b) lands owned by the department purchased before May 10, 2009, for game or bird farms or for fish hatchery purposes or lands acquired and managed for the purposes of Title 23, chapter 1.

(2) For every department purchase of land, the department shall notify the treasurer in the county where land was purchased.

(3) The amount to be paid to each county pursuant to this section is statutorily appropriated, as provided in 17-7-502.

History: En. Sec. 1, Ch. 1, L. 1951; amd. Sec. 1, Ch. 188, L. 1953; amd. Sec. 21, Ch. 511, L. 1973; amd. Sec. 13, Ch. 417, L. 1977; R.C.M. 1947, 26-133; amd. Sec. 2, Ch. 218, L. 1979; amd. 87-1-605. Fees used to purchase recreational facilities. (1) One dollar of the fee for a Class A resident fishing license, 10% of the fee for a Class A-8 resident temporary fishing license, $1 of the fee for a Class B-4 nonresident fishing license, $3.50 of the fee for a Class B-5 nonresident fishing license, and $5 of the fee for a Class B nonresident fishing license must be used for the purchase, operation, development, and maintenance of fishing accesses; stream, river, and lake frontages; and the land considered necessary to provide recreational use of fishing accesses and stream, river, and lake frontages.

(2) The amount of funds used for operation and maintenance must equal at least 50% of the money set aside each year under this section and must be expended as provided in subsection (3). The funds raised under this section may not be used in lieu of any funds or sources of funds currently being used for acquisition or purchase of fishing accesses or stream, river, or lake frontages and the land considered necessary to provide recreational use of fishing accesses and stream, river, and lake frontages but are in addition to those funds. The funds used for operation and maintenance may be used only for these purposes on lands acquired with funds under this section after April 30, 1974.

(3) Operation and maintenance money set aside each year under this section must be expended based on the following priority:

(a) weed management;

(b) streambank restoration; and

(c) general operation and maintenance.

History: En. Sec. 3, Ch. 408, L. 1973; amd. Sec. 1, Ch. 82, L. 1977; R.C.M. 1947, 26-234; amd. Sec. 1, Ch. 461, L. 1981; amd. Sec. 6, Ch. 239, L. 1983; amd. Sec. 72, Ch. 18, L. 1995; amd. Sec. 1, Ch. 428, L. 1995; amd. Sec. 2, Ch. 336, L. 1997; amd. Sec. 2, Ch. 228, L. 2003.

87-1-606. Fee limitation for multiple licenses. If a person is issued more than one license under part 4, 9, or 10 of chapter 4 of this title, the total assessment for initial fees or for renewal fees for all licenses issued to such person may not exceed the amount of the largest individual license fee.

History: En. Sec. 49, Ch. 570, L. 1983.

87-1-607 through 87-1-609 reserved.

87-1-610. Contributions for leasing appropriation rights — general spending authority. (1) The department may accept contributions from public or private entities for the purpose of leasing appropriation rights to maintain or enhance instream flows for the benefit of fisheries.

(a) Any contributions accepted by the department under this section must be deposited in the fish and wildlife mitigation trust fund established in 87-1-611.

(b) The department shall expend money obtained under this section and deposited in the fish and wildlife mitigation trust fund exclusively to lease existing rights for the purpose of maintaining or enhancing instream flows for fisheries.

(2) The department may also expend other departmental funds to lease existing rights for the purpose of maintaining or enhancing instream flows for fisheries, including but not limited to departmental funds in the river restoration special revenue account established under 87-1-258.

History: En. Sec. 5, Ch. 658, L. 1989; amd. Sec. 4, Ch. 175, L. 1993.

87-1-611. Fish and wildlife mitigation trust fund created. (1) There is established, separate and apart from all public money or funds of this state, a fund to be known as the fish and wildlife mitigation trust fund. The fund must be administered by the department.

(2) The fund consists of:

(a) money received under written agreements, contracts, or authorizations with the department made for the purpose of fish and wildlife mitigation or enhancement;

(b) any gift, donation, grant, legacy, bequest, or devise made for the purpose of fish and wildlife mitigation or enhancement;

(c) any interest, earnings, or income of the fund; and

(d) any property or easements acquired through the expenditure of money from the fund.

History: En. Sec. 1, Ch. 445, L. 1987.

Cross-References

87-1-612. Purposes of the fish and wildlife mitigation trust fund. Expenditures may be made from the fish and wildlife mitigation trust fund for fish and wildlife mitigation or enhancement purposes pursuant to the written agreement, contract, authorization, or terms of a gift, donation, grant, legacy, bequest, or devise committing money to the fish and wildlife mitigation trust fund. The specific purposes are those designated in the written agreement, contract, authorization, or terms.

History: En. Sec. 2, Ch. 445, L. 1987.

87-1-613. Agreements for use of fund — department as trustee. (1) The department may enter into agreements with persons or entities committing money to the fish and wildlife mitigation trust fund concerning the purpose and manner of use of the money from the fish and wildlife mitigation trust fund.

(2) The department is the trustee of the fish and wildlife mitigation trust fund and is responsible for its administration and use.

History: En. Sec. 3, Ch. 445, L. 1987.

Cross-References

General powers of trustee, Title 72, ch. 38, part 8.

87-1-614. Expenditure of principal and earnings. The principal and interest, earnings, or income of the fish and wildlife mitigation trust fund shall be expended or retained according to the written agreement, contract, authorization, or terms of the gift, donation, grant, legacy, bequest, or devise committing money to the fish and wildlife mitigation trust fund.

History: En. Sec. 4, Ch. 445, L. 1987.

87-1-615. Investment of fish and wildlife mitigation trust fund. The fish and wildlife mitigation trust fund must be invested and managed by the board of investments as part of the unified investment program in a separate investment fund.

History: En. Sec. 5, Ch. 445, L. 1987.

Cross-References

87-1-616 through 87-1-620 reserved.

87-1-621. Forest management account. (1) There is a special revenue account called the forest management account to the credit of the department of fish, wildlife, and parks.

(2) The forest management account consists of money deposited into the account from forest management projects undertaken pursuant to 87-1-622 and from any other source. Any interest earned by the account must be deposited into the account.

(3) Except as otherwise directed by state or federal law, funds from the forest management account must be used by the department to implement forest management projects that may result pursuant to the provisions of 87-1-622.

History: En. Secs. 3, 4, Ch. 330, L. 2009; amd. Sec. 3, Ch. 395, L. 2011.

87-1-622. Forest management plan — sustainable yield study required — definition. (1) The commission and the board shall adopt forest management plans for lands under their jurisdiction, based on an annual sustainable yield, to implement the provisions of 87-1-201(10)(a)(iv).

(2) The department, under the direction of the commission, shall, before July 1, 2012, commission a study by a qualified independent third party to determine, using scientific principles, the annual sustainable yield on forested department lands. The department shall direct the qualified independent third party to determine the annual sustainable yield pursuant to all state and federal laws.

(3) The annual timber sale requirement for the timber sale program administered by the department to address fire mitigation, pine beetle infestation, and wildlife habitat enhancement may not exceed the annual sustainable yield.

(4) The commission and the board shall review and redetermine the annual sustainable yield for lands under their jurisdiction at least once every 5 years.

(5) Expenditures necessary to meet the requirements of this section are authorized to be made by the department pursuant to 87-1-601.

(6) For the purposes of this section, the term "annual sustainable yield" means the quantity of timber that can be harvested from forested department lands each year, taking into account the ability of forested lands to generate replacement tree growth and in accordance with:

(a) the provisions of 87-1-201(10)(a)(iv);

(b) state and federal laws, including but not limited to the laws pertaining to wildlife, recreation, and maintenance of watersheds; and

(c) water quality standards that protect fisheries and aquatic life and that are adopted under the provisions of Title 75, chapter 5.

History: En. Sec. 1, Ch. 395, L. 2011; amd. Sec. 32, Ch. 235, L. 2013; amd. Sec. 2, Ch. 117, L. 2023.

87-1-623. Wolf management account. (1) There is a wolf management account in the state special revenue fund established in 17-2-102. Fees collected from the sale of Class E-1 and Class E-2 wolf licenses and interest earned on the account must be deposited into the account. Subject to appropriation by the legislature, money deposited in the account must be used exclusively for the management of wolves as specified in subsection (2).

(2) Money deposited in accordance with subsection (1) must be equally divided and allocated for the following purposes:

(a) wolf-collaring activities conducted pursuant to 87-5-132; and

(b) lethal action conducted pursuant to 87-1-217 to take problem wolves that attack livestock.

(3) Any unspent or unencumbered money in the account at the end of a fiscal year must remain in the account.

History: **En. Sec. 5, Ch. 390, L. 2011.**

87-1-624 reserved.

87-1-625. Funding for wolf management. (1) The department shall allocate $500,000 annually for wolf management.

(2) For the purposes of this section, the term "management" has the same meaning provided in 87-5-102 and includes:

(a) wolf collaring conducted pursuant to 87-5-132; and

(b) lethal action conducted pursuant to 87-1-217 to take problem wolves that attack livestock.

(3) Not more than 25% of the total funding allocated under this section may be used for administrative costs.

(4) Pursuant to 87-1-201, the department may allocate funds from any source to meet the requirements of this section.

(5) The department may contract with the United States department of agriculture wildlife services and county governments for the purposes of this section.

History: **En. Sec. 2, Ch. 400, L. 2011; amd. Sec. 9, Ch. 438, L. 2015.**

87-1-626. Big game and wildlife highway crossings and accommodations license plates — authorization. (1) An applicant for a generic specialty license plate that is sponsored by the department of fish, wildlife, and parks shall make a donation of $20 to the department upon initial issuance of the license plates and a donation of $20 for each annual renewal of the license plates.

(2) The department shall establish a generic specialty license plate, as defined in 61-3-401, no later than January 1, 2026.

(3) The donation provided for in subsection (1) must be paid to the county treasurer, who shall remit the entire amount to the department of revenue for deposit in the big game and wildlife highway crossings and accommodations state special revenue account established in 87-1-627.

History: **En. Sec. 1, Ch. 540, L. 2025.**

Compiler's Comments

Effective Date: Section 7, Ch. 540, L. 2025, provided: "[This act] is effective on passage and approval." Approved May 8, 2025.

2025 Code Commissioner Correction: In (2) the Code Commissioner substituted "61-3-401" for "61-3-473". Ch. 395, L. 2025, repealed 61-3-473 and moved the definition of "generic specialty license plate" to 61-3-401.

87-1-627. Big game and wildlife highway crossings and accommodations account — purpose — funds invested — statutory appropriation. (1) There is a big game and wildlife highway crossings and accommodations state special revenue account within the state special revenue fund established in 17-2-102 administered by the department.

(2) The purpose of the account is to provide money exclusively for the design, construction, identification, maintenance, and conservation of wildlife crossings and other related crossing accommodations to improve wildlife permeability in the state, which may include but is not limited to:

(a) matching any federal money for a project to design, construct, identify, maintain, or protect wildlife crossings and other related crossing accommodation features;

(b) conducting studies on wildlife crossings and other related crossing accommodations;

(c) designing or constructing wildlife crossings and other related crossing accommodation features;

(d) planning related to wildlife crossings and other related crossing accommodation features, including assessing risk of wildlife disease transmission;

(e) staffing needs related to the design, construction, identification, maintenance, and conservation of wildlife crossings and other related crossing accommodation features; and

(f) any other needs the department identified in consultation with the department of transportation related to wildlife roadway accommodations.

(3) There must be deposited into the account transfers, gifts, grants, donations, income from investment of the fund, and any other money distributed or otherwise allocated to the fund.

(4) Money in the account is statutorily appropriated, as provided in 17-7-502, to the department for the purposes of 87-1-626 and 87-1-627.

(5) Money in the account may be used to fund the department of transportation for eligible projects or programs as determined by the department of fish, wildlife, and parks. The department of fish, wildlife, and parks shall consult with the department of transportation before funding qualifying projects in the state in accordance with subsection (2).

(6) Money that was not encumbered or expended from the account during the previous biennium must remain in the account.

(7) Deposits to the account must be placed in short-term investments to accrue interest. The interest must be deposited into the account.

History: En. Sec. 2, Ch. 540, L. 2025.

87-1-701. Assent to Dingell-Johnson Act. The congress of the United States passed an act that was approved on August 9, 1950, known as the Dingell-Johnson Act, Public Law 681, 81st congress, chapter 658, 2nd session, which provides, among other things, that "No money apportioned under this Act to any State, except as hereinafter provided, shall be expended therein until its legislature, or other State agency authorized by the State constitution to make laws governing the conservation of fish, shall have assented to the provisions of this Act and shall have passed laws for the conservation of fish, which shall include a prohibition against the diversion of license fees paid by fishermen for any other purpose than the administration of said State fish and game department, except that, until the final adjournment of the first regular session of the legislature held after passage of this Act, the assent of the governor of the State shall be sufficient." The money referred to in the Dingell-Johnson Act is collected in part from the anglers of the state of Montana and will not be returned to the state unless the state assents to the Dingell-Johnson Act. Therefore, the state of Montana assents to the Dingell-Johnson Act, but the assent is with the express reservations enumerated in 87-1-701 through 87-1-703. The state of Montana does not, by the passage of 87-1-701 through 87-1-703 or by the consent given in this section, surrender to the congress of the United States or any department of the government of the United States any of those rights that are retained by the people of the state of Montana or the state of Montana and that are guaranteed to them by the 9th and 10th amendments to the constitution of the United States, and 87-1-701 through 87-1-703 may not in any manner or at all be construed or held to be the state of Montana's consent to amending the constitution of the United States in any manner or at all relative to its rights. The title to all lands acquired under the provisions of 87-1-701 through 87-1-703 for fish restoration and management projects and projects constructed on those lands is and remains in the state.

History: **En. Sec. 1, Ch. 140, L. 1951; R.C.M. 1947, 26-1401; amd. Sec. 2, Ch. 218, L. 1979; amd. Sec. 2840, Ch. 56, L. 2009; amd. Sec. 1, Ch. 69, L. 2013.**

87-1-702. Powers of department relating to fish restoration and management. The department is hereby authorized to perform such acts as may be necessary to the establishment and conduct of fish restoration and management projects as defined and authorized by the act of congress, provided every project initiated under the provisions of the act shall be under the supervision of the department, and no laws or rules or regulations shall be passed, made, or established relating to said fish restoration and management projects except they be in conformity with the laws of the state of Montana or rules promulgated by the department, and the title to all lands acquired or projects created from lands purchased or acquired by deed or gift shall vest in, be, there remain in the state of Montana and shall be operated and maintained by it in accordance with the laws of the state of Montana. The department shall have no power to accept benefits unless the fish restoration and management projects created or established shall wholly and permanently belong to the state of Montana, except as hereinafter provided.

History: **En. Sec. 2, Ch. 140, L. 1951; amd. Sec. 13, Ch. 417, L. 1977; R.C.M. 1947, 26-1402.**

State Lands, Title 77.

87-1-703. Cooperative agreements on federally owned land. The department, in the name of the state and with the approval of the governor, shall have the power to enter into cooperative agreements on federally owned lands with the government of the United States or any department or bureau thereof or with an individual or individuals, private corporations, or partnerships for the purpose of carrying on any fish restoration projects created and established under the provisions of 87-1-701 through 87-1-703 and shall have the power to acquire by purchase, either by cash or upon installments, or lease or by gift or by devise or individually or in conjunction with the government of the United States or some department or bureau thereof such lands or other property or interest therein as may be necessary for the purpose of carrying on any fish restoration and management projects created and established under the provisions of said Dingell-Johnson bill of the congress of the United States, and the state does reserve to itself, acting through its legislature, the right to direct the department to abandon any fish restoration and management projects created and established as the state may in its judgment think proper. The department shall have no power to exercise the right of eminent domain to condemn or acquire property under 87-1-701 through 87-1-703.

History: En. Sec. 3, Ch. 140, L. 1951; amd. Sec. 13, Ch. 417, L. 1977; R.C.M. 1947, 26-1403; amd. Sec. 5, Ch. 44, L. 1979.

87-1-704. Federal fish-hatching operations. The government of the United States, the United States commissioner of fisheries, and the government's or commissioner's authorized agents may conduct fish-hatching and all operations connected with fish-hatching, in any manner and at any time that may be considered necessary and proper by them at any United States fish cultural station established by the United States government in the state of Montana.

History: En. Sec. 1, Ch. 9, L. 1913; re-en. Sec. 3712, R.C.M. 1921; re-en. Sec. 3712, R.C.M. 1935; amd. Sec. 11, Ch. 9, L. 1977; R.C.M. 1947, 26-330; amd. Sec. 2841, Ch. 56, L. 2009.

87-1-705. Acquisition of land by United States for migratory bird reservation. Consent of the state of Montana is given to the acquisition by the United States by purchase, gift, devise, or lease of such areas of land or water or of land and water in sections 31 and 32 in township 28 north of range 22 west; sections 4, 5, 8, 9, 16, 17, 18, 19, and 20 in township 27 north of range 22 west; sections 13, 14, 15, 16, 21, 22, 23, and 24 in township 27 north of range 23 west, in Flathead County, Montana, as the United States may deem necessary for the establishment of a migratory bird reservation in accordance with the act of congress approved February 18, 1929, entitled: "An Act to More Effectively Meet the Obligations of the United States Under the Migratory Bird Treaty with Great Britain by Lessening the Dangers Threatening Migratory Game Birds from Drainage and Other Causes by the Acquisition of Areas of Land and of Water to Furnish in Perpetuity Reservations for the Adequate Protection of Such Birds; and Authorizing Appropriations for the Establishment of Such Areas, Their Maintenance and Improvement and for Other Purposes", reserving, however, to the state of Montana full and complete jurisdiction and authority over all such areas not incompatible with the administration, maintenance, protection, and control thereof by the United States under the terms of said act of congress.

History: En. Sec. 1, Ch. 156, L. 1941; R.C.M. 1947, 26-1108.

87-1-706. Regulation of bird reserve in Flathead County. Upon the acquisition or establishment of any such refuge in Flathead County, state of Montana, the commission, acting under its authority to designate areas as resting, feeding, and breeding grounds for migratory and other species of birds and wild animals, shall in its discretion establish such areas as a state refuge and adopt such regulations not inconsistent with the regulations of the secretary of the United States department of agriculture governing such areas as it may deem necessary for their protection and may enter into cooperative agreements or arrangements with the secretary for the enforcement of the aforesaid act of congress and the regulations of the secretary of agriculture and for the maintenance and administration of such refuge.

History: En. Sec. 2, Ch. 156, L. 1941; R.C.M. 1947, 26-1109.

87-1-707. Water supply for the Benton Lake wildlife refuge. Consent of the state of Montana is given to the acquisition by the United States by purchase, gift, devise, or lease of a canal right-of-way approximately 66 feet in width, together with an area not to exceed 10 acres as a site for a pumping station works, or of land and water within township 22 north, range 1 west; township 23 north, range 2 west; township 23 north, range 1 west; township 23 north, range 1 east; township 23 north, range 2 east, Teton County; township 22 north, range 1 east, Cascade County; and township 23 north, range 3 east, Chouteau County for the transportation of a supplemental water supply for the Benton Lake national wildlife refuge, Cascade County, established by Executive Order No. 5228, November 21, 1929, and as amended by Executive Order No. 2416, July 25, 1940, in accordance with the act of congress approved February 18, 1929, entitled: "An Act to More Effectively Meet the Obligations of the United States Under the Migratory Bird Treaty with Great Britain by Lessening the Dangers Threatening Migratory Game Birds from Drainage and Other Causes by the Acquisition of Areas of Land and of Water to Furnish in Perpetuity Reservations for the Adequate Protection of Such Birds; and Authorizing Appropriations for the Establishment of Such Areas, Their Maintenance and Improvement and for Other Purposes", reserving, however, to the state of Montana full and complete jurisdiction and authority over all such areas not incompatible with the administration, maintenance, protection, and control thereof by the United States under the terms of said act of congress.

History: En. Sec. 1, Ch. 227, L. 1953; R.C.M. 1947, 26-1108.1.

Cross-References

Interference with canal or ditch easements prohibited, 70-17-112.

87-1-708. Assent to Pittman-Robertson Act — authority of department. (1) The congress of the United States having passed an act which was approved on September 2, 1937, and which is known as 50 Federal Statutes 917 of the acts of congress, wherein it is, among other things, provided that "no money apportioned under this chapter to any state shall be expended therein until its legislature or other state agency authorized by the state constitution to make laws governing the conservation of wildlife shall have assented to the provisions of this chapter and shall have passed laws for the conservation of wildlife, which shall include a prohibition against the diversion of license fees paid by hunters for any other purpose than the administration of said department", and since the moneys referred to in the act of congress are collected in part from the hunters of this state and will not be returned to the state of Montana except the state of Montana does assent to the act, now, therefore, the state of Montana does assent to the provisions of said act of congress which is commonly known as the Pittman-Robertson bill, but such assent is with the express reservations enumerated in this section, 87-1-709, and 87-1-710. The state of Montana does not by the passage of these sections or by the consent herein given surrender to the congress of the United States or any department of the government of the United States any of those rights which are retained by the people of the state of Montana or the state of Montana and which are guaranteed to them by the 9th and 10th amendments to the constitution of the United States, nor shall this section, 87-1-709, and 87-1-710 in any manner or at all be construed or held to be the state of Montana's consent to amending the constitution of the United States in any manner or at all relative to its rights. Provided, however, that nothing herein shall be construed as giving consent to the purchase or acquisition of lands by the United States or by any of its departments or officers for establishing migratory bird sanctuaries under the Migratory Bird Conservation Act of the United States or otherwise and that the title to all lands acquired under the provisions of this section, 87-1-709, and 87-1-710 for wildlife projects and projects constructed thereon shall be and remain in the state of Montana.

(2) The department is hereby authorized to perform such acts as may be necessary to the establishment and conduct of wildlife projects as defined and authorized by said act of congress, provided every project initiated under the provisions of this section, 87-1-709, and 87-1-710 shall be under the supervision of the department, and no laws or rules or regulations shall be passed, made, or established governing the game or fur-bearing animals or the taking or capturing of the same in any such projects except they be in conformity with the laws of the state of Montana or rules promulgated by the department. The title to all lands acquired or projects created from lands purchased or acquired by deed or gift shall vest in, be, and remain in the state of Montana and shall be operated and maintained by it in accordance with the laws of the state of Montana. The department shall have no power to accept benefits unless the projects created or established shall wholly and permanently belong to the state of Montana, except as provided in 87-1-709. Nothing contained herein shall prevent the department from entering into cooperative agreements on federally owned lands as provided for herein.

History: (1)En. Sec. 1, Ch. 167, L. 1941; Sec. 26-1122, R.C.M. 1947; (2)En. Sec. 2, Ch. 167, L. 1941; amd. Sec. 1, Ch. 80, L. 1951; amd. Sec. 13, Ch. 417, L. 1977; Sec. 26-1123, R.C.M. 1947; R.C.M. 1947, 26-1122, 26-1123.

87-1-709. Cooperation with United States for wildlife restoration. The department, in the name of the state and with the approval of the governor, shall have the power to enter into the cooperative agreements on federally owned lands with the government of the United States or some department or bureau thereof or with an individual or individuals, private corporations, or partnerships for the purpose of carrying on any wildlife restoration project and established under the provisions of said Pittman-Robertson Act of the congress of the United States and shall have the power to acquire by purchase, either for cash or upon installments, or lease or by gift or devise, either individually or in conjunction with the government of the United States or some department or bureau thereof, such lands or other property or interests therein as may be necessary for the purpose of carrying on any wildlife restoration project created and established under the provisions of said Pittman-Robertson Act of the congress of the United States. The state of Montana does reserve to itself, acting through its legislature, the right to direct the department to abandon any wildlife restoration projects created and established as the state of Montana may in its judgment think proper, provided the department shall have no power to exercise the right of eminent domain to condemn or acquire property under 87-1-708 through 87-1-710.

History: En. Sec. 3, Ch. 167, L. 1941; amd. Sec. 2, Ch. 80, L. 1951; amd. Sec. 13, Ch. 417, L. 1977; R.C.M. 1947, 26-1124.

87-1-710. Use of hunters' license fees for department purposes only. In accordance with the other requirement of said act of congress, it shall be the law of this state, so long as this assent shall be unrepealed, that no license fees paid by hunters in the state of Montana shall be used or taken for any other purpose than the administration and use of the department.

History: En. Sec. 4, Ch. 167, L. 1941; R.C.M. 1947, 26-1125.

87-1-711. Acquisition of land by United States for bison and other big game animals. Consent of the state of Montana is given to the acquisition by the United States by purchase, gift, devise, or lease of such areas of land or water or of land and water in section 31, township 18 north, range 20 west, Lake County, Montana, and section 36, township 18 north, range 21 west, Sanders County, Montana, excepting the Northern Pacific railway and state of Montana lands within said sections, as the United States may deem necessary for the establishment of an exhibition park for bison and other big game animals, reserving, however, to the state of Montana full and complete jurisdiction and authority over all such areas not incompatible with the administration, maintenance, protection, and control thereof by the United States under the terms of applicable federal regulations.

History: En. Sec. 1, Ch. 209, L. 1953; R.C.M. 1947, 26-1126.

87-1-712. Development of national bison range. Upon the acquisition or establishment of any such park in Lake County and Sanders County, the fish and wildlife service, United States department of the interior, agrees to develop, improve, and maintain the park for the display of such native big game animals as are available on the national bison range.

History: En. Sec. 2, Ch. 209, L. 1953; R.C.M. 1947, 26-1127.

87-1-713. Federal waterfowl and wildlife area acquisitions — submission to affected county governing bodies for review. The governor, the department, or their agents, responsible under federal law for final approval of land, wetland, and water acquisitions in fee by the United States government or its agents for waterfowl protection areas or wildlife refuges, or the United States fish and wildlife service shall submit the proposed acquisitions to the governing body of each county in which all or part of the land, wetland, and water areas are proposed to be located for the governing body's recommendations.

History: En. Sec. 1, Ch. 309, L. 1979.

Cross-References

Consent to purchase lands for migratory bird reservations, 2-1-211.

87-1-714. Hearings on proposed waterfowl and wildlife area acquisitions. (1) The governing body of the county affected by a proposed federal acquisition of land under 87-1-713, the department, and the United States fish and wildlife service shall, within 21 days of receipt of an acquisition proposal, physically inspect the proposed acquisition areas, if the governing body deems such inspection appropriate.

(2) If requested by the governing body, the agencies described in subsection (1) shall hold a joint public hearing on the proposed acquisition and shall give public notice of the date, time, and place of the hearing. The hearing shall be held in the county in which the proposed acquisition is located. The hearing shall be held within 30 days of the governing body's receipt of the acquisition proposal. The notice shall be published once a week for 2 successive weeks in a

newspaper of general circulation in each county in which all or part of the proposed acquisition is located. The notice shall include the substance of the proposed action and a legal description of the proposed acquisitions.

History: **En. Sec. 2, Ch. 309, L. 1979.**

Part 8
Interstate Wildlife Violator Compact

Part Cross-References

Interstate fishing privileges, Title 87, ch. 2, part 10.

87-1-801. Compact adopted — text. The Interstate Wildlife Violator Compact is entered into by this state, with all other states legally joining therein, in the form substantially as follows:

INTERSTATE WILDLIFE VIOLATOR COMPACT
ARTICLE I
Findings, Declaration of Policy, and Purpose

(1) The participating states find that the following provisions apply:

(a) Wildlife resources are managed in trust by the respective states for the benefit of all residents and visitors.

(b) The protection of the wildlife resources of a state is materially affected by the degree of compliance with state statutes, laws, ordinances, regulations, and administrative rules relating to the management of such resources.

(c) The preservation, protection, management, and restoration of wildlife contributes immeasurably to the aesthetic, recreational, and economic aspects of such natural resources.

(d) Wildlife resources are valuable without regard to political boundaries; therefore, every person should be required to comply with wildlife preservation, protection, management and restoration laws, ordinances, regulations, and administrative rules of the participating states as a condition precedent to the continuance or issuance of any license to hunt, fish, trap, or possess wildlife.

(e) Violation of wildlife laws interferes with the management of wildlife resources and may endanger the safety of persons and property.

(f) The mobility of many wildlife law violators necessitates the maintenance of channels of communication among the various states.

(g) In most instances, a person who is cited for a wildlife violation in a state other than that person's own state:

(i) is required to post collateral or a bond to secure appearance for a trial at a later date;

(ii) is taken into custody until the collateral or bond is posted; or

(iii) is taken directly to court for an immediate appearance.

(h) The purpose of the enforcement practices set forth in subsection (1)(g) of this article is to ensure compliance with the terms of a wildlife citation by the cited person who, if permitted to proceed after receiving the citation, could return to the person's home state and disregard the person's duty under the terms of the citation.

(i) In most instances, a person receiving a wildlife citation in that person's home state is permitted to accept the citation from the officer at the scene of the violation and immediately proceed after agreeing or being instructed to comply with the terms of the citation.

(j) The practices described in subsection (1)(g) of this article cause unnecessary inconvenience and, at times, a hardship for the person who is unable at the time to post collateral, furnish a bond, stand trial, or pay a fine and is thus compelled to remain in custody until some alternative arrangement is made.

(k) The enforcement practices described in subsection (1)(g) of this article consume an undue amount of law enforcement time.

(2) It is the policy of the participating states to:

(a) promote compliance with the statutes, laws, ordinances, regulations, and administrative rules relating to management of wildlife resources in their respective states;

(b) recognize the suspension of wildlife license privileges of any person whose license privileges have been suspended by a participating state and treat such suspension as if it had occurred in their state;

(c) allow a violator, except as provided in subsection (2) of Article III, to accept a wildlife citation and proceed without delay, whether or not a resident of the state in which the citation was issued, provided that the violator's home state is party to this compact;

(d) report to the appropriate participating state, as provided in the compact manual, any conviction recorded against any person whose home state was not the issuing state;

(e) allow the home state to recognize and treat convictions recorded against its residents, which convictions occurred in a participating state, as though they occurred in the home state;

(f) extend cooperation to its fullest extent among the participating states for enforcing compliance with the terms of a wildlife citation issued in one participating state to a resident of another participating state;

(g) maximize effective use of law enforcement personnel and information;

(h) assist court systems in the efficient disposition of wildlife violations.

(3) The purpose of this compact is to:

(a) provide a means through which participating states may join in a reciprocal program to effectuate the policies enumerated in subsection (2) of this article in a uniform and orderly manner;

(b) provide for the fair and impartial treatment of wildlife violators operating within participating states in recognition of the violator's right to due process and the sovereign status of a participating state.

ARTICLE II
Definitions

As used in this compact and 87-1-802 through 87-1-805, unless the context requires otherwise, the following definitions apply:

(1) "Citation" means any summons, complaint, summons and complaint, ticket, penalty assessment, or other official document that is issued to a person by a wildlife officer or other peace officer for a wildlife violation and that contains an order requiring the person to respond.

(2) "Collateral" means any cash or other security deposited to secure an appearance for trial in connection with the issuance by a wildlife officer or other peace officer of a citation for a wildlife violation.

(3) "Compliance" with respect to a citation means the act of answering a citation through an appearance in a court or tribunal, or through the payment of fines, costs, and surcharges, if any.

(4) "Conviction" means a conviction, including any court conviction, for any offense that is related to the preservation, protection, management, or restoration of wildlife and that is prohibited by state statute, law, regulation, ordinance, or administrative rule. Such conviction shall also include the forfeiture of any bail, bond, or other security deposited to secure appearance by a person charged with having committed any such offense, the payment of a penalty assessment, a plea of nolo contendere and the imposition of a deferred or suspended sentence by the court.

(5) "Court" means a court of law, including magistrate's court and the justice of the peace court.

(6) "Home state" means the state of primary residence of a person.

(7) "Issuing state" means the participating state which issues a wildlife citation to the violator.

(8) "License" means any license, permit, or other public document which conveys to the person to whom it was issued the privilege of pursuing, possessing, or taking any wildlife regulated by statute, law, regulation, ordinance, or administrative rule of a participating state.

(9) "Licensing authority" means the department or division within each participating state which is authorized by law to issue or approve licenses or permits to hunt, fish, trap, or possess wildlife.

(10) "Participating state" means any state which enacts legislation to become a member of this wildlife compact.

(11) "Personal recognizance" means an agreement by a person made at the time of issuance of the wildlife citation that such person will comply with the terms of the citation.

(12) "State" means any state, territory, or possession of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Provinces of Canada, and other countries.

(13) "Suspension" means any revocation, denial, or withdrawal of any or all license privileges, including the privilege to apply for, purchase, or exercise the benefits conferred by any license.

(14) "Terms of the citation" means those conditions and options expressly stated in the citation.

(15) "Wildlife" means all species of animals including but not limited to mammals, birds, fish, reptiles, amphibians, mollusks, and crustaceans, which are defined as "wildlife" and are protected or otherwise regulated by statute, law, regulation, ordinance, or administrative rule in a participating state. Species included in the definition of "wildlife" vary from state to state, and determination of whether a species is "wildlife" for purposes of this compact shall be based on state or local law.

(16) "Wildlife law" means any statute, law, regulation, ordinance, or administrative rule developed and enacted for the management of wildlife resources and the uses thereof.

(17) "Wildlife officer" means any individual authorized by a participating state to issue a citation for a wildlife violation.

(18) "Wildlife violation" means any cited violation of a statute, law, regulation, ordinance, or administrative rule developed and enacted for the management of wildlife resources and the uses thereof.

ARTICLE III
Procedures for Issuing State

(1) When issuing a citation for a wildlife violation, a wildlife officer shall issue a citation to any person whose primary residence is in a participating state in the same manner as though the person were a resident of the issuing state and shall not require such person to post collateral to secure appearance, subject to the exceptions noted in subsection (2) of this article, if the officer receives the recognizance of such person that the person will comply with the terms of the citation.

(2) Personal recognizance is acceptable:

(a) if not prohibited by state or local law or the compact manual; and

(b) if the violator provides adequate proof of identification to the wildlife officer.

(3) Upon conviction or failure of a person to comply with the terms of a wildlife citation, the appropriate official shall report the conviction or failure to comply to the licensing authority of the participating state in which the wildlife citation was issued. The report shall be made in accordance with procedures specified by the issuing state and shall contain information as specified in the compact manual as minimum requirements for effective processing by the home state.

(4) Upon receipt of the report of conviction or noncompliance pursuant to subsection (3) of this article, the licensing authority of the issuing state shall transmit to the licensing authority of the home state of the violator the information in form and content as prescribed in the compact manual.

ARTICLE IV
Procedure for Home State

(1) Upon receipt of a report from the licensing authority of the issuing state reporting the failure of a violator to comply with the terms of a citation, the licensing authority of the home state shall notify the violator and shall initiate a suspension action in accordance with the home state's suspension procedures and shall suspend the violator's license privileges until satisfactory evidence of compliance with the terms of the wildlife citation has been furnished by the issuing state to the home state licensing authority. Due process safeguards will be accorded.

(2) Upon receipt of a report of conviction from the licensing authority of the issuing state, the licensing authority of the home state shall enter such conviction in its records and shall treat such conviction as though it occurred in the home state for the purposes of the suspension of license privileges.

(3) The licensing authority of the home state shall maintain a record of actions taken and shall make reports to issuing states as provided in the compact manual.

ARTICLE V
Reciprocal Recognition of Suspension

(1) All participating states shall recognize the suspension of license privileges of any person by any participating state as though the violation resulting in the suspension had occurred in their state and could have been the basis for suspension of license privileges in their state.

(2) Each participating state shall communicate suspension information to other participating states in form and content as contained in the compact manual.

ARTICLE VI
Applicability of Other Laws

Except as expressly required by provisions of this compact, nothing herein shall be construed to affect the right of any participating state to apply any of its laws relating to license privileges to any person or circumstance or to invalidate or prevent any agreement or other cooperative arrangement between a participating state and a nonparticipating state concerning wildlife law enforcement.

ARTICLE VII
Compact Administrator — Procedures

(1) For the purposes of administering the provisions of this compact and to serve as a governing body for the resolution of all matters relating to the operation of this compact, a board of compact administrators is established. The board shall be composed of one representative from each of the participating states, to be known as the compact administrator. The compact administrator shall be appointed by the head of the licensing authority of each participating state and shall serve and be subject to removal in accordance with the laws of the state the compact administrator represents. A compact administrator may provide for the discharge of duties and the performance of functions as a board member by an alternate. An alternate shall not be entitled to serve unless written notification of the identity of the alternate has been given to the board.

(2) Each member of the board of compact administrators shall be entitled to one vote. No action of the board shall be binding unless taken at a meeting at which a majority of the total number of the board's votes are cast in favor thereof. Action by the board shall be only at a meeting at which a majority of the participating states are represented.

(3) The board shall elect annually from its membership a presiding officer and a vice presiding officer.

(4) The board shall adopt bylaws not inconsistent with the provisions of this compact or the laws of a participating state for the conduct of its business and shall have the power to amend and rescind its bylaws.

(5) The board may accept for any of its purposes and functions under this compact any and all donations and grants of money, equipment, supplies, materials, and services, conditional or otherwise, from any state, the United States, or any governmental agency, and receive, utilize, and dispose of same.

(6) The board may contract with, or accept services or personnel from, any governmental or intergovernmental agency, individual, firm, or corporation, or any private nonprofit organization or institution.

(7) The board shall formulate all necessary procedures and develop uniform forms and documents for administering the provisions of this compact. All procedures and forms adopted pursuant to board action shall be contained in a compact manual.

ARTICLE VIII
Entry Into Compact and Withdrawal

(1) This compact shall become effective at such time as it is adopted in a substantially similar form by two or more states.

(2) (a) Entry into the compact shall be made by resolution of ratification executed by the authorized officials of the applying state and submitted to the presiding officer of the board.

(b) The resolution shall substantially be in the form and content as provided in the compact manual and shall include the following:

(i) a citation of the authority from which the state is empowered to become a party to this compact;

(ii) an agreement of compliance with the terms and provisions of this compact; and

(iii) an agreement that compact entry is with all states participating in the compact and with all additional states legally becoming a party to the compact.

(c) The effective date of entry shall be specified by the applying state but shall not be less than 60 days after notice has been given:

(i) by the presiding officer of the board of the compact administrators; or

(ii) by the secretariat of the board to each participating state that the resolution from the applying state has been received.

(3) A participating state may withdraw from participation in this compact by official written notice to each participating state, but withdrawal shall not become effective until 90 days after the notice of withdrawal is given. The notice shall be directed to the compact administrator of each member state. No withdrawal of any state shall affect the validity of this compact as to the remaining participating states.

ARTICLE IX
Amendments to the Compact

(1) This compact may be amended from time to time. Amendments shall be presented in resolution form to the presiding officer of the board of the compact administrators and shall be initiated by one or more participating states.

(2) Adoption of an amendment shall require endorsement by all participating states and shall become effective 30 days after the date of the last endorsement.

(3) Failure of a participating state to respond to the compact presiding officer within 120 days after receipt of a proposed amendment shall constitute endorsement thereof.

ARTICLE X
Construction and Severability

This compact shall be liberally construed so as to effectuate the purposes stated herein. The provisions of this compact shall be severable, and if any phrase, clause, sentence, or provision of this compact is declared to be contrary to the constitution of any participating state or the United States, or the applicability thereof to any government, agency, individual, or circumstance is held invalid, the validity of the remainder of the compact shall not be affected thereby. If this compact shall be held contrary to the constitution of any participating state, the compact shall remain in full force and effect as to the remaining states and in full force and effect as to the participating state affected as to all severable matters.

History: En. Sec. 1, Ch. 122, L. 1995.

87-1-802. Department authorization to effect purposes of compact. (1) The department shall enforce the Interstate Wildlife Violator Compact and shall do all things within the department's jurisdiction that are appropriate in order to effectuate the purposes and the intent of the compact.

(2) The department is authorized on behalf of the state of Montana to enter into or withdraw from the Interstate Wildlife Violator Compact pursuant to the terms of Article VIII of the compact.

(3) The department is authorized to adopt amendments to the Interstate Wildlife Violator Compact pursuant to the terms of Article IX of the compact.

History: En. Sec. 2, Ch. 122, L. 1995.

87-1-803. Reciprocal recognition of license suspensions — suspension of privileges for conviction in participating state. (1) When the department receives notice of the suspension of a person's hunting, trapping, or fishing privileges by a participating state, the department shall determine whether the violation leading to the suspension could have led to the forfeiture of privileges under Montana law. If the department determines that the person's privileges could have been forfeited, the department shall suspend the person's privileges to hunt, trap, or fish in Montana for the same period as imposed by the participating state or for the minimum period that would have been imposed under Montana law, whichever period is longer.

(2) When the department receives notice of a conviction of a Montana resident from the licensing authority of the issuing state, the department shall treat the conviction as if it had occurred in Montana and shall determine whether the conviction could have led to the forfeiture of the resident's hunting, trapping, or fishing privileges under Montana law. If the department determines that the resident's privileges could have been forfeited, the department shall suspend the resident's privileges to hunt, trap, or fish in Montana for the minimum period that would have been imposed under Montana law.

(3) Notice of the suspension must be sent to the person, who shall surrender any current Montana hunting, trapping, and fishing licenses to the department within 10 days.

History: En. Sec. 3, Ch. 122, L. 1995; amd. Sec. 7, Ch. 502, L. 1999; amd. Sec. 89, Ch. 258, L. 2011.

87-1-804. Suspension of privileges for failure to comply with citation issued in participating state. (1) The department shall suspend the hunting, trapping, or fishing privileges of any resident of Montana upon notification from the licensing authority of an issuing state that the resident has failed to comply with the terms of a citation issued for a wildlife violation. The suspension remains in effect until the department receives satisfactory evidence of compliance from the issuing state.

(2) Notice of the suspension must be sent to the resident, who shall surrender all current Montana hunting, trapping, and fishing licenses to the department within 10 days.

History: En. Sec. 4, Ch. 122, L. 1995; amd. Sec. 8, Ch. 502, L. 1999; amd. Sec. 90, Ch. 258, L. 2011.

87-1-805. Hearing on suspension. (1) Upon suspending the hunting, trapping, or fishing privileges of any person under 87-1-803 or 87-1-804, the department shall immediately notify the person in writing. The person may, within 20 days of the notice, request a hearing before the department on whether the requirements for suspension have been met. The hearing must be informal.

(2) Upon request, the department shall set a hearing as early as practicable.

(3) (a) The requesting person may present evidence and arguments at the hearing contesting whether:

(i) a participating state suspended the person's privileges;

(ii) there was a conviction in the participating state;

(iii) the person failed to comply with the terms of a citation issued for a wildlife violation in a participating state; or

(iv) a conviction in a participating state could have led to the forfeiture of privileges under Montana law.

(b) Grounds other than those listed in subsection (3)(a) may not be used to contest the department's decision to suspend the person's privileges.

(4) At the hearing, the department, through its authorized agent, may:

(a) administer oaths;

(b) issue subpoenas for the attendance of witnesses; and

(c) admit all relevant evidence and documents, including notifications from participating states.

(5) Following the hearing, the department, through its authorized agent, may, based on the evidence, affirm, modify, or rescind the suspension of privileges.

History: En. Sec. 5, Ch. 122, L. 1995.

Part 9
Gray Wolf Management

87-1-901. Gray wolf management — rulemaking — reporting. (1) Except as provided in subsection (3), the commission shall establish by rule hunting and trapping seasons for wolves with the intent to reduce the wolf population in this state to a sustainable level, but not less than the number of wolves necessary to support at least 15 breeding pairs. Trapping seasons must allow for the use of snares by the holder of a trapping license.

(2) For game management purposes, the commission shall apply different management techniques depending on the conditions in each administrative region, with the most liberal harvest regulations applied in regions with the greatest number of wolves. In doing so, the commission may authorize:

(a) the issuance of more than one Class E-1 or Class E-2 wolf hunting license to an applicant;

(b) the trapping or snaring of more than one wolf by the holder of a trapping license;

(c) the harvest of an unlimited number of wolves by the holder of a single wolf hunting or wolf trapping license;

(d) during the wolf trapping season, the use of bait while hunting or trapping wolves as long as no trap or snare trap is set within 30 feet of exposed bait visible from above; and

(e) the hunting of wolves on private lands outside of daylight hours with the use of artificial light, night vision scopes, infrared scopes, or thermal imagery scopes.

(3) The commission shall adopt rules to allow a landowner or the landowner's agent to take a wolf on the landowner's property at any time without the purchase of a Class E-1 or Class E-2 wolf license when the wolf is a potential threat to human safety, livestock, or dogs. The rules must:

(a) be consistent with the Montana gray wolf conservation and management plan and the adaptive management principles of the commission and the department for the Montana gray wolf population;

(b) require a landowner or the landowner's agent who takes a wolf pursuant to this subsection (3) to promptly report the taking to the department and to preserve the carcass of the wolf;

(c) establish a quota each year for the total number of wolves that may be taken pursuant to this subsection (3); and

(d) allow the commission to issue a moratorium on the taking of wolves pursuant to this subsection (3) before a quota is reached if the commission determines that circumstances require a limitation of the total number of wolves taken.

(4) Public land permittees who have experienced livestock depredation must obtain a special kill permit authorized in 87-5-131(3)(b) to take a wolf on public land without the purchase of a Class E-1 or Class E-2 license.

(5) The department shall report annually to the environmental quality council in accordance with 5-11-210 regarding the implementation of 87-5-131, 87-5-132, and this section.

History: En. Sec. 1, Ch. 297, L. 2013; amd. Sec. 1, Ch. 162, L. 2021; amd. Sec. 129, Ch. 261, L. 2021; amd. Sec. 1, Ch. 336, L. 2021; amd. Sec. 1, Ch. 432, L. 2025.

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 1, Ch. 432, L. 2025. Amendment effective September 29, 2025.

2025 Correction: A Senate committee amended House Bill No. 259 (now Ch. 432, L. 2025). The amended version was approved by the Senate and concurred in by the House. During the enrolling process, a failed House amendment was incorrectly engrossed into the bill. This incorrect version was sent to and signed by the Governor. Subsequently, the corrected version was delivered to the Governor on September 23, 2025, and signed by the Governor on September 29, 2025.

Effective Date: Section 2, Ch. 432, L. 2025, provided: "[This act] is effective on passage and approval." Chapter 432 was revised through correction on September 29, 2025; see 2025 Correction compiler's comment.

CHAPTER 2

FISHING, HUNTING, AND TRAPPING LICENSES

Part 1 — General Provisions

87-2-101. Definitions.
87-2-102. Resident defined.
87-2-103. Repealed.
87-2-104. Number of licenses, permits, or tags allowed — fees.
87-2-105. Hunter safety and education required.
87-2-106. Application for license.
87-2-107. License form.
87-2-108. Repealed.
87-2-109. Repealed.
87-2-110. Repealed.
87-2-111. Termination of license.

87-2-112. Repealed.
87-2-113. Application fees.
87-2-114. Repealed.
87-2-115. Nonresident elk and deer license preference point system.
87-2-116. Base hunting license prerequisite for other hunting licenses — fee.
87-2-117. License bonus point system.
87-2-118 reserved.
87-2-119. Electronic validation of hunting licenses and tags — rulemaking.
87-2-120. Repealed.
87-2-121. Lawful method of hunting on landowner's private property.
87-2-122 and 87-2-123 reserved.
87-2-124. Option to direct limited drawing refunds to block management program.
87-2-125. Eligibility standards for licenses or permits obtained by telephone, mail, or electronic means — rulemaking.
87-2-126. Provisional hunter safety and education certificate for person with developmental disability — conditions of licensure — definition.
87-2-127. Trapper education required.
87-2-128 and 87-2-129 reserved.
87-2-130. Aquatic invasive species prevention pass.

Part 2 — Wildlife Conservation License

87-2-201. Conservation license required and prerequisite for other licenses.
87-2-202. Application — fee.
87-2-203. Repealed.
87-2-204. Disposition of conservation license fees.
87-2-205. Repealed.

Part 3 — Fishing Licenses

87-2-301. Class A—resident fishing license.
87-2-302. Class B—nonresident fishing license.
87-2-303. Repealed.
87-2-304. Class B-4—one-day nonresident fishing license.
87-2-305. Navigable waters subject to fishing rights.
87-2-306. Paddlefish tags.
87-2-307. Class B-5—five-day nonresident fishing license.
87-2-308. Class A-8—resident temporary fishing license.
87-2-309 and 87-2-310 reserved.
87-2-311. Free fishing weekends.

Part 4 — Game Bird Licenses

87-2-401. Class A-1—resident upland game bird license.
87-2-402. Class B-1—nonresident upland game bird license.
87-2-403. Wild turkey tags and fee.
87-2-404. Three-day nonresident captive-reared bird hunting stamp.
87-2-405. Class B-2—3-day nonresident upland game bird license.
87-2-406 through 87-2-410 reserved.
87-2-411. Migratory game bird licenses — fees — disposition of proceeds.
87-2-412. Repealed.

Part 5 — Game Animal Licenses

87-2-501. Class A-3, A-4, A-5, A-6, and A-9 resident deer, elk, and bear licenses — fees.
87-2-502. Repealed.
87-2-503. Repealed.
87-2-504. Class B-7 and B-8—nonresident deer licenses.
87-2-505. Class B-10—nonresident big game combination license.
87-2-506. Restrictions on hunting licenses.
87-2-507. Class D-1—nonresident mountain lion license.
87-2-508. Class D-2—resident mountain lion license.
87-2-509. Repealed.
87-2-510. Class B-11—nonresident deer combination license.
87-2-511. Sale and use of Class B-10 and Class B-11 licenses.
87-2-512. Separation of Class B-7 license from Class B-10 license for deer management purposes — disposition of license revenue.
87-2-513. Either-sex or antlerless elk license or permit for landowner who offers free public elk hunting — terms, conditions, and issuance.
87-2-514. Nonresident relative of resident allowed to purchase nonresident licenses at reduced cost — definitions.
87-2-515. Repealed.
87-2-516. Drawing for Class A-9 and Class B-12 antlerless elk B tag licenses — landowner preference.
87-2-517 and 87-2-518 reserved.

87-2-519. Class D-4—nonresident hound license.
87-2-520. Supplemental game damage license — terms and conditions.
87-2-521. Class D-3—resident hound training license.
87-2-522. Nonresident youth combination licenses.
87-2-523. Class E-1—resident wolf license.
87-2-524. Class E-2—nonresident wolf license.
87-2-525. Nonresident college student licenses.
87-2-526. License for nonresident to hunt with resident sponsor or family member — use of license revenue.
87-2-527 through 87-2-529 reserved.
87-2-530. Class F—nonresident wildlife management area shed hunting license.

Part 6 — Furbearer Licenses

87-2-601. Class C—trapper's license.
87-2-602. Class C-1—landowner's trapping license.
87-2-603. Class C-2—nonresident trapper's license — reciprocity.
87-2-604. Repealed.
87-2-605. Class C-3—youth trapping license.
87-2-606. Class C-4—resident license to hunt bobcat, wolverine, and Canada lynx.

Part 7 — Special and Combination Licenses and Nongame Certificate

87-2-701. Special licenses.
87-2-702. Restrictions on special licenses — availability of bear and mountain lion licenses.
87-2-703. Repealed.
87-2-704. Regulation of special elk permits.
87-2-705. Drawing for special elk permits.
87-2-706. Drawing for special antelope licenses — licenses for those with life-threatening illness.
87-2-707. Repealed.
87-2-708. Class A-2—special bow and arrow license.
87-2-709 and 87-2-710 reserved.
87-2-711. Class AAA—combination sports license.
87-2-712. Repealed.
87-2-713. Terminated.
87-2-714. Landowner preference for Class B-10 nonresident big game combination license.
87-2-715 through 87-2-720 reserved.
87-2-721. Repealed.
87-2-722. Auction of mountain sheep license.
87-2-723. Repealed.
87-2-724. Auction of Shiras moose license.
87-2-725. Auction or lottery of mountain goat license — rules.
87-2-726 through 87-2-729 reserved.
87-2-730. Special wild buffalo license — regulation.
87-2-731. Terminated.
87-2-732. Allocation of wild buffalo licenses to tribes for traditional purposes.
87-2-733 and 87-2-734 reserved.
87-2-735. Landowner preference licenses and permits for deer and antelope.

Part 8 — Exceptions to License Requirements

87-2-801. Licenses for residents at least 62 years of age or at least 75 years of age.
87-2-802. Veterans in VA hospitals and residents of state institutions and long-term care facilities, nursing care facilities, assisted living facilities, and community homes for persons with disabilities.
87-2-803. Licenses for persons with disabilities — definitions.
87-2-804. Repealed.
87-2-805. Licenses for persons under 18 years of age.
87-2-806. Taking fish or game for scientific purposes.
87-2-807. Taking migratory game birds for propagation — avicultural permit.
87-2-808. Fishing license exception for angler educational events and activities.
87-2-809. Repealed.
87-2-810. Apprentice certificate.
87-2-811. Auction or lottery of mule deer license.
87-2-812. Auction or lottery of elk license.
87-2-813. Auction or lottery of wolf license.
87-2-814. Auction or lottery of grizzly bear license.
87-2-815. Donation of hunting licenses to disabled veterans or disabled members of the armed forces.
87-2-816. Licenses for legion of valor members — purple heart awardees.
87-2-817. Licenses for service members.
87-2-818. Law enforcement officers and firefighters critically injured in line of duty.
87-2-819 and 87-2-820 reserved.
87-2-821. Auction or lottery of antelope license.
87-2-822. Auction or lottery of swan license.

Part 9 — License Agents
87-2-901. Appointment of license agents.
87-2-902. Repealed.
87-2-903. Compensation, fees, and duties of agents — penalty for late submission of license money.
87-2-904. Nontransferability of appointments — revocation and oaths.
Part 10 — Interstate Fishing Privileges
87-2-1001. Reciprocal fishing privileges of licensees of bordering states.
87-2-1002. Regulation of devices and equipment used under reciprocal privilege.
87-2-1003. Bodies of water subject to reciprocal privileges.
87-2-1004. Rules to implement reciprocal agreements.

Chapter Cross-References

Criminal jurisdiction, 3-10-303.
Discrimination in license issuance prohibited, 49-3-204.
License and permit revocation and denial — penalty, 87-5-721.

Part 1
General Provisions

87-2-101. Definitions. As used in Title 87, chapter 3, and this chapter, unless the context clearly indicates otherwise, the following definitions apply:

(1) "Angling" or "fishing" means to take or harvest fish or the act of a person possessing any instrument, article, or substance for the purpose of taking or harvesting fish in any location that a fish might inhabit.

(2) (a) "Bait" means any animal matter, vegetable matter, or natural or artificial scent placed in an area inhabited by wildlife for the purpose of attracting game animals or game birds.

(b) The term does not include:

(i) decoys, silhouettes, or other replicas of wildlife body forms;

(ii) scents used only to mask human odor; or

(iii) types of scents that are approved by the commission for attracting game animals or game birds.

(3) "Fur-bearing animals" means marten or sable, otter, muskrat, fisher, mink, bobcat, lynx, wolverine, northern swift fox, and beaver.

(4) "Game animals" means deer, elk, moose, antelope, caribou, mountain sheep, mountain goat, mountain lion, bear, and wild buffalo.

(5) "Game fish" means all species of the family Salmonidae (chars, trout, salmon, grayling, and whitefish); all species of the genus Sander (sandpike or sauger and walleyed pike or yellowpike perch); all species of the genus Esox (northern pike, pickerel, and muskellunge); all species of the genus Micropterus (bass); all species of the genus Polyodon (paddlefish); all species of the family Acipenseridae (sturgeon); all species of the genus Lota (burbot or ling); the species Perca flavescens (yellow perch); all species of the genus Pomoxis (crappie); and the species Ictalurus punctatus (channel catfish).

(6) "Hunt" means to pursue, shoot, wound, take, harvest, kill, chase, lure, possess, or capture or the act of a person possessing a weapon, as defined in 45-2-101, or using a dog or a bird of prey for the purpose of shooting, wounding, taking, harvesting, killing, possessing, or capturing wildlife protected by the laws of this state in any location that wildlife may inhabit, whether or not the wildlife is then or subsequently taken. The term includes an attempt to take or harvest by any means, including but not limited to pursuing, shooting, wounding, killing, chasing, luring, possessing, or capturing.

(7) "Migratory game birds" means waterfowl, including wild ducks, wild geese, brant, and swans; cranes, including little brown and sandhill; rails, including coots; Wilson's snipes or jacksnipes; and mourning doves.

(8) "Nongame wildlife" means any wild mammal, bird, amphibian, reptile, fish, mollusk, crustacean, or other animal not otherwise legally classified by statute or regulation of this state.

(9) "Open season" means the time during which game birds, game fish, game animals, and fur-bearing animals may be lawfully taken.

(10) "Person" means an individual, association, partnership, or corporation.

(11) "Predatory animals" means coyote, weasel, skunk, and civet cat.

(12) "Shed hunt" or "shed hunting" means to collect the naturally shed antlers or horns of elk, deer, and antelope and the antlers or horns of a game animal, except for mountain sheep as provided in 87-3-315, with a skull or a portion of a skull attached that has died from natural causes and that has not been unlawfully killed, captured, or taken or accidentally killed.

(13) "Trap" means to take or harvest or participate in the taking or harvesting of any wildlife protected by the laws of the state by setting or placing any mechanical device, snare, deadfall, pit, or device intended to take wildlife or to remove wildlife from any of these devices.

(14) "Upland game birds" means sharp-tailed grouse, blue grouse, spruce (Franklin) grouse, prairie chicken, sage hen or sage grouse, ruffed grouse, ring-necked pheasant, Hungarian partridge, ptarmigan, wild turkey, and chukar partridge.

(15) "Wild buffalo or bison" or "wild buffalo" means a bison that:

(a) has not been reduced to captivity;

(b) has never been subject to the per capita fee under 15-24-921;

(c) has never been owned by a person; and

(d) is not the offspring of a bison that has been subject to the per capita fee under 15-24-921.

Cross-References

Fixing of seasons and limits on game, birds, fish, or fur-bearing animals, 87-1-304.

Closed season on certain game birds, 87-3-403.

87-2-102. Resident defined. In determining whether a person is a resident for the purpose of issuing resident hunting, fishing, and trapping licenses, the following provisions apply:

(1) (a) A member of the regular armed forces of the United States, a member's spouse or dependent, as defined in subsection (1)(c), who resides in the member's household, or a member of the armed forces of a foreign government attached to the regular armed forces of the United States is considered a resident for the purposes of this chapter if:

(i) the member was a resident of Montana under the provisions of subsection (4) and continues to meet the residency criteria of subsections (4)(b) through (4)(e); or

(ii) the member is currently stationed in and assigned to active duty in Montana, has resided in Montana for at least 30 days, and presents official assignment orders and proof of completion of a hunter safety and education course approved by the department, as provided in 87-2-105, a certificate verifying the successful completion of a hunter safety course in any state or province, or, if applicable, proof of completion of a trapper education course pursuant to 87-2-127. The 30-day residence requirement is waived in time of war. Reassignment to another state, United States territory, or country terminates Montana residency for purposes of this section, except that a reassigned member continues to qualify as a resident if the member's spouse and dependents continue to physically reside in Montana and the member continues to meet the residency criteria of subsections (4)(b) through (4)(e). The designation of Montana by a member of the regular armed forces as a "home of record" or "home of residence" in that member's armed forces records does not determine the member's residency for purposes of this section.

(b) A member of the regular armed forces of the United States who is otherwise considered a Montana resident pursuant to subsection (1)(a)(i) does not forfeit that status as a resident because the member, by virtue of that membership, also possesses, has applied for, or has received resident hunting, fishing, or trapping privileges in another state or country.

(c) The term "dependent" means any of the following individuals over half of whose support was received from the member:

(i) a son or daughter of the taxpayer or a descendant of either;

(ii) a stepson or stepdaughter of the taxpayer;

(iii) a brother, sister, stepbrother, or stepsister of the taxpayer;

(iv) the father or mother of the taxpayer or an ancestor of either;

(v) a stepfather or stepmother of the taxpayer;

(vi) a son or daughter of a brother or sister of the taxpayer;

(vii) a brother or sister of the father or mother of the taxpayer;

(viii) a son-in-law, daughter-in-law, father-in-law, mother-in-law, brother-in-law, or sister-in-law of the taxpayer;

(ix) an individual who, for the tax year of the taxpayer, has as the individual's principal place of abode the home of the taxpayer and is a member of the taxpayer's household; or

(x) an individual who:

(A) is a descendant of a brother or sister of the father or mother of the taxpayer;

(B) for the tax year of the taxpayer, received institutional care required by reason of a physical or mental disability; and

(C) before receiving the institutional care, was a member of the same household as the taxpayer.

(d) For purposes of this section:

(i) the terms "brother" and "sister" include a brother or sister by the half blood; and

(ii) in determining whether any of the relationships specified in this section exist, a legally adopted child of an individual must be treated as a child of the individual by blood.

(2) A person who has physically resided in Montana as the person's principal or primary home or place of abode for 180 consecutive days and who meets the criteria of subsection (4) immediately before making application for any license is eligible to receive resident hunting, fishing, and trapping licenses. As used in this section, a vacant lot or a premises used solely for business purposes is not considered a principal or primary home or place of abode.

(3) A person who obtains residency under subsection (2) may continue to be a resident for purposes of this section by physically residing in Montana as the person's principal or primary home or place of abode for not less than 120 days a year and by meeting the criteria of subsection (4) prior to making application for any resident hunting, fishing, or trapping license.

(4) In addition to the requirements of subsection (2) or (3), a person shall meet the following criteria to be considered a resident for purposes of this section:

(a) the person's principal or primary home or place of abode is in Montana;

(b) the person files Montana state income tax returns as a resident if required to file;

(c) the person licenses and titles in Montana as required by law any vehicles that the person owns and operates in Montana;

(d) except as provided in subsection (1)(b), the person does not possess or apply for any resident hunting, fishing, or trapping licenses from another state or country or exercise resident hunting, fishing, or trapping privileges in another state or country; and

(e) if the person registers to vote, the person registers only in Montana.

(5) A student who is enrolled full-time in a postsecondary educational institution out of state and who would qualify for Montana resident tuition or who otherwise meets the residence requirements of subsection (2) or (3) is considered a resident for purposes of this section.

(6) An enrollee of a job corps camp located within the state of Montana is, after a period of 30 days within Montana, considered a resident for the purpose of making application for a fishing license as long as the person remains an enrollee in a Montana camp.

(7) A person who does not reside in Montana but who meets all of the following requirements is a resident for purposes of obtaining hunting and fishing licenses:

(a) The person's principal employment is within this state and the income from this employment is the principal source of the applicant's family income.

(b) The person is required to pay and has paid Montana income tax in a timely manner and proper amount.

(c) The person has been employed within this state on a full-time basis for at least 12 consecutive months immediately preceding each application.

(d) The person's state of residency has laws substantially similar to this subsection (7).

(8) An unmarried minor is considered a resident for the purposes of this section if the minor's parents, legal guardian, or parent with joint custody, sole custody, or visitation rights is a resident for purposes of this section. The minor is considered a resident for purposes of this section regardless of whether the minor resides primarily in the state or otherwise qualifies as a resident. The resident parent or guardian of the minor may be required to show proof of the parental, guardianship, or custodial relationship to the minor.

(9) A person is not considered a resident for the purposes of this section if the person:

(a) claims residence in any other state or country for any purpose; or

(b) is an absentee property owner paying property tax on property in Montana.

(10) A license agent is not considered a representative of the state for the purpose of determining a license applicant's residence status.

87-2-104. Number of licenses, permits, or tags allowed — fees. (1) The department may prescribe rules and regulations for the issuance or sale of a replacement license, permit, or tag if the original license, permit, or tag is lost, stolen, or destroyed upon payment of a fee not to exceed $5.

(2) The department shall issue a replacement license, permit, or tag to a person who lawfully harvested a game animal but the meat of the animal was determined by the department to be unfit for human consumption due to disease or prior injury. To obtain a replacement license, permit, or tag pursuant to this subsection, the person:

(a) shall surrender the entire animal determined to be unfit for human consumption; and

(b) may choose to be issued the replacement for the same license year or the next license year.

(3) When authorized by the commission for game management purposes, the department may:

(a) issue more than one Class A-3 resident deer A, Class A-4 resident deer B, Class B-7 nonresident deer A, Class E-1 resident wolf, Class E-2 nonresident wolf, or special antelope license to an applicant;

(b) issue a special antlerless moose license, a special cow or calf bison license, or one or more special adult ewe mountain sheep licenses to an applicant; and

(c) issue one or more Class A-9 resident antlerless elk B tag licenses or Class B-12 nonresident antlerless elk B tag licenses to an applicant. Unless otherwise reduced pursuant to subsection (6), the fee for a Class B-12 license is $270.

(4) For all of the game management licenses issued under subsection (3), the commission shall determine the hunting districts or portions of hunting districts for which the licenses are to be issued, the number of licenses to be issued, and all terms and conditions for the use of the licenses.

(5) Unless otherwise determined by the commission, a holder of a valid Class B-10 nonresident big game combination license or a valid Class B-11 nonresident deer combination license may purchase up to two Class B-8 nonresident deer B tags while other eligible persons

may purchase only one. The commission shall determine the hunting districts or portions of hunting districts for which the tags are valid and all terms and conditions for the use of the tags.

(6) The fee for a resident or nonresident license of any class issued under subsections (3) and (5) may be reduced annually by the department.

Restrictions on hunting licenses, 87-2-506.
Limit on Class B-11 licenses, 87-2-510.

87-2-105. Hunter safety and education required. (1) Except for a youth who qualifies for a license pursuant to 87-2-805(4) or (5) or a person who has been issued an apprentice certificate pursuant to 87-2-810, a hunting license may not be issued to a person born after January 1, 1985, unless the person authorized to issue the license determines proof of completion of:

(a) a Montana hunter safety and education course established in subsection (4) or (6);

(b) a hunter safety course in any other state or province; or

(c) a Montana hunter safety and education course that qualifies the person for a provisional certificate as provided in 87-2-126.

(2) A hunting license may not be issued to a member of the regular armed forces of the United States or to a member of the armed forces of a foreign government attached to the armed forces of the United States who is assigned to active duty in Montana and who is otherwise considered a resident under 87-2-102(1) or to a member's spouse or dependent, as defined in 87-2-102, who resides in the member's household, unless the person authorized to issue the license determines proof of completion of a hunter safety and education course approved by the department or a hunter safety course in any state or province.

(3) A bow and arrow license may not be issued to a resident or nonresident unless the person authorized to issue the license receives an archery license issued for a prior hunting season or determines proof of completion of a bowhunter education course from the national bowhunter education foundation or any other bowhunter education program approved by the department. Neither the department nor the license agent is required to provide records of past archery license purchases. As part of the department's bow and arrow licensing procedures, the department shall notify the public regarding bowhunter education requirements.

(4) The department shall provide for a hunter safety and education course that includes instruction in the safe handling of firearms and for that purpose may cooperate with any reputable organization having as one of its objectives the promotion of hunter safety and education. The department may designate as an instructor any person it finds to be competent to give instructions in hunter safety and education, including the handling of firearms. A person appointed shall give the course of instruction and shall issue a certificate of completion from Montana's hunter safety and education course to a person successfully completing the course.

(5) The department shall provide for a course of instruction from the national bowhunter education foundation or any other bowhunter education program approved by the department and for that purpose may cooperate with any reputable organization having as one of its objectives the promotion of safety in the handling of bow hunting tackle. The department may designate as an instructor any person it finds to be competent to give bowhunter education instruction. A person appointed shall give the course of instruction and shall issue a certificate of completion to a person successfully completing the course.

(6) The department may develop an adult hunter safety and education course.

(7) The department may adopt rules regarding how a person authorized to issue a license determines proof of completion of a required course.

Rights of persons not adults, Art. II, sec. 15, Mont. Const.

Apprentice certificate, 87-2-810.

87-2-106. Application for license. (1) A license may be procured from the director, a warden, or an authorized agent of the director. The applicant shall state the applicant's name, age, [last four digits of the applicant's social security number,] street address of permanent residence, mailing address, qualifying length of time as a resident in the state of Montana, and status as a citizen of the United States or as an alien and other facts, data, or descriptions as may be required by the department. An applicant for a resident license shall present a valid Montana driver's license, Montana driver's examiner's identification card, tribal identification card, or other identification specified by the department to substantiate the required information. It is the applicant's burden to provide documentation establishing the applicant's identity and qualifications to purchase a license. Except as provided in subsections (2) through (4), the statements made by the applicant must be subscribed to by the applicant.

(2) Except as provided in subsection (3), department employees or officers may issue licenses by telephone, by mail, on the internet, or by other electronic means.

(3) To apply for a license under the provisions of 87-2-102(7), the applicant shall apply to the director and shall subscribe to fulfillment of the requirements of 87-2-102(7). The director shall process the application in an expedient manner.

(4) A resident may apply for and purchase a conservation license, hunting license, or fishing license for the resident's spouse, parent, child, brother, or sister who is otherwise qualified to obtain the license.

(5) A license is void unless subscribed to by the licensee.

(6) A person whose privilege to hunt, fish, or trap has been revoked is not eligible to purchase any license until all terms of the court sentence in which the privilege was revoked, including making restitution, have been met or the person is in compliance with installment payments specified by the court and the department has received notification from the sentencing court to that effect pursuant to 87-6-922(2).

[(7) The department shall keep the applicant's social security number confidential, except that the number may be provided to the department of public health and human services for use in administering Title IV-D of the Social Security Act.]

(8) The department shall delete an applicant's social security number in any electronic database [5 years after the date that application is made for the most recent license]. *(Bracketed language terminates or is amended on occurrence of contingency—sec. 3, Ch. 321, L. 2001.)*

Compiler's Comments

Contingent Termination: Section 3, Ch. 237, L. 2007, amended sec. 3, Ch. 321, L. 2001, as follows: In (1), (2), (3), and (4) inserted "and [section 1 of this act]" and "and [section 2 of this act]"; in (1), (2), and (3) (two places) before "social security number" inserted "last four digits of the"; in (2) and (3) after "social security number" inserted "for a resident applicant"; in (4) substituted "87-2-106(10)" for "87-2-106(9)" and substituted "87-2-106(11)" for "87-2-106(10)"; and made minor changes in style. Amendment effective April 24, 2007.

Section 5, Ch. 237, L. 2007, provided: "[This act] terminates 3 years after [the effective date of this act] [effective April 24, 2007] unless the director of the department of public health and human services certifies to the governor and the secretary of state and provides written notice to the code commissioner that an extension to the use of the last four digits of a social security number for recreational licenses has been granted by the federal government." The federal government granted an extension to the use of the last four digits of a social security number for an additional 3 years ending February 26, 2013. In a letter dated June 3, 2013, the secretary of state notified the code commissioner that the exemption was extended through February 26, 2016. Information from the department of public health and human services indicates that there is a continuous extension and approval in place for use of the last four digits of a social security number.

Contingent Termination: Section 3, Ch. 321, L. 2001, provided: "(1) If the director of the department of public health and human services certifies to the governor and the secretary of state in writing that the federal government has granted the state of Montana an exemption from the requirement that an applicant under 16 years of age provide a social security number on an application for a recreational license, the bracketed language in 87-2-106(1) and 87-2-202(1) must read: "social security number for an applicant 16 years of age or older".

(2) If the director of the department of public health and human services certifies to the governor and the secretary of state in writing that the federal government has granted the state of Montana an exemption from the requirement that a Montana resident provide a social security number on an application for a recreational license, the bracketed language in 87-2-106(1) and 87-2-202(1) must read: "social security number for a nonresident applicant, social security number, driver's license number, or Montana identification card number issued by the department of justice for a resident who does not hold a Montana driver's license if the applicant has provided a social security number when applying for the Montana identification card".

(3) If the director of the department of public health and human services certifies to the governor and the secretary of state in writing that the federal government has granted the state of Montana an exemption from the requirement that any applicant provide a social security number on an application for a recreational license, the bracketed language in 87-2-106(1) and 87-2-202(1) must read: "social security number for a nonresident applicant who does not hold and present a valid driver's license from the applicant's state of residence, social security number, driver's license number, or Montana identification card number issued by the department of justice for a resident who does not hold a Montana driver's license if the applicant has provided a social security number when applying for the Montana identification card".

(4) If the director of the department of public health and human services certifies to the governor and the secretary of state in writing that the federal government, through repeal or amendment of federal law, no longer requires an applicant to provide a social security number on an application for a recreational license, the bracketed language in 87-2-106(1) and 87-2-202(1) is void, the bracketed language in 87-2-106(9) and 87-2-202(5) is void, and the bracketed language in 87-2-106(10) and 87-2-202(6) must read: "maintained by the department".

(5) The secretary of state shall notify the code commissioner of the occurrence of any of the contingencies described in subsections (1) through (4)."

Occurrence of Multiple Contingencies — Directions to Code Commissioner: Section 4, Ch. 321, L. 2001, provided: "Whenever the secretary of state notifies the code commissioner of the occurrence of more than one of the contingencies described in [section 3] [not codified], the code commissioner is directed to change the bracketed language in 87-2-106(1) and 87-2-202(1) to give effect to each exemption."

Effective Dates: Section 6, Ch. 321, L. 2001, provided: "(1) Except as provided in subsection (2), [this act] is effective on passage and approval [approved April 21, 2001].

(2) If one or more of the contingencies in [section 3] [not codified] occur, the applicable contingency is effective upon certification of that contingency to the governor and the secretary of state and notification to the Montana code commissioner."

Applicability: Section 7, Ch. 321, L. 2001, provided: "With regard to an application for a new hunting, fishing, or trapping license or wildlife conservation license, [this act] applies to license years beginning on or after the first day of March immediately following [the effective date of the respective applicable contingency]."

87-2-111. Termination of license. Such licenses shall be void after the last day of February next succeeding their issuance, except that trapping licenses as described in part 6 of this chapter shall be void after June 30 next succeeding their issuance.

History: En. Sec. 10, Ch. 238, L. 1921; re-en. Sec. 3690, R.C.M. 1921; re-en. Sec. 3690, R.C.M. 1935; R.C.M. 1947, 26-214; amd. Sec. 4, Ch. 494, L. 1983; amd. Sec. 2, Ch. 304, L. 1985.

87-2-112. Repealed. Sec. 120, Ch. 258, L. 2011.

History: En. Sec. 1, Ch. 43, L. 1971; amd. Sec. 2, Ch. 480, L. 1973; amd. Sec. 4, Ch. 465, L. 1977; R.C.M. 1947, 26-812; amd. Sec. 2842, Ch. 56, L. 2009.

87-2-113. *(Temporary)* **Application fees.** (1) (a) Except as provided in subsection (1)(b), when the department determines a drawing is necessary prior to issuance of hunting licenses for any game species during a hunting season, it shall collect a $5 per species application fee.

(b) The department shall collect the following per species special license application fees:

(i) moose—resident, $10; nonresident, $50;

(ii) mountain goat—resident, $10; nonresident, $50;

(iii) mountain sheep—resident, $10; nonresident, $50;

(iv) wild buffalo or bison—resident, $10; nonresident, $50.

(2) (a) If a resident participates in the bonus point system adopted by the commission, the department shall collect an additional application fee of $2 per species.

(b) If a nonresident participates in the bonus point system adopted by the commission, the department shall collect an additional application fee of $20 per species.

(3) Application fees collected pursuant to this section must be deposited in the state special revenue fund to the credit of the department as set forth in 87-1-601.

(4) The payment of an application fee confers no hunting rights or privileges.

(5) The commission may waive the provisions of subsection (1) when a drawing is required for a special season under 87-1-304.

87-2-113. *(Effective March 1, 2026)* **Application fees.** (1) (a) Except as provided in subsection (1)(b), when the department determines a drawing is necessary prior to issuance of hunting licenses for any game species during a hunting season, it shall collect a $5 per species application fee.

(b) The department shall collect the following per species special license application fees:

(i) moose—resident, $10; nonresident, $50;

(ii) mountain goat—resident, $10; nonresident, $50;

(iii) mountain sheep—resident, $10; nonresident, $50;

(iv) sandhill crane—resident, $10; nonresident, $50;

(v) swan—resident, $10; nonresident, $50;

(vi) wild buffalo or bison—resident, $10; nonresident, $50.

(2) (a) If a resident participates in the bonus point system adopted by the commission, the department shall collect an additional application fee of $2 per species.

(b) If a nonresident participates in the bonus point system adopted by the commission, the department shall collect an additional application fee of $20 per species.

(3) Application fees collected pursuant to this section must be deposited in the state special revenue fund to the credit of the department as set forth in 87-1-601.

(4) The payment of an application fee confers no hunting rights or privileges.

(5) The commission may waive the provisions of subsection (1) when a drawing is required for a special season under 87-1-304.

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 1, Ch. 85, L. 2025. Amendment effective March 1, 2026.

87-2-114. Repealed. Sec. 120, Ch. 258, L. 2011.

History: En. Sec. 11, Ch. 417, L. 1995; amd. Sec. 5, Ch. 80, L. 2003.

87-2-115. Nonresident elk and deer license preference point system. (1) The department shall establish a preference point system to distribute Class B-10 nonresident big game combination licenses and Class B-11 nonresident deer combination licenses.

(2) Nonresidents applying to purchase a Class B-10 or Class B-11 license may purchase a preference point, upon payment of a nonrefundable $100 fee, that gives an applicant who has more preference points priority to receive a Class B-10 or Class B-11 license over an applicant who has purchased fewer preference points.

(3) An applicant may:

(a) purchase only one preference point per license year except a nonresident hunting with an outfitter licensed pursuant to Title 37, chapter 47, part 3, and providing the documentation required in subsection (8), may purchase two preference points per license year. No applicant may accumulate more than three preference points total.

(b) purchase a preference point without applying for a Class B-10 or Class B-11 license. An applicant not applying for a Class B-10 or Class B-11 license may purchase a preference point only between July 1 and December 31 of that license year.

(4) (a) The department shall delete an applicant's accumulated preference points if the applicant:

(i) obtains a Class B-10 or Class B-11 license; or

(ii) does not apply for a Class B-10 or Class B-11 license in consecutive years.

(b) If an applicant is unsuccessful in drawing a Class B-10 or Class B-11 license, the department shall allow the applicant to keep and apply preference points to subsequent drawings if done in consecutive years.

(5) Subject to the provisions of 87-2-714, the department shall issue 75% of the Class B-10 and Class B-11 licenses made available for purchase pursuant to 87-2-505 and 87-2-510 by drawings in which the licenses are awarded to applicants in the order of which applicants have purchased the greatest number of preference points. If the number of licenses to be issued under this subsection exceeds the number of applicants who have purchased preference points, the remaining licenses must be added to the licenses issued pursuant to subsection (6).

(6) Subject to the provisions of 87-2-714, the department shall issue 25% of the Class B-10 and Class B-11 licenses made available for purchase pursuant to 87-2-505 and 87-2-510 by drawings in which the licenses are awarded to applicants who have not purchased any preference points. If the number of licenses to be issued under this subsection exceeds the number of applicants who have not purchased preference points, the remaining licenses must be added to the licenses issued pursuant to subsection (5).

(7) Up to five applicants may apply as a party under this section. The department shall use an average of the number of preference points accumulated by those applicants to determine their priority in receiving licenses issued pursuant to subsection (5). The department shall calculate the average rounded to the third decimal place.

(8) A nonresident purchasing a second preference point pursuant to subsection (3)(a) shall provide written affirmation at the time of application indicating the name and license number of the outfitter with whom the person intends to hunt. If the nonresident obtains the license applied for with the preference points purchased pursuant to subsection (3)(a), the nonresident may only use the license when accompanied by an outfitter or the outfitter's designee licensed to provide guiding services.

(9) (a) Fees collected from a nonresident purchasing a second preference point pursuant to subsection (3)(a) must be allocated as follows:

(i) 25% to public access land agreements established pursuant to 87-1-295;

(ii) 25% to hunting access programs established pursuant to 87-1-265;

(iii) 25% to the future fisheries program established in 87-1-272 with a priority given to funding projects that provide public access through private property; and

(iv) 25% to the purchase of permanent easements through private property to access otherwise inaccessible lands. An easement funded by this subsection (9)(a)(iv) may be granted only across private land to public land that is leased by the landowner, public land for which there is no leaseholder, or public land for which the landowner has consent of the leaseholder.

(b) The department may expend up to 10% of the revenue allocated pursuant to subsection (9)(a) to pay administrative costs incurred by the department for the purposes outlined in subsection (9)(a), including but not limited to contracting and transaction costs incurred by the department or entities partnering with the department, and for providing support to the private land/public wildlife advisory committee for its review of public access land agreements pursuant to 87-1-295.

(c) At the end of each fiscal year, funds allocated pursuant to subsection (9)(a) that remain unobligated are available to the department for any purpose pursuant to 87-1-201(3).

History: **En. Sec. 2, Ch. 391, L. 2011; amd. Sec. 4, Ch. 221, L. 2019; amd. Sec. 1, Ch. 280, L. 2019; amd. Sec. 6, Ch. 552, L. 2021; amd. Sec. 2, Ch. 487, L. 2023.**

87-2-116. Base hunting license prerequisite for other hunting licenses — fee. (1) To be eligible to apply for a hunting license or Class A-2 special bow and arrow license, a person must first obtain a base hunting license as provided in this section. The base hunting license must be purchased once each license year.

(2) Resident base hunting licenses may be purchased for a fee of $10, of which $2 is a hunting access fee that must be used by the department to fund programs authorized in 87-1-265.

(3) Nonresident base hunting licenses may be purchased for a fee of $50, of which $40 is a hunting access fee that must be used by the department to fund programs authorized in 87-1-265.

History: **En. Sec. 2, Ch. 449, L. 2015; amd. Sec. 10, Ch. 63, L. 2019; amd. Sec. 1, Ch. 670, L. 2025.**

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 1, Ch. 670, L. 2025. Amendment effective October 1, 2025.

87-2-117. License bonus point system. (1) The commission shall establish a bonus point system that gives an applicant who has purchased more bonus points more chances to receive a license, tag, or permit over an applicant who has purchased fewer bonus points.

(2) A person may purchase only one bonus point per species per license year and may:

(a) purchase a bonus point when applying for a license, tag, or permit by paying the fee established in 87-2-113(2) per species; or

(b) if the person is otherwise eligible to apply for a license, tag, or permit, purchase a bonus point without applying for the license, tag, or permit by paying the fee established in subsection (5). An applicant not applying for a license, tag, or permit may purchase a bonus point only between July 1 and September 30 in the current license year.

(3) The department may only apply any accumulated bonus points to a person's chance to obtain a license, tag, or permit if the person purchases a bonus point when applying for the license, tag, or permit.

(4) Bonus points may only be applied to first choice drawings.

(5) (a) A resident who does not apply for a license, tag, or permit may purchase a bonus point for $15 for each species for which a bonus point is made available by the commission.

(b) A nonresident who does not apply for a license, tag, or permit may purchase a bonus point for $25 for each species for which a bonus point is made available by the commission, except that the fee is $75 for moose, mountain goat, mountain sheep, and wild buffalo or bison.

(6) The department may not delete a person's accumulated bonus points unless the person obtains the license, tag, or permit associated with the bonus points, in which case the department shall delete the person's accumulated bonus points.

(7) (a) Except as provided in subsection (7)(b), the department shall square the number of points purchased by a person per species when conducting drawings for licenses, tags, and permits.

(b) For persons applying for licenses, tags, or permits as a party, the department shall calculate the average number of bonus points accumulated by the individuals listed on the party application, rounded to the nearest whole number, and square the average. Each individual retains their own bonus points unless the party obtains the licenses, tags, or permits associated with the bonus points, in which case the department shall delete each person's accumulated bonus points.

History: **En. Sec. 1, Ch. 349, L. 2017; amd. Sec. 1, Ch. 208, L. 2019; amd. Sec. 1, Ch. 360, L. 2019; amd. Sec. 1, Ch. 95, L. 2021.**

87-2-118 reserved.

87-2-119. Electronic validation of hunting licenses and tags — rulemaking. (1) A hunter may electronically validate any hunting license or tag issued electronically pursuant to this chapter for any species for which a carcass tag is issued.

(2) Electronic validation of licenses pursuant to this section may not include the collection of hunter location data through the use of a global positioning system.

(3) The department may adopt rules to implement this section. Except as provided in 87-3-310, the department may adopt rules regarding the possession of a species for which a license or tag was electronically validated.

History: En. Sec. 1, Ch. 75, L. 2017; amd. Sec. 3, Ch. 238, L. 2019; amd. Sec. 1, Ch. 71, L. 2023.

87-2-120. Repealed. Sec. 120, Ch. 258, L. 2011.

History: En. Sec. 6, Ch. 417, L. 1995; amd. Sec. 1, Ch. 55, L. 2007.

87-2-121. Lawful method of hunting on landowner's private property. In recognition of the inalienable right of persons to acquire and possess property in all lawful ways contained in Article II, section 3, of the Montana constitution and of the heritage of individual citizens to harvest wild game animals contained in Article IX, section 7, of the Montana constitution, a landowner and a landowner's guests and lessees may hunt on the landowner's private property as long as the hunting is conducted in the manner provided by law and is consistent with regulations.

History: En. Sec. 1, Ch. 164, L. 2005.

87-2-122 and 87-2-123 reserved.

87-2-124. Option to direct limited drawing refunds to block management program. A person who participates in a limited drawing but is not successful in the drawing may opt, upon application, to direct that the refund the person is eligible to receive instead be deposited in the hunting access account established in 87-1-290 and used for the purpose of funding the block management program established in 87-1-265.

History: En. Sec. 1, Ch. 106, L. 2019; amd. Sec. 17, Ch. 166, L. 2023.

87-2-125. Eligibility standards for licenses or permits obtained by telephone, mail, or electronic means — rulemaking. The department may adopt rules that prescribe requirements necessary to determine that an applicant meets the eligibility requirements provided in this part when the applicant obtains a license or permit by telephone, by mail, on the internet, or by other electronic means.

History: En. Sec. 6, Ch. 80, L. 2003.

87-2-126. Provisional hunter safety and education certificate for person with developmental disability — conditions of licensure — definition. (1) A person with a diagnosed developmental disability who satisfactorily completes the classroom portion and field course of the firearms safety course but who is unable to pass the written or an alternate-format exam portion of the course because of a developmental disability may be issued a provisional hunter safety and education certificate. The certificate is valid only when used according to this section.

(2) A person with a developmental disability may obtain a hunting license with a provisional hunter safety and education certificate.

(3) Each person who uses a provisional hunter safety and education certificate must be in the company of and assisted by the person's parent or guardian or by an adult designated by the person or by the person's parent or guardian when hunting and shall conduct all hunting within the terms and conditions of the license issued. A person who is accompanying and assisting a person with a disability:

(a) must have successfully completed a hunter safety and education course pursuant to 87-2-105(1);

(b) must have as the sole priority the direct supervision of the person with a disability at all times;

(c) may only be actively engaged in hunting a game animal that may be taken with the license of the person with a disability; and

(d) must be able to immediately intervene and control the firearm of the person with a disability at any time.

(4) (a) This section does not entitle a person to possess a firearm if the person is otherwise prohibited from possessing a firearm under state or federal law or a court order.

(b) A person may not knowingly authorize or permit a person with a developmental disability who is incapable of safely possessing a firearm to possess a firearm for hunting in this state.

(5) As used in this section, "developmental disability" means a developmental disability as defined in 53-20-102.

History: **En. Sec. 1, Ch. 68, L. 2009.**

87-2-127. Trapper education required. (1) (a) Except as provided in subsection (2), a Class C trapper's license may not be issued to a resident unless the license agent processing the application determines proof of:

(i) the applicant's purchase of a trapper's license in three prior trapping seasons; or

(ii) completion of a trapper education course established pursuant to this section or otherwise approved by the trapper education committee.

(b) Neither the department nor a license agent is required to provide records of past Montana trapper's license purchases prior to 1990 or for trapping licenses purchased in another state.

(2) A resident is not required to complete a trapper education course if the resident:

(a) is trapping for the purposes of livestock or property protection; or

(b) completes the advanced level of the youth trapper camp offered by the Montana trappers association.

(3) The department shall provide a trapper education course that includes field instruction and classroom or online instruction and incorporates the trapper education manual from the Montana trappers association in the course resources. The course must:

(a) include but is not limited to instruction in trapping ethics, best practices, equipment, regulations, and avoidance of nontarget species;

(b) meet the requirements of rule or law for certification to trap wolves; and

(c) be reviewed and, as needed, revised by the trapper education committee established in subsection (6).

(4) To successfully complete a trapper education course, a person must pass a final exam. Upon successful completion, the department shall issue that person a certificate of completion.

(5) To be certified to teach a trapper education course established pursuant to this section, an instructor shall:

(a) pass a background check conducted by the department; and

(b) be deemed competent by the trapper education committee established in subsection (6) to give instruction in ethical and humane trapping methods.

(6) The department shall establish a trapper education committee consisting of three active, certified trapper instructors, two of whom are members of the Montana trappers association, and three department staff knowledgeable in trapping. The committee shall review and revise trapper education course content and certify new trapper education instructors.

(7) As part of the department's trapper licensing procedures, the department shall notify the public of the requirements of this section.

History: **En. Sec. 1, Ch. 170, L. 2021.**

87-2-128 and 87-2-129 reserved.

87-2-130. Aquatic invasive species prevention pass. (1) Except as provided in 87-2-803(6), to be eligible to fish in Montana or to apply for a fishing license or a combination license that includes a fishing license, a person who is 16 years of age or older must first obtain an aquatic invasive species prevention pass as provided in this section. The pass must be purchased once each license year.

(2) Resident aquatic invasive species prevention passes may be purchased for a fee of $2.

(3) Nonresident aquatic invasive species prevention passes may be purchased for a fee of $7.50.

History: **En. Sec. 1, Ch. 387, L. 2017; amd. Sec. 8, Ch. 356, L. 2019; amd. Sec. 1, Ch. 318, L. 2023.**

Part 2
Wildlife Conservation License

87-2-201. Conservation license required and prerequisite for other licenses. (1) Except as provided in 87-2-803(6) and 87-2-815, it is unlawful for any person to engage in any of the following without first having purchased a conservation license as provided in this part:

(a) purchase or apply for a hunting, fishing, nonresident wildlife management area shed hunting, or trapping license;

(b) use lands owned or controlled by the department; or

(c) engage in general recreational use as defined in 77-1-101 on state trust land pursuant to an agreement established under 77-1-815.

(2) If the department of natural resources and conservation and the department enter into an agreement pursuant to 77-1-815, the department shall submit every other legislative session a report to the legislature in accordance with 5-11-210 that documents the number of conservation licenses sold and revenue received pursuant to this section. The first report shall be provided to the legislature by January 1, 2027.

History: En. Sec. 1, Ch. 172, L. 1969; R.C.M. 1947, 26-229; amd. Sec. 1, Ch. 41, L. 1989; amd. Sec. 121, Ch. 2, L. 2009; amd. Sec. 5, Ch. 221, L. 2019; amd. Sec. 13, Ch. 507, L. 2023; amd. Sec. 4, Ch. 748, L. 2025.

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 4, Ch. 748, L. 2025. Amendment effective October 1, 2025.

87-2-202. Application — fee. (1) Except as provided in 87-2-817(2), a conservation license must be sold upon written application. The application must contain the applicant's name, age, [last four digits of the applicant's social security number,] street address of permanent residence, mailing address, qualifying length of time as a resident in the state of Montana, and status as a citizen of the United States or as an alien and must be signed by the applicant. The applicant shall present a valid Montana driver's license, a Montana driver's examiner's identification card, a tribal identification card, or other identification specified by the department to substantiate the required information when applying for a conservation license. It is the applicant's burden to provide documentation establishing the applicant's identity and qualifications to purchase a conservation license or to receive a free conservation license pursuant to 87-2-817(2).

(2) Hunting, fishing, nonresident wildlife management area shed hunting, or trapping licenses issued in a form determined by the department must be recorded according to rules that the department may prescribe.

(3) (a) Resident conservation licenses may be purchased for a fee of $8, of which 25 cents is a voluntary search and rescue donation.

(b) Nonresident conservation licenses may be purchased for a fee of $10, of which 25 cents is a voluntary search and rescue donation.

(c) A person who purchases a conservation license may make a written election not to pay the additional search and rescue donation in subsections (3)(a) and (3)(b). If a written election is made, the donation may not be collected.

[(4) The department shall keep the applicant's social security number confidential, except that the number may be provided to the department of public health and human services for use in administering Title IV-D of the Social Security Act.]

(5) The department shall delete the applicant's social security number in any electronic database [5 years after the date that application is made for the most recent license]. *(Bracketed language terminates or is amended on occurrence of contingency—sec. 3, Ch. 321, L. 2001. The $2 conservation license fee increases in subsections (3)(a) and (3)(b) enacted by Ch. 596, L. 2003, are void on occurrence of contingency—sec. 8, Ch. 596, L. 2003.)*

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 5, Ch. 748, L. 2025. Amendment effective October 1, 2025.

Contingent Termination: Section 3, Ch. 237, L. 2007, amended sec. 3, Ch. 321, L. 2001, as follows: In (1), (2), (3), and (4) inserted "and [section 1 of this act]" and "and [section 2 of this act]"; in (1), (2), and (3) (two places) before "social security number" inserted "last four digits of the"; in (2) and (3) after "social security number" inserted "for a resident applicant"; in (4) substituted "87-2-106(10)" for "87-2-106(9)" and substituted "87-2-106(11)" for "87-2-106(10)"; and made minor changes in style. Amendment effective April 24, 2007.

Section 5, Ch. 237, L. 2007, provided: "[This act] terminates 3 years after [the effective date of this act] [effective April 24, 2007] unless the director of the department of public health and human services certifies to the governor and the secretary of state and provides written notice to the code commissioner that an extension to the use of the last four digits of a social security number for recreational licenses has been granted by the federal government." The federal government granted an extension to the use of the last four digits of a social security number for an additional 3 years ending February 26, 2013. In a letter dated June 3, 2013, the secretary of state notified the code commissioner that the exemption was extended through February 26, 2016. Information from the department of public health and human services indicates that there is a continuous extension and approval in place for use of the last four digits of a social security number.

Contingent Voidness: Section 8, Ch. 596, L. 2003, provided: "(1) If the department of natural resources and conservation and the department of fish, wildlife, and parks do not sign an agreement to compensate state trust land beneficiaries for the use and impacts associated with hunting, fishing, and trapping on state trust land by [the effective date of this act] [effective March 1, 2004], then [this act] is void. The department of natural resources and conservation shall notify the code commissioner of the failure to reach an agreement. [An agreement was entered into effective December 8, 2003.]

(2) (a) If an agreement between the department of natural resources and conservation and the department of fish, wildlife, and parks to compensate state trust land beneficiaries for the use and impacts associated with hunting, fishing, and trapping on state trust land is terminated prior to the expiration date of the agreement, then [this act] is void upon termination. The department of natural resources and conservation shall notify the code commissioner of the termination.

(b) If the department of natural resources and conservation and the department of fish, wildlife, and parks do not enter into a renewal agreement prior to the expiration date of an agreement, then [this act] is void on the expiration date of the agreement. The department of natural resources and conservation shall notify the code commissioner of the expiration.

(3) If a court of competent jurisdiction determines that the agreement to compensate state trust land beneficiaries for the use and impacts associated with hunting, fishing, and trapping on state trust lands is invalid, then [this act] is void on the date the court's judgment is final. The department of natural resources and conservation shall notify the code commissioner of the entry of the judgment.

(4) If the department of natural resources and conservation and the department of fish, wildlife, and parks receive written notice from the regional director of the United States fish and wildlife service that [this act] will result in a loss of federal fish and wildlife funds, then [this act] is void. The department of natural resources and conservation shall notify the code commissioner that the department has received a notice and the date upon which the notice was received."

Contingent Termination: Section 3, Ch. 321, L. 2001, provided: "(1) If the director of the department of public health and human services certifies to the governor and the secretary of state in writing that the federal government has granted the state of Montana an exemption from the requirement that an applicant under 16 years of age provide a social security number on an application for a recreational license, the bracketed language in 87-2-106(1) and 87-2-202(1) must read: "social security number for an applicant 16 years of age or older".

(2) If the director of the department of public health and human services certifies to the governor and the secretary of state in writing that the federal government has granted the state of Montana an exemption from the requirement that a Montana resident provide a social security number on an application for a recreational license, the bracketed language in 87-2-106(1) and 87-2-202(1) must read: "social security number for a nonresident applicant, social security number, driver's license number, or Montana identification card number issued by the department of justice for a resident who does not hold a Montana driver's license if the applicant has provided a social security number when applying for the Montana identification card".

(3) If the director of the department of public health and human services certifies to the governor and the secretary of state in writing that the federal government has granted the state of Montana an exemption from the requirement that any applicant provide a social security number on an application for a recreational license, the bracketed language in 87-2-106(1) and 87-2-202(1) must read: "social security number for a nonresident applicant who does not hold and present a valid driver's license from the applicant's state of residence, social security number, driver's license number, or Montana identification card number issued by the department of justice for a resident who does not hold a Montana driver's license if the applicant has provided a social security number when applying for the Montana identification card".

(4) If the director of the department of public health and human services certifies to the governor and the secretary of state in writing that the federal government, through repeal or amendment of federal law, no longer requires an applicant to provide a social security number on an application for a recreational license, the bracketed language in 87-2-106(1) and 87-2-202(1) is void, the bracketed language in 87-2-106(9) and 87-2-202(5) is void, and the bracketed language in 87-2-106(10) and 87-2-202(6) must read: "maintained by the department".

(5) The secretary of state shall notify the code commissioner of the occurrence of any of the contingencies described in subsections (1) through (4)."

Occurrence of Multiple Contingencies — Directions to Code Commissioner: Section 4, Ch. 321, L. 2001, provided: "Whenever the secretary of state notifies the code commissioner of the occurrence of more than one of the contingencies described in [section 3] [not codified], the code commissioner is directed to change the bracketed language in 87-2-106(1) and 87-2-202(1) to give effect to each exemption."

Effective Dates: Section 6, Ch. 321, L. 2001, provided: "(1) Except as provided in subsection (2), [this act] is effective on passage and approval [approved April 21, 2001].

(2) If one or more of the contingencies in [section 3] [not codified] occur, the applicable contingency is effective upon certification of that contingency to the governor and the secretary of state and notification to the Montana code commissioner."

Applicability: Section 7, Ch. 321, L. 2001, provided: "With regard to an application for a new hunting, fishing, or trapping license or wildlife conservation license, [this act] applies to license years beginning on or after the first day of March immediately following [the effective date of the respective applicable contingency]."

87-2-304. Class B-4—one-day nonresident fishing license. (1) Any person not a resident, as defined in 87-2-102, upon payment of the sum of $14 to any agent of the department authorized to issue fishing and hunting licenses, is entitled to a 1-day nonresident fishing license that authorizes the holder to fish with hook and line, as prescribed by rules and regulations of the department, for 1 calendar day.

(2) When purchasing a license pursuant to this section, the applicant shall indicate, and the license must state, on which calendar date the license will be used. There is no limit on the number of 1-day licenses a person may purchase. If the person is purchasing multiple 1-day licenses at one time, the department may issue a single license listing the multiple calendar dates for which the license is valid. The dates need not be consecutive.

87-2-306. Paddlefish tags. The department may issue paddlefish tags to holders of valid Class A, Class A-8, Class B, Class B-4, and Class B-5 fishing licenses for a fee of $6.50 for residents and $15 for nonresidents. Each tag authorizes the holder to fish with hook and line for paddlefish as prescribed by rules of the department.

History: En. Sec. 6, Ch. 554, L. 1981; amd. Sec. 4, Ch. 255, L. 1985; amd. Sec. 6, Ch. 592, L. 1991; amd. Sec. 2, Ch. 3, L. 2001; amd. Sec. 2, Ch. 84, L. 2003; amd. Sec. 4, Ch. 228, L. 2003; amd. Sec. 5, Ch. 585, L. 2005; amd. Sec. 12, Ch. 449, L. 2015.

87-2-307. Class B-5—five-day nonresident fishing license. (1) Any person not a resident, as defined in 87-2-102, upon payment of the sum of $56 to any agent of the department authorized to issue fishing and hunting licenses, is entitled to a 5-day nonresident fishing license that authorizes the holder to fish with hook and line, as prescribed by rules and regulations of the department, for 5 consecutive days.

(2) When purchasing a license pursuant to this section, the applicant shall indicate, and the license must state, on which calendar dates the license will be used. There is no limit on the number of 5-day licenses a person may purchase. If the person is purchasing multiple 5-day licenses at one time, the department may issue a single license listing the calendar dates for which the license is valid. The 5-day periods need not be consecutive.

87-2-308. Class A-8—resident temporary fishing license. (1) Any resident, as defined in 87-2-102, is entitled to a resident temporary fishing license authorizing the holder to fish with hook and line in designated waters, for a period of time determined by the commission and indicated on the license, upon payment to any agent of the department authorized to issue fishing licenses of the amount determined by the commission. Cost of the license and length of time for which the license is effective must be set:

(a) at an amount that is less than the Class A resident fishing license; and

(b) at an amount and for a length of time that the commission determines will serve at a reasonable price the needs of residents who fish occasionally.

(2) Terms and conditions of the license must be prescribed by rules of the commission.

History: En. Sec. 1, Ch. 336, L. 1997; amd. Sec. 8, Ch. 221, L. 2019.

Cross-References

Funding of upland game bird enhancement program, 87-1-246.

Nonresident child of resident allowed to purchase nonresident licenses at reduced cost, 87-2-514.

87-2-403. Wild turkey tags and fee. (1) The department may issue wild turkey tags to the holder of a valid Class A-1 or nonresident conservation license. Each tag entitles the holder to hunt one wild turkey and possess the carcass of the turkey, during times and places that the commission authorizes an open season on wild turkey.

(2) The fee for a wild turkey tag is $6.50 for a resident and $115 for a nonresident, except that a nonresident holder of a valid Class B-1, Class B-10, or Class B-11 license may purchase a wild turkey tag for one-half of the nonresident fee. Turkey tags must be issued either by a drawing system or in unlimited number as authorized by department rules.

87-2-404. Three-day nonresident captive-reared bird hunting stamp. Except as otherwise provided, a person who is 12 years of age or older or who will turn 12 years old before or during the season for which the license is issued and who is not a resident, as defined in 87-2-102, may, upon payment of a fee of $20, receive a 3-day nonresident shooting preserve bird hunting stamp that authorizes a holder who is 12 years of age or older to hunt game specified under 87-4-522 on a shooting preserve licensed under 87-4-501 for 3 consecutive calendar days as indicated on the license.

History: En. Sec. 4, Ch. 371, L. 1991; amd. Sec. 16, Ch. 417, L. 1995; amd. Sec. 5, Ch. 533, L. 1999; amd. Sec. 15, Ch. 449, L. 2015.

87-2-405. *(Temporary)* **Class B-2—3-day nonresident upland game bird license.** (1) Except as otherwise provided and subject to subsection (2), a person who is not a resident, as defined in 87-2-102, but who is 12 years of age or older or who will turn 12 years old before or during the season for which the license is issued may, upon payment of a fee of $50, receive a Class B-2 license that entitles a holder who is 12 years of age or older to hunt upland game birds for 3 calendar days as indicated on the license and possess the carcasses of upland game birds as authorized by the commission.

(2) A Class B-2 license may not be used to hunt or take:

(a) ring-necked pheasants during the opening week of that season; or

(b) sage grouse at any time.

87-2-405. *(Effective March 1, 2026)* **Class B-2—3-day nonresident upland game bird license.** (1) Except as otherwise provided and subject to subsection (2), a person who is not a resident, as defined in 87-2-102, but who is 12 years of age or older or who will turn 12 years old before or during the season for which the license is issued may, upon payment of a fee of $60, receive a Class B-2 license that entitles a holder who is 12 years of age or older to hunt upland game birds for 3 calendar days as indicated on the license and possess the carcasses of upland game birds as authorized by the commission.

(2) A Class B-2 license may not be used to hunt or take:
(a) ring-necked pheasants during the opening week of that season; or
(b) sage grouse at any time.

Part 5
Game Animal Licenses

Part Cross-References

Seasonal rules adopted annually, 2-4-102.
Powers and duties of Department of Fish, Wildlife, and Parks, 87-1-201.
Posting and publication of orders, rules, and regulations, 87-1-202.

87-2-501. Class A-3, A-4, A-5, A-6, and A-9 resident deer, elk, and bear licenses — fees. (1) Except as otherwise provided in this chapter, a resident, as defined by 87-2-102, who is 12 years of age or older or who will turn 12 years old before or during the season for which the license is issued, upon payment of the proper fee or fees, is entitled to purchase one of each of the following licenses at the prescribed cost that will entitle a holder who is 12 years of age or older to hunt the game animal or animals authorized by the license held and to possess the carcasses of those game animals as authorized by department rules:

(a) Class A-3, deer A tag, $16;
(b) Class A-4, deer B tag, $10;
(c) Class A-5, elk tag, $20;
(d) Class A-6, black bear tag, $19;
(e) Class A-9, resident antlerless elk B tag, $20.

(2) Subject to the management provisions provided in 87-1-321 through 87-1-325, a person may not take more than three elk during any license year, only one of which may be antlered.

87-2-504. Class B-7 and B-8—nonresident deer licenses. (1) (a) Except as otherwise provided in this chapter, a person who is not a resident, as defined in 87-2-102, but who is 12 years of age or older or who will turn 12 years old before or during the season for which the license is issued may, upon payment of the proper fee or fees and subject to the limitations prescribed by law and department regulation, be entitled to apply to the fish, wildlife, and parks office, Helena, Montana, to purchase one each of the following licenses:

(i) Class B-7, deer A tag, $250;

(ii) Class B-8, deer B tag, $75.

(b) The license entitles a holder who is 12 years of age or older to hunt the game animal or animals authorized by the license and to possess the carcasses of those animals as authorized by commission rules.

(2) Unless purchased as part of a Class B-10 or Class B-11 license, a Class B-7 license may be assigned for use in a specific administrative region or regions or a portion of a specific administrative region or regions or in a specific hunting district or districts or a portion of a specific hunting district or districts. If purchased as part of a Class B-10 or Class B-11 license, the Class B-7 license is valid throughout the state, except as provided in 87-2-512(1)(d). Not more than 5,000 Class B-7 licenses may be sold in any license year.

(3) Subject to the provisions of 87-2-104, the commission may prescribe the use of and set quotas for the sale of Class B-8 licenses by hunting districts, portions of a hunting district, groups of districts, or administrative regions.

2025 Amendment: See 2025 Session Law for amendment made by sec. 5, Ch. 676, L. 2025. Amendment effective March 1, 2026.

Cross-References

Portion of fee to fund wildlife habitat, 87-1-242.

Funding of upland game bird enhancement program, 87-1-246.

Restriction on number, 87-1-304, 87-2-104.

87-2-506. Restrictions on hunting licenses. (1) The department may prescribe by rule the number of hunting licenses to be issued. Any license sold may be restricted to a specific administrative region, hunting district, or other designated area and may specify the species, age, and sex to be taken and the time period for which the license is valid.

(2) When the number of valid resident applications for big game licenses or permits of a single class or type exceeds the number of licenses or permits the department desires to issue in an administrative region, hunting district, or other designated area, then the number of big game licenses or permits issued to nonresident license or permitholders in the region, district, or area may not exceed 10% of the total issued.

(3) Disabled veterans who meet the qualifying criteria provided in 87-2-817(1) must be provided a total of 50 Class A-3 deer A tags, 50 Class A-4 deer B tags, 50 Class B-7 deer A tags, 50 Class B-8 deer B tags, and 50 special antelope licenses annually, which may be used within the administrative region, hunting district, or other designated area of the disabled veteran's choice, except in a region, district, or area where the number of licenses are less than the number of applicants, in which case qualifying disabled veterans are eligible for no more than 10% of the total licenses for that region, district, or area.

87-2-510. *(Temporary)* **Class B-11—nonresident deer combination license.** (1) (a) Except as otherwise provided in this chapter, a person who is not a resident, as defined in 87-2-102, but who is 12 years of age or older or who will turn 12 years old before or during the season for which the license is issued may, upon payment of a fee of $577 and subject to the limitations prescribed by law and department regulation, apply to the fish, wildlife, and parks office, Helena, Montana, to purchase a Class B-11 nonresident deer combination license that entitles a holder who is 12 years of age or older to all the privileges of the Class B, Class B-1, and Class B-7 licenses.

(b) Of the fee paid for the purchase of a Class B-11 nonresident deer combination license pursuant to subsection (1)(a), 28.5% must be deposited in the account established in 87-1-290.

(c) The cost of the Class B-11 nonresident deer combination license must be adjusted annually based on any change to the consumer price index from the previous year. The consumer price index to be used for calculations is the consumer price index for all urban consumers (CPI-U). The adjusted cost must be rounded down to the nearest even-numbered amount.

(2) Not more than 4,600 unreserved Class B-11 licenses may be sold in any 1 license year.

87-2-510. *(Effective March 1, 2026)* **Class B-11—nonresident deer combination license.** (1) (a) Except as otherwise provided in this chapter, a person who is not a resident, as defined in 87-2-102, but who is 12 years of age or older or who will turn 12 years old before or during the season for which the license is issued may, upon payment of a fee of $760 and subject to the limitations prescribed by law and department regulation, apply to the fish, wildlife, and parks office, Helena, Montana, to purchase a Class B-11 nonresident deer combination license that entitles a holder who is 12 years of age or older to all the privileges of the Class B, Class B-1, and Class B-7 licenses.

(b) Of the fee paid for the purchase of a Class B-11 nonresident deer combination license pursuant to subsection (1)(a), 28.5% must be deposited in the account established in 87-1-290.

(c) The cost of the Class B-11 nonresident deer combination license must be adjusted annually based on any change to the consumer price index from the previous year. The consumer price index to be used for calculations is the consumer price index for all urban consumers (CPI-U). The adjusted cost must be rounded down to the nearest even-numbered amount.

(2) Not more than 4,600 unreserved Class B-11 licenses may be sold in any 1 license year.

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 6, Ch. 676, L. 2025. Amendment effective March 1, 2026.

87-2-511. *(Temporary)* **Sale and use of Class B-10 and Class B-11 licenses.** (1) The department shall offer the Class B-10 and Class B-11 licenses for sale on April 1, with 2,000 of the authorized Class B-11 licenses reserved for applicants indicating their intent to hunt with a resident sponsor on land owned by that sponsor, as provided in subsections (2) and (3).

(2) Each application for a resident-sponsored license under subsection (1) must contain a written affirmation by the applicant that the applicant intends to hunt with a resident sponsor and must indicate the name of the resident sponsor with whom the applicant intends to hunt. In addition, the application must be accompanied by a certificate that is signed by a resident sponsor and that affirms that the resident sponsor will:

(a) direct the applicant's hunting and advise the applicant of game and trespass laws of the state;

(b) submit to the department, in a manner prescribed by the department, complete records of who hunted with the resident sponsor, where they hunted, and what game was taken; and

(c) accept no monetary consideration for enabling the nonresident applicant to obtain a license or for providing any services or assistance to the nonresident applicant, except as provided in Title 37, chapter 47, and this title.

(3) The certificate signed by the resident sponsor pursuant to subsection (2) must also affirm that the sponsor is a landowner and that the applicant under the certificate will hunt only on land owned by the sponsor. If there is a sufficient number of licenses set forth in subsection (1), the department shall issue a license to one applicant sponsored by each resident landowner

who owns 640 or more contiguous acres. If enough licenses remain for a second applicant for each resident landowner sponsor, the department shall issue a license to the second applicant sponsored by each resident landowner. The department shall conduct a drawing for any remaining resident-sponsored licenses. If there is not a sufficient number of licenses set forth in subsection (1) to allow each resident landowner who owns 640 contiguous acres to sponsor one applicant, the department shall conduct a drawing for the resident-sponsored licenses. However, a resident sponsor of a Class B-11 license may submit no more than 15 certificates of sponsorship in any license year.

(4) A nonresident who hunts under the authority of a resident landowner-sponsored license shall conduct all deer hunting on the deeded lands of the sponsoring landowner.

(5) All Class B-10 and Class B-11 licenses that are not reserved under subsection (1) must be issued by a drawing among all applicants for the respective unreserved licenses.

(6) (a) An applicant who applies for a Class B-10 license and an applicable special elk permit but who is not successful in a drawing for the special elk permit may choose to retain only the Class B-7 portion of the Class B-10 license. The department shall sell the Class B-7 portion as a Class B-11 license for the fee set in 87-2-510. The provisions of this subsection (6)(a) do not affect the limits established in 87-2-510(2). The remaining elk tag portion of the Class B-10 license must be sold by the department as an elk-only combination license for a fee of $831.

(b) Subject to the statutory quota provided in 87-2-505, if the department determines all available elk-only combination licenses have sold by December 1 in any license year, the cost of the elk-only combination license must be adjusted for the subsequent license year based on any change to the consumer price index from the previous year. The consumer price index to be used for calculations is the consumer price index for all urban consumers (CPI-U). The adjusted cost must be rounded down to the nearest even-numbered amount and applies to subsequent license years unless the conditions of this subsection are met.

(c) The department may retain 10% of the Class B-10 license fee if an applicant chooses to buy only a portion of the Class B-10 license pursuant to subsection (6)(a) after the Class B-10 license has been issued to the applicant.

(d) The revenue collected pursuant to this subsection (6) must be deposited in the state special revenue account to the credit of the department and may not be allocated pursuant to other statutory requirements generally applicable to Class B-10 or Class B-11 licenses.

87-2-511. *(Effective March 1, 2026)* **Sale and use of Class B-10 and Class B-11 licenses.** (1) The department shall offer the Class B-10 and Class B-11 licenses for sale on April 1, with 2,000 of the authorized Class B-11 licenses reserved for applicants indicating their intent to hunt with a resident sponsor on land owned by that sponsor, as provided in subsections (2) and (3).

(2) Each application for a resident-sponsored license under subsection (1) must contain a written affirmation by the applicant that the applicant intends to hunt with a resident sponsor and must indicate the name of the resident sponsor with whom the applicant intends to hunt. In addition, the application must be accompanied by a certificate that is signed by a resident sponsor and that affirms that the resident sponsor will:

(a) direct the applicant's hunting and advise the applicant of game and trespass laws of the state;

(b) submit to the department, in a manner prescribed by the department, complete records of who hunted with the resident sponsor, where they hunted, and what game was taken; and

(c) accept no monetary consideration for enabling the nonresident applicant to obtain a license or for providing any services or assistance to the nonresident applicant, except as provided in Title 37, chapter 47, and this title.

(3) The certificate signed by the resident sponsor pursuant to subsection (2) must also affirm that the sponsor is a landowner and that the applicant under the certificate will hunt only on land owned by the sponsor. If there is a sufficient number of licenses set forth in subsection (1), the department shall issue a license to one applicant sponsored by each resident landowner who owns 640 or more contiguous acres. If enough licenses remain for a second applicant for each resident landowner sponsor, the department shall issue a license to the second applicant sponsored by each resident landowner. The department shall conduct a drawing for any remaining resident-sponsored licenses. If there is not a sufficient number of licenses set forth

in subsection (1) to allow each resident landowner who owns 640 contiguous acres to sponsor one applicant, the department shall conduct a drawing for the resident-sponsored licenses. However, a resident sponsor of a Class B-11 license may submit no more than 15 certificates of sponsorship in any license year.

(4) A nonresident who hunts under the authority of a resident landowner-sponsored license shall conduct all deer hunting on the deeded lands of the sponsoring landowner.

(5) All Class B-10 and Class B-11 licenses that are not reserved under subsection (1) must be issued by a drawing among all applicants for the respective unreserved licenses.

(6) (a) An applicant who applies for a Class B-10 license and an applicable special elk permit but who is not successful in a drawing for the special elk permit may choose to retain only the Class B-7 portion of the Class B-10 license. The department shall sell the Class B-7 portion as a Class B-11 license for the fee set in 87-2-510. The provisions of this subsection (6)(a) do not affect the limits established in 87-2-510(2). The remaining elk tag portion of the Class B-10 license must be sold by the department as an elk-only combination license for a fee of $1,112.

(b) Subject to the statutory quota provided in 87-2-505, if the department determines all available elk-only combination licenses have sold by December 1 in any license year, the cost of the elk-only combination license must be adjusted for the subsequent license year based on any change to the consumer price index from the previous year. The consumer price index to be used for calculations is the consumer price index for all urban consumers (CPI-U). The adjusted cost must be rounded down to the nearest even-numbered amount and applies to subsequent license years unless the conditions of this subsection are met.

(c) The department may retain 10% of the Class B-10 license fee if an applicant chooses to buy only a portion of the Class B-10 license pursuant to subsection (6)(a) after the Class B-10 license has been issued to the applicant.

(d) The revenue collected pursuant to this subsection (6) must be deposited in the state special revenue account to the credit of the department and may not be allocated pursuant to other statutory requirements generally applicable to Class B-10 or Class B-11 licenses.

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 7, Ch. 676, L. 2025. Amendment effective March 1, 2026.

87-2-512. Separation of Class B-7 license from Class B-10 license for deer management purposes — disposition of license revenue. (1) The commission may by rule separate the Class B-7 license from the Class B-10 license and sell the separated Class B-7 license, giving a preference to any Class B-10 license holder to purchase one of the separated Class B-7 licenses. In the case of separated Class B-7 licenses that are not purchased by Class B-10 license holders, the commission, for purposes of sound deer management:

(a) may authorize the sale of not more than 5,000 Class B-7 licenses that have been separated from the Class B-10 licenses, as limited by 87-2-504;

(b) may authorize all or a portion of the separated Class B-7 licenses to be sold as Class B-11 combination licenses;

(c) shall set the fees for the separated licenses as follows:

(i) the fee for a Class B-10 license without the deer tag may not be more than the fee set in 87-2-505 for licenses in the general category; and

(ii) the fee for the separated Class B-11 licenses may not be more than the fees specified in 87-2-510 for licenses in the general and landowner-sponsored categories;

(d) may assign the separated Class B-7 or Class B-11 licenses for use in specific administrative regions, portions of administrative regions, hunting districts, or portions of hunting districts;

(e) may allocate a portion of the separated Class B-7 or Class B-11 licenses among the general and landowner-sponsored categories established in 87-2-510 and 87-2-511 but not count those licenses as part of the statutory quotas, with the Class B-7 licenses then subject to the requirements and procedures of 87-2-511; and

(f) may condition the separated Class B-7 and Class B-11 licenses as appropriate and necessary to manage the harvest of deer, including restricting the use of a license to either mule deer or whitetail deer.

(2) The revenue from any Class B-11 licenses that have been separated from Class B-10 licenses must be deposited in the state special revenue account to the credit of the department and not allocated pursuant to other statutory requirements generally applicable to Class B-11 licenses. The revenue from Class B-10 licenses sold without a deer tag must be allocated in the same manner as revenue from Class B-10 licenses sold with a deer tag.

History: En. Sec. 3, Ch. 355, L. 1997; amd. Sec. 8, I.M. No. 161, approved Nov. 2, 2010.

Cross-References

Fixing of seasons and bag and possession limits, 87-1-304.

87-2-513. *(Temporary)* **Either-sex or antlerless elk license or permit for landowner who offers free public elk hunting — terms, conditions, and issuance.** (1) (a) The department may issue, at no cost to a landowner who provides free public elk hunting on the landowner's property and pursuant to this section, an either-sex or antlerless elk license, permit, or combination of the two as required in that hunting district for the landowner or the landowner's designee to hunt on the landowner's property or on private property leased by the landowner for agricultural purposes.

(b) A designee may be an immediate family member or an authorized full-time employee of the landowner who is eligible for licensure under Title 87, chapter 2.

(2) To be eligible for a license or permit pursuant to this section, a landowner:

(a) must own at least 640 acres of occupied elk habitat, except that smaller acreages are eligible if the department determines that site conditions exist to accommodate successful public hunting;

(b) must have entered into a contractual public elk hunting access agreement with the department in accordance with subsection (7) that allows public access for free public elk hunting on the landowner's property throughout the regular hunting season; and

(c) may not charge a fee or authorize a person to charge a fee for hunting access on the landowner's property.

(3) (a) For every three members of the public allowed to hunt under the contractual public elk hunting access agreement, the department may issue one license, permit, or combination of the two pursuant to subsection (1). The department may limit the total number of licenses and permits issued under this section.

(b) At least one of the public hunters must hold the equivalent license, permit, or combination of the two that is issued to the landowner or the landowner's designee. The department, in consultation with the landowner, shall select the hunters pursuant to subsection (7)(b).

(4) A license or permit issued pursuant to this section:

(a) is nontransferable and may not be sold or bartered; and

(b) may only be used for hunting conducted on property that is opened to public access pursuant to this section.

(5) The department may prioritize distribution of licenses or permits under subsection (1) according to the areas the department determines are most in need of management.

(6) If the department determines that a landowner or landowner's designee has not abided by the restrictions and conditions of a license or permit issued pursuant to this section, that landowner or landowner's designee is not eligible to receive another license or permit pursuant to this section during any subsequent license year.

(7) (a) A contractual public elk hunting access agreement must define the areas that will be open to public elk hunting, the number of public elk hunting days that will be allowed on the property, and other factors that the department and the landowner consider necessary for the proper management of elk on the landowner's property. The agreement must include a process or methodology the landowner may use to select up to one-third of the public hunters required by subsection (3) and must reserve the right of the landowner to deny access to the landowner's property by a public hunter selected pursuant to subsection (7)(b) for cause, including but not limited to intoxication, violation of landowner conditions for use of the property, or previous misconduct on a landowner's property.

(b) Except for public hunters selected by the landowner pursuant to subsection (7)(a), the department shall select public hunters eligible to hunt on the landowner's property through a random drawing of holders of existing licenses or permits in that hunting district.

(8) (a) Licenses, permits, or combinations of the two issued under this section must be for wildlife management purposes and approved by the commission pursuant to its powers under 87-1-301.

(b) The commission shall prioritize approval of an application for a license, permit, or combination of the two based on the willingness of the landowner to allow, in either the regular hunting season or a shoulder hunting season, additional cow harvest by public hunters in addition to the number of public hunters required in subsection (3).

(9) For the purposes of this section, the following definitions apply:

(a) "Employee" means a person who works full time for the landowner as part of an active farm or ranch operation enrolled in the program.

(b) "Immediate family member" means a spouse, parent, grandparent, child, grandchild, sibling, niece, or nephew by blood, marriage, or legal adoption.

87-2-513. *(Effective March 1, 2026)* **Either-sex or antlerless elk license or permit for landowner who offers free public elk hunting — terms, conditions, and issuance.** (1) (a) The department may issue, at no cost to a landowner who provides free public elk hunting on the landowner's property and pursuant to this section, an either-sex or antlerless elk license, permit, or combination of the two as required in that hunting district for the landowner or the landowner's designee to hunt on the landowner's property or on private property leased by the landowner for agricultural purposes.

(b) A designee must be eligible for licensure under Title 87, chapter 2, and be an immediate family member, an authorized full-time employee of the landowner, or a person with a developmental disability or a physical disability as determined by the department.

(2) To be eligible for a license or permit pursuant to this section, a landowner:

(a) must own at least 640 acres of occupied elk habitat, except that smaller acreages are eligible if the department determines that site conditions exist to accommodate successful public hunting;

(b) must have entered into a contractual public elk hunting access agreement with the department in accordance with subsection (7) that allows public access for free public elk hunting on the landowner's property throughout the regular hunting season; and

(c) may not charge a fee or authorize a person to charge a fee for hunting access on the landowner's property.

(3) (a) For every three members of the public allowed to hunt under the contractual public elk hunting access agreement, the department may issue one license, permit, or combination of the two pursuant to subsection (1). The department may limit the total number of licenses and permits issued under this section.

(b) At least one of the public hunters must hold the equivalent license, permit, or combination of the two that is issued to the landowner or the landowner's designee. The department, in consultation with the landowner, shall select the hunters pursuant to subsection (7)(b).

(4) A license or permit issued pursuant to this section:

(a) is nontransferable and may not be sold or bartered; and

(b) may only be used for hunting conducted on property that is opened to public access pursuant to this section.

(5) The department may prioritize distribution of licenses or permits under subsection (1) according to the areas the department determines are most in need of management.

(6) If the department determines that a landowner or landowner's designee has not abided by the restrictions and conditions of a license or permit issued pursuant to this section, that landowner or landowner's designee is not eligible to receive another license or permit pursuant to this section during any subsequent license year.

(7) (a) A contractual public elk hunting access agreement must define the areas that will be open to public elk hunting, the number of public elk hunting days that will be allowed on the property, and other factors that the department and the landowner consider necessary for the proper management of elk on the landowner's property. The agreement must include a process

or methodology the landowner may use to select up to one-third of the public hunters required by subsection (3) and must reserve the right of the landowner to deny access to the landowner's property by a public hunter selected pursuant to subsection (7)(b) for cause, including but not limited to intoxication, violation of landowner conditions for use of the property, or previous misconduct on a landowner's property.

(b) Except for public hunters selected by the landowner pursuant to subsection (7)(a), the department shall select public hunters eligible to hunt on the landowner's property through a random drawing of holders of existing licenses or permits in that hunting district.

(8) (a) Licenses, permits, or combinations of the two issued under this section must be for wildlife management purposes and approved by the commission pursuant to its powers under 87-1-301.

(b) The commission shall prioritize approval of an application for a license, permit, or combination of the two based on the willingness of the landowner to allow, in either the regular hunting season or a shoulder hunting season, additional cow harvest by public hunters in addition to the number of public hunters required in subsection (3).

(9) For the purposes of this section, the following definitions apply:

(a) "Developmental disability" means a developmental disability as defined in 53-20-102.

(b) "Employee" means a person who works full-time for the landowner as part of an active farm or ranch operation enrolled in the program.

(c) "Immediate family member" means a spouse, parent, grandparent, child, grandchild, sibling, niece, or nephew by blood, marriage, or legal adoption.

(d) "Physical disability" means a person experiencing a condition medically determined to be permanent and substantial and resulting in significant impairment of the person's functional ability.

History: **En. Sec. 1, Ch. 519, L. 2001; amd. Sec. 10, Ch. 553, L. 2003; amd. Sec. 1, Ch. 37, L. 2019; amd. Sec. 11, Ch. 63, L. 2019; amd. Sec. 2, Ch. 94, L. 2021; amd. Sec. 4, Ch. 486, L. 2021; amd. Sec. 8, Ch. 552, L. 2021; amd. Sec. 1, Ch. 730, L. 2023; amd. Sec. 2, Ch. 359, L. 2025.**

2025 Amendment: See 2025 Session Law for amendment made by sec. 2, Ch. 359, L. 2025. Amendment effective March 1, 2026.

87-2-514. Nonresident relative of resident allowed to purchase nonresident licenses at reduced cost — definitions. (1) For the purposes of this section, the following definitions apply:

(a) "Nonresident relative of a resident" means a person born in Montana who is the natural or adoptive child, sibling, or parent of a resident but is not a resident.

(b) "Resident" means a resident as defined in 87-2-102.

(2) Except as otherwise provided in this chapter, a nonresident relative of a resident who meets the qualifications of subsection (4) may purchase the following at one-half the cost:

(a) a Class B nonresident fishing license;

(b) a Class B-1 nonresident upland game bird license;

(c) one of the following:

(i) a Class B-10 nonresident big game combination license;

(ii) a Class B-11 nonresident deer combination license; or

(iii) a nonresident elk-only combination license;

(d) if available:

(i) a Class B-8 nonresident deer B tag;

(ii) a Class B-12 nonresident antlerless elk B tag license.

(3) Class B-10 and Class B-11 licenses sold pursuant to subsection (2) are not included in the limit on the number of available Class B-10 and Class B-11 licenses issued pursuant to 87-2-505 and 87-2-510. Nonresident elk-only combination licenses sold pursuant to subsection (2) are in addition to nonresident elk-only combination licenses available for sale pursuant to 87-2-511.

(4) To qualify for a license pursuant to subsection (2), a nonresident relative of a resident shall apply at any department regional office or at the department's state office in Helena and present proof of the following:

(a) a birth certificate verifying the applicant's birth in Montana or documentation that the applicant was born to parents who were residents at the time of birth;

(b) evidence that the person previously held a Montana resident hunting or fishing license or has passed a hunter safety and education course in Montana pursuant to 87-2-105; and

(c) proof that the applicant is a nonresident relative of a resident.

(5) Of the fee paid for a hunting license purchased pursuant to subsection (2), 28.5% must be deposited in the account established in 87-1-290.

History: En. Sec. 1, Ch. 484, L. 2005; amd. Sec. 122, Ch. 2, L. 2009; amd. Sec. 2, Ch. 415, L. 2011; amd. Sec. 20, Ch. 449, L. 2015; amd. Sec. 2, Ch. 287, L. 2017; amd. Sec. 13, Ch. 387, L. 2017; amd. Sec. 12, Ch. 221, L. 2019; amd. Sec. 5, Ch. 170, L. 2021.

87-2-515. Repealed. Secs. 40, 42(1), Ch. 449, L. 2015.

History: En. Sec. 2, Ch. 484, L. 2005; amd. Sec. 3, Ch. 415, L. 2011.

87-2-516. *(Temporary)* **Drawing for Class A-9 and Class B-12 antlerless elk B tag licenses — landowner preference.** (1) In the event the number of valid applications for Class A-9 resident antlerless elk B tag licenses or Class B-12 nonresident antlerless elk B tag licenses for a hunting district exceeds the quota set by the department for the district, the department shall award the permits by a drawing.

(2) Subject to the limitations of subsection (4), in a hunting district where Class A-9 and Class B-12 licenses are issued, a corresponding Class A-9 or B-12 license must be issued, on application, to persons who:

(a) own 640 acres or more of contiguous land, at least some of which is used by elk as documented by the department; or

(b) own 160 acres or more of contiguous production agricultural land on which the department documented elk game damage within the last 2 years.

(3) A landowner who is eligible to receive a Class A-9 or Class B-12 license under subsection (2) may designate an immediate family member or an employee of the landowner to apply for the license. A corporation owning qualifying land under subsection (2) may designate one of its shareholders to apply for the Class A-9 or Class B-12 license.

(4) Subject to the management provisions provided in 87-1-321 through 87-1-325, 15% of the Class A-9 and Class B-12 licenses available each year in a hunting district must be available to landowners pursuant to subsection (2).

(5) For the purposes of this section, "employee" means a person who is paid by a landowner to do work and who has state or federal taxes withheld from the payment for the work provided.

87-2-516. *(Effective March 1, 2026)* **Drawing for Class A-9 and Class B-12 antlerless elk B tag licenses — landowner preference.** (1) In the event the number of valid applications for Class A-9 resident antlerless elk B tag licenses or Class B-12 nonresident antlerless elk B tag licenses for a hunting district exceeds the quota set by the department for the district, the department shall award the permits by a drawing.

(2) Subject to the limitations of subsection (4), in a hunting district where Class A-9 and Class B-12 licenses are issued, a corresponding Class A-9 or B-12 license must be issued, on application, to persons who:

(a) own 640 acres or more of contiguous land, at least some of which is used by elk as documented by the department; or

(b) own 160 acres or more of contiguous production agricultural land on which the department documented elk game damage within the last 2 years.

(3) A landowner who is eligible to receive a Class A-9 or Class B-12 license under subsection (2) may designate an immediate family member, an employee of the landowner, or a person with a developmental disability or a physical disability as determined by the department to apply for the license. A corporation owning qualifying land under subsection (2) may designate one of its shareholders to apply for the Class A-9 or Class B-12 license.

(4) Subject to the management provisions provided in 87-1-321 through 87-1-325, 15% of the Class A-9 and Class B-12 licenses available each year in a hunting district must be available to landowners pursuant to subsection (2).

(5) For the purposes of this section, "employee" means a person who is paid by a landowner to do work and who has state or federal taxes withheld from the payment for the work provided.

History: En. Sec. 1, Ch. 486, L. 2021; amd. Sec. 3, Ch. 359, L. 2025; amd. Sec. 1, Ch. 373, L. 2025.

2025 Amendments — Composite Section: See 2025 Session Law for amendment made by sec. 3, Ch. 359, L. 2025. Amendment effective March 1, 2026.

See 2025 Session Law for amendment made by sec. 1, Ch. 373, L. 2025. Amendment effective May 5, 2025.

87-2-517 and 87-2-518 reserved.

87-2-519. Class D-4—nonresident hound license. (1) Except as provided in subsections (5) and (6), in order for a nonresident to use a dog or dogs to aid in the pursuit or harvest of mountain lions or black bears, the nonresident shall first purchase, for a fee of $250, a Class D-4 nonresident hound license. To be eligible, the nonresident must be:

(a) at least 18 years of age or older or turn 18 years of age before or during the season for which the license is issued; and

(b) a holder of a nonresident conservation license and a Class D-1 nonresident mountain lion license or a special nonresident black bear license.

(2) Not more than 80 Class D-4 licenses may be sold in any 1 license year.

(3) A Class D-4 license must be used as authorized by this section and any rule adopted by the department or commission.

(4) A holder of a Class D-4 license may only pursue mountain lions or black bears for the purpose of personally harvesting an animal and may not assist any other person in the pursuit of a lion or bear for harvest.

(5) A nonresident is not required to have a Class D-4 license to use a dog or dogs to aid in the pursuit or harvest of mountain lions or black bears when the nonresident:

(a) is hunting with an outfitter licensed pursuant to Title 37, chapter 47, part 3; or

(b) is a nonresident landowner who owns 640 or more contiguous acres. Nonpaying guests of the nonresident landowner may also hunt and pursue mountain lions or black bears on the landowner's property and any adjacent public land within 2 miles of the landowner's property without a Class D-4 license.

(6) A nonresident outfitter or guide licensed pursuant to Title 37, chapter 47, part 3, is not required to have a Class D-4 license.

(7) After recovering the costs associated with license administration, the department shall use revenue collected from the sale of licenses pursuant to this section for the management, conservation, and monitoring of mountain lions and black bears.

History: En. Sec. 1, Ch. 378, L. 2019; amd. Sec. 7, Ch. 552, L. 2021; amd. Sec. 17, Ch. 507, L. 2023.

87-2-520. Supplemental game damage license — terms and conditions. (1) If at any time the department determines, in conjunction with a landowner or a designated lessee acting as an agent for a landowner, that game animals on the property are causing a level of damage to crops or other vegetation that merits removal of a specific number of game animals or that the taking of a specific number of game animals is advisable for game management purposes, the department may issue nontransferable resident and nonresident supplemental game damage hunting licenses for game management purposes on the property.

(2) Supplemental game damage hunting licenses may be issued only for antlerless animals and may be issued only for use on lands eligible for game damage assistance pursuant to 87-1-225. A landowner may not charge a fee to a hunter using a license obtained pursuant to this section.

(3) Supplemental game damage licenses may be issued to hunters as an alternative to issuing a kill permit to a landowner.

(4) (a) In a hunting district with unlimited license quotas, a landowner may designate the resident supplemental game damage license recipient on approval of issuance, including a recipient who has obtained an apprentice certificate pursuant to 87-2-810.

(b) In a hunting district with limited permit quotas, a landowner may designate up to 75% of the resident supplemental game damage license recipients, with the remainder of the licenses offered to hunters in a manner prescribed by the department.

(5) If additional supplemental game damage licenses are available, the department may issue those licenses to resident and nonresident hunters.

(6) A licensee shall pay the regular license price or an adjusted price set by the commission for any supplemental game management license issued pursuant to subsection (1). Issuance of a supplemental game damage license authorizes the licensee to hunt, take, and possess the game

animal designated on the license. All hunting under a supplemental game damage license must be conducted on the property designated on the license and in accordance with department regulations.

History: En. Sec. 1, Ch. 590, L. 2001; amd. Sec. 21, Ch. 449, L. 2015; amd. Sec. 2, Ch. 44, L. 2025.

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 2, Ch. 44, L. 2025. Amendment effective October 1, 2025.

87-2-521. Class D-3—resident hound training license. A person who is a resident, as defined in 87-2-102, and who is 12 years of age or older or who will turn 12 years old before or during the season for which the license is issued, upon payment of a fee of $5, may receive a Class D-3 hound training license that entitles the holder to use a dog or dogs to aid in pursuing mountain lions, bobcats, or black bears during a training season established in 87-6-404(4).

History: En. Sec. 2, Ch. 126, L. 2003; amd. Sec. 96, Ch. 258, L. 2011; amd. Sec. 1, Ch. 359, L. 2021.

87-2-522. Nonresident youth combination licenses. (1) Except as otherwise provided in this chapter, a person who is not a resident, as defined in 87-2-102, and who is 12 years of age or older or will turn 12 years old before or during the season for which the license is issued and who is under 18 years of age may, upon payment of a fee of one-half of the cost of a regularly priced license and subject to the limitations prescribed by law and department regulation, apply to the fish, wildlife, and parks office in Helena, Montana, to purchase:

(a) one of the following:

(i) a Class B-10 nonresident big game combination license;

(ii) a Class B-11 nonresident deer combination license; or

(iii) a nonresident elk-only combination license;

(b) if available:

(i) a Class B-8 nonresident deer B tag;

(ii) a Class B-12 nonresident antlerless elk B tag license.

(2) (a) When using a license issued pursuant to this section, the holder must be accompanied by an adult immediate family member who is the holder of a valid Class B-7, Class B-8, Class B-10, Class B-11, Class B-12, or nonresident elk-only combination license or who is the holder of a valid resident deer or elk tag. As used in this subsection, an adult immediate family member means an applicant's natural or adoptive parent, grandparent, brother, sister, stepparent, or legal guardian who is 18 years of age or older.

(b) An applicant shall provide the name and automated licensing system number of the adult immediate family member who will accompany the youth when applying for a license pursuant to this section.

(3) Class B-10 and Class B-11 licenses issued pursuant to this section are not included in the limit on the number of available Class B-10 and Class B-11 licenses issued pursuant to 87-2-505 and 87-2-510. Nonresident elk-only combination licenses issued pursuant to this section are in addition to nonresident elk-only combination licenses available for sale pursuant to 87-2-511.

History: En. Sec. 1, Ch. 470, L. 2005; amd. Sec. 1, Ch. 183, L. 2011; amd. Sec. 2, Ch. 104, L. 2013; amd. Sec. 22, Ch. 449, L. 2015; amd. Sec. 3, Ch. 287, L. 2017; amd. Sec. 1, Ch. 30, L. 2021.

87-2-523. Class E-1—resident wolf license. (1) Except as otherwise provided in this chapter and in subsection (2) of this section, a person who is a resident, as defined in 87-2-102, and who is 12 years of age or older or who will turn 12 years old before or during the season for which the license is issued, upon payment of a fee of $12, may receive a Class E-1 license that entitles a holder who is 12 years of age or older to hunt a wolf and possess the carcass of the wolf as authorized by commission rules.

(2) A resident holder of a Class AAA combination sports license, regardless of whether it includes a Class A-6 bear tag, may purchase the first Class E-1 license the person obtains in that license year for $10.

(3) Fees collected pursuant to this section must be deposited and used in accordance with 87-1-623.

History: En. Sec. 1, Ch. 415, L. 2007; amd. Sec. 2, Ch. 390, L. 2011; amd. Sec. 3, Ch. 13, L. 2013; amd. Sec. 3, Ch. 297, L. 2013; amd. Sec. 1, Ch. 377, L. 2019; amd. Sec. 1, Ch. 405, L. 2019; amd. Sec. 1, Ch. 90, L. 2023.

87-2-524. Class E-2—nonresident wolf license. (1) Except as otherwise provided in this chapter and in subsection (2) of this section, a person who is not a resident, as defined in 87-2-102, but who is 12 years of age or older or who will turn 12 years old before or during the season for which the license is issued, upon payment of a fee of $50, may receive a Class E-2 license that entitles a holder who is 12 years of age or older to hunt a wolf and possess the carcass of the wolf as authorized by commission rules.

(2) A nonresident holder of a valid Class B-10 nonresident big game combination license or Class B-11 deer combination license may purchase the first Class E-2 license the person obtains in that license year for one-half the cost.

(3) Fees collected pursuant to this section must be deposited and used in accordance with 87-1-623.

History: En. Sec. 2, Ch. 415, L. 2007; amd. Sec. 3, Ch. 390, L. 2011; amd. Sec. 4, Ch. 13, L. 2013; amd. Sec. 4, Ch. 297, L. 2013; amd. Sec. 1, Ch. 351, L. 2019; amd. Sec. 2, Ch. 90, L. 2023.

87-2-525. Nonresident college student licenses. (1) Subject to the provisions of subsection (2), a student who is not a resident, as defined in 87-2-102, and who meets the qualifications of subsection (3) may purchase discounted hunting and fishing licenses as follows:

(a) If the student's state of residence does not offer resident-rate licenses to Montanans who are full-time college students in that state, the student may purchase the following for one-half of the cost:

(i) one of the following:

(A) a Class B-10 nonresident big game combination license;

(B) a Class B-11 nonresident deer combination license; or

(C) a nonresident elk-only combination license;

(ii) if available:

(A) a Class B-8 nonresident deer B tag; and

(B) a Class B-12 nonresident antlerless elk B tag license.

(b) If the student's state of residence offers resident-rate licenses to Montanans who are full-time college students in that state and as long as a drawing for the equivalent resident license is not required, the student may purchase for the same price as the equivalent resident license:

(i) (A) any of the following:

(I) a Class B-30 nonresident college student fishing license;

(II) a Class B-31 nonresident college student upland game bird license;

(III) a Class B-32 nonresident college student deer A tag; and

(IV) a Class B-33 nonresident college student elk tag; or

(B) a Class B-34 nonresident college student big game combination license that entitles the holder to all the privileges of the licenses listed in subsection (1)(b)(i)(A) and a nonresident conservation license;

(ii) a Class B-35 nonresident college student migratory game bird license;

(iii) a Class B-36 nonresident college student turkey tag;

(iv) a Class B-37 nonresident college student deer B tag; and

(v) a Class B-38 nonresident college student antlerless elk B tag.

(2) (a) The holder of a license purchased pursuant to this section is entitled to use that license to hunt or fish, as relevant, and to possess the carcass of the species taken in the manner prescribed by the rules and regulations of the commission and department.

(b) A student may not purchase a license pursuant to this section for more than 4 license years.

(3) (a) To qualify for a license issued pursuant to this section, a student may not possess or apply for any resident hunting, fishing, or trapping licenses from another state or country or exercise resident hunting, fishing, or trapping privileges in another state or country and must:

(i) be currently enrolled as a full-time undergraduate student at a postsecondary educational institution in Montana, with 12 credits or more being considered full-time;

(ii) be currently enrolled as a full-time graduate student at a postsecondary educational institution in the state, with 9 credits or more being considered full-time unless otherwise defined by the academic department in which the student is enrolled; or

(iii) (A) have a natural or adoptive parent who currently is a Montana resident, as defined in 87-2-102;

(B) have a high school diploma from a Montana public, private, or home school or can provide certified verification that the applicant has a high school equivalency diploma issued in Montana; and

(C) be currently enrolled as a full-time student at a postsecondary educational institution in another state.

(b) A student is not eligible to receive a license pursuant to this section if the student is enrolled in a degree program that is exclusively delivered online.

(4) Application for a license issued pursuant to this section may be made after the second Monday in September. To qualify, the applicant shall supply a copy of a valid student identification card and verification of current full-time enrollment at a postsecondary educational institution as required by the department.

(5) Class B-10 and Class B-11 licenses issued pursuant to this section are not included in the limit on the number of available Class B-10 and Class B-11 licenses issued pursuant to 87-2-505 and 87-2-510. Nonresident elk-only combination licenses issued pursuant to this section are in addition to nonresident elk-only combination licenses available for sale pursuant to 87-2-511.

History: En. Sec. 1, Ch. 174, L. 2009; amd. Sec. 39, Ch. 55, L. 2015; amd. Sec. 23, Ch. 449, L. 2015; amd. Sec. 4, Ch. 287, L. 2017; amd. Sec. 1, Ch. 368, L. 2021; amd. Sec. 1, Ch. 69, L. 2023; amd. Sec. 18, Ch. 507, L. 2023.

87-2-526. License for nonresident to hunt with resident sponsor or family member — use of license revenue. (1) The department may offer for sale 500 B-10 nonresident big game combination licenses, 500 B-11 nonresident deer combination licenses, and 500 nonresident elk-only combination licenses that must be used as provided in this section and as authorized by department rules. Sale of licenses pursuant to this section does not affect the license quotas established for Class B-10 and Class B-11 licenses in 87-2-505 and 87-2-510 or the number of nonresident elk-only combination licenses available pursuant to 87-2-511. The price of licenses sold under this subsection is one-half of the fee set for the equivalent license in 87-2-505, 87-2-510, or 87-2-511.

(2) A license authorized in subsection (1) may be used only by an adult nonresident family member of a resident who sponsors the license application and who meets the qualifications of subsection (3). The nonresident family member must have completed a Montana hunter safety and education course and have previously purchased a resident hunting license. A nonresident family member who receives a license pursuant to subsection (1) must be accompanied in the field by a sponsor or family member who meets the qualifications of subsection (3).

(3) To qualify as a sponsor or family member who will accompany a nonresident licensed under subsection (1), a person must be a resident, as defined in 87-2-102, who is 18 years old or older and possesses a current resident hunting license and who is related to the nonresident within the second degree of kinship by blood or marriage. The second degree of kinship includes a mother, father, brother, sister, son, daughter, spouse, grandparent, grandchild, brother-in-law, sister-in-law, son-in-law, daughter-in-law, father-in-law, mother-in-law, stepfather, stepmother, stepbrother, stepsister, stepson, and stepdaughter. The sponsor shall list on the license application the names of family members who are eligible to hunt with the nonresident hunter.

(4) If the department receives more applications for licenses than the number that are available under subsection (1), the department shall conduct a drawing for the licenses. Applicants who are unsuccessful in the drawing must be entered in the general drawing for a nonresident license provided under 87-2-505 or 87-2-510, as applicable.

(5) All money received from the sale of licenses under subsection (1) must be deposited in a separate account and must be used by the department to acquire public hunting access to inaccessible public land, which may include obtaining hunting access through private land to inaccessible public land.

History: En. Sec. 1, Ch. 345, L. 2009; amd. Sec. 1, Ch. 107, L. 2013; amd. Sec. 24, Ch. 449, L. 2015; amd. Sec. 5, Ch. 287, L. 2017; amd. Sec. 1, Ch. 24, L. 2021.

87-2-527 through 87-2-529 reserved.

87-2-530. Class F—nonresident wildlife management area shed hunting license. (1) A person who is not a resident as defined in 87-2-102, on payment of a $50 fee, is entitled to receive a Class F license that authorizes the holder of the license to shed hunt as defined in 87-1-201 in a wildlife management area.

(2) A person found in violation of this section:

(a) for a first offense, must be given a warning;

(b) for a second offense, is guilty of a misdemeanor and shall be fined not more than twice the cost of a Class F license. In addition, the person, on conviction or forfeiture of bond or bail, may be subject to forfeiture of any current shed hunting license and the privilege to shed hunt in a wildlife management area for a period of time set by the court.

(c) for a third offense, is guilty of a misdemeanor and shall be fined not more than $500. In addition, the person, on conviction or forfeiture of bond or bail, shall forfeit any current shed hunting license and the privilege to shed hunt in a wildlife management area for a period of time set by the court.

History: **En. Sec. 1, Ch. 748, L. 2025.**

87-2-603. Class C-2—nonresident trapper's license — reciprocity. (1) A person not a resident, as defined in 87-2-102, who is 12 years of age or older, on making application and payment of a fee of $250 to the department, is entitled to a nonresident trapper's license that authorizes the holder to trap and snare predatory animals, nongame wildlife, and, subject to the provisions of subsection (2), certain fur-bearing species within the state. The trapping or snaring is permitted only after October 15 of each license year and in the manner provided by law and the rules of the commission and at the places that may be designated in the license.

(2) A person seeking a license to trap fur-bearing species under this subsection (2) shall:

(a) provide a notarized affidavit on a form approved by the department listing the person's legal residence, including the state;

(b) (i) provide documentation that the person's resident state issues nonresident trapping licenses that allow Montana residents to trap the same species for which the person seeks to trap in Montana; or

(ii) attest on the affidavit that the person's resident state does not offer reciprocity for trapping the fur-bearing species the person seeks to trap in Montana because the species does not exist in the resident state; and

(c) provide evidence that the person completed a trapping education course that is equivalent to the trapping education requirements for residents.

History: En. Sec. 2, Ch. 255, L. 1979; amd. Sec. 3, Ch. 329, L. 1985; amd. Sec. 2, Ch. 321, L. 2003; amd. Sec. 1, Ch. 466, L. 2023.

History: En. Sec. 3, Ch. 255, L. 1979; amd. Sec. 2846, Ch. 56, L. 2009.

87-2-605. Class C-3—youth trapping license. Except as otherwise provided in this chapter, a resident, as defined in 87-2-102, who is 6 years of age or older and less than 12 years of age, upon making application to the department, may receive a Class C-3 license that authorizes the holder to trap fur-bearing animals, the trapping of which has not been restricted by the commission, within the state at the times and in the manner provided by law and the regulations of the commission and at the places that may be designated in the license.

History: En. Sec. 1, Ch. 329, L. 1985; amd. Sec. 3, Ch. 321, L. 2003.

87-2-606. Class C-4—resident license to hunt bobcat, wolverine, and Canada lynx. Except as otherwise provided in this chapter, a resident, as defined in 87-2-102, who is 12 years of age or older, upon making application and payment of a fee of $20 to the department, may receive a Class C-4 license that authorizes the holder to hunt bobcat, wolverine, and Canada lynx within the state at the times and in the manner provided by law and the regulations of the commission and at the places that may be designated in the license.

History: En. Sec. 2, Ch. 170, L. 2021.

Part 7
Special and Combination Licenses and Nongame Certificate

Part Cross-References

Seasonal rules adopted annually, 2-4-102.
Powers and duties of Department of Fish, Wildlife, and Parks, 87-1-201.
Posting and publication of orders, rules, and regulations, 87-1-202.

87-2-701. Special licenses. (1) An applicant who is 12 years of age or older or who will turn 12 years old before or during the season for which the license is issued may apply for a special license that, in the judgment of the department, is to be issued and shall pay the following fees:

(a) moose—resident, $125; nonresident, $1,250;
(b) mountain goat—resident, $125; nonresident, $1,250;
(c) mountain sheep—resident, $125; nonresident, $1,250;
(d) antelope—resident, $14; nonresident, $200;
(e) grizzly bear—resident, $150; nonresident, $1,000;
(f) black bear—nonresident, $350;
(g) wild buffalo or bison—resident, $125; nonresident, $1,250.

(2) If a holder of a valid special grizzly bear license who is 12 years of age or older kills a grizzly bear, the person shall purchase a trophy license for a fee of $50 within 10 days after the date of the kill. The trophy license authorizes the holder to possess and transport the trophy.

(3) Except as provided in 87-5-302 for special grizzly bear licenses, special licenses must be issued in a manner prescribed by the department.

Cross-References

Portion of fee to fund wildlife habitat, 87-1-242.
Wildlife conservation license prerequisite, 87-2-201.
Auction of male mountain sheep license, 87-2-722.
Auction of male Shiras moose license, 87-2-724.

87-2-702. Restrictions on special licenses — availability of bear and mountain lion licenses. (1) A person who has killed or taken any game animal, except a deer, an elk, or an antelope, during the current license year is not permitted to receive a special license under this chapter to hunt or kill a second game animal of the same species.

(2) The commission may require applicants for special permits authorized by this chapter to obtain a valid big game license for that species for the current year prior to applying for a special permit.

(3) Except as provided in 87-2-815, a person may take only one grizzly bear in Montana with a license authorized by 87-2-701.

(4) (a) Except as provided in 87-1-271(2), 87-1-275, and 87-2-815, a person who receives a moose, mountain goat, or limited mountain sheep license, as authorized by 87-2-701, with the exception of an antlerless moose or an adult ewe game management license issued under 87-2-104, is not eligible to receive another special license for that species for the next 7 years. For the purposes of this subsection (4)(a), "limited mountain sheep license" means a license that is valid for an area in which the number of licenses issued is restricted.

(b) Except as provided in 87-1-271(2) and 87-2-815, a person who takes a legal ram mountain sheep with at least one horn that is equal to or greater than a three-fourths curl using an unlimited mountain sheep license or a population management license issued pursuant to 87-2-701 is not eligible to receive another special license for that species for the next 7 years. For the purposes of this subsection (4)(b), "unlimited mountain sheep license" means a license that is valid for an area in which the number of licenses issued is not restricted.

(5) An application for a wild buffalo or bison license must be made on the same form and is subject to the same license application deadline as the special license for moose, mountain goat, and mountain sheep.

87-2-704. Regulation of special elk permits. (1) The department may:

(a) provide for the refund of resident elk tag license fees to persons applying for special elk permits in hunting districts where there is no general elk hunting and set time limits and describe area restrictions; and

(b) designate special elk permit areas where priority will be given to applicants who have not held special elk permits for a period of years to be determined by the department.

(2) The department shall provide that a person who is issued a special elk permit to hunt antlerless elk during the regular hunting season is:

(a) limited to the hunting and taking of only an antlerless elk in the hunting district or portion of a hunting district where the permit is valid, except that in a hunting district or portion of a district where the holder of a general elk license is allowed to hunt antlerless elk during certain times, the holder of a special elk permit to hunt antlerless elk in that district or portion of a district may also hunt any elk authorized under the regulations for a general elk license during those same times; and

(b) entitled to the general elk hunting privileges for a holder of a Class A-5 license in all other hunting districts.

(3) The commission may establish a waiting period during which a person who has received a special elk permit that is valid for an antlered bull may not receive another special elk permit that is valid for an antlered bull. The commission may specify which special elk permits are subject to the waiting period, by hunting district or portion of a hunting district.

(4) The fee for a special elk permit is $4.

(5) The department may adopt rules necessary to implement this section.

History: En. 26-202.7 by Sec. 2, Ch. 546, L. 1975; amd. Sec. 13, Ch. 417, L. 1977; R.C.M. 1947, 26-202.7; amd. Sec. 1, Ch. 358, L. 1991; amd. Sec. 14, Ch. 592, L. 1991; amd. Sec. 5, Ch. 201, L. 2003; amd. Sec. 14, Ch. 585, L. 2005; amd. Sec. 1, Ch. 175, L. 2009.

Resident elk license and special resident and nonresident antlerless elk license, 87-2-501.

87-2-705. *(Temporary)* **Drawing for special elk permits.** (1) In the event the number of valid applications for special elk permits for a hunting district exceeds the quota set by the department for the district, these permits shall be awarded by a drawing. The department shall provide for those persons making valid application for special elk permits a method of selecting first, second, and third choice hunting districts for any drawing held pursuant to this section.

(2) Subject to the limitation of subsection (4), a person who owns 640 acres or more of contiguous land, at least some of which is used by elk as documented by the department, in a hunting district where elk permits are awarded under this section shall be issued, upon application, a permit to hunt elk in the hunting district under the terms and conditions of the permit.

(3) An applicant who receives a permit under subsection (2) may designate that the permit be issued to an immediate family member or an employee of the landowner who works full time and year-round as part of the active farm or ranch operation. A corporation owning qualifying land under subsection (2) may designate one of its shareholders to receive the permit.

(4) Fifteen percent of the special elk permits available each year under this section in a hunting district must be available to landowners under subsection (2).

(5) The department may promulgate the rules necessary to implement this section.

87-2-705. *(Effective March 1, 2026)* **Drawing for special elk permits.** (1) In the event the number of valid applications for special elk permits for a hunting district exceeds the quota set by the department for the district, these permits shall be awarded by a drawing. The department shall provide for those persons making valid application for special elk permits a method of selecting first, second, and third choice hunting districts for any drawing held pursuant to this section.

(2) Subject to the limitation of subsection (4), a person who owns 640 acres or more of contiguous land, at least some of which is used by elk as documented by the department, in

a hunting district where elk permits are awarded under this section shall be issued, upon application, a permit to hunt elk in the hunting district under the terms and conditions of the permit.

(3) An applicant who receives a permit under subsection (2) may designate that the permit be issued to an immediate family member, an employee of the landowner who works full time and year-round as part of the active farm or ranch operation, or a person with a developmental disability or a physical disability as determined by the department. A corporation owning qualifying land under subsection (2) may designate one of its shareholders to receive the permit.

(4) Fifteen percent of the special elk permits available each year under this section in a hunting district must be available to landowners under subsection (2).

(5) The department may promulgate the rules necessary to implement this section.

See 2025 Session Law for amendment made by sec. 2, Ch. 373, L. 2025. Amendment effective May 5, 2025.

87-2-706. Drawing for special antelope licenses — licenses for those with life-threatening illness. (1) In the event that the number of valid applications for special antelope licenses for a hunting district exceeds the quota set by the department for the district, the licenses must be awarded by a drawing. The department shall provide for those persons making valid application for special antelope licenses a method of selecting first, second, and third choice hunting districts for any drawing held pursuant to this section.

(2) The department shall reserve for applicants who are nonambulatory and have a permanent physical disability, as determined by the department, up to 25 of the total special antelope licenses authorized for sale in the state, excepting those licenses issued pursuant to 87-2-817(1), for use in the district designated by the commission. If the number of valid disabled applicants exceeds the number of licenses available, the department may hold a drawing in which all applicants have an equal chance of being selected.

(3) (a) The department may issue a special antelope license to a resident or nonresident who has been diagnosed with a life-threatening illness unless the person qualifies for a license pursuant to 87-2-805. As used in this subsection (3), "life-threatening illness" means any progressive, degenerative, or malignant disease or condition that results in a significant threat, likelihood, or certainty that the person's life expectancy will not extend more than 1 year from the date of the request for the license unless the course of the disease is interrupted or abated.

(b) To qualify for the license, the department must receive documentation that the person has been diagnosed with a life-threatening illness from a licensed physician.

(c) The license may be issued on a one-time basis for one hunting season.

(d) In exercising hunting privileges, the person shall conduct all hunting within the terms and conditions of the license issued.

(e) The department may issue up to 25 licenses pursuant to this subsection (3) annually. These licenses do not count against any quota set by the department. Licenses issued pursuant to this subsection (3) do not count against the number of special antelope licenses reserved for people with permanent disabilities as provided in subsection (2).

(4) The department may promulgate rules that are necessary to implement this section.

History: En. Sec. 1, Ch. 267, L. 1955; amd. Sec. 1, Ch. 16, L. 1957; amd. Sec. 1, Ch. 100, L. 1957; amd. Sec. 2, Ch. 36, L. 1959; amd. Sec. 1, Ch. 36, L. 1963; amd. Sec. 1, Ch. 55, L. 1963; amd. 87-2-709 and 87-2-710 reserved.

87-2-711. *(Temporary)* **Class AAA—combination sports license.** (1) Except as otherwise provided in this chapter, a resident, as defined by 87-2-102, who is 12 years of age or older or who will turn 12 years old before or during the season for which the license is issued is entitled to:

(a) a combination sports license that permits a holder who is 12 years of age or older to exercise all rights granted to holders of Class A, A-1, A-3, and A-5 licenses upon payment of the sum of $62; or

(b) a combination sports license that permits a holder who is 12 years of age or older to exercise all rights granted in subsection (1)(a) and the additional rights granted to holders of a Class A-6 tag upon payment of the sum of $77.

(2) The department may furnish each holder of a combination sports license an appropriate decal.

87-2-711. *(Effective March 1, 2026)* **Class AAA—combination sports license.** (1) Except as otherwise provided in this chapter, a resident, as defined by 87-2-102, who is 12 years of age or older or who will turn 12 years old before or during the season for which the license is issued is entitled to:

(a) a combination sports license that permits a holder who is 12 years of age or older to exercise all rights granted to holders of Class A, A-1, A-3, and A-5 licenses upon payment of the sum of $64.50; or

(b) a combination sports license that permits a holder who is 12 years of age or older to exercise all rights granted in subsection (1)(a) and the additional rights granted to holders of a Class A-6 tag upon payment of the sum of $79.50.

(2) The department may furnish each holder of a combination sports license an appropriate decal.

History: En. Sec. 1, Ch. 109, L. 1989.

87-2-714. *(Temporary)* **Landowner preference for Class B-10 nonresident big game combination license.** (1) Subject to the provisions of subsection (6), 15% of licenses issued under 87-2-505 may be placed in a landowner preference pool for nonresident landowners to hunt only on property the landowner owns in fee title or on other private property the landowner leases to produce a crop as defined in 80-8-102.

(2) A nonresident landowner of record may designate an immediate family member to receive the license issued under this section. For purposes of this section, an immediate family member means a spouse, parent, grandparent, child, grandchild, sibling, niece, or nephew of the landowner by blood, marriage, or legal adoption.

(3) (a) To qualify to receive a Class B-10 license pursuant to this section, the landowner must own at least 2,500 contiguous acres in fee title. Subject to the provisions of subsections (3)(b) and (5), for each additional 2,500 contiguous acres owned by the landowner, the department may issue to the landowner or the landowner's immediate family members an additional Class B-10 license up to a maximum of five Class B-10 licenses per qualifying landowner.

(b) An individual may not hold more than one Class B-10 license.

(4) Applicants must pay the full Class B-10 license fee established in 87-2-505.

(5) If there is a sufficient number of licenses set forth in subsection (1) and multiple applications made per qualifying landowner, the department shall issue one license to each qualifying landowner or the landowner's immediate family member before it issues a second or subsequent license to any landowner or the landowner's immediate family member. All Class B-10 licenses not issued pursuant to this section shall be returned to the general draw pool available to all applicants pursuant to 87-2-505.

(6) The commission may, by rule, limit the overall number of licenses that can be provided to landowners or their immediate family members pursuant to this section to less than 15% of those available pursuant to 87-2-505.

(7) A landowner who receives a license pursuant to this section and who was enrolled in a department-administered private land hunting access program in the previous license year may purchase an additional bonus point for an elk or deer license or permit drawing for the fee established in 87-2-113.

87-2-714. *(Effective March 1, 2026)* **Landowner preference for Class B-10 nonresident big game combination license.** (1) Subject to the provisions of subsection (6), 15% of licenses issued under 87-2-505 may be placed in a landowner preference pool for nonresident landowners to hunt only on property the landowner owns in fee title or on other private property the landowner leases to produce a crop as defined in 80-8-102.

(2) A nonresident landowner of record may designate an immediate family member, an employee, or a person with a developmental disability or a physical disability as determined by the department to receive the license issued under this section.

(3) (a) To qualify to receive a Class B-10 license pursuant to this section, the landowner must own at least 2,500 contiguous acres in fee title. Subject to the provisions of subsections (3)(b) and (5), for each additional 2,500 contiguous acres owned by the landowner, the department may issue to the landowner or the landowner's designee an additional Class B-10 license up to a maximum of five Class B-10 licenses per qualifying landowner.

(b) An individual may not hold more than one Class B-10 license.

(4) Applicants must pay the full Class B-10 license fee established in 87-2-505.

(5) If there is a sufficient number of licenses set forth in subsection (1) and multiple applications made per qualifying landowner, the department shall issue one license to each qualifying landowner or the landowner's designee before it issues a second or subsequent license

to any landowner or the landowner's designee. All Class B-10 licenses not issued pursuant to this section shall be returned to the general draw pool available to all applicants pursuant to 87-2-505.

(6) The commission may, by rule, limit the overall number of licenses that can be provided to landowners or their designees pursuant to this section to less than 15% of those available pursuant to 87-2-505.

(7) A landowner who receives a license pursuant to this section and who was enrolled in a department-administered private land hunting access program in the previous license year may purchase an additional bonus point for an elk or deer license or permit drawing for the fee established in 87-2-113.

(8) For the purposes of this section, the following definitions apply:

(a) "Developmental disability" means a developmental disability as defined in 53-20-102.

(b) "Employee" means a person who works full-time and year-round for the landowner as part of the active farm or ranch operation enrolled in the block management program.

(c) "Immediate family member" means a spouse, parent, grandparent, child, grandchild, sibling, niece, or nephew of the landowner by blood, marriage, or legal adoption.

(d) "Physical disability" means a person experiencing a condition medically determined to be permanent and substantial and resulting in significant impairment of the person's functional ability.

87-2-721. Repealed. Sec. 16(1), Ch. 554, L. 1981.

History: En. 26-202.8 by Sec. 3, Ch. 546, L. 1975; amd. Sec. 13, Ch. 417, L. 1977; R.C.M. 1947, 26-202.8.

87-2-722. Auction of mountain sheep license. (1) The commission may issue one male mountain sheep license each year through a competitive auction. The commission shall promulgate rules for the use of the license and conduct of the auction. A wildlife conservation organization involved in the conservation of mountain sheep may be authorized by the commission to conduct the license auction, in which case the authorized organization may retain proceeds of the sale, not to exceed 10%, to cover reasonable auction expenses.

(2) All proceeds remaining from the auction, whether conducted by the commission or as otherwise authorized by the commission, must be used by the department for the substantial benefit of mountain sheep. The proceeds from the auction must be used in addition to any other funds the department uses for the management of mountain sheep. The department shall report the use or investment of auction proceeds to the office of budget and program planning as a part of the information required by 17-7-111.

History: En. Sec. 1, Ch. 414, L. 1985; amd. Sec. 50, Ch. 349, L. 1993.

87-2-725. Auction or lottery of mountain goat license — rules. (1) The commission may issue one mountain goat license each year through a competitive auction or lottery. The commission shall promulgate rules for the use of the license and conduct of the auction or lottery. A wildlife conservation organization involved in the conservation of mountain goats may be authorized to conduct the license auction or lottery, in which case the authorized organization may retain up to 10% of the proceeds of the sale to cover reasonable auction or lottery expenses.

(2) All proceeds remaining from the auction or lottery, whether conducted by the commission or as otherwise authorized by the commission, must be used by the department for the substantial benefit of mountain goats. The proceeds from the auction or lottery must be used in addition to any other funds that the department uses for the management of mountain goats.

History: En. Sec. 1, Ch. 40, L. 2005.

87-2-726 through 87-2-729 reserved.

87-2-730. Special wild buffalo license — regulation. (1) The public hunting of wild buffalo or bison that have been designated as a species in need of disease control under 81-2-120 is permitted only when authorized by the department of livestock under the provisions set forth in 81-2-120.

(2) The department may issue special licenses to hunt wild buffalo or bison designated as a species in need of disease control when authorized by the department of livestock.

(3) The department shall adopt rules in cooperation with the department of livestock. The rules must provide for:

(a) license drawing procedures;

(b) application fees consistent with 87-2-113;

(c) notification of license recipients as to when and where they may hunt;

(d) fair chase hunting of wild buffalo or bison, including requirements that hunting be conducted on foot and away from public roads and that there be no designation of specific wild buffalo or bison to be hunted;

(e) means of taking and handling of carcasses in the field, which must include provisions for public safety because of the potential for the spread of infectious disease;

(f) the use of bows and arrows and other hunting arms;

(g) tagging requirements for carcasses, skulls, and hides;

(h) possession limits;

(i) requirements for transportation and exportation; and

(j) requirements and criteria for authorization by the state veterinarian and the department of livestock of any public hunting.

87-2-731. Terminated. Sec. 5, Ch. 378, L. 2005.

History: En. Sec. 1, Ch. 378, L. 2005; amd. Sec. 3, Ch. 221, L. 2011.

87-2-732. Allocation of wild buffalo licenses to tribes for traditional purposes. (1) If the commission authorizes the issuance of 40 or more special wild buffalo licenses in any license year, the department shall also issue special licenses to two members of each tribe designated in subsection (3) to hunt wild buffalo during the regular season for wild buffalo in accordance with this section and department rules and regulations. The licenses must be issued free of charge.

(2) Wild buffalo taken with special licenses issued pursuant to this section must be harvested by tribal members for traditional purposes in accordance with the traditional ceremonies of each tribe. All parts of wild buffalo taken pursuant to this section may be possessed and used by each designated tribe in the manner that the tribe sees fit. The tribes must be informed of and abide by any rules adopted pursuant to 87-2-730(3)(c) through (3)(i), except that fair chase hunting by tribal members may include hunting conducted on horseback.

(3) Each of the following tribal governments in Montana may designate two tribal members to receive department-issued special licenses for use in accordance with this section:

(a) Assiniboine and Sioux tribes of the Fort Peck reservation;

(b) Blackfeet tribe;

(c) Chippewa Cree Indians of the Rocky Boy's reservation;

(d) Confederated Salish and Kootenai tribes;

(e) Fort Belknap Indian community of the Fort Belknap reservation;
(f) Northern Cheyenne tribe; and
(g) Little Shell Chippewa tribe.

(4) As used in this section, "traditional purposes" means the harvesting of buffalo by Plains Indians through utilitarian and spiritual practices handed down from generation to generation to obtain food, shelter, and clothing and to conduct ceremonies and celebrations.

History: En. Sec. 1, Ch. 196, L. 2017.

87-2-733 and 87-2-734 reserved.

87-2-735. *(Temporary)* **Landowner preference licenses and permits for deer and antelope.** (1) Subject to the provisions of subsection (2) and the limitation in subsection (3), a person who owns 160 acres or more of real property that is primarily used for agricultural purposes in a hunting district in which a limited number of deer or antelope licenses or permits are awarded must be issued, on application, a license or permit to hunt deer or antelope in the hunting district under the terms and conditions of the license or permit.

(2) When the real property is held jointly or in common by several persons, only one of the joint or common owners is entitled to the preference provided in this section, or the owners may designate their preference to a person who is an immediate family member or who is employed by the owner or owners as a land manager or in a similar capacity. Preference may not be awarded to a landowner if the hunting area is totally within the prescribed boundaries of public land.

(3) Fifteen percent of limited licenses or permits available each year in a hunting district for deer or antelope must be available to landowners under this section. If the number of persons applying pursuant to this section exceeds 15% of licenses and permits available for that hunting district, the department shall award the licenses and permits by drawing. The department shall provide a method of selecting first, second, and third choice hunting districts if a drawing is required.

87-2-735. *(Effective March 1, 2026)* **Landowner preference licenses and permits for deer and antelope.** (1) Subject to the provisions of subsection (2) and the limitation in subsection (3), a person who owns 160 acres or more of real property that is primarily used for agricultural purposes in a hunting district in which a limited number of deer or antelope licenses or permits are awarded must be issued, on application, a license or permit to hunt deer or antelope in the hunting district under the terms and conditions of the license or permit.

(2) When the real property is held jointly or in common by several persons, only one of the joint or common owners is entitled to the preference provided in this section, or the owners may designate their preference to a person who is an immediate family member, a person who is employed by the owner or owners as a land manager or in a similar capacity, or to a person with a developmental disability or a physical disability as determined by the department. Preference may not be awarded to a landowner if the hunting area is totally within the prescribed boundaries of public land.

(3) Fifteen percent of limited licenses or permits available each year in a hunting district for deer or antelope must be available to landowners under this section. If the number of persons applying pursuant to this section exceeds 15% of licenses and permits available for that hunting district, the department shall award the licenses and permits by drawing. The department shall provide a method of selecting first, second, and third choice hunting districts if a drawing is required.

2025 Amendment: See 2025 Session Law for amendment made by sec. 6, Ch. 359, L. 2025. Amendment effective March 1, 2026.

Part 8
Exceptions to License Requirements

87-2-801. Licenses for residents at least 62 years of age or at least 75 years of age. (1) A resident, as defined in 87-2-102, who is 62 years of age or older may purchase the following for one-half the cost:

(a) a conservation license;
(b) a Class A fishing license;
(c) a Class A-1 upland game bird license;
(d) a Class A-3 deer A tag;
(e) a Class A-5 elk tag;
(f) a Class AAA combination sports license that does not include a Class A-6 black bear tag.

(2) A resident, as defined in 87-2-102, who is 75 years of age or older may use a general elk license to harvest an antlerless elk:
(a) during any season in a hunting district in which a youth under 15 years of age may harvest an antlerless elk; and
(b) on privately owned land.

87-2-802. Veterans in VA hospitals and residents of state institutions and long-term care facilities, nursing care facilities, assisted living facilities, and community homes for persons with disabilities. (1) A veteran who is a patient residing at a hospital operated by the department of veterans affairs, within or outside the state, and residents of all institutions under the jurisdiction of the department of public health and human services may fish without a license. The residents shall carry a permit on a form prescribed by the department and signed by the superintendent of the institution in lieu of a license.

(2) Upon annual application by managers or directors of licensed long-term care facilities and assisted living facilities as defined in 50-5-101, community homes for persons with developmental disabilities licensed under 53-20-305, and community homes for persons with severe disabilities licensed under 52-4-203, the department shall allow supervised residents to fish without the otherwise required license during any activities approved by the facilities and homes.

Cross-References

Servicemen, servicewomen, and veterans, Art. II, sec. 35, Mont. Const.

87-2-803. Licenses for persons with disabilities — definitions. (1) Persons with disabilities who are residents of Montana not residing in an institution and are certified as disabled as prescribed by departmental rule may purchase the following for one-half the cost:
(a) a Class A fishing license;
(b) a Class A-1 upland game bird license;
(c) a Class A-3 deer A tag;
(d) a Class A-5 elk tag.

(2) A person who has purchased a conservation license and a resident fishing license, game bird license, deer tag, or elk tag for a particular license year and who is subsequently certified as disabled is entitled to a refund for one-half of the cost of the fishing license, game bird license, deer tag, or elk tag previously purchased for that license year.

(3) A person who is certified as disabled pursuant to subsection (4) and who was issued a permit to hunt from a vehicle for license year 2014 or a subsequent license year is automatically entitled to a permit to hunt from a vehicle for subsequent license years if the criteria for obtaining a permit do not change.

(4) A person may be certified as disabled by the department and issued a permit to hunt from a vehicle, on a form prescribed by the department, if the person meets the requirements of subsection (9).

(5) (a) A person with a disability carrying a permit to hunt from a vehicle, referred to in this subsection (5) as a permitholder, may hunt by shooting a firearm from:

(i) the shoulder, berm, or barrow pit right-of-way of a public highway, as defined in 61-1-101, except a state or federal highway;

(ii) within a self-propelled or drawn vehicle that is parked on a shoulder, berm, or barrow pit right-of-way in a manner that will not impede traffic or endanger motorists or that is parked in an area, not a public highway, where hunting is permitted; or

(iii) an off-highway vehicle or snowmobile, as defined in 61-1-101, in any area where hunting is permitted and that is open to motorized use, unless otherwise prohibited by law, as long as the off-highway vehicle or snowmobile is marked as described in subsection (5)(d) of this section.

(b) This subsection (5) does not allow a permitholder to shoot across the roadway of any public highway or to hunt on private property without permission of the landowner.

(c) A permitholder must have a companion to assist in immediately dressing any killed game animal. The companion may also assist the permitholder by hunting a game animal that has been wounded by the permitholder when the permitholder is unable to pursue and kill the wounded game animal.

(d) Any vehicle from which a permitholder is hunting must be conspicuously marked with an orange-colored international symbol of persons with disabilities on the front, rear, and each side of the vehicle, or as prescribed by the department.

(6) (a) A resident of Montana who is certified by the department as experiencing blindness, as defined in 53-7-301, may be issued a lifetime fishing license for the blind on payment of a one-time fee of $10. The license is valid for the lifetime of the blind individual and allows the licensee to fish as authorized by department rule. A conservation license and an aquatic invasive species prevention pass are not prerequisites to licensure under this subsection (6)(a).

(b) A person who is certified by the department as experiencing blindness, as defined in 53-7-301, may be issued regular resident deer and elk licenses, in the manner provided in subsection (1) of this section, and must be accompanied by a companion, as provided in subsection (5)(c) of this section.

(7) The department shall adopt rules to establish the qualifications that a person must meet to be a companion and may adopt rules to establish when a companion can be a designated shooter for a disabled person.

(8) As used in this section, "disabled person", "person with a disability", or "disabled" means or refers to a person experiencing a condition medically determined to be permanent and substantial and resulting in significant impairment of the person's functional ability.

(9) (a) A person qualifies for a permit to hunt from a vehicle if the person is certified by a licensed physician, a licensed chiropractor, a licensed physician assistant, or an advanced practice registered nurse to be nonambulatory, to have substantially impaired mobility, or to have a documented genetic condition that limits the person's ability to walk or carry significant weight for long distances.

(b) For the purposes of this subsection (9), the following definitions apply:

(i) "Advanced practice registered nurse" means a registered professional nurse who has completed educational requirements related to the nurse's specific practice role, as specified by the board of nursing pursuant to 37-8-202, in addition to completing basic nursing education.

(ii) "Chiropractor" means a person who has a valid license to practice chiropractic in this state pursuant to Title 37, chapter 12, part 3.

(iii) "Documented genetic condition" means a diagnosis derived from genetic testing and confirmed by a licensed physician.

(iv) "Nonambulatory" means permanently, physically reliant on a wheelchair or a similar compensatory appliance or device for mobility.

(v) "Physician" means a person who holds a degree as a doctor of medicine or doctor of osteopathy and who has a valid license to practice medicine or osteopathic medicine in this state.

(vi) "Physician assistant" has the meaning provided in 37-20-401.

(vii) "Substantially impaired mobility" means virtual inability to move on foot due to permanent physical reliance on crutches, canes, prosthetic appliances, or similar compensatory appliances or devices.

(10) Certification under subsection (9) must be on a form provided by the department.

(11) The department or a person who disagrees with a determination of disability or eligibility for a permit to hunt from a vehicle may request a review by the board of medical examiners pursuant to 37-3-203.
